

In the opinion of Squire Patton Boggs (US) LLP and Hardwick Law Firm, LLC, Co-Bond Counsel, under existing law assuming continuing compliance with certain covenants and the accuracy of certain representations, interest on the Series 2024 Bonds is (i) excluded from gross income for federal income tax purposes, except interest on any Series 2024 Bonds for any period during which it is held by a "substantial user" of the facilities financed or a "related person" of such substantial user, as those terms are used in Section 147(a) of the Internal Revenue Code of 1986, as amended (the "Code"), (ii) an item of tax preference for purposes of the federal alternative minimum tax imposed on individuals, and (iii) exempt from personal income taxes imposed by the State of New York and political subdivisions thereof, including The City of New York and the City of Yonkers, so long as that interest is excluded from gross income for federal income tax purposes. Interest on the Series 2024 Bonds may be subject to certain federal taxes imposed only on certain corporations. For a more complete discussion of the tax aspects, see "PART 18 – TAX MATTERS" herein.

Date: Date of Issuance

Due: As shown on the inside cover

The New York Transportation Development Corporation (the "Issuer") is issuing (i) its Special Facilities Revenue Bonds, Senior Series 2024A (Green Bonds) (AMT) (Current Interest Bonds) (JFK Airport Terminal 6 Redevelopment Project) (the "Series 2024A Bonds"), and (ii) its Special Facilities Revenue Bonds, Senior Series 2024B (AMT) (Convertible Capital Appreciation Bonds) (JFK Airport Terminal 6 Redevelopment Project) (the "Series 2024B Bonds") and, together with the Series 2024A Bonds, the "Series 2024 Bonds" pursuant to the TDC Master Bond Indenture of Trust, dated as of November 1, 2022, between the Issuer and The Bank of New York Mellon, as trustee (the "Trustee"), as supplemented and amended, including by that certain TDC Second Supplemental Bond Indenture of Trust to be dated as of November 1, 2024, among the Issuer, the Trustee and Assured Guaranty Inc., a Maryland domiciled financial guaranty insurance company, as the bond insurer (the "Bond Insurer") (as so supplemented and amended, the "Indenture"). The proceeds of the Series 2024 Bonds will be loaned to JFK Millennium Partners, LLC, a Delaware limited liability company (the "Borrower"), pursuant to the TDC Building Loan Agreement, dated as of November 1, 2022 as amended by the First Amendment to the TDC Building Loan Agreement to be dated as of November 1, 2024 (as so amended, the "TDC Building Loan Agreement") and the TDC Project Loan Agreement, dated as of November 1, 2022, as amended by the First Amendment to the TDC Project Loan Agreement to be dated as of November 1, 2024 (as so amended, the "TDC Project Loan Agreement") and, together with the TDC Building Loan Agreement, the "TDC Loan Agreements", each by and between the Issuer and the Borrower, and used to (i) refinance costs relating to the design and construction of the Project (as described herein), which includes, among other things, the new Terminal 6 ("Terminal 6") being constructed by the Borrower on the sites of the former Terminal 6 and current Terminal 7 at John F. Kennedy International Airport in Queens, New York (the "Airport"), including costs originally financed by a portion of the proceeds of the Loan Facility (as defined herein) and (ii) pay costs of issuance relating to the Series 2024 Bonds and costs associated with the payoff of the applicable portion of the Loan Facility, including costs, if any, of terminating the associated Permitted Hedge Agreements (as defined herein).

Pursuant to that certain Lease Agreement, dated as of November 17, 2022 by and between the Port Authority of New York and New Jersey (the "Port Authority") and the Borrower, as amended by that certain Supplemental Agreement, dated as of June 15, 2023 (as further supplemented and amended from time to time, the "Lease Agreement"), the Borrower is obligated to consummate: (i) the operation, maintenance and subsequent demolition of Terminal 7 at the Airport, including associated facilities as further described herein, (ii) the design, construction, financing, operation, and maintenance of Terminal 6 and certain ancillary facilities, and (iii) the design and construction of certain off-premises facilities at the Airport (the "Off-Premises Facilities") on behalf of the Port Authority, which Off-Premises Facilities will not be operated or maintained by the Borrower and will not constitute part of the facilities leased to the Borrower under the Lease Agreement (collectively, and as further described herein, the "Project"). The Lease Agreement expires on December 30, 2060, subject to earlier termination as described therein.

The costs of the Project incurred to date have been funded, and additional costs of the Project will be funded, with, among other lawfully available funds, (i) a portion of the proceeds of the Loan Facility and debt issued to refinance the Loan Facility, including the Series 2024 Bonds, Additional Senior Bonds (as defined herein), other Additional Senior Obligations (as defined herein) and/or Subordinate Obligations (as defined herein), (ii) certain revenues received from the operation of Terminal 7 and Terminal 6, (iii) equity contributions from the Borrower, and (iv) investment earnings.

The Borrower's obligations under the TDC Loan Agreements and the TDC Notes (as defined herein) are payable primarily from certain revenues the Borrower receives from the operation of Terminal 7 and Terminal 6, including payments made by airlines, providers of concession goods and services, and other commercial users of Terminal 7 and Terminal 6. See "PART 4 – SECURITY FOR THE SERIES 2024 BONDS," "PART 14 – AIRLINE REVENUES," and "PART 15 – NON-AIRLINE REVENUES" herein. The Series 2024 Bonds will be secured, on a parity basis with all other Senior Obligations (as defined herein), including, but not limited to, the Loan Facility, the Permitted Hedge Agreements and any Additional Senior Obligations, by certain collateral held by the Senior Collateral Agent, including, (i) all right, title, and interest of the Issuer (except for the Issuer's Reserved Rights as described herein) in and to the TDC Loan Agreements and the TDC Notes that has been assigned to the Senior Collateral Agent pursuant to the Issuer Assignment Agreements (as defined herein), (ii) certain collateral (including certain pledged funds and accounts) held by The Bank of New York Mellon, as senior collateral agent (the "Collateral Agent" or "Senior Collateral Agent"), pursuant to the Collateral Agency and Accounts Agreement, dated as of November 1, 2022, by and among the Borrower, the Collateral Agent, the Intercreditor Agent (as defined herein), the Issuer, the Trustee, the Administrative Agent (as defined herein), and the Bank of New York Mellon, as deposit account bank, as amended by the First Amendment to the Collateral Agency and Accounts Agreement to be dated as of November 1, 2024, by and among the Borrower, the Collateral Agent, the Intercreditor Agent, the Securities Intermediary, the Trustee, the Administrative Agent and the Issuer (as so amended and supplemented, the "Collateral Agency and Accounts Agreement"), (iii) the leasehold mortgages encumbering the Borrower's interest in the Lease Agreement, (iv) certain additional collateral held under certain documents and instruments more fully described herein, including the (a) Senior Security Agreement, (b) Senior Equity Pledge Agreement, (c) Assignments of Leases and Rents, and (d) Direct Agreements, and (v) all real and personal property that is subject to a Security Interest granted under any Security Document ((i)-(v), collectively, the "Collateral"). As described herein, certain segregated funds and accounts constitute segregated collateral and are pledged only to certain Obligations or classes of Obligations. The Series 2024 Bonds are also secured, together with any Additional Senior Bonds issued thereunder, by the moneys and obligations held by the Trustee under the Indenture (except moneys held in the Rebate Account).

The scheduled payment of principal of and interest on a portion of the Series 2024 Bonds identified on the inside cover page hereof (the "Insured Bonds") when due will be guaranteed under an insurance policy to be issued concurrently with the delivery of the Insured Bonds by the Bond Insurer. See "PART 6 – BOND INSURANCE."

The Series 2024 Bonds will be issued in book-entry-only form and will be registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York ("DTC"). The payment of the principal of and interest on the Series 2024 Bonds will be made by the Trustee directly to Cede & Co., as described herein. The Issuer has designated the Series 2024A Bonds as "Green Bonds" due to the environmental benefits of the projects expected to be financed with proceeds of the Series 2024A Bonds. The Series 2024A Bonds will be issued as fully registered bonds in denominations of \$5,000 or in integral multiples thereof and will bear interest at the rates shown on the inside cover hereof, payable semi-annually on June 30 and December 31 of each year, commencing on December 31, 2024. The Series 2024B Bonds will be issued as fully registered bonds in denominations that will result in Accreted Values at the respective Interest Commencement Dates being equal to \$5,000 or any integral multiple thereof, and (i) from their date of issuance until (but not including) their respective Interest Commencement Dates set forth on the inside cover hereof, interest shall accrue, but shall not be payable, at the rates set forth on the inside cover hereof, compounded semi-annually on June 30 and December 31 of each year, and (ii) commencing with their respective Interest Commencement Dates, shall bear interest at the rates shown on the inside cover hereof, payable semi-annually on June 30 and December 31 of each year. The Series 2024 Bonds will be subject to optional, extraordinary, and mandatory redemption prior to maturity as described herein. See "PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS – Redemption of the Series 2024 Bonds" herein.

The Series 2024 Bonds will be special and limited revenue obligations of the Issuer, payable solely out of the Trust Estate pledged under the Indenture referred to herein. None of the Series 2024 Bonds, the principal thereof, the interest thereon, or the redemption price thereof, shall ever constitute a debt of the State of New York (the "State"), the Port Authority, the New York Job Development Authority (the "JDA"), the New York State Urban Development Corporation (d/b/a Empire State Development) ("ESD"), or any other local development corporation, agency, or authority of the State (other than the Issuer), and none of the State, the Port Authority, JDA, ESD, or any other local development corporation, agency, or authority of the State (other than the Issuer) shall be liable on the Series 2024 Bonds. The Issuer has no power of taxation.

Investing in the Series 2024 Bonds is subject to numerous risks, including, but not limited to, those described in "PART 17 – RISK FACTORS" herein. This cover page contains certain information for quick reference only. It is not a summary of the Series 2024 Bonds. Investors must read this Official Statement and the appendices hereto in their entirety to obtain information essential to the making of an informed decision with respect to the Series 2024 Bonds.

The Series 2024 Bonds are being offered when, as, and if issued by the Issuer and accepted by the Underwriters (as defined herein), and subject to prior sale, withdrawal, or modification of the offer without notice and certain other conditions. Certain legal matters will be passed upon by Squire Patton Boggs (US) LLP, New York, New York, and Hardwick Law Firm, LLC, New York, New York, as Co-Bond Counsel to the Issuer, and BurgherGray LLP, New York, New York, as Issuer Counsel. Certain legal matters will be passed upon for the Issuer by its General Counsel, for the Borrower by its co-counsel, O'Melveny & Myers LLP, Los Angeles, California and Bryant Rabbino LLP, New York, New York, and for the Underwriters by their co-counsel, Katten Muchin Rosenman LLP, New York, New York and D. Seaton and Associates, P.A., P.C., New York, New York. It is expected that the Series 2024 Bonds will be available for delivery through the facilities of DTC in New York, New York, on or about November 5, 2024.

## IMPORTANT INFORMATION ABOUT THIS OFFICIAL STATEMENT

The information set forth herein has been obtained from the Issuer, the Borrower, and other sources which are believed to be reliable. As to information and expressions of opinion from the Borrower, they are to be construed as representations by or opinions of the Borrower and not representations by or opinions of the Issuer. The information and expressions of opinion contained in this Official Statement are subject to change without notice, and neither the delivery of this Official Statement nor any sale hereunder shall under any circumstances create any implication that there has been no change in the information or opinions stated herein or in the affairs of the Issuer or the Borrower since the date hereof.

The Issuer has provided the information set forth under the headings “PART 9 – PROJECT PARTICIPANTS – The Issuer” and “– Directors and Officers of the Issuer” and “PART 23 – LITIGATION – The Issuer,” but has not reviewed or approved, and makes no representation, warranty, or certification as to the adequacy or accuracy of, the information set forth anywhere else in this Official Statement.

The Borrower has provided all information in this Official Statement not provided by the Issuer, or the Underwriters (excluding “PART 6 – BOND INSURANCE”, “PART 7 – BOND INSURANCE RISK FACTORS”, “PART 16 – THE CONSULTANTS’ REPORTS”, “PART 18 – TAX MATTERS”, “PART 26 – MUNICIPAL ADVISOR” and Appendices B-1, B-2, B-3, B-4, I, K, L and M hereto).

The Underwriters have provided the following sentence for inclusion in this Official Statement. The Underwriters have reviewed the information in this Official Statement in accordance with and as part of their responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriters do not guarantee the accuracy or completeness of such information.

The order and placement of materials in this Official Statement, including the Appendices, are not to be deemed a determination of relevance, materiality or importance, and this Official Statement, including the cover page, the inside cover pages, and the Appendices, must be considered in its entirety. The captions and headings in this Official Statement are for convenience only and in no way define, limit or describe the scope or intent, or affect the meaning or construction, of any provisions or sections of this Official Statement. The offering of the Series 2024 Bonds is made only by means of this entire Official Statement.

The contents of this Official Statement are not to be construed as legal, business, or tax advice. Prospective investors should consult their own attorneys and business and tax advisors as to legal, business, and tax advice. Prospective investors should consult their own attorneys and business and tax advisors as to legal, business, and tax advice. In making an investment decision, prospective investors must rely on their own examination of the terms of the offering of the Series 2024 Bonds, including the merits and risks involved. This Official Statement is not to be construed as a contract or agreement between the Issuer and the purchasers or holders of any Series 2024 Bonds.

**THE SERIES 2024 BONDS HAVE NOT BEEN REGISTERED UNDER THE SECURITIES ACT OF 1933, AS AMENDED, AND THE INDENTURE HAS NOT BEEN QUALIFIED UNDER THE TRUST INDENTURE ACT OF 1939, AS AMENDED, IN RELIANCE UPON EXEMPTIONS CONTAINED IN SUCH ACTS. THE REGISTRATION OR QUALIFICATION OF THE SERIES 2024 BONDS IN ACCORDANCE WITH APPLICABLE PROVISIONS OF SECURITIES LAWS OF THE STATES IN WHICH THE SERIES 2024 BONDS HAVE BEEN REGISTERED OR QUALIFIED AND THE EXEMPTION FROM REGISTRATION OR QUALIFICATION IN OTHER STATES CANNOT BE REGARDED AS A RECOMMENDATION THEREOF.**

This Official Statement does not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of, the Series 2024 Bonds in any jurisdiction in which such offer, solicitation, or sale is not qualified under applicable law or to any person to whom it is unlawful to make such offer, solicitation, or sale.

**THESE SECURITIES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE SECURITIES AND EXCHANGE COMMISSION OR ANY STATE SECURITIES COMMISSION, NOR HAS THE SECURITIES AND EXCHANGE COMMISSION OR ANY STATE SECURITIES COMMISSION PASSED UPON THE ACCURACY OR ADEQUACY OF THIS OFFICIAL STATEMENT. ANY REPRESENTATION TO THE CONTRARY MAY BE A CRIMINAL OFFENSE.**

Where statutes, reports, agreements, or other documents are referred to herein, reference should be made to such statutes, reports, agreements, or other documents for more complete information regarding the rights and obligations of the parties thereto, facts and opinions contained therein, and the subject matter thereof, and all summaries of such statutes, reports, agreements, or other documents are qualified in their entirety by reference to such statutes, reports, agreements, or other documents.

Certain statements included or incorporated by reference in this Official Statement constitute “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995, Section 21E of the United States Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act. Such statements are generally identifiable by the terminology used, such as “plan,” “expect,” “estimate,” “budget,” “intend,” “projection,” or other similar words. Such forward-looking statements include, but are not limited to, certain statements contained in the information in APPENDIX B-1 – “REPORT OF THE AIRPORT CONSULTANT,” APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR,” APPENDIX B-4 – “REPORT OF THE INSURANCE CONSULTANT,” and APPENDIX B-2 – “REPORT OF THE AIRLINE TRAFFIC FORECAST CONSULTANT.” Such forward-looking statements speak only as of the date of this Official Statement. A number of important factors affecting the Borrower, Terminal 7, Terminal 6 and the Project could cause actual results to differ materially from those stated in the forward-looking statements.

Forward-looking statements inherently are subject to a variety of risks and uncertainties that could cause actual results to differ materially from those projected. Such risks and uncertainties include, among others, general economic and business conditions, changes in political, social, and economic conditions, regulatory initiatives and compliance with governmental regulations, litigation and various other events, conditions, and circumstances, many of which are beyond the control of the Borrower. **THE BORROWER AND THE ISSUER DISCLAIM ANY OBLIGATION OR UNDERTAKING TO RELEASE PUBLICLY ANY UPDATES OR REVISIONS TO ANY FORWARD-LOOKING STATEMENT CONTAINED HEREIN TO REFLECT ANY CHANGE IN THE EXPECTATIONS WITH REGARD THERETO OR ANY CHANGE IN EVENTS, CONDITIONS, OR CIRCUMSTANCES ON WHICH ANY SUCH STATEMENT IS BASED.**

References to website addresses presented herein are for informational purposes only and may be in the form of a hyperlink solely for the reader’s convenience. Unless specified otherwise, such web sites and the information or links contained therein are not incorporated into, and are not part of, this Official Statement.

The Series 2024A Bonds have been designated as “Green Bonds.” Kestrel (“Kestrel”) has provided an independent external review and opinion that the Series 2024A Bonds conform with the four core components of the International Capital Market Association Green Bond Principles and therefore qualify for Green Bonds designation. The Series 2024B Bonds have not been designated as Green Bonds as certain

aspects of the Project are not currently eligible for financing or refinancing with Green Bonds. For more information, see “PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS – Green Bonds Designation – Series 2024A” herein and APPENDIX M – “GREEN BONDS SECOND PARTY OPINION.”

Assured Guaranty Inc. (“AG” or “Bond Insurer”) makes no representation regarding the Series 2024 Bonds or the advisability of investing in the Series 2024 Bonds. In addition, AG has not independently verified, makes no representation regarding, and does not accept any responsibility for the accuracy or completeness of this Official Statement or any information or disclosure contained herein, or omitted herefrom, other than with respect to the accuracy of the information regarding AG supplied by AG and presented under the heading “PART 6 – BOND INSURANCE” and APPENDIX L – “SPECIMEN MUNICIPAL BOND INSURANCE POLICY.”

**THIS OFFICIAL STATEMENT INCLUDES THE COVER PAGE, THE INSIDE COVER PAGE, THE SUMMARY STATEMENT, THE APPENDICES, AND THE INFORMATION INCLUDED BY SPECIFIC CROSS-REFERENCE HEREIN AND SHOULD BE READ IN ITS ENTIRETY. INFORMATION CONTAINED ON THE WEBSITES OF THE BORROWER, THE ISSUER, OR THE CONSULTANTS DO NOT CONSTITUTE PART OF THIS OFFICIAL STATEMENT. THE FORM SECOND SUPPLEMENTAL TRUST INDENTURE, FORM FIRST AMENDMENT TO COLLATERAL AGENCY AND ACCOUNTS AGREEMENT, FORM FIRST AMENDMENTS TO TDC LOAN AGREEMENTS AND FORM FIRST AMENDMENT TO INTERCREDITOR AGREEMENT ATTACHED HERETO IN APPENDICES D-1, D-2, D-4 AND D-5, RESPECTIVELY, ARE FORM DOCUMENTS AND REMAIN SUBJECT TO FINALIZATION THROUGH THE DATE OF DELIVERY OF THE SERIES 2024 BONDS.**

## SUMMARY STATEMENT

This Summary Statement is subject in all respects to more complete information contained in this Official Statement and should not be considered a complete statement of the facts material to making an investment decision. The offering of the Series 2024 Bonds to potential investors is made only by means of the entire Official Statement. Capitalized terms used in this Summary Statement and not defined in this Summary Statement will have the meanings given to such terms in APPENDIX A – “DEFINITIONS” or as otherwise defined elsewhere in this Official Statement.

### **The Offering**

The proceeds of the Series 2024 Bonds will be used to refinance costs associated with the Project. Construction on Phase 1 of the Project commenced in the fourth quarter of 2022 and is ongoing across the terminal, airside and landside scopes of work. See “SUMMARY STATEMENT – The Project,” “PART 11 – THE PROJECT – Construction Progress” and APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR” for more information about the Project development status to date. For information about use of proceeds of the Green Bonds, see “PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS – Green Bonds Designation – Series 2024A” and APPENDIX M – “GREEN BONDS SECOND PARTY OPINION.”

The Project is estimated to cost approximately \$5.0 billion, which has been funded to date, and which the Borrower anticipates will continue to be funded, with the proceeds of the hereinafter defined Loan Facility (as the same is being partially refinanced with the proceeds of the Series 2024 Bonds and is expected to be further refinanced in the future from the proceeds of Additional Senior Obligations or Subordinate Obligations), operating revenues, equity contributions from the Borrower and investment earnings. Pursuant to the Lease Agreement, the aggregate principal amount of the Borrower’s debt secured by the Leasehold Mortgages shall not exceed a maximum amount of \$4,225,000,000. See “PART 3 – Lease Constraint on Indebtedness,” “PART 10 – THE LEASE AGREEMENT,” and APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Project Financing.” These indebtedness restrictions set forth in the Lease Agreement are for the sole benefit of the Port Authority and can be waived or amended by the Port Authority without the consent of the holders of the Series 2024 Bonds or other Senior Obligations, although such restrictions as effectuated through the Leasehold Mortgages would require consent of the Senior Secured Parties (including holders of the Series 2024 Bonds) to amend in accordance with the Financing Documents.

The Borrower’s obligations under the TDC Loan Agreements and the corresponding TDC Notes are payable primarily from revenues to be earned by the Borrower from the operation of Terminal 7 and Terminal 6. See “PART 14 – AIRLINE REVENUES” and “PART 15 – NON-AIRLINE REVENUES” herein.

The Series 2024 Bonds, the Loan Facility, the Permitted Hedge Agreements and any Additional Senior Obligations will be secured on a parity basis by

certain Senior Collateral, including leasehold mortgages encumbering the Borrower's interest in the Lease Agreement and certain security held under certain documents and instruments, including the (i) Collateral Agency and Accounts Agreement, (ii) Senior Security Agreement, (iii) Senior Equity Pledge Agreement, (iv) Assignments of Leases and Rents, and (v) Direct Agreements.

### **The Project**

The Project includes the eventual decommissioning and demolition of Terminal 7 at the Airport, including associated facilities to be decommissioned and demolished in accordance with the Lease Agreement ("Terminal 7") and the design and construction of Terminal 6 (as defined below), consisting of approximately 1,200,000 square feet of space, including 10 aircraft gates (nine widebody gates and one narrowbody gate), as well as associated aircraft ramp and apron areas, a consolidated Federal Inspection Services ("FIS") facility, a seamless post-security connection between Terminal 6 and Terminal 5 ("Terminal 5"), at least three airline lounges (two of which will have direct boarding to aircraft), concourses, concession areas, inbound and outbound baggage handling systems, utility and mechanical rooms, stairwells, stairways, escalators and elevators, arrival and departure roadways, and all fixtures, furnishings and equipment necessary for the operation of a world-class passenger terminal building capable of handling international and domestic passenger traffic, as described in the Lease Agreement as the "New Terminal Facilities" (collectively, "Terminal 6"). The Project also includes development and construction of a new ground transportation center, including for-hire-vehicle parking and personal vehicles loading area. For a more detailed description of the full scope of the Project, as well as phasing thereof, see "PART 11 – THE PROJECT."

Construction of the Project commenced in the fourth quarter of 2022 and has been progressing largely on schedule. See "PART 11 – THE PROJECT."

### **Authorization and Purpose; Series 2024 Bonds are Limited Obligations**

The New York Transportation Development Corporation (the "Issuer") is issuing its (i) Special Facilities Revenue Bonds, Senior Series 2024A (Green Bonds) (AMT) (Current Interest Bonds) (JFK Airport Terminal 6 Redevelopment Project) (the "Series 2024A Bonds"), and (ii) Special Facilities Revenue Bonds, Senior Series 2024B (AMT) (Convertible Capital Appreciation Bonds) (JFK Airport Terminal 6 Redevelopment Project) (the "Series 2024B Bonds" and, together with the Series 2024A Bonds, the "Series 2024 Bonds"), pursuant to (i) resolutions of the Issuer adopted on August 28, 2024 and October 1, 2024 authorizing the issuance and sale of the Series 2024 Bonds and (ii) the Indenture. Proceeds of the Series 2024 Bonds will be loaned to JFK Millennium Partners, LLC, a Delaware limited liability company (the "Borrower"), pursuant to the TDC Loan Agreements and used, together with other lawfully available moneys, to (i) refinance costs relating to the design and construction of the Project and (ii) pay costs of issuance relating to the Series 2024 Bonds and costs associated with the payoff of the applicable portion of

the Loan Facility, including costs, if any, of terminating the associated Permitted Hedge Agreements.

The Series 2024 Bonds are special limited revenue obligations of the Issuer payable solely from the payments made by the Borrower under the TDC Loan Agreements and the TDC Notes, the Trust Estate as described in the Indenture, and the Senior Collateral as described in the Collateral Agency and Accounts Agreement.

**Security for the  
Series 2024 Bonds**

The Series 2024 Bonds will be secured on a parity basis with all other Senior Obligations, including, but not limited to, the Loan Facility, the Permitted Hedge Agreements and any Additional Senior Obligations by certain collateral held by the Senior Collateral Agent, including (i) the leasehold mortgages encumbering the Borrower's interest in the Lease Agreement, (ii) all right, title, and interest of the Issuer in and to the TDC Loan Agreements and the TDC Notes that has been assigned to the Senior Collateral Agent pursuant to the Issuer Assignment Agreements (as defined herein), (iii) certain collateral (including certain pledged funds and accounts) held by the Collateral Agent under the Collateral Agency and Accounts Agreement, and (iv) certain additional collateral held under certain documents and instruments more fully described herein, including the (a) Senior Security Agreement, (b) Senior Equity Pledge Agreement, (c) Assignments of Leases and Rents, and (d) Direct Agreements. In addition, the Series 2024 Bonds, together with other Senior Bonds issued or to be issued under the Indenture, will be secured by moneys and obligations held by the Trustee under the Indenture (except moneys held in the Rebate Account). Certain collateral constitutes Segregated Collateral, solely for the benefit of certain Obligations or classes of Obligations as designated in the Financing Documents, and as more fully described herein.

The Borrower derives revenues to pay its operating expenses and loan obligations, including obligations with respect to the Series 2024 Bonds, the Loan Facility and the Permitted Hedge Agreements, primarily from certain revenues it receives from the operation of Terminal 7 and Terminal 6. See "PART 14 – AIRLINE REVENUES," and "PART 15 – NON-AIRLINE REVENUES."

Project Revenues will be deposited in a Pre-Substantial Completion Revenue Account until (but not including) the Phase 2 End of Funding Date, after which Project Revenues will be deposited in a Post-Substantial Completion Revenue Account. Amounts will be transferred from such accounts monthly, in accordance with a series of priorities established in the Collateral Agency and Accounts Agreement, subject to certain restrictions as in effect from time to time therein and in the other Financing Documents. See "PART 5 – FLOW OF FUNDS UNDER THE COLLATERAL AGENCY AND ACCOUNTS AGREEMENT."

**Debt Service Reserve  
Accounts**

The Collateral Agency and Accounts Agreement establishes a Senior Debt Service Reserve Account, which will be funded on the Phase 2 End of Funding Date in an amount equal to the Senior Debt Service Reserve Requirement and will secure the Series 2024 Bonds, the Loan Facility, ordinary course payments on the Permitted Hedge Agreements and any Additional Senior Obligations issued in accordance with the Collateral Agency and Accounts Agreement and the other Financing Documents.

The Senior Debt Service Reserve Account is a pledged account that will be maintained by the Securities Intermediary and constitutes Segregated Collateral solely for the benefit of the Senior Secured Parties; the Security Interest thereon pursuant to the Senior Security Agreement shall be held by the Collateral Agent for the exclusive benefit of the Senior Secured Parties.

The Debt Service Reserve Requirement for the Senior Debt Service Reserve Account on the Phase 2 End of Funding Date and on each Transfer Date thereafter is the Aggregate Debt Service with respect to all Outstanding Senior Obligations during the next succeeding twelve (12) month period, net of up to the Aggregate Debt Service with respect to the Outstanding Senior Obligations during the next succeeding three (3) month period, to the extent such amounts are then on deposit in the Ramp-Up Reserve Account.

All or any portion of the cash in any Debt Service Reserve Account may be replaced with a standby letter of credit, at the option of the Borrower subject to certain conditions, the primary beneficiary of which shall be the Collateral Agent, and, subject to certain covenants regarding the use of the Series 2024 Bond proceeds, the cash, if any, being replaced shall be transferred to the Post-Substantial Completion Revenue Account.

**Liquidity Reserve  
Account**

The Liquidity Reserve Account is a pledged account that will be maintained by the Securities Intermediary and shall constitute Collateral for the benefit of the Secured Parties.

Concurrently with the execution of the Lease Agreement, the Borrower funded a Liquidity Reserve Account in an amount of \$100,000,000 which, as of August 31, 2024, had a balance of \$105,008,910 all of which remains on deposit therein. Amounts on deposit in the Liquidity Reserve Account are available to address unforeseen liquidity events or any other needs of the Project, as determined by the Borrower, and, in particular, amounts on deposit in the Liquidity Reserve Account shall be available (A) to pay Project Costs, but not to pay Permitted Tax Distributions or transfer funds to the Remaining Revenue Account, and (B) on and after the Phase 2 End of Funding Date, (x) if the amount in the Liquidity Reserve Account exceeds the amount equal to six (6) months of the aggregate of Ground Rent, First Additional Rent, Second Additional Rental, Third Additional Rent, and Concessions Revenue Rent (collectively, the “Required Liquidity Reserve Amount”), and (y) any amount in the Liquidity Reserve Account in excess of the Required Liquidity Reserve Amount may be transferred to the Distribution Account, if the Restricted

Payment Conditions have been met, or may be transferred, at the election of the Borrower, to any other account created under the Collateral Agency and Accounts Agreement, including any reserve account.

Beginning on the first Quarterly Distribution Date following the date on which aggregate distributions made by the Borrower to Equity Members from the Distribution Account equal the aggregate amount of equity invested by the Equity Members in the Project to such date, so long as no Default or Event of Default has occurred and is continuing, amounts remaining in the Liquidity Reserve Account shall be transferred to the Distribution Account (without (and not subject to) any conditions, restrictions or limitations) for distribution by the Borrower to the Equity Members in equal installments on each Quarterly Distribution Date over the remainder of the term of the Lease Agreement.

No additional deposits are required to be made to the Liquidity Reserve Account, even if the amount in such account falls below the Required Liquidity Reserve Amount.

**Ramp-Up Reserve Account**

The Ramp-Up Reserve Account is a pledged account that will be maintained by the Securities Intermediary and shall constitute Segregated Collateral solely for the benefit of the Senior Secured Parties. The Ramp-Up Reserve Account is intended to provide additional debt service reserves for the Senior Obligations during the Ramp-Up Period. The Borrower will fund the Ramp-Up Reserve Account on the Phase 2 End of Funding Date with proceeds from the subaccounts of the Construction Account allocated for such purpose (with the particular subaccount(s) of the Construction Account to be determined at the Borrower's election at the time of each such funding, subject to certain restrictions regarding the application of proceeds of Tax-Exempt Obligations) in an amount equal to the Aggregate Debt Service with respect to all Outstanding Senior Obligations during the next succeeding nine (9) month period (said amount being, as of any date determination, the "Ramp-Up Reserve Requirement"), and thereafter additional deposits shall be made in accordance with the requirements of "PART 5 – FLOW OF FUNDS UNDER THE COLLATERAL AGENCY AND ACCOUNTS AGREEMENT – Flow of Funds Post-Substantial Completion" herein. No additional funds will be deposited into the Ramp-Up Reserve Account after the discharge of the Senior Bank Obligations.

For each Calculation Date during the Ramp-Up Period, the Borrower shall calculate the Senior Debt Service Coverage Ratio and the Ramp-Up Debt Service Coverage Ratio for the immediately preceding DSCR Calculation Period. If, on any date on which any debt service payment (whether fees, interest, principal, and/or other debt service payments) is due on any Senior Obligations, the Senior Debt Service Coverage Ratio for the immediately preceding Calculation Date was less than 1.30:1.00, the Collateral Agent shall transfer from the Ramp-Up Reserve Account to the relevant Sub-Account(s) of the Senior Obligations Payment Account (as directed by the Borrower) funds to make payment of debt service due and payable on the applicable Transfer

Date in an aggregate amount necessary to cause the Ramp-Up Debt Service Coverage Ratio for such immediately preceding calendar quarter to be equal to 1.30:1.00. On the Ramp-Up End Date (which is the first date after the day on which the Ramp-Up Debt Service Coverage Ratio has been equal to or above 1.40:1.00 for eight consecutive Calculation Dates), all remaining amounts on deposit in the Ramp-Up Reserve Account shall be transferred, (i) first, to the Senior Debt Service Reserve Account, to the extent necessary to bring the balance of the Senior Debt Service Reserve Account up to an amount equal to the Senior Debt Service Reserve Requirement, and (ii) second, to the Post-Substantial Completion Revenue Account, provided that any proceeds of Tax-Exempt Obligations shall only be used for permitted uses in accordance with the Code.

**Rate Covenant/  
Financial Ratio  
Covenant**

The Borrower has covenanted in the Collateral Agency and Accounts Agreement, for the benefit of all Secured Parties, to take all lawful measures to establish, prescribe and collect Project Revenues sufficient, after paying all O&M Expenses, to achieve, in each DSCR Calculation Period, (i) during the Ramp-Up Period, (A) a Total Debt Service Coverage Ratio of 1.25x and (B) a Senior Debt Service Coverage Ratio of 1.30x, and (ii) after the Ramp-Up End Date, (A) a Total Debt Service Coverage Ratio of 1.15x and (B) a Senior Debt Service Coverage Ratio of 1.20x, both on a prospective basis (based on Borrower forecasts) and on a retrospective basis (based on the most recently delivered quarterly financial statements), subject to the terms of the Collateral Agency and Accounts Agreement.

If the Senior Debt Service Coverage Ratio or Total Debt Service Coverage Ratio requirement is not projected to be met for an upcoming fiscal year, then the Borrower shall be required to request a third party to recommend revisions to its Annual Operating Budget and, after taking into account such recommendations, to revise its Annual Operating Budget to produce (to the extent practicable using prudent business judgment) sufficient revenues to satisfy such Senior Debt Service Coverage Ratio or Total Debt Service Coverage Ratio requirement. Failure to satisfy the rate covenant shall not be deemed an event of default under the Collateral Agency and Accounts Agreement or other Financing Documents so long as the Borrower revises its Annual Operating Budget as recommended by the applicable third party, insofar as practicable using prudent business judgment, so as to cure such failure.

Subject to the Intercreditor Agreement, certain events of default under the Common Terms Agreement and other financing documents related specifically to the Loan Facility do not automatically permit the exercise of remedies by the Senior Collateral Agent, unless (x) the Standstill Period has expired, (y) the Senior Bank Obligations have been accelerated in accordance with the Senior Bank Financing Documents (which acceleration would then trigger cross-acceleration of the Series 2024 Bonds without action taken by the holders of the Series 2024 Bonds), and (z) the Administrative Agent has instructed the Intercreditor Agent to instruct the Senior Collateral Agent to exercise an

Enforcement Action of the types contemplated in clauses (a) and (b) of the definition thereof with respect to such event of default.

**Additional  
Obligations**

The Borrower has covenanted in the Collateral Agency and Accounts Agreement not to incur Additional Senior Obligations or Additional Subordinate Obligations unless certain requirements have been met, including (i) satisfaction of the applicable Lease Agreement requirements as in effect on November 1, 2022, (ii) historical and projected compliance with the rate covenant/financial ratio covenant (with certain modifications in the case of certain Additional Subordinate Obligations), and (iii) in the case of Additional Senior Obligations only, the Rating Agencies then rating the then-existing Senior Obligations affirm (1) that such then-existing senior debt will maintain a rating of BBB, Baa2 or its equivalent or higher, by not less than two Rating Agencies, after giving pro forma effect to the incurrence of such Additional Senior Obligations, or (2) that the ratings on the then-existing Senior Obligations, after giving pro forma effect to the incurrence of such Additional Senior Obligations, will not be lowered as a result of the incurrence of the Additional Senior Obligations.

The Borrower will not be required to meet the requirements of clause (ii) above in order to incur Additional Senior Obligations if: (A) the proposed Additional Senior Obligations or Additional Subordinate Obligations are deemed Completion Obligations and the aggregate principal amount of such Completion Obligations to be issued for completion purposes does not exceed 10% of the aggregate original principal amount of all Secured Obligations previously issued for the applicable improvements, or (B) the proposed Additional Senior Obligations or Additional Subordinate Obligations are to be issued to refund Outstanding Senior Obligations or Outstanding Subordinate Obligations, as applicable, and the proposed incurrence does not result in an increase in Annual Debt Service in any Fiscal Year on all Outstanding Senior Obligations or Outstanding Subordinate Obligations, as applicable, following the incurrence of such Additional Senior Obligations or Additional Subordinate Obligations.

The Common Terms Agreement has certain additional restrictions on the incurrence of Additional Obligations by the Borrower for so long as the Senior Bank Obligations are outstanding. These additional restrictions are for the sole benefit of the holders of the Senior Bank Obligations, are subject to waiver or amendment thereby in their sole discretion and will no longer apply following the discharge of the Senior Bank Obligations. See APPENDIX F-1 – “FORM OF COMMON TERMS AGREEMENT.”

**The Lease  
Agreement**

Pursuant to the Lease Agreement, the Port Authority has leased to the Borrower real property and improvements thereon comprising the Premises, subject in each case to certain conditions.

Under the Lease Agreement, the Borrower is entitled to charge, collect, and retain revenues derived from its operation and management of Terminal 7 and

Terminal 6, including by subleasing or otherwise making available such facilities for use by airline, concession, and certain other tenants. The Borrower's revenue streams from the operation of Terminal 7 and Terminal 6 are expected to comprise the Borrower's principal sources of funds for repayment of the Series 2024 Bonds and the Loan Facility and for other obligations of the Borrower, including Rentals owed by the Borrower to the Port Authority and other amounts owed under the Lease Agreement. SEE "PART 14 – AIRLINE REVENUES," "PART 15 – NON-AIRLINE REVENUES", and APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Rental."

The Lease Agreement expires on the earliest to occur of: (i) December 30, 2060, (ii) the date of termination of the Basic Lease, or (iii) any earlier termination of the Lease Agreement in accordance with its terms.

Upon the occurrence of certain limited termination events set forth in the Lease Agreement, the Lease Agreement may be terminated by either the Port Authority or the Borrower, and the Lease Agreement will automatically terminate upon the termination of the Basic Lease. The Port Authority will not be obligated to make a termination payment to the Borrower, except in certain limited circumstances, which payment will be subject and subordinate to the Port Authority's payment of debt service on its Consolidated Bonds and certain payments into the Port Authority's General Reserve Fund, the amount of which will vary depending on the circumstances. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT."

## **Plan of Finance**

The Project has been, and is expected to continue to be, funded from a number of sources, including (i) prior to giving effect to the paydown of a portion thereof with a portion of the proceeds of the Series 2024 Bonds, \$2,482,000,000 from amounts drawn through September 30, 2024 under the Loan Facility, (ii) up to approximately \$962,000,000 of additional proceeds of the Loan Facility, (iii) \$1,300,000,000 in equity contributions from the Equity Members to JFK Millennium Partners Holdings, LLC ("HoldCo") for further contribution to the Borrower, (iv) approximately \$84,316,214 from operating revenues and reinvestment thereof, (v) approximately \$61,929,330 in investment income during construction and (vi) approximately \$900,000 payable by the Port Authority to the Borrower in connection with the design and construction of a fuel line pursuant to the Lease Agreement. Funds received from issuance of the Series 2024 Bonds will also be used to pay costs of issuance. The operation of Terminal 7 and Terminal 6 is expected to generate operating revenues and require payment of operating expenses.

This transaction is the first of multiple anticipated refinancings. After giving effect to the issuance of the Series 2024 Bonds, approximately \$508,453,869 will remain Outstanding under the Loan Facility, with approximately \$962,000,000 of undrawn capacity available to be drawn and applied to the remaining costs of the Project. The Borrower intends to refinance the

outstanding balance of the Loan Facility prior to the scheduled maturity in November 2029, subject to market conditions as in effect from time to time.

**The D&C Contract**

The Project is being undertaken pursuant to that certain Design-Build Contract (as supplemented and amended from time to time, the “D&C Contract”) dated the Original Closing Date (as defined herein) between the Borrower and Hunt Construction Group, Inc. (the “D&C Contractor”), pursuant to which substantially all of the Design Work and Construction Work (the “D&C Work”) relating to the Project has been and will continue to be undertaken by the D&C Contractor consistent with a guaranteed maximum price and date certain basis.

The D&C Contract is, subject to the terms and conditions set forth therein (including, without limitation, such terms and conditions that explicitly impose an obligation on the Borrower and the limitation of the D&C Contractor’s liability), “back-to-back” with the D&C Work related obligations and liabilities imposed on the Borrower in the Lease Agreement, excluding certain limited matters specifically identified in the D&C Contract as obligations of the Borrower. See “PART 12 – THE D&C CONTRACT – DB D&C Work” and APPENDIX G – “SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT.”

The D&C Contractor has provided a guaranty (the “DB Guaranty”) from its parent company, AECOM, a Delaware corporation. The rights and benefits of the Borrower with respect to such DB Guaranty has been assigned to the Collateral Agent and the Port Authority is a permitted assignee of such DB Guaranty. “PART 12 – THE D&C CONTRACT – Construction Security – Parent Company Guaranty.”

**Operation and Management of the Project**

The Borrower is responsible under the Lease Agreement for the operation, management, administration, and maintenance of the Premises, including any repair, modification, reconstruction, rehabilitation, restoration, renewal and replacement of the Premises, all as required under the Lease Agreement (collectively, the “Operations and Maintenance Work”). Pursuant to that certain Management Services Agreement, dated the Original Closing Date (as supplemented and amended from time to time, the “Management Services Agreement”) by and between the Borrower and Vantage Airport Group (JFK) Ltd. (the “Manager”), the Manager has agreed to provide the Borrower with certain operation and maintenance services and support through December 30, 2060, or until the earlier termination of the Management Services Agreement or the Lease Agreement in accordance with the applicable terms thereof. Vantage Airport Group (US) Ltd. has guaranteed the obligations of the Manager (such guaranty, the “Manager Guarantee”). The Collateral Agent and the Port Authority are permitted assignees of the Manager Guarantee. SEE “PART 10 – THE LEASE AGREEMENT” AND APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Conduct of Operations.”

Pursuant to the Management Services Agreement, the Manager, through additional personnel, including a Project Manager, Project Director and Design Manager, Executive and non-Executive staff, and other third-party resources, provides day-to-day management of the Borrower's business and operations, including concession management and the management of the D&C Work, as further set forth in "PART 13 – OPERATION AND MANAGEMENT OF THE PROJECT" hereof.

A portion of the services to be performed under the Management Services Agreement, including design and construction contract administration, public affairs support, and stakeholder outreach has been subcontracted to RXR JMP Development Services LLC (the "Manager Subcontractor") for fulfillment, who is entitled to a fee from the Manager for its services and to reimbursement of reasonable costs and expenses paid or incurred by the Manager Subcontractor in connection with rendering such services.

With certain limited exceptions set forth in the Lease Agreement, the management fees and expenses of the Manager will be paid from revenues of the Borrower prior to debt service on the outstanding Senior Obligations, including the Series 2024 Bonds, as part of the Borrower's Permitted O&M Expenses. The Manager reports and is accountable to HoldCo's Board of Directors. See "PART 13 – OPERATION AND MANAGEMENT OF THE PROJECT" and APPENDIX H – "SUMMARY OF CERTAIN PROVISIONS OF THE MANAGEMENT SERVICES AGREEMENT."

**Restricted  
Distributions**

The Collateral Agency and Accounts Agreement imposes certain restrictions on transfers from the Remaining Revenue Account and the Surplus Remaining Revenue Account to the Distribution Account, which Distribution Account is not a Project Account and is not pledged for the benefit of the Secured Parties. Funds may be transferred from the Remaining Revenue Account and the Surplus Remaining Revenue Account (*pro rata*) to the Distribution Account quarterly, subject to satisfaction of Restricted Payment Conditions, including, without limitation, a restriction on making distributions prior to the Substantial Completion of the Project, and subject to application of the Loan Facility and Balloon Indebtedness cash sweeps, if and when applicable. See "PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Collateral Agency and Accounts Agreement – Restricted Distributions."

Until the discharge in full of the Senior Bank Obligations and the Series 2022 Bonds, certain additional restricted payment conditions will apply pursuant to the Common Terms Agreement. See APPENDIX F-1 – "FORM OF COMMON TERMS AGREEMENT" hereto. These additional restrictions are for the sole benefit of the holders of the Senior Bank Obligations and are subject to waiver or amendment thereby in their sole discretion, and such additional restricted payment conditions will no longer apply following the discharge of the Loan Facility.

Commencing 10 years prior to the scheduled maturity thereof, the Borrower has agreed to apply certain amounts distributed from the Remaining Revenue Account and the Surplus Remaining Revenue Account to the redemption of a portion of the Series 2024A Balloon Indebtedness. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Collateral Agency and Accounts Agreement – Restricted Distributions.”

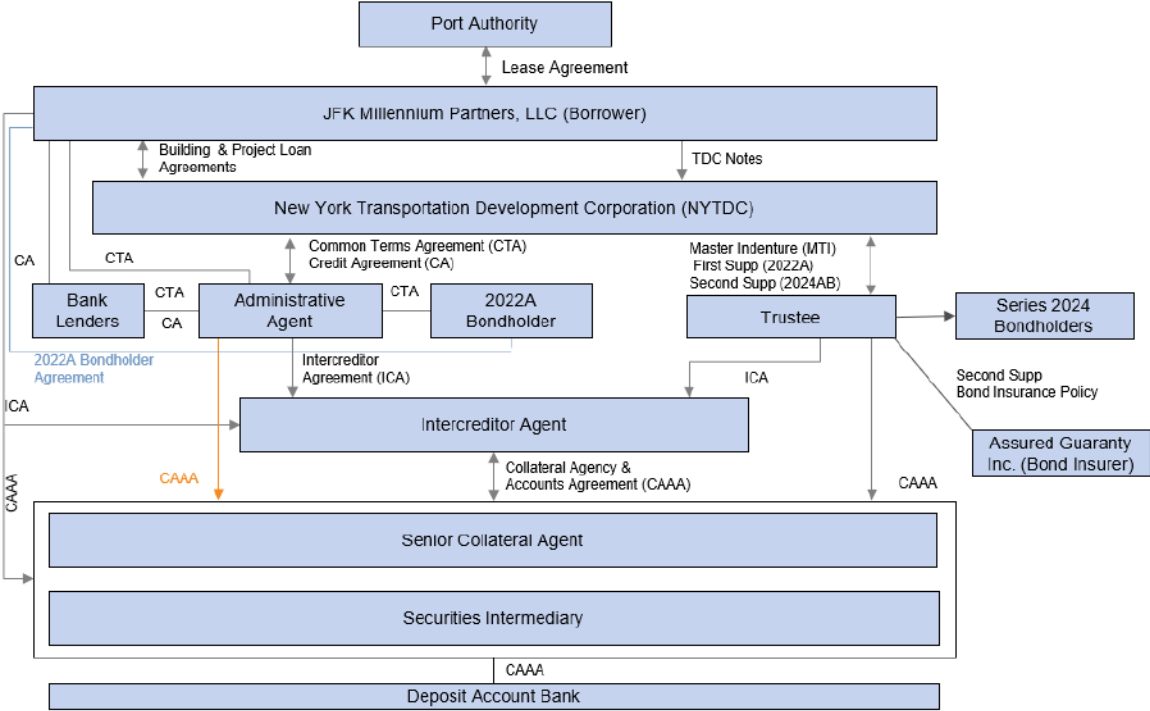

**Bond Insurance**

The scheduled payment of principal of and interest on all or such portion of the Series 2024 Bonds identified on the inside cover page hereof as insured bonds (the “Insured Bonds”) when due will be guaranteed under an insurance policy to be issued concurrently with the delivery of such Insured Bonds by the Bond Insurer. See “PART 6 - BOND INSURANCE.”

**Risk Factors**

Investing in the Series 2024 Bonds is subject to numerous risks. See “PART 17 – RISK FACTORS.”

SPECIAL FACILITIES REVENUE BONDS,  
SENIOR SERIES 2024B (AMT)  
(CONVERTIBLE CAPITAL APPRECIATION BONDS)  
(JFK AIRPORT TERMINAL 6 REDEVELOPMENT  
PROJECT)

### PART 1 – INTRODUCTION

This Official Statement (including the cover page, the inside cover page, the Summary Statement, and the Appendices) is being distributed in connection with the offering and sale of \$1,945,637,768 aggregate principal amount of (i) Special Facilities Revenue Bonds, Senior Series 2024A (Green Bonds) (AMT) (Current Interest Bonds) (JFK Airport Terminal 6 Redevelopment Project) (the “Series 2024A Bonds”), and (ii) Special Facilities Revenue Bonds, Senior Series 2024B (AMT) (Convertible Capital Appreciation Bonds) (JFK Airport Terminal 6 Redevelopment Project) (the “Series 2024B Bonds” and, together with the Series 2024A Bonds, the “Series 2024 Bonds”) of the New York Transportation Development Corporation (the “Issuer”). Capitalized terms used herein unless otherwise defined have the meanings given to them in APPENDIX A – “DEFINITIONS.” The Issuer is a local development corporation formed under Section 1411 of the New York Not-for-Profit Corporation Law, being Chapter 35 of the Consolidated Laws of New York.

In connection with the Port Authority of New York and New Jersey’s (the “Port Authority”) approved redevelopment plan for John F. Kennedy International Airport in Queens, New York (the “Airport”), as described in more detail in APPENDIX B-1 “REPORT OF THE AIRPORT CONSULTANT,” the Port Authority entered into a lease agreement with JFK Millennium Partners, LLC, a Delaware limited liability company (the “Borrower”) (as supplemented and amended from time to time, the “Lease Agreement”) on November 17, 2022 (the “Original Closing Date”), pursuant to which the Borrower has the right and obligation to design, build, and operate a new passenger terminal building on the sites of the former Terminal 6 that was demolished in 2011 (the “Prior Terminal 6”) and Terminal 7 at the Airport. In connection therewith, the Borrower took over operations of Terminal 7 on December 1, 2022 and commenced construction on Phase 1 on the site of the Prior Terminal 6. Operations at Terminal 7 are anticipated to continue until Phase 1 is complete at which point the Borrower will transition its operations to the completed portion of Terminal 6, decommission and demolish Terminal 7 and proceed with the construction of Phase 2 of the Project, including, without limitation, the remaining portion of Terminal 6. Upon completion, the Project will include an estimated 1,200,000 square feet new passenger terminal building, with 10 gates (nine widebody gates and one narrowbody gate), improved airside and landside operations, access to two AirTrain stations and transformation of the ground floor of the Terminal 5 Parking Garage, also known as the Yellow Garage, and the adjacent portion of the roadway network into a new ground transportation center, including for-hire-vehicle parking and personal vehicles loading area (the “Ground Transportation Center,” as further defined in the Lease Agreement), servicing Terminal 6 and Terminal 5. See “PART 11 – THE PROJECT.”

The Series 2024 Bonds are authorized to be issued under and pursuant to (i) resolutions of the Issuer adopted on August 28, 2024 and October 1, 2024 authorizing, among other things, the issuance and sale of the Series 2024 Bonds, and (ii) the TDC Master Bond Indenture of Trust, dated as of November 1, 2022, by and between the Issuer and The Bank of New York Mellon, as trustee (the “Trustee”), as amended and supplemented, including by the TDC Second Supplemental Bond Indenture to be dated as of November 1, 2024, by and among the Issuer, the Trustee and the Bond Insurer (the “Master Bond Indenture” as so

supplemented, and as the same may be further amended, supplemented or modified from time to time, the “Indenture”). The Trustee will also serve as Paying Agent and Bond Registrar for the Series 2024 Bonds.

On the Original Closing Date, (a) the Issuer issued its not to exceed \$435,000,000 Special Facilities Bonds, Senior Series 2022A (Tax-Exempt) (AMT) (JFK Airport Terminal 6-7 Redevelopment Project) (the “Series 2022 Bonds”), all of which has been funded through a direct placement with the Royal Bank of Canada (the “Series 2022 Bondholder”) and (b) the Borrower, the Issuer, the Lenders, the Security Deposit Facility LC Issuing Bank, ING Capital LLC, as administrative agent (the “Administrative Agent”) and the coordinating lead arrangers, senior joint lead arranger, joint lead arrangers, mandated lead arrangers, senior managing agent and bookrunners party thereto entered into a Credit Agreement (the “Credit Agreement”), pursuant to which: (i) the Lenders agreed to lend up to \$3,009,000,000 to the Issuer (the “Senior Term Loans”), (ii) the Security Deposit Facility LC Issuing Bank agreed to make Security Deposit LCs available to the Issuer (which Security Deposit LCs were to be used by the Borrower to provide a security deposit to the Port Authority with respect to and as required by the Lease Agreement), and (iii) the Security Deposit Facility Lender agreed to make Security Deposit Loans to the Issuer (the Security Deposit Loans together with the Senior Term Loans, the “Senior Loans”). The Borrower, Issuer, Collateral Agent, Lenders, Security Deposit Facility LC Issuing Bank, Intercreditor Agent, Administrative Agent, and Series 2022 Bondholder are parties to that certain Common Terms Agreement (the “Common Terms Agreement”), dated as of November 1, 2022 which provides for certain common terms of the Series 2022 Bonds and the Senior Loans (such Series 2022 Bonds, the Senior Loans, and the Security Deposit LC Obligations being referred to herein collectively as the “Loan Facility”). The provisions of the Common Terms Agreement are only for the benefit of the Series 2022 Bondholder and the Lenders, and are not for the benefit of, nor enforceable by, the holders of the Series 2024 Bonds, and will no longer apply following the discharge of the Senior Bank Obligations. Except as expressly set forth in the Intercreditor Agreement dated as of November 1, 2022, as amended by the First Amendment to the Intercreditor Agreement, to be dated as of November 1, 2024, each among the Borrower, Administrative Agent, the Trustee, The Bank of New York Mellon, as senior collateral agent (the “Collateral Agent” or “Senior Collateral Agent”), the Hedge Providers (as defined herein) and The Bank of New York Mellon, as intercreditor agent (the “Intercreditor Agent”) (collectively, as amended and supplemented from time to time, the “Intercreditor Agreement”), the holders of the Series 2024 Bonds are not entitled to consent to any amendment or waiver granted by the Lenders under the Common Terms Agreement. The form of the Intercreditor Agreement is attached hereto as APPENDIX D-5 and the form of the Common Terms Agreement is attached hereto as APPENDIX F-1. The proceeds of the Loan Facility, as drawn, were lent by the Issuer to the Borrower pursuant to the hereinafter defined TDC Loan Agreements. The Loan Facility is further secured by the Borrower’s Series 2022A Building Note, the TDC Bank Debt Building Note, Series 2022A Project Note, the TDC Bank Debt Project Note and the TDC Security Deposit Project Note (collectively, the “2022 TDC Notes”). The proceeds from the sale of the Series 2024 Bonds will be loaned to the Borrower and used to (i) refinance costs relating to the design and construction of the Project, including costs originally financed by a portion of the proceeds of the Loan Facility and (ii) pay costs of issuance relating to the Series 2024 Bonds and costs associated with the payoff of the applicable portion of the Loan Facility, including costs, if any, of terminating the associated Permitted Hedge Agreements. The Administrative Agent, the Senior Collateral Agent, the Trustee, the Intercreditor Agent and the Hedge Providers have consented to amendments and supplements to certain Financing Documents (including, among other documents, the First Amendments to TDC Loan Agreements, First Amendment to the Collateral Agency and Accounts Agreement, and Second Supplemental Indenture), and the Administrative Agent has provided waivers of certain terms of the Common Terms Agreement, in connection with, and to facilitate, the issuance of the Series 2024 Bonds.

Under the Common Terms Agreement, the Borrower has covenanted to enter into, and thereafter maintain, Permitted Hedge Agreements that hedge and mitigate the variable interest rate risk of the Issuer under the Loan Facility to which the Borrower is exposed, on a pass-through basis, under the terms of the TDC Loan Agreements. As further described herein, the obligations of the Borrower under the Loan Facility and the Permitted Hedge Agreements constitute Senior Obligations secured on a parity basis with the Series 2024 Bonds. See “PART 3 – PLAN OF FINANCE.”

As of September 30, 2024, approximately \$2,047,000,000 has been drawn under the Senior Term Loans and the full \$435,000,000 has been drawn under the Series 2022 Bonds, leaving approximately \$962,000,000 of remaining capacity under the Loan Facility available to be drawn upon to pay a portion of the remaining Project costs. Following the issuance of the Series 2024 Bonds, approximately \$508,453,869 of debt will remain Outstanding under the Loan Facility, all of which, together with subsequent advances thereunder, is scheduled to mature in full on November 17, 2029 (the “Bank Financing Maturity Date”). The Borrower’s current plan of finance, which is subject in all respects to market conditions from time to time and remains subject to change in their sole and absolute discretion, anticipates the issuance of additional tax-exempt and taxable bonds either as Additional Senior Obligations (secured on a parity basis with the Series 2024 Bonds and the Loan Facility) and/or Subordinate Obligations (secured on a subordinate basis to the Senior Obligations), to refinance the balance of the Loan Facility outstanding from time to time. The Borrower may also incur Additional Senior Obligations (secured on a parity basis with the Series 2024 Bonds and the Loan Facility) and/or Subordinate Obligations (secured on a subordinate basis to the Senior Obligations) for non-refunding purposes, in each case under and in accordance with the Collateral Agency and Accounts Agreement, and with respect to Additional Senior Bonds or Additional Subordinate Bonds, the Indenture. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Collateral Agency and Accounts Agreement – Additional Obligations”; in APPENDIX D-2 – “FORM OF COLLATERAL AGENCY AND ACCOUNTS AGREEMENT – Additional Obligations” and in APPENDIX D-1 – “FORM OF TRUST INDENTURE – Conditions to Issue Additional Bonds.” The Common Terms Agreement has certain additional restrictions on the incurrence of Additional Obligations by the Borrower for so long as the Senior Bank Obligations are outstanding. These additional restrictions are for the sole benefit of the holders of the Senior Bank Obligations, are subject to waiver or amendment thereby in their sole discretion and will no longer apply following the discharge of the Senior Bank Obligations. See APPENDIX F-1 – “FORM OF COMMON TERMS AGREEMENT.”

The Borrower, the Collateral Agent, The Bank of New York Mellon, as securities intermediary (the “Securities Intermediary”) under the Intercreditor Agreement, the Issuer, the Trustee, the Administrative Agent and The Bank of New York Mellon, as deposit account bank (the “Deposit Account Bank”) entered into that certain Collateral Agency and Accounts Agreement, dated as of November 1, 2022, as amended by the First Amendment to the Collateral Agency and Accounts Agreement to be dated as of November 1, 2024, by and among the Borrower, the Collateral Agent, the Intercreditor Agent, the Securities Intermediary, the Trustee, the Administrative Agent and the Issuer (as so amended and supplemented, the “Collateral Agency and Accounts Agreement”), pursuant to which the Collateral Agent will hold collateral as security for the Series 2024 Bonds, the Loan Facility and any other Obligations of the Borrower, including any Additional Obligations issued in accordance with the Collateral Agency and Accounts Agreement.

The proceeds from the sale of the Series 2024 Bonds and the proceeds of the Loan Facility are being loaned to the Borrower pursuant to a TDC Building Loan Agreement, dated as of November 1, 2022, as amended by the First Amendment to the TDC Building Loan Agreement to be dated as of November 1, 2024 (as so amended, the “TDC Building Loan Agreement”) and the TDC Project Loan Agreement, dated as of November 1, 2022, as amended by the First Amendment to the TDC Project Loan Agreement to be dated as of November 1, 2024 (as so amended, the “TDC Project Loan Agreement” and, together with the TDC Building Loan Agreement, the “TDC Loan Agreements”). The Borrower will execute and deliver a Series 2024 Building Note and a Series 2024 Project Note relating to the Series 2024 Bonds (the “2024 TDC Notes” and, together with the 2022 TDC Notes, and any additional promissory notes of the Borrower evidencing the indebtedness of the Borrower under the TDC Building Loan or the TDC Project Loan Agreement, the “TDC Notes”) in favor of the Issuer. The Borrower will be obligated under the TDC Loan Agreements and the TDC Notes to make payments sufficient to pay the principal or Redemption Price of, and interest on, the Series 2024 Bonds, the Loan Facility and any Additional Senior Obligations, as and when the same become due.

The obligations of the Borrower to make payments pursuant to the TDC Building Loan Agreement and the related TDC Notes are unconditional obligations of the Borrower secured by the TDC Building Loan Leasehold Mortgage, Assignment of Leases and Rents, Security Agreement and Fixture Filing, dated as of November 1, 2022, among the Borrower, the Issuer, and the Collateral Agent (the “Building Leasehold Mortgage”) and the obligations of the Borrower to make payments pursuant to the TDC Project Loan Agreement and the related TDC Notes are unconditional obligations of the Borrower secured by the TDC Project Leasehold Loan Mortgage, Assignment of Leases and Rents, Security Agreement and Fixture Filing, dated as of November 1, 2022, among the Borrower, the Issuer, and the Collateral Agent (the “Project Leasehold Mortgage” and, together with the Building Leasehold Mortgage, the “Leasehold Mortgages”), respectively, each of which encumber the Borrower’s interest in the Lease Agreement.

The collateral also includes other security held by the Collateral Agent on behalf of the Secured Parties, including (i) amounts held in certain Project Accounts established and held under the Collateral Agency and Accounts Agreement; (ii) the personal property of the Borrower under the Senior Security Agreement, dated as of November 1, 2022 between the Borrower and the Collateral Agent (as supplemented and amended from time to time, the “Senior Security Agreement”); (iii) equity interests of the Borrower under the Amended and Restated Senior Equity Pledge Agreement, to be dated as of November 1, 2024, by and among JFK Millennium Partners Holdings, LLC, a Delaware limited liability company, which owns 100% of the equity interests of the Borrower, and the Senior Collateral Agent (the “Senior Equity Pledge Agreement”), (iv) Assignment of Leases and Rents (Building Loan) and Assignment of Leases and Rents (Project Loan), each dated as of November 1, 2022 (together, the “Assignments of Leases and Rents”); (v) Consents to Assignment (a) among the Borrower, the D&C Contractor, and the Collateral Agent, dated as of the Original Closing Date (the “D&C Contractor Direct Agreement”), setting forth certain rights of the Lenders with respect to the D&C Contract, (b) among the Borrower, the Manager, and the Collateral Agent, dated as of the Original Closing Date (the “Manager Direct Agreement”), setting forth certain rights of the Lenders with respect to the Management Services Agreement, and (c) among the Borrower, JetBlue Airways Corporation (“JetBlue”), and the Collateral Agent, dated as of the Original Closing Date (the “JetBlue Direct Agreement”), setting forth certain rights of the Lenders with respect to the Anchor Tenant Agreement and Sublease, dated as of the Original Closing Date, between the Borrower and JetBlue (the “JetBlue Sublease”), each of (a)-(c) a “Direct Agreement” and, together with other Consents to Assignment that the Borrower may enter into with the Collateral Agent and counterparties in connection with certain material Concessions Subleases and Airline Subleases, the “Direct Agreements;” and (vi) in certain limited circumstances, amounts owed under the Equity Contribution Agreement, as further secured by the Equity Letters of Credit or Equity Collateral Accounts. The Issuer has assigned all of its right, title and interest, except for its Reserved Rights, in the Leasehold Mortgages, the Assignment of Leases and Rents, the TDC Loan Agreements and the TDC Notes to the Collateral Agent pursuant to the Issuer Assignment Agreements, which assignments will be amended in connection with the issuance of the Series 2024 Bonds to incorporate the First Amendments to TDC Loan Agreements (as defined here) and the TDC Notes relating to such Series 2024 Bonds. In addition, certain collateral is held by the Trustee for the benefit of the Bondholders pursuant to the Indenture. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS” and APPENDICES C-1 through C-4 – “FORM TRUST INDENTURE,” “FORM COLLATERAL AGENCY AND ACCOUNTS AGREEMENT,” “FORM LEASEHOLD MORTGAGES,” and “FORM TDC LOAN AGREEMENTS.”

The Borrower expects to pay its obligations under the TDC Loan Agreements and the TDC Notes (i) prior to Project completion, primarily from proceeds borrowed thereunder, and (ii) after Project completion, from net operating revenues received from the operation of Terminal 6, including payments made by airlines, providers of concession goods and services, and other commercial users of Terminal 6. See “PART 14 – AIRLINE REVENUES,” and “PART 15 – NON-AIRLINE REVENUES.”

**THE SERIES 2024 BONDS ARE SPECIAL AND LIMITED REVENUE OBLIGATIONS OF THE ISSUER, PAYABLE BY THE ISSUER AS TO THE PRINCIPAL, REDEMPTION PRICE, AND INTEREST THEREON, SOLELY OUT OF THE TRUST ESTATE PLEDGED UNDER THE**

**INDENTURE REFERRED TO HEREIN. NONE OF THE SERIES 2024 BONDS, THE PRINCIPAL THEREOF, THE INTEREST THEREON, THE REDEMPTION PRICE THEREOF, IF ANY, OR ANY INTEREST ACCRUED THEREON TO THE DATE OF REDEMPTION, SHALL EVER CONSTITUTE A DEBT OF THE STATE OF NEW YORK (THE “STATE”), THE PORT AUTHORITY, THE NEW YORK JOB DEVELOPMENT AUTHORITY (THE “JDA”), THE NEW YORK STATE URBAN DEVELOPMENT CORPORATION (D/B/A EMPIRE STATE DEVELOPMENT) (“ESD”), OR ANY OTHER LOCAL DEVELOPMENT CORPORATION, AGENCY, OR AUTHORITY OF THE STATE (OTHER THAN THE ISSUER), AND NONE OF THE STATE, THE PORT AUTHORITY, JDA, ESD, OR ANY OTHER LOCAL DEVELOPMENT CORPORATION, AGENCY, OR AUTHORITY OF THE STATE (OTHER THAN THE ISSUER) SHALL BE LIABLE ON THE SERIES 2024 BONDS. THE ISSUER HAS NO POWER OF TAXATION. SEE “PART 19 – LIMITED LIABILITY FOR THE SERIES 2024 BONDS” HEREIN.**

## **PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS**

### **Series 2024A Bonds**

The Series 2024A Bonds are being issued as fully registered bonds in denominations of \$5,000 or in integral multiples thereof and will be dated their date of delivery. The Series 2024A Bonds will mature on the dates and in the amounts, and will bear interest from their date of issuance at the rates, set forth on the front inside cover of this Official Statement. Interest on the Series 2024A Bonds will be payable semi-annually on each June 30 and December 31, commencing on December 31, 2024. The Series 2024A Bonds will bear interest from the delivery date until the principal amount thereof is paid, such interest to be computed upon the basis of a 360-day year consisting of twelve 30-day months.

### **Series 2024B Bonds**

The Series 2024B Bonds are being issued as fully registered bonds in denominations that will result in the Accreted Value at the respective Interest Commencement Date being equal to \$5,000 or any integral multiple thereof and will be dated their date of delivery. The Series 2024B Bonds will mature on the dates and in the amounts set forth on the inside cover hereof. Interest on the Series 2024B Bonds shall be compounded semi-annually on each June 30 and December 31 (each a “Compounding Date”) (based on a 360-day year consisting of twelve 30-day months), commencing on December 31, 2024, at the approximate yields to their respective Interest Commencement Date set forth on the inside cover hereof until, but not including, their respective Interest Commencement Date of December 31, 2034. On and after the Interest Commencement Date, such Series 2024B Bonds shall be deemed Current Interest Bonds and shall bear interest at the rates shown on the inside cover hereof computed based on their respective Accreted Values on such Interest Commencement Date, payable semiannually on Interest Payment Dates of June 30 and December 31 of each year, commencing on June 30, 2035.

Under the Indenture, the Accreted Value of each of the Series 2024B Bonds: (i) on any Compounding Date is the amount established by the schedule of Accreted Values for the applicable Series 2024B Bond as set forth in APPENDIX N – “TABLE OF ACCRETED VALUES OF SERIES 2024B CONVERTIBLE CAPITAL APPRECIATION BONDS THROUGH THE INTEREST COMMENCEMENT DATE,” which amount represents the initial principal amount at issuance of the applicable Series 2024B Bond plus interest accrued and compounded on each Compounding Date to the date of determination, calculated on the basis of a three hundred sixty (360) day year of twelve (12) thirty (30) day months, and (ii) with respect to any date other than a Compounding Date, the Accreted Value shall be the sum of (1) the Accreted Value on the preceding Compounding Date plus (2) the product of (x) a fraction, the numerator of which is the number of days having elapsed from the preceding Compounding Date and the denominator of which is the number of days from such preceding Compounding Date to the next succeeding Compounding Date, multiplied by (y) the difference between the Accreted Values on such Compounding Dates, which amount represents the principal plus the amount of interest that has accrued to

such date of determination. No interest is payable on any Series 2024B Bonds prior to the first Interest Payment Date following the applicable Interest Commencement Date; thereafter, interest at the applicable rate on any Series 2024B Bond is payable on the first Interest Payment Date following the Interest Commencement Date for such Series 2024B Bond and thereafter on each June 30 and December 31 until maturity or earlier redemption thereof, such interest to be computed and paid based upon the Accreted Value of the Series 2024B Bonds on their respective Interest Commencement Dates at the respective rates of interest as set forth in APPENDIX N – “TABLE OF ACCRETED VALUES OF SERIES 2024B CONVERTIBLE CAPITAL APPRECIATION BONDS THROUGH THE INTEREST COMMENCEMENT DATE” hereto and the inside cover page hereof.

### **Delivery**

It is expected that the Series 2024 Bonds will be available for delivery through the facilities of the Depository Trust Company (“DTC”) in New York, New York, on or about the date on which the Series 2024 Bonds are issued. The Series 2024 Bonds will be issued in book-entry-only form and will be registered in the name of Cede & Co., as nominee of DTC. The payment of the principal of, interest on and Redemption Price on, if any, the Series 2024 Bonds will be made by the Trustee directly to Cede & Co., as nominee for DTC, as the registered owner of the Series 2024 Bonds, to be subsequently disbursed to Beneficial Owners of the Series 2024 Bonds, all as described herein. Purchasers of the Series 2024 Bonds will not receive physical delivery of certificates representing their ownership interests in the Series 2024 Bonds.

### **Payment of Principal**

The principal of the Series 2024 Bonds shall become due and payable on the Principal Payment Dates, as shown on the inside cover page of this Official Statement. The principal of the Series 2024 Bonds shall be payable to the Holders of the applicable Series of Bonds in lawful money of the United States of America at the Maturity Date upon presentation and surrender of the Series 2024 Bonds at the principal corporate trust office of the Trustee as Bond Registrar. Payment of the Redemption Price shall be made to or upon the order of the registered owners, without presentation of the Series 2024 Bonds, by wire transfer in federal funds. So long as a book-entry system is used for determining beneficial ownership of the Series 2024 Bonds, payments of principal and other payments will be made to DTC as described in APPENDIX I – “BOOK-ENTRY ONLY SYSTEM.”

### **Payment of Interest**

Interest on the Series 2024 Bonds shall be payable on each Interest Payment Date until maturity or until the date fixed for redemption, if any, and until payment of the principal shall have been made or provided for in accordance with the provisions of the Indenture.

Except as described below, interest payable on the Series 2024 Bonds on any Interest Payment Date shall be paid by the Trustee to the Holders of such Series 2024 Bonds appearing on the registration books maintained by the Trustee as Bond Registrar at the close of business on the fifteenth day (whether or not a Business Day) of the calendar month immediately preceding such Interest Payment Date (the “Record Date”), and shall be paid (1) by check mailed to such Holders at their address as it appears on such registration books maintained by the Trustee, or (2) at the written request addressed to the Trustee as Paying Agent by any Holder of Bonds in an aggregate principal amount in excess of \$1,000,000 as shown on the registration books kept by the Bond Registrar, by electronic wire transfer, in immediately available funds to the account filed with the Trustee prior to the Record Date next preceding any Interest Payment Date. So long as a book-entry system is used for determining beneficial ownership of the Series 2024 Bonds, payments of interest and other payments will be made to DTC as described below in APPENDIX I – “BOOK-ENTRY ONLY SYSTEM.”

## **Redemption of the Series 2024 Bonds**

### ***Optional Redemption of Series 2024A Bonds***

The Series 2024A Bonds are subject to redemption at the option of the Issuer (at the written direction of the Borrower) prior to maturity on and after December 31, 2034, in whole or in part, at any time, without premium, at a redemption price equal to 100% of the principal of Series 2024A Bonds to be redeemed, plus the interest accrued on such Series 2024A Bonds to (but not including) the Redemption Date.

### ***Optional Redemption of Series 2024B Bonds***

The Series 2024B Bonds are subject to optional redemption prior to maturity by the Issuer, in whole or in part, at the written direction of the Borrower (A) from the Series 2024 Closing Date through December 30, 2044, at the Make-Whole Redemption Price, or (B) on and after December 31, 2044, at any time, without premium, (x) if redeemed prior to the Interest Commencement Date, at the Accreted Value as of the Redemption Date, and (y) if redeemed on or after the Interest Commencement Date, at the Accreted Value at the Interest Commencement Date plus accrued interest to the Redemption Date.

“Make-Whole Redemption Price” means, the greater of (i) 100% of the principal amount of Current Interest Bonds to be redeemed or the Accreted Value of Compound Interest Bonds to be redeemed, as applicable and (ii) the sum of the present value of the remaining scheduled payments of principal, accreted interest and interest to the Maturity Dates of the Bonds to be redeemed (not including any portion of those payments of interest accrued and unpaid as of the date on which the Bonds are to be redeemed) discounted to the Redemption Date on a semi-annual basis, assuming a 360-day year consisting of twelve 30-day months, at the adjusted Municipal Market Data AAA benchmark yield (the “MMD Rate”), plus, in each case, accrued and unpaid interest on the Bonds to be redeemed on the Redemption Date.

### ***Purchase in Lieu of Redemption***

If any Series 2024 Bond is called for optional redemption, in whole or in part, the Issuer, upon written direction of the Borrower, may elect to have such Series 2024 Bonds purchased in lieu of redemption on the applicable Redemption Date (the “Purchase Date” with respect to such Series 2024 Bonds) at a purchase price equal to the applicable (i) Redemption Price with respect to the Series 2024A Bonds (including any interest accrued on such Bonds to the Redemption Date) or (ii) the Accreted Redemption Price with respect to the Series 2024B Bonds (including, on any date on or after the Interest Commencement Date, any interest accrued on such Bonds to the Redemption Date), in each case, (the “Purchase Price” with respect to such Series 2024 Bonds).

If the Issuer, upon written request of the Borrower, elects to purchase any Series 2024 Bonds, the Trustee shall give notice of the purchase of such Series 2024 Bonds in the name of the Issuer to the registered owners thereof by first-class mail, postage prepaid, not less than thirty (30) days prior to the Purchase Date with respect to such Series 2024 Bonds specified in such notice. The Series 2024 Bonds to be purchased are required to be tendered on the Purchase Date with respect to such Series 2024 Bonds to the Trustee. The Series 2024 Bonds to be purchased that are not so tendered will be deemed to have been properly tendered for purchase. Such purchase will not operate to extinguish the indebtedness of the Issuer evidenced thereby or modify the terms of such Series 2024 Bonds and such Series 2024 Bonds need not be cancelled, but will remain Outstanding under the Indenture and continue to bear interest.

The Issuer’s obligation to purchase any Series 2024 Bond is conditioned upon the availability of sufficient money to pay the Purchase Price with respect to such Series 2024 Bonds for all of the Series 2024 Bonds to be purchased on the Purchase Date with respect to such Series 2024 Bonds. If sufficient money is available on the Purchase Date with respect to such Series 2024 Bonds to pay the Purchase Price with

respect to such Series 2024 Bonds of the Series 2024 Bonds to be purchased, the former registered owners of such Series 2024 Bonds will have no claim thereunder or under the Indenture or otherwise for payment of any amount other than the Purchase Price with respect to such Series 2024 Bonds. If sufficient money is not available on the Purchase Date with respect to such Series 2024 Bonds for payment of the Purchase Price with respect to such Series 2024 Bonds, the Series 2024 Bonds tendered or deemed tendered for purchase will continue to be registered in the name of the registered owners on the Purchase Date with respect to such Series 2024 Bonds, who will be entitled to the payment of the (i) Redemption Price of such Series 2024A Bonds or (ii) Accreted Redemption Price of such Series 2024B Bonds, on the Redemption Date in accordance with their respective terms.

### ***Extraordinary Redemptions***

*Preservation of Tax-Exempt Status of Series 2024 Bonds.* The Series 2024 Bonds shall be subject to extraordinary optional redemption by the Issuer, at the direction of the Borrower, on any date at (i) Redemption Price with respect to the Series 2024A Bonds (including, any interest accrued on such Bonds to the Redemption Date) or (ii) the Accreted Redemption Price with respect to the Series 2024B Bonds (including, on any date on or after the Interest Commencement Date, any interest accrued on such Bonds to the Redemption Date), without premium if the Borrower shall have delivered to the Trustee and the Issuer an Opinion of Bond Counsel addressed to the Trustee and the Issuer substantially to the effect that (i) a failure so to redeem Series 2024 Bonds (or the relevant portion thereof) may adversely affect the exclusion of interest on the Series 2024 Bonds from the gross income of the Holders pursuant to Section 103 of the Code and (ii) redemption of Series 2024 Bonds in the amount set forth in such opinion (but in no smaller amount than that set forth in such opinion) would permit the continuance of any exclusion so afforded under Section 103 of the Code. The Series 2024 Bonds to be so redeemed shall be determined by the Borrower.

*Extraordinary Mandatory Redemption of the Series 2024 Bonds.* The Series 2024 Bonds are subject to extraordinary mandatory redemption, in whole or in part, as the case may be, at the (i) Redemption Price with respect to the Series 2024A Bonds or (ii) Accreted Redemption Price with respect to the Series 2024B Bonds, without premium to the extent of funds available therefore from, and as soon as practical following:

A. Receipt by the Trustee of Series 2024 Bonds proceeds remaining on deposit more than five years after the issuance thereof, if and to the extent required by the Collateral Agency and Accounts Agreement;

B. Receipt by the Trustee of the *pro rata* portion of the Borrower Insurance Proceeds or Borrower Condemnation Proceeds allocated to the Series 2024 Bonds, *pro rata* with the Loan Facility, Secured Hedge Agreements, and any Additional Senior Obligations in accordance with the Collateral Agency and Accounts Agreement, following the request of the Trustee to the Securities Intermediary to transfer such funds pursuant to the Collateral Agency and Accounts Agreement and the Second Supplemental Indenture;

C. Receipt by the Trustee of the *pro rata* portion of the Borrower Lease Termination Proceeds allocated to the Series 2024 Bonds, *pro rata* with the Loan Facility, Secured Hedge Agreements, and any Additional Senior Obligations in accordance with the Collateral Agency and Accounts Agreement, following the request of the Trustee to the Securities Intermediary to transfer such funds pursuant to the Collateral Agency and Accounts Agreement and the Second Supplemental Indenture;

D. Receipt by the Trustee of the *pro rata* portion of the Disposition Proceeds allocated to the Series 2024 Bonds, *pro rata* with the Loan Facility, Secured Hedge Agreements, and any Additional Senior Obligations in accordance with the Collateral Agency and Accounts Agreement, following the request of

the Trustee to the Securities Intermediary to transfer such funds pursuant to the Collateral Agency and Accounts Agreement and the Second Supplemental Indenture; or

E. Foreclosure by the Senior Collateral Agent on the leasehold estate pursuant to the Leasehold Mortgages and the Collateral Agency and Accounts Agreement.

*Extraordinary Mandatory Redemption of Series 2024A Balloon Indebtedness as Segregated Collateral Only Upon Enforcement Action.*

After the taking of an Enforcement Action under the Collateral Agency and Accounts Agreement, and in no case before 10-Year Cash Sweep Date, the serial Series 2024A Bond maturing on December 31, 2054, bearing interest at the rate of 5.25% (the “Series 2024A Balloon Indebtedness”), is subject to extraordinary mandatory redemption, in whole or in part, as the case may be, by the Issuer, at the Redemption Price without premium, to the extent of funds available therefor from, and as soon as practical following receipt by the Trustee of amounts transferred from, the Surplus Remaining Revenue Account pursuant to the Collateral Agency and Accounts Agreement.

*Mandatory Redemption Upon the Occurrence of a Determination of Taxability.* The Series 2024 Bonds are subject to mandatory redemption in whole or, under certain circumstances, in part, at the (i) Redemption Price with respect to the Series 2024A Bonds or Accreted Redemption Price with respect to the Series 2024B Bonds, without premium within ninety (90) days following receipt by the Trustee of written notice from a current or former Holder or Beneficial Owner of the Series 2024 Bonds or the Borrower of a Determination of Taxability. Payment of such (i) Redemption Price with respect to the Series 2024A Bonds or (ii) Accreted Redemption Price with respect to the Series 2024B Bonds, shall constitute the full and complete payment and satisfaction to the Holders of such Series 2024 Bonds for any claim, damages, costs or expenses arising out of such Determination of Taxability. All of the Series 2024 Bonds shall be redeemed upon a Determination of Taxability as described above, unless, in the Opinion of Bond Counsel, redemption of a portion of the Series 2024 Bonds would have the result that interest payable on the remaining Series 2024 Bonds outstanding after the redemption would not be includable for federal income tax purposes in the gross income of any Holder or Beneficial Owner of a Series 2024 Bond, other than a Holder or Beneficial Owner who is a “substantial user” of the portion of the Project financed or refinanced with the proceeds of the Series 2024 Bonds or a “related person” of such substantial user within the meaning of the Code, in which case only such portion shall be redeemed. The Series 2024 Bonds to be redeemed in part shall be determined by the Borrower.

Notwithstanding the foregoing, any Holder may direct the Trustee not to redeem all or a portion of its Series 2024 Bonds upon the occurrence of a Determination of Taxability, if such Series 2024 Bonds or portions thereof not to be redeemed will be in an Authorized Denomination, by delivering to the Trustee at its principal office for delivery of notices on or prior to the second Business Day prior to the date of redemption an instrument which (A) states that such person is a Holder of such Series 2024 Bonds and specifies the denomination of such Series 2024 Bonds and the CUSIP number thereof, (B) states that the Holder has knowledge that a Determination of Taxability has occurred with respect to such Series 2024 Bonds and that interest received with respect to such Series 2024 Bonds may be includible in the gross income of the Holder for federal income tax purposes and (C) directs the Trustee not to redeem such Series 2024 Bonds. Once the Trustee has received such notice in a timely fashion, such Series 2024 Bonds will never again be subject to mandatory redemption as described under this subheading.

“Determination of Taxability” has the meaning set forth in APPENDIX A – “DEFINITIONS” with respect to the Series 2022A Bonds and, with respect to the Series 2024 Bonds and any additional Series of Tax-Exempt Bonds (other than the Series 2022A Bonds), means (a) a published or private ruling, technical advice memorandum or field service advice is issued or provided by the Internal Revenue Service concluding that the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes in connection with a process in which the Borrower has

participated or has been given the opportunity to participate, and which ruling, memorandum or advice the Borrower, in its discretion, does not contest or from which no further right of judicial review or appeal exists, in each case in the manner provided below, (b) a final determination by a court of competent jurisdiction in the United States or by the Internal Revenue Service that the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes from which no further right of appeal exists in a proceeding in which the Borrower has participated or has been a party, or has been given the opportunity to participate or be a party, or (c) the delivery to the Issuer, the Borrower or the Bondholder of a written opinion of Squire Patton Boggs (US) LLP or Hardwick Law Firm, LLC, as Bond Counsel, or any other Bond Counsel, in any of the foregoing cases, to the effect that, as a result of a failure by the Borrower to observe any covenant or agreement of the Borrower in any Financing Document or any applicable Tax Certificate, or the inaccuracy of any Borrower representation or warranty therein, the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes or of written advice to the effect that the opinion of such Bond Counsel delivered on the Issuance Date of the Bonds of such Series to the effect that interest on such Bonds is not includable in the gross income of the holders thereof for federal income tax purposes may no longer be relied upon; provided, however, that no such Determination of Taxability described in (a) or (b) shall be considered to exist unless (i) the registered or Beneficial Owner or former registered or Beneficial Owner of such Series of Bonds involved in such proceeding or action (A) gives the Borrower and the Trustee prompt notice of the commencement thereof and (B) (if the Borrower agrees to pay all expenses in connection therewith) offers the Borrower the opportunity to control the defense thereof and (ii) either (A) the Borrower does not agree within 30 days of receipt of such offer to pay such expenses and liabilities and to control such defense or (B) the Borrower shall exhaust or choose not to exhaust all available proceedings for the contest, review, appeal or rehearing of such decree, judgment or action which the Borrower determines to be appropriate; provided further that no such Determination of Taxability described in (c) above shall be considered to exist if upon receipt of such opinion or written advice described in (c) above, the Borrower gives the Issuer and the Bondholder prompt written notice of its intent to obtain (at the Borrower's expense) a second opinion and, within 60 days of the receipt such opinion or written advice described in (c) above, delivers to the Issuer and the Bondholder an opinion of a nationally recognized attorney or firm of attorneys experienced in matters relating to municipal bond law and the tax exemption of interest on bonds of states and their political subdivisions, reasonably acceptable to the Issuer and the Bondholder, to the effect that interest on such Bonds is excludable from the gross income of the holders thereof for federal income tax purposes; provided, further, no Determination of Taxability described above will result (i) from the inclusion of interest on any Bond in the computation of minimum or indirect taxes or (ii) if the events that would otherwise give rise to a Determination of Taxability occur as a result of a change in the Code or regulations under the Code adopted after the date of issuance of the applicable Tax-Exempt Bonds.

#### ***Mandatory Sinking Fund Redemption***

The Series 2024 Bonds identified below shall be subject to mandatory redemption by the Issuer prior to maturity, in part, at a price equal to one hundred percent (100%) of the principal or Accreted Value amount thereof, together with accrued and unpaid interest to (but not including) the date of redemption, without premium, in satisfaction of the Sinking Fund Requirements on the dates and in the principal amounts set forth below, subject to the credits provided therefor in the Indenture:

Series 2024A Bonds maturing December 31, 2054 and bearing interest at 5.50%

Sinking Fund Requirement Payment Date	Sinking Fund Requirement
December 31, 2051	\$24,915,000
June 30, 2052	39,515,000
December 31, 2052	41,030,000
June 30, 2053	42,095,000

December 31, 2053	25,340,000
June 30, 2054	26,010,000
December 31, 2054*	26,690,000

\* Stated Maturity.

At its option, to be exercised on or before the 45<sup>th</sup> day next preceding any mandatory Redemption Date for Series 2024 Bonds due to a Sinking Fund Requirement, the Borrower may deliver to the Trustee for cancellation Series 2024 Bonds of the appropriate series, interest rate, and maturity in any aggregate principal amount which have been purchased by the Borrower in the open market. Each Series 2024 Bond so delivered shall be credited by the Trustee at 100% of the principal amount thereof against the Sinking Fund Requirement for the Series 2024 Bonds of such Series on such mandatory Redemption Date in such chronological order as shall be directed in writing by the Borrower. The Borrower will, on or before the 45<sup>th</sup> day preceding each mandatory scheduled sinking fund Redemption Date, furnish the Trustee with a certificate stating the extent to which the provisions of the first sentence of this paragraph are to be availed of with respect to such mandatory Redemption Date; and unless such certificate is so timely furnished to the Trustee, the Sinking Fund Requirements for such mandatory Redemption Date shall not be reduced under the provisions of this paragraph.

### **Selection of Bonds to be Redeemed or Purchased in Lieu of Redemption**

In the case of redemption or purchase in lieu of redemption of less than all of a Series of Bonds, unless otherwise provided in the Indenture, the Trustee at the direction of the Borrower will select the maturities of such Series of Bonds to be redeemed or purchased. If less than all of a maturity and Series of Series 2024 Bonds are to be redeemed or purchased, unless otherwise provided in the Indenture, the Series 2024 Bonds of such Series and maturity to be redeemed or purchased will be selected by the Trustee, by lot, using such method of selection as the Trustee shall determine; provided however that so long as the Series 2024 Bonds are registered in the name of Cede & Co., as nominee of DTC, the particular Series and maturities of Bonds to be redeemed will be determined in accordance with DTC's procedures as from time to time in effect. No Series 2024 Bonds may be resold subsequent to a purchase in lieu of redemption unless the Issuer obtains a Favorable Opinion of Bond Counsel, and the Issuer may rely conclusively on such Opinion in complying with the requirements of the Indenture.

### **Notice of Redemption**

Unless otherwise provided in the Indenture, when redemption of any Series 2024 Bonds or any portions thereof is requested or required pursuant to the Indenture, upon written notice from the Borrower to the Trustee delivered no less than 30 days prior to the Redemption Date, the Trustee shall give notice of such redemption in the name of the Issuer, specifying the CUSIP number, the date of original issue, the date of mailing of the notice of redemption, maturities, interest rates and principal amounts of the Series 2024 Bonds or portions thereof to be redeemed, the Redemption Date, the Redemption Price and the place or places where amounts due upon such redemption will be payable (including the name, address and telephone number of a contact person at the Trustee) and specifying the principal amounts of the Series 2024 Bonds or portions thereof to be payable and, if less than all of the Series 2024 Bonds of any maturity are to be redeemed, the numbers of such Series 2024 Bonds or portions thereof to be so redeemed. Such

notice shall further state that on the Redemption Date, there shall become due and payable upon each Series 2024 Bonds or portion thereof to be redeemed the Redemption Price thereof, and if sufficient moneys are held in trust for the payment of such Redemption Price, from and after the Redemption Date interest thereon shall cease to accrue and be payable. Such notice may set forth any additional information relating to such redemption. The Trustee, in the name and on behalf of the Issuer, (i) shall, if the Series 2024 Bonds are held in the Book-Entry System, send by Electronic Means and, in all other cases, mail a copy of such notice by first-class mail, postage prepaid, not more than 45 nor less than 20 days prior to the Redemption Date to the registered owners of any such Series 2024 Bonds that are to be redeemed, at their last addresses, if any, appearing upon the registration books, but any defect in such notice shall not affect the validity of the proceedings for the redemption of any other Series 2024 Bonds and (ii) with respect to any Bonds in connection with which Borrower has entered into a continuing disclosure undertaking, cause notice of such redemption to be submitted to the MSRB's EMMA system. Any notice mailed as provided in this section shall be conclusively presumed to have been duly given, whether or not the registered owner receives the notice. With respect to any optional redemption of the Series 2024 Bonds, such notice may state that such redemption shall be conditional upon the receipt by the Trustee on or prior to the Redemption Date of moneys sufficient to pay the Redemption Price of the Series 2024 Bonds to be redeemed, and that if such moneys shall not have been so received said notice shall be of no force and effect and the Issuer shall not be required to redeem such Series 2024 Bonds. In the event that such notice of redemption contains such a condition and such moneys are not so received, the redemption shall not be made and the Trustee shall within a reasonable time thereafter give notice to the registered owners of the Series 2024 Bonds, in the manner in which the notice of redemption was given, that such moneys were not so received. In the event of a postal strike, the Trustee shall give notice by overnight courier (if available), and in the absence of the availability of overnight courier, by Electronic Means.

#### **Payment of Redeemed Series 2024 Bonds**

Notice having been given in the manner provided in the Indenture, the Series 2024 Bonds or portions thereof so called for redemption shall become due and payable on the Redemption Date so designated at the Redemption Price. If, on the Redemption Date, moneys for the redemption of the Series 2024 Bonds or portions thereof to be redeemed, together with interest to the Redemption Date, shall be held by the Paying Agents so as to be available therefor on said date and if notice of redemption shall have been given as aforesaid, then, from and after the Redemption Date, interest on the Series 2024 Bonds or portions thereof so called for redemption shall cease to accrue and become payable. If said moneys shall not be so available on the Redemption Date, such Series 2024 Bonds or portions thereof shall continue to bear interest until paid at the same rate as they would have borne had they not been called for redemption.

Payment of the Redemption Price shall be made to or upon the order of the registered owners, without presentation of the Series 2024 Bonds, by wire transfer in federal funds.

#### **Cancellation of Redeemed Bonds**

Each Series 2024 Bonds redeemed in full under the provisions of the Indenture shall forthwith be canceled and destroyed or removed from the appropriate digital ledger in accordance with the provisions of the Indenture and no Series 2024 Bonds shall be executed, authenticated or issued under the Indenture in exchange or substitution therefor.

If there shall be called for redemption less than all of any Series 2024 Bond, upon the written request of any Bondholder of such partially redeemed Series 2024 Bond to the Trustee, the Issuer shall execute, and the Trustee shall authenticate and deliver upon the surrender of such Bond, without charge to the owner thereof, for the unredeemed portion of the Series 2024 Bond so surrendered, a Series 2024 Bond or Series 2024 Bonds of the same Series and maturity in any of the Authorized Denominations and bearing interest at the same rate.

## **Mandatory Optional Redemption of the Series 2024A Balloon Indebtedness**

Commencing ten years prior to the maturity thereof, the Borrower shall direct the Trustee to redeem the Series 2024A Balloon Indebtedness pursuant to the optional redemption provisions for the Series 2024A Bonds summarized above, in the amounts and on the dates as follows, provided that the applicable transfers from the Remaining Revenue Account and Surplus Remaining Revenue Account are then permitted pursuant to the Collateral Agency and Accounts Agreement. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Collateral Agency and Accounts Agreement – Restricted Distributions.”

(i) As soon as reasonably practicable after each Quarterly Distribution Date occurring on and after the 10 Year Cash Sweep Date, if the Loan Life Coverage Ratio as of the immediately preceding Calculation Date is less than 1.10:1.00 pursuant to the calculations of an independent consultant who is experienced in traffic and revenue studies for airports, in a report delivered to the Senior Collateral Agent by the request of the Borrower on any day from the date preceding such Calculation Date by fourteen (14) months until such Calculation Date, in an amount equal to the least of: (A) the amount that will make the Loan Life Coverage Ratio greater than 1.10:1.00, (B) one hundred percent (100%) of the amount deposited into the Remaining Revenue Account pursuant to the terms of the Financing Documents from and after the Calculation Date immediately preceding the 10 Year Cash Sweep Date, and (C) the Remaining Revenue Account Limit. The Borrower shall cause the independent consultant to provide the report contemplated above at any time within the fourteen (14) month period prior to the applicable Calculation Date.

(ii) As soon as reasonably practicable after each Quarterly Distribution Date occurring on and after the 5 Year Cash Sweep Date, in an amount equal to (A) the lesser of (x) the greater of (I) (a) eighty percent (80%) of the amount deposited into the Remaining Revenue Account pursuant to the terms of the Financing Documents from and after the Calculation Date immediately preceding the 5 Year Cash Sweep Date *minus* (b) all amounts previously applied to redeem the Series 2024A Balloon Indebtedness pursuant to this paragraph and (II) the amount calculated in paragraph (i) above, and (y) the Remaining Revenue Account Limit, *minus* (B) any amount required to be applied to redeem Series 2024A Balloon Indebtedness pursuant to paragraph (i) above on such date; provided that the amount determined pursuant to this paragraph shall in no event be less than \$0.

## **Green Bonds Designation – Series 2024A**

*None of the Issuer, its counsel (including Issuer Counsel, Co-Bond Counsel, and General Counsel), the Borrower, its co-counsel, the Municipal Advisor, or the Underwriters or their co-counsel have independently confirmed or verified the information under this subsection or assumed any obligation to ensure that the Series 2024A Bonds comply with any legal or other standards or principles that may be related to Green Bonds (as defined below). The Issuer and the Borrower have designated the Series 2024A Bonds as Green Bonds based solely on Kestrel’s independent external review and opinion that the Series 2024A Bonds conform with the four core components of the International Capital Market Association (the “ICMA”) Green Bond Principles and therefore qualify for Green Bonds designation.*

The designation of the Series 2024A Bonds as Green Bonds does not entitle the owner of any Series 2024A Bonds to any benefit under the Code. Owners of the Series 2024A Bonds do not have any security other than as described under this “PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS.”

Per the ICMA, Green Bonds (“Green Bonds”) are any type of bond instrument where the proceeds will be exclusively applied to finance or re-finance, in part or in full, new and/or existing eligible Green Projects and which are aligned with the four core components of the Green Bond Principles. The four core components are: 1. Use of Proceeds; 2. Process for Project Evaluation and Selection; 3. Management of Proceeds; and 4. Reporting.

Kestrel has determined that the Series 2024A Bonds are in conformance with the four core components of the ICMA Green Bond Principles, as described in Kestrel’s “Second Party Opinion,” which is attached hereto as APPENDIX M – “GREEN BONDS SECOND PARTY OPINION.”

For over 20 years, Kestrel has been consulting in sustainable finance. Kestrel is an approved verifier accredited by the Climate Bonds Initiative. Kestrel reviews transactions in all asset classes worldwide for alignment with ICMA Green Bond Principles, Social Bond Principles, Sustainability Bond Guidelines and the Climate Bonds Initiative Standards and Criteria.

The Second Party Opinion issued by Kestrel does not and is not intended to make any representation or give any assurance with respect to any other matter relating to the Series 2024A Bonds. Second Party Opinions provided by Kestrel are not a recommendation to any person to purchase, hold, or sell the Series 2024A Bonds and designations do not address the market price or suitability of these bonds for a particular investor and do not and are not in any way intended to address the likelihood of timely payment of interest or principal when due.

In issuing the Second Party Opinion, Kestrel has assumed and relied upon the accuracy and completeness of the information made publicly available by the Issuer and the Borrower or that was otherwise made available to Kestrel. See also, “PART 9 – PROJECT PARTICIPANTS – Environmental, Social and Governance.”

### **PART 3 – PLAN OF FINANCE**

#### **Project Sources and Uses of Funds**

The Project is estimated to cost approximately \$5.0 billion, which will be derived from a number of sources, including primarily the Loan Facility and Obligations issued to refinance the Loan Facility (including the Series 2024 Bonds), equity contributions from the Equity Members, operating revenues, and investment income. Proceeds of the Series 2024 Bonds will be used to, among other things, pay down a portion of the amounts drawn to date under the Loan Facility and, if and to the extent applicable, terminate an associated portion of the Permitted Hedge Agreements.

The estimated sources and uses of funds with respect to the issuance of the Series 2024 Bonds are expected to be as follows:

### Sources and Uses of Series 2024 Bonds

#### Sources of Funds

Principal Amount	\$ 1,945,637,768.00
Net Original Issue Premium	<u>84,194,934.90</u>
 Total Sources	 <u><u>\$ 2,029,832,702.90</u></u>

#### Uses of Funds

Senior Term Loan Paydown	\$ 1,627,656,131.00
Refund Series 2022A Bonds	345,890,000.00
Net Permitted Hedge Agreement Termination Costs	17,706,918.63
Issuance and Other Paydown Costs <sup>1</sup>	<u>38,579,653.27</u>
 Total Uses	 <u><u>\$ 2,029,832,702.90</u></u>

<sup>1</sup> Includes Underwriters' Discount, legal fees, Issuer's fees, rating agency fees, pricing costs, a portion of the Policy premium, and other fees and expenses. Additional amounts may be paid from other Borrower funds.  
Source: JFK Millennium Partners, LLC.

After giving effect to the issuance of the Series 2024 Bonds and the pay down of a portion of the Loan Facility, the estimated sources and uses of funds for the Project are expected to be as follows:

### Aggregate Sources and Uses of Funds

<b>Sources of Funds</b>	Financing Activity through Closing	Remaining Financing Activity*	Total*
Series 2024 Bonds Proceeds	\$ 2,029,832,703	\$ 0	\$ 2,029,832,703
Loan Facility	173,002,068	1,297,451,801	1,470,453,869
Borrower Equity	0	1,300,000,000	1,300,000,000
Reinvested Operating Revenues	0	83,354,496	83,354,496
Investment Income During Construction	33,600,423	25,282,733	58,883,156
Future Bond Proceeds <sup>1</sup>	0	29,193,279	29,193,279
<b>Total Sources<sup>2</sup></b>	<b>\$ 2,236,435,193</b>	<b>\$ 2,735,282,310</b>	<b>\$ 4,971,717,503</b>
<b>Uses of Funds</b>			
Construction Costs <sup>3</sup>	\$ 1,439,083,578	\$ 1,768,620,442	\$ 3,207,704,020
Pre-Development Expenses	220,665,443	0	220,665,443
Issuance Costs <sup>4</sup>	133,011,219	13,918,355	146,929,574
Equity LOC Fees	112,058,219	102,357,067	214,415,286
Interest During Construction <sup>5</sup>	176,909,815	613,860,939	790,770,754

<b>Total Uses<sup>2</sup></b>	<b>\$ 2,236,435,193</b>	<b>\$ 2,735,282,310</b>	<b>\$ 4,971,717,503</b>

\* Estimated, subject to change.

<sup>1</sup> Future bond proceeds used to fund costs of issuance related to the projected future 2028 refinancing of the Loan Facility.

<sup>2</sup> Totals may not add due to rounding.

<sup>3</sup> These costs include the guaranteed maximum price of the D&C Contract as well as the Port Authority Cost Reimbursement, Milestone Payments, Management Personnel, MSA Fees, Lounge and Tenant fit out related costs, Insurance, Contingencies and Fuel Line.

<sup>4</sup> Approximately \$38,579,653 of the issuance costs relate to the Series 2024 Bonds, including Underwriters' Discount, legal fees, Issuer's fees, rating agency fees, pricing costs, the Policy premium and other fees and expenses.

<sup>5</sup> Includes interest on the Loan Facility and the Series 2024 Bonds.

<sup>6</sup> To be funded on the Phase 2 End of Funding Date. See "PART 4 – SECURITY FOR THE SERIES 2024 BONDS" below.

Source: JFK Millennium Partners, LLC.

## **Contingencies**

As of September 30, 2024, the Borrower maintains in its Project Budget, available for any and all Project related activities, unallocated contingencies exceeding \$75.1 million. See APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR – 8.3 Design-Builder’s Guaranteed Maximum Price,” “– 8.3.1 Lessee Allowances,” and “– 8.4 Lessee Costs” for additional information regarding contingency utilization to date.

## **Interest Income**

The Borrower invests cash balances related to excess borrowings, net earnings from operating Terminal 7 and its Liquidity Reserve Account in various Eligible Investments, including (i) money market funds with one of the two highest long-term ratings available from S&P and Moody’s, earning rates as of October 1, 2024 of 4.79% – 4.8% per annum, (ii) obligations the principal and interest of which are unconditionally guaranteed by the United States of America, earning rates as of October 1, 2024 at a weighted rate of 4.4% per annum, and (iii) two guaranteed investment contracts guaranteed by an entity whose obligations are rated not lower than A2 by Moody’s, one maturing June 30, 2026 and earning interest at the rate of 4.72% and the second maturing December 31, 2026 and earning interest at the annual rate of 4.70%.

## **Loan Facility**

On the Original Closing Date, (i) the Issuer issued its not to exceed \$435,000,000 Special Facilities Bonds, Senior Series 2022A (Tax-Exempt) (AMT) (JFK Airport Terminal 6-7 Redevelopment Project) (the “Series 2022 Bonds”), all of which has been funded through a direct placement with the Royal Bank of Canada (the “Series 2022 Bondholder”) and (ii) the Borrower, the Issuer, the Lenders, the Security Deposit Facility LC Issuing Bank, ING Capital LLC, as administrative agent (the “Administrative Agent”) and the coordinating lead arrangers, senior joint lead arranger, joint lead arrangers, mandated lead arrangers, senior managing agent and bookrunners party thereto entered into a Credit Agreement (the “Credit Agreement”), pursuant to which: (i) the Lenders agreed to lend up to \$3,009,000,000 to the Issuer (the “Senior Term Loans”), (ii) the Security Deposit Facility LC Issuing Bank agreed to make Security Deposit LCs available to the Issuer (which Security Deposit LCs were to be used by the Borrower to provide a security deposit to the Port Authority with respect to and as required by the Lease Agreement), and (c) the Security Deposit Facility Lender agreed to make Security Deposit Loans to the Issuer (the Security Deposit Loans together with the Senior Term Loans, the “Senior Loans”). See APPENDIX F-2 – “FORM OF CREDIT AGREEMENT” and APPENDIX F-3 – “SERIES 2022 BONDHOLDER AGREEMENT.”

The Borrower, Issuer, Collateral Agent, Lenders, Securities Deposit Facility LC Issuing Bank, Intercreditor Agent, Administrative Agent, and Series 2022 Bondholder are parties to that certain Common Terms Agreement (the “Common Terms Agreement”), dated as of November 1, 2022, which provides for certain common terms of the Series 2022 Bonds and the Senior Loans (such Series 2022 Bonds, the Senior Loans, and the Security Deposit LC Obligations being referred to herein collectively as the “Loan Facility”). The provisions of the Common Terms Agreement are only for the benefit of the Series 2022 Bondholder and the Lenders, and are not for the benefit of, nor enforceable by, the holders of the Series 2024 Bonds, and will no longer apply following the discharge of the Senior Bank Obligations. Certain events of default under the Common Terms Agreement and other financing documents related specifically to the Loan Facility do not automatically permit the exercise of remedies by the Senior Collateral Agent, unless (i) the Standstill Period has expired, (ii) the Senior Bank Obligations have been accelerated in accordance with the Senior Bank Financing Documents (which acceleration would then trigger cross-acceleration of the Series 2024 Bonds without action taken by the holders of the Series 2024 Bonds), and (iii) the Administrative Agent has instructed the Intercreditor Agent to instruct the Senior Collateral Agent to exercise an Enforcement Action of the types contemplated in clauses (a) and (b) of the definition thereof

(other than solely with respect to Segregated Collateral of the Bank Finance Parties) with respect to such event of default. See “PART 17 – RISK FACTORS – Loan Facility, Intercreditor and Hedging Risks.”

Except as expressly set forth in the Intercreditor Agreement (as defined herein), the holders of the Series 2024 Bonds will not be entitled to consent to any amendment or waiver effected under the Common Terms Agreement. The Intercreditor Agreement is attached hereto as APPENDIX D-5 and the Common Terms Agreement is attached hereto as APPENDIX F-1.

As of September 30, 2024, approximately \$2,047,000,000 has been drawn from the Senior Term Loans and all \$435,000,000 has been drawn against the Series 2022 Bonds. A portion of the proceeds of the Series 2024 Bonds will be applied to the redemption and/or prepayment of approximately \$1,973,546,131 of the Loan Facility, leaving an outstanding Loan Facility balance of approximately \$508,453,869, all of which, together with future advances thereunder is scheduled to mature in full on the Bank Financing Maturity Date. The approximately \$962,000,000 of undrawn Senior Term Loans will remain available to be funded through the Issuer to the Borrower through the TDC Loan Agreements and applied to pay costs of the Project following the issuance of the Series 2024 Bonds. The Borrower’s current plan of finance, which is subject in all respects to market conditions from time to time and remains subject to change in their sole and absolute discretion, anticipates refinancing future draws under the Loan Facility with the proceeds of additional tax-exempt and taxable bonds constituting either Additional Senior Obligations (secured on a parity basis with the Series 2024 Bonds and any remaining balance of the Loan Facility) and/or Subordinate Obligations (secured on a subordinate basis to the Senior Obligations).

Under the Common Terms Agreement, the Borrower has covenanted to enter into, and thereafter maintain, Permitted Hedge Agreements that hedge and mitigate the variable interest rate risk of the Issuer under the Loan Facility to which the Borrower is exposed, on a pass-through basis, under the terms of the TDC Loan Agreements. See APPENDIX F-1 – “FORM OF COMMON TERMS AGREEMENT.”

The obligations of the Borrower under the Loan Facility and the Permitted Hedge Agreements constitute Senior Obligations secured on a parity basis with the Series 2024 Bonds. The Loan Facility is further secured by the Series 2022A Building Note, the TDC Bank Debt Building Note, the Series 2022A Project Note, the TDC Bank Debt Project Note and the TDC Security Deposit Project Note (collectively, the “2022 TDC Notes”). The Borrower is obligated under the TDC Loan Agreements and the 2022 TDC Notes to make payments sufficient to pay the principal or Redemption Price of, and interest on, the Loan Facility, as and when the same becomes due.

The Loan Facility documentation includes certain covenants, events of default and draw requirements that are more stringent than those applicable to the Series 2024 Bonds under the Indenture. In particular, the rights and remedies of the Bank Lenders under the Loan Facility documentation are more robust than those of the Series 2024 Bondholders in certain respects, and specific conditions must be satisfied in order for the Bank Lenders to fund their obligations under the Loan Facility. The Series 2024 Bondholders are not parties to or beneficiaries of the documentation relating to the Loan Facility and are not entitled to consent to amendments or waivers thereunder, subject to the Intercreditor Agreement (see “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Intercreditor Agreement – Amendments to Financing Documents” herein; see also APPENDIX F-1 – “FORM OF COMMON TERMS AGREEMENT”, APPENDIX F-2 – “FORM OF CREDIT AGREEMENT” and APPENDIX F-3 – “SERIES 2022 BONDHOLDER AGREEMENT” hereto for detailed provisions concerning the Loan Facility).

## Aggregate Senior Obligation Debt Service

After giving effect to the issuance of the Series 2024 Bonds and the repayment of a portion of the Loan Facility with the proceeds thereof, the aggregate debt service on the Senior Obligations will be as follows:

FYE December 31	Series 2024A Principal <sup>(1)</sup>	Series 2024A Interest <sup>(1)(2)</sup>	Series 2024B Principal	Series 2024B Interest <sup>(2)</sup>	Loan Facility & Refinancing Payments <sup>(2)(3)</sup>	Total Senior Obligation Debt Service <sup>(2)(3)</sup>

<sup>(1)</sup> Assumes Series 2024A Balloon Indebtedness refinanced prior to final maturity with amortization semiannually from June 30, 2055 to December 31, 2060 with coupon of 5.25%.

<sup>(2)</sup> Gross interest shown and does not take into effect any funding of interest during construction.

<sup>(3)</sup> Assumes remaining Senior Term Loans pay interest at an effective rate of 5.887% and Series 2022A Bonds pay interest at an effective rate of 4.801% as each are drawn through the projected refinancing date in March 2028. Assumes future refinancing of remaining approximately \$1,470,453,869 of the Loan Facility in March 2028 at an effective total interest cost of 4.98% with coupons ranging from 5.00% to 5.25% and principal amortization semiannually from June 30, 2034 to December 31, 2051. Amounts are estimated and subject to change.

<sup>(4)</sup> Totals may not add due to rounding.

## Hedging Agreements

With respect to the Senior Term Loans, the Borrower has entered into and is required, under the Common Terms Agreement, to maintain certain hedge agreements (the “Senior Term Loans Permitted Hedge Agreements”) that collectively have (A) through but not including the Substantial Completion Date, an effective notional amount of not less than 100% of the projected aggregate outstanding principal amount of the Senior Term Loans as of each Scheduled Credit Extension Date; (B) for the period commencing on, and including the Substantial Completion Date and ending on, but excluding, the first anniversary thereof, an effective notional amount of not less than 90% of the projected aggregate outstanding principal amount of the Senior Term Loans as of each Interest Payment Date and (C) thereafter, until the Bank Financing Maturity Date, an effective notional amount of not less than 75% of the projected aggregate outstanding principal amount of the Senior Term Loans as of each Interest Payment Date, in each case calculated in accordance with the Base Case Financial Model as of the Original Closing Date; provided that, if the aggregate effective notional amount of the Senior Term Loans Permitted Hedge Agreements is greater than 100% of the projected aggregate principal amount of the Senior Term Loans, in each case, calculated in accordance with the Base Case Financial Model, the Borrower shall within five (5) Business Days thereafter partially terminate, on a pro rata basis, the Senior Term Loans Permitted Hedge Agreements in the amount necessary to ensure that the effective notional amount of the Senior Term Loans Permitted Hedge Agreements do not exceed 100% of the projected outstanding principal amount of the Senior Term Loans, in each case, calculated in accordance with the Base Case Financial Model.

With respect to the Series 2022A Bonds, the Borrower has entered into and is required to maintain certain hedge agreements (the “Series 2022A Bonds Permitted Hedge Agreements”) that collectively have (A) through but not including the Substantial Completion Date, an effective notional amount of not less than 100% of the projected par value of the outstanding Series 2022A Bonds as of each Scheduled Drawing Date, provided that if the Purchaser exercises its right to advance a drawing of the remaining available RBC Commitment, from the date that is five (5) Business Days after the applicable drawing, the effective notional amount shall be not less than 100% of the actual par value of the outstanding Series 2022A Bonds; (B) for the period commencing on, and including, the Substantial Completion Date and ending on, but excluding, the first anniversary thereof, an effective notional amount of not less than 90% of the projected par value of the outstanding Series 2022A Bonds as of each Interest Payment Date, and (C) thereafter, until the Bank Financing Maturity Date, an effective notional amount of not less than 75% of the projected par value of the outstanding Series 2022A Bonds as of each Interest Payment Date, in each case, calculated in accordance with the Base Case Financial Model as of the Original Closing Date; provided that, if the aggregate effective notional amount of the Series 2022A Bonds Permitted Hedge Agreements is greater than 100% of the projected aggregate par value of the outstanding Series 2022A Bonds on any Interest Payment Date, in each case, calculated in accordance with the Base Case Financial Model, the Borrower shall within five (5) Business Days thereafter partially terminate, on a pro rata basis, the Series 2022A Bonds Permitted Hedge Agreements, in the amount necessary to ensure that the effective notional amount of the Series 2022A Bonds Permitted Hedge Agreements do not exceed 100% of the projected par value of the outstanding Series 2022A Bonds, in each case, calculated in accordance with the Base Case Financial Model.

Pursuant to the Common Terms Agreement, the Borrower has entered into and is required to maintain certain hedge agreements to mitigate interest rate exposure of the Borrower (the “Interest Rate Exposure Hedge Agreements”) that, for the period commencing on, and including, the Bank Financing Maturity Date through, and including, December 31, 2060, effectively hedge or mitigate at all times during such period, on an aggregate basis, not less than 75% of the effective projected interest rate exposure of the Borrower (whether direct or indirect) during such period on the projected principal amount or par value, as the case may be, of the Indebtedness intended to repay the Senior Term Loans and redeem the Series 2022A Bonds in full upon occurrence of the Bank Financing Maturity Date as of each projected interest payment date of such Indebtedness, in each case, as shown in the Base Case Financial Model delivered on the Original Closing Date.

As of September 1, 2024, the Borrower has entered into Permitted Hedge Agreements with ING Capital Markets LLC, JPMorgan Chase Bank, National Association, KeyBank National Association, Royal Bank of Canada, The Bank of Nova Scotia, SMBC Capital Markets, Inc., Mizuho Capital Markets LLC and MUFG Bank, LTD, each of which (or an affiliate thereof) is also a Lender under the Loan Facility.

In connection with the issuance of the Series 2024 Bonds and payoff of a portion of the Loan Facility with the proceeds thereof, an associated portion of the Permitted Hedge Agreements will be terminated. See “PART 3 – PLAN OF FINANCE – Sources and Uses of Series 2024 Bonds” herein.

## **Member Equity**

### ***Aggregate Capital Commitment***

Under the Equity Contribution Agreement, the aggregate amount of equity investment that the equity members of the Borrower have committed to contribute (the “Total Equity Commitment”) is \$1.3 billion, which amount is split among the Borrower’s equity members as follows: (i) with respect to RXR JFK MP Holdings Member LLC (the “RXR Member”), \$260,000,000, (ii) with respect to Corsair-Vantage Airport Fund Aggregator, L.P. (the “Vantage Member”), \$585,000,000, (iii) with respect to ATI Javelin Holdings, LP (the “ATI Member” and, together with the RXR Member, Vantage Member and JetBlue, the “Equity Members”), \$390,000,000, and (iv) with respect to JetBlue, \$65,000,000.

The obligations of each Equity Member to make Equity Contributions under the Equity Contribution Agreement are irrevocable, absolute and unconditional. As described under “***Equity Letters of Credit or Collateral Account Control Agreement***” below, each Equity Member has also posted or entered into, as applicable, and must maintain, until the earlier of (i) the date on which the unfunded equity commitment of each Equity Member is zero and (ii) the date on which the later of (x) the Discharge of Senior Obligations and (y) the Discharge of Subordinate Obligations occurs (the earlier of such dates being the “Release Date”), one or more irrevocable standby letter(s) of credit or collateral accounts subject to a collateral account control agreement in the amount of their required Equity Contribution.

### ***Payment of Equity Contributions; Acceleration***

Pursuant to the Equity Contribution Agreement, the Equity Members will be required to make Equity Contributions into the Equity Contribution Sub-Account of the Construction Account as and when requested by the Borrower (or, in certain circumstances, the Collateral Agent or the Administrative Agent). The Borrower will determine when during the construction period to request such Equity Contributions, in order to optimize the use of the various funding sources available to the Borrower.

Upon receipt by the applicable Equity Member of a contribution notice from the Borrower (or, in certain circumstances, the Collateral Agent or the Administrative Agent) requesting payment of a portion of such Equity Contribution, each Equity Member will contribute the requested funds, up to the amount of its total equity commitment. All Equity Contributions will be deemed to be made upon deposit of the applicable funds into the Equity Contribution Sub-Account of the Construction Account.

If the full amount of the equity commitments have not been contributed by the Substantial Completion Date, the entirety of each Equity Member’s remaining equity commitment is required to be made on the Substantial Completion Date. In addition, the payment of Equity Contributions may be requested (i) at the election of the Borrower; (ii) upon the occurrence and continuance of an Event of Default under the Senior Bank Financing Documents; (iii) if a payment under the TDC Loan Agreements has been accelerated, or (iv) in the event that the Securities Intermediary has been instructed to transfer funds from the Equity Contribution Sub-Account of the Construction Account and there are not sufficient funds in such account to make such transfers as of two (2) Business Days prior to the applicable transfer date, in which case the aggregate amount equal to such shortfall shall be deposited.

If a Sponsor fails to make a payment or Equity Contribution or provide Equity Support in accordance with the Equity Contribution Agreement (a “Defaulting Sponsor”), each other Sponsor has the right, but not the obligation, to provide payment of the relevant Equity Contribution or provide Equity Support, as applicable, on behalf of the Defaulting Sponsor, provided that they exercise such option by providing notice to the Collateral Agent accompanied by (i) payment into the Equity Contribution Sub-Account of the Construction Account of the applicable defaulted payment or (ii) the delivery of Equity Support, as applicable, within four (4) Business Days of the relevant Sponsor becoming a Defaulting Sponsor. The Senior Collateral Agent acknowledges that any such payment(s) or delivery of Equity Support, as applicable, shall be deemed to satisfy the Defaulting Sponsor’s obligations under the Equity Contribution Agreement in respect of any failure by such Defaulting Sponsor and shall not give rise to an Event of Default or any other default or event of default under any Financing Document.

The Equity Members are not required to contribute equity funds in excess of each Equity Member’s pro rata share of the Total Equity Commitment, and such obligations are several, not joint and several.

### **Liquidity Reserve Account**

Concurrently with the execution of the Lease Agreement, the Borrower funded a Liquidity Reserve Account in an amount of \$100,000,000 which, as of August 31, 2024, had a balance of \$105,008,910, all of which remains on deposit therein. Amounts on deposit in the Liquidity Reserve Account are available to address unforeseen liquidity events or any other needs of the Project, as determined by the Borrower, and, in particular, amounts on deposit in the Liquidity Reserve Account shall be available as follows:

(i) Prior to the Phase 2 End of Funding Date, to pay Project Costs (including to fund any shortfall in the Pre-Substantial Completion Revenue Account), at the direction of the Borrower.

(ii) On or after the Phase 2 End of Funding Date, (A) to pay Project Costs (including to fund any shortfall in the Post-Substantial Completion Revenue Account, but not to pay Permitted Tax Distributions or transfer funds to the Remaining Revenue Account) and (B) if the amount in the Liquidity Reserve Account exceeds the Required Liquidity Reserve Amount, then any amount in the Liquidity Reserve Account in excess of the Required Liquidity Reserve Amount may be transferred to the Distribution Account (but only if the Restricted Payment Conditions are then satisfied), or may be transferred, at the election of the Borrower, to any other account created under the Collateral Agency and Accounts Agreement, including any reserve account.

Beginning on the first Quarterly Distribution Date following the date on which aggregate distributions made by the Borrower to the Sponsors from the Distribution Account equal the aggregate amount of equity invested by the Sponsors in the Project to such date, so long as no Default or Event of Default has occurred and is continuing, amounts remaining in the Liquidity Reserve Account shall be transferred to the Distribution Account (without (and not subject to) any conditions, restrictions or limitations) for distribution by the Borrower to the Sponsors in equal installments on each Quarterly Distribution Date over the remainder of the Lease Agreement.

The Liquidity Reserve Account is a pledged account that will be maintained by the Securities Intermediary and shall constitute Collateral for the benefit of the Secured Parties.

No additional deposits are required to be made to the Liquidity Reserve Account, even if the amount in such account falls below the Required Liquidity Reserve Amount.

### **Bank Consents**

Since the initial closing of the Loan Facility, there have been three Bank Consents delivered: (i) that certain Limited Consent and Waiver dated December 28, 2023, executed by the Borrower, the Senior

Collateral Agent, the Intercreditor Agent, the Trustee, and the Administrative Agent (relating to and permitting the Borrower to deliver a \$285,000 letter of credit to the Port Authority in connection with Borrower's lease of certain office space at the Airport from the Port Authority); (ii) that certain Limited Consent and Waiver Regarding Fit-Out Allowance, dated January 12, 2024, executed by the Borrower and the Administrative Agent (authorizing certain change orders under the D&C Contract with an estimated cost not to exceed \$135.4 million in the aggregate); and (iii) that certain Limited Consent and Waiver – Owner Controlled Insurance Program – Claims Reserve Funding, dated February 23, 2024, executed by the Borrower, the Senior Collateral Agent, the Intercreditor Agent, the Trustee, and the Administrative Agent and any additional consents granted to the Borrower by the Administrative Agent on behalf of the Bank Finance Parties, pursuant to the terms of the Senior Financing Documents (relating to the establishment of the Owner Controlled Insurance Program and the funding of certain deposits in connection therewith of not to exceed \$98.5 million over a period of five years) (collectively, the “Bank Consents”). The Bank Consents have each been effective since their respective dates and have been incorporated and reflected in the descriptions and discussions throughout this Official Statement, including, in particular, those relating to the Project, the D&C Contract, the Owner Controlled Insurance Program and in the Consultants' reports appended hereto as APPENDIX B.

In addition, the Administrative Agent, the Senior Collateral Agent, the Trustee, the Intercreditor Agent and the Hedge Providers have consented to amendments and supplements to certain Financing Documents (including, among other documents, the First Amendments to TDC Loan Agreements, First Amendment to the Collateral Agency and Accounts Agreement, and Second Supplemental Indenture), and the Administrative Agent has provided waivers of certain terms of the Common Terms Agreement, in connection with, and to facilitate, the issuance of the Series 2024 Bonds.

### **Lease Constraint on Indebtedness**

Pursuant to the Lease Agreement, the aggregate principal amount of the Borrower's debt secured by the Leasehold Mortgages shall not exceed a maximum amount of \$4,225,000,000. The Borrower is generally required to obtain the Port Authority's prior written consent to any proposed refinancing. However, the Port Authority's consent is not required if the proposed refinancing is incurred to refinance all or any portion of the initial Loan Facility originating under the Senior Financing Documents, subject to certain conditions in the Lease Agreement. The Borrower has structured the issuance of the Series 2024 Bonds to fit within a permitted Refinancing under the Lease Agreement that does not require the Port Authority's consent. These indebtedness restrictions set forth in the Lease Agreement are for the sole benefit of the Port Authority. The Lease Agreement provisions can be waived or amended by the Port Authority without the consent of the holders of the Series 2024 Bonds or other Senior Obligations. For more information related to the Lease Agreement's constraints on indebtedness, see APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Project Financing.”

## **PART 4 – SECURITY FOR THE SERIES 2024 BONDS**

### **General**

Generally, after substantial completion of the Project, the Series 2024 Bonds and all other Senior Obligations are expected to be paid from Project Revenues. Amounts due and payable on the Senior Obligations, including the Series 2024 Bonds, are secured, on a parity basis, by certain collateral, other than Segregated Collateral described below, that is held by the Senior Collateral Agent under the Collateral Agency and Accounts Agreement. This collateral includes the following:

- (a) Covenants of the Borrower to cause the timely payment of the Senior Obligations, including the Series 2024 Bonds, under the TDC Loan Agreements and TDC Notes. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The TDC Loan Agreements.” The Issuer has assigned all of its right, title and interest, except for its Reserved Rights, in the Leasehold

Mortgages, the Assignment of Leases and Rents, the TDC Loan Agreements and the TDC Notes to the Senior Collateral Agent pursuant to the Issuer Assignment Agreements.

(b) Covenants of the Borrower under the Collateral Agency and Accounts Agreement to take all lawful measures to establish, prescribe and collect Project Revenues sufficient to meet the rate covenant/financial ratio covenant described herein. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Rate Covenant/Financial Ratio Covenant.”

(c) The Project Accounts created under the Collateral Agency and Accounts Agreement, including, but not limited to:

(1) The Senior Debt Service Reserve Account, a Segregated Reserve Pledged Account solely for the benefit of the Senior Secured Parties; see “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Debt Service Reserve Account;” and

(2) The Ramp-Up Reserve Account, a Segregated Reserve Pledged Account solely for the benefit of the Senior Secured Parties; see “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Ramp-Up Reserve Account.”

(d) The Leasehold Mortgages, including a mortgage lien on and security interest in all of the Borrower’s interests under the Lease Agreement. The Leasehold Mortgages secure all of the Borrower’s indebtedness, liabilities and obligations under the TDC Loan Agreements and the TDC Notes, including any obligations due by the Borrower to the Senior Collateral Agent on behalf of the Senior Secured Parties pursuant to the TDC Loan Agreements and the TDC Notes. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Leasehold Mortgages.”

(e) The Senior Equity Pledge Agreement, including a pledge of HoldCo’s interests, options, warrants and rights to purchase, dividends, distributions, cash, securities, instruments and other property from time to time paid, payable or otherwise distributed in respect of or in exchange for all or any part of its limited liability company interests in the Borrower and any indebtedness owed to HoldCo by the Borrower from time to time. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Senior Equity Pledge Agreement.”

(f) The Assignment of Leases and Rents, including a pledge of all of the Borrower’s right, title, and interest in all written or oral leases, subleases, licenses, franchises, concessions, and other occupancy agreements to which the Borrower is a landlord. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Assignment of Leases and Rents.”

(g) The Direct Agreements, including collateral assignments of the D&C Contract, the Management Services Agreement and the JetBlue Sublease by the Borrower to the Senior Collateral Agent, including certain cure and step-in rights, subject to certain conditions. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Direct Agreements.”

(h) The Senior Security Agreement, including a Security Interest in and lien on all of the Borrower’s right, title and interest in, to and under all of its personal property, tangible and intangible. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Senior Security Agreement.”

(i) In certain limited circumstances, amounts owed under the Equity Contribution Agreement, as further secured by the Equity Letters of Credit or Equity Collateral Accounts. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Equity Letters of Credit and Collateral Account Control Agreement.”

The rights of the Senior Secured Parties regarding actions on the Collateral are subject to the terms of the Intercreditor Agreement. The Holders of the Series 2024 Bonds are represented by the Trustee as their Secured Debt Representative under the Intercreditor Agreement. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Intercreditor Agreement.”

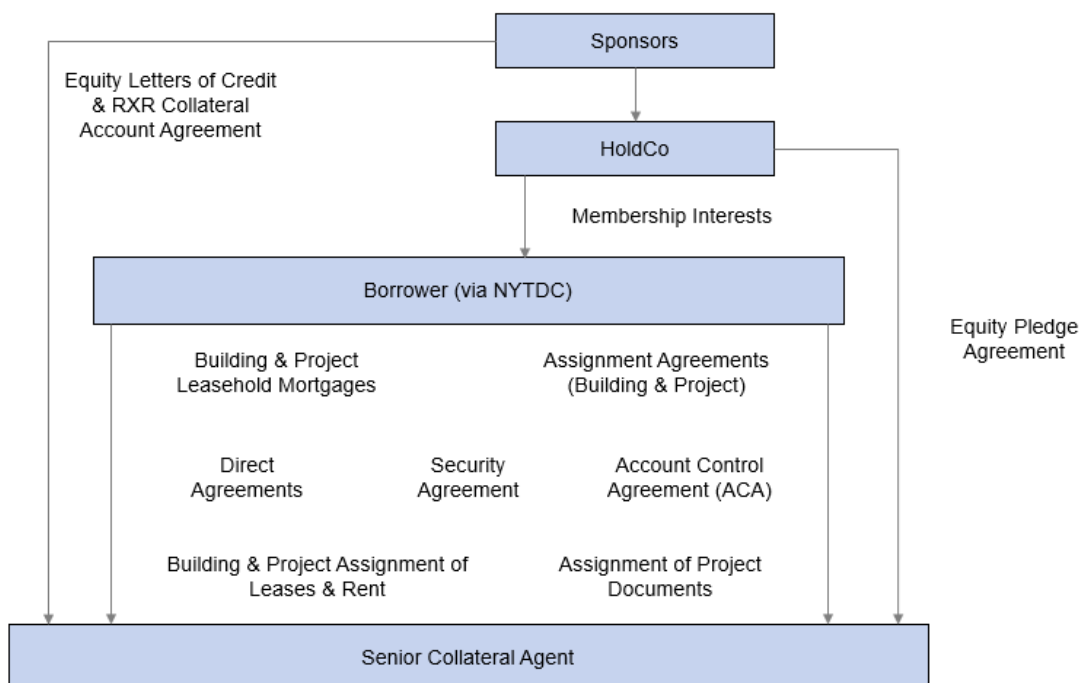

In addition to the collateral held by the Senior Collateral Agent, the Series 2024 Bonds are also secured by the Trust Estate under the Indenture. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Indenture.”

The collateral held by the Senior Collateral Agent, the Trust Estate (with respect to Senior Bonds) and all additional collateral in which a Security Interest is granted or intended to be granted in favor of the Senior Secured Parties (or any sub-agent or other Person acting for or on behalf of the Senior Secured Parties), for the benefit of the Senior Secured Parties, by the Issuer, the Borrower or the HoldCo under the Senior Collateral Documents constitute the Senior Collateral securing the Series 2024 Bonds (collectively, the “Senior Collateral”).

Certain Senior Collateral that is designated in the Senior Financing Documents as Segregated Collateral is pledged only for the benefit of certain Obligations or classes of Obligations. In addition to the Segregated Reserve Pledged Accounts discussed above, Segregated Collateral includes the Segregated Proceeds Pledged Accounts, the Surplus Remaining Revenue Account, each under the Collateral Agency and Accounts Agreement, and Segregated Policy Payment Accounts under the Indenture.

Please see the following diagram for an overview of the documents securing the Series 2024 Bonds and other Senior Obligations:

## Senior Security Documents

## **The TDC Loan Agreements**

The Issuer has loaned certain proceeds of the Loan Facility and will loan the proceeds of the Series 2024 Bonds to the Borrower under and pursuant to the TDC Loan Agreements and the related TDC Notes for purposes of financing and refinancing a portion of the costs relating to the design and construction of the Project and to pay or reimburse the Borrower for certain other costs and expenses. Proceeds used to pay a “cost of improvement” under the New York Lien Law are loaned to the Borrower under the TDC Building Loan Agreement and other proceeds, used to pay costs that do not qualify as a “cost of improvement” under the New York Lien Law, are loaned to the Borrower under the TDC Project Loan Agreement.

The Borrower has agreed in the First Amendments to the TDC Loan Agreements to optionally redeem the Series 2024 Balloon Indebtedness pursuant to the terms outlined in the Second Supplemental Indenture. See “PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS – Mandatory Optional Redemption of the Series 2024A Balloon Indebtedness.” The Borrower has agreed to cause the Senior Collateral Agent to make certain payments to the Bond Insurer, including the payment of deferred Bond Insurer Premium as a fee, administrative cost and expense due and payable under the Financing Documents.

The Issuer has assigned its interests in the TDC Loan Agreements to the Collateral Agent, except for the Issuer’s Reserved Rights, pursuant to the Issuer Assignment Agreements. For more information relating to the terms of the TDC Loan Agreements, see APPENDIX D-4 – “FORM TDC LOAN AGREEMENTS.”

## **The Collateral Agency and Accounts Agreement**

Pursuant to the terms of the Collateral Agency and Accounts Agreement, The Bank of New York Mellon has been appointed as Senior Collateral Agent by the Administrative Agent (on behalf of the Bank Lenders and the Holders of the Series 2022A Bonds), the Trustee (on behalf of the Holders of the Bonds (other than the Holders of the Series 2022A Bonds) and the Senior Bond Insurer Obligations) and the Intercreditor Agent (on behalf of each other Senior Secured Party) with respect to the security interests in and to the Senior Collateral and the rights and remedies set forth under the Senior Collateral Documents. The Collateral Agency and Accounts Agreement appoints the Collateral Agent and outlines its duties and responsibilities, establishes certain Project Accounts and Non-Pledged Accounts, dictates the flow of Project Revenues through the Pre-Substantial Completion Revenue Account and Post-Substantial Completion Revenue Account and includes certain covenants of the Borrower and the Issuer, among other provisions. See APPENDIX D-2 – “FORM OF COLLATERAL AGENCY AND ACCOUNTS AGREEMENT.”

### ***Rate Covenant/Financial Ratio Covenant***

The Collateral Agency and Accounts Agreement contains certain financial commitments of the Borrower, one of which is the rate covenant/financial ratio covenant. Under the Collateral Agency and Accounts Agreement, the Borrower has covenanted to take all lawful measures to establish, prescribe and collect Project Revenues sufficient, after paying all O&M Expenses (including all O&M Expenses not constituting Permitted O&M Expenses and all Ground Rent, First Additional Rent, Second Additional Rental, and Third Additional Rent) to achieve, in each DSCR Calculation Period, (i) during the Ramp-Up Period, (A) a Total Debt Service Coverage Ratio of 1.25x and (B) a Senior Debt Service Coverage Ratio of 1.30x, and (ii) after the Ramp-Up End Date, (A) a Total Debt Service Coverage Ratio of 1.15x and (B) a Senior Debt Service Coverage Ratio of 1.20x, both on a prospective basis (based on forecasts prepared by the Borrower based on reasonable assumptions and information known to the Borrower at such time) and on a retrospective basis (based on the Borrower’s annual audited and quarterly unaudited consolidated financial statements most recently required to be delivered), subject to the terms of the Collateral Agency and Accounts Agreement; provided, however that (i) if the Total Debt Service Coverage Ratio or the Senior Debt Service Coverage Ratio requirement is not projected to be met for an upcoming fiscal year, then the

Borrower shall request a third party to recommend revisions to its Annual Operating Budget and, after taking into account such recommendations, to revise its Annual Operating Budget to produce (to the extent practicable using prudent business judgment) sufficient revenues to satisfy such Total Debt Service Coverage Ratio or Senior Debt Service Coverage Ratio requirement, and that (ii) failure to satisfy this covenant shall not be deemed an event of default under the TDC Loan Agreements, the Credit Agreement or the other Financing Documents so long as the Borrower revises its Annual Operating Budget, as recommended by the applicable third party, insofar as practicable (using prudent business judgment) so as to cure such failure. For further description of the rate covenant/financial ratio covenant and the other financial commitments made by the Borrower, see APPENDIX D-2 – “FORM OF COLLATERAL AGENCY AND ACCOUNTS AGREEMENT.”

In addition to the rate covenant set forth in the Collateral Agency and Accounts Agreement, the Borrower has covenanted, in the Common Terms Agreement for the benefit of the Bank Finance Parties, to maintain for each DSCR Calculation Period a Total Debt Service Coverage Ratio of not less than 1.10 to 1.00 and a Senior Debt Service Coverage Ratio of not less than 1.15 to 1.10, on a retrospective and prospective basis. Failure to satisfy such covenant shall be a default under the Common Terms Agreement, subject to certain rights to cure such breach in certain circumstances if additional equity contributions are made to the Borrower within specified time frames. This covenant is only for the benefit of the Bank Finance Parties, may be amended or waived by the Bank Finance Parties in their sole discretion, and will no longer apply following the discharge of the Senior Bank Obligations, see APPENDIX F-1 – “FORM OF COMMON TERMS AGREEMENT.”

### ***Project Accounts***

Pursuant to the Collateral Agency and Accounts Agreement, certain Project Accounts have been, and will be, established in the name of the Borrower and certain Non-Pledged Accounts have established in the name of the Borrower or the Port Authority, as applicable. Pursuant to the Senior Security Agreement, the Borrower pledged and granted to the Collateral Agent, for the benefit of the Secured Parties, a security interest in and lien on the Project Accounts and the funds and investments on deposit therein, subject to the provisions of the Collateral Agency and Accounts Agreement; provided, however, that the Collateral Agent does not have a security interest in or lien on the Non-Pledged Accounts, nor the funds and investments on deposit therein.

The proceeds of the Series 2024 Bonds and the Loan Facility, as well as Project Revenues and certain other amounts received by the Borrower (including Equity Contributions), have been and will be deposited into certain Project Accounts, and the Borrower may direct the Securities Intermediary to credit funds to or deposit funds in, and to withdraw and transfer funds from, each Project Account, including the withdrawal of proceeds of the Series 2024 Bonds to pay for or reimburse Project Costs, subject to satisfaction by the Borrower of certain requirements for withdrawals and transfers set forth in the Collateral Agency and Accounts Agreement. See APPENDIX D-2 – “FORM OF COLLATERAL AGENCY AND ACCOUNTS AGREEMENT – Article V: Project Accounts and Non-Pledged Accounts.” for a further description of the Project Accounts. The flow of funds set forth in the Collateral Agency and Accounts Agreement is summarized in “PART 5 – FLOW OF FUNDS UNDER THE COLLATERAL AGENCY AND ACCOUNTS AGREEMENT.”

### ***Debt Service Reserve Account***

The Collateral Agency and Accounts Agreement establishes a Senior Debt Service Reserve Account, which will be funded on the Phase 2 End of Funding Date in an amount equal to the Senior Debt Service Reserve Requirement, as described below, and as set forth in clause *Seventh* under “PART 5 – FLOW OF FUNDS UNDER THE COLLATERAL AGENCY AND ACCOUNTS AGREEMENT – Flow of Funds Post-Substantial Completion.” The Senior Debt Service Reserve Account will secure the Series 2024 Bonds, the Loan Facility, ordinary course payments on the Permitted Hedge Agreements and any

Additional Senior Obligations issued in accordance with the Collateral Agency and Accounts Agreement and the other Financing Documents.

The Senior Debt Service Reserve Account is a pledged account maintained by the Securities Intermediary and constitutes Segregated Collateral solely for the benefit of the Senior Secured Parties; the Security Interest thereon pursuant to the Senior Security Agreement is held by the Senior Collateral Agent for the exclusive benefit of the Senior Secured Parties.

The Senior Debt Service Reserve Requirement on the Phase 2 End of Funding Date and on each Transfer Date thereafter is the Aggregate Debt Service with respect to all Outstanding Senior Obligations during the next succeeding twelve (12) month period, net of any amounts (up to the Aggregate Debt Service with respect to the Outstanding Senior Obligations during the next succeeding three (3) month period) then on deposit in the Ramp-Up Reserve Account.

Any amounts on deposit in the Senior Debt Service Reserve Account in excess of the Senior Debt Service Reserve Requirement shall be transferred by the Securities Intermediary to the Post-Substantial Completion Revenue Account; provided, however, that if any proceeds of the Series 2024 Bonds or any other Tax-Exempt Bonds are on deposit in the Senior Debt Service Reserve Account, such proceeds shall be transferred to the Tax-Exempt Bond Interest Payment Sub-Account established for such Tax-Exempt Bonds. See “PART 3 – PLAN OF FINANCE.”

### ***Ramp-Up Reserve Account***

The Collateral Agency and Accounts Agreement establishes the Ramp-Up Reserve Account, which is intended to provide additional debt service reserves for the Senior Obligations during the Ramp-Up Period. The Borrower will fund the Ramp-Up Reserve Account on the Phase 2 End of Funding Date with proceeds from the subaccounts of the Construction Account allocated for such purpose (with the particular subaccount(s) of the Construction Account to be determined at the Borrower’s election at the time of each such funding, subject to certain restrictions regarding the application of proceeds of Tax-Exempt Obligations) in an amount equal to the Aggregate Debt Service with respect to all Outstanding Senior Obligations during the next succeeding nine (9) month period (said amount being, as of the Phase 2 End of Funding Date and on each Transfer Date thereafter until the Ramp-Up End Date, the “Ramp-Up Reserve Requirement”), and thereafter additional deposits shall be made in accordance with the requirements of “PART 5 – FLOW OF FUNDS UNDER THE COLLATERAL AGENCY AND ACCOUNTS AGREEMENT – Flow of Funds Post-Substantial Completion” herein. No additional funds will be deposited into the Ramp-Up Reserve Account after the discharge of the Senior Bank Obligations.

The Ramp-Up Reserve Account is a pledged account that is maintained by the Securities Intermediary and constitutes Segregated Collateral solely for the benefit of the Senior Secured Parties; the Security Interest thereon pursuant to the Senior Security Agreement is held by the Senior Collateral Agent for the exclusive benefit of the Senior Secured Parties.

No later than five (5) Business Days after each Calculation Date during the Ramp-Up Period, the Borrower shall deliver to the Intercreditor Agent and the Senior Collateral Agent an officer’s certificate with its calculation of the Senior Debt Service Coverage Ratio and the Ramp-Up Debt Service Coverage Ratio for the DSCR Calculation Period ended on such Calculation Date. If, on any date on which any Debt Service is due on any Senior Obligations, the Senior Debt Service Coverage Ratio for the DSCR Calculation Period ending on the immediately preceding Calculation Date was less than 1.30:1.00, the Collateral Agent shall transfer from the Ramp-Up Reserve Account to the relevant Sub-Account(s) of the Senior Obligations Payment Account funds to make payment of Debt Service due and payable on the applicable Transfer Date in an aggregate amount necessary to cause the Ramp-Up Debt Service Coverage Ratio for such immediately preceding calendar quarter to be equal to 1.30:1.00. On the Ramp-Up End Date (which is the first date after the day on which the Ramp-Up Debt Service Coverage Ratio has been equal to or above 1.40:1.00 for eight

consecutive Calculation Dates), all remaining amounts on deposit in the Ramp-Up Reserve Account shall be transferred, (i) first, to the Senior Debt Service Reserve Account, to the extent necessary to bring the balance of the Senior Debt Service Reserve Account up to an amount equal to the Senior Debt Service Reserve Requirement, and (ii) second, to the Post-Substantial Completion Revenue Account, provided that any proceeds of Tax-Exempt Obligations shall only be used for permitted uses in accordance with the Code.

If the Senior Collateral Agent is required to make any transfer of funds from the Ramp-Up Reserve Account to any other Project Account, the Senior Collateral Agent shall, on the applicable Transfer Date, send notice to the Borrower, the Intercreditor Agent and the Disclosure Dissemination Agent.

Amounts on deposit in the Ramp-Up Reserve Account shall be available to fund certain shortfalls in the Post-Substantial Completion Revenue Account, as well as payments to any Interest Payment Sub-Account or Hedge Ordinary Course Payment Sub-Account (provided that the amount on deposit in the Ramp-Up Reserve Account immediately after giving effect to such transfer, when added to the amount then on deposit in the Senior Debt Service Reserve Account shall be at least equal to the Senior Debt Service Reserve Requirement at such time).

Any amounts on deposit in the Ramp-Up Reserve Account in excess of the Ramp-Up Reserve Requirement shall be transferred by the Securities Intermediary to the Post-Substantial Completion Revenue Account; provided, however, that if any proceeds of the Series 2024 Bonds or any other Tax-Exempt Bonds are on deposit in the Ramp-Up Reserve Account, such excess amount shall be transferred to the Tax-Exempt Bond Interest Payment Sub-Account established for such Tax-Exempt Bonds. See “PART 3 – PLAN OF FINANCE.”

#### ***Reserve Account Letters of Credit***

Subject to certain restrictions of the Common Terms Agreement that are applicable for so long as the Senior Bank Obligations remain Outstanding, the Borrower may, upon notice to the relevant Secured Debt Representative, so long as no Event of Default has occurred and is continuing, substitute all or any portion of the cash or Eligible Investments on deposit in the Senior Debt Service Reserve Account and/or the Ramp-Up Reserve Account (each a “Reserve Account”) with an Acceptable Letter of Credit in favor of the Collateral Agent; provided that, if such Reserve Account holds proceeds of any Tax-Exempt Obligations or any investment earning thereon, no such substitution shall be made until the Borrower has delivered to the Securities Intermediary and the applicable Secured Debt Representative a Favorable Opinion of Bond Counsel; further provided that, the Borrower shall obtain confirmation (A) that such then Outstanding Senior Obligations will maintain a rating of BBB, Baa2 or its equivalent or higher, from each Rating Agency which provided a rating of such then Outstanding Senior Obligations, but in any event not less than two Rating Agencies (without giving effect to any Bond Insurance Policy then in effect), after giving pro forma effect to the substitution of cash or Eligible Investments on deposit in a Reserve Account with an Acceptable Letter of Credit, or (B) that the ratings on the then Outstanding Senior Obligations (without giving effect to any Bond Insurance Policy then in effect), after giving pro forma effect to the substitution of cash or Eligible Investments on deposit in a Reserve Account with an Acceptable Letter of Credit, will not be lowered as a result of the incurrence of the substitution of cash or Eligible Investments on deposit in a Reserve Account with an Acceptable Letter of Credit. In the event that the Borrower substitutes cash or Eligible Investments on deposit in such Reserve Account with such Acceptable Letter of Credit and delivers any such Acceptable Letter of Credit to the Applicable Collateral Agent, the cash or Eligible Investments so substituted will be transferred to the Post-Substantial Completion Revenue Account. The undrawn face value of any such Acceptable Letter of Credit shall be included when calculating the balance on deposit in such Reserve Account.

The Borrower may, from time to time, direct the Applicable Collateral Agent to draw on any such Acceptable Letter of Credit, in the amount specified by the Borrower. If the cash funds on deposit in such Reserve Account are not sufficient to make in full the transfers required under the Collateral Agency and

Accounts Agreement, the Collateral Agent shall (without direction from the Borrower) draw on any Acceptable Letter of Credit for such Reserve Account in an amount equal to such shortfall. Further, the Collateral Agent shall (without direction from the Borrower) draw on such Acceptable Letter of Credit for the entire available amount if: (i) such letter of credit is not replaced thirty (30) days prior to expiry thereof with immediately available funds of equal amount deposited into the Reserve Account or with a replacement Acceptable Letter of Credit for the same available amount, (ii) within twenty (20) days of being notified by the Borrower or the Intercreditor Agent that the issuer thereof is no longer an Eligible LC Issuer, and the Borrower shall not have provided a replacement Acceptable Letter of Credit or deposited cash into the Reserve Account, in each case in an amount equal to the then available amount of such Acceptable Letter of Credit, or (iii) the Intercreditor Agent has notified the Senior Collateral Agent that an Event of Default has occurred and is continuing. See APPENDIX D-2 – “FORM OF COLLATERAL AGENCY AND ACCOUNTS AGREEMENT.”

### ***Restricted Distributions – Remaining Revenue Account***

The Collateral Agency and Accounts Agreement imposes certain restrictions on transfers from the Remaining Revenue Account to the Distribution Account, which Distribution Account is not a Project Account and is not pledged for the benefit of the Secured Parties. Funds may be transferred from the Remaining Revenue Account to the Distribution Account quarterly, subject to satisfaction of Restricted Payment Conditions, including, without limitation, a restriction on making distributions prior to the Substantial Completion of the Project, and subject to making certain payments from the Remaining Revenue Account that have priority over transfers to the Distribution Account. On each Quarterly Distribution Date, so long as (x) the Restricted Payment Conditions are satisfied as of such Quarterly Distribution Date, or (y) from and after the date that is ten (10) years preceding the maturity date of the Series 2024A Balloon Indebtedness (the “10 Year Cash Sweep Date”), only for payments pursuant to (a), if any, and (b)(B) below, without satisfaction of the Restricted Payment Condition if approved in writing by the Port Authority prior to such Quarterly Distribution Date (and the Borrower will use commercially reasonable efforts to obtain such approval from the Port Authority at the time such approval is needed; provided, that, notwithstanding any provision of the Senior Financing Documents to the contrary, with respect to any provision of the Senior Financing Documents requiring the approval or consent of the Port Authority, the Parties acknowledge and agree that the Port Authority may grant, withhold or condition its approval or consent in its sole and absolute discretion), the Securities Intermediary shall transfer amounts held in the Remaining Revenue Account (other than reasonable reserve amounts, as determined by the Borrower and approved by the Port Authority) as follows:

(a) *First*, to the Port Authority, in the amount certified in the Distribution Account Certificate as the amounts of Excess Value Rent and Equity Gain Share, if any, payable to the Port Authority, provided, that such payments shall be made *pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account, if applicable, on such Quarterly Distribution Date;

(b) *Second*, (A) so long as the Senior Bank Obligations remain outstanding, to the Extraordinary Receipts Account for *pro rata* application toward a mandatory prepayment of the Senior Loans, mandatory redemption of the Series 2022A Bonds, and payment of any amounts required to be paid under the Permitted Hedge Agreement, in each case in accordance the Collateral Agency and Accounts Agreement and the Common Terms Agreement, in an amount equal to 50% (if such Quarterly Distribution Date occurs prior to the first anniversary of the Substantial Completion Date) or 75% (if such Quarterly Distribution Date occurs on or after the first anniversary of Substantial Completion Date) of the funds remaining on deposit in the Remaining Revenue Account after giving effect to the transfer described in clause (a) above, and (B) from and after the 10 Year Cash Sweep Date, to the 2024A Tax-Exempt Bond Interest Payment Sub-Account and the 2024A Tax-Exempt Bond Principal Payment Sub-Account for the mandatory optional redemption as described in “PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS – Mandatory Optional Redemption of the Series 2024A Balloon Indebtedness”; provided that such

payments shall be made *pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account, if applicable; and

(c) Third, to the Distribution Account, in an amount equal to 100% of the funds remaining on deposit in the Surplus Remaining Revenue Account after giving effect to the transfers described in clauses (a) and (b) above.

***Restricted Payment Conditions***

The Restricted Payment Conditions are as follows:

(a) on the Transfer Date immediately preceding the Quarterly Distribution Date on which the Borrower requests that funds be transferred from the Remaining Revenue Account or the Surplus Remaining Revenue Account (after giving effect to all transfers and deposits required to be made under the Collateral Agency and Accounts Agreement on such Transfer Date), the Operating Account, the Senior Obligations Payment Accounts, the Hedge Ordinary Course Payment Account, the Hedge Termination Payment Account, the Debt Service Reserve Accounts, O&M Reserve Account, Major Maintenance Reserve Account, the Ramp-Up Reserve Account and the Handback Reserve Account shall be fully funded to their respective required levels as of such Transfer Date;

(b) on the Transfer Date immediately preceding the Quarterly Distribution Date on which the Borrower requests that funds be transferred from the Remaining Revenue Account or the Surplus Remaining Revenue Account (after giving effect to all transfers and deposits required to be made hereunder on such Transfer Date), no Deferred Concessions Revenue Rent is accrued and unpaid;

(c) for the DSCR Calculation Period ending on the immediately preceding Calculation Date, the Senior Debt Service Coverage Ratio is not less than (i) during the Ramp-Up Period, 1.30:1.00, and (ii) on and after the Ramp-Up End Date, 1.20:1.00, and the Total Debt Service Coverage Ratio is not less than (x) during the Ramp-Up Period, 1.25:1.00, and (y) on and after the Ramp-Up End Date, 1.15:1.00; *provided, however*, that, subject to the Borrower making an election pursuant to the Collateral Agency and Accounts Agreement, the amount of DSCR Debt Service used to calculate the Senior Debt Service Coverage Ratio and Total Debt Service Coverage Ratio shall include amounts paid with Equity Contributions;

(d) for the DSCR Calculation Period commencing on the immediately preceding Calculation Date, the projected Senior Debt Service Coverage Ratio is not less than (i) during the Ramp-Up Period, 1.30:1.00, and (ii) on and after the Ramp-Up End Date, 1.20:1.00, and the projected Total Debt Service Coverage Ratio is not less than (x) during the Ramp-Up Period, 1.25:1.00, and (y) on and after the Ramp-Up End Date, 1.15:1.00; *provided, however*, that, subject to the Borrower making an election pursuant to the Collateral Agency and Accounts Agreement, the amount of DSCR Debt Service used to calculate the Senior Debt Service Coverage Ratio and Total Debt Service Coverage Ratio shall include amounts paid or expected to be paid with Equity Contributions;

(e) no Default or Event of Default under the Financing Documents has occurred and is continuing or would exist immediately after giving effect to the requested transfer of funds;

(f) the Port Authority (A) has not exercised its right to terminate the Lease Agreement in respect of an Event of Default under the Lease Agreement or (B) if it has so exercised such right to terminate the Lease Agreement, then it has subsequently rescinded its notice of termination;

(g) Substantial Completion of the Project has occurred;

(h) prior to Discharge of Senior Bank Obligations, the Additional Restricted Payment Conditions (as defined in the Common Terms Agreement) are satisfied;

(i) not later than the third (3rd) Business Day prior to the Quarterly Distribution Date on which the Borrower requests that funds be transferred from the Remaining Revenue Account or the Surplus Remaining Revenue Account pursuant to the Collateral Agency Agreement, the Borrower shall have delivered to the Securities Intermediary and the Collateral Agent a Distribution Account Certificate, signed by a Responsible Officer of the Borrower, representing that the Restricted Payment Conditions were satisfied on the Calculation Date immediately preceding such Quarterly Distribution Date (provided that, notwithstanding the definition of DSCR Debt Service, in determining the amount of DSCR Debt Service for purposes of calculating the Senior Debt Service Coverage Ratio and Total Debt Service Coverage Ratio for purposes of determining satisfaction of the Restricted Payment Conditions, the amounts paid from or expected to be paid from (as applicable) Equity Contributions shall not be subtracted from Aggregate Debt Service unless the Borrower has elected to make such subtraction in such Distribution Account Certificate, and the Borrower may not make such election (A) with respect to more than four (4) consecutive Calculation Dates immediately preceding such Quarterly Distribution Date or (B) more than ten (10) times in total), and certifying the amount of Excess Value Rent, if any, payable to the Port Authority on such date; and

(j) all Second Additional Rental, the payment of which has been deferred in accordance with the terms of the Lease Agreement (if any), has been paid in full.

### ***Surplus Remaining Revenue Account***

The Surplus Remaining Revenue Account will be, if applicable, a pledged account maintained by the Securities Intermediary and constituting Segregated Collateral solely for the benefit of the Holders of the Series 2024 Balloon Indebtedness and the Bond Insurer (solely as an Owner of Series 2024 Bonds and with respect to any subrogated claim with respect to Series 2024 Bonds). The Surplus Remaining Revenue Account shall be subject to a Security Interest pledged to the Trustee only for the benefit of the Holders of the Series 2024 Balloon Indebtedness and the Bond Insurer (solely as an Owner of Series 2024 Bonds and with respect to any subrogated claim with respect to Series 2024 Bonds).

The Borrower shall instruct the Senior Collateral Agent to establish the Surplus Remaining Revenue Account on the first Quarterly Distribution Date in which all the following conditions occur (collectively, the “Surplus RRA Transfer Conditions”):

(i) Amounts would have been transferred from the Remaining Revenue Account to the 2024A Tax-Exempt Bond Interest Payment Sub-Account and the 2024A Tax-Exempt Bond Principal Payment Sub-Account pursuant to the Collateral Agency and Accounts Agreement except only for the fact that the conditions to make a transfer from the Remaining Revenue Account to the 2024A Tax-Exempt Bond Interest Payment Sub-Account and the 2024A Tax-Exempt Bond Principal Payment Sub-Account pursuant to the Collateral Agency and Accounts Agreement were not met and without regard as to whether the Second Supplemental Indenture conditioned any such transfer on such conditions in the Collateral Agency and Accounts Agreement being met;

(ii) Following any transfers from the Remaining Revenue Account, the balance of the Remaining Revenue Account is greater than \$0.

After the Surplus Remaining Revenue Account has been established, on each Quarterly Distribution Date that the Surplus RRA Transfer Conditions are met, the Securities Intermediary shall transfer from the Remaining Revenue Account to the Surplus Remaining Revenue Account the amounts that would have been payable from the Remaining Revenue Account to the 2024A Tax-Exempt Bond Interest Payment Sub-Account and the 2024A Tax-Exempt Bond Principal Payment Sub-Account pursuant to the Collateral Agency and Accounts Agreement except only for the fact that the conditions to make a transfer from the Remaining Revenue Account to the 2024A Tax-Exempt Bond Interest Payment Sub-Account and the 2024A Tax-Exempt Bond Principal Payment Sub-Account pursuant to the Collateral

Agency and Accounts Agreement were not met and without regard as to whether the Second Supplemental Indenture conditioned any such transfer on such conditions in the Collateral Agency and Accounts Agreement being met. No transfers will be made to the Surplus Remaining Revenue Account prior to the 10-Year Cash Sweep Date.

Proceeds of the Surplus Remaining Revenue Account shall be applied as follows:

(i) Until applied pursuant (ii) below, *pro rata* with funds available in the Remaining Revenue Account, to make payments to:

(a) Fund a shortfall in the Post-Substantial Completion Revenue Account, in accordance with the Collateral Agency and Accounts Agreement;

(b) Any Interest Payment Sub-Account, in accordance with the Collateral Agency and Accounts Agreement; and

(c) The Hedge Ordinary Course Payments Sub Account, in accordance with the Collateral Agency and Accounts Agreement.

(ii) From and after the 10 Year Cash Sweep Date, on each Quarterly Distribution Date (x) so long as the Restricted Payment Conditions are satisfied as of such Quarterly Distribution Date, or (y) only for payments pursuant to (ii)(a) below, if any, and (ii)(b) below, without satisfaction of the Restricted Payments Conditions if approved in writing by the Port Authority prior to such Quarterly Distribution Date (and the Borrower will use commercially reasonable efforts to obtain such approval from the Port Authority at the time such approval is needed; provided, that, notwithstanding any provision of the Senior Financing Documents to the contrary, with respect to any provision of the Senior Financing Documents requiring the approval or consent of the Port Authority, the Parties acknowledge and agree that the Port Authority may grant, withhold or condition its approval or consent in its sole and absolute discretion), the Securities Intermediary shall transfer amounts held in the Surplus Remaining Revenue Account (other than reasonable reserve amounts, as determined by the Borrower and approved by the Port Authority) as follows:

(a) *First*, to the Port Authority, in the amount certified in such Distribution Account Certificate as the amounts of Excess Value Rent and Equity Gain Share, if any, payable to the Port Authority; provided, that such payments shall be made *pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account on such Quarterly Distribution Date;

(b) *Second*, to the 2024A Tax-Exempt Bond Interest Payment Sub-Account and the 2024A Tax-Exempt Bond Principal Payment Sub-Account for the mandatory optional redemption as described in “PART 2 -DESCRIPTION OF THE SERIES 2024 BONDS- Mandatory Optional Redemption of the Series 2024A Balloon Indebtedness”; provided that such payments shall be made *pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account; and

(c) *Third*, to the Distribution Account, in an amount equal to 100% of the funds remaining on deposit in the Surplus Remaining Revenue Account after giving effect to the transfers described in (a) and (b) above.

(iii) Following the taking of an Enforcement Action, moneys in the Surplus Remaining Revenue Account shall be applied by the Collateral Agent in accordance with the Collateral Agency and Accounts Agreement.

For further information regarding the funding of and distribution from the Remaining Revenue Account to the Distribution Account, see “PART 5 – FLOW OF FUNDS UNDER THE COLLATERAL

AGENCY AND ACCOUNTS AGREEMENT – Flow of Funds Post-Substantial Completion,” and Appendix D-2 – “FORM OF COLLATERAL AGENCY AND ACCOUNTS AGREEMENT.”

Prior to the Discharge of Senior Bank Obligations in their entirety, certain additional restricted payment conditions may apply pursuant to the Common Terms Agreement, unless waived or amended by the holders of the Senior Bank Obligations in their sole discretion.

***Segregated Collateral***

Segregated Collateral includes the Collateral held in certain accounts only for the benefit of the respective Secured Parties specified in the Collateral Agency and Accounts Agreement and the Collateral held in each Segregated Policy Payment Account only for the benefit of the Owners of Insured Bonds and the relevant Bond Insurer related to such Segregated Policy Payment Account, as specified in the Supplemental Indenture with respect to any such Insured Bonds.

Segregated Collateral under the Collateral Agency and Accounts Agreement includes the Senior Debt Service Reserve Account, the Ramp-Up Reserve Account, each solely for the benefit of the Senior Secured Parties, the Surplus Remaining Revenue Account, solely for the benefit of the Holders of the Series 2024 Balloon Indebtedness and the Bond Insurer (solely as an Owner of Series 2024 Bonds and with respect to any subrogated claim with respect to Series 2024 Bonds), each as described above, the Bank Proceeds Sub-Account and the Series 2022A Bond Proceeds Sub-Account, each solely for the benefit of the Bank Finance Parties, the Subordinate Debt Service Reserve Account, solely for the benefit of the Subordinate Secured Parties, any Senior Cash Collateral Account and any additional Segregated Pledged Account only for the benefit of the respective Secured Parties as specified in the Collateral Agency and Accounts Agreement.

***Additional Obligations***

*Additional Senior Obligations.* The Borrower shall not incur Additional Senior Obligations unless the following additional requirements are satisfied as of the date on which such Additional Senior Obligations are incurred:

(i) The Borrower has provided to the Senior Collateral Agent evidence indicating that, as of the date of incurrence of such Additional Senior Obligations, the Borrower has met the requirements under the Lease Agreement for the incurrence of such Additional Senior Obligations (as such requirements were in effect on the Original Closing Date without giving effect to any waiver by the Port Authority); and

(ii) The Borrower has provided to the Senior Collateral Agent (A) evidence that after giving effect to, the incurrence of such Additional Senior Obligations, the Borrower is in compliance with the rate covenant/financial ratio covenant pursuant to the Collateral Agency and Accounts Agreement, and (B) a certificate from an Airport Consultant stating that, based upon reasonable assumptions, projected Project Revenues will be sufficient to satisfy the requirements of the rate covenant/financial ratio covenant pursuant to the Collateral Agency and Accounts Agreement (including such Additional Senior Obligations proposed to be incurred but excluding any Senior Obligations proposed to be Refinanced with the proceeds of such Additional Senior Obligations) for each Fiscal Year following the incurrence of such Additional Senior Obligations to the final maturity of all Outstanding Senior Obligations; and

(iii) The Rating Agencies then rating the then Outstanding Senior Obligations affirm (A) that such then Outstanding Senior Obligations will maintain a rating of BBB, Baa2 or its equivalent or higher from each Rating Agency, but in any event not less than two Rating Agencies, which provided a rating of such then Outstanding Senior Obligations after giving pro forma effect to the incurrence of such Additional Senior Obligations, or (B) that the ratings on the then Outstanding Senior Obligations, after giving pro

forma effect to the incurrence of such Additional Senior Obligations, will not be lowered as a result of the incurrence of the Additional Senior Obligations; and

(iv) Prior to the Discharge of Senior Bank Obligations in their entirety, the conditions set forth in the Common Terms Agreement for the incurrence of Additional Obligations are satisfied as determined by the Required Bank Finance Parties.

The Borrower shall not be required to satisfy the conditions summarized in clause (ii) or (iii) above to (x) incur Additional Senior Obligations that are Completion Obligations, if the aggregate principal amount of such Completion Obligations (together with the principal amount of all previously incurred Completion Obligations) does not exceed 10% of the aggregate original principal amount of all Secured Obligations issued prior to the first incurrence of Completion Obligations, or (y) incur Additional Senior Obligations to Refinance Outstanding Senior Obligations, if the incurrence of such Additional Senior Obligations does not result in an increase in Annual Debt Service in any Fiscal Year on all Outstanding Senior Obligations following the incurrence of such Additional Senior Obligations.

*Additional Subordinate Obligations.* The Borrower shall not incur Additional Subordinate Obligations unless each of the following additional conditions are satisfied as of the date on which such Additional Subordinate Obligations are incurred:

(i) The Borrower has provided to the Collateral Agent evidence indicating that, as of the date of incurrence of such Additional Subordinate Obligations, the Borrower has met the requirements under the Lease Agreement for the incurrence of such Additional Subordinate Obligations (as such requirements were in effect on the Original Closing Date without giving effect to any waiver by the Port Authority); and

(ii) The Borrower has provided to the Collateral Agent (A) evidence that, after giving effect to the incurrence of such Additional Subordinate Obligations, the Borrower is in compliance with the rate covenant/financial ratio covenant pursuant to the Collateral Agency and Accounts Agreement, and (B) a certificate from an Airport Consultant stating that, based upon reasonable assumptions, projected Project Revenues will be sufficient to satisfy the requirements of the rate covenant/financial ratio covenant (including such Additional Subordinate Obligations proposed to be incurred but excluding any Subordinate Obligations proposed to be Refinanced with the proceeds of such Additional Subordinate Obligations) for each Fiscal Year following the incurrence of the Additional Subordinate Obligations to the final maturity of all Outstanding Subordinate Obligations, provided that with respect to the incurrence of such Additional Subordinate Obligations issued pursuant provisions of the Lease Agreement authorizing additional debt to finance additional liquidity reserves in certain circumstances or to pay increased D&C Work costs or other capital expenditures resulting from certain changes in law or certain other requirements applicable to the Project, (A) the Borrower will only be required to achieve, in each DSCR Calculation Period, a total Debt Service Coverage Ratio of 1.10x during the Ramp-up Period and a Total Debt Service Coverage Ratio of 1.0x thereafter and (B) the Borrower need not satisfy prospective rate covenant/financial ratio covenant requirements pursuant to the Collateral Agency and Accounts Agreement for any periods during which 100% of the Aggregate Debt Service on the Additional Subordinate Obligations is capitalized;

(iii) Prior to the Discharge of Senior Bank Obligations in their entirety, the conditions set forth in the Common Terms Agreement for the incurrence of Additional Obligations are satisfied as determined by the Required Bank Finance Parties; and

(iv) no TDC Building Loan Agreement supplement is entered into with respect to such Additional Subordinate Obligations.

The Borrower shall not be required to satisfy the condition summarized in clause (ii) above to (x) incur Additional Subordinate Obligations that are Completion Obligations, if the aggregate principal amount of such Completion Obligations (together with the principal amount of all previously incurred

Completion Obligations) does not exceed 10% of the aggregate original principal amount of all Secured Obligations issued prior to the first incurrence of Completion Obligations, or (y) incur Additional Subordinate Obligations to Refinance Outstanding Subordinate Obligations, if the incurrence of such Additional Subordinate Obligations does not result in an increase in Annual Debt Service in any Fiscal Year on all Outstanding Subordinate Obligations following the incurrence of such Additional Subordinate Obligations.

### ***Pro Rata Treatment of Building/Project Loans***

The Issuer shall loan to the Borrower the principal amount of any Senior Obligations to be loaned or committed to the Borrower under the TDC Building Loan Agreement and the TDC Project Loan Agreement, such that the principal amount of the Senior Bank Obligations loaned or committed to the Borrower from the Senior Secured Parties represented by the Administrative Agent under the Intercreditor Agreement (collectively, the “CTA Obligations”), the principal amount loaned or committed to the Borrower from Senior Secured Parties represented by the Trustee under the Intercreditor Agreement (collectively, the “Indenture Obligations”) and the principal amount loaned or committed to the Borrower from any Additional Senior Creditors that become subject to the Intercreditor Agreement pursuant to an Accession Agreement and are identified therein as a Class (for each Class, an “Additional Class Obligation”) shall be allocated *pro rata* (based on the Outstanding principal amounts of the CTA Obligations, the Indenture Obligations and each of the Additional Class Obligations on the date of any loan) as Building Loans under the TDC Building Loan Agreement and as Project Loans under the TDC Project Loan Agreement. Upon a Refinancing of any Building Loan or Project Loan, the principal amount of such Building Loans and Project Loans shall be reallocated such that the principal amount of all Outstanding Building Loans and Outstanding Project Loans shall be *pro rata* between CTA Obligations, Indenture Obligations and each Additional Class Obligation.

### **The Leasehold Mortgages**

As security for the obligations under the TDC Building Loan Agreement and the TDC Project Loan Agreement and the related TDC Notes, the Borrower has executed the Building Leasehold Mortgage and the Project Leasehold Mortgage, respectively, each in favor of the Issuer and the Collateral Agent. The Leasehold Mortgages each grant to the Issuer and the Collateral Agent, for the benefit of the respective Secured Parties, a mortgage lien on and security interest in all of the Borrower’s interests under the Lease Agreement and certain related property and interests. The Issuer has assigned its interests in the Leasehold Mortgages to the Collateral Agent, except for the Issuer’s Reserved Rights, pursuant to the Issuer Assignment Agreements.

The Leasehold Mortgages and all rights of the Collateral Agent as Mortgagee are subject to the terms and conditions of the Lease Agreement. The Port Authority has recognized the Collateral Agent as a “Recognized Mortgagee” under the Lease Agreement, which entitles the Collateral Agent to certain notice and cure rights and certain other protections with respect to the Lease Agreement.

The Leasehold Mortgages contain certain representations and covenants on the part of the Borrower relating to the Lease Agreement and the work to be performed by the Borrower thereunder and grant certain remedies to the Collateral Agent upon the occurrence and continuance of an Event of Default under the Leasehold Mortgages, including, for only certain specific Events of Default, the right to foreclose upon the Borrower’s interest in the Lease Agreement. Such remedies must, in all instances, be exercised in accordance with the terms of the Lease Agreement.

The Leasehold Mortgages shall be deemed satisfied, discharged and of no further force and effect upon the retirement, redemption, refunding, defeasance, satisfaction or other payment or discharge of the Senior Obligations and certain other obligations of the Borrower under the Financing Documents. See

APPENDIX D-3 – “FORM OF LEASEHOLD MORTGAGES” for a further description of the Leasehold Mortgages and the conveyed leasehold estate.

### **The Senior Equity Pledge Agreement**

HoldCo and the Senior Collateral Agent are parties to that certain Senior Equity Pledge Agreement, pursuant to which HoldCo pledged to the Senior Collateral Agent, for the benefit of the Senior Secured Parties, a security interest in (i) all of its limited liability company interests in the Borrower, all options, warrants and rights to purchase limited liability company interests in the Borrower and all dividends, distributions, cash, securities, instruments and other property from time to time paid, payable or otherwise distributed in respect of or in exchange for all or any part of its limited liability company interests in the Borrower and all proceeds thereof, (ii) indebtedness owed to HoldCo by the Borrower from time to time, including any instruments or payment intangibles evidencing or relating to such indebtedness, (iii) all proceeds of the foregoing and (iv) all books and records relating to any of the foregoing, in order to secure the timely payment in full when due of the Senior Obligations.

The Senior Equity Pledge Agreement also contains certain covenants of HoldCo imposing certain restrictions on its operations and ability to incur indebtedness until such time as it can deliver a non-consolidation opinion and ratings confirmation letters relating to then-Outstanding Senior Obligations to the Senior Collateral Agent.

### **The Assignments of Leases and Rents**

The Borrower executed the Building Loan Assignment of Leases and Rents and Project Loan Assignment of Leases and Rents, each dated as of November 1, 2022, in favor of the Issuer and the Collateral Agent. Pursuant to these agreements, the Borrower granted to the Collateral Agent, as securities for the full and timely payment of the Senior Obligations, all of the Borrower’s right, title, and interest in all written or oral leases, subleases, licenses, franchises, concessions, and other occupancy agreements to which the Borrower is a landlord, and certain related rights and interests. The Issuer has assigned its interests in the Assignment of Leases and Rents to the Collateral Agent, except for the Issuer’s Reserved Rights, pursuant to the Issuer Assignment Agreements.

### **Direct Agreements**

As additional security for the Senior Obligations, the Collateral Agent and the Borrower entered into the Direct Agreements.

Pursuant to the D&C Contractor Direct Agreement with the D&C Contractor, the D&C Contractor consented to the assignment of the D&C Contract by the Borrower to the Collateral Agent as security for the benefit of the Secured Parties and, subject to certain conditions, granted the Collateral Agent certain cure and step-in rights regarding the D&C Contract following a default thereunder by the Borrower.

Pursuant to the Manager’s Direct Agreement with the Manager, the Manager consented to the assignment of the Management Services Agreement by the Borrower to the Collateral Agent as security for the benefit of the Secured Parties and, subject to certain conditions, granted the Collateral Agent certain cure and step-in rights regarding the Management Services Agreement following a default thereunder by the Borrower.

Pursuant to the JetBlue Direct Agreement, JetBlue consented to the assignment of the JetBlue Sublease by the Borrower to the Collateral Agent as security for the benefit of the Secured Parties and, subject to certain conditions, granted the Collateral Agent certain cure and step-in rights regarding the JetBlue Sublease following a default thereunder by the Borrower.

Pursuant to the terms of the Common Terms Agreement, the Borrower is also required to deliver direct agreements to the Senior Collateral Agent from the applicable sublessee under any: (i) Material Airline Sublease, meaning any airline sublease entered into that is reasonably projected to represent 15% or more of the Borrower's total revenue in any period of 12 consecutive months generated from all then effective airline subleases, or (ii) Material Concession Sublease, meaning any concession sublease entered into that is reasonably projected to represent 15% or more of the Borrower's total revenue in any period of 12 consecutive months generated from all then effective concessions subleases. Certain subleases that require direct agreements will also require the prior consent of the Administrative Agent under the Common Terms Agreement. The provisions of the Common Terms Agreement are only for the benefit of the Series 2022 Bondholder and the Bank Lenders, and are not for the benefit of, nor enforceable by, the holders of the Series 2024 Bonds, and will no longer apply following the discharge of the Senior Bank Obligations, though direct agreements delivered pursuant to the requirements for the Common Terms Agreement will be for the benefit of the holders of all Senior Secured Obligations.

## **The Senior Security Agreement**

### ***Security Interest***

The Borrower and the Collateral Agent entered into the Senior Security Agreement, dated as of November 1, 2022, pursuant to which, in order to secure the full and prompt payment in full when due of the Senior Obligations (whether at stated maturity, by required prepayment, declaration, acceleration, demand, or otherwise), the Borrower granted to the Collateral Agent, for the benefit of the Senior Secured Parties, a Security Interest in and lien on all of its right, title and interest in, to and under all of its personal property, tangible and intangible, wherever located and whether now owned, leased or licensed or hereafter acquired, leased or licensed and whether now existing or hereafter arising, including (without limitation) the Borrower's interest in Project Revenues, Project Accounts, general intangibles, instruments, inventory, material project contracts, equipment and proceeds of insurance policies as further provided in the Senior Security Agreement.

Notwithstanding anything to the contrary in the Senior Security Agreement, the Borrower will remain liable for all obligations under and in respect of the Collateral and nothing contained in the Senior Security Agreement is intended to or will be a delegation of duties to the Collateral Agent or the Senior Secured Parties.

### ***Remedies***

If an Event of Default shall have occurred and be continuing (beyond any applicable cure or grace period), and subject to the Intercreditor Agreement and the other Senior Financing Documents, the Collateral Agent may exercise remedies authorized by law as further provided in the Senior Security Agreement, including but not limited to:

- (a) taking possession of any Collateral (as defined in the Senior Security Agreement) in accordance with the Lease Agreement and the other Senior Financing Documents;
- (b) requiring the Borrower to assemble all or any part of the Collateral (as defined in the Senior Security Agreement);
- (c) appointing a receiver of the Collateral (as defined in the Senior Security Agreement) or any part thereof;
- (d) withdrawing funds from deposit accounts or securities accounts; and
- (e) disposing of the Collateral (as defined in the Senior Security Agreement).

## **Equity Letters of Credit and Collateral Account Control Agreement**

Each Equity Member is also required to provide one or more irrevocable standby letter(s) of credit in an aggregate amount equal to the applicable Equity Member's total equity commitment (each an "Equity Letter of Credit") or to deposit cash or Eligible Investments into one or more Equity Collateral Accounts governed by a Collateral Account Control Agreement among the applicable Equity Member, the Senior Collateral Agent, and a securities intermediary, such that the aggregate face amount of the Equity Letter(s) of Credit delivered by each Equity Member plus the aggregate balance of such Equity Member's Equity Collateral Accounts are equal to such Equity Members' Unfunded Equity Commitment. Each Equity Letter of Credit must be issued by a financial institution that (i) has long-term unsecured debt ratings, from at least two rating agencies, of at least "A" from S&P, "A2," from Moody's, or "A" by Fitch Ratings Inc. ("Fitch"), and (ii) has either an office in New York, New York at which a letter of credit issued by it can be presented for payment or an office in the United States at which a letter of credit issued by it can be presented for payment and that grants the right for the beneficiary of any such letter of credit issued by it through email or other electronic method of presentation (an "Eligible LC Issuer"). Funds drawn on any Equity Letter of Credit will be deposited in the Equity Contribution Sub-Account of the Construction Account. The reimbursement obligations with respect to the Equity Letters of Credit will not be recourse to the Borrower. Currently, (i) JetBlue's equity commitment is supported by a letter of credit issued by Citibank N.A., (ii) the ATI Member's equity commitment is supported by letters of credit issued by National Australia Bank Limited, London Branch, ING Capital LLC, Sumitomo Mitsui Banking Corporation, New York Branch, and National Bank of Canada, (iii) the Vantage Member has provided a letter of credit issued by Goldman Sachs Bank USA, and (iv) the RXR Member's equity commitment is supported by letters of credit from Australia and New Zealand Banking Group Limited, Bank of Montreal, Chicago, and Sumitomo Mitsui Banking Corporation, New York Branch, as well as a Collateral Account Control Agreement with the Senior Collateral Agent, dated as of the Original Closing Date.

If an Equity Member fails to perform its contribution obligations under the Equity Contribution Agreement within the timelines set forth below, the Collateral Agent will be required to draw on the applicable Equity Letter of Credit or on the collateral accounts subject to the Collateral Account Control Agreement for purposes of satisfying such obligations.

If Equity Contributions are not made by the dates required pursuant to the Equity Contribution Agreement, the securities intermediary shall withdraw funds from such non-contributing Sponsor's Equity Collateral Account(s), and/or draw on such non-contributing Sponsor's Equity Collateral Account(s), and/or draw on such non-contributing Sponsor's Equity Letter(s) of Credit, for the purposes of satisfying such obligation of the applicable Sponsor. Such withdrawals will occur (i) with respect to Equity Contributions due at the request of the Borrower pursuant to delivery of a Contribution Notice (as defined in the Equity Contribution Agreement), on the Substantial Completion Date, or pursuant to a Shortfall Contribution Notice (as defined in the Equity Contribution Agreement) on the second Business Day after the due date for such performance, or (ii) with respect to Equity Contributions due because of an Event of Default under the Senior Bank Financing Documents or because payment under either TDC Loan Agreement has been accelerated on the due date for such performance.

In the event of Voluntary LC Termination in respect of any Equity Letter of Credit prior to the Release Date, the applicable Equity Member will be required to replace the expiring Equity Letter of Credit at least thirty (30) days prior to the expiration date of the existing Equity Letter of Credit. In addition, if the issuer of any Equity Letter of Credit ceases to satisfy the requirements for an Eligible LC Issuer, the applicable Equity Member will be required to replace such Equity Letter of Credit within twenty (20) Business Days of the date on which such issuer ceased to be an Eligible LC Issuer. If the applicable Equity Member fails to provide a replacement Equity Letter of Credit within the time frames described in each case above, the Collateral Agent shall draw the full undrawn amount of the expiring Equity Letter of Credit.

The Collateral Agent shall also draw on each Equity Letter of Credit, in the full amount thereof, and withdraw all funds from each Equity Collateral Account, upon receiving written notice from the Borrower, the Port Authority or the Intercreditor Agent that the Lease Agreement has been terminated by the Port Authority as the result of an Event of Default by the Borrower under the Lease Agreement.

To compensate the Equity Members for providing the Equity Letters of Credit, the Borrower will pay each Equity Member, monthly, an amount equal to, as of the date of calculation, (i) the average unfunded amount of the applicable Equity Member's Equity Letter of Credit for the relevant month multiplied by 3.00%, (ii) multiplied by the actual number of days in such month, and (iii) divided by 365 or 366, as applicable.

## **The Intercreditor Agreement**

The Intercreditor Agreement has been entered into by and among the Borrower, the Intercreditor Agent, the Trustee, the Administrative Agent, the Collateral Agent, the Permitted Hedge Providers party to the Intercreditor Agreement from time to time and each other entity that may become a party to the Intercreditor Agreement from time to time. The Intercreditor Agreement governs many rights and remedies of the various creditors, including, but not limited to, the Bank Lenders under the Loan Facility, acting through the Administrative Agent, the Series 2024 Bondholders, acting through the Trustee, and any future Senior Secured Party or Subordinate Secured Party that accedes pursuant to an Accession Agreement (as defined in the Intercreditor Agreement). Some of the primary provisions of the Intercreditor Agreement relate to (i) rights and restrictions regarding unilateral or joint action against the Collateral or any Segregated Collateral, (ii) intercreditor voting and consent matters, (iii) provisions relating to DIP financing, (iv) enforcement of remedies in case of a Borrower Event of Default, (v) rights and permitted actions by Subordinate Secured Parties, (vi) application of proceeds in case of insolvency or liquidation proceedings, and (vii) other rights of the Senior Secured Parties upon a Borrower Bankruptcy Event. See APPENDIX D-5 – “FORM OF INTERCREDITOR AGREEMENT.”

The Borrower currently anticipates that, after the discharge of the Loan Facility in full, it will seek an amendment to the Intercreditor Agreement to move to a one-dollar-one-vote system, as opposed to class-based voting. The determination to pursue the aforementioned amendment will be subject to market conditions at such time and remains subject to change in the Borrower's sole and absolute discretion. If pursued, such an amendment would require the consent of the Series 2024 Bondholders if and to the extent required by Section 10.3 of the Intercreditor Agreement. See APPENDIX D-5 “FORM OF INTERCREDITOR AGREEMENT”.

## **The Indenture**

### ***General***

*Trust Estate.* The Issuer, in order to secure the payment of the Bonds, including the Series 2024 Bonds, has pledged and assigned to the Trustee pursuant to the terms of the Indenture for the benefit of the Owners of the Series 2022A Bonds, the Series 2024 Bonds and any Additional Bonds issued thereunder, all of the following, which comprise the Trust Estate:

(a) subject to the Collateral Agency and Accounts Agreement and Intercreditor Agreement, all right, title and interest of the Issuer (except for Reserved Rights) in all moneys and obligations from time to time held by the Trustee under the Indenture, except for moneys or obligations held in any Rebate Account or held for the redemption or payment of Bonds that are deemed to have been paid pursuant to the Indenture;

(b) subject to the Collateral Agency and Accounts Agreement and Intercreditor Agreement, any Security Interest granted to the Collateral Agent for the benefit of: (i) the Issuer, securing the payment

obligations of the Borrower under the TDC Loan Agreements and the TDC Notes, and (ii) the Trustee on behalf of the Owners of the Bonds, under the Security Documents or otherwise;

(c) subject to the Collateral Agency and Accounts Agreement and Intercreditor Agreement, the interest of the Issuer, and any Security Interest created for the benefit of the Issuer, in all funds deposited from time to time and earnings thereon in the Project Accounts, any and all other accounts established as security for the Bonds under the Collateral Agency and Accounts Agreement, and any and all sub-accounts created thereunder as security for the Bonds; and

(d) subject to the Collateral Agency and Accounts Agreement and Intercreditor Agreement, any and all other property, revenues, rights or funds specifically granted, assigned or pledged as additional security for the Bonds or the TDC Loan Agreements in favor of the Trustee (as a Secured Party) or the Collateral Agent on behalf of the Trustee (as a Secured Party).

The Trust Estate shall be held by the Trustee for the equal and proportionate benefit of the Owners of the Series 2024 Bonds and the other Secured Parties, except for any preference and priority between the Senior Bonds and the Subordinate Bonds as established pursuant to the Indenture. For a complete description of the Trust Estate, see APPENDIX D-1 – “FORM OF TRUST INDENTURE.”

### ***Additional Bonds***

The Issuer has covenanted under the Indenture that, so long as any Bonds are Outstanding, the Issuer will not create or permit the creation of or issue any obligations or create any additional indebtedness which will be secured by a lien on all or any part of the Trust Estate established and created by or pursuant to the Indenture, except to the extent permitted by a Supplemental Indenture, the TDC Loan Agreements and the Collateral Agency and Accounts Agreement.

*Additional Senior Bonds.* At the request of the Borrower, additional Senior Bonds may be delivered under and be equally and ratably secured by the Indenture on a parity basis with the Series 2024 Bonds, the Loan Facility and any other additional Senior Obligations Outstanding, at any time and from time to time so long as the conditions set forth in the Indenture and the Collateral Agency and Accounts Agreement have been satisfied. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Collateral Agency and Accounts Agreement – Additional Obligations – Additional Senior Obligations” below.

*Additional Subordinate Bonds.* At the request of the Borrower, additional Subordinate Bonds may be delivered under and be equally and ratably secured by the Indenture on a parity basis with any then-outstanding Subordinate Bonds and any other additional Subordinate Obligations Outstanding, at any time and from time to time so long as the conditions set forth in the Indenture and the Collateral Agency and Accounts Agreement have been satisfied. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Collateral Agency and Accounts Agreement – Additional Obligations – Additional Subordinate Obligations” below.

The Common Terms Agreement has certain additional restrictions on the incurrence of Additional Obligations by the Borrower for so long as the Senior Bank Obligations are outstanding. These additional restrictions are for the sole benefit of the holders of the Senior Bank Obligations, are subject to waiver or amendment thereby in their sole discretion, and will no longer apply following the discharge of the Senior Bank Obligations. See APPENDIX F-1 – “FORM OF COMMON TERMS AGREEMENT.”

### ***Events of Default under the Indenture***

Each of the following is defined as and shall be deemed an “Event of Default” under the Indenture with respect to all of the outstanding Bonds:

(a) Default in the payment of the principal of or Redemption Price, if any, on any Bond when the same shall become due and payable, whether at the stated maturity thereof, or through failure to satisfy any Sinking Fund Requirement, or upon redemption or otherwise;

(b) Default in the payment of any interest on any Bond when the same shall become due and payable;

(c) Default shall be made in the observance or performance of any covenant, agreement or other provision contained in the Bonds or the Indenture (other than as referred to in sub-paragraphs (a) or (b) above) and such default shall continue for a period of thirty (30) days after written notice to the Issuer, the Borrower and the Trustee from the Owners of at least 25% in aggregate principal amount of the Bonds then Outstanding or from the Trustee specifying such default and requiring the same to be remedied, provided, with respect to any such failure covered by this sub-paragraph (c), no Event of Default shall be deemed to have occurred so long as a course of action adequate to remedy such failure shall have been commenced within such thirty (30) day period and shall thereafter be diligently prosecuted to completion and the failure shall be remedied thereby; and

(d) The occurrence of an “Event of Default” under and as defined in the Collateral Agency and Accounts Agreement or the Leasehold Mortgages that continues beyond any grace or cure period provided for under the Collateral Agency and Accounts Agreement or the Leasehold Mortgages.

The Trustee shall, within thirty (30) days of the occurrence of an Event of Default or of any event of which the Trustee is required to take notice and which would result in an Event of Default with the passage of time or the giving of notice, notify the Issuer, the Borrower, the Collateral Agent, the Intercreditor Agent, and all Bondholders of the occurrence of such Event of Default or such other event.

Upon the occurrence of an Event of Default, the Trustee is entitled to exercise certain remedies as set forth in the Indenture, subject to the terms of the Intercreditor Agreement.

For more information relating to the terms of the Indenture, see APPENDIX D-1 – “FORM OF TRUST INDENTURE.”

### **Termination Payment to the Borrower Upon Termination of the Lease Agreement**

The Lease Agreement grants the Borrower the right to terminate the Lease Agreement only in the following limited circumstances: (i) the Port Authority fails, within thirty (30) days following receipt of notice by the Borrower, to make payment of any undisputed amounts owed to the Borrower, (ii) the Port Authority expressly repudiates or willfully (with an intent to breach the Lease Agreement) fails to provide or defend Borrower’s right to quiet enjoyment of the Premises pursuant to the terms of the Lease Agreement (which shall not be deemed to occur during the pendency of a Force Majeure event or in the event of a Taking) such that Borrower is unable to (x) construct Terminal 6 or (y) operate Terminal 7 (prior to its decommissioning) and/or Terminal 6, in each case for a period of not less than one hundred eighty (180) consecutive days; provided, however, that the Borrower shall not have a termination right if the interference with quiet enjoyment is based on, arises out of, relates to or results from, in whole or in part, (A) Borrower’s exercise (or the exercise by any Person claiming by, through or under the Borrower) of a right granted to it under the Lease Agreement, (B) an act or omission of the Borrower (or any Person on behalf of the Borrower) or another Borrower-Related Entity (or on their behalf) whether or not in breach of the Lease Agreement or (C) a breach or default by the Borrower (or any Person on behalf of the Borrower) of any of the terms or conditions of the Lease Agreement, or any Project Document (as defined in the Lease Agreement), or (iii) the Port Authority willfully fails to tender the Premises or any portion thereof to the Borrower in accordance with the time periods required by the Lease Agreement.

If the Borrower elects to terminate the Lease Agreement as a result of the event described in clause (ii) of the preceding paragraph, the Port Authority shall pay compensation to the Borrower in an aggregate amount (the “Port Authority Default Termination Payment” calculated as of the effective date of the termination equal to the fair market value (had the Lease Agreement not been terminated) of the Borrower’s leasehold interest and its rights and obligations during the unexpired term of the Lease Agreement, determined pursuant to an appraisal regime set forth in the Lease Agreement. There can be no assurance that the Port Authority Default Termination Payment would be sufficient to pay off the Secured Obligations, including the Series 2024 Bonds. If the Borrower elects to terminate the Lease Agreement as a result of the event described in clause (i) or (iii) of the preceding paragraph, the Port Authority is not obligated to make any termination payment to the Borrower. To the extent that the Borrower elects not to exercise its right to terminate the Lease Agreement upon any of the events described in clauses (i), (ii), or (iii) of the preceding paragraph, then the Borrower shall retain each and every remedy for breach of the Lease Agreement which it has in law and in equity.

The Port Authority is permitted, but is under no obligation, under the Lease Agreement, at its discretion, following a Borrower Event of Default under the Leasehold Mortgages, the acceleration of the Borrower’s outstanding indebtedness (including its payment obligations under the TDC Loan Agreements with respect to the Series 2024 Bonds and the Loan Facility), or the termination of the Borrower’s rights under and in accordance with the Lease Agreement, to tender to the Collateral Agent an amount equal to the amount necessary to prepay or otherwise discharge the Borrower’s outstanding indebtedness (including its payment obligations under the TDC Loan Agreements with respect to the Series 2024 Bonds and the Loan Facility) to the date of the tender, and upon such tender the Leasehold Mortgages shall terminate.

For a more detailed summary of the Port Authority Default Termination Payment and the types of events that will entitle the Borrower to payment of such sums, see “PART 10 – THE LEASE AGREEMENT” and APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT.”

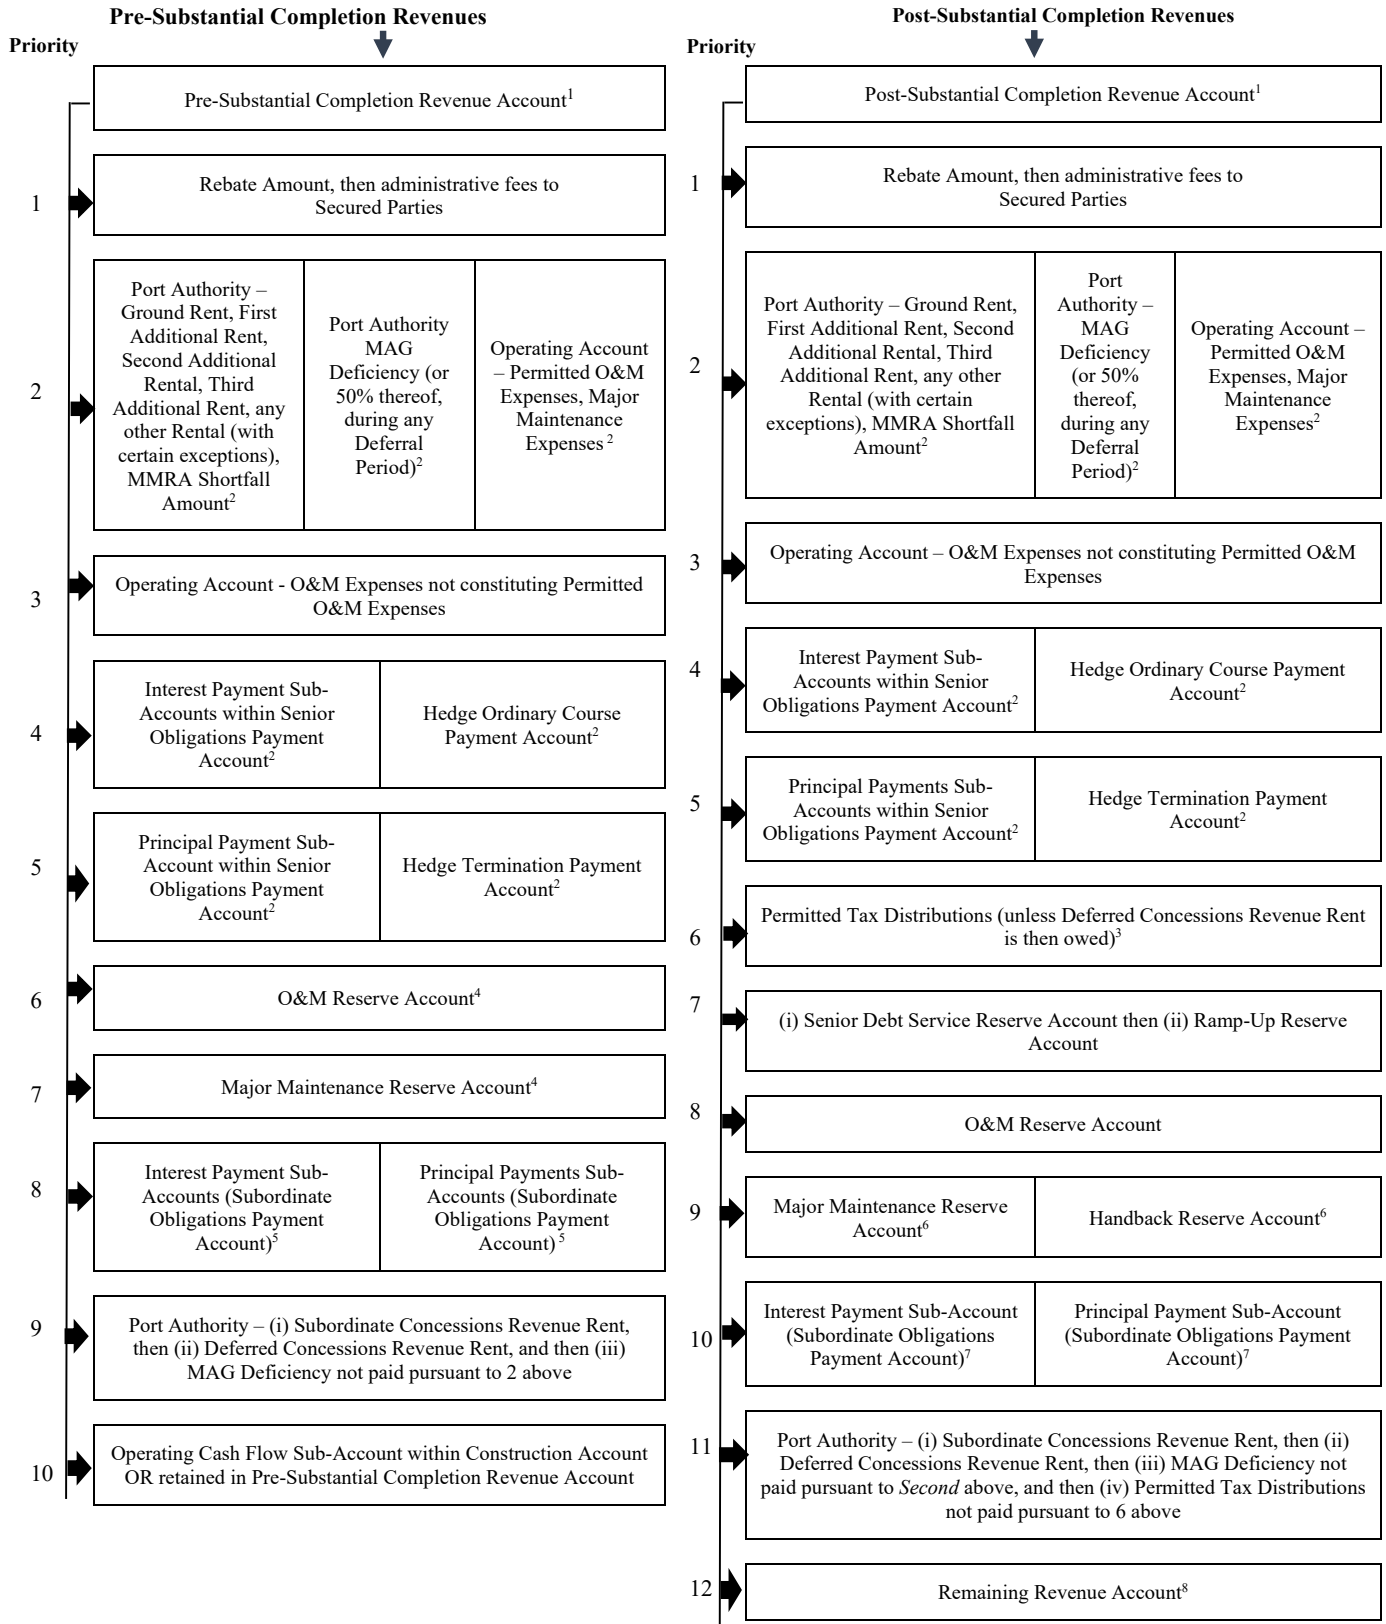

## **PART 5 – FLOW OF FUNDS UNDER THE COLLATERAL AGENCY AND ACCOUNTS AGREEMENT**

### **Flow of Project Revenues**

The Collateral Agency and Accounts Agreement establishes certain Project Accounts in the name of the Borrower, as well as certain Non-Pledged Accounts. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Collateral Agency and Accounts Agreement.” The following tables illustrate how Project Revenues have been and will continue to be deposited in the various Project Accounts and Non-Pledged Accounts held by the Collateral Agent pursuant to the Collateral Agency and Accounts Agreement, both before the Phase 2 End of Funding Date and after the Phase 2 End of Funding Date.

**FLOW OF FUNDS**

Footnotes Appear on Following Page

---

<sup>1</sup> If amounts on deposit in the Pre-Substantial Completion Revenue Account or the Post-Substantial Completion Revenue Account are not sufficient on any Transfer Date to make required transfers, then the Securities Intermediary (or the Deposit Account Bank, with respect to the Operating Account) shall transfer funds to fund such shortfalls in these accounts as set forth in “PART 5 – Flow of Funds Pre-Substantial Completion” and “PART 5 – Flow of Funds Post-Substantial Completion” below.

<sup>2</sup> Funded pro rata.

<sup>3</sup> In the Building Loan Agreement, the Borrower covenants that notwithstanding anything to the contrary in any other Financing Documents, the Borrower shall not pay, distribute, declare the payment of or make any Permitted Tax Distributions, whether as a dividend, loan, investment, loan repayment or in any other form, (i) pursuant to Section 5.03(b)(6) of the Collateral Agency and Accounts Agreement, in an amount exceeding \$20 million per calendar year, and (ii) pursuant to Section 5.03(b)(11) of the Collateral Agency and Accounts Agreement, in any amount at any time.

<sup>4</sup> After the Phase 1 End of Funding Date.

<sup>5</sup> Funded in order of priority.

<sup>6</sup> The Handback Reserve Account is funded five years prior to the end of the term of the Lease Agreement, and is funded pro rata with the Major Maintenance Reserve Account.

<sup>7</sup> Funded in order of priority.

<sup>8</sup> Released only when Restricted Payment Conditions are satisfied. Under certain circumstances amounts released from the Remaining Revenue Account are required to be applied to certain redemptions of Outstanding Obligations, including: (A) prior to the discharge of the Senior Bank Obligations, certain redemptions of Senior Term Loans and Series 2022A Bonds, including required payments on associated Permitted Hedge Agreements, and (B) commencing ten years prior to the maturity thereof, a portion of the Series 2024A Balloon Indebtedness. See “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The Collateral Agency and Accounts Agreement - *Restricted Distributions*” herein.

## Flow of Funds Pre-Substantial Completion

Until (but not including) the Phase 2 End of Funding Date, the Borrower will promptly deposit into the Pre-Substantial Completion Revenue Account (i) all Project Revenues and all other amounts received by the Borrower from any source whatsoever, except for (x) the Non-Pledged Receipts and (y) amounts expressly required to be deposited in other Project Accounts pursuant to the Collateral Agency and Accounts Agreement, and (ii) amounts transferred from other Project Accounts as required by the terms of the Collateral Agency and Accounts Agreement. Pending such deposit, the Borrower will hold all such amounts received by it in trust for the benefit of the Secured Parties.

The Securities Intermediary shall, on each Transfer Date occurring prior to the Phase 2 End of Funding Date, make the following withdrawals, transfers and payments from the Pre-Substantial Completion Revenue Account (to the extent of funds then available in the Pre-Substantial Completion Revenue Account, and in each case to the extent the amounts required to pay such amounts have not been previously transferred from other Accounts at the direction of the Borrower in accordance with the Collateral Agency and Accounts Agreement) in the amounts, at the times and only for the purposes specified below at the request of the Borrower, and in the following order of priority, after giving effect to any other transfers into the Project Accounts required or permitted to be made on or prior to such Transfer Date in accordance with the terms of the Collateral Agency and Accounts Agreement (it being agreed that no amount shall be withdrawn or transferred on any date pursuant to any clause below until amounts sufficient as of that date (to the extent applicable) for all the purposes specified under the prior clauses shall have been withdrawn or transferred):

*First*, in the following order of priority (i) if any Rebate Amount is due under the Indenture, to fund the Rebate Account in an amount equal to such Rebate Amount, and thereafter, and (ii) *pro rata* to pay all fees (including commitment and letter of credit fees), administrative costs and expenses then due and payable under the Financing Documents to the Secured Parties;

*Second, pro rata* (i) to the Port Authority, an amount equal to the aggregate of Ground Rent, First Additional Rent, Second Additional Rental, Third Additional Rent, any other Rental (other than Concessions Revenue Rent, Excess Value Rent or Equity Gain Share) and any MMRA Shortfall Amount, in each case due and payable on the applicable Transfer Date, (ii) to the Port Authority, on the first Transfer Date following the identification of any MAG Deficiency for the preceding year, if applicable, an amount equal to such MAG Deficiency (provided that during any Deferral Period, only fifty percent (50%) of any MAG Deficiency shall be paid at this tier Second and the remaining fifty percent (50%) shall be paid at tier Ninth), and (iii) to the Operating Account, an amount equal, together with the amount then on deposit therein, to the Permitted O&M Expenses (other than amounts required to be transferred or paid to the Port Authority pursuant to this paragraph) then due and payable, or reasonably projected to be due and payable prior to the next succeeding Transfer Date, and Major Maintenance expenses (to the extent funds on deposit in the Major Maintenance Reserve Account are not sufficient to pay such Major Maintenance expenses and without duplication of any MMRA Shortfall Amount) then due and payable or reasonably projected to be due and payable prior to the next succeeding Transfer Date;

*Third*, to the Operating Account, an amount equal, when taken together with amounts then on deposit therein, to the O&M Expenses (other than amounts required to be transferred or paid to the Port Authority pursuant to paragraph Second) not constituting Permitted O&M Expenses then due and payable, or reasonably projected to be due and payable prior to the next succeeding Transfer Date;

*Fourth, pro rata*, (i) to the Hedge Ordinary Course Payment Account, an amount equal to the Ordinary Course Payments under any Secured Hedge Agreement then due and payable, or that are projected

by the Borrower to become due and payable prior to the next succeeding Transfer Date, and (ii) to each Interest Payment Sub-Account within the Senior Obligations Payment Account established in connection with Senior Obligations (other than Ordinary Course Payments under any Secured Hedge Agreement), an amount equal to the amount necessary to cause the balance on deposit in such Interest Payment Sub-Account to be equal to the product of (A) and (B), where:

(A) is a number equal to (I) divided by (II), where:

(I) is the number of Transfer Dates that have occurred since:

(a) subject to the succeeding clauses (b) and (c), the preceding Interest Payment Date for the applicable Senior Obligations (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Interest Payment Date),

(b) subject to the succeeding clause (c), if no Interest Payment Date has yet occurred in respect of the applicable Senior Obligations, the date of issuance or borrowing for the applicable Senior Obligations (including the current Transfer Date), or

(c) with respect to Deferred Interest Obligations, the applicable Interest Payment Calculation Start Date (including the current Transfer Date); and

(II) is the total number of Transfer Dates in the Interest Payment Period for the applicable Senior Obligation; and

(B) is an amount equal to the aggregate amount of interest on such Senior Obligations scheduled to become due and payable on any Interest Payment Date with respect to such Senior Obligations occurring on such Transfer Date or thereafter prior to the next succeeding Transfer Date, as reasonably projected by the Borrower to become due and payable on such Interest Payment Date; provided, that if an Interest Payment Date for any such Senior Obligations will occur prior to the next succeeding Transfer Date, in no event shall the amount transferred to the applicable Interest Payment Sub-Account be less than the amount necessary to cause the balance then on deposit in such Interest Payment Sub-Account to be at least equal to the projected aggregate amount of interest on such Senior Obligations due and payable on such Interest Payment Date, as reasonably projected by the Borrower; provided, further, that if there are insufficient funds available on the Transfer Date to make the deposits required pursuant to this paragraph *Fourth* in full, transfers shall be made to the Hedge Ordinary Course Payment Account and the various Interest Payment Sub-Accounts maintained with respect to any Senior Obligations on a *pro rata* basis measured by the amounts required to be transferred to each such Project Account or sub-account pursuant to this paragraph *Fourth*;

*Fifth, pro rata*, (i) to the Hedge Termination Payment Account, an amount equal to the Hedge Termination Payments under any Secured Hedge Agreement then due and payable, or that is reasonably projected by the Borrower to become, due and payable prior to the next succeeding Transfer Date, and (ii) to each Principal Payment Sub-Account within the Senior Obligations Payment Account established in connection with Senior Obligations (other than Hedge Termination Payments under any Secured Hedge Agreement), an amount equal to the amount necessary to cause the balance on deposit in such Principal Payment Sub-Account to be equal to the product of (A) and (B), where:

(A) is a number equal to:

(I) for Senior Obligations not constituting Balloon Indebtedness, (a) divided by (b), where:

(a) is the number of Transfer Dates that have occurred since:

(x) subject to the succeeding clause (y), the preceding Principal Payment Date for the applicable Senior Obligations (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Principal Payment Date), or

(y) if no Principal Payment Date has yet occurred in respect of the applicable Senior Obligations, the Principal Payment Calculation Start Date for the applicable Senior Obligations (including the current Transfer Date); and

(b) is the total number of Transfer Dates in the Principal Payment Period for the applicable Senior Obligation; or

(II) for Senior Obligations constituting Balloon Indebtedness:

(a) prior to the applicable Principal Payment Calculation Start Date, zero (0),

(b) on and after the applicable Principal Payment Calculation Start Date and before the first Principal Payment Date pursuant to the Balloon Indebtedness Certificate, (x) the number of Transfer Dates that have occurred since the Principal Payment Calculation Start Date for such Balloon Indebtedness (including the current Transfer Date but, if such Payment Calculation Start Date occurred on a prior Transfer Date, then excluding such Transfer Date), divided by (y) the total number of Transfer Dates in the Principal Payment Period outlined in the Balloon Indebtedness Certificate, or

(c) on and after the first Principal Payment Date pursuant to the Balloon Indebtedness Certificate, (x) the number of Transfer Dates that have occurred since the preceding Principal Payment Date outlined in the applicable Balloon Indebtedness Certificate (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Principal Payment Date), divided by (y) the total number of Transfer Dates in the Principal Payment Period outlined in such Balloon Indebtedness Certificate; and

(B) is an amount equal to the principal or Accreted Value of such Senior Obligations scheduled or assumed (in accordance with the definition of Aggregate Debt Service) to become due and payable on the Principal Payment Date with respect to such Senior Obligations occurring on such Transfer Date or immediately thereafter; provided that if a Principal Payment Date for such Senior Obligations will occur prior to the next succeeding Transfer Date, in no event shall the amount transferred to the applicable Principal Payment Sub-Account be less than the amount necessary to cause the balance then on deposit in such Principal Payment Sub-Account to be at least equal to the aggregate amount of principal or Accreted Value of such Senior Obligations due and payable on such Principal Payment Date; provided further, that if there are insufficient funds available on the Transfer Date to make the deposits required pursuant to this paragraph *Fifth* in full,

transfers shall be made to the Hedge Termination Payment Account and the various Principal Payment Sub-Accounts maintained with respect to any Senior Obligations on a pro rata basis measured by the amounts required to be transferred to each such Project Account or sub-account pursuant to this paragraph *Fifth*;

*Sixth*, on each Transfer Date occurring after the Phase 1 End of Funding Date, to the O&M Reserve Account, the amount, if any, required to fund the O&M Reserve Account to the level required by the Collateral Agency and Accounts Agreement;

*Seventh*, on each Transfer Date occurring after the Phase 1 End of Funding Date, to the Major Maintenance Reserve Account, the amount, if any, required to fund the Major Maintenance Reserve Account to the level required by the Collateral Agency and Accounts Agreement;

*Eighth*, if applicable, in the following order of priority, (i) to each Interest Payment Sub-Account within the Subordinate Obligations Payment Account established in connection with the Subordinate Obligations, an amount equal to the amount necessary to cause the balance on deposit in such Interest Payment Sub-Account to be equal to the product of (A) and (B), where:

(A) is a number equal to (I) divided by (II), where:

(I) is the number of Transfer Dates that have occurred since:

(a) subject to the succeeding clause (b) and (c), the preceding Interest Payment Date for the applicable Subordinate Obligations (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Interest Payment Date),

(b) subject to the succeeding clause (c), if no Interest Payment Date has yet occurred in respect of the applicable Subordinate Obligations, the date of issuance, Drawing or borrowing for the applicable Subordinate Obligations (including the current Transfer Date), or

(c) with respect to Deferred Interest Obligations, the applicable Interest Payment Calculation Start Date (including the current Transfer Date); and

(II) is the total number of Transfer Dates in the Interest Payment Period for the applicable Subordinate Obligation;

(B) is an amount equal to the aggregate amount of interest on such Subordinate Obligations scheduled to become due and payable on any Interest Payment Date with respect to such Subordinate Obligations occurring on such Transfer Date or thereafter prior to the next succeeding Transfer Date, as reasonably projected by the Borrower to become due and payable on such Interest Payment Date; provided, that if an Interest Payment Date for such Subordinate Obligations will occur prior to the next succeeding Transfer Date, in no event shall the amount transferred to the applicable Interest Payment Sub-Account be less than the amount necessary to cause the balance then on deposit in such Interest Payment Sub-Account to be at least equal to the projected aggregate amount of interest on such Subordinate Obligations due and payable on such Interest Payment Date, as reasonably projected by the Borrower; provided, further, that if there are insufficient funds available on the Transfer Date to make the deposits required pursuant to this paragraph *Eighth*(i), transfers shall be made to the various Interest Payment Sub-Accounts maintained with respect to

any Subordinate Obligations on a pro rata basis measured by the amounts required to be transferred to such Project Account or sub-account pursuant to this paragraph *Eighth*(i); and

(ii) to each Principal Payment Sub-Account within the Subordinate Obligations Payment Account established in connection with Subordinate Obligations, an amount equal to the amount necessary to cause the balance on deposit in such Principal Payment Sub-Account to be equal to the product of (A) and (B), where:

(A) is a number equal to:

(I) for Subordinate Obligations not constituting Balloon Indebtedness, (a) divided by (b), where:

(a) is the number of Transfer Dates that have occurred since:

(x) subject to the succeeding clause (y), the preceding Principal Payment Date for the applicable Subordinate Obligations (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Principal Payment Date), or

(y) if no Principal Payment Date has yet occurred in respect of the applicable Subordinate Obligations, the Principal Payment Calculation Start Date for the applicable Subordinate Obligations (including the current Transfer Date); and

(b) the total number of Transfer Dates in the Principal Payment Period for the applicable Subordinate Obligations, or

(II) for Subordinate Obligations constituting Balloon Indebtedness:

(a) prior to the applicable Principal Payment Calculation Start Date, zero (0),

(b) on and after the applicable Principal Payment Calculation Start Date and before the first Principal Payment Date pursuant to the Balloon Indebtedness Certificate, (x) the number of Transfer Dates that have occurred since the Principal Payment Calculation Start Date for such Balloon Indebtedness (including the current Transfer Date but, if such Payment Calculation Start Date occurred on a prior Transfer Date, then excluding such Transfer Date), divided by (y) the total number of Transfer Dates in the Principal Payment Period outlined in the Balloon Indebtedness Certificate, or

(c) on and after the first Principal Payment Date pursuant to the Balloon Indebtedness Certificate, (x) the number of Transfer Dates that have occurred since the preceding Principal Payment Date outlined in the applicable Balloon Indebtedness Certificate (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Principal Payment Date), divided by (y) the total number of Transfer Dates in the Principal Payment Period outlined in such Balloon Indebtedness Certificate; and

(B) is an amount equal to the principal or Accreted Value of such Subordinate Obligation scheduled or assumed (in accordance with the definition of Aggregate Debt Service) to become

due and payable on the Principal Payment Date with respect to such Subordinate Obligation occurring on such Transfer Date or immediately thereafter; provided that if a Principal Payment Date for such Subordinate Obligation will occur prior to the next succeeding Transfer Date, in no event shall the amount transferred to the applicable Principal Payment Sub-Account be less than the amount necessary to cause the balance then on deposit in such Principal Payment Sub-Account to be at least equal to the aggregate amount of principal or Accreted Value of such Subordinate Obligation due and payable on such Principal Payment Date; provided, further, that if there are insufficient funds available on the Transfer Date to make the deposits required pursuant to this paragraph *Eighth(ii)*, transfers shall be made to the various Principal Payment Sub-Accounts maintained with respect to any Subordinate Obligations on a pro rata basis measured by the amounts required to be transferred to each Project Account or sub-account pursuant to this paragraph *Eighth(ii)*;

*Ninth*, to the Port Authority an amount equal to (A) the Subordinate Concessions Revenue Rent, (B) any accumulated and unpaid Deferred Concessions Revenue Rent which are attributable to prior Transfer Dates, together with any interest due and payable thereon pursuant to the Lease Agreement, if applicable, and (C) on the first Transfer Date following the identification of any MAG Deficiency for the preceding year during the Deferral Period, any portion of the MAG Deficiency to the extent not paid pursuant to paragraph Second above, each as due and payable under the Lease Agreement;

*Tenth*, all remaining amounts shall be (i) transferred (in whole or in part) to the Operating Cashflow Sub-Account within the Construction Account, or (ii) retained (in whole or in part) in the Pre-Substantial Completion Revenue Account, in each case as directed by the Borrower.

Notwithstanding the foregoing, the Securities Intermediary shall automatically make the transfers described in clauses *First (i)*, *Second (i)*, *Fourth*, and *Fifth*, even if not instructed to do so by the Borrower.

If on any Transfer Date the amounts on deposit in the Pre-Substantial Completion Revenue Account are not sufficient to make the transfers required to be made from the Pre-Substantial Completion Revenue Account (i) pursuant to clauses *First* through *Eighth* described above, inclusive, in full, the Securities Intermediary shall (notwithstanding any other provision of the Collateral Agency and Accounts Agreement and without the need for a Funds Transfer Certificate), transfer funds from the Operating Cashflow Sub-Account (to the extent of the balance therein) in the amounts of the deficiencies to each Person and Project Account in accordance with the order of priority and pro rata portions set forth in the Collateral Agency and Accounts Agreement, and (ii) after having made such transfers in full, then the Securities Intermediary shall (notwithstanding any other provision of the Collateral Agency and Accounts Agreement and without the need for a Funds Transfer Certificate) transfer funds in an aggregate amount not exceeding the amount of such deficiency on such date to the Port Authority or to the Operating Account, as applicable, from the O&M Reserve Account.

On the Phase 2 End of Funding Date, all remaining funds, if any, then on deposit in the Pre-Substantial Completion Revenue Account shall be transferred (i) first, to the Operating Cashflow Sub-Account, in the amount necessary to cause the aggregate amount remaining on deposit in the Sub-Accounts of the Construction Account to equal to the amount of Project Costs incurred or anticipated to be incurred but not yet paid through and including the Final Completion Date, and (ii) thereafter, all remaining funds shall be transferred to the Post-Substantial Completion Revenue Account.

## Flow of Funds Post-Substantial Completion

On and after the Phase 2 End of Funding Date, the Borrower will promptly deposit into the Post-Substantial Completion Revenue Account (i) all Project Revenues and all other amounts received by the Borrower from any source whatsoever, except for the Non-Pledged Receipts and amounts required to be deposited in other Project Accounts pursuant to the Collateral Agency and Accounts Agreement, and (ii) any amounts transferred from other Project Accounts as required by the terms of the Collateral Agency and Accounts Agreement. Pending such deposit, the Borrower will hold all such amounts received by it in trust for the benefit of the Secured Parties.

The Securities Intermediary shall, on each Transfer Date occurring on or after the Phase 2 End of Funding Date, make the following withdrawals, transfers and payments from the Post-Substantial Completion Revenue Account (to the extent of funds then available in the Post-Substantial Completion Revenue Account, and in each case to the extent the amounts required to pay such amounts have not been previously transferred, in accordance with the terms of the Collateral Agency and Accounts Agreement, from other Accounts at the direction of the Borrower) in the amounts, at the times and only for the purposes specified in the Collateral Agency and Accounts Agreement at the request of the Borrower in a Funds Transfer Certificate and in the following order of priority, after giving effect to any other transfers into the Project Accounts required or permitted to be made prior to such Transfer Date in accordance with the terms of the Collateral Agency and Accounts Agreement (it being agreed that no amount shall be withdrawn or transferred on any date pursuant to any clause below until amounts sufficient as of that date (to the extent applicable) for all the purposes specified under the prior clauses shall have been withdrawn or transferred):

*First*, in the following order of priority (i) if any Rebate Amount is due under the Indenture, to fund the Rebate Account in an amount equal to such Rebate Amount, and thereafter and (ii) pro rata to pay all fees (including commitment fees), administrative costs and expenses then due and payable under the Financing Documents to the Secured Parties;

*Second, pro rata* (i) to the Port Authority, an amount equal to the aggregate Ground Rent, First Additional Rent, Second Additional Rental, Third Additional Rent, any other Rental (other than Concessions Revenue Rent, Excess Value Rent or Equity Gain Share) and any MMRA Shortfall Amount, in each case due and payable on the applicable Transfer Date, (ii) to the Port Authority, on the first Transfer Date following the identification of any MAG Deficiency for the preceding year, if applicable, an amount equal to such MAG Deficiency (provided that during any Deferral Period, only fifty percent (50%) of any MAG Deficiency shall be paid at this tier Second and the remaining fifty percent (50%) shall be paid at tier Eleventh), and (iii) to the Operating Account, an amount equal to, together with the amount then on deposit therein, the Permitted O&M Expenses (other than amounts required to be transferred or paid to the Port Authority pursuant to this paragraph) then due and payable, or reasonably projected to be due and payable prior to the next succeeding Transfer Date, and Major Maintenance expenses (to the extent funds on deposit in the Major Maintenance Reserve Account are not sufficient to pay such Major Maintenance expenses and without duplication of any MMRA Shortfall Amount) then due and payable or that will become due and payable prior to the next succeeding Transfer Date;

*Third*, to the Operating Account, an amount equal, when taken together with amounts then on deposit therein, to the O&M Expenses (other than amounts required to be transferred or paid to the Port Authority pursuant to paragraph 2) not constituting Permitted O&M Expenses then due and payable, or reasonably projected to be due and payable, prior to the next succeeding Transfer Date;

*Fourth, pro rata*, (i) to the Hedge Ordinary Course Payment Account, an amount equal to the Ordinary Course Payments under any Secured Hedge Agreement then due and payable, or that are projected

by the Borrower to become due and payable prior to the next succeeding Transfer Date, and (ii) to each Interest Payment Sub-Account within the Senior Obligations Payment Account established in connection with Senior Obligations (other than Ordinary Course Payments under any Secured Hedge Agreement), an amount equal to the amount necessary to cause the balance on deposit in such Interest Payment Sub-Account to be equal to the product of (A) and (B), where:

(A) is a number equal to (I) divided by (II), where:

(I) is the number of Transfer Dates that have occurred since:

(a) subject to the succeeding clauses (b) and (c), the preceding Interest Payment Date for the applicable Senior Obligations (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Interest Payment Date),

(b) subject to the succeeding clause (c), if no Interest Payment Date has yet occurred in respect of the applicable Senior Obligations, the date of issuance, Drawing or borrowing for the applicable Senior Obligations (including the current Transfer Date), or

(c) with respect to Deferred Interest Obligations, the applicable Interest Payment Calculation Start Date (including the current Transfer Date); and

(II) is the total number of Transfer Dates in the Interest Payment Period for the applicable Senior Obligation; and

(B) is an amount equal to the aggregate amount of interest on such Senior Obligations scheduled to become due and payable on any Interest Payment Date with respect to such Senior Obligations occurring on such Transfer Date or thereafter prior to the next succeeding Transfer Date, as reasonably projected by the Borrower to become due and payable on such Interest Payment Date; provided that if an Interest Payment Date for such Senior Obligations will occur prior to the next succeeding Transfer Date, in no event shall the amount transferred to the applicable Interest Payment Sub-Account be less than the amount necessary to cause the balance then on deposit in such Interest Payment Sub-Account to be at least equal to the projected aggregate amount of interest on such Senior Obligations due and payable on such Interest Payment Date, as reasonably projected by the Borrower; provided, further, that if there are insufficient funds available on the Transfer Date to make the deposits required pursuant to this paragraph *Fourth* in full, transfers shall be made to the Hedge Ordinary Course Payment Account and the various Interest Payment Sub-Accounts maintained with respect to any Senior Obligations on a pro rata basis measured by the amounts required to be transferred to each such Project Account or sub-account pursuant to this paragraph *Fourth*;

*Fifth, pro rata*, (i) to the Hedge Termination Payment Account, an amount equal to the Hedge Termination Payments under any Secured Hedge Agreement then due and payable, or that is reasonably projected by the Borrower to become due and payable prior to the next succeeding Transfer Date, and (ii) to each Principal Payment Sub-Account within the Senior Obligations Payment Account established in connection with Senior Obligations (other than Hedge Termination Payments under any Secured Hedge Agreement), an amount equal to the amount necessary to cause the balance on deposit in such Principal Payment Sub-Account to be equal to the product of (A) and (B) where:

(A) is a number equal to:

(I) for Senior Obligations not constituting Balloon Indebtedness, (a) divided by (b), where:

(a) is the number of Transfer Dates that have occurred since:

(x) subject to the succeeding clause (y), the preceding Principal Payment Date for the applicable Senior Obligations (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Principal Payment Date), or

(y) if no Principal Payment Date has yet occurred in respect of the applicable Senior Obligations, the Principal Payment Calculation Start Date for the applicable Senior Obligations (including the current Transfer Date); and

(b) is the total number of Transfer Dates in the Principal Payment Period for the applicable Senior Obligation; or

(II) for Senior Obligations constituting Balloon Indebtedness:

(a) prior to the applicable Principal Payment Calculation Start Date, zero (0),

(b) on and after the applicable Principal Payment Calculation Start Date and before the first Principal Payment Date pursuant to the Balloon Indebtedness Certificate,

(x) the number of Transfer Dates that have occurred since the Principal Payment Calculation Start Date for such Balloon Indebtedness (including the current Transfer Date but, if such Payment Calculation Start Date occurred on a prior Transfer Date, then excluding such Transfer Date), *divided by*

(y) the total number of Transfer Dates in the Principal Payment Period outlined in such Balloon Indebtedness Certificate, or

(c) on and after the first Principal Payment Date pursuant to the Balloon Indebtedness Certificate,

(x) the number of Transfer Dates that have occurred since the preceding Principal Payment Date outlined in the applicable Balloon Indebtedness Certificate (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Principal Payment Date), *divided by*

(y) the total number of Transfer Dates in the Principal Payment Period outlined in the Balloon Indebtedness Certificate; and

(B) is an amount equal to the principal or Accreted Value of such Senior Obligations scheduled or assumed (in accordance with the definition of Aggregate Debt Service) to become due and payable on the Principal Payment Date with respect to such Senior Obligations occurring on such Transfer Date or immediately thereafter; provided that if a Principal Payment Date for such Senior Obligations will occur prior to the next succeeding Transfer Date, in no event shall the

amount transferred to the applicable Principal Payment Sub-Account be less than the amount necessary to cause the balance then on deposit in such Principal Payment Sub-Account to be at least equal to the aggregate amount of principal or Accreted Value of such Senior Obligations due and payable on such Principal Payment Date; provided further that if there are insufficient funds available on the Transfer Date to make the deposits required pursuant to this paragraph *Fifth* in full, transfers shall be made to the Hedge Termination Payment Account and the various Principal Payment Sub-Accounts maintained with respect to any Senior Obligations on a pro rata basis measured by the amounts required to be transferred to each such Project Account or sub-account pursuant to this paragraph *Fifth*;

*Sixth*, so long as no Default or Event of Default has occurred and is continuing or would result from such payment and to the extent not prohibited by any other Financing Document, to pay Permitted Tax Distributions in the amount and to the Persons requested in the Funds Transfer Certificate (provided that the Borrower has covenanted in the First Building Loan Agreement Amendment not to pay, distribute, declare the payment of or make any Permitted Tax Distributions, whether as a dividend, loan, investment, loan repayment or in any other form pursuant to this section in an amount exceeding \$20 million per calendar year), provided that if, on the applicable Transfer Date, any Deferred Concessions Revenue Rent is owed to the Port Authority under the Lease Agreement, such Permitted Tax Distributions shall instead be paid under tier *Eleventh* below;

*Seventh*, in the following order of priority, (i) to the Senior Debt Service Reserve Account, the amount (if any) necessary to fund such account so that the balance therein (taking into account amounts then on deposit therein, and any amount then available for drawing under any Acceptable Letter of Credit provided with respect to the Senior Debt Service Reserve Account) equals the Senior Debt Service Reserve Requirement at such time, and (ii) to the Ramp-Up Reserve Account, the amount (if any) necessary to fund such account so that the balance therein equals the Ramp-Up Reserve Requirement at such time;

*Eighth*, to the O&M Reserve Account, the amount (if any) necessary to fund such account so that the balance therein, taking into account amounts then on deposit therein and any amount then available for drawing under any Acceptable Letter of Credit provided with respect to the O&M Reserve Account, equals the O&M Reserve Requirement at such time;

*Ninth, pro rata* (i) to the Major Maintenance Reserve Account the amount (if any) necessary to fund such account so that the balance therein, taking into account the amount available for drawing under any Acceptable Letter of Credit provided with respect to the Major Maintenance Reserve Account, equals the Major Maintenance Reserve Requirement at such time, and (ii) to the Handback Reserve Account the amount (if any) necessary to fund such account so that the balance therein, taking into account the amount available for drawing under any Acceptable Letter of Credit provided with respect to the Handback Reserve Account, equals the Handback Reserve Amount at such time;

*Tenth*, if applicable, in the following order of priority, (i) to each Interest Payment Sub-Account within the Subordinate Obligations Payment Account established in connection with the Subordinate Obligations, an amount equal to the amount necessary to cause the balance on deposit in such Interest Payment Sub-Account to be equal to the product of (A) and (B), where:

(A) is a number equal to (I) divided by (II), where:

(I) is the number of Transfer Dates that have occurred since:

(a) subject to the succeeding clauses (b) and (c), the preceding Interest Payment Date for the applicable Subordinate Obligations (including the current Transfer Date but excluding any Transfer Date occurring on such preceding Interest Payment Date),

(b) subject to the succeeding clause (c), if no Interest Payment Date has yet occurred in respect of the applicable Subordinate Obligations, the date of issuance, Drawing or borrowing for the applicable Subordinate Obligations (including the current Transfer Date), or

(c) with respect to Deferred Interest Obligations, the applicable Interest Payment Calculation Start Date (including the current Transfer Date); and

(II) is the total number of Transfer Dates in the Interest Payment Period for the applicable Subordinate Obligations;

(B) is an amount equal to the aggregate amount of interest on such Subordinate Obligations scheduled to become due and payable on any Interest Payment Date with respect to such Subordinate Obligations occurring on such Transfer Date or thereafter prior to the next succeeding Transfer Date, as reasonably projected by the Borrower to become due and payable on such Interest Payment Date; provided that if an Interest Payment Date for such Subordinate Obligations will occur prior to the next succeeding Transfer Date, in no event shall the amount transferred to the applicable Interest Payment Sub-Account be less than the amount necessary to cause the balance then on deposit in such Interest Payment Sub-Account to be at least equal to the projected aggregate amount of interest on such Subordinate Obligations due and payable on such Interest Payment Date, as reasonably projected by the Borrower; provided, further, that if there are insufficient funds available on the Transfer Date to make the deposits required pursuant to this paragraph *Tenth(i)*, transfers shall be made to the various Interest Payment Sub-Accounts maintained with respect to any Subordinate Obligations on a pro rata basis measured by the amounts required to be transferred to such Project Account or sub-account pursuant to this paragraph *Tenth(i)*; and

(ii) to each Principal Payment Sub-Account within the Subordinate Obligations Payment Account established in connection with the Subordinate Obligations, an amount equal to the amount necessary to cause the balance on deposit in such Principal Payment Sub-Account to be equal to the product of (A) and (B), where:

(A) is a number equal to:

(I) for Subordinate Obligations not constituting Balloon Indebtedness, (a) divided by (b), where:

(a) is the number of Transfer Dates that have occurred since:

(x) subject to the succeeding clause (y), the preceding Principal Payment Date for the applicable Subordinate Obligations (including the current Transfer Date but excluding the Transfer Date on which such preceding Principal Payment Date occurred), or

(y) if no Principal Payment Date has yet occurred in respect of the applicable Subordinate Obligations, the Principal Payment Calculation Start Date for the applicable Subordinate Obligations (including the current Transfer Date); and

(b) the total number of Transfer Dates in the Principal Payment Period for the applicable Subordinate Obligations, or

(II) for Subordinate Obligations constituting Balloon Indebtedness:

(a) prior to the applicable Principal Payment Calculation Start Date, zero (0),

(b) on and after the applicable Principal Payment Calculation Start Date and before the first Principal Payment Date pursuant to the Balloon Indebtedness Certificate,

(x) the number of Transfer Dates that have occurred since the Principal Payment Calculation Start Date for such Balloon Indebtedness (including the current Transfer Date but, if such Payment Calculation Start Date occurred on a prior Transfer Date, then excluding such Transfer Date), divided by

(y) the total number of Transfer Dates in the Principal Payment Period outlined in the Balloon Indebtedness Certificate, or

(c) on and after the first Principal Payment Date pursuant to the Balloon Indebtedness Certificate,

(x) the number of Transfer Dates that have occurred since the preceding Principal Payment Date outlined in the applicable Balloon Indebtedness Certificate (including the current Transfer Date but excluding the Transfer Date on which such preceding Principal Payment Date occurred), divided by

(y) the total number of Transfer Dates in the Principal Payment Period outlined in such Balloon Indebtedness Certificate; and

(B) is an amount equal to the principal or Accreted Value of such Subordinate Obligation scheduled or assumed (in accordance with the definition of Aggregate Debt Service) to become due and payable on the Principal Payment Date for such Subordinate Obligations occurring on such Transfer Date or immediately thereafter; provided that if a Principal Payment Date for such Subordinate Obligation will occur prior to the next succeeding Transfer Date, in no event shall the amount transferred to the applicable Principal Payment Sub-Account be less than the amount necessary to cause the balance then on deposit in such Principal Payment Sub-Account to be at least equal to the aggregate amount of principal or Accreted Value of such Subordinate Obligation due and payable on such Principal Payment Date; provided, further, that if there are insufficient funds available on the Transfer Date to make the deposits required pursuant to this paragraph *Tenth(ii)*, transfers shall be made to the various Principal Payment Sub-Accounts maintained with respect to any Subordinate Obligations on a pro rata basis measured by the amounts

required to be transferred to each Project Account or sub-account pursuant to this paragraph *Tenth(ii)*;

*Eleventh*, in the following order of priority: (i) to the Port Authority an amount equal to (A) Subordinate Concessions Revenue Rent, (B) any accumulated and unpaid Deferred Concessions Revenue Rent which is attributable to prior Transfer Dates, together with any interest due and payable thereon pursuant to the Lease Agreement, and (C) on the first Transfer Date following the identification of any MAG Deficiency for the preceding year during the Deferral Period, any portion of the MAG Deficiency to the extent not paid pursuant to paragraph *Second* above, each as due and payable under the Lease Agreement, and (ii) to the extent not prohibited by any other Financing Document, Permitted Tax Distributions to the extent not paid pursuant to *Sixth* above (noting that such payment under this section is expressly prohibited by the First Building Loan Agreement Amendment), in the amount and to the Persons requested in the Funds Transfer Certificate;

*Twelfth*, all remaining amounts to the Remaining Revenue Account.

Notwithstanding the foregoing, the Securities Intermediary shall automatically make the transfers described in clauses *First (i)*, *Second (i)*, *Fourth*, *Fifth*, and *Sixth* even if not instructed to do so by the Borrower.

Each of the Borrower and (at the direction of the Secured Parties) each Collateral Agent acknowledges and agrees that payment of any Deferred Concessions Revenue Rent to which the Port Authority is entitled under and subject to the Lease Agreement will be made in the ordinary course to the extent of available funds therefore in accordance with the provisions of the Post-Substantial Completion Revenue Account section of the Collateral Agency and Accounts Agreement.

If on any Transfer Date the amounts on deposit in the Post-Substantial Completion Revenue Account are not sufficient to make the transfers required to be made from the Post-Substantial Completion Revenue Account pursuant to clauses *First* through *Tenth* described above, inclusive, in full, the Securities Intermediary (or the Deposit Account Bank, with respect to the Operating Account) shall (notwithstanding any other provision hereof and without the need for a Funds Transfer Certificate), transfer funds as follows:

(i) if amounts on deposit in the Post-Substantial Completion Revenue Account are not sufficient to make the transfers required in accordance with clause *First* with respect to amounts then due and payable under the Financing Documents, then funds in an aggregate amount not exceeding the amount of such deficiency shall be transferred on such date to the relevant Secured Parties *first, pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account, as applicable, *second*, from the Ramp-Up Reserve Account (provided that the amount on deposit in the Ramp-Up Reserve Account immediately after giving effect to such transfer, when added to the amount then on deposit in the Senior Debt Service Reserve Account (including any amount then available for drawing under any Acceptable Letter of Credit provided with respect to the Senior Debt Service Reserve Account), shall be at least equal to the Senior Debt Service Reserve Requirement at such time), and *third*, from the O&M Reserve Account;

(ii) if amounts on deposit in the Post-Substantial Completion Revenue Account are not sufficient to make the transfers required in accordance with clauses *Second* and *Third* (in such order of priority) in full on such Transfer Date, then, after application of subparagraph (i) above, funds in an aggregate amount not exceeding the amount of such deficiency shall be transferred on such date to the Port Authority or to the Operating Account, as applicable, *first, pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account, as applicable, *second*,

from the Ramp-Up Reserve Account (provided that the amount on deposit in the Ramp-Up Reserve Account immediately after giving effect to such transfer, when added to the amount then on deposit in the Senior Debt Service Reserve Account (including any amount then available for drawing under any Acceptable Letter of Credit provided with respect to the Senior Debt Service Reserve Account), shall be at least equal to the Senior Debt Service Reserve Requirement at such time), and *third*, from the O&M Reserve Account;

(iii) if amounts on deposit in the Post-Substantial Completion Revenue Account are not sufficient to transfer the full amount due to be transferred to the Hedge Ordinary Course Payment Account and to each Interest Payment Sub-Account within the Senior Obligations Payment Account on such Transfer Date in accordance with clause *Fourth*, then, after application of subparagraphs (i) and (ii) above, funds in an aggregate amount not exceeding the amount of such deficiency shall be transferred on such date to the Hedge Ordinary Course Payment Account and to each Interest Payment Sub-Account within the Senior Obligations Payment Account, *first, pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account, as applicable, *second*, from the Ramp-Up Reserve Account, *third*, from the Senior Debt Service Reserve Account, and *fourth*, from the O&M Reserve Account;

(iv) if amounts on deposit in the Post-Substantial Completion Revenue Account are not sufficient to transfer the full amount due to be transferred to the Hedge Termination Payment Account and to each Principal Payment Sub-Account within the Senior Obligations Payment Account on such Transfer Date in accordance with clause *Fifth*, then, after application of subparagraphs (i), (ii) and (iii) above, funds in an aggregate amount not exceeding the amount of such deficiency shall be transferred on such date to the Hedge Termination Payment Account and to each Principal Payment Sub-Account within the Senior Obligations Payment Account, *first, pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account, as applicable, *second*, from the Ramp-Up Reserve Account, *third*, from the Senior Debt Service Reserve Account, and *fourth*, from the O&M Reserve Account (provided that no transfer from the Senior Debt Service Reserve Account or the Ramp-Up Reserve Account to the Hedge Termination Payment Account shall be made pursuant to this paragraph (iv));

(v) if amounts on deposit in the Post-Substantial Completion Revenue Account are not sufficient to make the transfers required under clauses *Seventh*, *Eighth* or *Ninth* (in such order of priority) in full on such Transfer Date, then, after application of subparagraphs (i), (ii), (iii) and (iv) above, funds in an aggregate amount not exceeding the amount of such deficiency shall be transferred on such date to the Senior Debt Service Reserve Account, the O&M Reserve Account or the Major Maintenance Reserve Account, as applicable, *pro rata* from the Remaining Revenue Account, and the Surplus Remaining Revenue Account, as applicable;

(vi) if amounts on deposit in the Post-Substantial Completion Revenue Account are not sufficient to transfer the full amount due to be transferred to each Interest Payment Sub-Account and each Principal Payment Sub-Account maintained with respect to any Subordinate Obligations on such Transfer Date in accordance with clause *Tenth*, then, after application of subparagraphs (i), (ii), (iii), (iv) and (v) above, funds in an aggregate amount not exceeding the amount of such deficiency shall be transferred on such date to each Interest Payment Sub-Account and each Principal Payment Sub-Account maintained with respect to such Subordinate Obligations, *first, pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account, as applicable, *second*, from the Subordinate Debt Service Reserve Account, and *third*, from the O&M Reserve Account; and

(vii) if amounts on deposit in the Post-Substantial Completion Revenue Account are not sufficient to transfer the full amount due to be transferred to the Subordinate Debt Service Reserve Account on such Transfer Date in accordance with clause *Tenth*, then, after application of subparagraphs (i), (ii), (iii), (iv), (v) and (vi) above, funds in an aggregate amount not exceeding the amount of such deficiency shall be transferred on such date to the Subordinate Debt Service Reserve Account *pro rata* from the Remaining Revenue Account and the Surplus Remaining Revenue Account, as applicable.

## **PART 6 – BOND INSURANCE**

*Information contained under this heading relates to the Bond Insurer for certain Bonds, as further described below. Such information has been obtained from the Bond Insurer for use in this Official Statement. No representation is made by the Borrower, the Issuer or the Underwriters as to the accuracy or completeness of this information.*

### **Bond Insurance Policy**

Concurrently with the issuance of the Insured Bonds, the Bond Insurer will issue its Municipal Bond Insurance Policy for the Insured Bonds (the “Policy”). The Policy guarantees the scheduled payment of principal of and interest on the Insured Bonds when due in the form of the Policy attached hereto as Appendix L – “SPECIMEN MUNICIPAL BOND INSURANCE POLICY.”

The Policy is not covered by any insurance security or guaranty fund established under New York, Maryland, California, Connecticut or Florida insurance law.

### **Assured Guaranty Inc.**

The Bond Insurer is a Maryland domiciled financial guaranty insurance company and an indirect subsidiary of Assured Guaranty Ltd. (“AGL” and together with its subsidiaries, “Assured Guaranty”), a Bermuda-based holding company whose shares are publicly traded and are listed on the New York Stock Exchange under the symbol “AGO.” AGL, through its subsidiaries, provides credit enhancement products to the United States and non-U.S. public finance (including infrastructure) and structured finance markets and participates in the asset management business through ownership interests in Sound Point Capital Management, LP and certain of its investment management affiliates. Only the Bond Insurer is obligated to pay claims under the insurance policies the Bond Insurer has issued, and not AGL or any of its shareholders or other affiliates.

AG’s financial strength is rated “AA” (stable outlook) by S&P Global Ratings, a business unit of Standard & Poor’s Financial Services LLC (“S&P”), “AA+” (stable outlook) by Kroll Bond Rating Agency, Inc. (“KBRA”) and “A1” (stable outlook) by Moody’s Investors Service, Inc. (“Moody’s”). Each rating of AG should be evaluated independently. An explanation of the significance of the above ratings may be obtained from the applicable rating agency. The above ratings are not recommendations to buy, sell or hold any security, and such ratings are subject to revision or withdrawal at any time by the rating agencies, including withdrawal initiated at the request of AG in its sole discretion. In addition, the rating agencies may at any time change AG’s long-term rating outlooks or place such ratings on a watch list for possible downgrade in the near term. Any downward revision or withdrawal of any of the above ratings, the assignment of a negative outlook to such ratings or the placement of such ratings on a negative watch list may have an adverse effect on the market price of any security guaranteed by AG. AG only guarantees scheduled principal and scheduled interest payments payable by the issuer of bonds insured by AG on the date(s) when such amounts were initially scheduled to become due and payable (subject to and in

accordance with the terms of the relevant insurance policy), and does not guarantee the market price or liquidity of the securities it insures, nor does it guarantee that the ratings on such securities will not be revised or withdrawn.

***Merger of Assured Guaranty Municipal Corp. Into Assured Guaranty Inc.***

On August 1, 2024, Assured Guaranty Municipal Corp., a New York domiciled financial guaranty insurance company and an affiliate of AG (“AGM”), merged with and into AG, with AG as the surviving company (such transaction, the “Merger”). Upon the Merger, all liabilities of AGM, including insurance policies issued or assumed by AGM, became obligations of AG.

***Current Financial Strength Ratings***

On October 18, 2024, KBRA announced it had affirmed AG’s insurance financial strength rating of “AA+” (stable outlook).

On July 10, 2024, Moody’s, following Assured Guaranty’s announcement of the Merger, announced that it had affirmed AG’s insurance financial strength rating of “A1” (stable outlook).

On May 28, 2024, S&P announced it had affirmed AG’s financial strength rating of “AA” (stable outlook). On August 1, 2024, S&P stated that following the Merger, there is no change in AG’s financial strength rating of “AA” (stable outlook).

AG can give no assurance as to any further ratings action that S&P, Moody’s and/or KBRA may take. For more information regarding AG’s financial strength ratings and the risks relating thereto, see AGL’s Annual Report on Form 10-K for the fiscal year ended December 31, 2023.

***Capitalization of AG, AGM and Pro Forma Combined AG***

**As of June 30, 2024**  
(dollars in millions)

	<b><u>AG</u></b> <b><u>(Actual)</u></b>	<b><u>AGM</u></b> <b><u>(Actual)</u></b>	<b><u>AG</u></b> <b><u>(Pro Forma Combined)</u></b>
Policyholders’ surplus	\$1,649	\$2,599	\$3,960 <sup>(1)</sup>
Contingency reserve	\$421	\$910	\$1,331
Net unearned premium reserves and net deferred ceding commission income	\$355	\$2,078 <sup>(2)</sup>	\$2,433 <sup>(2)</sup>

<sup>(1)</sup>Net of intercompany eliminations.

<sup>(2)</sup>Such amount includes (i) 100% of the net unearned premium reserve and net deferred ceding commission income of AGM or pro forma combined AG, as applicable, and (ii) the net unearned premium reserves and net deferred ceding commissions of Assured Guaranty UK Limited (“AGUK”) and its 99.9999% owned subsidiary Assured Guaranty (Europe) SA (“AGE”).

The policyholders’ surplus, contingency reserves, and net unearned premium reserves and net deferred ceding commission income of AG, AGM, and the pro forma combined AG were determined in accordance with statutory accounting principles. The net unearned premium reserves and net deferred

ceding commissions of AGUK and AGE were determined in accordance with accounting principles generally accepted in the United States of America.

### ***Incorporation of Certain Documents by Reference***

Portions of the following documents filed by AGL with the Securities and Exchange Commission (the “SEC”) that relate to AG and AGM are incorporated by reference into this Official Statement and shall be deemed to be a part hereof:

- I. the Annual Report on Form 10-K for the fiscal year ended December 31, 2023 (filed by AGL with the SEC on February 28, 2024);
- II. the Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2024 (filed by AGL with the SEC on May 8, 2024); and
- III. the Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2024 (filed by AGL with the SEC on August 8, 2024).

All information relating to AG and AGM included in, or as exhibits to, documents filed by AGL with the SEC pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, excluding Current Reports or portions thereof “furnished” under Item 2.02 or Item 7.01 of Form 8-K, after the filing of the last document referred to above and before the termination of the offering of the Insured Bonds shall be deemed incorporated by reference into this Official Statement and to be a part hereof from the respective dates of filing such documents. Copies of materials incorporated by reference are available over the internet at the SEC’s website at <http://www.sec.gov>, at AGL’s website at <http://www.assuredguaranty.com>, or will be provided upon request to Assured Guaranty Inc.: 1633 Broadway, New York, New York 10019, Attention: Communications Department (telephone (212) 974-0100). Except for the information referred to above, no information available on or through AGL’s website shall be deemed to be part of or incorporated in this Official Statement.

Any information regarding AG and AGM included herein under the caption “PART 6 - BOND INSURANCE – Assured Guaranty Inc.” or included in a document incorporated by reference herein (collectively, the “AG Information”) shall be modified or superseded to the extent that any subsequently included AG Information (either directly or through incorporation by reference) modifies or supersedes such previously included AG Information. Any AG Information so modified or superseded shall not constitute a part of this Official Statement, except as so modified or superseded.

### ***Miscellaneous Matters***

AG makes no representation regarding the Insured Bonds or the advisability of investing in the Insured Bonds. In addition, AG has not independently verified, makes no representation regarding, and does not accept any responsibility for the accuracy or completeness of this Official Statement or any information or disclosure contained herein, or omitted herefrom, other than with respect to the accuracy of the information regarding AG supplied by AG and presented under the heading “PART 6 - BOND INSURANCE.”

## **PART 7 – BOND INSURANCE RISK FACTORS**

In the event the Borrower fails to make regularly scheduled payments of principal of and interest on any Insured Bonds when the same become due, the Trustee on behalf of owners of such Insured Bonds

shall have the right to make a claim under the Policy for such payments. There can be no assurance that the Bond Insurer will have sufficient claims paying resources to enable it to make timely payments on such Insured Bonds. The Policy does not insure payments on the Insured Bonds coming due by reason of acceleration, optional redemption, extraordinary redemption or mandatory redemption (other than mandatory sinking fund redemption), nor does it insure the payment of any redemption premium available upon the optional redemption of the Insured Bonds.

So long as the Insured Bonds are outstanding and the Bond Insurer is not in default under the Policy, the Bond Insurer shall be deemed the owner of the Insured Bonds for purposes of all actions relating to the Insured Bonds which require or permit the consent, direction or request of the owners of the Insured Bonds.

In the event that the Bond Insurer does not make scheduled payments of principal and interest on the Insured Bonds as such payments become due, such Insured Bonds will be payable solely from the moneys received by the Trustee pursuant to the Indenture. See “APPENDIX L—SPECIMEN MUNICIPAL BOND INSURANCE POLICY” for further information concerning the Bond Insurer and the Policy.

The ratings on the Insured Bonds are dependent in part on the ratings of the Bond Insurer. The Bond Insurer’s current ratings are predicated upon, among other things, a level of reserves in excess of the levels required by the various state agencies regulating insurance companies and an assessment by rating agencies of potential future claims and the adequacy of reserves to meet these claims, which levels of reserves and assessments could change over time and this could result in a downgrading or withdrawal of the ratings on the Insured Bonds. The Bond Insurer is not contractually bound to maintain its present level of reserves in the future or to increase them in order to maintain its present ratings.

## **PART 8 – JFK AIRPORT**

### **The Airport**

Opened on July 1, 1948, the Airport is located in the southeastern section of Queens, New York, on Jamaica Bay. The Airport consists of approximately 4,956 acres, including 880 acres in the Central Terminal Area, and is currently the largest airport in the New York metropolitan region, by passenger volume and cargo volume. The Central Terminal Area contains five individual airline passenger terminals. The terminals are independently operated (some directly by airlines and some by private terminal operators) under leases with the Port Authority.

In 2017 the Board of Commissioners of the Port Authority adopted plans for comprehensive improvements to the Airport, particularly in the Central Terminal Area, where certain existing passenger terminals are reaching the end of their useful lives. The Airport-wide master plan provides for certain new state-of-the-art passenger facilities with a focus on customer-oriented, sustainable, and technologically advanced operations. For a description of the Airport, including the redevelopment plan and status thereof, see Section 2 “AIRPORT FACILITIES AND TERMINAL REDEVELOPMENT PROGRAM” in the Report of the Airport Consultant appended hereto as APPENDIX B-1.

### **The Basic Lease**

The Port Authority operates the Airport under a lease agreement, entered into in 1947, which was amended and restated in 2004, and further amended in 2021 (as so amended, the “Basic Lease”), pursuant to which the land on which the Airport is located, among other property is leased by the City of New York (the “City”) to the Port Authority. The term of the Basic Lease is currently scheduled to expire on December 31, 2060. The Basic Lease provides the Port Authority with rights for the use, occupancy and control of

both the Airport and LaGuardia Airport (“LaGuardia”), in exchange for annual rents payable to the City based on the Port Authority’s annual gross revenue from both facilities, subject to a minimum guaranteed amount each year.

Subject to certain procedural requirements, including notice to the Port Authority, the City is entitled to seek a termination of the Basic Lease prior to its stated expiration date, resulting in the loss of the Port Authority’s rights with respect to the Airport, if the Port Authority fails to meet its payment or other various obligations under the Basic Lease. An early termination of the Basic Lease for any reason while the Lease Agreement remains in effect would also result in a termination of the Lease Agreement.

For additional information regarding the Basic Lease, see Section 1.2.2 “The Port Authority Airport Leases with the City of New York” in the Report of the Airport Consultant appended hereto as APPENDIX B-1.

Neither the Borrower, the City, or the Port Authority make any representations or warranties concerning the status of the Basic Lease. Further, no assurance can be provided that the Basic Lease will remain in effect during the full term of the Lease Agreement or the Series 2024 Bonds.

### **Air Service Area; Passenger and Air Traffic**

The Airport draws the majority of its origin and destination passenger traffic (i.e., passengers who either begin or end their trips at the Airport), from a geographical area comprised of the New York-Newark, NY-NJ-CT-PA Combined Statistical Area (as defined by the U.S. Department of Commerce – Economics and Statistics Administration U.S. Census Bureau) (the “Air Service Area”). Connecting traffic uses the Airport to reach another destination. In 2023, the Airport served over 62.5 million passengers, including origin and destination and connecting traffic. For additional information regarding the Air Service Area and passenger and air traffic, see Section 4 “PASSENGER DEMAND AND AIR SERVICE ANALYSIS” in the Report of the Airport Consultant appended hereto as APPENDIX B-1 as well as the Report of the Airline Traffic Forecast Consultant appended hereto as APPENDIX B-2.

## **PART 9 – PROJECT PARTICIPANTS**

### **The Issuer**

The Issuer was caused to be created in October 2015 under Section 1411 of the New York Not-For-Profit Corporation Law (the “NFPC Law”) by the New York Job Development Authority (“JDA”) pursuant to its authority under the New York Public Authorities Law and the NFPC Law. The Issuer had its organizational meeting on November 3, 2015. The Issuer is not a subsidiary or agent of the JDA for any purpose under the laws of New York.

The Issuer has all powers conferred upon a not-for-profit corporation by the NFPC Law. However, in fulfilling its purpose, the Issuer does not impose any liabilities or obligations upon JDA, the New York State Urban Development Corporation, doing business as Empire State Development or the Governor of the State of New York or the State of New York.

The Governor of the State of New York and JDA are the two members of the Issuer, each of which members appoints a designated number of Directors to the Board of the Issuer.

The Directors of the Issuer as of the date of this Official Statement are:

<u>Name</u>	<u>Affiliation</u>	<u>Appointed by</u>	<u>Term Expires</u>
George J. Haggerty	Haggerty Munz, PLLC	Governor	12/31/2016*
Andrew Kennedy	Senior Vice President, Ostroff Associates, Inc.	Governor	12/31/2017*
Anthony Dalessio	Deputy CFO and Controller of New York State Urban Development Corporation (d/b/a Empire State Development)	JDA	12/31/2024
Elizabeth Lusskin	Executive Vice President, Small Business & Technology Development of the New York State Urban Development Corporation (d/b/a Empire State Development)	JDA	12/31/2024

\*Holding over.

The Officers of the Issuer are:

<u>Name</u>	<u>Title</u>
Raymond Orlando	Chief Financial Officer
Matthew Bray	Treasurer
Joshua D. Bloodworth	Executive Vice President – Legal and General Counsel
Goldie Weixel	Deputy General Counsel
Deborah Royce	Secretary
Courtney Heed	Assistant Secretary

## **The Borrower**

### ***General Information Concerning the Borrower***

The Borrower is a Delaware limited liability company that was formed in February 2022 for the principal purpose of entering into the Lease Agreement and undertaking the Project and the Operations and Maintenance Work thereunder. The Borrower’s leasehold interest in the Premises under the Lease Agreement with the Port Authority constitutes its principal asset. The Borrower is a special purpose entity and does not anticipate engaging in any material operations other than the conduct of the Project, including the Operations and Maintenance Work.

### ***The Borrower’s Ownership Structure***

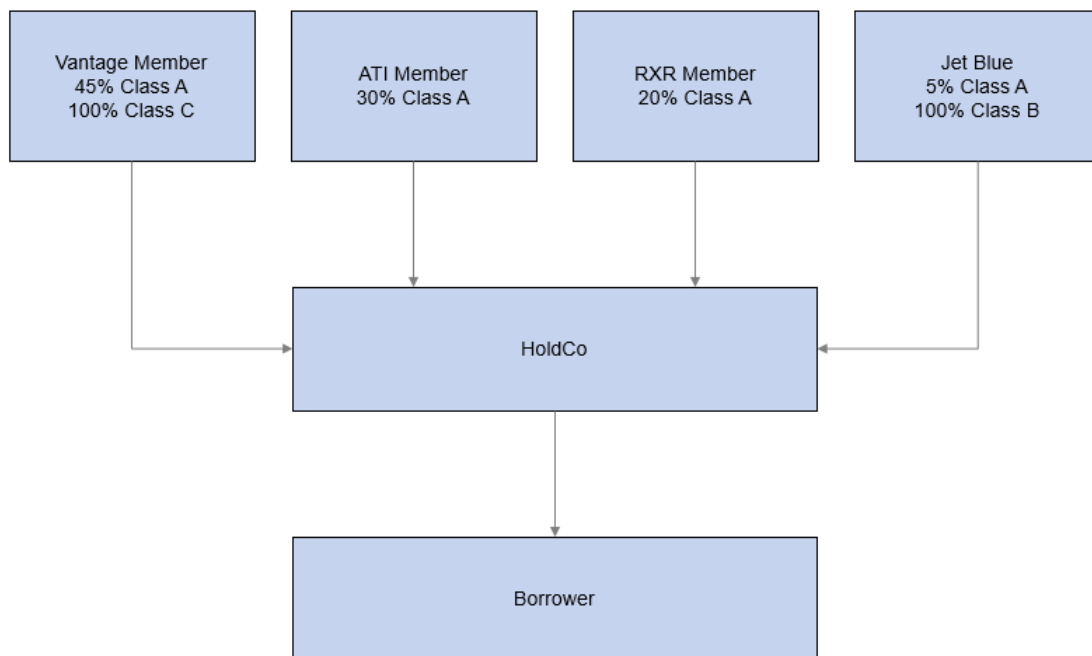

The Borrower’s sole member is HoldCo, a Delaware limited liability company that was formed in August 2022. HoldCo governs the affairs of, and the conduct of the business of, the Borrower, including the undertaking of all activities relating to the operation and management of the Premises.

The membership interests in HoldCo are comprised of “Class A Membership Interests,” the “Class B Membership Interest” and the “Class C Membership Interest.” The Class A Membership Interests are owned 45% by the Vantage Member, 30% by the ATI Member, 20% by the RXR Member, and 5% by JetBlue (each, in such capacity, a “Class A Member”), the Class B Membership Interest is owned by JetBlue

(in such capacity, the “Class B Member”) and the Class C Membership Interest is owned by the Vantage Member (in such capacity, the “Class C Member” and, together with the Class A Member and the Class B Member, the “Holdco Members”). The Vantage Member will only be entitled to retain its Class C Membership Interest if and for so long as it continues to hold at least 30% of the Class A Membership Interests. The Vantage Member may not transfer the Class C Membership Interest to any person that is not an affiliate of the Vantage Member.

Each Class A Member, in its capacity as such, is entitled to designate one director (each such Director, a “Class A Director”) to the board of directors of HoldCo (the “HoldCo Board”) for each 10% of Class A Membership Interests held by such Class A Member, it being understood, for the avoidance of doubt, that (i) a Class A Member who holds less than a 10% Class A Membership Interests shall not be entitled to designate any Class A Directors and (ii) a Class A Member who holds an incremental Class A Membership Interests of less than 10% shall not be entitled to appoint an additional Class A Director in respect of such incremental Class A Ownership Percentage. The Class B Member and Class C Member, each in their capacity as such, are each entitled to designate one director (as applicable, the “Class B Director” or “Class C Director” and, together with the Class A Directors, the “Directors”). The chair of the HoldCo Board (the “Chair”), at any time, shall be the Class A Director appointed as Chair by the Class A Member with the greatest Class A Membership Interests at such time. The Chair is currently George Casey.

The Borrower’s ownership structure described herein is represented in the corporate structure chart below:

See section 1.1 “JFK MILLENNIUM PARTNERS” in the Report of the Airport Consultant appended hereto as APPENDIX B-1.

***The Borrower’s Governance Structure***

Given the Borrower’s ownership structure described above, the Borrower’s governance and management is governed and determined by (i) the Limited Liability Company Operating Agreement of

HoldCo, dated as of the Original Closing Date (the “HoldCo LLC Agreement”) and (ii) the Limited Liability Company Agreement of Borrower, dated as of the Original Closing Date (the “Borrower LLC Agreement”).

Pursuant to the HoldCo LLC Agreement and the Borrower LLC Agreement, (i) the Borrower is managed by HoldCo as its sole member, and (ii) the HoldCo Members appoint the Directors of the HoldCo Board. The current number of Class A Directors of HoldCo is nine. Each Class A Member that owns at least 10% of the Class A Membership Interests has a right to appoint a certain number of Class A Directors in accordance with its percentage of ownership in HoldCo. Under the current ownership structure, (i) the Vantage Member has the right to appoint four Class A Directors, including the Chair, and the Class C Director, (ii) the ATI Member has the right to appoint three Class A Directors, (iii) the RXR Member has the right to appoint two Class A Directors, and (iv) JetBlue has the right to appoint the Class B Director.

The HoldCo Board has caused the Borrower to appoint the Chief Executive Officer, Chief Financial Officer, and other officers and staff of the Borrower as described in greater detail under the subcaption “*The Borrower’s Management Team*” below.

Under the HoldCo LLC Agreement, Directors that are nominated by an Equity Member are prohibited from voting on certain matters that present a conflict of interest.

Except for “Special Board Matters” and “Member Reserved Matters” (each as defined below), matters required to be approved by the HoldCo Board are initially required to be approved by (i) Class A Directors representing at least 40% of the Class A voting power and (ii) the Class C Director. If the Vantage Member ceases to hold at least 30% of the Class A Membership Interests, such matters will be subject to approval by Class A Directors representing at least 50% of the Class A voting power.

Certain governance and business matters (“Special Board Matters”) are subject to specific board approval requirements. For example:

- Certain material governance and business matters involving HoldCo and the Borrower require the unanimous approval of the Class A Directors. Such matters include without limitation (i) entering into, terminating or making amendments (other than de minimis amendments) to certain project contracts, (ii) entering into, terminating or making amendments (other than non-material, de minimis amendments) to the Borrower’s financing documents, (iii) incurring any indebtedness that is not otherwise permitted under the Borrower’s financing arrangements, (iv) making any material change to the Borrower’s insurance program and (v) subject to obtaining the approval of the Class B Director as described below, selling or acquiring any material assets except in the ordinary course of business or in accordance with an approved budget.
- Other governance and business matters relating to HoldCo and the Borrower are subject to the approval by Class A Directors representing 82.5% of the Class A voting power. Such matters include without limitation (i) making amendments (other than de minimis amendments) to certain commercial contracts, (ii) approving or amending the Borrower’s annual budget and (iii) subject to obtaining the approval of the Class B Director in certain circumstances, commencing, settling or making strategic decisions with respect to material legal proceedings.
- In addition to being subject to the approval of the Class A Directors, certain governance and business matters relating to HoldCo and the Borrower are subject to the approval of the Class B Director, including without limitation (i) selling or acquiring any material assets except in the ordinary course of business or in accordance with an approved budget, (ii) settling or surrendering

certain legal actions, including those which involve reputational risks, and (iii) entering, terminating or making any amendments (other than de minimis amendments) to any janitorial or security contracts.

Under the HoldCo LLC Agreement, certain actions (“Member-Reserved Matters”) can only be taken with the unanimous approval of each Class A Member, including without limitation (i) voluntarily winding up, liquidating or dissolving the business, (ii) declaring bankruptcy, (iii) acquiring any equity securities of the Borrower, (iv) entering into a new line of business or (v) amending HoldCo’s distribution policy.

### ***Restrictions on Transfers***

No HoldCo Member (in this instance, the “Transferor”) will be permitted to transfer all or any part of its direct Membership Interest to any other person (a “Transferee”) unless: (i) the proposed transfer is permitted pursuant to the terms of, and will not result in a breach of, certain project or financing documents; (ii) the proposed transfer will not have any adverse tax consequences on HoldCo or the other HoldCo Members, including that the proposed transfer will not cause HoldCo to be treated as a “publicly traded partnership” within the meaning of Section 7704 of the Code; (iii) if the Transferee is not already a HoldCo Member, the Transferee executes and delivers a joinder agreement; (iv) the proposed Transfer would not violate any U.S. federal or state securities laws or result in HoldCo or any HoldCo Member having to register under the Securities Act of 1933, as amended, the Securities and Exchange Act of 1934, as amended, the Investment Company Act of 1940, as amended, or any other U.S. federal or state securities laws; and (v) in the case of the Class B Membership Interest and the Class C Membership Interest, the Transferor has Transferred the entire Class B Membership Interest or Class C Membership Interest, as applicable, to the Transferee.

### ***The Borrower’s Management Team***

The Borrower’s governance structure leverages the Equity Members and their affiliates’ strength in airport management, development and investment. The Borrower is governed by the eleven-person HoldCo Board, with four Class A Directors and the Class C Director appointed by the Vantage Member, three Class A Directors appointed by the ATI member, two Class A Directors appointed by the RXR Member and the Class B Director appointed by JetBlue. Each member of the HoldCo Board is a senior executive with a wealth of experience that is expected to support the success of the Project and the operation of the Premises. The HoldCo Board focuses on creating value by leveraging their firms’ experience to ensure that the collective strength of all partners is focused on successful delivery by the management team below:

The Borrower’s current management team consists of six executives, all of whom are employees of the Manager but seconded to the Borrower. For more information, see “PART 13 – OPERATION AND MANAGEMENT OF THE PROJECT.”

The team is led by:

*Steve Thody – Chief Executive Officer*

Steve Thody has served as the Borrower’s Chief Executive Officer since April 2024. Mr. Thody is responsible for all facets of operations and management of Terminal 7 and Terminal 6, including terminal operations, airline relations, commercial management, and guest experience. He leads a dynamic project team of airport development and operations professionals to focus on project delivery and operational

performance, as well as manages shareholders and stakeholder relations, and engages in critical local community and Minority and Women Owned Business Enterprise (MWBE) outreach in support of the redevelopment.

From 2022 until his appointment, he served as the Borrower's Chief Operating Officer. From 2019 until 2022, Mr. Thody served as Project Director, Strategic Initiatives, for Vantage. In that role he oversaw initiatives, products, and partnerships to optimize terminal operational and revenue opportunities at Vantage's airports, with a particular focus on progressing the Project toward its initial financial close and negotiation and execution of the Lease Agreement with the Port Authority. In that position, Mr. Thody also assisted operations at LaGuardia Airport Terminal B, where he led the development of the team's Digital Assistant solution, and spearheaded Vantage's involvement in an industry-wide study of the impact of COVID-19 on the aviation industry, in partnership with the Harvard T.H. Chan School of Public Health and Airlines for America.

Mr. Thody has more than 20 years' worth of senior leadership experience in aviation, spanning global cargo operations, network airlines, airport management, investment, development, finance, and operations. Prior to joining Vantage, he held progressively senior roles at British Airways, leading to Vice President of Financial Planning and Analysis, was responsible for the North America, Caribbean, Asia, and the Pacific regions, and was the General Manager of British Airways' Terminal 7 operations at the Airport.

Mr. Thody holds a Bachelor's Degree in Accounting from the University of Hertfordshire and is a Chartered Accountant.

*Karen Ali – Chief Operating Officer*

Karen Ali has served as the Chief Operating Officer of the Borrower since July 2024. In her role, Ms. Ali oversees terminal operations, customer experience, budget and capital projects, risk management, and people leadership. She also serves as a critical liaison during the Terminal 6 construction phase, collaborating with capital development and construction teams to ensure a smooth transition from old to new facilities, including coordination, testing, commissioning, and implementation.

An accomplished senior professional, Ms. Ali has nearly 20 years of experience in operations management, project leadership, and business transformation across a range of sectors, including aviation. From 2022, until joining the Borrower, Ms. Ali served as the chief operating officer of Avi & Co., a luxury watch retailer, where she led ecommerce, logistics, sales, and marketing strategies. From 2020 until 2022, Ms. Ali served as Director of Operations for Lynx Air, where she implemented and oversaw all systems, processes, workflows and procedures during the airline's start up phase. Prior to that, Mr. Ali held progressively senior management positions over a decade-long period at WestJet, including as Regional Operations Manager for the airline's international operations including the New York airports.

Ms. Ali holds a Bachelor of Science in Psychology from the University of Alberta.

*Michael Sibilila – Chief Financial Officer*

Michael Sibilila has served as the Chief Financial Officer of the Borrower since 2022. As the Chief Financial Officer, Mr. Sibilila is responsible for managing all the Borrower's accounting and corporate finance activities and operations. Beginning in 2016 and prior to joining the Borrower in 2022, Mr. Sibilila served as the chief financial officer of LaGuardia Gateway Partners in their redevelopment of LaGuardia Airport's Terminal B.

Mr. Sibilía has more than 30 years of specialized aviation, construction, financing, and negotiations expertise. Prior to LaGuardia Gateway Partners, Mr. Sibilía served for 20 years as the chief financial officer at JFK International Airport Terminal LLC, the operator of Terminal 4 at the Airport, the first public-private partnership in U.S. aviation, leading the finance team through the initial terminal construction and two later expansions.

Earlier in his career, Mr. Sibilía worked as an executive in the apparel industry providing finance expertise throughout the United States and Asia and supporting 60 retail locations in 35 states as well as offices in Hong Kong, New Delhi, and Negros, Philippines. He also worked in real estate development and at global accounting firms.

Mr. Sibilía holds a Bachelor of Science in accounting from LaSalle University in Philadelphia, Pennsylvania and is a Certified Public Accountant.

*Folasade (Sade) Olanipekun-Lewis – Vice President, Operating & Community Partnerships*

Sade Olanipekun-Lewis has been Vice President, Operating & Community Partnerships of the Borrower since 2022. Ms. Olanipekun-Lewis leads the development and implementation of all community and organizational partnerships, with a focus on local community and MWBE engagement in the development of Terminal 6.

Since January 2018 and prior to joining the Borrower, Ms. Olanipekun-Lewis served as Regional Director of Government and Airport Affairs for American Airlines directing, and coordinating all political, governmental, and community strategies to support the airline's local and national business goals. Prior to joining American Airlines, Ms. Olanipekun-Lewis served as Chief Administrative Officer at Philadelphia International Airport and held other executive leadership roles with the City of Philadelphia.

Representing Vantage Group's interest, Ms. Olanipekun-Lewis also serves on the board of LaGuardia Gateway Partners (LGP), a private manager and developer of the new award-winning, state-of-the-art LaGuardia Terminal B. She also serves on the board of directors of the Airport Minority Advisory Council (AMAC) Foundation, which works to advance minorities and women pursuing careers in the aviation industry through scholarships and educational programs.

Ms. Olanipekun-Lewis brings deep and varied experience in airline and airport management, infrastructure, and finance to her role.

Ms. Olanipekun-Lewis holds a Bachelor of Arts in Economics from the Graduate Center, City University of New York, CUNY BA Program, a Juris Doctor from Temple University Beasley School of Law and a Master of Government Administration from the University of Pennsylvania, Fels School of Government.

*Derek Thielmann – Project Executive, Design & Construction*

Derek Thielmann has served as the Borrower's Project Executive, Design & Construction since 2022. Mr. Thielmann is responsible for the overall management and oversight of the construction of the

Project and acts as the principal liaison between the operational and construction partners involved in the redevelopment of Terminal 6.

Since 2016 and prior to joining the Borrower, Mr. Thielmann served as Vantage’s Vice President, Design and Construction and was responsible for managing all design and construction work in connection with the redevelopment of LaGuardia Terminal B.

With over 25 years of experience in the development and delivery of complex aviation and transportation projects, Mr. Thielmann previously held engineering and project management roles at Vancouver International Airport, as well as the Lynden Pindling International Airport in the Bahamas, where he designed and delivered a \$410 million, three-phased terminal development.

Mr. Thielmann holds a Bachelor of Science in Civil Engineering and Masters in Geo-Environmental Engineering from the University of Alberta.

*Kenneth Schuhmacher – Chief Legal Officer*

Kenneth Schuhmacher has been the Borrower’s Chief Legal Officer and Corporate Secretary since 2022. Mr. Schuhmacher is responsible for managing all legal, compliance and corporate governance matters for the Borrower. From January 2019 until joining the Borrower, Mr. Schuhmacher served as General Counsel for LaGuardia Gateway Partners in connection with the redevelopment of LaGuardia Terminal B.

Mr. Schuhmacher has extensive legal and commercial experience in global transactional work through previous experience as a partner at two leading international law firms as well as through his role as Commercial Director and General Counsel for Skanska Infrastructure Development North America.

Mr. Schuhmacher holds a Bachelor of Arts in History from Dartmouth College, a Juris Doctor from University of Michigan Law School and a Master of Law from Queens’ College of the University of Cambridge.

***HoldCo’s Board***

Pursuant to the HoldCo LLC Agreement, as of the date of this Official Statement, the Directors of the HoldCo Board are the following:

<u>Name</u>	<u>Position</u>	<u>Audit &amp; Finance Committee</u>	<u>Human Resources Committee</u>	<u>Appointed by</u>
George Casey	Class A Director (Chair)			Vantage Member
Sami Teittinen	Class A Director	(Chair)		Vantage Member
Hari Rajan	Class A Director			Vantage Member
Andrew Mazze	Class A Director			Vantage Member
David Cibrian	Class A Director		(Chair)	ATI Member
Alex Black	Class A Director	*		ATI Member
Sarah Wu	Class A Director	*		ATI Member
Scott Rechler	Class A Director		*	RXR Member
Jonathan Atkeson	Class A Director	*		RXR Member
Justin Ginsburgh	Class B Director			JetBlue
Stewart Steeves	Class C Director		*	Vantage Member

*George Casey – Class A Director (Chair)*

George Casey serves as a Class A Director appointed by the Vantage Member and Chair of the Board of Directors of Holdco. Mr. Casey is the Chief Executive Officer and chair of the board of directors of Vantage Group and is responsible for all aspects of Vantage’s corporate strategy, growth initiatives and global portfolio.

Over 40 years in the airport and aviation sector, Mr. Casey has been involved in capital planning and airport development, finance, operations, commercial management, mergers and acquisitions, and structuring and negotiating partnerships in almost every region of the world. He has participated in the analysis, assessment and review of more than 170 airports worldwide under different contractual and governance structures and overseen more than \$10 billion in airport financing in support of capital projects and acquisitions.

Working with key stakeholders, Mr. Casey has led nearly 22 successful airport transactions and chaired or served on 16 airport boards of directors worldwide. Mr. Casey is the former chair of the board of directors of LaGuardia Gateway Partners, which redeveloped and manages LaGuardia Airport’s Terminal B. Mr. Casey also serves on the board of directors for the Rick Hansen Foundation, to support inclusion for people with disabilities.

Before joining Vantage, Mr. Casey held executive positions with KPMG, PwC, and Airport Group International, where he collaborated with stakeholders to solve complex airport and transportation infrastructure challenges in jurisdictions around the world.

Mr. Casey holds a Bachelor of Science in Aeronautics with a minor in Business from San Jose State University.

*Sami Teittinen – Class A Director*

Sami Teittinen serves as a Class A Director appointed by the Vantage Member and as Chair of the Holdco Audit and Finance Committee. Mr. Teittinen is Vantage Group’s Chief Financial Officer, leading Vantage’s strategy, asset management, corporate development, mergers and acquisitions activity, and all aspects of corporate finance and risk management. Mr. Teittinen also serves as a Director and Audit and Finance Committee Chair for multiple airports and airport terminals across the United States and Caribbean.

Mr. Teittinen offers nearly 30 years of experience in the international aviation sector, including airlines, airline support services, fixed based operations, and airports. Prior to joining Vantage in 2017, Mr. Teittinen served as President and CEO of Silver Airways Corp., a FAA part 121 air carrier, where he was responsible for creating, leading, and implementing the company’s turnaround strategy. Mr. Teittinen also served as CFO for various business units at BBA Aviation PLC (now Signature Aviation), a publicly traded British multinational aviation services company.

Mr. Teittinen holds a Master of Business Administration from the University of Central Florida and is a graduate of the Finnish Defense Forces Reconnaissance School.

*Hari Rajan – Class A Director*

Hari Rajan serves as a Class A Director appointed by the Vantage Member. Mr. Rajan is the Managing Partner of Investcorp Corsair Infrastructure Partners and is the Lead Director on the board of directors of Vantage Group. Mr. Rajan also serves as a board member for other Investcorp Corsair

companies, including DP World Australia, Itinere Infraestructuras, and Kelda Holdings. He also serves on the board of Kyobo Life Insurance Company.

Prior to the establishment of Investcorp Corsair, Mr. Rajan served as the head of its predecessor, Corsair Infrastructure, and was closely involved in all aspects of the creation and growth of that business. From 1999 to 2001, concurrent with his responsibilities at Corsair, Mr. Rajan was a member of the Emerging Markets Financial Institutions Group at J.P. Morgan Chase & Co., where he participated in a number of transactions involving financial services companies across multiple geographies.

Mr. Rajan holds a Bachelor of Arts in Economics and Applied Mathematics from Yale University and a Master of Business Administration with honors from the Wharton School of the University of Pennsylvania.

*Andrew Mazze – Class A Director*

Andrew Mazze serves as a Class A Director appointed by the Vantage Member. Mr. Mazze is a Managing Director on the Infrastructure Investment Team at Manulife Investment Management, where he is responsible for originating, executing and managing equity investments in infrastructure assets. Over the course of his career, Mr. Mazze has led transactions across the transportation, renewable energy, power generation and utility sub-sectors. Mr. Mazze currently sits on the board of directors for multiple portfolio companies including a P3 tolled tunnel project and a utility privatization business.

Manulife Investment Management is the brand for the global wealth and asset management segment of Manulife Financial Corporation, which subsidiaries include John Hancock Life Insurance Company (U.S.A.). The Manulife Infrastructure Team manages more than \$17 billion of investments across asset class on behalf of third-party investors and the Manulife balance sheet.

Mr. Mazze holds a Bachelor of Science in Finance from Bentley University.

*David Cibrian – Class A Director*

David Cibrian serves as a Class A Director appointed by the ATI Member and as Chair of the Holdco Human Resources Committee. Mr. Cibrian is the Managing Partner and a Co-Founder of American Triple I Holdings and in that role he is responsible for developing and directing overall business strategies; building trusted relationships with asset and investor partners; leading high-quality investment decisions; and enforcing adherence to compliance, legal, and operating guidelines and policies.

Mr. Cibrian was formerly a Managing Director with Brevet Capital, a New York City-based investment firm founded in 1998. Among other responsibilities, he headed Brevet's firm-wide Government Financing Programs. He is experienced in various facets of fund management, including originations, underwriting/structuring, and asset management.

Mr. Cibrian has served in a variety of roles during his career – lawyer, accountant, corporate executive, and investment professional. Mr. Cibrian was formerly a CPA with Ernst & Young, Los Angeles and was a practicing international and corporate attorney for 25 years, including his experience in public finance at O'Melveny & Myers, Los Angeles. He was also a Senior Advisor to Civitas Capital Group, an alternative investment firm.

Mr. Cibrian is a former member of the Texas Finance Commission and the Texas Credit Union Commission.

Mr. Cibrian holds a Juris Doctor with honors from Georgetown Law School and a Bachelor of Science in Accounting with honors from Loyola Marymount University.

*Alex Black – Class A Director*

Alex Black serves as a Class A Director appointed by the ATI Member and as a member of the Holdco Audit and Finance Committee. Mr. Black is a Senior Advisor and Investment Committee member of American Triple I, LLC. He brings more than a decade of experience in infrastructure investment, development, and management.

Mr. Black previously served as Head of Portfolio Management at Alinda Capital Partners, where he supervised the firm's fund vehicles and was a member of the firm's Investment Committee. During his ten years at the firm, Alinda managed a peak of \$7.8 billion in equity commitments to a diverse set of infrastructure projects. Among other responsibilities, Mr. Black served as the lead partner overseeing selected portfolio companies across various asset classes. He was also responsible for oversight of the firm's investment in Heathrow Airport. Mr. Black also has operational experience developing responsible investment programs and has been a noted speaker on panels discussing issues facing infrastructure companies. Mr. Black aids American Triple I in a variety of matters including asset operational due diligence, and building credible, risk-adjusted strategic plans for our projects.

Mr. Black holds a Bachelor of Science with honors in Engineering from Exeter University and is also a Chartered Engineer (CEng) and a Chartered Accountant (ACA), both designated in the United Kingdom.

*Sarah Wu – Class A Director*

Sarah Wu serves as a Class A Director appointed by the ATI Member and as a member of the Holdco Audit and Finance Committee. Ms. Wu is a Managing Director, Head of Asset Management and an Investment Committee member at American Triple I, LLC. Ms. Wu brings over 20 years of infrastructure investment and asset management experience to the team. Most recently, she was Head of Investments for CCA Construction, a global conglomerate in infrastructure development where she spearheaded the development of a value-add, infrastructure investment program for the Americas.

Ms. Wu previously spent eight years in the Global Real Assets Division of JPMorgan Asset Management, including serving as Head of Asset Management for a core, infrastructure equity strategy that included a diverse group of portfolio companies in the US and UK. Ms. Wu also co-founded a core infrastructure debt strategy at JPMorgan following the Global Financial Crisis. Prior to JPMorgan, Ms. Wu spent 10 years at Credit Suisse on the Global Project Finance team responsible for non-recourse lending to infrastructure companies in the transport, power, energy, and shipping sectors in OECD and emerging markets.

Ms. Wu holds a Master's degree in Urban and Regional Planning from Columbia University, and a Bachelor's degree in Town and Country Planning from Manchester University.

*Scott Rechler – Class A Director*

Scott Rechler serves as a Class A Director appointed by the RXR Member and as a member of the Holdco Human Resources Committee. Mr. Rechler is the Chief Executive Officer and Chairman of RXR, an innovative investor, developer, and place-maker committed to applying a customer and community-centered approach to all aspects of its business.

Before starting RXR, Mr. Rechler served as the Chair and CEO of Reckson Associates, which he helped take public in 1995. RXR was founded in 2007, on the day after Mr. Rechler and his partners sold Reckson Associates for over \$6 billion, generating a 700% return to Reckson's investors. Since its founding, RXR has raised over \$10 billion of private equity through a series of funds and separate account vehicles and built an over 500-person, fully-integrated team of professionals with expertise in operations, construction and development, investment management, and more.

RXR manages over 30 million square feet of commercial properties with a gross asset value of \$21.2 billion. RXR also has a multi-family residential portfolio of 8,000 units under operation or development, an over \$4 billion new terminal under construction at JFK International Airport, and an expanding national portfolio and development pipeline in some of the fastest-growing markets in the country, including Phoenix, Denver, Raleigh, and Tampa.

Mr. Rechler also served on the Board of American Campus Communities (NASDAQ:ACC) after Reckson took a controlling interest in the company in 1998 and later took the company public in 2004. ACC would grow to become the largest student housing company in the United States and was recently acquired by Blackstone for \$13 billion in 2022.

Mr. Rechler has held numerous leadership positions at various levels of government. In December 2021, Mr. Rechler was elected to a 3-year term on the Board of Directors of the Federal Reserve Bank of New York. From 2011 to 2016, Mr. Rechler served on the Board of Commissioners as Vice Chairman for the Port Authority of New York and New Jersey. He later served on the Board of the New York Metropolitan Transportation Authority (MTA) from 2017 to 2019.

From 2017 to 2023, Mr. Rechler served as the Chair of the Regional Plan Association (RPA), a not-for-profit organization focused on the quality of life and the economic competitiveness of the NY Tri-State metropolitan area.

Mr. Rechler also serves as trustee and Vice Chair of the National September 11 Memorial and Museum at the World Trade Center, a member of the Real Estate Board of New York (REBNY) and the national organization, the Real Estate Roundtable (RER), Chair of The Feinstein Institute for Medical Research and a member of the Board of Trustees at Northwell Health, the Hospital for Special Surgery, NYU and a member of the NYU Real Estate Institute Advisory Committee.

Mr. Rechler is a graduate of Clark University and the New York University Schack Institute.

*Jonathan Atkeson – Class A Director*

Jonathan Atkeson serves as a Class A Director appointed by the RXR Member and as a member of the Holdco Audit and Finance Committee. Mr. Atkeson is a Managing Director in the Fortress Credit Funds since 2016 focusing on investments in the transportation and infrastructure sectors.

Mr. Atkeson joined Fortress in 2003 and prior to joining the credit team, Mr. Atkeson spent 13 years in the private equity business most recently as the Chief Operating Officer and Chief Financial Officer of Fortress Transportation and Infrastructure Investors LLC ("FTAI"). Prior to his role at FTAI, Mr. Atkeson focused on investments in the transportation and infrastructure sectors including investments in aircraft, shipping containers, intermodal chassis, and energy distribution.

Prior to joining Fortress in 2003, Mr. Atkeson worked as vice president in the private equity group at Whitney and Co., LLC and prior to that was a member of the mergers and acquisitions group at Credit Suisse First Boston.

Mr. Atkeson holds a Bachelor of Science in Public Health in Environmental Science and Engineering from the University of North Carolina at Chapel Hill and a Juris Doctor from Yale Law School.

*Justin Ginsburgh – Class B Director*

Justin Ginsburgh serves as the Class B Director appointed by JetBlue. Mr. Ginsburgh is the Managing Director Infrastructure, Properties & Development at JetBlue. He previously was Director of JFK Infrastructure Strategy & Development at JetBlue from 2017-2020, working on the selection of the Borrower as the developer of Terminal 6, the lease for Terminal 6 with the Port Authority, and initial design development.

Mr. Ginsburgh previously was at Amazon where he led the Last-Mile Transportation Sustainability team. Earlier in his career, Mr. Ginsburgh was the Co-Founded and General Manager of Citi Bike, the largest bike share system in the United States. He also brings a variety of other valuable experience from his time working for New York City's and State's economic development agencies and at Goldman Sachs Urban Investment Group.

Mr. Ginsburgh also serves as Treasurer and a board member of the Friends of Governors Island and as a board member for Bridging Voice, an organization that provides people with ALS access to assistive communication devices.

Mr. Ginsburgh holds a Bachelor of Arts with honors in History and Economics from Northwestern University and a Master of Business Administration from Harvard Business School, where he graduated as a Baker Scholar.

*Stewart Steves – Class C Director*

Stewart Steeves serves as the Class C Director appointed by the Vantage Member and as a member of the Holdco Human Resources Committee. Mr. Steeves is the Chief Operating Officer of Vantage Group and is responsible for planning, development, and management of Vantage Group's network of airports and related operations and support of business development initiatives.

Mr. Steeves has overseen almost \$10 billion in airport redevelopment projects across North America and the Caribbean. He sits on the board of directors of LaGuardia Gateway Partners, MJB Airports Limited, and Tradeport International Corporation.

Since joining Vantage in 2003, Mr. Steeves has held several executive positions across the network. As CEO of LaGuardia Gateway Partners, Mr. Steeves led the LaGuardia Terminal B redevelopment project through a multi-year competitive procurement, financing, complex construction phases, and operations and management. He also served as Vantage's CFO and CEO of Vantage's Nassau Airport Development Company, where he led a three-phase, \$410 million redevelopment of Lynden Pindling International Airport in The Bahamas, the largest infrastructure project in Bahamian history.

Prior to joining Vantage, Mr. Steeves held roles in corporate finance at Vancouver Airport Authority, HSBC in Vancouver, and construction project management for Turner Construction in Chicago.

Mr. Steeves holds a Bachelor of Applied Science in Civil Engineering from the University of Toronto and a Master of Business Administration from the Ivey School of Business at the University of Western Ontario. Mr. Steeves is also a Professional Engineer, Chartered Financial Analyst, and licensed pilot.

## **The Equity Members**

### ***Corsair-Vantage Airport Fund Aggregator, L.P.***

The Vantage Member is a Delaware limited partnership indirectly managed by Investcorp Corsair Infrastructure Partners, L.P. (“ICIP”). The general partner of the Vantage Member is Corsair-Vantage Airport Management, L.P., a Delaware limited partnership (“Corsair-Vantage Management”). In addition to indirectly being the investment manager and controlling the general partner of the Vantage Member, ICIP is also the investment manager and indirectly controls the general partner of Corsair-Vantage Investment Partners, L.P. (“Corsair-Vantage Investment Partners”). Corsair-Vantage Investment Partners owns 100% of the equity interests in Vantage.

Based in Vancouver, British Columbia, Canada, Vantage currently manages a portfolio of 13 airports and transportation centers around the world. Vantage’s locations served over 80 million passengers in 2023. As part of integrated design-build-operate teams, Vantage has completed over \$7.2 billion in capital projects with another \$4.2 billion underway, including serving as lead developer, equity investor and terminal manager (including construction management) of LaGuardia Terminal B, one of the largest transportation Public-Private Partnership projects in the United States.

In addition to its success with LaGuardia Terminal B, since its founding in 1994, Vantage has successfully exported its demonstrated expertise in airport and terminal operations and management from Vancouver to its operations in Chile, Cyprus, the United Kingdom and elsewhere around the globe. In Cyprus, Vantage led the consortium that successfully bid to develop, finance, build, and operate the two main airports, Larnaka and Pafos International Airports. Vantage’s experience in operational readiness, cultural awareness, government relations, and project financing allowed both capital projects, which were the largest construction contracts to ever be undertaken in Cyprus, to be completed on time and on budget.

Vantage has successfully managed significant and complex airport construction projects in widely different environments and operated several airports during construction, including construction coordination, operational readiness and transition, and transitions from existing terminals to new terminals in Nassau (Bahamas), Larnaka and Pafos (Cyprus) and Santiago (Chile). During the successful transition of 20 airports from public to private operation, Vantage has developed a proprietary transition roadmap document that is flexible for adaptation to the Premises.

### ***American Triple I Holdings, LLC***

The ATI Member is controlled by American Triple I Holdings, LLC (“ATI”). ATI is an investor, owner, developer, and manager of infrastructure assets and infrastructure-focused companies. The firm invests in the transportation, digital, and social infrastructure sectors. ATI is committed to serving its investor partners and communities by deploying capital into infrastructure projects and businesses throughout the United States and Canada. ATI’s professionals have years of infrastructure investment and asset management experience and generally target value-add, lower middle market opportunities that aim to spur economic development and larger opportunities where their experience may bring unique value. ATI is a minority and woman-owned, managed, and controlled firm. It seeks to operate in a manner that

reflects the same diversity of constituencies and deliver positive economic results for its investors and to the communities in which its investments are located.

### ***RXR Realty, LLC***

The RXR Member is controlled by RXR Realty, LLC (“RXR”). RXR is a leading national real estate operating and development company headquartered in New York, NY.

RXR comprises a 450+ person, vertically integrated operating and development company with deep expertise in public-private developments and a wide array of value creation activities. These include ground-up real estate development, infrastructure and industrial development, uncovering value in underperforming properties, incorporating cutting edge technologies, and value-added lending. The RXR platform manages investments with an aggregate gross asset value of approximately \$17.1 billion, comprising approximately 30.5 million square feet of commercial properties and 12,000 multi-family and for-sale units under operation or development in the United States.

With over \$1.1 billion of active construction underway in the New York metro area, the RXR team brings deep knowledge of local trends, hiring, and the construction market. RXR has extensive experience with public-private development throughout the New York metro area, including major redevelopment projects such as 175 Park Avenue, a two million+ square foot supertall commercial tower adjacent to Grand Central, and Pier 57, the redevelopment of a 400,000 square foot historic NYC pier anchored by Google.

RXR also serves as the designated partner to local municipalities on downtown redevelopment initiatives, such as Glen Cove in Long Island and New Rochelle in Westchester. Led by senior executives with substantial government experience, RXR has a proven track record of successfully collaborating with public sector counterparties on large-scale development projects, including with key employees at the Port Authority. Scott Rechler, CEO of RXR, formerly served as the Vice Chairman of the Board of Commissioners of the Port Authority.

### ***JetBlue Airways***

JetBlue is proud to be New York’s Hometown Airline® and the only major airline headquartered in New York. JetBlue’s differentiated product and culture combined with its competitive cost structure enables JetBlue to compete effectively in high-value geographies and serve customers to over 100 destinations. Its flagship Terminal 5 has been celebrated for its customer-friendly design and facilities. As of the third quarter of 2024, JetBlue operates 166 average daily departures from the Airport to 81 destinations with plans to increase to 184 daily departures.

### **The D&C Contractor**

The Borrower has contracted with the D&C Contractor, Hunt Construction Group, Inc. (“AECOM Hunt”) to design and construct the Project. The D&C Contractor’s payment and performance obligations are guaranteed by its parent company, AECOM (noted below as the “D&C Guarantor”). The D&C Contractor has developed and is implementing a complete design-build strategy for the Project.

The D&C Contractor has extensive experience in the successful delivery of challenging, fast-tracked aviation projects across the United States. The D&C Contractor, as part of AECOM’s Construction Management group, is ranked fourth largest construction manager at risk firm by revenue (ENR) in the United States, with revenues of \$5.7B in 2021, and has an enterprise bonding capacity of \$10 billion. The D&C Contractor has successfully completed significant aviation projects including Louis Armstrong New

Orleans International Airport, Phoenix Sky Harbor International Airport T3 Modernization, Indianapolis International Airport, Denver International Airport South Terminal Development, Hartsfield–Jackson Atlanta International Airport Maynard B. Jackson International Terminal, and Detroit Metropolitan Wayne County Airport Edward H. McNamara Midfield Terminal. The D&C Contractor brings to the Project extensive experience in the delivery of aviation facilities, coupled with world-class construction experience and a strong familiarity with the design and construction requirements associated with LEED® certified buildings.

The D&C Contractor has teamed up with a design team consisting of Corgan Associates Architects, PC as well as the D&C Contractor’s sister design company, AECOM-DCSA. Corgan is acting as the lead designer-architect of record for Terminal 6 and AECOM-DCSA is acting as the engineer of record for the site, civil and airside design. Both members of the design team have a significant presence in the United States and extensive experience in signature aviation projects.

### **The D&C Guarantor**

AECOM (the “D&C Guarantor”) has provided a separate guaranty in favor of the Borrower, which guarantees all of the Design- Builder’s obligations to the Borrower under the D&C Contract.

The D&C Guarantor is one of the world’s leading infrastructure firms, which provides both design and construction management services to its clients. AECOM is a publicly traded company and, as of the date of this Official Statement, additional information about AECOM is publicly available.

### **The Manager**

The Borrower has entered into the Management Services Agreement with the Manager, under which the Manager provides the Borrower with certain services and support in connection with the Borrower’s responsibilities to perform the Operations and Maintenance Work under the Lease Agreement.

The Manager, a wholly-owned indirect subsidiary of Vantage, serves as the Manager for the Project. The Manager leverages Vantage’s experience as a world-class operator with the goal of delivering best-in-class performance. The Manager has seconded to the Borrower executive and other personnel drawn from the Vantage network. The Project benefits from Vantage’s experience in running airports in vastly different environments, the transition of 20 airports to private operation, and the delivery of over \$7.2 billion in capital improvements over the past 25+ years. The Manager has subcontracted certain services to the Manager Subcontractor as set forth in “PART 13 – OPERATION AND MANAGEMENT OF THE PROJECT.”

### **The Manager Guarantor**

Vantage Airport Group (US) Ltd., a Delaware corporation, has provided a guarantee in favor of the Borrower, which guarantees all of the Manager’s obligations to the Borrower under the Management Services Agreement. Vantage Airport Group (US) Ltd. is a privately held company and, therefore, no summary financial data for Vantage Airport Group (US) Ltd. is provided.

## **PART 10 – THE LEASE AGREEMENT**

The following is a summary of selected provisions of the Lease Agreement and is not a full statement of the terms and conditions of such agreement. Accordingly, the following summary is qualified in its entirety by reference to the Lease Agreement and is subject to the full text of such agreement. Defined

terms used but not defined in this Part 10 shall have the meanings specified for such terms in APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT.”

As of the Original Closing Date, the Port Authority, as lessor, leased to the Borrower the Initial Premises, consisting of the Terminal 6 Parcel and the improvements thereon, and on December 1, 2022, the Port Authority leased to the Borrower the Terminal 7 Premises, consisting of the Terminal 7 Parcel and the improvements thereon, including Terminal 7, subject in each case to certain conditions. The Initial Premises and the Terminal 7 Premises, in each case to the extent subject to the Lease Agreement, are referred to herein as the “Premises.”

### **Principal Rights and Responsibilities of the Parties**

Pursuant to the Lease Agreement, the Port Authority leased the Premises to the Borrower, and the Borrower is obligated, among other things, to: (i) maintain and operate the Premises, and, (ii) undertake the D&C Work, including construction of Terminal 6, the Ground Transportation Center and the Off-Premises Facilities, all as further described herein, subject in each case to the terms and conditions of the Lease Agreement.

#### ***Use of Premises***

The Lease Agreement generally entitles the Borrower to use and operate the Premises as an airline passenger terminal and for related purposes. Specifically, the Lease Agreement entitles the Borrower to grant airlines and other airline users, retail concession operators and certain others the right to use space in the Premises, consistent with operation of the Premises as an airline passenger terminal and the terms of the Lease Agreement, in exchange for rentals, fees or other charges payable directly to the Borrower. The Borrower submitted and received the Port Authority’s approval for both a comprehensive terminal plan with respect to Terminal 6 and a comprehensive concessions plan with respect to Terminal 7 and Terminal 6. In addition to annual updates, the Borrower is required to submit for the Port Authority’s approval (x) an updated terminal plan at least 18 months prior to the projected Completion Date of Terminal 6, and (y) periodic updates to the concessions plan not less than quarterly and including the date that is at least 18 months prior to the projected Completion Date of Terminal 6. The comprehensive terminal plan is required to identify the principles and methodologies of the Borrower’s airline rates and charges structure and outline other matters relating to the airline users of Terminal 6. The comprehensive concessions plan is required to define the Borrower’s retail concessions program, including the types and designated locations of retail concessions throughout Terminal 6, rental structures, and similar matters. Each comprehensive terminal plan or comprehensive concessions plan remains in effect until its successor plan is approved.

Subject to the requirements of the comprehensive terminal plan and the comprehensive concessions plan, as then in effect, the Borrower is entitled to set the levels of all rates and charges for the use of Terminal 7 and Terminal 6, except for certain specific uses (which include, but are not limited to, advertising displays, cellphone and cellular technology, certain vending machines, concierge services, ground transportation services, on-Airport baggage carts, any development at the Ground Transportation Center, and any sponsorship and naming rights) that are reserved for control of the Port Authority (collectively, the “Reserved Uses”).

For purposes of this section, “Completion Date” means the date on which substantial completion of the entire D&C Work (i.e., completion of all D&C Work other than punch list items approved by the Port Authority and D&C Work specifically identified in the Baseline Schedule as extending beyond Substantial Completion of Phase 2) has been achieved.

### ***Design and Construction of the Project***

The Borrower is responsible for all D&C Work in accordance with the Lease Agreement. Under Section 2 of the Lease Agreement, the Borrower agrees to among other things, at its sole cost and expense (except as otherwise provided in the Lease Agreement), (x) design and construct Terminal 6 on the Premises and (y) design and/or construct all or a portion of the Off-Premises Facilities outside the Premises, all as set forth in the Lease Agreement and Project Documents and in accordance with Good Order Requirements, Applicable Law and Applicable Standards. The Borrower entered into the D&C Contract, under which the D&C Contractor is obligated to fulfill the Borrower's obligations under the Lease Agreement to design and construct the Project, except as expressly excluded in the D&C Contract. See "PART 11 – THE PROJECT," "PART 12 – THE D&C CONTRACT," APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Design and Construction by the Lessee" and APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT."

As further described in "PART 11 – THE PROJECT," the Project is expected to be completed in two phases. There are two steps to completion of each Phase: Substantial Completion and DBO. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Design and Construction by the Lessee – Completion of the Phase 1 D&C Work" and "– Completion of the Phase 2 D&C Work," and the related definitions in "EXHIBIT A – DEFINITIONS TO APPENDIX E SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT" for further information about the requirements for reaching Substantial Completion of Phase 1, DBO of the Phase 1 D&C Work, Substantial Completion of Phase 2, and DBO of the Phase 2 D&C Work.

If the Borrower fails to achieve DBO of the Phase 1 D&C Work by the date that is 30 calendar days following the Scheduled Phase 1 DBO Date, or to achieve DBO of the Phase 2 D&C Work by the date that is thirty calendar days following the Scheduled Phase 2 DBO Date (each a "Completion Milestone"), in each case as the same may be extended pursuant to any Delay Event, the Borrower shall be required to pay liquidated damages equal to Forty Thousand Dollars (\$40,000) per day for every day a Completion Milestone remains unachieved. If the Borrower fails to achieve Substantial Completion of Phase 2 by the Outside Completion Date, as it may be adjusted as expressly provided under the Lease Agreement, such failure will constitute an Event of Default, which will entitle the Port Authority to terminate the Lease Agreement without any cure right of the Borrower, but subject to the rights of a Recognized Mortgagee. The Borrower's failure to satisfy a Completion Milestone does not constitute an Event of Default under the Lease Agreement, except to the extent that the Substantial Completion of Phase 2 has not occurred by the Outside Completion Date.

### ***Operation and Maintenance of the Premises***

Throughout the term of the Lease Agreement, the Borrower is obligated to operate, manage, administer and maintain the Premises in accordance with best management practice, Applicable Laws, the Applicable Standards, and Good Order Requirements, provided that from and after the date that the Terminal 7 Parcel became part of the Premises, the Borrower was and continues to be required to diligently operate Terminal 7 at a standard and level of quality consistent with Applicable Laws, all Applicable Standards and Good Order Requirements, but not specifically in accordance with best management practice. In accordance with the Lease Agreement, the Borrower made certain capital upgrades to Terminal 7, totaling approximately \$3 million. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Uses of the Premises – Conduct of Operations."

### ***Payments by the Borrower***

The Borrower is required to make certain payments to the Port Authority including, but not limited to the following: (i) Ground Rent (a rental equal to \$148,300 per acre annually, subject to escalation annually from the 2018 base year), (ii) First Additional Rent (\$500,000 for each year for each Leasehold Mortgage the Borrower has entered into (except that only one First Additional Rent will be due if more than one Leasehold Mortgage is entered into contemporaneously with respect to a single debt financing) beginning in the year in which Substantial Completion of Phase 1 occurs), (iii) Second Additional Rental (an amount established in the Lease that varies by year, ranging from approximately \$55.3 million in 2024 to \$137.3 million in 2060, with no Second Additional Rent due in 2028 or 2029), (iv) Third Additional Rent (\$33 million upon entering into the Lease Agreement, and \$1 million per year annually thereafter, beginning in 2027), (v) Excess Value Rent (generally, a portion of cash available for distribution, and only payable if certain conditions are satisfied), (vi) Concessions Revenue Rent (a share of gross rents received by the Borrower from Concession Sublessees, as further described in “APPENDIX E – SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Rental”), (vii) reimbursement of certain costs incurred by the Port Authority directly related to the development of the Premises pursuant to the Lease Agreement, (viii) contributions of up to approximately \$13.8 million (in addition to a requirement to spend, as directed by the Port Authority, up to \$35 million) to support Airport-wide traffic mitigation efforts which will be made during the performance of the D&C Work and (ix) milestone payments in respect of work conducted by the Port Authority, consisting of \$23 million with respect to certain roadways work to be performed by the Port Authority and \$9 million with respect to certain backup power supplies to be provided by the Port Authority. The Borrower is prohibited from paying any rent or any other sums required to be paid under the Lease Agreement more than one month in advance of the due date thereof (excluding required deposits). See “APPENDIX E – SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Rental” and Section 5.1.2 “PORT AUTHORITY RENTS UNDER THE LEASE” in the Report of the Airport Consultant appended hereto as APPENDIX B-1 for further information about rents due by the Borrower to the Port Authority.

### ***Subleases***

Under the Lease Agreement, the Borrower may not sublet, license or grant occupancy rights in or to the Premises or any portion thereof, or enter into any sublease or any amendment or modification to, or permit any extension of, an existing sublease (other than an extension of an existing sublease pursuant to the express terms thereof as long as such option to extend was approved by the Port Authority in connection with a consent to such sublease), in each case, without the prior written consent of the Port Authority in accordance with the Lease Agreement.

Subject to the terms and conditions of the Lease Agreement, including the consent of the Port Authority to the extent required thereby, the Borrower may enter into subleases with any of the following sublessees: (i) airlines, (ii) providers of concession goods and services in accordance or providers of other consumer services, (iii) governmental agencies, (iv) contractors performing Project Work on the Premises or otherwise providing services to the Borrower or any of its sublessees (provided that any such subleases shall be for temporary subleases for office and/or storage space only); and (v) such other Persons for such other purposes as are permitted under the Lease Agreement.

For additional information regarding the Port Authority’s consent rights and the subleasing process generally, as well as risks associated therewith, see “APPENDIX E – SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Assignment and Sublease – Subleases,” “PART 17 – RISK FACTORS – Risks Related to Sublease Agreements,” and “PART 17 – RISK FACTORS – Certain Airport Regulatory Considerations – *Regulatory Considerations Regarding Airline Rates.*”

## **Port Authority Retained Rights**

The Port Authority has reserved various rights under the Lease Agreement, including, but not limited to, the following rights: (i) upon the failure of the Borrower to perform any obligation under the Lease Agreement within the specified time period or if no time period within 15 Business Days after notice from the Port Authority (or such additional time as may be agreed between the Borrower and the Port Authority with respect to obligations that by their nature are not susceptible to complete performance within such 15 Business Day period), the right (but not the duty nor the obligation) to perform any such obligation of the Borrower (subject to the rights of the Recognized Mortgagees) in addition to all other available remedies, and to be reimbursed by the Borrower for 115% of the Port Authority's costs of such performance, (ii) the right to implement, conduct, and receive fees with respect to the Reserved Uses, (iii) upon the effective date of a termination of the Lease Agreement, the right (subject to the Recognized Mortgagees' rights and remedies) to re-enter and regain possession of the Premises, (iv) the right to require changes in the design and construction of the D&C Work, to substitute materials and methods, and to order extra work, as it deems necessary or appropriate (subject to certain limitations as set forth in the Lease Agreement) ("Port Authority Changes"), and (v) various consent and approval rights with respect to, among other things, (A) airline and concession subleases, (B) certain refinancings or other incurrences of additional debt by the Borrower, (C) certain proposed alterations of the Baseline Schedule by the Borrower, including (without limitation) those that would adversely impact the critical path of certain other construction or redevelopment projects at the Airport or the personnel resources of the Port Authority available to provide necessary oversight, (D) any assignment of the Borrower's interest in the Lease Agreement, and (E) any change in control of the Borrower. See "PART 17 – RISK FACTORS – Risks Related to the Lease Agreement" and APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Reserved Uses."

## **Compensation Events**

Upon the occurrence of certain specified events ("Compensation Event"), the Lease Agreement provides that, subject to compliance with the requirements of the Lease Agreement and certain exceptions and exemptions, the Borrower is entitled to certain compensation from the Port Authority. If the Borrower fails to deliver notice of a Compensation Event within the required period set forth in the Lease Agreement, the Borrower will be deemed to have irrevocably and forever waived and released any claim or right to compensation or other adverse effects on costs, expenses and liabilities attributable to such Compensation Event. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Compensation Events."

The compensation owed to the Borrower ("Borrower Damages") with respect to any Compensation Event will be the sum of (i) any adverse Net Cost Impact and (ii) solely with respect to a Compensation Event constituting a Port Authority Change (including a Rejected Port Authority Change) any additional amount payable to the Borrower pursuant to the Lease Agreement (such amount being (x) if the Borrower and the Port Authority are unable to agree on a proposed Port Authority Change (other than a Rejected Port Authority Change) and the Port Authority directs the Borrower to implement the same, reimbursements of actual and reasonable incremental costs incurred by the Borrower during the D&C Work Period and the estimated incremental costs of the Borrower's performance of the Operations and Maintenance Work to the extent such Port Authority Change increases the square footage of Terminal 6 or requires the use of materials or components that have materially higher costs of operations or maintenance than prior to such Port Authority Change and (y) solely with respect to a Compensation Event constituting a Rejected Port Authority Change, any net adverse impact to the Borrower's forecasted costs and revenues resulting from such Rejected Port Authority Change), provided that there shall be no duplication or double compensation of Borrower Damages, and with respect to any Borrower Damages required to be paid by the Port Authority

as a result of a Port Authority Change (including a Rejected Port Authority Change), the Port Authority shall not be required to pay Borrower Damages until the Borrower Damages exceed \$33,000,000 in aggregate (taking into account any prior deductions from such amount to offset amounts payable by the Port Authority pursuant to the Lease Agreement). Borrower Damages will be net of all applicable insurance proceeds payable to the Borrower or, its contractors or suppliers associated with the Compensation Event (or that would have been payable but for the failure to comply with the insurance requirements set forth in the Lease Agreement or the failure of the Borrower to (or to cause its contractors or suppliers to) promptly submit a claim or cooperate with the relevant insurer) and will, subject to certain conditions, include all costs of asserting a claim for such insurance proceeds and any increased insurance premium resulting from such claim. In addition, Borrower Damages will be net of all amounts recovered, or made available to the Borrower from any sublessee or other third-party source, and the Borrower must use reasonable efforts to pursue any and all potential sources of funds or reimbursement from any sublessee or other third-party source to offset Borrower Damages. If the Borrower and the Port Authority are unable to agree that a Compensation Event claimed by the Borrower has occurred or with the Borrower's entitlement to or amount of Borrower Damages, then the dispute will be resolved in accordance with the dispute resolution procedures set forth in the Lease Agreement.

Following a determination of Borrower Damages, (1) if any portion of Borrower Damages is attributable for prior D&C Work Costs that have already been incurred by the Borrower or its contractors or suppliers, the Port Authority will pay such portion within 40 Business Days after the final determination of that portion of Borrower Damages, unless otherwise agreed by the Borrower; (2) if any portion of Borrower Damages is attributable to future D&C Work Costs, the Port Authority shall have the right to pay such portion as such costs are incurred or paid by the Borrower in periodic progress payments in arrears or otherwise in accordance with the Port Authority's standard practices and procedures for paying its contractors (provided that the Port Authority may instead elect to pay such amounts as a direct, lump-sum payment based on the net present value of such portion of Borrower Damages as determined using a discount rate mutually agreed by the Borrower and the Port Authority); and (3) the Port Authority may elect to pay any portion of Borrower Damages by adjustment to rentals payable by the Borrower to the Port Authority under the Lease Agreement.

Subject to the Borrower's rights with respect to non-monetary relief for Delay Events, and to the Borrower's rights with respect to terminating the Lease Agreement as described under the caption "Termination Rights – Grounds for Termination by the Borrower" below, Borrower Damages represent the Borrower's sole right to compensation and damages for the adverse effects of a Compensation Event against the Port Authority. Compensation Events can occur only during the D&C Work Period, and no event or condition that occurs following the end of the D&C Work Period can constitute a Compensation Event.

See APPENDIX B-3 – "REPORT OF THE LENDERS' TECHNICAL ADVISOR" for information relating to Compensation Event notices and Delay Event Notices submitted by the Borrower to the Port Authority to date, which notices and/or the details set forth therein may be disputed by the Port Authority.

### **Delay Events**

Upon the occurrence of a certain events delaying the Borrower's performance of the D&C Work or the Operations and Maintenance Work or otherwise adversely affecting the Borrower's ability to perform the D&C Work in compliance with the Project Documents, the Lease Agreement provides that, subject to compliance with the requirements of the Lease Agreement, the Borrower (1) will be excused from performance of its obligation to perform D&C Work or Operations and Maintenance Work, as applicable, during the pendency of such Delay Event but only to the extent that such work is directly affected by the Delay Event, (2) will be entitled to extend the Scheduled Phase 1 Completion Date and/or the Scheduled

Completion Date using a time impact analysis set forth in the Lease Agreement, but only to the extent the Delay Event actually delays the performance of the D&C Work beyond the Scheduled Phase 1 Completion Date and/or the Scheduled Completion Date, as applicable, (3) solely with respect to a Delay Event affecting performance of the D&C Work, will be permitted to make certain value engineering adjustments to the scope of the D&C Work to achieve cost savings that minimize the impact of the Delay Event, and (4) solely with respect to a Delay Event affecting performance of the Operations and Maintenance Work, will be entitled to adjustments to the Borrower's obligations to satisfy and achieve KPIs as necessary to reflect the impact of the Delay Event on the Borrower's ability to satisfy such obligations. If the Borrower fails to deliver notice of a Delay Event within the required period set forth in the Lease Agreement, the Borrower will be deemed to have irrevocably and forever waived and released any claim or right to extensions or any other relief attributable to such Delay Event. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Design and Construction by the Lessee – Delay Events."

Notwithstanding the occurrence of a Delay Event, the Borrower is required to continue its performance and observance of all of its obligations and covenants under the Lease Agreement to the extent that it is reasonably able to do so and to use its reasonable efforts, and to cause its contractors and suppliers to use reasonable efforts, to minimize the effect and duration of the Delay Event. The occurrence of a Delay Event does not excuse the Borrower from timely payment of monetary obligations pursuant to the Lease Agreement or compliance with Good Order Requirements, Applicable Law, Applicable Standards, the Requirements and Provisions for Work and the other Project Documents, except for temporary inability to comply as a direct result of the Delay Event.

If the Borrower and the Port Authority are unable to agree on the extent of any delay incurred or non-monetary relief from the Borrower's obligations under the Lease Agreement or the Port Authority disagrees that a Delay Event claimed by the Borrower has occurred (or as to its consequences) or that the Borrower is entitled to relief, then the dispute will be resolved in accordance with the dispute resolution procedures set forth in the Lease Agreement.

Subject to the Borrower's rights with respect to monetary relief for Compensation Events, the schedule relief and other relief specifically provided for Delay Events represent the Borrower's sole right to relief for the adverse effects of a Delay Event against the Port Authority, except for claims that the Borrower may have against the Port Authority during the D&C Work Period arising out of or relating to (a) the Port Authority's failure to comply with its payment obligations under the Lease Agreement, (b) the Port Authority's interference with the Borrower's right of quiet enjoyment as provided for in the Lease Agreement, (c) the Port Authority's willful failure to tender the Premises or any portion thereof to the Borrower in accordance with the time periods required by the terms of the Lease Agreement (which claims described in the foregoing clauses (a), (b), or (c) are subject to the Borrower's rights with respect to terminating the Lease Agreement as described under the caption "Termination Rights – Grounds for Termination by the Borrower" below and the dispute resolution procedures set forth in the Lease Agreement), or (d) a breach by the Port Authority of any obligation under the Lease Agreement affecting the Borrower's Operations and Maintenance Work in any partial portion of the Premises following the date of beneficial occupancy of the Borrower therein in accordance with the Lease Agreement. Delay Events can occur only during the D&C Period, and no event or condition that occurs following the end of the D&C Work Period can constitute a Delay Event. Because breach by the Port Authority of any material obligation under the Lease Agreement during the D&C Period constitutes a Delay Event, the "sole remedy" limitation described above in this paragraph may limit the Borrower's ability to bring other legal action against the Port Authority in the event of its breach of the Lease Agreement during the D&C Period. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Design and Construction by the Lessee – Delay Events."

See APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR” for information relating to Compensation Event Notices and Delay Event Notices submitted by the Borrower to the Port Authority to date, which notices and/or the details set forth therein may be disputed by the Port Authority.

## **Termination Rights**

### ***Borrower Event of Default***

The Lease Agreement provides for a number of defaults by the Borrower (each, a “Lease Event of Default”), subject, in certain cases, to cure periods and limitations specified therein. Such Events of Default include, without limitation, (i) any representation or warranty made by the Borrower in the Lease Agreement or in any other certificate or agreement delivered by the Borrower to the Port Authority in connection with the Lease Agreement being incorrect, false or misleading in any material respect on the date made, unless the facts and circumstances that caused the representation or warranty to be incorrect, false or misleading can be remedied and the representation or warranty is no longer incorrect, false or misleading in any material respect within 90 days following the earlier of the date the Borrower learns of the incorrect, false, or misleading representation or warranty or the date of notice thereof from the Port Authority to the Borrower, (ii) the Borrower fails to (A) pay when due any Rentals under the Lease Agreement, if the failure remains unremedied for five days, (B) make any other payment of fees or charges required under the Lease Agreement to the Port Authority, if the failure remains unremedied for 30 days, or (C) deposit or cause the deposit of funds to any reserve accounts in the amounts and times required by the Lease Agreement and the Senior Security Agreement, if the failure remains unremedied for 10 days after receipt of notice of default from the Port Authority, (iii) the Borrower fails to achieve Substantial Completion of Phase 2 by the Outside Completion Date, as such date may be adjusted pursuant to the Lease Agreement, (iv) the Borrower fails to maintain (or cause to be obtained and maintained) insurance coverage required by the Lease Agreement, including failure to comply with the requirements relating to the amount, terms or coverage, and, with respect to any such failure that results from a change by the Port Authority to the insurance coverage requirements under the Lease Agreement or the failure by an insurance carrier to maintain the ratings required pursuant to the Lease Agreement, such failure continues without cure for a period of five Business Days after the initial date of such failure, (v) the occurrence of certain events related to the insolvency or bankruptcy of the Borrower; (vi) any sublease, assignment, or transfer of the Lease Agreement, the Borrower’s leasehold interest in the Premises, or any portion of any of the same, or the transfer of any equity interests in the Borrower, in each case in contravention of the terms of the Lease Agreement, (vii) the Borrower fails to keep, perform, and observe every direction issued by the Port Authority pursuant to the Lease Agreement (including any bulletin, directive, or other instruction issued by the General Manager of the Airport or the Chief Security Officer) or issued by the Port Authority in its capacity as a bi-state agency, an airport operator, or the tenant under the Basic Lease, if such failure remains unremedied for a period of 10 days (provided that the time period for cure may be extended in certain circumstances), or (viii) the Borrower fails to keep, perform or observe any promise, covenant or agreement in the Lease Agreement or any document incorporated by reference into the Lease Agreement and such failure remains unremedied for a period of 30 days after the date on which the Borrower receives written notice thereof from the Port Authority, or within such shorter period as may be required by any applicable governmental authority (provided that the time period for cure may be extended in certain circumstances). See APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Termination by the Port Authority.”

With respect to certain, but not all, Events of Default, the Borrower is entitled to cure such Event of Default by preparing and submitting for Port Authority approval within the applicable cure period a remedial plan that sets forth a schedule and specific actions to be taken by the Borrower to cure such Event of Default and, if applicable, reduce the likelihood of such defaults occurring in the future. Any failure of

the Borrower to comply diligently with an approved remedial plan shall be deemed an Event of Default and the Port Authority shall have the right to terminate the Lease Agreement without any further entitlement of the Borrower to any cure period or further notices of any kind for such Event of Default or to the proposal of another remedial plan (subject only to the notice and cure rights of the Recognized Mortgagees).

If the Port Authority terminates the Lease Agreement due to an Event of Default, all Rental obligations of the Borrower pursuant to the Lease Agreement, and all other obligations of the Borrower that have not been fully performed, will survive such termination and will remain in full force and effect for the full term of the Lease Agreement had the termination not occurred. Additionally, the Borrower will be required to pay damages set forth in the Lease Agreement to the Port Authority in connection with such termination. The Port Authority may maintain separate actions, periodically, to recover the damage or deficiency then due or, at its option, at any time, may sue to recover the full deficiency, less the proper discount, for the entire unexpired term, subject to any adjustments as permitted under the Lease Agreement in connection with a reletting by the Port Authority. See APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Termination by the Port Authority (Events of Default)” and “– Survival of the Obligations of the Lessee.”

#### ***Grounds for Termination by the Borrower***

The Borrower may terminate the Lease Agreement upon the occurrence of certain events or conditions, subject to the applicable cure periods and limitations specified therein. Grounds for termination of the Lease Agreement by the Borrower are: (i) the failure of the Port Authority, within 30 days following receipt of notice by the Borrower, to make payment of any undisputed amounts due to the Borrower; (ii) the Port Authority expressly repudiates or willfully (with an intent to deprive the Borrower of its rights to quiet enjoyment under the Lease Agreement) fails to provide or defend the Borrower’s right to quiet enjoyment of the Premises pursuant to the terms of the Lease Agreement (which shall not be deemed to occur during the pendency of a Force Majeure event or in the event of a condemnation), such that the Borrower is unable to construct Terminal 6 or operate Terminal 7 or Terminal 6, in each case for a period of not less than 180 consecutive days, subject to certain limitations and restrictions; or (iii) the Port Authority willfully fails to tender the Premises or any portion thereof to the Borrower in accordance with the time periods required by the terms of the Lease Agreement. See APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Termination by the Lessee” and “– Port Authority (Event of Default).”

Upon the occurrence of any such event, the Borrower may terminate the Lease Agreement upon 60 days’ notice to the Port Authority. If the Borrower terminates the Lease Agreement due to the occurrence described in clause (ii) of the preceding paragraph, then (a) the Port Authority shall pay the Borrower a termination payment (the “Port Authority Default Termination Payment”) calculated as of the effective date of the termination as equal to (without double counting) the fair market value (had the Lease Agreement not been terminated) of the Borrower’s leasehold interest and its rights and obligations during the unexpired term of the Lease Agreement, determined according to a process set forth in the Lease Agreement, and (b) the Port Authority will have the right, but not the obligation, to assume the Lessee Debt that is then outstanding under the Financing Documents and the Borrower’s rights and obligations under such Financing Documents, on terms mutually acceptable to the Port Authority and the applicable lenders, in which even the Port Authority Default Termination Payment will be reduced by the amount of the Lessee Debt so assumed; provided that if the Port Authority and the applicable financing parties are unable to agree on mutually acceptable terms for such assumption by the Port Authority of the Lessee Debt, then the Port Authority shall pay the full amount of the Port Authority Default Termination Payment. The Borrower is not entitled to any termination payment upon a termination of the Lease Agreement by the Borrower for any other reason, and termination of the Lease Agreement is the Borrower’s sole remedy for any of the

provisions described in clauses (i) through (iii) above, provided that if the Borrower elects not to terminate the Lease Agreement, then the Borrower will retain the other remedies for breach of the Lease Agreement that it has in law or in equity. Payment by the Port Authority of the Port Authority Default Termination Payment is subject and subordinate in all respects to payment of debt service on the Port Authority's Consolidated Bonds and payment into the General Reserve Fund of the amount necessary to maintain the General Reserve Fund in the amount specified in the General Reserve Fund Statutes.

### ***Early Termination of Basic Lease***

If the entire Premises are condemned, then the Lease Agreement will automatically terminate. If a material part of the Premises or the Airport's public landing area is condemned, then each of the Borrower and the Port Authority shall have the option, exercisable by notice within 10 Business Days after the date of the condemnation, to terminate the Lease Agreement. In such circumstances, the Port Authority shall pay the Borrower the fair value of the Borrower's leasehold interest in the Premises, subject to various limitations set forth in the Lease Agreement, including that the Borrower's recovery shall be limited to a proportionate share of the condemnation proceeds available to the Port Authority and other affected tenants at the Airport, and that the available condemnation proceeds will be limited to the amount of such proceeds received by the Port Authority from the condemning authority and remaining after the Port Authority has been compensated for certain of its own interests or investments affected by the taking. There can be no assurance that the amount of any such payment would be sufficient to pay and discharge the remaining balance of the Series 2024 Bonds. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT– Basic Lease."

### ***Early Termination Upon Condemnation***

If the entire Premises are condemned, then the Lease Agreement will automatically terminate. If a material part of the Premises or the Airport's public landing area is condemned, then each of the Borrower and the Port Authority shall have the option to terminate the Lease Agreement. In such circumstances, the Port Authority shall pay the Borrower the fair value of the Borrower's leasehold interest in the Premises, subject to various limitations set forth in the Lease Agreement, including that the Borrower's recovery shall be limited to a proportionate share of the condemnation proceeds available to the Port Authority and other affected tenants at the Airport, and that the available condemnation proceeds will be limited to the amount of such proceeds received by the Port Authority from the condemning authority and remaining after the Port Authority has been compensated for certain of its own interests or investments affected by the taking. There can be no assurance that the amount of any such payment would be sufficient to pay and discharge the remaining balance of the Series 2024 Bonds or the Loan Facility. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT– Condemnation."

## **Lenders' Rights and Remedies; Refinancing**

### ***Leasehold Mortgages***

Except as expressly authorized in the Lease Agreement, the Borrower may not mortgage its interest in the Lease Agreement. The Lease Agreement allows the Borrower to grant Leasehold Mortgages on its interest in the Lease Agreement to secure the initial Lessee Debt under the Financing Documents as well as certain subsequent Lessee Debt, subject in each instance to certain terms and conditions.

A Person that holds a Leasehold Mortgage that complies with the terms and conditions set forth in the Lease Agreement and is an Institutional Lender or an agent or trustee acting on behalf of one or more Institutional Lenders is entitled to the benefits and protections provided to a Recognized Mortgagee

pursuant to the Lease Agreement, and is a third party beneficiary of the provisions of the Lease Agreement related to financing of the Project, with the right to directly enforce such provisions. Pursuant to the Port Authority's Consent to Leasehold Mortgage and Other Financing Documents, dated as of the Original Closing Date, the Port Authority has recognized the Collateral Agent as a Recognized Mortgagee.

The Port Authority shall deliver to the Recognized Mortgagee a copy of each Event of Default Notice given under the Lease Agreement at the same time as and whenever any Event of Default Notice shall have been sent to the Borrower. If the Port Authority elects to terminate the Lease Agreement the Port Authority shall at the same time send to the Recognized Mortgagee a copy of the Port Authority termination notice. The effective time and date of such termination, so long as the Leasehold Mortgages are in effect, (A) shall not be sooner than (1) the 10th day after the date of the sending of the termination notice if the Lease Event of Default triggering such notice is capable of being cured solely by the payment of money, or (2) the 90th Business Day after the date of sending of the termination notice if the Lease Event of Default triggering such notice is not capable of being cured solely by the payment of money, and in each case, shall be subject to extension and or stay in certain circumstances for the benefit of a Recognized Mortgagee, and (B) if a Personal Default has occurred and is continuing and the Recognized Mortgagee has notified the Port Authority that it will exercise its foreclosure rights and/or an Equity Foreclosure, and has started to exercise such rights within 90 Business Days of its receipt of the Event of Default Notice, shall not be before the execution and delivery of an assignment and assumption agreement between the Borrower, the Recognized Mortgagee and the Port Authority.

#### ***Recognized Mortgagee's Right to Cure***

The Recognized Mortgagee shall have an additional period of (1) 10 days with respect to any Lease Event of Default that is capable of being cured solely by the payment of money, (2) 90 Business Days with respect to any other Lease Event of Default (other than certain Lease Events of Default related to Borrower bankruptcy or certain other specified Lease Events of Default not capable of cure by a party other than the Borrower, as to which no cure will be required), and (3) 180 days with respect to a failure to achieve Substantial Completion of Phase 2 by the Outside Completion Date, in each case beyond any cure period expressly provided to the Borrower in the Lease Agreement, to cure or cause to be cured any Lease Event of Default, but subject in all events to certain conditions, including payment of outstanding amounts due to the Port Authority and diligent efforts to cure, including, if necessary, foreclosure of the Leasehold Mortgages within a period of time reasonably acceptable to the Port Authority. If any Recognized Mortgagee is prohibited from curing any Lease Event of Default by any process, stay or injunction issued by any governmental entity or pursuant to any bankruptcy or insolvency proceeding involving the Borrower, then the time periods specified above for the Recognized Mortgagee to cure such Lease Event of Default shall be extended for the shorter of the period of such prohibition and 150 days.

If the Recognized Mortgagee is acting to cure a Lease Event of Default in accordance with the Lease Agreement, then the Port Authority shall not exercise its right to terminate the Lease Agreement by reason of such Lease Event of Default; provided, however, that the Port Authority may exercise any of its other rights and remedies provided for under the Lease Agreement, including the Port Authority's step-in rights under the Lease Agreement or under the Construction Security, or at law or in equity, and the exercise of such rights by the Port Authority shall not be deemed to constitute interference with the Recognized Mortgagee's rights under the Lease Agreement.

#### ***Foreclosure***

The Recognized Mortgagee may exercise its foreclosure rights and/or an Equity Foreclosure (or any contractual or statutory power of sale under the applicable Financing Documents or an assignment in

lieu) and enforce any applicable Financing Document in any lawful way, subject to certain conditions contained in the Lease Agreement, including, without limitation: (1) the Recognized Mortgagee is not a Prohibited Party, (2) the rights of the Borrower under the Lease Agreement may be assigned or transferred only to a Person that is approved by the Port Authority as a Qualified Terminal Operator, (3) the Recognized Mortgagee is not permitted in connection with its enforcement of its lien under Leasehold Mortgages to do anything that would materially and adversely affect the Premises, to the Operations and Maintenance Work or is otherwise inconsistent with, or not permitted by, the Lease Agreement, and (4) such Qualified Terminal Operator (or its designee or nominee) shall pay or cause to be paid to the Port Authority all amounts set forth in a Statement of Estimated Liabilities which are past due or due and payable in accordance with the provisions of the Lease Agreement.

### ***New Agreement***

If the Lease Agreement is rejected or disaffirmed pursuant to any bankruptcy law or proceeding or other similar law or proceedings affecting creditors' rights generally with respect to a bankruptcy proceeding relating to the Borrower or otherwise or is terminated as a result of any other Personal Default, then, subject to certain conditions contained in the Lease Agreement, the Port Authority agrees, if there are outstanding obligations to a Recognized Mortgagee (subject to the receipt of all necessary Governmental Approvals, which the Port Authority agrees to use commercially reasonable efforts to obtain), to enter into a new lease of the Premises (the "New Agreement") with the Recognized Mortgagee (or its designee or nominee that is not a Prohibited Party) and any ancillary documents or agreements as may be necessary or desirable to give full effect to the New Agreement for the remainder of the term of the Lease Agreement upon all of the remaining, unperformed covenants, agreements, terms, provisions and limitations of the Lease Agreement, effective as of the date of such termination subject to the conditions set forth in the Lease Agreement.

### ***Refinancing Requirements***

The Borrower is generally required to obtain the Port Authority's prior written consent to any Refinancing. However, certain Refinancings that meet the criteria set forth in the Lease Agreement do not require such prior consent, including certain refinancings of all or any portion of the initial Loan Facility originating under the Senior Financing Documents. The Borrower has structured the issuance of the Series 2024 Bonds to fit within a permitted Refinancing under the Lease Agreement that does not require the Port Authority's consent. Pursuant to the Lease Agreement, the aggregate principal amount of the Borrower's debt secured by the Leasehold Mortgages shall not exceed a maximum amount of \$4,225,000,000. Following the issuance of the Series 2024 Bonds, approximately \$508,453,869 of debt will remain Outstanding under the Loan Facility, all of which, together with the approximately \$962,000,000 of undrawn capacity anticipated to be drawn and applied to the remaining costs of the Project, is currently scheduled to mature in full on the Bank Financing Maturity Date. The Borrower's current plan of finance, which is subject in all respects to market conditions from time to time and remains subject to change in their sole and absolute discretion, anticipates the issuance of additional tax-exempt and taxable bonds either as Additional Senior Obligations (secured on a parity basis with the Series 2024 Bonds and the Loan Facility) and/or Subordinate Obligations (secured on a subordinate basis to the Senior Obligations), to refinance the balance of the Loan Facility outstanding from time to time, but prior to their maturity. Such refinancings may or may not require Port Authority consent at the time of such refinancing.

These indebtedness restrictions set forth in the Lease Agreement are for the sole benefit of the Port Authority. The Lease Agreement provisions can be waived or amended by the Port Authority without the consent of the holders of the Series 2024 Bonds or other Senior Obligations.

For detailed provisions of the Lease Agreement, see APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Project Financing.”

## **PART 11 – THE PROJECT**

### **Overview**

The Project includes (i) the operation, maintenance, and, subsequently, decommissioning and demolition of Terminal 7 and related infrastructure at the Airport; (ii) the design, construction, financing, operation, and maintenance of the Ground Transportation Center and Terminal 6, including the necessary aircraft ramp and apron areas; and (iii) the design and construction of certain Off-Premises Facilities at the Airport by the Borrower on behalf of the Port Authority, which Off-Premises Facilities will not be operated or maintained by the Borrower and will not constitute part of the facilities leased to the Borrower under the Lease Agreement. Certain aspects of the Project are eligible for financing or refinancing with Green Bonds. For information about the use of proceeds of the Green Bonds see “PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS – Green Bonds Designation – Series 2024A” and APPENDIX M – “GREEN BONDS SECOND PARTY OPINION.”

As described more fully in the Report of the Airport Consultant attached hereto as APPENDIX B-1, the New York City air service market is one of the largest markets in the world in terms of total origin and destination passengers, and demand is anticipated to continue long-term. The Borrower’s operations at Terminal 7 currently benefit from the strong air service market in New York City, and the new Terminal 6 is intended to help address such passenger demand and improve the passenger flying experience by, among other things, (i) providing additional widebody gates compared to Terminal 7 to serve a greater volume of passengers and creating more growth options for airlines and (ii) provide best in class passenger amenities.

As evidence of the demand in the New York City air service market for the capacity and amenities of the new Terminal 6, the Borrower has already entered into a sublease with JetBlue for operations at Terminal 6, and the Borrower has entered into letters of intent with an additional seven airlines (“Expected Airlines”) who are expected to be tenants at Terminal 6 (Aer Lingus, Cathay Pacific, Lufthansa AG, Austrian Airlines, Brussels Airlines, Swiss International Air Lines and an additional long-haul foreign flag airline).

The Borrower and its advisors believe that Terminal 6 will be successful at attracting additional airline subtenants for the following reasons:

1. Terminal 6 is expected to provide improved customer experience and service by offering approximately 1,200,000 square feet of world-class facilities including modern passenger amenities, such as locally inspired retail, food and beverage offerings, duty free and other retail concessions, multiple premium airline lounge options, an arrivals lounge for use by all arriving passengers, and facilities for travelers with pets, families and mobility or sensory challenges;
2. Terminal 6’s compact design with short walking distances and state of the art systems such as, but not limited to, self-service bag drop, automated TSA security lanes and biometric-based access control systems will allow for a smooth and expedient passenger experience;
3. Terminal 6 will accommodate ADG V aircraft (equivalent to the Boeing 777 and Airbus 350 families) and include three Multiple Apron Ramp System gates that can accommodate one widebody or two narrowbody aircrafts;

3. Terminal 6 will provide an all new, large Federal Inspection Services (FIS) facility, which will facilitate efficient passenger flow;
4. The Borrower has partnered with the Manager, who has an extensive record of successfully completing complex airport construction projects and operating world-class facilities, including in the New York air service market;
5. Terminal 6 is expected to improve Minimum Connect Times with JetBlue in Terminal 5 by expanding taxilanes for more efficient airside operations and offering a post-security seamless walking connection between Terminal 5 and Terminal 6; and
6. Terminal 6 will include direct access to two AirTrain stations, and the centralized Ground Transportation Center, facilitating access to other terminals at the Airport and ground transportation, resulting in improved traffic and passenger flow.

For more information, please see APPENDIX B-1 – “REPORT OF THE AIRPORT CONSULTANT,” and APPENDIX B-2 – “REPORT OF THE AIRLINE TRAFFIC FORECAST CONSULTANT,” attached hereto.

### **Phasing of the Project – Phase 1 & Phase 2**

In total, Terminal 6 will include the construction of 10 gates (consisting of nine widebody gates and one narrowbody gate) and associated terminal space on the site of the Prior Terminal 6 and Terminal 7 at the Airport. While the Borrower has and will continue to operate Terminal 7 during the initial construction of Terminal 6, Terminal 7 will eventually be decommissioned and demolished following the opening of Phase 1 of Terminal 6 as described above.

Construction on Terminal 6 and related Project construction work began in the fourth quarter of 2022 and is divided into two (2) major phases:

- a) Phase 1 of the Project (collectively, as further described in the Lease Agreement and the D&C Contract, “Phase 1”), which is currently ongoing and is anticipated to open in the first quarter of 2026, includes (i) the construction of a portion of Terminal 6 on the vacant site previously occupied by the Prior Terminal 6 before its demolition in 2011, including five gates (four widebody gates and one narrowbody gate) arrival and departure roadways serving Terminal 6, check-in areas, a new FIS facility, inbound and outbound baggage systems, concession spaces, TSA security facilities, and certain airline lounges, two of which will have direct boarding to aircraft, (ii) construction of the Ground Transportation Center, (iii) construction of associated Off-Premises Facilities and (iv) the decommissioning of up to five gates of Terminal 7 to facilitate construction of the new Terminal 6. It is anticipated that one additional widebody gate will be added by the third quarter of 2026 after completion of Phase 1, but before completion of Phase 2.
- b) Phase 2 of the Project (collectively, as further described in the Lease Agreement and the D&C Contract, “Phase 2”), which will commence following the completion of Phase 1 and is anticipated to open in the second quarter of 2028, includes (i) the decommissioning and demolition of the rest of Terminal 7, (ii) construction of the remaining portion of the new Terminal 6 on the site previously occupied by Terminal 7 including four additional widebody gates, additional check-in areas, additional concession areas, and additional lounge spaces, and (iii) construction of additional associated Off-Premises Facilities, including necessary roadways and utilities.

## Construction Milestones

Under the Lease Agreement the Borrower is responsible for meeting the following completion milestones (the “Terminal 6 Construction Milestones”):

<b>Key Dates / Construction Milestones</b>	
Phase 1 Scheduled Substantial Completion Date	December 4, 2025
Phase 1 Date of Beneficial Occupancy	February 10, 2026*
Phase 2 Scheduled Substantial Completion Date	February 23, 2028
Phase 2 Date of Beneficial Occupancy	April 19, 2028*

\* If the Borrower fails to achieve the Phase 1 DBO or the Phase 2 DBO within 30 days following the milestone dates above, or as such dates may be extended pursuant to the terms of the Lease Agreement, the Borrower shall be required to pay liquidated damages of \$40,000 per day for each day thereafter that such milestone remains unmet.

The Lease Agreement also includes an Event of Default for a failure to achieve substantial completion of Phase 2 by the date which is 12 months following the Phase 2 Scheduled Substantial Completion Date listed above, or as such date may be extended pursuant to the terms of the Lease Agreement.

For more information on the provisions of the Lease Agreement regarding construction milestones see “PART 10– THE LEASE AGREEMENT – Principal Rights and Responsibilities of the Parties – Design and Construction of the Project.”

The Borrower believes that each milestone listed above is achievable based upon construction progress to date. For more information, see “PART 11 – THE PROJECT – Construction Progress” and APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR.”

## Construction Progress

Terminal Approach

Departures Curb

Check-In Hall

Entrance to Security Checkpoint

East Concourse

Central Concourse

Construction of Terminal 6 began in the fourth quarter of 2022, and the Borrower and D&C Contractor have made significant progress towards achieving the construction milestones under the Lease Agreement.

Design of the Project is well advanced, with 85% of all design packages submitted and 74% of all design packages either approved or conditionally approved to date. Pending or future design packages include post-construction submittals, operational plans, and submissions that are anticipated to occur within the remaining months of 2024 or early 2025, such as the Terminal 7 demolition, TWA canopy replacement, Lufthansa fit-out, individual tenant fit-out, and photovoltaic designs. The Borrower and its advisors believe that the Project is therefore largely de-risked from a design perspective.

Construction work is ongoing and includes, among other activities the following:

- Pile installation;
- Slab-on-grade activities;
- Curtainwall installation;
- Insulation;
- Drywall;
- Sprayed fireproofing;
- Baggage handling equipment installation;
- Fire sprinkler installation;
- HVAC ductwork; and
- Electrical and plumbing installation.

As of August 31, 2024, approximately 85% of all budgeted work relating to actual construction and construction materials and supplies has been procured. In addition, as of August 31, 2024, based on a comparison of the actual value of construction work completed as a percentage of the amounts Borrower has budgeted (including increases due to approved change orders):

- Approximately 36% of overall D&C Work has been completed;
- Approximately 10% of all mechanical, electrical, plumbing, building automation and low voltage installation has been completed; and
- Approximately 26% of the Phase 1 baggage system has been completed.

Over the first nearly two years of construction, certain delays have affected Phase 1, but the Borrower and D&C Contractor have taken efforts to mitigate and address such delays. Although the September 2024 Detailed Schedule provided by the D&C Contractor currently forecasts a 22-day delay against the Phase 1 Substantial Completion Date and Phase 1 DBO milestones and a 19-day delay against the Phase 2 Substantial Completion Date and Phase 2 DBO milestones, the forecasted delays assume no revisions to the schedule or other resequencing of construction activities that can occur in parallel which would reduce the time needed for such activities that are otherwise contemplated to occur later in the schedule (e.g., potentially resequencing curtain-wall activities or installing baggage handling equipment in multiple areas at once). In addition, with the exception of overtime work to complete the installation of terminal structural steel, the remaining schedule provided by the D&C Contractor is based on standard working day and shift assumptions. The forecasted delays also do not take into account time built into the schedule for weather delays that, if such delay does not materialize, would provide additional float to the schedule or other actions that the Borrower or D&C Contractor may take to accelerate construction work. See APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR.”

The Borrower is also pursuing its rights to Compensation and Delay Events under the Lease Agreement with respect to certain events contributing to the forecasted delays, and for certain other matters. See APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR” for information relating to Compensation and Delay Event Notices submitted by the Borrower to the Port Authority, which Notices and/or the details set forth therein may be disputed by the Port Authority. The Borrower expects that additional delays may arise over the remainder of the construction period, and additional Compensation and Delay Event Notices may be submitted, which Notices and/or the details set forth therein may be disputed by the Port Authority.

The Borrower believes planned mitigation efforts and schedule revisions will allow for future acceleration of construction to complete Phase 1 or Phase 2 of the Project if needed to recover potential delays, including all of the current forecasted delay.

### ***Open Change Orders***

As is consistent with projects of similar scope and size, there have been a number of Changes (or claimed Changes) since the Borrower issued a notice to proceed with the DB D&C Work to the D&C Contractor. The Changes are being reviewed and/or negotiated by the parties pursuant to the terms of the D&C Contract. The parties are also proceeding through the Equivalent Project Relief process where Changes may be associated with Port Authority Changes or Qualifying D&C Changes for the Project. A subset of the Changes have moved to mediation (i.e., the third step of the dispute resolution process, which is mandated by the D&C Contract for claims (individually or in the aggregate) exceeding \$10,000,000 that

are not resolved through meetings of (a) project level representatives, and (b) senior executives). The current maximum cumulative value of the Changes (or claimed Changes) subject to mediation, without taking into consideration the likelihood of the Borrower's success in respect of such Changes (or claimed Changes) subject to mediation, is less than \$20,000,000. Any additional costs to the Borrower as a result of such Changes (or claimed Changes) subject to mediation may also be funded through certain unallocated contingencies which may be available for any and all Project related activities. See "PART 3 – PLAN OF FINANCE – Contingences" for more information.

### ***Interface Arrangements***

Concurrently with the Borrower's work on the Project, additional developments are being and may be undertaken at the Airport by the Port Authority and by other terminal operators or airport tenants. In order to facilitate coordination among the relevant parties undertaking redevelopment work at the Airport, the Borrower and the Port Authority have entered into a Construction Coordination Agreement with the Borrower, dated as of the Original Closing Date (the "Construction Coordination Agreement"), and the Port Authority has agreed to cause certain other entities undertaking significant development work at the Airport to enter into a similar agreement. The Construction Coordination Agreement governs construction-related conflicts among the Borrower and such other entities and sets forth the procedures for cooperation among the parties with respect to, and coordination of, the construction activities relating to the redevelopment of the Airport and other work activities, including coordination of shared uses at the Airport such as (without limitation) Airport roadways, certain laydown areas, ground vehicle parking, utilities, and certain other resources. In certain circumstances, if conflicts arise from competing uses of shared resources at the Airport, the Port Authority has the authority, in its sole and absolute discretion, to make determinations which are not arbitrary, capricious or unjustly discriminatory to resolve such conflicts in accordance with the procedures and order of prioritization set forth in the Construction Coordination Agreement. The Construction Coordination Agreement also requires the Borrower to use, at its cost, a vendor chosen by the Port Authority with respect to batching, barging and materials crushing. In the event of a conflict between the Lease Agreement and Construction Coordination Agreement, the provisions of the Construction Coordination Agreement will prevail.

The Borrower has also entered into a Reciprocal Rights Agreement between the Borrower and JetBlue, dated as of the Original Closing Date (the "Reciprocal Rights Agreement"), which agreement governs the interface between the Borrower and JetBlue with respect to the connection points between Terminal 5 and Terminal 6 and the design, construction, operation and maintenance of certain other facilities that will serve both terminals, including, without limitation, a taxi stand and consolidated bus frontage area with certain related improvements, certain arrival and departure roads, and the Ground Transportation Center, as well as the design, construction, operation and maintenance of certain temporary and permanent improvements to Gates 29 and 30 of Terminal 5. The Reciprocal Rights Agreement provides access to each of the Borrower and JetBlue to applicable areas of property leased by the other party, as needed to facilitate the construction and/or joint use of such facilities, and sets forth each party's rights and responsibilities with respect to such facilities, both during construction, if applicable, and thereafter.

The Design-Builder has included the known costs associated with complying with the Construction Coordination Agreement and the Reciprocal Rights Agreement in the GMP (as defined below), to the extent applicable, and must comply with the terms and requirements of such agreements and any future interface agreements to the extent applicable to the DB D&C Work.

## **Environmental, Social and Governance (“ESG”)**

The Borrower is committed to taking a proactive approach to achieve the Project’s sustainability goals through implementing innovative and effective initiatives geared toward minimizing the Project’s carbon footprint and energy usage. The Borrower has a clear set of key environmental goals and metrics, and it has adopted and will continue to adopt and maintain sustainability policies and procedures in order to integrate its ESG commitment into the core aspects of the Project’s design, construction, and operations.

The Borrower believes that, based on the sustainability features of Terminal 6, the facility will not only meet the Port Authority’s Sustainable Design Guidelines for both buildings and infrastructure and satisfy the requirement under the Lease Agreement that Terminal 6 achieve LEED Silver certification, but may achieve LEED Gold certification and an Envision Gold rating. The Borrower is also targeting SITES Gold certification for outdoor spaces. Terminal 6’s sustainability features include, among others, incorporation of high-efficiency building systems, installation of solar panels to generate renewable energy, fully electric ground support system, stormwater capture and reuse, and 90% waste diversion through recycling of asphalt, concrete, steel, and other materials. For further information about the sustainability features of the Project, see APPENDIX M – “GREEN BONDS SECOND PARTY OPINION.

On April 20, 2020, the Port Authority received a Finding of No Significant Impact (“FONSI”) / Record of Decision (“ROD”) under the National Environmental Policy Act (“NEPA”) process, which represents the FAA’s determination that the Project will have no significant environmental impacts based on the results of the Final Environmental Assessment for the JFK International Airport Redevelopment Program.

In addition, the Lenders’ Technical Advisor has reviewed the Project against the Equator Principles, which were established by the project finance sector to document a benchmark for the consideration of environmental and social risk factors during the due diligence progress of assessing requests for project finance. The Lender’s Technical Advisor confirmed that the appropriate categorization of the Project under the Equator Principles is Category C as the Project has “minimal or no social or environmental impacts.”

For more information see APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR” and APPENDIX M – “GREEN BONDS SECOND PARTY OPINION.”

The Borrower’s operations are also focused on ensuring equal opportunity and participation of minority-owned business enterprises (“MBEs”) and women-owned business enterprises (“WBEs”), airport concession disadvantaged business enterprises (“ACDBEs”), local business enterprises (“LBEs”) from Queens, NY with emphasis on areas adjacent to the Airport, and service-disabled veteran owned businesses (“SDVOBs”) in all aspects of the Project. Pursuant to the Lease Agreement, the Borrower has agreed to commit itself to and use good faith efforts to among other matters (i) implement an extensive program of affirmative action, including specific affirmative action steps to ensure maximum opportunities for employment and contracting by minorities and women, and (i) achieve certain targets for MBE, WBE, ACDBE, LBE and SDVOB participation in the Project, including at least 20% MBE and 10% WBE participation in all eligible development, construction and operating work of the Project, 30% ACDBE participation as measured by the total estimated annual gross receipts for the overall concession program, 10% LBE participation in all phases and categories of work, and 3% SDVOB participation in design and construction work.

The Borrower’s commitment to such goals is reflected by significant MWBE equity participation in the Project as evidenced by the involvement of the ATI Member, a 100% minority-owned, controlled and managed firm, which is a 30% Equity Member. The ATI Member and its regulated affiliates are

focusing their efforts on investing and managing funds from traditional institutional investors, as well as helping promote the Project through substantial stakeholder engagement initiatives.

See also APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT– Minority Business Enterprises, Women-Owned Business Enterprises and Local Business Enterprises Commitment.”

## **PART 12 – THE D&C CONTRACT**

The Borrower and the D&C Contractor entered into a design-build contract (the “D&C Contract”), pursuant to which the DB D&C Work (as defined below) will be undertaken by the D&C Contractor consistent with a guaranteed maximum price and date certain basis. The D&C Contractor is Hunt Construction Group, Inc., D/B/A AECOM Hunt. The D&C Contractor has subcontracted the Design Work to a number of subconsultants, including, without limitation, Corgan Associates Architects P.C. (the architect of record). See “PART 9 – PROJECT PARTICIPANTS – The D&C Contractor.” See also APPENDIX G – “SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT” for additional information regarding the provisions of the D&C Contract.

### **Back-to-Back Obligations**

The Borrower and the D&C Contractor agree in the D&C Contract that the obligations and liabilities imposed on the D&C Contractor under the D&C Contract, subject to the terms and conditions set forth therein (including, without limitation, such terms and conditions that explicitly impose an obligation on the Borrower and the limitation of the D&C Contractor’s liability (see “– Limitation of Liability” in this PART 12)), are “back-to-back” with the obligations and liabilities imposed on the Borrower in the Lease Agreement to the extent applicable to the DB D&C Work. The D&C Contractor acknowledges and agrees in the D&C Contract that it is familiar with and also will comply with all other obligations and liabilities imposed by the Port Authority under the Lease Agreement that are applicable to the D&C Contractor due to its status as the Lead Contractor, a D&C Contractor, a contractor and a party to a Key Contract.

The D&C Contract also provides that, insofar as it relates to the DB D&C Work, the D&C Contractor will not act or omit to act to cause the Borrower to be in breach of any of the Borrower’s obligations under the Project Documents, including without limitation the Lease Agreement.

### **DB D&C Work**

#### ***Scope of the Work***

The “DB D&C Work” is defined in the D&C Contract as follows:

all of the D&C Work to be performed by [the D&C Contractor] pursuant to [the D&C Contract] and the Lease [Agreement] and the GMP, but except as limited by this Agreement, PDD. . . , and Qualifications, Assumptions, and Exclusions. . . Notwithstanding the foregoing, the DB D&C Work shall be deemed to include without limitation all required design-build services, DB Design Work, DB Construction Work, labor, materials, equipment and all other work and other services required to be performed and furnished by [the D&C Contractor] under and subject to the DB Project Documents for the full and timely completion of the DB D&C Work. For the avoidance of doubt, the DB D&C Work shall be

deemed to include work or services required to secure Governmental Approvals, Construction Applications, Permits, approvals, or sign-offs for the DB D&C Work as set forth in this Agreement. For the avoidance of doubt, the DB D&C Work does not include any Operations and Maintenance Work.

The D&C Contractor is required to perform the DB D&C Work in accordance with the terms and conditions of the D&C Contract.

### ***Guaranteed Maximum Price***

In consideration of the D&C Contractor performing the DB D&C Work pursuant to the D&C Contract, the D&C Contractor will be paid an amount of \$2,320,898,569 (as the same may be adjusted pursuant to the D&C Contract, the “Guaranteed Maximum Price” or “GMP”). The GMP includes allowances for particular aspects of the DB D&C Work, which include (a) items identified by the Borrower and the Port Authority for potential value engineering and reduction in the GMP, (b) Terminal 7 demolition and abatement work, (c) Terminal 7 foundation demolition work, (d) Gate T5-30 enabling work related to potential pile obstructions, (e) Terminal 6 Phases 1 and 2 work related to potential pile obstructions, (f) environmental allowance for Jet Blue Terminal 6 spill clean-up, abatement of fuel limes and related work, (g) Phases 1 and 2 roof penetrations for photovoltaic system, (h) certain west concourse work, and (i) fit-out allowance scope of work. The D&C Contractor will not be entitled to any payment other than the GMP for its performance of the DB D&C Work, provided that adjustments to the GMP may occur in accordance with the D&C Contract in connection with Material Borrower Changes, Compensation Events, or Unavoidable Delay Events (each as described below).

Payments by the Borrower to the D&C Contractor are made monthly based on the D&C Contractor’s performance of the DB D&C Work in accordance with the respective schedule of values that are set forth in the D&C Contract. In addition, such monthly payments include any costs of the D&C Contractor that fall under the allowances or Direct DB D&C Work Costs (which are included in the GMP but are not subject to drawdown in accordance with the pre-established schedules and are instead to be paid as incurred). The pre-established schedules and the GMP also include certain mobilization fees and start-up costs, which will be paid to the D&C Contractor at the times and in the amounts specified in the schedules. The D&C Contract provides that the D&C Contractor and the Borrower may alter the relevant schedules by mutual agreement (subject to Port Authority Approval, if applicable). See APPENDIX G – “SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Guaranteed Maximum Price (“GMP”), Subcontractor Buyout and Payments.”

### ***Cooperation***

The D&C Contract requires that the Borrower and the D&C Contractor cooperate and work in a diligent and expeditious manner to: (1) prevent, avoid and mitigate potential impacts to construction schedules, the scope of the D&C Work, and increased costs of construction for the Project, and (2) take into account how the D&C Work may impact Operations and Maintenance Work. These cooperation efforts include, for example, providing prompt updates to one another regarding possible changes to construction progress, seeking acceptable work-arounds to construction activities, identifying new or improved areas of coordination involving construction activities, and considering in good faith any proposed changes to the scope of work for the Project, as the case may be.

The D&C Contract also requires the D&C Contractor to cooperate with the Borrower and the Port Authority, including by attending meetings with the Port Authority. The D&C Contractor has also agreed

that the Borrower and the Port Authority (to the extent required by the Lease Agreement) shall have the right to communicate directly with the D&C Contractor's Design Professionals, provided that the D&C Contractor is included in each communication with the Design Professionals.

## **Change Orders and Directives**

### ***Changes***

The Borrower has the right from time to time during the DB D&C Work Period to effectuate changes to the DB D&C Work, to substitute materials, require different methods, to add or remove portions of the DB D&C Work, or alter the time, method, or cost of the D&C Contractor's execution of the DB D&C Work as the Borrower deems necessary or appropriate (each, a "Change"). A Change may be initiated (i) by the Borrower (a "Borrower Change") (ii) as a result of a Port Authority Change or any other Qualifying D&C Change, (iii) as a result of any other Change permitted by the Lease Agreement for which the D&C Contractor is entitled to Equivalent Project Relief, (iv) as a result of a Change expressly permitted by the D&C Contract, (v) through a Site Instructive, or (vi) through a Field Proceed Order. The review of a proposed Change or Changes by the D&C Contractor and any Subcontractor, regardless of the number of such reviews, is included in the D&C Contractor's General Conditions Costs, and will not be included as an additional cost to the Borrower on any Change Order. The cost and expenses of Changes will either increase or decrease the GMP, but such Change Order will not impact the amount of the Construction Contingency.

See APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Changes in the DB D&C Work."

### ***Contemplated Change Order Requests and Change Order Proposals***

Changes may be initiated by the Borrower (including changes requested by the Port Authority) by submitting to the D&C Contractor a Contemplated Change Order Request setting forth in detail the nature of the Change. In accordance with the applicable timing requirements under the D&C Contract, the D&C Contractor must subsequently prepare and submit to the Borrower a Change Order Proposal, which the Borrower must consider in good faith and submit to the Port Authority for its consideration pursuant to the Lease Agreement. Each Change Order Proposal is required to contain: (i) the estimated incremental DB D&C Work Costs (including applicable soft costs) during the DB D&C Work Period, including any applicable adjustments to the critical path or otherwise to the Baseline Schedule, (ii) the time impact analysis of the proposed change to the Baseline Schedule, including to any Milestone Event Date and/or the Scheduled Completion Date (unless there is no impact to the Baseline Schedule), (iii) any other deviation from the D&C Contractor's obligations under the Lease Agreement or from the Requirements and Provisions for Work that would result from the implementation of the proposed Change, and (iv) such other supporting documentation as may be reasonably requested by the Port Authority or the Borrower, as applicable.

If the Borrower (and, if required under the Lease Agreement, the Port Authority) approves a Change Order Proposal, the Borrower shall issue a Change Order setting that includes the agreed terms (including the payment terms) for that Change, which Change Order shall reflect the terms of the approved Change Order Proposal and, upon execution, shall become a part of the Construction Application and the D&C Contract. If applicable Milestone Event Dates shall be extended to a new date reflected in the approved Change Order.

### ***Borrower Change Directives***

If the Borrower and the D&C Contractor (and the Port Authority, in the event Port Authority Approval is required under the Lease Agreement) are unable to reach an agreement on a Change Order Proposal within seven (7) Days of submission, the Borrower may, in its sole and absolute discretion, issue a Borrower Change Directive directing the D&C Contractor to proceed with the DB D&C Work constituting such Change and, if applicable, providing for any adjustment in the Cost of the DB D&C Work, Baseline Schedule (subject to approval by the Port Authority, if required to adjust a date on the Baseline Schedule), Milestone Events, or Milestone Event Dates resulting from such Change. Upon the D&C Contractor's receipt of a Borrower Change Directive, the D&C Contractor is required to proceed with the DB D&C Work constituting the Change provided for therein, promptly after such receipt or as otherwise may be required in such Borrower Change Directive; provided that the D&C Contractor retains the right to dispute a Borrower Change Directive, and provided further that, if the value of the Borrower Change Directive(s), Field Proceed Order(s) and other amounts in dispute arising from the D&C Contract is equal to Ten Million Dollars (\$10,000,000) in the aggregate at any given time, then the Borrower and the D&C Contractor are required to proceed with interim dispute resolution procedures set forth in the D&C Contract, which includes meetings among the parties' principals and then mediation.

### ***Port Authority Changes and Qualifying D&C Changes***

The D&C Contractor's remedies against the Borrower under the D&C Contract due to a Port Authority Change or Qualifying D&C Change arising under the Lease Agreement, including additional compensation, extension of the Milestone Event Dates, or relief from Liquidated Damages (including any liquidated damages imposed on the Borrower by the Port Authority pursuant to the Lease Agreement), are limited against the Borrower in all instances to Equivalent Project Relief payable by the Borrower (it being understood that the D&C Contractor is not entitled to any relief or compensation directly from the Port Authority).

### ***Material Borrower Change***

A Borrower's Change shall only be compensable under the D&C Contract if it satisfies the criteria for a Material Borrower Change (as defined in APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT"). All relief arising from Changes to the D&C Contract is subject to the explicit terms and conditions of the D&C Contract.

### **Warranty**

The D&C Contractor warrants and guarantees (the "Warranty") to the Borrower the same warranty that the Borrower provides to the Port Authority under the Lease Agreement (subject to the terms of the D&C Contract). The Warranty includes the rectification of all nonconforming work, including, to the extent necessary, through removal and/or replacement thereof, whether discovered by the D&C Contractor, the Borrower, or the Port Authority. The Warranty with respect to each Phase is required to be for a term of two (2) years from the issuance by the Port Authority of the Phase 1 Completion Certificate or the Completion Certificate, as applicable, or for such term as required by the PDD, but, with respect to any portion of the DB D&C Work that is repaired and/or replaced during such two (2) year period, such term is required to be for two (2) years from the date of repair and/or replacement of such portion of the DB D&C Work, but in no event more than four (4) years from the date of commencement of the original Warranty provided that the Warranty with respect to any Installation Portion or Partial Occupancy Portion that has achieved partial completion prior to the Phase 1 Completion Date or the Completion Date, as applicable, will commence from the issuance by the Port Authority of a "Temporary Certificate of

Authorization to Occupy or Use” with respect to such Installation Portion or Partial Occupancy Portion, as applicable (the “Warranty Period”). In the event that any portion of the DB D&C Work is identified as being defective or nonconforming during the Warranty Period, the D&C Contractor, at its sole expense, is required to submit a corrective action plan meeting the requirements of the Lease Agreement and rectify such nonconforming and/or defective work, as applicable. The D&C Contractor must implement such corrective action plan within three (3) days of its receipt of the approval of such corrective action plan. In the event that the D&C Contractor fails to implement the corrective action plan, the Borrower may, in addition to exercising all other legal and equitable remedies it may have, (1) deduct from any payment due or thereafter to become due to the D&C Contractor under the D&C Contract, the amount of damage, cost or expense that has been or, as reasonably estimated by the Borrower, incurred by the Borrower due to such failure by the D&C Contractor, and (2) perform or cause to be performed any needed repairs and replacements, in which event the D&C Contractor shall compensate the Borrower for the cost thereof, on demand. The D&C Contractor has also expressly waived any claims noting that its guaranty or any of its Warranties have been impaired due to any corrective work performed by, or at the direction of, the Borrower. See APPENDIX G – “SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Warranty; Nonconforming Work.”

## **Compensation Events and Delay Events**

### ***Compensation Events***

In the event of the occurrence of a Compensation Event, the Lease Agreement provides that, subject to the notice requirements and submission of the necessary documentation and other requirements set forth therein, the Borrower will be entitled to certain compensation from the Port Authority with respect to such Compensation Event. See “PART 10– THE LEASE AGREEMENT – Compensation Events.” The D&C Contract provides that, subject to similar notice requirements, submission of the necessary documentation and satisfaction of the other requirements established under the Lease Agreement, the D&C Contractor will have the right to seek additional compensation from the Borrower for a Compensation Event. The D&C Contract provides that Equivalent Project Relief (including the D&C Contractor’s rights against the Borrower to enforce the Borrower’s obligations thereunder with respect to claims for Equivalent Project Relief (see “– Equivalent Project Relief” below)) will be the sole and exclusive rights of the D&C Contractor to relief for the adverse effects of a Compensation Event. See APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR” for information relating to Compensation Event Notices submitted by the Borrower to the Port Authority to date, which Notices and/or the details set forth therein may be disputed by the Port Authority.

### ***Delay Events***

In the event of the occurrence of a Delay Event, the Lease Agreement provides that, subject to the notice requirements and submission of the necessary documentation and other requirements set forth therein, the Borrower will be entitled to certain schedule extensions from the Port Authority with respect to such Delay Event. See “PART 10– THE LEASE AGREEMENT – Delay Events.” The D&C Contract provides that, subject to similar notice requirements, submission of the necessary documentation and satisfaction of the other requirements established under Lease Agreement, the D&C Contractor will have the right to seek a schedule extension from the Borrower for a Delay Event. The D&C Contract provides that Equivalent Project Relief (including the D&C Contractor’s rights against the Borrower to enforce the Borrower’s obligations thereunder with respect to claims for Equivalent Project Relief (see “Equivalent Project Relief” below)) will be the sole and exclusive rights of the D&C Contractor to relief for the adverse effects of a Delay Event, except in the case of Unavoidable Delay Events or a Borrower Suspension (see “Unavoidable Delay Events” below). See APPENDIX B-3 – “REPORT OF THE LENDERS’

TECHNICAL ADVISOR” for information relating to Delay Event Notices submitted by the Borrower to the Port Authority to date, which Notices and/or the details set forth therein may be disputed by the Port Authority.

### **Equivalent Project Relief**

The D&C Contract provides that, so long as the D&C Contractor complies with the requirements of the D&C Contract and subject to the limitations set forth thereunder, the D&C Contractor will benefit from and have the same rights, benefits and entitlements, including to financial compensation or any extension of time or relief from performance of DB D&C Work obligations under the D&C Contract, as those of the Borrower under the Lease Agreement; provided that such rights, benefits or entitlements under the D&C Contract (“Equivalent Project Relief”) will be conditional upon the existence and enforcement of a corresponding right, benefit or entitlement of the Borrower under the Lease Agreement (“Primary Project Relief”). Pursuant to the D&C Contract, the D&C Contractor must provide any claim for Equivalent Project Relief, including without limitation claims for changes to Applicable Standards, to the Borrower within sufficient time and in sufficient detail to enable the Borrower to submit such claim to the Port Authority for which Primary Project Relief may be available to the Borrower and, if the Borrower determines that such claim is a Reasonable D&C Contractor Claim, the Borrower will promptly forward and process such claim to the Port Authority as a claim for Primary Project Relief. At the Borrower’s request, the D&C Contractor is required to participate with the Borrower in the Borrower’s discussions with the Port Authority with respect to any claim for Primary Project Relief relating to the D&C Contractor’s obligations under the D&C Contract. Although the D&C Contract provides that the Borrower will take the lead in all such discussions with the Port Authority and that Borrower may settle any Reasonable D&C Contractor Claim without the consent of the D&C Contractor, if in such circumstances the amount requested in such Reasonable D&C Contractor Claim is greater than the amount for which the Borrower settles such Reasonable D&C Contractor Claim, then the D&C Contractor may either receive a pro-rata portion of the claim or bring a claim against the Borrower in respect of such difference.

The Borrower may decline to pursue any claim provided by the D&C Contractor that the Borrower determines (in its reasonable discretion) is not a Reasonable D&C Contractor Claim (and informs the D&C Contractor in writing), provided that the Borrower provides notice to the D&C Contractor within two (2) business days of receipt of such claim for Equivalent Project Relief. If the D&C Contractor disagrees, then D&C Contractor can direct the Borrower to pursue such claim at the D&C Contractor’s sole cost and expense.

See APPENDIX G – “SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Changes in the DB D&C Work.”

### **Delay and Liquidated Damages**

Pursuant to the D&C Contract, the D&C Contractor has agreed to pay the Borrower liquidated damages (“Liquidated Damages”) in the amount of (a) Three Hundred Seventy-Five Thousand Dollars (\$375,000) per day for failing to achieve Substantial Completion of Phase 1 by the applicable Milestone Event Date, and (b) Three Hundred Thirty Thousand Dollars (\$330,000) per day for failure to achieve Substantial Completion of Phase 2 by the applicable Milestone Event Date; provided that any Liquidated Damages shall not exceed Two Hundred Thirty-Two Million Dollars (\$232,000,000) (the “Liquidated Damages Cap”). The D&C Contract also provides for a thirty (30) day grace period before assessing Liquidated Damages; however, if the D&C Contractor does not timely cure its breach within such period, Liquidated Damages will begin to accrue from the applicable Liquidated Damages Milestone Event date (i.e., the first date giving rise to Liquidated Damages as opposed to starting the clock from day thirty one).

Notwithstanding the cap on Liquidated Damages, the parties have agreed in the D&C Contract that such cap does not limit the Borrower's right to seek direct damages arising from a D&C Contractor caused delay to the Project, which is set forth in more detail in APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Baseline Schedule."

### **Unavoidable Delay Events**

The D&C Contract sets forth certain events that are Unavoidable Delay Events in which the D&C Contractor is entitled to time and/or compensation subject to the terms of the D&C Contract. See APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Changes in the DB D&C Work."

Under the D&C Contract, the occurrence of an Unavoidable Delay Event may give rise to a claim against the Borrower and can entitle the D&C Contractor to relief from performing its obligations under the D&C Contract and may include adjustments to the GMP and/or the deadlines the D&C Contractor is required to meet with respect to the Project in order to avoid an Event of Default and the payment of Liquidated Damages (see "Termination Rights – Termination for D&C Contractor Default" below and "Delay and Liquidated Damages" above). In particular, the D&C Contractor may be entitled to an extension of time in respect of the applicable Milestone Event, compensation for such additional time, and an extension of time in respect of the Liquidated Damages Milestone Dates, in each case (1) to the extent attributable to an Unavoidable Delay Event and (2) if the D&C Contractor provides notice to the Borrower in accordance with the terms of the D&C Contract. The D&C Contractor's relief for Unavoidable Delay Events is set forth in APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Baseline Schedule."

### **Limitation of Liability**

Pursuant to the D&C Contract, the maximum aggregate liability of the D&C Contractor to the Borrower (including amounts recovered under any D&C Guaranty, the D&C Letter of Credit, surety bond or retainage, as applicable): (i) for default under, breach or termination of the D&C Contract (or negligence or breach causing termination of any DB Project Document); and (ii) in tort (including negligence and strict liability), for breach of a statutory duty or for any other cause of action in connection with the D&C Contract or related to the Project, the DB Project Documents or the DB D&C Work, inclusive of liability to pay Liquidated Damages (see "– Delay and Liquidated Damages" herein), will be limited to an amount equal to 35% of the sum of the GMP, as such GMP may be amended in accordance with the D&C Contract. Such limitations do not apply to certain events excluded therefrom in the D&C Contract, which are set forth in Appendix G "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Consequential Damages; Limitations on Liability." However, the D&C Contractor's aggregate liability to the Borrower for any errors or omissions in the DB Design Work shall be limited to the Fifty Million Dollars (\$50,000,000) (the "Design Limitation of Liability"), except the Design Limitation of Liability shall not apply to claims arising out of, resulting from, or in any way related to the misconduct or independent negligence of the D&C Contractor in the performance of non-DB Design Work. See APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Consequential Damages; Limitations on Liability."

## **Indemnity**

### ***Indemnification Pursuant to the Lease***

Pursuant to the D&C Contract, the D&C Contractor is required to indemnify and hold harmless the Borrower and the other indemnitees set forth in the D&C Contract for any liability for losses that the Borrower or such other indemnitees incur to any Port Authority Indemnified Party pursuant to the Lease Agreement to the extent resulting from any acts or omissions of the D&C Contractor or any other DB Party. Further, the D&C Contract establishes the Port Authority Indemnified Parties as indemnitees, with direct right of enforcement, in each indemnity given by the D&C Contractor under the D&C Contract.

Likewise, the D&C Contract requires the Borrower to include a similar provision in all contracts with separate contractors retained by the Borrower whereby such third-parties will indemnify and hold harmless the D&C Contractor for any liability for losses that the D&C Contractor incurs to any Port Authority Indemnified Party pursuant to the Lease Agreement to the extent resulting from any acts or omissions of the separate contractors (excluding the D&C Contractor and any DB Subcontractor).

For a description of such indemnity obligations under the Lease Agreement, see APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Indemnification.” See also APPENDIX G – “SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Indemnity.”

### ***Additional Indemnification by the D&C Contractor***

Pursuant to the D&C Contract, the D&C Contractor is also required to indemnify, defend and hold harmless the Borrower from and against any and all claims and losses suffered or costs incurred by the Borrower (including as a result of claims against the Borrower by third parties) to the extent caused by: (i) the negligent performance of the DB D&C Work; (ii) the infringement of any intellectual property right arising out of the performance of any of the DB D&C Work; (iii) the negligence or willful misconduct of the D&C Contractor or its Subcontractors; (iv) personal injury or property damage; and (v) the failure to comply with the applicable terms of the Lease Agreement or the Basic Lease or causing the Borrower to fail to comply with the terms of the Lease Agreement or the Basic Lease or to pay any amounts due thereunder, or causing the Borrower to fail to comply with the terms of the Lease Agreement or the Basic Lease or to pay any amounts due thereunder.

## **Construction Security**

### ***Parent Company Guaranty***

The D&C Contractor’s parent company, AECOM, a Delaware corporation, has provided a guaranty of the D&C Contractor’s obligations under the D&C Contract to the Borrower in the amount of Five Hundred Million Dollars (\$500,000,000) (the “Parent Company Guaranty”). The rights and benefits of the Borrower with respect to the Parent Company Guaranty were assigned to the Collateral Agent.

### ***D&C Letter of Credit***

The D&C Contractor provided three (3) irrevocable standby letters of credit issued by Credit Agricole Corporation & Investment Bank, JPMorgan Chase, and Wells Fargo in favor of the Borrower and the Collateral Agent in a form and substance consistent with the requirements under the Lease Agreement securing the payment and performance obligations of the D&C Contractor under the D&C Contract (collectively, the “D&C Letters of Credit”) in the amount of Two Hundred Thirty Two Million Eighty Nine

Thousand Eight Hundred Fifty Six Dollars (\$232,089,856). The D&C Letter of Credit shall remain in effect until the later of the calendar year stated therein to be the final expiration date thereof, or the Scheduled Completion Date of the DB D&C Work. The D&C Contractor shall amend the existing D&C Letters of Credit or deliver a replacement D&C Letter of Credit if the stated final expiration date thereof is prior to the then-anticipated Scheduled Completion Date. The D&C Contractor is obligated to renew, cause the renewal of, or replace the D&C Letter of Credit no later than sixty (60) days prior to the stated expiration date thereof. The D&C Contractor shall replace the D&C Letter of Credit if the issuer thereof ceases to be an Eligible Issuer within five (5) Business Days thereafter. If the Collateral Agent does not receive a replacement D&C Letter of Credit from an Eligible LC Issuer within the time specified, the Borrower or Collateral Agent, as applicable, may draw on the full available amount of the D&C Letter of Credit. See APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR.”

### ***Other Security***

The D&C Contractor and its Subcontractors have also procured payment and performance bonds in accordance with the D&C Contract. See also APPENDIX G – “SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Insurance and Construction Security.”

### **Suspension Rights**

#### ***Port Authority’s Right to Suspend***

Pursuant to the Lease Agreement, the Port Authority retains the right at any time to suspend, in whole or in part, the D&C Work by written order to the Borrower. See APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Design and Construction by the Lessee – Compliance Directives; Suspension of D&C Work.” The Borrower is required to provide the D&C Contractor with a copy of each such written suspension order relating to the DB D&C Work as soon as practicable, and the D&C Contractor’s relief in the event of a Port Authority suspension is subject to Equivalent Project Relief. Refer to summary of Lease Agreement for additional details regarding the Port Authority’s right to suspend the agreement and relief by the Borrower, whereby the D&C Contractor may seek Equivalent Project Relief pursuant to the D&C Contract. See APPENDIX E – “SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Design and Construction by the Lessee – Compliance Directives; Suspension of D&C Work.”

#### ***Borrower’s Right to Suspend***

The Borrower has the right at any time and for any reason, in whole or in part, to direct the D&C Contractor to suspend the DB D&C Work or any part thereof by giving written notice to the D&C Contractor. If the DB D&C Work is suspended by the Borrower, the DB Contractor will be entitled to a Change Order in accordance with the D&C Contract, provided that the D&C Contractor will not be entitled to any Change Order, additional costs, or schedule relief for any Port Authority directed suspension of the DB D&C Work. The Borrower may also unilaterally order the D&C Contractor to resume performance of the DB D&C Work at any time during. If the DB D&C Work is suspended by the Port Authority, the D&C Contractor will be entitled to Equivalent Project Relief from the Borrower to the extent that such suspension constitutes a Compensation Event and/or Delay Event pursuant to the Lease Agreement.

#### ***D&C Contractor’s Right to Suspend***

Subject to the Lenders’ rights under the D&C Contractor Direct Agreement and the Port Authority’s rights under any DB Direct Agreement, including the right to notice of default and the right to

cure, and further subject to the provisions of the D&C Contract regarding certain limitations on the right of the D&C Contractor to suspend its performance under the D&C Contract (as described in the last paragraph of this section), the D&C Contractor may suspend the DB D&C Work in the case of a Borrower payment default; provided that: (i) any such suspension will only be effective for a period commencing fourteen (14) days after the Borrower's receipt from the D&C Contractor of written notice of such suspension and ending on the date that the Borrower Payment Default is cured; (ii) if the Borrower Payment Default is not cured within fourteen (14) days after such notice, the D&C Contractor will be entitled to demobilize; and (iii) from the date of commencement of any such suspension until the earlier of the termination of the D&C Contract or the date that the Borrower Payment Default is cured, the Borrower will be required to compensate the D&C Contractor for the actual and documented costs (limited to any direct costs, payments to DB Subcontractors and Suppliers, demobilization and, if applicable, remobilization costs) and overhead and profit on the same that resulted from such suspension, and will be required to grant the D&C Contractor additional time for performance of the D&C Contractor's contractual obligations reflecting the delay resulting from such suspension, subject to the terms of the D&C Contract. See APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Changes in the DB D&C Work."

## **Termination Rights**

### ***Termination by Borrower for D&C Contractor Default***

The Borrower has the right to terminate the D&C Contract, upon notice to the D&C Contractor and subject to the applicable cure periods, if any, upon the occurrence of an Event of Default as set forth in the D&C Contract. See APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Termination Rights" for a complete list of all of the D&C Contractor Events of Default under the D&C Contract.

Upon termination due to an Event of Default, the Borrower shall have the right to take possession of and use all or any part of the D&C Contractor's materials, equipment, supplies and other property of every kind used by the D&C Contractor in the performance of the DB D&C Work, and engage the services of other parties therefore. The occurrence of an Event of Default in one Phase shall constitute an Event of Default in all other Phases. Further, the D&C Contractor may carry out any or all of the obligations of the D&C Contractor, either directly or through others, and charge the cost thereof to the D&C Contractor.

### ***Termination of Lease for D&C Contractor Default***

If the Port Authority exercises its right to terminate the Lease Agreement due to the fault of the D&C Contractor, then the D&C Contractor shall pay the Borrower its proportionate share of the costs and expenses incurred by the Borrower and the Port Authority attributable to the D&C Contractor in connection with such termination, including without limitation, any re-entry, regaining or resumption of possession, collecting all amounts due to the Borrower and the Port Authority, the cleaning, repair, or restoration of any space which may be used and occupied under the Lease Agreement (on failure of the D&C Contractor to have it cleaned, repaired or restored), the care and maintenance of such space during any period of non-use of the space, the foregoing to include without limitation personnel costs and legal expenses (including but not limited to the cost to the Borrower or the Port Authority of in-house legal services), repairing the space and putting the space in order (such as but not limited to repairing, cleaning, and restoring the same pursuant to the Lease Agreement). Termination shall not relieve the D&C Contractor of any liabilities or obligations hereunder which shall have accrued on or prior to the effective date of the termination.

### ***Termination by the D&C Contractor***

The D&C Contractor has the right to terminate the D&C Contract for cause upon forty-five (45) days' prior written notice and opportunity to cure to the Borrower if any undisputed amounts due to the D&C Contractor remain unpaid for more than forty-five (45) days after the date the same becomes due to the D&C Contractor under the D&C Contract and remains unpaid at the end of such notice and cure period.

### ***Other Termination***

Subject to the Lenders' rights under the D&C Contractor Direct Agreement, to the Port Authority's right to assignment of the D&C Contract under certain circumstances upon termination of the Lease Agreement, and to satisfaction of the D&C Contractor's obligations under the D&C Contract upon termination of the Lease Agreement, the D&C Contract will terminate automatically if the Lease Agreement is terminated for whatever reason, including the Borrower's default thereunder, without liability of the Borrower or the Port Authority for the D&C Contractor's lost profits or business opportunity. In the event of a termination of the Lease Agreement entitling the Borrower to compensation from the Port Authority, the Borrower will (i) notify the D&C Contractor and work with the D&C Contractor in preparing any applicable claim for termination compensation and (ii) to the extent practicable, provide the D&C Contractor with an opportunity to participate in the discussion and resolution of any claim with the Port Authority.

### ***Compensation to the D&C Contractor Upon Termination***

Should the Borrower terminate the D&C Contract for cause and subject to the Borrower's right to withhold payments arising from the D&C Contract, the D&C Contractor will only be entitled to payment for that portion of the GMP incurred by the D&C Contractor in the performance of the DB D&C Work up to the date of termination and for all materials, supplies and equipment incorporated in the DB D&C Work and/or stored at the Project Site or at such off-site storage locations as shall have been approved by the Borrower in accordance with the provisions of the D&C Contract. The D&C Contractor shall not however be entitled to recover anticipated profits on account of the Base Fee, General Requirements Costs and/or the General Conditions Costs or the anticipated profits of Subcontractors for portions of the DB D&C Work unperformed or for materials or equipment unfurnished, nor for reimbursement for Losses arising out of matters covered by insurance.

Should the Borrower terminate the D&C Contract for convenience, it must pay the D&C Contractor for, among other things, the following items: (a) all retainages, if any, earned by the D&C Contractor except retainages as to any Subcontracts assumed by the Borrower; (b) a sum of money equal to the Cost of the DB D&C Work incurred by the D&C Contractor for which payments have not theretofore been made under the D&C Contract, including all reasonable costs of demobilization, close-out and site stabilization costs; and (c) the pro rata portion of the Base Fee applicable to the DB D&C Work performed by the D&C Contractor through the effective date of such termination, including any "true up" thereof. The D&C Contractor will not be entitled to receive anticipated profits on any DB D&C Work not yet performed or any damages though, consequential or otherwise.

Should the D&C Contractor terminate the D&C Contract, the Borrower must pay the D&C Contractor for, among other things, the following items: (i) the Cost of the DB D&C Work due to the D&C Contractor for DB D&C Work performed through the date of termination; (ii) the Base Fee for such DB D&C Work; and (iii) actual, reasonable and demonstrated demobilization costs, close-out costs and costs incurred to protect or preserve the DB D&C Work.

All payments shall be subject to the Borrower's rights to withhold pursuant to the terms of the D&C Contract. See APPENDIX G – "SUMMARY OF CERTAIN PROVISIONS OF THE D&C CONTRACT – Termination Rights" for the D&C Contractor's remedies in the event of a termination of the D&C Contract.

### **PART 13 – OPERATION AND MANAGEMENT OF THE PROJECT**

The Borrower is responsible under the Lease Agreement for all Operations and Maintenance Work for the Premises.

The Borrower has entered into the Management Services Agreement with the Manager wherein the Manager is required to provide the Borrower with services and support in connection with the Borrower's responsibility to perform the Operations and Maintenance Work. The term of the Management Services Agreement commenced on the Original Closing Date, and will extend until December 30, 2060 (i.e., the expiration date of the Lease Agreement), unless extended pursuant to an extension in the term of the Lease Agreement or terminated earlier as described therein. Capitalized terms used in this Part 13 and not defined in this Part 13 will have the meanings given to such terms in APPENDIX H – "SUMMARY OF CERTAIN PROVISIONS OF THE MANAGEMENT SERVICES AGREEMENT."

Under the Management Services Agreement, the Manager provides to the Borrower recommended nominees for appointment to the position of Chief Executive Officer of the Borrower together with other capable and experienced key management personnel that it recommends serve in senior management roles of the Borrower (collectively, the "Executives"). Upon approval of the HoldCo Board, such Executives are seconded to the Borrower by the Manager. The Manager also proposes additional personnel for secondment to the Borrower, including for the positions of Project Manager, Project Director and Design Manager as set out in the Lease Agreement. The appointment of all non-Executive personnel is solely within the control of the Executives. The Executives and such additional personnel shall be the only Borrower personnel, all of which are seconded to the Borrower by the Manager. The positions in the Borrower held by the Manager's employees are as set out in an organizational chart approved by the Borrower from time to time.

The broad services provided by the Manager to the Borrower under the Management Services Agreement include the secondment of Manager personnel to the Borrower, and through such personnel and other third-party resources, the provision of day-to-day management of the Borrower's business and operations, which includes, without limitation:

- General management services, including providing access to qualified corporate personnel, data and systems as may be required in connection with the performance of the Manager's obligations under the Management Services Agreement; designing, implementing and maintaining appropriate accounting functions; selecting and managing the installation of computer and information systems for financial, administrative and operational systems; providing enterprise risk management including administering insurance programs and managing and overseeing the outsourcing of services to be provided to the Borrower by third parties such as snow removal, safety, security and janitorial services;
- Design and construction program services, including managing and coordinating the Borrower's rights and obligations as described in the D&C Contract with the D&C Contractor; working with all parties with the objective of ensuring the project scope is delivered on time and on budget and administering and coordinating the work and activities of third-party consultants;

- Operational readiness and transition (“ORAT”) services, including coordinating ORAT plan activities with the Borrower, the Port Authority and stakeholders; assisting with the commissioning, activation and training associated with new systems and equipment with the D&C Contractor; developing and implementing training and orientation programs and developing and managing operations center procedures; and
- Operations and maintenance services, including providing access to qualified personnel for guidance and support in relation to terminal and ramp operations; preparing an annual operations and maintenance business plan and annual services budget for submission to HoldCo’s Board; establishing commercial lease policies and plans; providing assistance and coordination in the development of corporate plans and strategies and providing ongoing capital and life cycle planning assistance and coordination.

The Manager has access to Vantage’s airport network, including but not limited to its know-how, guides and manuals with respect to best industry practices for administration, financing, human resources, operations, information technology and commercial and brand issues as may be necessary for it to perform the management services. While the Manager is obligated to provide the requisite management services under the Management Services Agreement in accordance with best management practice, the obligations under the Lease Agreement with respect to the Operations and Maintenance Work will remain the primary obligations of the Borrower and will not be deemed to have passed through to the Manager except as provided for in the Management Services Agreement.

The Manager has entered into a subcontract with RXR JMP Development Services LLC (the “Manager Subcontractor”), an affiliate of the RXR Member on commercial terms and conditions in relation to the Manager Subcontractor’s provision of certain services to the Manager, including design and construction contract administration, public affairs support and stakeholder outreach. The services provided by the Manager Subcontractor are a subset of the services provided by the Manager under the Management Services Agreement, and any fees payable to the Manager Subcontractor are paid out of Management Services Agreement fees.

Under the Management Services Agreement, the Manager is entitled to the following fees (the “MSA Fees”) as compensation for its services:

- on the Original Closing Date, a one-time fixed mobilization fee in an amount equal to \$2,400,000 in respect of the mobilization services provided by the Manager to the Borrower on or prior to the Original Closing Date, together with all reasonable third-party and out-of-pocket costs and expenses incurred in connection therewith;
- for the period from and after the Original Closing Date and up to and until Substantial Completion of Phase 2 of the D&C Work, a fee for the provision of services in connection with the D&C Work in the aggregate amount of \$20,000,000, payable in monthly installments;
- during the term, a management fee, paid monthly in arrears, and prorated for any stub year calculated as follows:
  - for the period from and after the Original Closing Date and up to and including Substantial Completion of Phase 2 of the D&C Work, \$6,600,000 per annum (adjusted by the consumer price index specified in the Management Services Agreement on the Original Closing Date and indexed to March 1, 2018); and

- for the period subsequent to Substantial Completion of Phase 2 of the D&C Work, an amount equal to \$6,800,000 per annum (adjusted by the consumer price index specified in the Management Services Agreement and indexed to March 1, 2018); and
- for the period from and after the Original Closing Date and up to and including the DBO of Phase 2 of the D&C Work, an operational readiness and transition services fee, calculated as follows:
  - for the period from and after the Original Closing Date and up to and including December 31, 2022, an amount equal to \$2,250,000 payable on December 31, 2022;
  - for the period after December 31, 2022, and up to and including the DBO of Phase 1 of the D&C Work, an amount equal to \$3,750,000 payable on the DBO of Phase 1 of the D&C Work; and
  - for the period subsequent to the DBO of Phase 1 of the D&C Work, and up to and including the DBO of Phase 2 of the D&C Work, an amount equal to \$1,500,000 payable on the DBO of Phase 2 of the D&C Work.

The management fees and expenses of the Manager under the Management Services Agreement will generally be paid from revenues of the Borrower prior to debt service on the Series 2024 Bonds and the Loan Facility as part of the Borrower’s Permitted O&M Expenses.

Vantage Airport Group (US) Ltd. is providing a guarantee of the Manager’s performance and payment obligations under the Management Services Agreement.

The Manager reports and is accountable to HoldCo’s Board. The Manager is an indirect wholly owned subsidiary of Vantage.

For a further description of the Management Services Agreement, see APPENDIX H – “SUMMARY OF CERTAIN PROVISIONS OF THE MANAGEMENT SERVICES AGREEMENT.”

#### **PART 14 – AIRLINE REVENUES**

Airline revenues from Terminal 7 and Terminal 6 are expected to comprise one of the Borrower’s primary revenue sources. Airline revenues includes (i) all activity-based or per-enplaned-passenger fees, as well as fixed leased space revenue from (a) airlines and (b) other businesses that provide support directly related to the operation of aircraft, enplaning and deplaning of passengers and ground or passenger handling services as well as (ii) fixed leased space revenue from renting ancillary storage space within Terminal 7 and Terminal 6 to concessionaires.

In connection with the Project, the Borrower has projected Airline revenues for Terminal 7 and Terminal 6 for the period from the beginning of the fiscal year ending December 31, 2024 through the end of the fiscal year ending December 31, 2032 (the “Projection Period”), which projections have been reviewed by the Airport Consultant. For more information see Section 5.2 “Airline Revenues” of the Report of the Airport Consultant appended hereto as APPENDIX B-1 – “REPORT OF THE AIRPORT CONSULTANT.”

## **Terminal 7 Airline Revenues**

The Borrower currently operates Terminal 7 with the support of the Manager during construction of Phase 1. Once Phase 1 is complete, Terminal 7 will be decommissioned and demolished. See “PART 11 – THE PROJECT – Phasing of the Project – Phase 1 & Phase 2.”

Upon taking over management of Terminal 7 in late 2022, the Borrower negotiated new subleases with all airlines operating in Terminal 7 and with certain other additional airlines. As a result of the Borrower’s efforts, 13 airlines currently operate from Terminal 7:

- Aer Lingus
- Air Canada
- Alaska Airlines
- ANA
- Condor
- Ethiopian Airlines
- Frontier
- HiSky
- Icelandair
- Kuwait Airways
- LOT Polish Airlines
- Norse Atlantic
- Sun Country Airlines

Despite disruptions due to the immediate decommissioning of multiple gates and other changes on site to accommodate construction of Terminal 6, the Borrower has successfully managed operations at Terminal 7 and currently projects Terminal 7 airline revenues in 2024 and 2025 of approximately \$97.5 million and \$89.4 million, respectively.

In addition, through its management of Terminal 7, the Borrower has been advantaged in attracting airline tenants to Terminal 6 by being able to provide interim gating opportunities at the Airport and reducing the potential for disruptions from an airline’s transition to Terminal 6. The Borrower has also been able to develop commercial relationships with airlines operating at Terminal 7 as well as at the Airport more generally to successfully attract certain airlines currently operating at Terminal 7 or at other terminals at the Airport to become tenants in Terminal 6 upon Completion of Phase 1. Managing Terminal 7 has also allowed the Borrower to develop and refine operating procedures in real-time at the Airport and be better prepared to manage operations at Terminal 6 from the outset.

## **Terminal 6 Airline Revenues**

As described in the Report of the Airport Consultant appended hereto as APPENDIX B-1, in addition to the JetBlue Sublease, the Borrower expects multiple airlines to operate from Terminal 6 following the completion of Phase 1. The Borrower has negotiated non-binding letters of intent with term sheets outlining the agreed-upon terms and conditions of subleases with each of seven airlines (the “Expected Airlines”): Aer Lingus, Cathay Pacific, Lufthansa AG (along with their affiliates Austrian Airlines, Brussels Airlines, and Swiss International Air Lines), and one additional long-haul foreign flag airline. Lufthansa AG and its affiliates are currently expected to begin operations at Terminal 6 only upon completion of construction of the one additional widebody gate anticipated in the third quarter of 2026

shortly after the completion of Phase 1— see “PART 11 – THE PROJECT – Phasing of the Project – Phase 1 & Phase 2.”

Aer Lingus and the other foreign flag airline currently operate from Terminal 7. Cathay Pacific and Lufthansa AG and its affiliates currently operate from Terminal 8 and Terminal 1, respectively.

The Borrower is in various stages of negotiation of subleases with each such Expected Airline. The terms of the Terminal 6 subleases with the Expected Airlines are each anticipated to be greater than 15 years. Once negotiated, all such subleases will be subject to the consent of the Port Authority pursuant to the terms of the Lease Agreement, and, until the discharge of the Senior Bank Obligations, may be subject to the consent of the Administrative Agent pursuant to the terms of the Common Terms Agreement. For more information see “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Direct Agreements”, “PART 10 – LEASE AGREEMENT – Subleases” and “PART 17 – RISK FACTORS – Risks Related to Sublease Agreements.”

The percentage of projected airline revenues represented by the operations of the Expected Airlines are 57% in 2027 (the first full-year of operations following the anticipated completion of Phase 1) and 36% in 2029 (the first full year of operations following the anticipated completion of Phase 2).

In addition to JetBlue and the other Expected Airlines, the Borrower is engaged in discussions with other selectively targeted and interested airlines (“Additional Targeted Airlines”, together with the Expected Airlines “Other Airlines”) to operate from Terminal 6 (including certain airlines operating at Terminal 7) based on a number of factors, including their expected schedule and use of gate or FIS facilities and their passenger profile, airline alliance (e.g. Star Alliance), and their strategic fit with Terminal 6.

See Section 5.2.2 “Terminal 6 Airline Revenues” in the Report of the Airport Consultant appended hereto as APPENDIX B-1 for additional information regarding Airline Revenues.

### ***JetBlue Revenues***

JetBlue and the Borrower entered into the JetBlue Sublease, which runs through December 31, 2050, pursuant to which JetBlue will be a tenant in Terminal 6 and has preferential use rights with respect to the holdroom and aircraft apron associated with the new narrowbody gate to be completed in Phase 1 (“Gate 31”), as well as access to sterile corridors leading from Gate 31 to the FIS area in Terminal 5 and from Gate 31 to the Terminal 6 FIS area. JetBlue will also have access to a maximum of eight ticket counters and the outbound baggage system in Terminal 6 under certain conditions outlined in the JetBlue Sublease. For the purpose of the financial analysis below and in the Report of the Airport Consultant, the JetBlue Sublease is assumed to commence on January 1, 2026, and expire on December 31, 2050. Airline revenues from the JetBlue Sublease during the Projection Period are projected to be approximately \$12.1 million in 2027, \$13.7 million in 2029 and \$23.2 million in 2032, and are summarized below:

### Projected Terminal 6 JetBlue Revenues (in Millions)

SOURCE: JFK Millennium Partners, LLC, October 2024.

See Section 5.2.2.1 “JetBlue Airways Corporation” in the Report of the Airport Consultant appended hereto as APPENDIX B-1 for additional information regarding the JetBlue Sublease, including certain revenue projections association therewith.

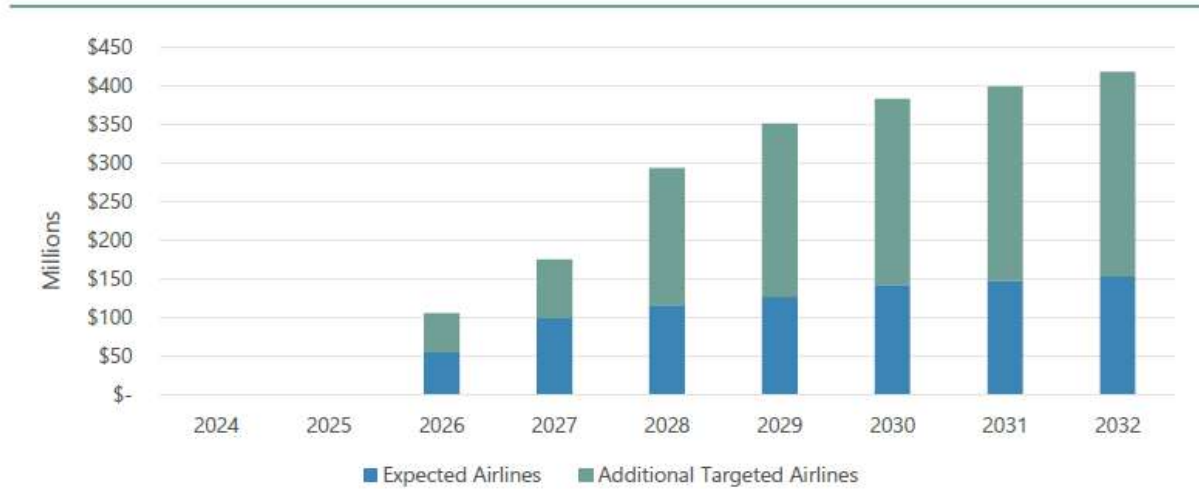

#### ***Other Airline Revenues***

Airline revenues from Other Airlines is made up of revenue from activity-based fees, as well as leased space revenues.

Total airline revenues from the seven Expected Airlines are projected to be approximately \$99.6 million in 2027, \$127.2 million in 2029 and \$153.5 million in 2032, comprised of activity-based fees of approximately \$87.2 million in 2027, \$108.4 million in 2029 and \$129.9 million in 2032 and leased space revenues of approximately \$12.4 million in 2027, \$18.8 million in 2029 and \$23.6 million in 2032.

Total airline revenues from the Additional Targeted Airlines are projected to be approximately \$75.9 million in 2027, \$223.8 million in 2029 and \$264.3 million in 2032, comprised of activity-based fees of approximately \$73.2 million in 2027, \$218.2 million in 2029 and \$257.2 million in 2032 and leased space revenues of approximately \$2.7 million in 2027, \$5.6 million in 2029 and \$7.1 million in 2032.

### Projected Terminal 6 Other Airline Total Revenues (in Millions)

**NOTES:**

Does not include JetBlue.

Revenues include activity-based and lease revenues.

Expected Airlines include Aer Lingus, Cathay, Lufthansa AG (and its affiliates Austrian Airlines, Brussels Airlines, and Swiss International Air Lines), and one additional long-haul foreign flag airline.

SOURCE: JFK Millennium Partners LLC. October 2024.

#### ***Ancillary Revenues***

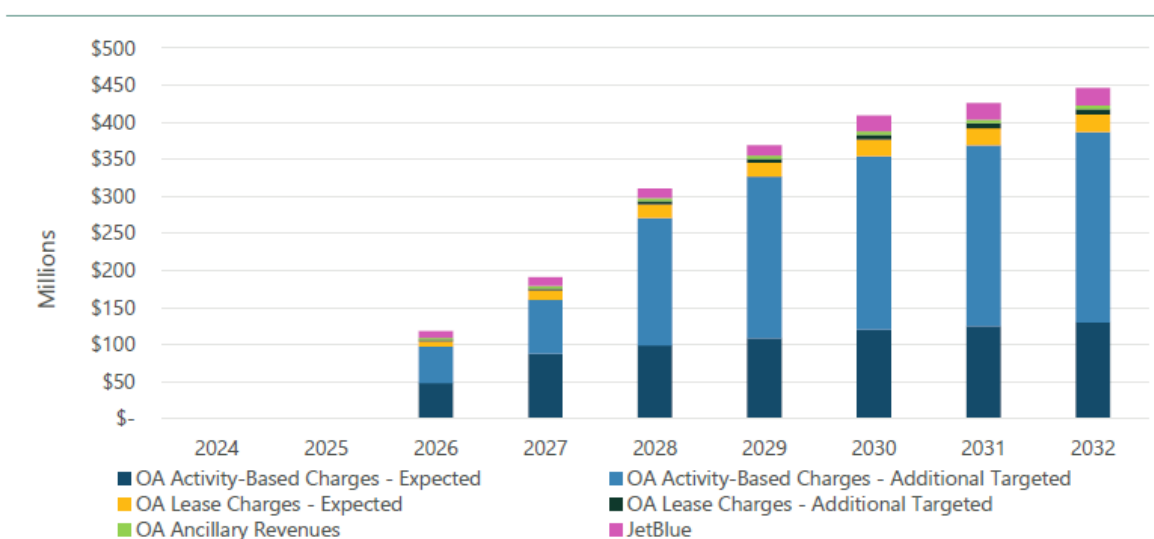

Revenues from other ancillary airline users, including other businesses that provide support directly related to the operation of aircraft, enplaning and deplaning of passengers and ground or passenger handling services, as well as fixed leased space revenue from renting ancillary storage space within Terminal 7 and Terminal 6 to concessionaires in each case during the Projection Period are projected to be approximately \$3.3 million in 2027, \$4.6 million in 2029 and \$5.0 million in 2032.

#### ***Total Airline Revenues***

Total airline revenues from JetBlue, Other Airlines and Ancillary Revenues during the Projection Period are projected to be approximately \$190.9 million in 2027, \$369.2 million in 2029 and \$446 million in 2032, and are summarized on the following table:

### Projected Terminal 6 Airline Revenues (in Millions)

NOTES:

SOURCE: JFK Millennium Partners, LLC, October 2024.

The increase in total airline revenues during the Projection Period is primarily due to the expected increases in enplaned passengers for those years and annual inflation or other adjustments to airline rates and charges.

See Section 5.2.2 “Terminal 6 Airline Revenues” in the Report of the Airport Consultant appended hereto as APPENDIX B-1 for additional information regarding airline revenues.

## **PART 15 – NON-AIRLINE REVENUES**

The Borrower also receives non-airline revenues generated primarily by concession revenues, but which also includes advertising revenues, certain rebate revenues, other non-airline operating revenues and interest income. A portion of revenues received by the Borrower from certain of these revenue sources are required to be shared with the Port Authority, as further described below.

In connection with the Project, the Borrower has projected non-airline revenues for Terminal 6 during the Projection Period, which projections have been reviewed by the Airport Consultant. For more information see Section 5.3 “Non-Airline Revenues” and Table 5-9 “Projected Cash Flow and Debt Service Coverage (Dollars in Millions) – Baseline Scenario” of the Report of the Airport Consultant appended hereto as APPENDIX B-1 – “REPORT OF THE AIRPORT CONSULTANT.”

The Borrower anticipates that it will begin receiving non-airline revenues from Terminal 6 operations in 2026, after the expected completion of Phase 1 and the initial opening of Terminal 6.

### **Concession Revenues**

The Borrower, with the support of the Manager, currently manages the concession programs at Terminal 7 and is procuring and will manage the concession programs at Terminal 6.

In addition to supporting the Borrower in Terminal 7, Vantage’s experience in terminal concessions programs as either overall terminal operator or concessions manager includes New York’s LaGuardia Airport Terminal B, Chicago Midway and Kansas City International Airport.

Leveraging the extensive concessions experience of the Manager, the Borrower has implemented, and will continue implementing, commercial strategies for both Terminal 6 and Terminal 7 in terms of concessionaire management, space design and layout, and product category mix.

The Terminal 7 concessions program includes, and the Terminal 6 concessions program is expected to include, multiple duty-free/travel, specialty retail, news and gifts/convenience and food and beverage offerings. The Borrower has already selected the majority of concessions operators for Terminal 6 and is in the process of negotiating concession subleases with all expected tenants. The Borrower has also previously announced partnerships with Avolta companies Hudson and Dufry to operate more than 28,000 square feet of duty-free, travel convenience and specialty retail stores in Terminal 6 as well as with various local and diverse food and beverage operators to provide an authentic New York culinary experience in the new terminal. As with subleases with airline tenants, once negotiated, all concession subleases will be subject to the consent of the Port Authority pursuant to the terms of the Lease Agreement, and, until the discharge of Senior Bank Obligations, may be subject to the consent of the Administrative Agent pursuant to the terms of the Common Terms Agreement. For more information see “PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Direct Agreements”, “PART 10– LEASE AGREEMENT – Subleases” and “PART 17 – RISK FACTORS – Risks Related to the Lease Agreement.”

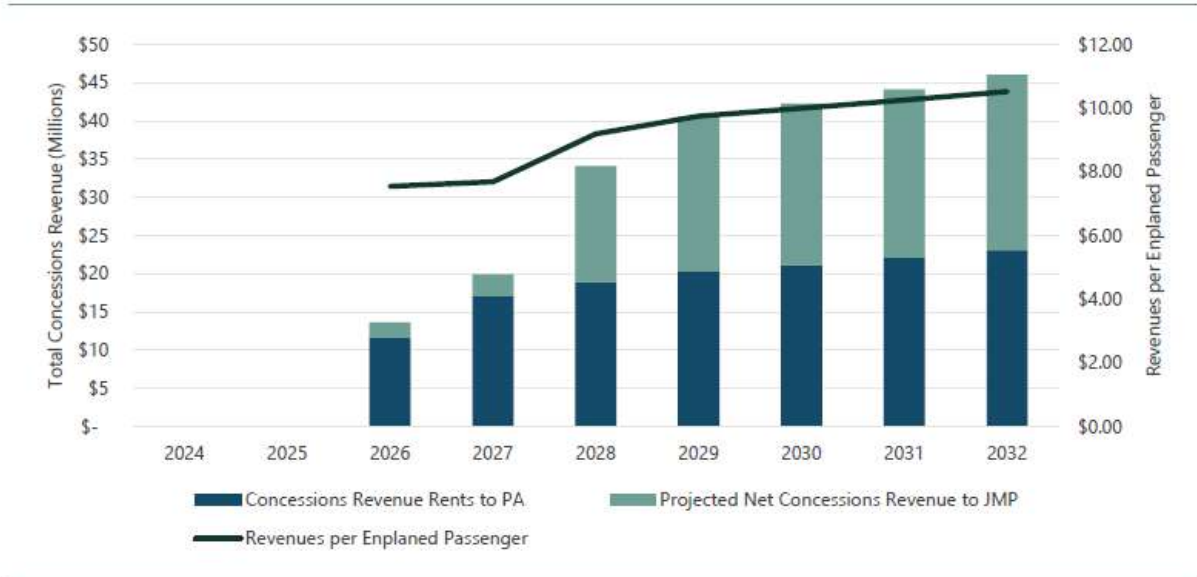

The Borrower requires and will require each concession sublessee operating in Terminal 7 or that will operate in Terminal 6 to pay rentals to the Borrower pursuant to their applicable concessions sublease. Pursuant to the Lease Agreement, the rentals collected by the Borrower from each concession sublessee will be split between the Borrower and the Port Authority, with the Port Authority being entitled to the

greater of 50% of such rental amounts or, in certain cases, a minimum guaranteed rent amount calculated by reference to the number of enplaned passengers using Terminal 6. Revenues payable to the Port Authority under the Lease Agreement are not pledged for the payment of the Obligations, including the Series 2024 Bonds, and will be paid by the Borrower directly to the Port Authority. See “PART 10– THE LEASE AGREEMENT – Principal Rights and Responsibilities of the Parties – Payments by the Borrower.”

Total concession revenues to be received by the Borrower are projected to be approximately \$20.0 million in 2027, \$40.5 million in 2029 and \$46.1 million in 2032.

The following chart presents the total concession revenue projected to be received by the Borrower and the Port Authority for Terminal 6, as well as projected concession revenue per enplaned passenger in Terminal 6, in each case during the Projection Period:

**Projected Concession Revenue (in Millions) and Concession Revenues per Terminal 6 Enplaned Passenger**

NOTE: PA - Port Authority of New York and New Jersey.  
 SOURCES: JFK Millennium Partners, LLC, October 2024.

**Advertising Revenues**

The Borrower anticipates receiving advertising revenues, which reflect the Borrower’s share pursuant to the Lease Agreement of the Terminal 6 portion of the Port Authority’s airports-wide advertising revenue program administered by Clear Channel Airports. Advertising revenue projections for Terminal 6 are calculated based on a metric of Terminal 7 advertising revenues per enplaned passenger, adjusted for inflation, applied to the number of enplaned passengers departing from Terminal 6.

Total advertising revenues to be received by the Borrower are projected to be approximately \$1.8 million in 2027, \$3.4 million in 2029 and \$3.8 million in 2032. However, throughout the Projection Period, advertising on a per passenger basis is anticipated to remain flat and increases in the projected revenues are a result of inflation.

## **Rebate Revenues**

The Borrower anticipates receiving rebate revenues in 2026, 2028 and 2029 in the form of repayments of capital expenditures incurred by the Borrower in preparing storefronts for concessionaire tenants that were initially provided by the Borrower, and solar PV installation vendor rebates.

Total rebate revenues to be received by the Borrower are projected to be approximately \$1.5 million in 2026, \$4.7 million in 2028 and \$1.0 million in 2029, with no rebates expected in any other years of the Projection Period.

## **Other Non-Airline Operating Revenues**

Separate from direct rental income from concession sublessee's, the Borrower anticipates collecting other non-airline operating revenues including common area maintenance fees and marketing fees for certain maintenance and marketing services provided for or on behalf of concession sublessees. Total other non-airline operating revenues to be received by the Borrower are projected to be approximately \$1.8 million in 2027, \$2.9 million in 2029 and \$3.3 million in 2032.

## **Interest Income**

The Borrower also expects to receive investment earnings from various accounts in which its funds are held. Interest income is not projected to be received until 2028 and then to be approximately \$9.9 million in 2029 and \$8.6 million in 2032. The interest rate on the deposits has been assumed to be 3% throughout the lease period.

## **Total Non-Airline Revenues**

Total non-airline revenues from all sources during the Projection Period are projected to be approximately \$23.6 million in 2027, \$57.8 million in 2029 and \$61.7 million in 2032, and are summarized on the following table:

## Projected Terminal 6 Total Non-Airline Revenues (in Millions)

SOURCES: JFK Millennium Partners, LLC, October 2024.

## PART 16 – THE CONSULTANTS’ REPORTS

### Summary of Consultants’ Reports

The Borrower has engaged the Airport Consultant, Airline Traffic Forecast Consultant, Lenders’ Technical Advisor and Insurance Consultant, each to prepare their respective reports attached hereto as APPENDIX B-1, B-2, B-3, and B-4, respectively. The Report of the Airport Consultant evaluates the ability of the Borrower to comply with the requirements of the Financing Documents, including regarding its payment obligations with respect to the Series 2024 Bonds, on a pro forma basis for Fiscal Years, ending December 31, 2024 through 2032, based on the assumptions described therein. The Report of the Airline Traffic Forecast Consultant evaluates and forecasts passenger demand to determine revenue generation for Terminal 6 from 2024 through 2060. This report takes into account population, economy, demographics, and air transportation marketplace to provide context for the forecast results and the outlook for future passenger traffic and capacity at the Airport. The Report of the Lenders’ Technical Advisor provides an independent review and evaluation of the Borrower’s approach to the Project, including technical solutions and contractual arrangements on behalf of the Lenders. Key areas reviewed include the Project structure and risk transfer, site conditions, permitting, design and construction approach, cost, schedule, operations, maintenance and lifecycle. Finally, the Report of the Insurance Consultant provides an independent review of the Borrower’s insurance coverage and risk management in connection with the Project.

### Report of the Airport Consultant

Ricondo & Associates, Inc. (the “Airport Consultant” or “Ricondo”) prepared the Report of the Airport Consultant, dated October 10, 2024 (the “Original Report of the Airport Consultant”), which

analyzed and reviewed projected Terminal 7 and Terminal 6 revenues and rates and charges. The Airport Consultant has prepared the Letter of the Airport Consultant, dated October 23, 2024 (the “Letter of the Airport Consultant” and together with the Original Report of the Airport Consultant, the “Report of the Airport Consultant”), to supplement the Original Report of the Airport Consultant based on the final pricing information related to the Series 2024 Bonds. The Report of the Airport Consultant is included in this Official Statement as APPENDIX B-1. See APPENDIX B-1 – “REPORT OF THE AIRPORT CONSULTANT.”

In developing its analyses, the Airport Consultant reviewed:

- I. certain projections and forecasts provided by the Borrower and its advisors;
- II. activity forecasts developed by the Airline Traffic Forecast Consultant, a technical advisor on air traffic activity to the Borrower, regarding the ability of the area served by the Airport to generate demand for air service at the Airport, specifically at Terminal 7 and Terminal 6; trends in air service and passenger activity in Terminal 7 and Terminal 6; and
- III. the financial performance of Terminal 7 and Terminal 6 for the Projection Period.

The Airport Consultant Report must be read in its entirety and any summary herein is qualified in its entirety to such report. The Airport Consultant has reviewed certain projections of revenues provided by the Borrower for the Projection Period. The Airport Consultant has also reviewed certain projections of expenses provided by the Borrower of the operation of the Terminal 7 and Terminal 6 through the Projection Period. The Airport Consultant has classified these expenses for each year, as: (i) operation and maintenance of the Premises, (ii) asset repair and replacement of Terminal 6, (iii) satisfying the Operation and Maintenance Reserve Requirement and the Major Maintenance Requirements, (iv) paying rents due to the Port Authority, and (v) paying debt service on the Series 2024 Bonds and the Loan Facility.

The Airport Consultant has concluded that (i) Terminal 6 revenues will be sufficient to comply with the Rate Covenant/Financial Ratio Covenant in each year of the Projection Period and (ii) Terminal 6 airline rates and charges should remain reasonable as compared with those at other large-hub U.S. airport terminals and their respective markets.

### **Report of the Airline Traffic Forecast Consultant**

ASM Global Route Development Consultants (the “Airline Traffic Forecast Consultant” or “ASM”) prepared the Report of the Airline Traffic Forecast Consultant, which reviews projected airline traffic for Airport and Terminal 6, included in this Official Statement as APPENDIX B-2. See APPENDIX B-2 – “REPORT OF THE AIRLINE TRAFFIC FORECAST CONSULTANT.”

### **Report of the Lenders’ Technical Advisor**

BTY Group (the “Lenders’ Technical Advisor” and together with the Airport Consultant and the Airline Traffic Forecast Consultant, the “Consultants”) prepared its report, which reviews the technical aspects of the Project and supporting information provided by the Borrower, included in this Official Statement as APPENDIX B-3. See APPENDIX B-3 – “REPORT OF THE LENDERS’ TECHNICAL ADVISOR.” The key areas reviewed by the BTY Group include, among other things, the Project’s structure and risk transfer, site conditions, permitting, design and construction approach, cost, schedule, operations, maintenance and lifecycle.

The Lenders' Technical Advisor Report must be read in its entirety and any summary herein is qualified in its entirety to such report. The Lenders' Technical Advisor has determined that most of the Borrower's risk/responsibility with respect to the Project (See PART 11 – "THE PROJECT") has been transferred to the D&C Contractor, including but not limited to the following:

- the Borrower's risk related to design pertaining to the D&C Work on the Premises and D&C Work for Off-Premises Facilities;
- the Borrower's responsibility for preparing design submittals relating to the Project, with the exception of certain carve-outs;
- the material portion of the Borrower's risk related to the Warranty Period (transferred to the D&C Contractor for a two-year period, subject to certain extensions);
- most of the Borrower's risk related to regulatory approvals for the DB D&C Work;
- the Borrower's risk related to site conditions (some of which will be managed through a series of budgets and contingencies between the Borrower and Port Authority and some of which will transfer to the D&C Contractor); and
- the Borrower's risk related to the Project Schedule (including Substantial Completion of Phase 1 and Substantial Completion of Phase 2).

Additionally, the Borrower has transferred to the Manager under the Management Services Agreement the responsibility (a) for the performance of Operations and Maintenance Work (but will retain the risk for O&M costs), (b) for ongoing capital and Lifecycle planning assistance and coordination (but will retain the Lifecycle cost risk) and (c) relating to the incentive and deduction regime pertaining to the key performance indicators ("KPI").

The following factors relating to the Project also minimize risk: (a) Project Schedule reporting requirements are more stringent than typical cases, which shows a high degree of attention being paid to the schedule, (b) the Project will not result in significant impacts to the environmental resources (with minimal, or no, social or environmental impacts), (c) the D&C Contractor's guaranteed maximum price ("GMP") is reasonable and appropriate for the Project and (d) in the event the D&C Contractor needs to be replaced, that the D&C Contractor's 35% liability cap is adequate to cover the total replacement premium while the proposed liquid security is adequate to cover the short-term replacement premiums.

The Lenders' Technical Advisor concluded that the Equity Members (including the affiliate of the Vantage Member, who acts as the Manager under the Management Services Agreement) have a track record of successful projects, including some of the most challenging airport, terminal and infrastructure projects around the world, and this expertise will be leveraged through all of the Project phases; additionally, the D&C Contractor has extensive experience working in and around airports and successfully planning and managing complex logistics, security challenges and multi-level coordination. As a result, the Lenders' Technical Advisor found that the Equity Members should have no issues collaboratively carrying out the responsibilities of the Borrower or in meeting the designated requirements of the Project.

### **Report of the Insurance Consultant**

INTECH Risk Management GmbH (the "Insurance Consultant") prepared the Report of the Insurance Consultant, which reviews the insurance provisions for the Borrower and the Work, included in

this Official Statement as APPENDIX B-4. See APPENDIX B-4 – “REPORT OF THE INSURANCE CONSULTANT.”

All of these reports should be read in their entirety by potential investors in the Series 2024 Bonds.

## **PART 17 – RISK FACTORS**

### **General**

Potential investors should carefully consider the following risk factors and other investment considerations prior to making a decision to purchase Series 2024 Bonds. The following description of certain risk factors is not intended to be, nor can it be, a complete description of all of the general or specific risk factors relating to an investment in Series 2024 Bonds. Additional risk factors relating to the purchase of Series 2024 Bonds are described throughout this Official Statement, whether or not specifically designated as risk factors. Additional risks and uncertainties not presently known, or currently believed to be immaterial, may also materially and adversely affect the payment of the Series 2024 Bonds. This section should be read in conjunction with the rest of the Official Statement, including the Appendices hereto. In addition, although the various risks discussed in this Official Statement are generally described separately, prospective investors of the Series 2024 Bonds should consider the potential effects of the interplay of multiple risk factors.

### **Risks Associated with Limited Recourse Obligations**

The Series 2024 Bonds are special and limited obligations of the Issuer, payable solely out of the Trust Estate pledged under the Indenture, primarily from payments made by the Borrower pursuant to the TDC Loan Agreements and the TDC Notes. The Borrower will pay its obligations under such TDC Loan Agreements and the TDC Notes primarily from certain revenues it receives from the operation of Terminal 7 and Terminal 6, certain of which are shared with the Port Authority under the Lease Agreement.

If the Borrower does not, for any reason, generate sufficient Project Revenue, in a timely manner, it may not be able to make payments of the amounts due under the TDC Loan Agreements and the TDC Notes. In such an event, payments of principal or interest on the Series 2024 Bonds may not be made, and the registered owners of the Series 2024 Bonds will not have any recourse to any party other than the Borrower, or, as applicable, to the Collateral, for payment of the amounts then due.

The Borrower is a single-purpose entity, formed for the purpose of undertaking the transactions contemplated under the Lease Agreement, including entering into the Lease Agreement and the associated Project Documents and Financing Documents. As such, the Borrower does not expect to own any material assets other than the leasehold interest in the facilities leased to it under the Lease Agreement, its rights under other assets and contracts generally related to such facilities, the Equity Contributions, and amounts on deposit in the relevant Project Accounts in accordance with the Collateral Agency and Accounts Agreement.

The Borrower’s obligations under the Lease Agreement and the Financing Documents are obligations solely of the Borrower and not of any affiliate of the Borrower. No Equity Member of the Borrower has any obligation to contribute additional equity to the Borrower beyond the Equity Contributions or to otherwise provide funds to the Borrower, and the Borrower has no sources of revenue other than from the operation of Terminal 7 and Terminal 6. In addition, none of the Equity Members of the Borrower has guaranteed the payment of the Series 2024 Bonds and the Equity Members have no obligation with respect to the payment of the Series 2024 Bonds. Therefore, the Borrower’s ability to make

payments in respect to debt service on the Series 2024 Bonds will depend on the successful construction of the Project and collection of revenues from the operation of Terminal 7 and Terminal 6, after the payment of O&M Expenses (including Ground Rent, First Additional Rent, Second Additional Rental, and Third Additional Rent payable to the Port Authority under the Lease Agreement) and other amounts payable prior to the payment of debt service pursuant to the Collateral Agency and Accounts Agreement. The amount of revenues that the Borrower will be able to collect from its operation of Terminal 7 and Terminal 6 may vary depending on a number of factors, including many that are outside the control of the Borrower, such as adverse conditions affecting the economy generally, the airline industry or other relevant business sectors in particular, or the occurrence of force majeure or other adverse events. See “PART 17 – RISK FACTORS – Risks Related to Construction of the Project” and “PART 17 – RISK FACTORS – Risk Factors Relating to the Airline Industry.”

Substantially all of the Borrower’s rights under the Lease Agreement and the other Project Documents are being pledged and assigned as security for the Borrower’s financial obligations in connection with the Project, but no assurance can be given that the funds available to the Collateral Agent will be sufficient to make all of the payments to be paid from the Collateral, including payment with respect to debt service on the Series 2024 Bonds.

### **Matters Relating to Enforceability of Financing Documents**

The rights and remedies available to the Trustee, the Collateral Agent, the Intercreditor Agent, the Issuer, and the registered owners of the Series 2024 Bonds upon an event of default under the Indenture, the Collateral Agency and Accounts Agreement, the Intercreditor Agreement, the TDC Loan Agreements, or other agreements described herein may be affected by applicable statutes and legal doctrines and are in many respects dependent upon regulatory and judicial enforcement actions which are often subject to discretion and delay. The various legal opinions to be delivered concurrently with the delivery of the Series 2024 Bonds will be subject to certain assumptions and qualified as to the enforceability of the various legal instruments by limitations imposed by bankruptcy, reorganization, insolvency, or other similar laws affecting the rights of creditors generally and by judicial principles of equity.

#### ***Bankruptcy and Insolvency Risks***

Numerous statutory provisions, including the federal Bankruptcy Code (the “Bankruptcy Code”) and state laws affording similar relief to debtors, may result in a stay or otherwise interfere with, delay or permanently impair the ability of the Collateral Agent to obtain payment pursuant to the TDC Loan Agreements and the TDC Notes or to realize upon collateral.

Payments of principal, accreted value, redemption price, and interest in respect of the Series 2024 Bonds would likely be adversely affected by a bankruptcy of the Borrower or similar state law proceeding. The delay and consequences of delay in the ability of the Collateral Agent to enforce rights and remedies against the Borrower, including any delay caused by the imposition of any stay under the Bankruptcy Code or state laws affording similar relief, can be significant and can permanently prevent the exercise of rights and remedies by the Collateral Agent against the Borrower. For example, if the Borrower becomes the subject of a bankruptcy proceeding, Section 362 of the Bankruptcy Code operates as an automatic stay of, among other things, any enforcement action by the Collateral Agent to obtain possession of property from a debtor’s estate, and may delay or permanently prevent the Collateral Agent from exercising their other rights and remedies, including foreclosure or sale. While relief from the automatic stay to enforce remedies may be requested, consideration of a request to provide relief is highly discretionary with the bankruptcy court and can be denied for a number of reasons, including where the collateral is “necessary to an effective reorganization” of the Borrower.

In addition to impairment of the Collateral Agent's ability to exercise remedies in the event of a Borrower bankruptcy, under the current Bankruptcy Code, the Borrower or its trustee in bankruptcy would be required, within 120 days of the bankruptcy filing, to elect to assume or reject the Lease Agreement. The Borrower may seek an order of the bankruptcy court extending the deadline for another 90 days. Any extensions following the 210-day period must be made with the consent of the Port Authority, as landlord, and approval by the bankruptcy court. The Borrower's failure to assume or reject the Lease Agreement within these timeframes would result in the automatic rejection of the Lease Agreement. As part of the bankruptcy case, the Borrower would have the choice of either (i) assuming the Lease Agreement and thereby retaining its occupancy rights to the Premises or (ii) rejecting the Lease Agreement and vacating the Premises. Assumption of the Lease Agreement by the Borrower would require that the Borrower (a) cure any defaults under the Lease Agreement, (b) maintain its payment obligations under the Lease Agreement during bankruptcy, and (c) provide assurance of future performance of its obligations under the Lease Agreement.

Under the Leasehold Mortgages the Borrower has agreed to notify the applicable Leasehold Mortgagee and to offer to attempt to assign the Lease Agreement to the applicable Leasehold Mortgagee (or its designee or nominee) prior to making an application to reject the Lease Agreement but there can be no assurance that such agreement would be enforced by a bankruptcy court. In addition, pursuant to the Leasehold Mortgages the Borrower has agreed that any rejection of the Lease Agreement without a prior offer of assignment to the applicable Leasehold Mortgagee (or its designee or nominee) shall be deemed, at the election of the Leasehold Mortgagee, to be an assignment of the Lease Agreement to the applicable Collateral Agent or its designee, but again there can be no assurance that such agreement would be enforced by a bankruptcy court.

Following any rejection of the Lease Agreement in a bankruptcy of the Borrower, the Port Authority has agreed to enter into a new Lease Agreement with the Recognized Mortgagee or its nominee, subject to receipt of all necessary governmental approvals and timely compliance with the applicable provisions of the Lease Agreement. However, if the Borrower does not desire to retain the Premises, in lieu of rejecting the Lease Agreement, it is also possible that a bankruptcy could allow the Borrower to sell its leasehold interest in the Premises under the supervision of the bankruptcy court, in which event the Collateral Agent's security interest would attach to the proceeds of the sale, and the Collateral Agent would be entitled to an unsecured claim against the Borrower for any shortfall between the amounts due under the TDC Loan Agreements and the TDC Notes.

With respect to the TDC Loan Agreements and the TDC Notes, in a bankruptcy the Borrower could retain possession of the Premises and seek to reorganize and emerge from bankruptcy, but because of the security provided by the Leasehold Mortgages, the Borrower would be required to pay to the Collateral Agent pursuant to a plan of reorganization, as a secured creditor, the value of the Borrower's leasehold interest in the Premises under the Lease Agreement. Any amounts owed by the Borrower under the TDC Loan Agreements or the TDC Notes in excess of the value of the Borrower's leasehold interest would be treated as an unsecured claim and entitled to payment on the same terms as all unsecured claims in any such reorganization, which could be substantially less than the face value of the unsecured claim.

No market valuation of the Borrower's leasehold interest in the Premises has been prepared in connection with the offering of the Series 2024 Bonds, and no representation is made as to what the value of the Premises might be in the future, so there can be no assurance regarding the likelihood that a fully secured claim would result in the situations described above. Moreover, the actual valuation of the Borrower's leasehold in the Premises and the appropriate valuation methodology could be issues that a bankruptcy court would review. Bankruptcy courts use different valuation methodologies and it is difficult to predict or estimate a precise valuation. Prior to the confirmation of a plan of reorganization, the Collateral

Agent could also seek to obtain adequate protection payments for the diminution in value caused by the Borrower's use of the Premises during bankruptcy, but there is no assurance that the bankruptcy court would order any immediate payments to the Collateral Agent during the pendency of the case.

A bankruptcy or similar state law proceeding with respect to any airline or concession tenant or user of Terminal 7 and Terminal 6 could adversely affect the Borrower's revenues and its ability to make timely payments in respect of the Series 2024 Bonds.

A bankruptcy or similar state law proceeding with respect to the D&C Contractor or the Manager could adversely affect the Borrower's ability to comply with its obligations under the Lease Agreement. The New York Local Finance Law (McKinney's Local Finance Law) currently authorizes the City to be a debtor under the applicable provisions of the United States Bankruptcy Code with respect to municipalities. If the City should file a proceeding under Chapter 9 of the United States Bankruptcy Code, it is possible that actions could be taken in that case, despite the existence of Section 929 of the United States Bankruptcy Code, that would impact or alter the Basic Lease, thereby affecting the Lease Agreement. Such actions could adversely affect the security for the Series 2024 Bonds and any Additional Bonds.

### ***Legal and Equitable Limitations***

If an Event of Default occurs under any of the Financing Documents, the practical realization of the Collateral Agent's rights will depend on the exercise of various remedies specified in the Financing Documents and will be subject to the limitations placed on those rights under applicable law and principles of equity. For example, the enforcement of any remedies granted to the Collateral Agent under the Financing Documents may be affected by, among other things, rights or defenses imposed or conferred by any state or federal court in the exercise of its equitable jurisdiction and the exercise of judicial discretion.

### **Additional Obligations**

As is noted elsewhere herein, payments with respect to the Series 2024 Bonds are contingent upon the Borrower making loan payments pursuant to the TDC Loan Agreements and the TDC Notes. The Collateral Agency and Accounts Agreement allows the Borrower to incur Additional Senior Obligations and Additional Subordinate Obligations, provided that all applicable requirements are satisfied. See "PART 4 – SECURITY FOR THE SERIES 2024 BONDS – The COLLATERAL AGENCY AND ACCOUNTS AGREEMENT – Additional Obligations" for a description of the applicable circumstances and conditions related to such incurrence of Additional Obligations. Any additional Senior Obligations issued would be payable from the revenues of the Borrower on a *pari-passu* basis with the Series 2024 Bonds and the Loan Facility and would also share in the Collateral. To the extent that the Borrower's revenues are insufficient to make payments on all of the Obligations Outstanding, such insufficiency may negatively impact the ability of the Borrower to satisfy its payment obligations under the TDC Loan Agreements which support the payment of principal, accreted value, redemption price or interest on the Series 2024 Bonds and the Loan Facility. Furthermore, during any foreclosure action or other efforts to realize upon the Collateral, or in the case of an early termination of the Lease Agreement, to the extent that the Borrower has incurred Additional Senior Obligations, registered owners of the Series 2024 Bonds will be required to share the proceeds of the Collateral or any termination payment, as applicable, with a larger group of holders of Senior Obligations, proportionally reducing any claim that the registered owners of such Series 2024 Bonds may otherwise have to such proceeds or termination payment amount.

## **Loan Facility, Intercreditor and Hedging Risks**

The Borrower intends to fund a substantial portion of remaining Project costs from the remaining undrawn balance of the Loan Facility. While this approach can result in certain efficiencies, it introduces a number of risks relating to the availability of such funds in the amounts and at the times required for timely completion of the Project, including, but not limited to, failure of the Borrower to satisfy the conditions precedent to each credit extension or to each withdrawal of advanced funds from the Construction Account under the Common Terms Agreement, or delays or failures on the part of the banks to fund otherwise eligible credit extension requests. See APPENDIX F-1 – “FORM OF COMMON TERMS AGREEMENT.” Any such failure on the part of the Borrower or the banks could result in delays to the Project completion timeline and may necessitate the Borrower arranging alternate financing, if possible, at higher rates or upon worse terms, all of which could materially adversely impact the Borrower’s operating results.

The Loan Facility is subject to certain mandatory and optional prepayment provisions and will mature in full on the Bank Financing Maturity Date; as such, the Loan Facility is a temporary source of funding, which will need to be refinanced or replaced in full prior to said maturity.

The agreements governing the Loan Facility, and in particular the Common Term Agreement, include various affirmative, negative, and financial covenants that are more stringent than those included in the Indenture or the Collateral Agency Agreement during the term of the Loan Facility, including obligations to obtain the consent of certain Bank Finance Parties to enter into certain operational agreements or take other actions that the Borrower may believe are beneficial for the Project. See APPENDIX F-1 – “FORM OF COMMON TERMS AGREEMENT.” Complying with certain of such covenants could limit the Borrower’s ability to operate its business and to take advantage of business opportunities that are in the Borrower’s best interest. The terms of any future indebtedness the Borrower may incur could include similar or other restrictive covenants.

While the covenants in the agreements governing the Loan Facility are subject to important exceptions and qualifications, if the Borrower fails to comply with them and is unable to obtain a waiver or amendment, an event of default under such documents would result. If an event of default under such documents were to occur, the lenders under the Loan Facility could exercise various remedies set forth therein, subject to the terms of the Intercreditor Agreement, including declaring outstanding amounts due and payable, which acceleration would then trigger cross-acceleration of the Series 2024 Bonds without action taken by the holders of the Series 2024 Bonds. The acceleration of significant indebtedness could require the Borrower to seek to negotiate or repay its obligations, and there is no assurance that such renegotiation or repayment would be successful.

In addition, certain events of default under the Common Terms Agreement and other financing documents related specifically to the Loan Facility do not automatically permit the exercise of remedies by the Senior Collateral Agent, unless (i) the Standstill Period has expired, (ii) the Senior Bank Obligations have been accelerated in accordance with the Senior Bank Financing Documents (which acceleration would then trigger cross-acceleration of the Series 2024 Bonds without action taken by the holders of the Series 2024 Bonds), and (iii) the Administrative Agent has instructed the Intercreditor Agent to instruct the Senior Collateral Agent to exercise an Enforcement Action of the types contemplated in clauses (a) and (b) of the definition thereof (other than solely with respect to Segregated Collateral of the Bank Finance Parties) with respect to such event of default). In such circumstance, the Senior Collateral Agent would not be permitted to exercise remedies for the benefit of the holders of the Senior Obligations, including the Series 2024 Bonds despite the Borrower’s non-compliance with the terms of the Common Terms Agreement or such other financing documents related specifically to the Loan Facility.

As described herein, the Borrower currently anticipates that after the discharge of the Loan Facility in full, it will seek an amendment to the Intercreditor Agreement to move to a dollar-for-dollar, as opposed to block, voting basis. The determination to pursue the aforementioned amendment will be subject to market conditions at such time and remains subject to change in the Borrower's sole and absolute discretion. Until such amendment takes effect, if ever, the Intercreditor Agreement provides for class-based voting and certain fundamental enforcement rights that may, in certain limited circumstances, disadvantage the Series 2024 Bondholders when compared to the Bank Finance Parties. See APPENDIX D-5 "FORM OF INTERCREDITOR AGREEMENT."

The Permitted Hedge Agreements may, at any time, have a negative value to the Borrower. If either the swap counterparty or Borrower terminates such an agreement when the agreement has a negative value to the Borrower, the Borrower would be obligated to make a termination payment to the counterparty in the amount of such negative value, and such payment could be substantial and potentially materially adverse to the financial condition of the Borrower. Further, the Borrower is obligated to terminate certain Permitted Hedge Agreements as it pays down and refinances the Loan Facility, including with respect to the mandatory prepayment provisions applicable thereto, which could increase the cost to the Borrower of complying with the Common Terms Agreement and otherwise impact the Borrower's decision-making regarding when and how to approach the refinancing of the portion of the Loan Facility that remains outstanding after issuance of the Series 2024 Bonds. The Borrower's payment obligations with respect to the Permitted Hedge Agreements, both in the ordinary course and upon termination, are senior secured obligations and rank *pari passu* with its obligations with respect to the Series 2024 Bonds and the Loan Facility.

#### **Bond Term Substantially Coterminous With Term of Lease Agreement**

The scheduled expiry date of the Lease Agreement and the final maturity date of the Series 2024 Bonds are substantially the same. Should there be an event requiring the exercise by the Collateral Agent of cure rights or other remedial action, there is no absolute right to extend the term of the Lease Agreement in a manner that would permit restructuring of debt to implement a remedy that would permit repayment over a period that is longer than the existing final maturity date of the Series 2024 Bonds.

#### **Risks Related to Collateral**

It may be difficult for the Collateral Agent to realize the value of the Collateral, and the proceeds received from a sale of the Collateral may be insufficient to repay the Series 2024 Bonds, the Loan Facility and any Additional Senior Obligations.

Foreclosure on the Collateral may be subject to perfection and priority issues, the need for third party approvals and consents and to practical problems associated with the realization of the Series 2024 Bondholders' security interest in the Collateral. Foreclosure of the Leasehold Mortgages is available for only certain specified Events of Default under the Leasehold Mortgages and will require the commencement of a legal action as non-judicial foreclosure is not available in New York State. Judicial foreclosure is a lengthy process that requires careful compliance with a number of procedural requirements. As a result, realization on the Collateral will likely be subject to significant costs and delays that may adversely affect the Series 2024 Bondholders. In addition, New York State law restricts the ability of the holder of a mortgage loan to simultaneously bring an action on the mortgage debt and to foreclose the mortgage. The enforcement of the Collateral Agent's security interest with respect to the Collateral may not provide sufficient funds to repay all amounts due with respect to the Series 2024 Bonds and Loan Facility.

In addition, since the Borrower's principal asset is its rights under the Lease Agreement, there are practical limitations on the exercise of remedies in respect thereof. Under the Lease Agreement, if the Collateral Agent (as the Recognized Mortgagee) acquires the Borrower's interest in the Lease Agreement through foreclosure of the Leasehold Mortgages, it must engage a Qualified Terminal Operator with respect to the operations of the Premises and may only further assign the Lease Agreement to a Qualified Terminal Operator who will be required to satisfy certain payment obligations and cure certain outstanding breaches of the Lease Agreement. To constitute a Qualified Terminal Operator, an entity must have sufficient experience, personnel, and financial capability to operate and maintain the Premises on a basis consistent with the requirements of the Lease Agreement. The number of potential purchasers willing or able to meet these requirements under the Lease Agreement may be limited. Thus, as a practical matter, the Series 2024 Bondholders will have certain limitations on their ability to replace the Borrower as the lessee under the Lease Agreement following a foreclosure.

### **Potential Inadequacy of Funding Sources**

The Borrower plans to fund the balance of the costs of construction of the Project using funds from a variety of sources other than the Series 2024 Bonds, namely the capital contributions from the Equity Members, proceeds of the heretofore undrawn Senior Term Loans, and revenues generated from the operation of Terminal 7 and Terminal 6. To the extent that all or a portion of the funds expected to be received from the sources identified above are not received by the Borrower, or to the extent that the Borrower receives all or a portion of such funds later than anticipated, the Borrower's ability to complete the construction of the Project may be limited or delayed, potentially adversely affecting the Borrower's ability to satisfy its payment obligations with respect to the Series 2024 Bonds.

#### ***Multiple Funding Sources***

The Project is a complex Project comprising a number of different work scopes, such as demolition of Terminal 7, construction of Terminal 6, construction of the Off-Premises Facilities and construction of the Ground Transportation Center, among others. The Project is further complicated by the need to continue operating Terminal 7 and during the Terminal 6 construction process. Completion of the Project is scheduled to proceed on a scheduled timeline, with completion deadlines for various components of the Project.

The plan of finance includes funding for the costs of the Project from a number of sources. These include proceeds of the Series 2024 Bonds, the Loan Facility, Borrower equity, operating revenues, and earnings on invested funds. Risk factors associated with Series 2024 Bonds funding are summarized under the heading "RISK FACTORS – Disbursement of Loan Facility Proceeds" and "– Risks Associated With the Series 2024 Bonds." The Loan Facility is a temporary source of funding, which will need to be replaced in full when refinanced. Operating revenues during the construction period are budgeted to, among other things, cover operating expenses, with any excess being available for design and construction costs. Should any of these sources fail, or should operating revenues fall short of projections, operating expenses exceed projections, or project costs exceed projections, including for unexpected events, the project schedule may be disrupted and additional funding may be required.

#### ***Disbursement of Loan Facility Proceeds***

Access to proceeds of the Loan Facility is dependent upon submission of detailed requisitions to the Collateral Agent that have been approved by the Technical Advisor. Such requisitions will be prepared, for the most part, by the D&C Contractor and reviewed by the Borrower prior to submission to the Technical Advisor. As a condition of approval of a requisition from the Construction Account the Technical Advisor

must certify, among other things, that sufficient funds are available or are projected to be available to pay all project costs (including financing costs such as capitalized interest and required transfers to the Senior Debt Service Reserve Account and certain other reserve accounts) necessary to achieve the Completion Date on or before the Outside Completion Date, and that Substantial Completion is reasonably expected to be achieved on or prior to the Outside Completion Date.

If there is a dispute among any of the D&C Contractor, the Borrower and the Technical Advisor as to the compliance of a proposed requisition with the terms of the various Project contracts and the Collateral Agency and Accounts Agreement, disbursement of all or a portion of such requisitioned funds may be delayed in whole or part. If the Technical Advisor is unable to certify as to sufficiency of funds available to pay Project costs necessary to achieve the Completion Date, additional funds may be required. For risk factors relating to the issuance of Additional Obligations, see “PART 17 – RISK FACTORS – Additional Obligations.” If the Technical Advisor is unable to certify as to its reasonable expectation that Substantial Completion is reasonably expected to be achieved on or prior to the Outside Completion Date, D&C Work on the Project may be stopped unless accommodation can be worked out between the Borrower and the Port Authority.

#### ***Operating Revenues and Operating Expenses Prior to Substantial Completion***

The plan of finance anticipates operating expenses prior to Substantial Completion. These include costs of operating (and providing major maintenance for) Terminal 7, or portions thereof as such facilities are phased out of operation. In connection with the migration of operations from Terminal 7 to Terminal 6, operating revenues are projected to increase. No assurances can be made that the projected amounts of operating revenues, operating expenses and amounts available for re-investment will be consistent with the Borrower’s current projections.

#### ***Debt Service Reserve Accounts Funded at Phase 2 End of Funding Date***

The Borrower will be required to transfer funds following the Phase 2 End of Funding Date, from the various Sub-Accounts of the Construction Accounts, or other available funds, to the Debt Service Reserve Accounts. If sufficient funds are not available at such time to fund the Debt Service Reserve Accounts because of unanticipated additional construction costs or other reasons, the Debt Service Reserve Accounts may be funded in lesser amounts than required or may be delayed.

#### ***Limited Equity Commitment***

The equity commitment required to be contributed by the Equity Members of the Borrower is limited to \$1.3 billion. If any event occurs during the construction period that require additional funding, there will be no recourse by the Borrower to the Equity Members for additional equity. No Equity Member will be required to provide additional equity during the O&M Period following Substantial Completion.

#### **Actual Results May Differ From Forecasts and Assumptions**

The forecasts and projections contained herein, including projections of traffic flows and revenues contained in the Report of the Airport Consultant and the Report of the Airline Traffic Forecast Consultant are based on assumptions that the preparers (and the Borrower) believe are reasonable. Actual results are likely to differ from those projections and such variances may be material. None of the Borrower, the Equity Members, or any other party assumes any responsibility for the accuracy of such projections.

## **Risks Related to the Lease Agreement**

### ***Termination Risk under the Lease Agreement***

The Borrower's principal asset is its leasehold interest under the Lease Agreement, including the right to develop, design, construct, operate and maintain Terminal 6 and to charge, collect and retain revenues from the operation of such facilities until the expiration of the Lease Agreement in December 2060, subject to the terms of the Lease Agreement. The Borrower's interest in the Premises pursuant to the provisions of the Lease Agreement, and the continuation of the Lease Agreement, are essential to the existence and effectiveness of the Collateral Agent's security interests in the Collateral and in the Trust Estate under the Indenture. Accordingly, in the event of a termination of the Lease Agreement, the Collateral Agent's security interests will be extinguished and there will be no meaningful source of payment for the Series 2024 Bonds.

Following the occurrence and during the continuation of certain defaults by the Borrower under the Lease Agreement, the Port Authority is entitled, subject to the provisions of the Lease Agreement, including certain cure and step-in rights granted to the Recognized Mortgagee thereunder, to, among other things, terminate the Lease Agreement and repossess and assume control of the Premises, and take certain other actions in accordance with the terms of the Lease Agreement. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Termination by the Port Authority (Events of Default)" for a description of Lease Events of Default that could give rise to a Port Authority right to terminate the Lease Agreement.

Upon a termination by the Port Authority due to a Lease Event of Default under the Lease Agreement, the Port Authority will not be required to make any termination payment to the Borrower. The amounts available to the Borrower or the Collateral Agent in such event may be limited to the funds, if any, being held under the Collateral Agency and Accounts Agreement and may not be sufficient to pay the obligations of the Borrower upon such a termination, including payment with respect to the principal and interest (and premiums or penalties, if any) on the Series 2024 Bonds.

The Lease Agreement also provides that, in certain limited circumstances other than a Lease Event of Default, the Borrower shall have the right to terminate the Lease Agreement and, in certain limited circumstances, to receive from the Port Authority the Port Authority Default Termination Payment. See "PART 4 – SECURITY FOR THE SERIES 2024 BONDS–Termination Payment to the Borrower Upon Termination of the Lease Agreement" and APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Termination by Lessee" for a description of the events entitling the Borrower to terminate the Lease Agreement and recover the Port Authority Default Termination Payment. The amount payable by the Port Authority may not be sufficient by itself to pay amounts due with respect to the Series 2024 Bonds and Loan Facility. No assurance can be given that amounts recovered by the Collateral Agent from these other amounts will be timely or sufficient to permit the payment in full of all amounts needed to discharge all Outstanding Bonds.

### ***Payment of Termination Compensation Subject and Subordinate to Certain Other Port Authority Payment Obligations***

Payment by the Port Authority of any termination payment under the Lease Agreement is subject and subordinate in all respects to payment by the Port Authority of debt service on its Consolidated Bonds, as required by the applicable provisions of the Consolidated Bond Resolution, and payment into the General Reserve Fund of the amount necessary to maintain the General Reserve Fund at the amount specified in the General Reserve Fund Statements. The payment of any termination payment by the Port Authority is not

secured by or payable from the General Reserve Fund. There can be no assurances that the Port Authority will have sufficient funds available as and when needed to make any termination payment that may be payable to the Borrower pursuant to the Lease Agreement.

### ***Risks Related to Recognized Mortgagee's Cure Rights***

The Recognized Mortgagee's exercise of cure and step-in rights following a Lease Event of Default are subject to compliance with certain conditions under the Lease Agreement, including the payment of certain amounts due and timely action to cure non-monetary defaults. In the case of a monetary Lease Event of Default, cure payments must be made within 10 days after the expiration of the Borrower's cure period under the Lease Agreement.

In the case of non-monetary Lease Events of Default, cures must be effected within (i) 90 Business Days (other than as described in the immediately subsequent clause (ii), certain Lease Events of Default related to Borrower bankruptcy, or certain other specified Lease Events of Default not capable of cure by a party other than the Borrower, as to which no cure will be required), or (ii) 180 days with respect to a failure to achieve Substantial Completion of Phase 2 by the Outside Completion Date, in each case, after the expiration of the Borrower's cure period, subject to extension under certain circumstances but, in all events, subject to compliance with the applicable provisions of the Lease Agreement.

There can be no assurance that the Collateral Agent or its designee or nominee will have access to sufficient funds to timely cure a monetary default or the ability to timely cure a non-monetary default. In the event the Collateral Agent is unable to timely effect a cure, the Port Authority has the right to terminate the Lease Agreement, in which event the Lease Agreement will no longer constitute collateral for the Series 2024 Bonds.

### ***Governmental Approvals***

Pursuant to the Lease Agreement, the Borrower is responsible for securing, obtaining, and maintaining in full force and effect, all governmental approvals (including environmental permits) required for the Project and the operation and maintenance of the Premises (including any required future capital improvements as those requirements change from time to time), other than those governmental approvals obtained or to be obtained by the Port Authority. With respect to the Project, some of the governmental approvals have been or will be obtained by the Borrower; otherwise, such responsibility has been assumed by the D&C Contractor. The Borrower does not currently anticipate any delays or difficulties in obtaining or maintaining any such governmental approvals as and when the same are required pursuant to the Lease Agreement; however, no assurance can be given that either the Borrower or the D&C Contractor will be able to obtain and maintain the applicable governmental approvals. Although a failure or delay in obtaining governmental approvals due to certain willful failures or delays by the Port Authority constitutes a Compensation Event and Delay Event under the Lease Agreement, most delays or failures – particularly those attributable to the Borrower or the D&C Contractor – are not covered. A failure by the Borrower or the D&C Contractor to obtain and maintain any necessary or required governmental approvals, to the extent that the schedule, cost or revenue impact on the Project or the operation and maintenance of Terminal 6 or Terminal 7 as a result of such failure is not accommodated for under the Lease Agreement, could prevent or delay components of the D&C Work with respect to the Project, the operation of the Premises or the construction of future capital improvements, could impose additional costs on the Borrower, could result in a decrease in the operational revenues received by the Borrower and/or could provide the Port Authority with the right to terminate the Lease Agreement, all of which could adversely impact the Borrower's ability to make payments of debt service on the Series 2024 Bonds and Loan Facility.

## **Risks Related to the Basic Lease**

The Lease Agreement is subject to the Basic Lease. The City has the right to terminate the Basic Lease if the Port Authority fails to meet its payment or certain other obligations under the Basic Lease, and none of the City, the Port Authority or the Borrower is making any representation or warranty concerning the Basic Lease. An early termination of the Basic Lease while the Series 2024 Bonds are outstanding would result in the loss of the Port Authority's rights with respect to the Airport, termination of the Lease Agreement (or any successor lease), termination of the Borrower's (or any successor lessee's) interests in the Premises, and termination of the Leasehold Mortgages. If (i) the Basic Lease is terminated due to the failure of the Port Authority to meet certain obligations under the Basic Lease from the gross negligence or willful misconduct of the Port Authority, as finally determined pursuant to a non-appealable judgment of a court of competent jurisdiction (and not a breach or default arising from or related to any act or failure to act by the Borrower or certain entities related to the Borrower) and (ii) the City does not afford the Borrower the option to attorn to, or enter into a direct lease with, the City on the terms that are substantially the same as the terms of the Lease Agreement, then the Borrower will be entitled to termination compensation, but only to the extent that such termination is determined pursuant to a final, non-appealable judgment of a court of competent jurisdiction to be a failure of quiet enjoyment as described under "PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Termination Payment to the Borrower Upon Termination of the Lease Agreement."

In the event the Basic Lease is terminated for any other reason, it would be unlikely that funds would be available to repay any outstanding Series 2024 Bonds and Loan Facility since the City would be under no obligation to continue to grant the Borrower (or any successor lessee) any ongoing interest in the Premises or to recognize any interest that the Collateral Agent (as mortgagee under the Leasehold Mortgages) may otherwise have had with respect to the Premises. Accordingly, no assurances can be given that the Basic Lease will remain in effect for the full term of the Lease Agreement or the Series 2024 Bonds or Loan Facility or that the Series 2024 Bonds and Loan Facility could be repaid if the Basic Lease is terminated. See APPENDIX E – "SUMMARY OF CERTAIN PROVISIONS OF THE LEASE AGREEMENT – Basic Lease."

The New York Local Finance Law (McKinney's Local Finance Law) currently authorizes the City to be a debtor under the applicable provisions of the United States Bankruptcy Code with respect to municipalities. If the City should file a proceeding under Chapter 9 of the United States Bankruptcy Code, it is possible that actions could be taken in that case, despite the existence of Section 929 of the United States Bankruptcy Code, that would impact or alter the Basic Lease, thereby affecting the Lease Agreement. Such actions could adversely affect the security for the Series 2024 Bonds and any Additional Bonds.

## **Risks Related to Operations at the Airport During Construction**

The Airport in general and Terminal 7 in particular are heavily used and are congested as a result of spatial and scheduling constraints. Pursuant to the Lease Agreement, operations at Terminal 7 and Terminal 6 must be maintained during construction. The Borrower intends to construct Terminal 6 in two phases. Prior to completion of Phase 1, portions of Terminal 7 will or have been decommissioned to facilitate construction of Terminal 6. Following the completion of Phase 1, the Borrower expects to move all operations from Terminal 7 to Terminal 6, and subsequently decommission and demolish Terminal 7. The Borrower will then operate the portion of Terminal 6 completed in Phase 1, while construction of Phase 2 and the remainder of Terminal 6 is completed. For more information, see "PART 11 – THE PROJECT – Phasing of the Project – Phase 1 & Phase 2." In addition to construction of Terminal 6 occurring adjacent to the Borrower's operations at Terminal 7 or the portion of Terminal 6 that will be opened following completion of Phase 1, the Borrower's operation of Terminal 7 and Terminal 6 may be affected by

redevelopment projects across the Airport, including work performed on roadways adjacent to Terminal 7 or Terminal 6.

The Borrower's phased construction plan will require certain areas of Terminal 7 to be vacated by current users at specified times to enable construction in such areas to begin. If the applicable facilities are not vacated when anticipated, or if other complications arising from the interface between D&C Work and on-going operations at Terminal 7 or Terminal 6, or from work performed on other redevelopment projects at the Airport, including work performed on roadways, such events could result in delays to the Project for which the Borrower is not entitled to payment from the D&C Contractor or the Port Authority, or is not entitled to an extension of time to complete the Project (unless such occurrences constituted Compensation Events or Delay Events under the Lease Agreement). See "PART 17 – RISK FACTORS – Risks Related to Construction of the Project – Events That Impact Contract Price or Schedule." In addition, such D&C Work could interfere with the ongoing airline and other operations in the then-operational portions of Terminal 7 and Terminal 6, potentially negatively impacting the Borrower's revenues and its ability to operate such facilities in accordance with the requirements of the Lease Agreement. Although the Borrower has sought to reduce the possibility of any such disruption by generally planning to complete D&C Work in enclosed areas of the Airport (segregated from areas being used for ongoing Airport operations) and carefully planning the sequencing of Terminal 6 D&C Work, there can be no assurance that such a disruption will not occur or that the Borrower would be able to address and remediate any such disruption before it results in adverse consequences under the Lease Agreement or negatively impacts the Borrower's business, financial condition and results of operations.

## **Risks Related to Construction of the Project**

### ***Events That Impact the Construction and the Borrower's Revenues***

The Project is a complex construction project comprising a number of different work scopes. Completion of the Project is scheduled to proceed on a scheduled timeline, with completion deadlines for various components of the Project.

Pursuant to the terms and conditions of the Lease, the Borrower is obligated to achieve Substantial Completion of Phase 2 by the Outside Completion Date, and the Borrower will owe liquidated damages to the Port Authority if DBO of the Phase 1 D&C Work is not achieved by 30 days following the Scheduled Phase 1 DBO Date or if DBO of the Phase 2 D&C Work is not achieved by 30 days following the Scheduled Phase 2 DBO Date. Pursuant to the D&C Contract, the D&C Contractor has agreed to comply with such deadlines to the extent they relate to the DB D&C Work required to be undertaken by the D&C Contractor under the D&C Contract. See "PART 11 – THE PROJECT" and "PART 12 – THE D&C CONTRACT" for a further description of the applicable construction deadlines, as well as for a description of the obligations of the D&C Contractor.

The Project is a significant design and construction endeavor, with a schedule that contemplates completion in phases, as more particularly described in "PART 11 – THE PROJECT – Phasing of the Project – Phase 1 & Phase 2." As with any major construction effort, the Project involves many risks that could result in cost overruns, in delays or in a failure to complete the Project. Challenges to achieving Substantial Completion and DBO on schedule and within budget might include, among others, shortages of materials and labor, work stoppages, labor disputes, bad weather, floods, earthquakes and other casualties, unforeseen engineering, environmental or geological problems, permitting and approvals and third-party litigation (including protests or litigation about noise or vibrations that affect business owners or residents). Any of these events could increase the costs of or result in delays to the Project.

In addition, given the complexity of the Project (including the phasing thereof) and also the scope of the other activities that are expected to take place at the Airport during the same time period, including the Off-Premises Facilities and other planned and ongoing construction projects at the Airport (see “PART 11 – THE PROJECT”), lack of sufficient and effective coordination among the Borrower, the D&C Contractor, the Port Authority, any airline or concession sublessees performing design or construction work in respect of their subleased premises and other relevant third-parties or the failure of any such party to comply with its obligations with respect to such coordination or to complete its work (or necessary inspections or approvals) in a timely fashion could also result in such cost overruns or delays.

The Lease allocates a limited number of these risks, particularly as they relate to Compensation Events that impact the cost of the Project, to the Port Authority. The D&C Contract, which includes a maximum contract sum, also allocates a number of these risks to the D&C Contractor. Except where attributable to certain qualifying changes in the D&C Work pursuant to the Lease or otherwise excusable under the D&C Contract, the risks resulting from the possible negative revenue impact related to unexcused delays in achieving certain interim milestones or Substantial Completion (under which circumstances liquidated damages are payable by the D&C Contractor), completion of the D&C Work on schedule and on budget generally and free of Defects, and compliance of the D&C Work with Applicable Laws and applicable standards have been allocated to the D&C Contractor. Nevertheless, certain risks from a failure to coordinate construction of the Project may remain with the Borrower, including risks arising from the failure of airline or concession sublessees to complete design or construction work in respect of their subleased premises in a timely manner to allow such premises to be substantially complete or open concurrently with the schedule for the base building portions of Terminal 6, which failure may delay the Substantial Completion or DBO of Terminal 6.

Any delay in achieving certain interim milestones (including the opening of a fifth widebody gate by the third quarter of 2026 following the Completion of Phase 1, which is required to accommodate certain Expected Airlines operations at Terminal 6), delay in achieving Substantial Completion or DBO by the relevant deadline, or increased costs or defects with respect to the Project for which the Borrower does not have sufficient remedy against the D&C Contractor under the D&C Contract or for which the Borrower does not have a right to claim a Delay Event or Compensation Event under the Lease may adversely impact the business and operations of the Borrower and, possibly, the Borrower’s ability to make payment of debt service on the Senior Obligations, including the Series 2024 Bonds. In addition, the failure to comply with the terms of the Lease as a result of a delay in reaching Substantial Completion of Phase 2 by the Outside Completion Date could result in the Port Authority having the right to terminate the Lease under certain circumstances. See “– Risks Related to the Lease – Termination Risk under the Lease” above.

#### ***Delay in the Completion of the Project***

Pursuant to the terms and conditions of the Lease, the Borrower is obligated to complete construction of the Project in accordance with certain milestones and deadlines. Pursuant to the terms and conditions of the D&C Contract, the D&C Contractor has agreed to comply with such deadlines as they relate to the DB D&C Work required to be undertaken by the D&C Contractor under the D&C Contract. In the event that the D&C Contractor fails to implement any works and/or mitigation measures to avoid any delay in the construction schedule, as required under the D&C Contract, the D&C Contractor may be in breach of its obligations under the D&C Contract and such breach could result in a delay in the completion of Phase 1 or Phase 2 of the Project.

If the D&C Contractor does not meet the construction deadlines set forth in the D&C Contract, the Borrower may be in breach of its obligations under the Lease and will likely, in any such circumstance, be required to pay liquidated damages to the Port Authority with respect thereto. Although the Borrower is

entitled to receive compensation for the same damages from the D&C Contractor, the D&C Contractor could fail to compensate the Borrower for the applicable liquidated damages pursuant to the D&C Contract, which would result in a delay in the Borrower's ability to collect the same or otherwise prevent the recovery of any such amounts.

### ***Reliance on Performance by D&C Contractor***

The D&C Contract is generally structured to pass through to the D&C Contractor, on a back-to-back basis, a substantial portion of the Borrower's obligations and risks under the Lease Agreement with respect to the construction of the Project. See "PART 12 – THE D&C CONTRACT – Back-to-Back Obligations." In the event that the D&C Contractor does not satisfy its obligations under the D&C Contract, the Borrower might be at risk of default under the Lease Agreement and could be exposed to claims by the Port Authority. Moreover, while the Borrower may be entitled to receive compensation from the D&C Contractor for certain delays, defects or other defaults under the D&C Contract, the D&C Contractor could fail to compensate the Borrower for such delays, defects or other defaults and the D&C Guarantors could fail to honor their payment obligations under the D&C Guaranties. In some circumstances, termination of the Lease Agreement could result from such non-compliance by the D&C Contractor. See "– Risks Relating to the Lease Agreement – Termination Risk under the Lease Agreement" above.

Pursuant to the D&C Contract, the maximum aggregate liability of the D&C Contractor to the Borrower under such circumstances is generally limited to an amount equal to 35% of the sum of the GMP. See "PART 12 – THE D&C CONTRACT – Limitation of Liability." If losses by the Borrower as a result of the D&C Contractor's failure to satisfy its obligations are not recoverable from the D&C Contractor or are in excess of such limitation on liability, the Borrower might not have sufficient funds available to satisfy its corresponding obligations under the Lease Agreement and the Borrower's ability to make timely payment of debt service on the Series 2024 Bonds and Loan Facility could also be adversely affected.

### **Risks Related to Coordination with Other Airport Operations and Interfaces**

The Borrower is exposed to certain risks arising from potential issues related to required coordination with third parties conducting work at the Airport that could delay or increase the cost of the D&C Work or the Operations and Maintenance Work, including risks associated with any work conducted by the Port Authority at the Airport. To address these issues, the Borrower has entered into the Construction Coordination Agreement with the Port Authority (which generally applies during construction of the Project) and the Reciprocal Rights Agreement with JetBlue (which applies both during and after construction of the Project). These agreements have, to date, facilitated necessary coordination and are expected to continue to address coordination issues necessary to conduct certain work required to progress the D&C Work. However, there can be no guarantee that such agreements will fully address all coordination and interface risks, or that any such interface with the D&C Work or the Operations and Maintenance Work will not increase costs or cause delays for the Borrower for which the Borrower may not be compensated or will not lead to a default under the Lease Agreement.

### **Risks Related to Sublease Agreements**

The Borrower's primary revenue sources are various rents, fees and charges paid by airline or concession sublessees pursuant to the terms of the applicable sublease with such party. All such subleases are subject to the consent of the Port Authority pursuant to the terms of the Lease Agreement, and, until the discharge of the Senior Bank Obligations, may be subject to the consent of the Administrative Agent pursuant to the terms of the Common Terms Agreement. For more information see "PART 4 – SECURITY FOR THE SERIES 2024 BONDS – Direct Agreements", "PART 10 – LEASE AGREEMENT –

Subleases.” Except for the JetBlue Sublease, the Borrower has not yet entered into any subleases for Terminal 6 with any airline or concession sublessee which has been consented to by the Port Authority. The Borrower has executed non-binding letters of intent with term sheets outlining the agreed-upon terms and conditions of a sublease with all seven Expected Airlines anticipated to operate at Terminal 6 and is in various stages of negotiation of formal subleases with each such Expected Airline. While the Borrower has selected the majority of concessions operators for Terminal 6, the Borrower is also in the process of negotiating concession subleases with such operators. The Borrower will have to negotiate subleases with additional airline or concession operators to meet the forecasts and projections of passengers and revenue contained in the Report of the Airport Consultant and the Report of the Airline Traffic Forecast Consultant.

No assurances can be provided that the Borrower will reach agreement on any anticipated subleases with any airline or concession sublessees, that such subleases will be on commercial terms sufficient to meet the forecasts and projections of passengers or revenue contained in the Report of the Airport Consultant and the Report of the Airline Traffic Forecast Consultant or otherwise generate sufficient revenues to pay debt service on all of the Senior Obligations, including the Series 2024 Bonds, or that such subleases will receive the consent of the Port Authority or, if applicable, the Administrative Agent, and any failure to do or achieve any of the foregoing may reasonably be expected to adversely impact the Borrower’s results and operations. In addition, the timelines and procedures for review and consent to subleases by the Port Authority, and if applicable, the Administrative Agent, and any delays caused thereby, may delay the legal effectiveness of such subleases, which may negatively affect the results and operations of the Borrower.

#### **Risks Factors Affecting Airline Demand for Terminal 7 and Terminal 6**

Upon completion of Terminal 6, it is anticipated that a mix of airline tenants, including JetBlue under the JetBlue Sublease, will lease gates. Where a sizable market share of terminal facilities is not accounted for by a single airline, the risk associated with the potential for one airline to reduce or discontinue service is mitigated.

Based on the anticipated mix of airline tenants in Terminal 7 and Terminal 6 and ongoing changes in the airline industry, changes in the composition of airline tenants in Terminal 7 and Terminal 6 are expected to occur from time to time in the normal course of operations. Any such changes could be material, when viewed individually or cumulatively. Further, some airlines may decrease or discontinue their usage of Terminal 7 or Terminal 6 in the future, which would place additional importance on attracting new airline users in order to maintain a healthy revenue base.

Airlines serving the New York area have a choice of airports and, even within the Airport, have a choice of passenger terminal facilities. While the Airport attracts the largest share within the New York metropolitan area originating and departing (O&D) passengers and is also its principal international airport, airline service and passenger activity at other commercial airports in the area have also grown over time, reflecting, in part, the overall growing demand for air travel throughout the Air Trade Area. Newark Liberty International Airport, in particular, has experienced significant increases in international flight and passenger activity in recent years. Further, each area airport has its own unique passenger terminal facilities, which may or may not be capable of accommodating additional airline and passenger activity. In addition to other airports in the Air Trade Area, it is possible that Terminal 7 and Terminal 6 will be competing for airline tenants with other terminals at the Airport, many of which are also undergoing redevelopment and or modernizations.

No assurances can be given that the Borrower will be able to maintain lease arrangements with airline tenants at all gates in Terminal 7 and Terminal 6 or that, even if such agreements are maintained,

that revenues therefrom will be sufficient support for the Borrower's obligations with respect to the Series 2024 Bonds, the Loan Facility and any future Additional Obligations.

As airlines grow and reinforce their alliances and other similar business relationships with one another in an effort to seek competitive advantages in the global marketplace, the evolving impact of such relationships at the Airport could adversely affect future individual airline demand for Terminal 6. In particular, key alliance partners may drive demand to specific terminals at the Airport other than Terminal 6. Such changes could also serve to limit the number of airlines who may at any time be interested in leasing gates or using space in Terminal 6.

### **Risks Related to Changes in Law and Applicable Standards Changes**

The obligations of the Borrower under the Lease Agreement and in connection with the financing thereof are subject to various laws, policies and regulations of the Port Authority and other governmental authorities, including, among others, laws governing environmental protections, tax policies or minimum wage requirements. Changes in such laws, policies or regulations could negatively impact the cost and schedule related to the Project, the Borrower's ability to fulfill its Operations and Maintenance Work obligations under the Lease Agreement and the Borrower's business, financial condition and results of operations. Changes in law do not qualify as Compensation Events under the Lease, and the Borrower would not be entitled to any compensation with respect to any change in law. If any such new or amended laws, policies or regulations require the Borrower to expend additional funds or adversely affect the Borrower's revenues, such changes could adversely impact the Borrower's ability to pay debt service on the Series 2024 Bonds and Loan Facility.

### **Risks Related to Certain Environmental, Health and Safety Considerations**

As with any project of this size and nature, the Project and Operations and Maintenance Work are subject to numerous statutes, rules and regulations relating to environmental protection and the safety and health of employees and the public during its construction and operation, including: standards relating to the discharge or release of hazardous and other regulated substances to the air, water and land, and the identification, generation, storage, handling, transportation, disposal, record keeping, labeling, reporting, emergency response and investigation, remediation or cleanup in connection with hazardous and toxic materials or other substances associated with the facility; limits on noise emissions; and safety and health standards, practices and procedures. Compliance with such requirements may impose significant additional costs on the Project and the Operations and Maintenance Work. Failure to comply with any such statutes, regulations and directives or any permits required thereunder could have adverse effects on the Project and the Operations and Maintenance Work, including civil or criminal liability, imposition of environmental liens and fines and expenditures of funds to bring the Project and the Operations and Maintenance Work into compliance. In addition, changes in existing laws or regulations could have an adverse effect on the Project and Operations and Maintenance Work. The D&C Contract allocates a number of these risks with respect to the Project to the D&C Contractor (see "– Risks Related to the Project" above).

In addition, soil and groundwater at the Premises have been affected by releases of petroleum hydrocarbons and contaminants, primarily relating to the use of underground fuel storage tanks. Several areas within the Premises footprint have been the subject of remediation to address such releases; however, it is anticipated that contamination will be encountered during the course of excavation for the Project. The Project budget has addressed the potential costs of soil and groundwater contamination encountered during construction. However, the presence of contamination could have an adverse impact on the Project schedule or on the costs associated with the Operations and Maintenance Work at the Airport.

Climate change concerns may have an adverse financial impact on the airline industry that could be significant (see “– Future Environmental Regulatory Developments, such as Climate Change Regulations in the United States and Abroad Could Adversely Affect Operations and Increase Operating Costs in the Airline Industry” below).

### **Risks Related to Damage or Destruction of Terminal 7 and Terminal 6 and Adequacy and Availability of Insurance**

The Borrower is obligated under the Lease Agreement to obtain and keep in force comprehensive insurance, including all-risk property damage insurance covering the full replacement cost of Terminal 7, Terminal 6 and the Ground Transportation Center. See APPENDIX B-4 – “REPORT OF THE INSURANCE CONSULTANT.” In the event, however, that the insurance required under the Lease Agreement is not commercially available, the Borrower may request a reduction or waiver of insurance requirements pursuant to a procedure provided for in the Lease Agreement. The insurance required under the Financing Documents incorporates the requirements of the Lease Agreement. The Borrower is also required to cause airline or concession sublessees as well as certain contractors to maintain certain comprehensive insurance coverages naming the Borrower and certain other parties as additional insureds and loss payees thereunder.

The proceeds of casualty insurance may only be used to repair or replace Terminal 7 or Terminal 6 or, if applicable, the Ground Transportation Center, and no proceeds will be available under the Lease Agreement for repayment of the Series 2024 Bonds or Loan Facility or for any other purpose until the Premises have been restored as required by the Lease, to the Port Authority’s satisfaction. There can be no assurance that such comprehensive insurance coverage will be available in the future on commercially reasonable terms or that the amounts for which the Borrower is insured (including as additional insured or loss payee under any insurance policies of airline or concession sublessees or the Borrower’s contractors) or amounts that the Borrower receives under such insurance coverage will be sufficient to rebuild any damaged facility to the condition, capacity, or efficiency of the previously existing facility.

Under the Lease Agreement, if, following a casualty event (other than a casualty event resulting from the gross negligence or willful misconduct of the Borrower or a contractor of the Borrower), insufficient insurance proceeds are received by the Borrower to reconstruct the damaged facility in accordance with the original plans and specifications for such facility, the Borrower may promptly propose to the Port Authority a plan with respect to (i) reasonable modifications to the affected facilities that would allow such facilities to be restored, replaced and rebuilt, solely with the insurance proceeds made available for such purpose at least to the extent of the value and as nearly as possible to the condition, quality, and class of such affected facility existing immediately prior to such casualty, (ii) to modify the Lease Agreement as may be necessary or appropriate in light of the proposed modifications to the affected facility, and/or (iii) any refinancing the Borrower would propose to incur in connection with such restoration.

There can be no assurance that any modified facility rebuilt pursuant to agreement by the Borrower and the Port Authority as a result of insufficient insurance proceeds will be able to produce sufficient revenues to enable the Borrower to meet its payment obligations with respect to the Series 2024 Bonds and Loan Facility.

### **Risks Relating to Lack of Title Insurance; No Legal Description**

No mortgagee title insurance has been or will be obtained with respect to the Leasehold Mortgages. Accordingly, there is no direct source of payment to cover defects in title or intervening liens, including

any mechanics liens that may arise during construction, nor is there any third party obligated to defend the respective liens of the Leasehold Mortgages.

The Lease Agreement describes the Premises by reference to certain diagrams rather than a metes and bounds legal description. Accordingly, the Leasehold Mortgages have been recorded against the tax block and lot of the Airport and include those diagrams to indicate the portion of the Airport covered by the Lease Agreement and the Leasehold Mortgages. Without a more precise legal description of the Premises no assurance can be given that recording will provide adequate notice of the boundaries of Collateral Agent's interest in the Premises under the Leasehold Mortgages. As a result, other parties may not be precluded from asserting claims with regard to portions of the Premises.

### **Risks Related to New York Lien Law; Effect of Failure to Comply**

Under the New York Lien Law mechanics' liens filed by contractors, suppliers or others granted lien rights under the Lien Law may take priority over certain mortgages, even if the mortgages were recorded prior to the filing of such mechanics liens. The lien priority of mortgages securing certain construction-related costs may be protected against such subsequently filed liens if certain requirements are met. Among the requirements under Section 22 of the Lien Law are the filing of an affidavit setting forth the consideration for the loan and the net amount available for "costs of the improvement" as defined in the Lien Law, filing of a building loan contract in the county clerk's office prior to the recordation of the mortgage securing such amount, and filing any modification to the building loan contract within 10 days after the execution of any such modification. The failure by the Borrower and the Collateral Agent to comply with the applicable provisions of the New York Lien Law could result in the lien of the Senior Building Leasehold Mortgage becoming subordinated to mechanics, materialman's and other intervening lienors.

### **Risks Related to Exemption From Mortgage Recording Tax**

New York State imposes a tax on the recording of mortgages and of certain related documents. The tax is payable at the time of recording. In the event that a mortgage is recorded without payment of the proper mortgage recording tax then neither the mortgage nor the obligations it secures can be enforced until the tax and any accrued interest and penalties are paid.

Based on a mortgage recording tax exemption cited in advisory opinions rendered to local development corporations organized under the same New York State statute as the Issuer and common practice, the Leasehold Mortgages were submitted, and certain notices confirming that the Series 2024 Bonds are secured under the Leasehold Mortgages will be submitted, for recording without payment of mortgage recording tax.

There can be no assurance that governmental authorities will not challenge the mortgage recording tax exemption asserted in respect of the Leasehold Mortgages in a subsequently conducted audit or otherwise. If it is determined that such taxes are or were payable when the Leasehold Mortgages, or certain notices confirming that the Series 2024 Bonds are secured under the Leasehold Mortgages, were submitted for recording, the Borrower will be obligated to pay them but no Borrower funds are currently budgeted for this contingency.

## **Certain Airport Regulatory Considerations**

### ***General***

The Port Authority and the Airport are subject to various federal statutory, regulatory and contractual requirements concerning the lease, construction and operation of Terminal 7 and Terminal 6.

It is not possible to predict whether future legislation, regulations, policies, orders, restrictions or limitations on the Airport, the Project, or operation of Terminal 7, Terminal 6 and the Ground Transportation Center will be imposed. Each could be adversely affected if statutory or regulatory changes are implemented that (i) impose more comprehensive or stringent restrictions or requirements on the Airport and on the Airport's facilities, or (ii) otherwise impair the Borrower's ability to operate Terminal 7 and Terminal 6.

### ***Available Slots***

Based on the significant demand for airline service from within the New York metropolitan area, as well as the practical limitations affecting the region's air traffic space and the runway capacity at the Airport, the FAA has established limits on the number of flight operations that airlines may schedule during peak operating periods each day at the Airport. The FAA has also established similar types of limitations at each of LaGuardia Airport and Newark Liberty International Airport.

Under the FAA's current Order on Operating Limitations for the Airport (the "O/A Order"), which was initially published in January 2008 and was most recently extended to October 2026, scheduled flight take-offs and landings (each an "Operating Authorization") at the Airport are limited to 81 per hour during peak operating hours at the Airport. Operating Authorizations have been allocated to airlines operating at the Airport by the FAA, and in general, airlines with Operating Authorizations may also lease or trade Operating Authorizations with other airlines, following FAA approval, so long as the arrangement does not extend beyond the current expiration date of the O/A Order. Accordingly, for so long as the FAA's current O/A Order or similar flight limitations for the Airport remain in effect, an airline's ability to initiate or increase scheduled service to and from the Airport will necessarily depend upon that airline having or obtaining from the FAA unused or reallocated Operating Authorizations, or being able to obtain leased or traded Operating Authorizations from other airlines, at its desired operating times.

There can also be no assurance given that the FAA or other governmental agencies having jurisdiction will not enact even stricter limitations on flight activity at the Airport in light of the growing demand for air travel in the New York metropolitan area and its impact on the region's air traffic space and area airports.

### ***Regulatory Considerations Regarding Airline Rates***

Under applicable federal statutes, U.S. Department of Transportation ("DOT") and FAA policy, FAA grant assurances and judicial precedent, airport fees and rates and charges levied on air carriers for services and facilities at U.S. airports that receive federal grants must be fair and reasonable and not unjustly discriminatory.

Specifically, under DOT/FAA policy, airfield fees (e.g., for use of runways) are required to be based on historic costs, but non-airfield aeronautical facility (e.g., passenger terminal facilities) fees can be based on any reasonable methodology, including but not limited to direct negotiation with users, so-called "compensatory" rates based on historic cost valuation, or an objective and justified determination of

fair market value. Airport proprietors also cannot subject air carriers to “unjust discrimination” in fees and operating conditions. This obligation requires that air carriers making similar use of an airport be charged substantially comparable rates and charges and receive similar treatment, although airports are permitted to make reasonable classifications among airlines such as classifications based on signatory or non-signatory status, and to offer reasonable price reductions to volume purchasers or users of airport services. As proprietor of the Airport, the Port Authority must assure compliance with all these standards and could be held accountable for any non-compliance. The Port Authority has in turn required the Borrower to comply with these standards pursuant to the Lease.

The Borrower intends for its current and future fee structures for airline use of both Terminal 7 Facilities and Terminal 6 to comply with applicable federal statutes and DOT/FAA policy. The Borrower further believes that the fees that currently are or that are planned to be charged to airlines for their use of such facilities are and will be competitively constrained because of the presence of various alternative terminals at the Airport. The Borrower also plans to obtain the agreement of affected airlines to its proposed fees through direct negotiations with those airlines, thereby reducing the likelihood of an administrative or other legal challenge to those fees, although the Borrower retains the ability to establish airline fees unilaterally by tariff. Under applicable DOT/FAA policy and regulations, the DOT/FAA generally do not permit air carriers to challenge airport fees to which they have contractually agreed.

Nevertheless, there can be no assurance that (i) any of the Borrower’s airline fees will not be challenged by one or more air carriers as unfair or unreasonable or as unjustly discriminatory, or (ii) any of the Borrower’s airline fees will be upheld in the event of a challenge. An adverse DOT/FAA or other legally binding determination regarding any non-compliance of the Borrower’s airline fees could require the Borrower to develop alternative fees or alternative fee methodologies, and possibly to refund a portion of the challenged fees to the affected airlines, either of which events could adversely affect the Borrower’s ability to generate sufficient revenues to support its obligations, including its obligations with respect to the Series 2024 Bonds.

### **Landing Fees Levied by the Port Authority**

The Port Authority is entitled to levy certain charges directly on airline users for their use of public landing area and related areas and services at terminals at the Airport, including Terminal 7 and Terminal 6. The Port Authority levies charges for, among others, takeoff and landing of aircraft at terminals, including Terminal 7 and Terminal 6, which charges may be passed on by airlines and result in higher fares for passengers or adversely impact the operating costs of the airlines at Terminal 7 and Terminal 6. Any higher fares as a result of such changes to airline charges may negatively impact airline service and passenger demand at Terminal 7 and Terminal 6, which may negatively impact the results and operations of the Borrower.

### **Risk Factors Relating to the Airline Industry**

#### *General*

The revenues of the Borrower could be affected by the economic health of the air transportation industry or events affecting one or more of its airline users. More specifically, unfavorable events affecting the industry or specific airline users of Terminal 7 and Terminal 6 could lead one or more of such users to default with respect to its payment obligations to the Borrower and/or decrease or discontinue its operations at the Airport or Terminal 7 or Terminal 6. Decreased passenger service by a specific airline or a decreased demand for air travel more generally could also adversely affect the Borrower’s non-airline revenues, which are sensitive to passenger traffic levels. The Borrower makes no representation concerning the financial

health of any airline user and no assurance can be given regarding the impact, if any, that future unfavorable events affecting Terminal 6's airline users or the airline industry more broadly might have upon the Borrower or its operations at Terminal 7 and Terminal 6.

In general, the airline industry has been cyclical and characterized by high sensitivity to general economic conditions and other factors.

***Reduced Fares and Profitability may Result from Lower Demand and Overcapacity Because of the Airline Industry's Sensitivity to Unfavorable Economic Conditions and Changing Volatility***

Until recently, the airline industry had undergone structural changes and sustained significant financial losses. The economic condition of the industry is highly competitive and volatile. The industry is sensitive to a variety of factors, including (i) the cost and availability of fuel, labor, aircraft, and insurance, (ii) general economic conditions, (iii) international trade, (iv) currency values, (v) competitive considerations, including the effects of airline ticket pricing, (vi) traffic and airport capacity constraints, (vii) governmental regulation, including security regulations and taxes imposed on airlines and passengers, and maintenance and environmental requirements, (viii) passenger demand for air travel, (ix) disruption caused by airline accidents, criminal incidents and acts of war or terrorism, (x) the cost and availability of financing, (xi) the capacity of the national air traffic control system, (xii) national and international disasters and hostilities, (xiii) public health concerns and pandemics, such as the spread of COVID-19, influenza, severe acute respiratory syndrome or other communicable diseases, (xiv) the cost and availability of employees and labor relations within the airline industry, (xv) regulation by the federal government, (xvi) environmental risks, noise abatement concerns and regulation, (xvii) acts of war or terrorism, (xviii) aircraft manufacturing defects or supply chain disruptions, and (xix) other risks. Due to the discretionary nature of business and personal travel spending, airline passenger traffic and revenues are heavily influenced by the strength of the U.S. and other countries' economies, other regional and international economies, corporate profitability, safety and security concerns and other factors. Ongoing structural changes to the industry are the result of a number of factors including the impact of low cost airlines, declines in business travel due to technological change, internet travel web sites and airlines reorganizing under applicable bankruptcy (or similar) law. Some airlines operating at the Airport have emerged from bankruptcy reorganizations or have recently entered bankruptcy over the past several years. Airlines may file for bankruptcy protection in the future.

Further, alliances, mergers and other forms of industry consolidation, including antitrust immunity grants, may take place and may or may not involve airlines serviced at Terminal 7 or Terminal 6 as participants. Depending on which airlines combine, or seek to combine, and which assets, if any, are sold or otherwise transferred to other airlines in connection with such combinations, and whether combinations sought by various airlines are or are not ultimately consummated, the competitive position of airlines serviced at Terminal 7 or Terminal 6 relative to the other airlines that have, or have not, participated in consolidations, could be harmed and day-to-day operations at Terminal 7 or Terminal 6 could be affected.

The financial performance of the air transportation industry correlates with the state of the national economy and the global economy. Prolonged periods of stagnant or weak economic conditions (including high inflation) could have a material adverse effect on business, financial condition and operating results in the industry. Economic downturns generally lead to an overall decline in flight demand. Because airlines have relatively high fixed costs, much of which cannot be mitigated during periods of lower demand for air travel, they are particularly sensitive to changes in economic conditions. A reduction in the demand for air travel due to unfavorable economic conditions also limits their ability to raise fares to counteract increased fuel, labor and other costs. Deterioration in either the domestic and/or global economy may therefore have a material impact on revenue in the industry. Future increases in passenger traffic will depend largely on

the ability of the U.S. and other countries to sustain growth in economic output and income. Following significant and dramatic changes which occurred in the financial markets in September 2008, the global economy experienced a recession followed by weak growth. There can be no assurances that prolonged weak economic conditions or other national and international fiscal or health-pandemic related concerns will not have an adverse effect on the air transportation industry, particularly over the full term of the Lease Agreement. Finally, volatility in the financial and credit markets may have a material adverse effect on the financial condition of airline companies, because such economic conditions could make it difficult for certain airlines to obtain financing on acceptable terms to refinance certain maturing debt and to meet future capital commitments.

***High and/or Volatile Fuel Prices or Significant Disruptions in the Supply of Aircraft Fuel Could have a Material Adverse Impact on the Operating Results of Airline Companies***

The price and availability of fuel is a critical and uncertain factor affecting airline operating economics. The price of oil and the associated cost of jet fuel is the largest single cost affecting the airline industry. The volatility in jet fuel prices, which track just above crude oil prices, has significantly affected airlines' operating costs over the past several years.

Fuel costs are expected to remain volatile and may affect future passenger traffic levels, which depend on stable international conditions as well as national and global economic health. Future financial losses could force airlines to further retrench, merge, consolidate, seek bankruptcy protection, discontinue marginal operations, or liquidate. The restructuring, merging, or liquidation of one or more of the large network airlines could drastically affect air service at many connecting hub airports, offer business opportunities for the remaining airlines, and change air travel patterns throughout the U.S. and the world aviation system.

Although fuel cost is of major importance to the airline industry, future prices and availability are uncertain and fluctuate based on numerous factors. These can include supply-and-demand expectations, geopolitical events, fuel inventory levels, monetary policies, regulatory efforts to reduce aircraft emissions and economic growth estimates. Historically, certain airlines have also employed fuel hedging as a practice to provide some protection against future fuel price increases. While fuel hedging has generally not been used by airlines in recent years, it remains as a potential option to mitigate fuel cost risk.

***Aviation Safety and Security Concerns***

Concerns about the safety of airline travel and effectiveness of security precautions, particularly in the context of international hostilities, terrorist attacks, increased threat levels and world health concerns may influence passenger travel behavior and airline travel demand.

In early January 2024, the FAA ordered the temporary grounding of Boeing 737-9 MAX aircraft operated by U.S. airlines or in U.S. territory following an incident on Alaska Airlines during which a plug door malfunctioned. On January 24, 2024, the FAA approved an inspection and maintenance process that each Boeing 737-9 MAX aircraft must undergo before being eligible to return to service. In March 2024, the FAA halted production expansion of the Boeing 737 MAX and continued its increased onsite presence at Boeing's facility in Renton, Washington and Spirit AeroSystems' facility in Wichita, Kansas. Future safety issues (or the perception thereof) with respect to aircraft which serve the Airport, as well as any associated manufacturing and production impacts could result in reduced passenger traffic.

Aviation industry supply chain issues are also impacting the airline industry, including, but not limited to, engines, airframes and other parts. At this time, it is uncertain when such supply chain issues will resolve.

### ***Demand for Air Travel***

Airline fares have an important effect on passenger demand, particularly for price-sensitive “discretionary” travel, such as vacation travel. Airfares are influenced by airline operating costs and debt burden, passenger demand, capacity and yield management, market presence and competition. If airlines are unable to charge fares sufficiently high to cover operating costs and interest expense they will experience financial difficulty, which could adversely affect airline revenues and profits.

### ***Capacity of Air Traffic Control and Airport Systems***

Demand on air traffic control systems continue to cause aircraft delays and restrictions, both on the number of aircraft movements in certain air traffic routes and on the number of landings and takeoffs at certain airports (including the Airport). These restrictions affect airline schedules and passenger traffic nationwide, including the Airport. The FAA has made certain improvements to the computer, radar and communications equipment of the air traffic control system in recent years, but no assurances can be given that future increases in airline and passenger traffic will not again adversely affect airline operations.

### ***Economic Base for Airport’s Trade Area; Additional Economic Variables Impacting the Airport***

The demand for air transportation is largely dependent upon the demographic and economic characteristics of its surrounding geographical area. The relationship between the demographic and economic characteristics of an area and its demand for travel is particularly strong for origin and destination (O&D) passenger traffic, which, as previously noted, has historically accounted for the largest portion of airline traffic demand at the Airport – approximately 80 percent in 2023, according to the Airport Consultant’s Report. As a result, the major portion of demand for air travel at the Airport is influenced more by the local and national socioeconomic characteristics of the Airport’s Air Trade Area (consisting of the New York-Newark-Jersey City, NY-NJ-PA Metropolitan Statistical Area and the Bridgeport-Stamford-Norwalk, CT Metropolitan Statistical Area) than by individual airline decisions regarding air service patterns, including connecting activity.

The Airport serves the largest population base in the United States with high household and per capita personal income and benefits from a large and diverse economic base that supports business and leisure travel. From 2012 to 2022, the Air Trade Area gross regional product (GRP) averaged approximately 9.0 percent of the annual US GDP. In 2023, New York City was ranked the wealthiest city in the world, with the City’s cumulative wealth of more than \$3 trillion. The City receives the most visitors of any US city and consistently ranks in the top 10 most visited cities globally. Projected economic variables indicate that the Air Trade Area will remain a destination that attracts both business travelers and tourists, positively affecting the demand for future inbound airline travel. Projected Air Trade Area economic variables further support the continued increase in numbers of local outbound passengers. See “APPENDIX B-1 “REPORT OF THE AIRPORT CONSULTANT.”

Many additional factors have combined to alter consumer travel patterns. The threat of terrorism remains a key factor in passenger travel decisions. As a result, national governments have mandated various security measures that have resulted in new security taxes and fees, longer passenger processing and wait times at airports and higher operating costs. Both add to the costs of air travel and make air travel less attractive to consumers relative to ground transportation, especially to short-haul destinations.

### ***Terrorist Attacks, Political Uprisings, Armed Conflicts, their Consequences, or the Fear of Such Occurrence Could Negatively Affect the Borrower, Even if not Directed at the Airline Industry***

Terrorist attacks, political uprising and armed conflicts worldwide have had significant negative effects on the international airline industry in the past. The attacks of September 11, 2001 and the continuing threat posed by terrorist attacks, including bioterrorism and new forms of terrorism, materially impacted and continue to impact air travel.

Since September 11, 2001, the recurrence of terrorism incidents against either domestic or world aviation has remained a risk to achieving forecast levels of activity. Tighter security measures have restored the public's confidence in the integrity of the US and global aviation security systems. However, any terrorist incident targeting aviation could have an immediate and significant impact on the demand for air travel. Additionally, geopolitical issues may affect aviation activity. Potential governmental or regional instability in certain countries or locations may affect access to, or demand for, aviation service in these places. The Russian invasion of Ukraine, which began in February 2022, is still ongoing. The conflict has resulted in the closure of airspace over Russia and Ukraine to most airlines. Restrictions on Russian airlines have resulted in the suspension of nearly all service between Russia and other countries. These restrictions have limited airlines' ability to operate certain nonstop routes that would otherwise overfly Russia or Ukraine. Additionally, conflict in the Middle East region, involving Israel, Iran and armed terrorist organizations that operate in the region such as Hamas or Hezbollah, which escalated in October 2023, remains an evolving situation. Further developments in these conflicts could exacerbate geopolitical and economic uncertainty and potentially impact demand for travel to certain regions. As the largest international gateway airport in the US (as measured by arriving international passengers), the Airport provides service to nearly all major regions of the world, and the Borrower expects that international airlines servicing foreign destinations will be the primary airline tenants at Terminal 7 and Terminal 6. Future geopolitical instability may affect international aviation service demand. The possibility of intensified international hostilities and further terrorist attacks involving or affecting commercial aviation are a continuing concern that may affect future travel behavior and airline passenger demand.

Terminal 7 and Terminal 6 are high-profile potential targets at a high-profile Airport in a high-profile metropolitan area. There can be no assurance that Terminal 7 and Terminal 6 themselves will not be directly affected by a terrorist attack.

Further, future enhanced securities procedures may significantly increase inconvenience and delays at airports, including the Airport, again impacting passenger demand for air travel.

### ***Unmanned Aerial Vehicles***

With the proliferation of inexpensive, commercially available, unmanned aerial vehicles ("UAVs"), or drones, the threat that unauthorized and unsafe UAV operations near airports could adversely affect the safety or security of United States airports and arriving or departing aircraft has increased significantly in recent years. An unauthorized UAV incursion at the Airport could be the source for a potential terrorist attack or assault on the Airport infrastructure and therefore could result in the temporary delay or cancellation of flights to or from Terminal 7 and Terminal 6 as well as harm the Airport's brand, reputation and the Borrower's relationships with customers, airlines and concessionaires.

### ***Mergers and Acquisitions***

US and foreign airlines have merged or acquired competitors to achieve operational and commercial synergies and to improve their financial performance. Consolidation across the industry has

resulted in the realignment of several airline route networks as airlines have sought to improve network efficiency. Further consolidation of the US or foreign airline industry could affect the amount of capacity offered at the Airport and could alter the competitive landscape

***Extensive Government Regulation Could Increase an Airline's Operating Costs and Restrict its Ability to Conduct its Business***

Airlines are subject to extensive regulatory and legal requirements in the U.S. and internationally. As an example, in the United States, Congress has passed laws, and the FAA has issued a number of maintenance directives and other operating regulations, that impose substantial costs on airlines. In January 2014, the FAA's more stringent pilot flight and duty time requirements under Part 137 of the Federal Aviation Regulations took effect, which has increased costs for all airlines. In July 2014, minimum qualifications took effect for airline first officers and the U.S. Congress is currently considering legislation that, among other things, would increase passenger rights and require certain new security measures, further increasing airline operating costs. Internationally, additional laws, regulations, taxes and airport charges have been proposed from time to time that could significantly increase the cost of airline operations or reduce revenues. The ability of an airline to operate international routes is subject to change because the applicable arrangements between the governments may be amended from time to time, or because appropriate slots or facilities may not be available.

***Future Environmental Regulatory Developments, such as Climate Change Regulations in the United States and Abroad Could Adversely Affect Operations and Increase Operating Costs in the Airline Industry***

Numerous scientific studies on global climate change show that, among other effects on the global ecosystem, sea levels will rise, extreme temperatures will become more common and extreme weather events will become more frequent as a result of increasing global temperatures attributable to atmospheric pollution. Over the next 25 to 100 years, such extreme events and conditions are expected to increasingly disrupt and damage critical infrastructure and property as well as regional economies and industries that depend on natural resources and favorable climate conditions. Disruptions could include more frequent and longer-lasting power outages, fuel shortages and service disruptions. Coastal public infrastructure may be threatened by the continued increase in the frequency and extent of high-tide flooding due to sea level rise, and inland infrastructure, including access to roads, the viability of bridges and the safety of pipelines, may be affected by increases in the severity and frequency of heavy precipitation events. Near-coastal areas like the greater New York City metropolitan area (which contains areas of land that are at or near sea level) may be at risk of substantial flood damage over time, affecting private development and public infrastructure. As a result, many residents, businesses, and governmental operations within this area could be negatively impacted and possibly displaced, reducing demand for air and land travel to or from the greater New York City metropolitan area.

Climate change concerns have led, and may continue to lead, to new laws and regulations at the federal and state levels that could have a material adverse effect on the operations of Terminal 6 and also could affect ground operations at airports. The U.S. Environmental Protection Agency ("EPA") has taken steps towards the regulation of greenhouse gas ("GHG") emissions under existing federal law. Those steps may in turn lead to further regulation of aircraft GHG emissions. Regulation by the EPA can be initiated by private parties or by governmental entities other than the EPA. The EPA has stated its intent to propose GHG emission standards for covered aircraft that will be at least as stringent as emission standards under development by the International Civil Aviation Organization, which were adopted in 2017. The Borrower cannot predict what the EPA's emission standards will be or what effect those standards may have on the Borrower or air traffic at the Airport. The effects, however, could be material. On January 11, 2021, the

EPA issued a final rule entitled Control of Air Pollution from Airplanes and Airplane Engines: GHG Emission Standards and Test Procedures, 86 Fed. Reg. 2136 (Jan. 11, 2021). The rule adopts GHG standards equivalent to those adopted by the International Civil Aviation Organization (“ICAO”) in 2017 for certain civil subsonic jet airplanes and larger subsonic propeller-driven airplanes with turboprop engines. The standards generally apply to new type design airplanes with certification applications submitted on or after January 11, 2021 (January 1, 2023 for certain, smaller new designs) and in-production airplanes starting on January 1, 2028, but not to existing airplanes already in service. In its analysis of costs and benefits in the preamble to the rule, the EPA explained that many airplanes manufactured in the United States “already met the ICAO standards at the time of their adoption” or would be expected to do so by 2020. The impact to the Airport and Terminal 6 is not expected to be significant, and the rule does not require modifications to airports.

Extreme climate weather conditions caused by climate change may increase and disrupt airport operations, damage facilities and potentially decrease demand for travel for the upcoming decades. The frequency and severity of climate-related weather events may be expected to increase over the next decades, and airports may experience more disruptions to flights or may see fundamental damage to key physical assets like runways or terminals as a result. Climate change could result in rising sea levels, flooding and other natural disasters. Given the Airport’s location near large bodies of water, rising sea levels, flooding and other natural disasters could impact physical assets at the Airport, including at Terminal 6.

There are certain climate change laws and regulations that have already gone into effect, including the European Union Emissions Trading Scheme, environmental taxes for certain international flights, limited greenhouse gas reporting requirements and land-use planning laws which could apply to airports and could affect airlines in certain circumstances. In addition, there is the potential for additional regulatory actions in regard to the emission of greenhouse gases by the aviation industry. The precise nature of future requirements is difficult to predict, but the financial impact to the airline industry would likely be adverse and could be significant.

***Increases in Insurance Costs or Reductions in Insurance Coverage may Adversely Impact Airline Operations and Financial Results***

An airline’s ability to manage its business with an adequate level of insurance coverage against risk of losses from man-made and natural disasters is dependent on, among other things, insurance policies. There can be no guarantee that the amount of insurance coverage upon the occurrence of a man-made or natural disaster, including the loss of one or more of its aircraft for any reason, would be sufficient to cover the resulting losses. Substantial claims resulting from an accident in excess of an airline’s related insurance coverage could be harmful. Following September 11, 2001, aviation insurers significantly increased airline insurance premiums and reduced the maximum amount of coverage available to commercial airlines. Accordingly, airline insurance costs increased significantly and the ability of airlines to continue to obtain insurance even at current prices remains uncertain. Additionally, severe disruptions in the domestic and global financial markets could adversely impact the claims paying ability of some insurers. Future downgrades in the ratings of enough insurers could adversely impact both the availability of appropriate insurance coverage and its cost. Because of competitive pressures in the airline industry, the ability to pass additional insurance costs to passengers is limited. As a result, further increases in insurance costs or reductions in available insurance coverage could have an adverse impact on the financial results of airline operations.

***Union Disputes, Employee Strikes, Slowdowns, and other Labor-related Disruptions could Adversely Affect Airline Operations which Result in Increased Costs Impairing Financial Results***

The airline industry is labor intensive, utilizing large numbers of pilots, flight attendants, aircraft maintenance technicians, ground support personnel and other personnel. Strikes or labor disputes with unionized employees may adversely affect an airlines' ability to conduct business. While collective bargaining and other agreements between airline companies and their respective unions takes place regularly, a breakdown in the bargaining process could lead to industrial action, which could disrupt operations and have a material adverse effect on business performance. There can be no assurance that airlines being serviced at Terminal 6 and Terminal 7 will not experience strikes or other labor related employment disruptions.

***Airlines Rely Heavily on Technology and Automated Systems to Operate, and any Significant Failure of these Technologies or Systems Could Reduce Revenue or Harm a Company***

Airlines are highly dependent on technology and automated systems in their operations and to achieve low operating costs. These technologies and systems include computerized airline reservation systems, flight operations systems, financial planning, management and accounting systems, telecommunications systems, website, maintenance systems and check-in kiosks. The risk of a security breach or disruption, particularly through cyber-attack or cyber intrusion, including by computer hackers, foreign governments and cyber terrorists, has increased as the number, intensity and sophistication of attempted attacks and intrusions from around the world have increased. Furthermore, there has been heightened legislative and regulatory focus on data security in many countries, including requirements for varying levels of customer notification in the event of a data breach. Any disruption to computer and communications systems could significantly impair an airline's ability to operate its business efficiently and could have material adverse effects on cash flows, financial condition and results of operations.

***Aircraft Supply Chain Constraints***

Supply chain constraints causing shortages of aircraft engines, avionics, and other essential components are affecting the ability of aircraft manufacturers, including Airbus and Boeing, to produce larger, more fuel-efficient aircraft in the numbers being sought by airlines even while there is industry-wide domestic overcapacity. Such constraints are causing and may continue to cause a reduction in the number of active aircraft in fleets able to operate service, however, due to the variety and complexity of airline operation, these constraints may affect individual airlines and/or Terminal 7 and Terminal 6 with different magnitudes.

***Customs and Border Protection Staffing***

Staffing shortages and capacity limitations of the Customs and Border Protection (CBP) could be factors that might affect future activity at the Airport and at competing airports, particularly as it relates to increasing international service. For example, Terminal 7 and Terminal 6's likelihood of increasing international service will be reduced if CBP is unable to provide an adequate amount of CBP agents to process the additional incoming passengers.

***Air Traffic Control Systems and Staffing***

Capacity limitations of the national air traffic control system, the Airport and at competing airports could be factors that might affect future activity at the Airport. In the past, demands on the air traffic control

system have caused operational restrictions that have affected airline schedules and passenger traffic and caused significant delays. For example, on January 10, 2023, a failure in the FAA’s Notice to Air Missions (“NOTAM”) system, which flags potential hazards for pilots before departure, caused an approximately two-hour grounding of all passenger aircraft in the United States. The FAA concluded the outage was caused by a contractor who mistakenly deleted files in the NOTAM system database.

Over the last ten years, the FAA has made certain improvements to the computer, radar and communications equipment of the air traffic control system in recent years, but no assurances can be given that future increases in airline and passenger activity would not again adversely affect airline operations. The 2012 FAA Reauthorization Act contained numerous provisions aimed at accelerating the implementation of Next Generation Air Transport System (“NextGen”). NextGen is designed to modernize the National Airspace System from a ground-based system of air traffic control to a satellite-based system of air traffic management in order to enhance the use of airspace and runways. The 2024 FAA Reauthorization Act requires the FAA to implement certain NextGen programs by December 31, 2025 and also requires the implementation of advanced data communication capabilities by 2026 and the modernization of aeronautical information management systems by 2027.

### **Risk Factors of Future Pandemics**

The COVID-19 pandemic resulted in restrictions on passenger air travel, challenges to ordinary airline operations and severe disruptions to the global and United States economies. The COVID-19 pandemic had, and future pandemics may have, a material adverse effect on the demand for passenger air travel.

No assurances can be given that future pandemics or other currently unknown or unexpected health related governmental, political or other unforeseen crises will not have a material adverse impact on the operations of Terminal 7 and Terminal 6 or the ability of the Borrower to make payments under the TDC Loan Agreements in an amount sufficient to pay the debt service on the Series 2024 Bonds and the Loan Facility.

### **Cybersecurity Risks**

The Borrower, like many other large public and private entities, relies on a large and complex technology environment to conduct its operations, and faces multiple cybersecurity threats including, but not limited to, hacking, phishing, viruses, malware and other attacks on its computing and other digital networks and systems (collectively, “Systems Technology”). As a recipient and provider of personal, private, or sensitive information, the Borrower may be subject to data privacy and data protection regulations and may be the target of cybersecurity incidents that could result in adverse consequences to Borrower and its Systems Technology, including failure to be in compliance with such data privacy and data protection regulations, leading to requiring a response action to mitigate the consequences.

Cybersecurity incidents could result from unintentional events, or from deliberate attacks by unauthorized entities or individuals attempting to gain access to the Systems Technology for the purposes of misappropriating assets or information or causing operational disruption and damage. To mitigate the risk of business operations impact and/or damage from cybersecurity incidents or cyber-attacks, the Borrower invests in multiple forms of cybersecurity and operational safeguards.

The frequency of these threats has continued to increase alongside the intensity and sophistication thereof. In connection with the same, regulatory and legislative focus surrounding data privacy and

cybersecurity has increased. There can be no assurances at this time regarding the impacts of any such regulations.

Malicious third parties may attempt to gain access to the Borrower's systems or information, or through its business partners and third-party service providers, including through fraud or other means of deception, or introduction of malicious code, such as malware and ransomware. If successful, these actions could cause harm to the Borrower's computer systems or compromise data stored on its computer networks or those of its business partners and third-party service providers, potentially causing the Borrower to incur remedial, legal and other costs, which could be material. Hardware or software that the Borrower or its business partners or third-party service providers develop, acquire or use in connection with Borrower's systems may contain defects that could unexpectedly compromise information security.

While cybersecurity and operational safeguards are periodically tested, no assurances can be given that such measures will ensure against cybersecurity threats and attacks. A significant cybersecurity incident could result in material adverse consequences for the Borrower, including, but not limited to, loss of functionality of critical systems; loss, destruction or theft of systems or data; service or system disruptions; damage to equipment or injury to persons and property; business delays; reputational damage; litigation, regulatory enforcement or other legal action. There can be no assurances at this time what impact, if any, a cybersecurity incident would have on the operations or operating results of Terminal 7 and Terminal 6 or on the Borrower's ability to make payments under the TDC Loan Agreements, and in turn, the Series 2024 Bonds and the Loan Facility.

#### **Risks Related to Flood Risk and Possible Sea-Level Rise**

The New York State Department of Environmental Conservation ("DEC") is required under the 2014 New York State Community Risk and Resiliency Act to adopt sea-level rise projections and provide guidance to other State agencies in applying those projections. The DEC adopted revised sea-level projections in February 2017, which project a sea-level rise in New York City with a medium projection of 16 inches by the 2050s, and 29 inches by the 2080s. The Project must comply with applicable building codes and Port Authority guidelines, which take into account floodplain elevations and sea level rise in order to protect the Project from flooding to the extent practicable. It is possible, however, that despite these flood mitigation efforts, flooding events related to extreme weather or unexpectedly high sea-level rise could adversely affect the Project and the operations of the Borrower.

#### **Possible Loss of Tax-Exempt Status of Series 2024 Bonds**

On the date of delivery of and payment for the Series 2024 Bonds, Co-Bond Counsel will render its opinions with respect to the tax-exempt status of the interest on the Series 2024 Bonds, the forms of which opinions are set forth in APPENDIX K. See also "PART 18 – TAX MATTERS."

As described under "PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS – Redemption of the Series 2024 Bonds – Extraordinary Redemptions," the Series 2024 Bonds may be subject to mandatory redemption in whole or in part upon a Determination of Taxability. However, the definition of Determination of Taxability does not apply to every situation in which the interest on the Series 2024 Bonds may be determined to be includable in gross income of holders or Beneficial Owners thereof for federal tax purposes. If the interest on the Series 2024 Bonds is determined to be includable in gross income of holders or Beneficial Owners thereof for federal tax purposes for a reason other than a Determination of Taxability, the Series 2024 Bonds are not subject to redemption solely as a consequence thereof, and the principal thereof is not required to be accelerated by the Trustee.

Further, a determination that the interest on the Series 2024 Bonds is includable in gross income of the holders or Beneficial Owners may not occur for a substantial period of time after interest first becomes includable in the gross income of the owners thereof for federal income tax purposes. The loss of the exclusion of the interest on any Series 2024 Bonds from gross income of the owners thereof for federal income tax purposes could be retroactive on which the Series 2024 Bonds are issued. The tax liability of the owners of any Series 2024 Bonds for failure to include interest on such Series 2024 Bonds in their gross income may extend to years for which interest was received or accrued on such Series 2024 Bonds, or some portion thereof, and for which the relevant statute of limitations has not yet run.

Other than if and to the extent applicable in connection with an extraordinary redemption as described under “PART 2 – DESCRIPTION OF THE SERIES 2024 BONDS – Redemption of the Series 2024 Bonds – Extraordinary Redemptions,” no additional interest or penalty is payable in the event of the taxability of interest on the Series 2024 Bonds.

### **Risks of Bond Insurer Deemed Owner of Insured Bonds**

So long as there is no default under the Policy, the Bond Insurer will be deemed the owner of the Insured Bonds for purpose of all actions relating to the Insured Bonds which require the consent, direction or request of the Series 2024 Bondholders of the Insured Bonds. Pursuant to the Indenture, each holder of the Insured Bonds will appoint the Bond Insurer as its agent and attorney-in-fact with respect to the Insured Bonds. See APPENDIX D-1 – “FORM OF TRUST INDENTURE.” The Bond Insurer may have interests that differ from the holders of the Insured Bonds and may not make the same decision with respect to the foregoing that a holder would make. So long as there is no default on the Policy, Series 2024 Bondholders will not be permitted to override the decisions of the Bond Insurer with respect to the Insured Bonds.

### **Risks Related to the Borrower’s Business – Internal Controls**

The Borrower’s independent auditors, KPMG LLP, identified certain material weaknesses in connection with its audit of the Borrower’s internal control over financial reporting and financial statements for the fiscal years ended December 31, 2022 and December 31, 2023. See APPENDIX C-1 – “CONSOLIDATED FINANCIAL STATEMENTS AND INDEPENDENT AUDITORS’ REPORT.” A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected, on a timely basis.

The Borrower was established in August 2022 and achieved financial close on the Loan Facility on the Original Closing Date, at which point the Management Services Agreement went into effect and the Borrower commenced primary operations. In connection with the Borrower’s fiscal year ended December 31, 2022, KPMG reported three material weaknesses: (i) lack of an adequate number of personnel in its accounting and related functions to ensure appropriate segregation of duties; (ii) absence of controls in place to ensure that all journal entries are reviewed by someone other than the initial preparer; and (iii) lack of adequate controls to ensure appropriate accounting treatment of non-routine technical accounting matters. In connection with the Borrower’s fiscal year ended December 31, 2023, KPMG reported one remaining material weakness: lack of adequate controls to ensure appropriate accounting treatment of non-routine technical accounting matters.

The Borrower has implemented, or is in the process of implementing, measures designed to improve its internal control over financial reporting to address the underlying causes of the identified material weaknesses, including (i) hiring qualified staff for key roles in finance and accounting operations to promote adequate segregation of duties; (ii) establishing additional levels of reviews and approvals of

journal entries and non-routine transactions; (iii) enhancing the design of its monthly and quarterly financial close checklists; (iv) formalizing the delegation of responsibility and timing for the preparation and review of its financial close checklist; and (v) performing a full U.S. GAAP financial statement close for the nine-month period ending September 30, 2024. Management of the Borrower believes that the identified material weaknesses have been remediated as of the date hereof.

While management of the Borrower believes that all the identified material weaknesses have been remediated as of the date hereof, if the Borrower fails to achieve and maintain effective internal control over financial reporting, it could result in material misstatements in its financial statements and could also impair its ability to provide financial statements on a timely basis. Ineffective internal control over financial reporting could expose the Borrower to increased risk of fraud or misuse of corporate assets, potential regulatory investigations and civil or criminal sanctions in addition to other adverse operating impacts (including, but not limited to, adversely impacting the Borrower's access to capital markets).

For purposes of this section, "U.S. GAAP" means generally accepted accounting principles in the United States set forth by the Financial Accounting Standards Board (FASB).

## **PART 18 – TAX MATTERS**

### **General**

In the opinion of Squire Patton Boggs (US) LLP and Hardwick Law Firm, LLC, Co-Bond Counsel, under existing law: (i) interest on the Series 2024 Bonds is excluded from gross income for federal income tax purposes under Section 103 of the Internal Revenue Code of 1986, as amended (the "Code"), except interest on any Series 2024 Bonds for any period during which it is held by a "substantial user" of the facilities financed or a "related person" of such substantial user, as those terms are used in Section 147(a) of the Code, and is an item of tax preference for purposes of the federal alternative minimum tax imposed on individuals; and (ii) interest on the Series 2024 Bonds is exempt from personal income taxes imposed by the State of New York (the "State") and political subdivisions thereof, including the City and the City of Yonkers, so long as that interest is excluded from gross income for federal income tax purposes. Co-Bond Counsel expresses no opinion as to any other tax consequences regarding the Series 2024 Bonds.

The opinion on tax matters will be based on and will assume the accuracy of certain representations and certifications, and continuing compliance with certain covenants, of the Issuer, the Borrower, and other applicable entities contained in the transcript of proceedings and that are intended to evidence and assure the foregoing, including that the Series 2024 Bonds are and will remain obligations the interest on which is excluded from gross income for federal income tax purposes. Co-Bond Counsel will not independently verify the accuracy of those representations and certifications or the continuing compliance with those covenants.

The opinion of Co-Bond Counsel is based on current legal authority and covers certain matters not directly addressed by such authority. It represents Co-Bond Counsel's legal judgment as to exclusion of interest on the Series 2024 Bonds from gross income for federal income tax purposes but is not a guaranty of that conclusion. The opinion is not binding on the Internal Revenue Service (the "IRS") or any court. Co-Bond Counsel expresses no opinion about (i) the effect of future changes in the Code and the applicable regulations under the Code or (ii) the interpretation and the enforcement of the Code or those regulations by the IRS.

The Code prescribes a number of qualifications and conditions for the interest on state and local government obligations to be and to remain excluded from gross income for federal income tax purposes,

some of which require future or continued compliance after issuance of the obligations. Noncompliance with these requirements by the Issuer, the Borrower, or other applicable entities may cause loss of such status and result in the interest on the Series 2024 Bonds being included in gross income for federal income tax purposes retroactively to the date of issuance of the Series 2024 Bonds. The Borrower and, subject to certain limitations, the Issuer have each covenanted to take the actions required of it for the interest on the Series 2024 Bonds to be and to remain excluded from gross income for federal income tax purposes, and not to take any actions that would adversely affect that exclusion. After the date of issuance of the Series 2024 Bonds, Co-Bond Counsel will not undertake to determine (or to so inform any person) whether any actions taken or not taken, or any events occurring or not occurring, or any other matters coming to Co-Bond Counsel's attention, may adversely affect the exclusion from gross income for federal income tax purposes of interest on the Series 2024 Bonds or the market value of the Series 2024 Bonds.

Interest on the Series 2024 Bonds may be subject: (1) to a federal branch profits tax imposed on certain foreign corporations doing business in the United States; (2) to a federal tax imposed on excess net passive income of certain S corporations; and (3) to the alternative minimum tax imposed under Section 55(b) of the Code on "applicable corporations" (within the meaning Section 59(k) of the Code). Under the Code, the exclusion of interest from gross income for federal income tax purposes may have certain adverse federal income tax consequences on items of income, deduction or credit for certain taxpayers, including financial institutions, certain insurance companies, recipients of Social Security and Railroad Retirement benefits, those that are deemed to incur or continue indebtedness to acquire or carry tax-exempt obligations, and individuals otherwise eligible for the earned income tax credit. The applicability and extent of these and other tax consequences will depend upon the particular tax status or other tax items of the owner of the Series 2024 Bonds. Co-Bond Counsel will express no opinion regarding those consequences.

Payments of interest on tax-exempt obligations, including the Series 2024 Bonds, are generally subject to IRS Form 1099-INT information reporting requirements. If a Series 2024 Bond owner is subject to backup withholding under those requirements, then payments of interest will also be subject to backup withholding. Those requirements do not affect the exclusion of such interest from gross income for federal income tax purposes.

Co-Bond Counsel's engagement with respect to the Series 2024 Bonds ends with the issuance of the Series 2024 Bonds, and, unless separately engaged, Co-Bond Counsel is not obligated to defend the Issuer, the Borrower or the owners of the Series 2024 Bonds regarding the tax status of interest thereon in the event of an audit examination by the IRS. The IRS has a program to audit tax-exempt obligations to determine whether the interest thereon is includible in gross income for federal income tax purposes. If the IRS does audit the Series 2024 Bonds, under current IRS procedures, the IRS will treat the Issuer as the taxpayer and the beneficial owners of the Series 2024 Bonds will have only limited rights, if any, to obtain and participate in judicial review of such audit. Any action of the IRS, including but not limited to selection of the Series 2024 Bonds for audit, or the course or result of such audit, or an audit of other obligations presenting similar tax issues, may affect the market value of the Series 2024 Bonds.

Prospective purchasers of the Series 2024 Bonds upon their original issuance at prices other than the respective prices indicated on the inside cover of this Official Statement, and prospective purchasers of the Series 2024 Bonds at other than their original issuance, should consult their own tax advisors regarding other tax considerations such as the consequences of market discount, as to all of which Co-Bond Counsel expresses no opinion.

## **Risk of Future Legislative Changes and/or Court Decisions**

Legislation affecting tax-exempt obligations is regularly considered by the United States Congress and may also be considered by the State legislature. Court proceedings may also be filed, the outcome of which could modify the tax treatment of obligations such as the Series 2024 Bonds. There can be no assurance that legislation enacted or proposed, or actions by a court, after the date of issuance of the Series 2024 Bonds will not have an adverse effect on the tax status of interest on the Series 2024 Bonds or the market value or marketability of the Series 2024 Bonds. These adverse effects could result, for example, from changes to federal or state income tax rates, changes in the structure of federal or state income taxes (including replacement with another type of tax), or repeal (or reduction in the benefit) of the exclusion of interest on the Series 2024 Bonds from gross income for federal or state income tax purposes for all or certain taxpayers.

For example, federal tax legislation that was enacted on December 22, 2017, reduced corporate tax rates, modified individual tax rates, eliminated many deductions, repealed the corporate alternative minimum tax that was in effect at the time, and eliminated the tax-exempt advance refunding of tax-exempt bonds and tax-advantaged bonds, among other things. Additionally, investors in the Series 2024 Bonds should be aware that future legislative actions might increase, reduce or otherwise change (including retroactively) the financial benefits and the treatment of all or a portion of the interest on the Series 2024 Bonds for federal income tax purposes for all or certain taxpayers. In all such events, the market value of the Series 2024 Bonds may be affected and the ability of holders to sell their Series 2024 Bonds in the secondary market may be reduced.

Investors should consult their own financial and tax advisers to analyze the importance of these risks.

## **Original Issue Discount and Original Issue Premium**

Certain of the Series 2024 Bonds (“Discount Series 2024 Bonds”) may be offered and sold to the public at an original issue discount (“OID”). OID is the excess of the stated redemption price at maturity over the “issue price” of a Discount Series 2024 Bonds. The issue price of a Discount Series 2024 Bonds is the initial offering price to the public (other than to bond houses, brokers or similar persons acting in the capacity of underwriters or wholesalers) at which a substantial amount of the Discount Series 2024 Bonds of the same maturity is sold pursuant to that offering. For federal income tax purposes, OID accrues to the owner of a Discount Series 2024 Bonds over the period to maturity based on the constant yield method, compounded semiannually (or over a shorter permitted compounding interval selected by the owner). The portion of OID that accrues during the period of ownership of a Discount Series 2024 Bonds (i) is interest excluded from the owner’s gross income for federal income tax purposes to the same extent, and subject to the same considerations discussed above, as other interest on the Series 2024 Bonds, and (ii) is added to the owner’s tax basis for purposes of determining gain or loss on the maturity, redemption, sale or other disposition of that Discount Series 2024 Bonds. A purchaser of a Discount Series 2024 Bonds in the initial public offering at the issue price (described above) for that Discount Series 2024 Bonds who holds that Discount Series 2024 Bonds to maturity will realize no gain or loss upon the retirement of that Discount Series 2024 Bonds.

Certain of the Series 2024 Bonds (“Premium Series 2024 Bonds”) may be offered and sold to the public at a price in excess of their stated redemption price at maturity. That excess constitutes bond premium. For federal income tax purposes, bond premium is amortized over the period to maturity of a Premium Series 2024 Bonds, based on the yield to maturity of that Premium Series 2024 Bonds (or, in the case of a Premium Series 2024 Bonds callable prior to its stated maturity, the amortization period and yield

may be required to be determined on the basis of an earlier call date that results in the lowest yield on that Premium Series 2024 Bonds), compounded semiannually. No portion of that bond premium is deductible by the owner of a Premium Series 2024 Bonds. For purposes of determining the owner's gain or loss on the sale, redemption (including redemption at maturity) or other disposition of a Premium Series 2024 Bonds, the owner's tax basis in the Premium Series 2024 Bonds is reduced by the amount of bond premium that is amortized during the period of ownership. As a result, an owner may realize taxable gain for federal income tax purposes from the sale or other disposition of a Premium Series 2024 Bonds for an amount equal to or less than the amount paid by the owner for that Premium Series 2024 Bonds. A purchaser of a Premium Series 2024 Bonds in the initial public offering who holds that Premium Series 2024 Bonds to maturity (or, in the case of a callable Premium Series 2024 Bonds, to its earlier call date that results in the lowest yield on that Premium Series 2024 Bonds) will realize no gain or loss upon the retirement of that Premium Series 2024 Bonds.

*Owners of Discount and Premium Series 2024 Bonds should consult their own tax advisors as to the determination for federal income tax purposes of the existence of OID or bond premium, the determination for federal income tax purposes of the amount of OID or bond premium properly accruable or amortizable in any period with respect to the Discount or Premium Series 2024 Bonds, other federal tax consequences in respect of OID and bond premium, and the treatment of OID and bond premium for purposes of state and local taxes on, or based on, income.*

#### **PART 19 – LIMITED LIABILITY FOR THE SERIES 2024 BONDS**

The Series 2024 Bonds are special and limited revenue obligations of the Issuer, payable by the Issuer as to the principal, redemption price, and interest thereon, solely out of the Trust Estate pledged under the Indenture referred to herein. Neither the Series 2024 Bonds, the principal thereof, the interest thereon, nor the redemption price thereof, together with interest accrued thereon to the date of redemption, shall ever constitute a debt of the State, the Port Authority, JDA, ESD, or any other local development corporation, agency, or authority of the State (other than the Issuer), and none of the State, the Port Authority, JDA, ESD, or any other local development corporation, agency, or authority of the State (other than the Issuer) shall be liable on the Series 2024 Bonds. The Issuer has no power of taxation.

#### **PART 20 – RATINGS**

S&P, Moody's, and Kroll Bond Rating Agency, LLC ("KBRA") are expected to assign ratings of "AA", "A1" and "AA+", respectively, to the Insured Bonds, with the understanding that, upon delivery of the Insured Series 2024 Bonds, the Policy will be issued by the Bond Insurer. The Series 2024 Bonds have been assigned unenhanced underlying ratings by S&P and Moody's of "BBB-" and "Baa3", respectively. Generally, a rating agency bases its rating on information and materials furnished to it and on investigations, studies and assumptions by such rating agency. A rating is not a recommendation to buy, sell or hold the Series 2024 Bonds. There is no assurance that such ratings will continue for any given period of time or will not be revised downward, suspended or withdrawn entirely by the rating agency, if in its judgment, circumstances so warrant. Any such lowering, suspension or withdrawal of the rating might have an adverse effect upon the market price or marketability of the Series 2024 Bonds. The Underwriters, the Issuer and the Borrower undertake no responsibility after the issuance of the Series 2024 Bond to assure the maintenance of the rating or to oppose any revision or withdrawal thereof.

#### **PART 21 – UNDERWRITING**

The Series 2024 Bonds are being purchased by Goldman Sachs & Co. LLC ("Goldman") and Siebert Williams Shank & Co., LLC (together, the "Representatives"), on behalf of themselves and the

other underwriters listed on the cover of this Official Statement (the “Underwriters”). The Underwriters have agreed, subject to certain conditions, to purchase the Series 2024 Bonds from the Issuer at an aggregate purchase price of \$2,019,904,605.60 (which represents the par amount of the Series 2024 Bonds, less the Underwriters’ discount of \$9,928,097.30, plus net original issue premium of \$84,194,934.90) and to make a public offering of the Series 2024 Bonds at prices that are not in excess of the public offering prices or yields indicated on the inside cover page of this Official Statement.

The Series 2024 Bonds may be offered and sold to certain dealers (including the Underwriters) at prices lower than such public offering prices, and such public offering prices may be changed, from time to time, by the Underwriters. The Underwriters will be obligated to purchase all Series 2024 Bonds if any are purchased.

The Underwriters and their respective affiliates are full service financial institutions engaged in various activities, which include sales and trading, commercial and investment banking, advisory investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. Certain of the Underwriters and their respective affiliates have provided, and may in the future provide, a variety of these services to the Borrower and to persons and entities with relationships with the Borrower, for which they received or will receive customary fees and expenses including, but not limited to, serving as lenders under the Loan Facility and counterparties with respect to certain Permitted Hedge Agreements.

In the ordinary course of their various business activities, the Underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (which may include bank loans and/or credit default swaps) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve securities and instruments of the Issuer (directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with the Issuer. The Underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

In addition, certain of the Underwriters may have entered into distribution agreements with other broker-dealers (that have both been designated by the Issuer as Underwriters) for the distribution of the Series 2024 Bonds at the original prices. Such agreements generally provide that the relevant Underwriter will share a portion of its underwriting compensation or selling concession with such broker-dealers.

For additional relationships between the Underwriters, the Representatives or their affiliates, please see “PART 24– CERTAIN RELATIONSHIPS.”

## **PART 22 – LEGAL MATTERS**

Certain legal matters relating to the authorization and validity of the Series 2024 Bonds and the exclusion of the interest on the Series 2024 Bonds from gross income for federal income tax purposes will be subject to the approving opinion of Squire Patton Boggs (US) LLP, New York, New York, and Hardwick Law Firm, LLC, Co-Bond Counsel. See APPENDIX K – “FORM OF LEGAL OPINION OF CO-BOND COUNSEL.” Certain legal matters will be passed upon for the Issuer by BurgherGray LLP, New York, New York, as Issuer Counsel. Certain legal matters will be passed upon for the Issuer by its General Counsel and for the Borrower by its co-counsel, O’Melveny & Myers LLP, Los Angeles, California and

Bryant Rabbino LLP, New York, New York. Certain legal matters will be passed upon for the Underwriters by Katten Muchin Rosenman LLP, New York, New York and D. Seaton and Associates, P.A., P.C, New York, New York. Certain legal matters will be passed upon for the Trustee, Collateral Agent and Intercreditor Agent by Paparone Law PLLC, New York, New York.

## **PART 23 – LITIGATION**

### **The Issuer**

There is not now pending any litigation restraining or enjoining the issuance or delivery of the Series 2024 Bonds or questioning or affecting the validity of the Series 2024 Bonds or the proceedings and authority under which they are to be issued, or the pledge or application of any moneys or security provided for the payment of the Series 2024 Bonds, or relating to the use of the Series 2024 Bonds proceeds or the existence or powers of the Issuer.

### **The Borrower**

There is not now pending any litigation with respect to the existence or powers of the Borrower or the Borrower's ability to consummate the transactions described herein.

## **PART 24 – CERTAIN RELATIONSHIPS**

The Borrower is a limited liability company initially with four Equity Members holding interests: the Vantage Member, the RXR Member, the ATI Member and JetBlue. For a discussion of the Borrower's governance structure see "PART 9 – PROJECT PARTICIPANTS – The Borrower." See generally "PART 21– UNDERWRITING."

### **The Borrower and the Manager**

The Borrower has entered into the Management Services Agreement with the Manager. The Manager is 100% indirectly owned by Vantage, which is an affiliate under common control with the Vantage Member. The Manager's performance obligations under the Management Services Agreement have been guaranteed by Vantage Airport Group (US) Ltd.

### **The Manager and the Manager Subcontractor**

The Manager has entered into a subcontract with the Manager Subcontractor, an affiliate of the RXR Member, in relation to the Manager Subcontractor's provision of certain services to the Manager, including design and construction contract administration, public affairs support and stakeholder outreach. The services provided by the Manager Subcontractor are a subset of the services provided by the Manager under the Management Services Agreement, and any fees payable to the Manager Subcontractor are paid out of Management Services Agreement fees.

### **Goldman and Vantage Member Relationship**

Goldman Sachs Bank USA, an affiliate of Goldman, has provided a letter of credit to the Vantage Member in connection with its contribution pursuant to the Equity Contribution Agreement. Goldman Sachs Bank USA has received and continues to receive customary fees and expenses for providing such financing services to the Vantage Member.

## **Goldman and Borrower Relationship**

The Borrower has entered into and, under the Common Terms Agreement, is required to maintain certain Permitted Hedge Agreements in connection with the Loan Facility. In connection with the paydown of a portion of the Loan Facility with the proceeds of the Series 2024 Bonds, the Borrower is terminating certain Permitted Hedge Agreements associated therewith, all as more fully described in “PART 3 – PLAN OF FINANCE.” The Hedge Providers have entered into derivatives transactions with Goldman Sachs Bank USA or affiliates, in its principal capacity, to effect the foregoing. Additionally, Goldman and its affiliates have provided, and continue to provide, certain other advisory services to the Borrower and certain of its affiliates, including, but not limited to, certain advisory services undertaken in connection with the origination of the Loan Facility in November 2022. Goldman and their affiliates may also provide other or additional services and support to the Borrower, and Goldman has engaged in or may in the future engage, in transactions with, and perform services for, the Borrower and any affiliates thereof for which it received or will receive customary fees and expenses. Under certain circumstances, Goldman and their affiliates, including, but not limited to Goldman Sachs Bank USA, may have certain creditor and/or other rights against the Borrower and any affiliates thereof in connection with such transactions and/or services.

## **Siebert Williams Shank & Co., LLC and Borrower Relationship**

The Borrower has engaged Siebert Williams Shank & Co. LLC (“Siebert”), one of the Representatives of the Underwriters, to assist the Borrower in connection with the Borrower’s obligations under the Lease Agreement to use good faith efforts to provide for meaningful participation in the Project by minority-owned and women-owned businesses. Pursuant to this engagement, Siebert has assisted the Borrower in connection with the engagement of minority-owned and woman-owned underwriting firms and other service providers in connection with the issuance of the Series 2024 Bonds.

## **Siebert Williams Shank & Co., LLC and ATI Member Relationship**

The ATI Member is controlled by ATI. ATI is an investor, owner, developer, and manager of infrastructure assets and infrastructure-focused companies. The firm invests in the transportation, digital, and social infrastructure sectors. ATI shares some common ownership with Siebert, but given the specific governance framework articulated in ATI’s governing documents, ATI is separately managed and controlled. The ATI Member may, however, benefit reputationally from its relationship with Siebert given that the indirect holders of approximately 67% of the equity interests in Siebert’s parent company directly or indirectly own approximately 75% of ATI’s equity interests.

## **Royal Bank of Canada and the Borrower Relationship**

Royal Bank of Canada, an affiliate of RBC Capital Markets, LLC (“RBCCM”), one of the Underwriters, is currently serving as a swap counterparty under a Permitted Hedge Agreement. As swap counterparty, the Royal Bank of Canada has certain rights against the Borrower.

A portion of the proceeds of the Series 2024 Bonds will be applied to the termination of that portion of the Permitted Hedge Agreements associated with the paid off portion of the Loan Facility, including certain swaps with Royal Bank of Canada. Depending on market conditions, the Borrower may receive a swap termination payment from Royal Bank of Canada or the Royal Bank of Canada may receive a swap termination payment from Borrower, from Series 2024 Bond proceeds.

Royal Bank of Canada, an affiliate of RBCCM, currently hold Series 2022A Bonds in its tender option bond program either in a common law trust established under the laws of the State of New York or

a statutory trust established under the laws of the State of Delaware (in either case, such trust (“Trust”)). The Royal Bank of Canada provides credit protection to investors of the Trust. In addition, RBCCM through its affiliate (i) earns the total interest income available to the bonds, less its funding expenses, by holding the bonds in the Trust and (ii) has a long-term creditor position with the Borrower and consolidates the ownership of the bonds on its balance sheet. Furthermore, RBCCM serves as remarketing agent to the Trust. Finally, as a result of the Series 2024 Bonds refinancing transactions, a portion of the Series 2022A Bonds are being refinanced and the ownership interest and credit position of the Royal Bank of Canada relating thereto is being eliminated.

## **PART 25 – FINANCIAL STATEMENTS AND INDEPENDENT AUDITORS**

The audited consolidated financial statements of JFK Millennium Partners Holdings, LLC and its wholly owned subsidiary JFK Millennium Partners, LLC, for the fiscal years ended December 31, 2023 and December 31, 2022 and the unaudited condensed consolidated financial information as of and for the six-months ended June 30, 2024 presented in this Official Statement have been prepared in accordance with generally accepted accounting principles in the United States. See APPENDIX C-1 – “CONSOLIDATED FINANCIAL STATEMENTS AND INDEPENDENT AUDITORS’ REPORT” and APPENDIX C-2 – “CONDENSED CONSOLIDATED FINANCIAL INFORMATION AS OF JUNE 30, 2024 (UNAUDITED)” hereto.

The consolidated financial statements of JFK Millennium Partners Holdings, LLC and its subsidiary, as of December 31, 2023 and 2022, and for the years then ended, included in this Official Statement as APPENDIX C-1 – “CONSOLIDATED FINANCIAL STATEMENTS AND INDEPENDENT AUDITORS’ REPORT,” have been audited by KPMG LLP, as independent auditors, as stated in their report included therein.

As more fully described in “Part 17 – RISK FACTORS – Risks Related to the Borrower’s Business – Internal Controls,” KPMG LLP identified certain material weaknesses in connection with its audit of the Borrower’s internal control over financial reporting and financial statements for the fiscal years ended December 31, 2022 and December 31, 2023.

## **PART 26 – MUNICIPAL ADVISORS**

Backstrom McCarley Berry & Co. LLC is serving as Municipal Advisor to the Borrower with respect to the issuance of the Series 2024 Bonds.

Frasca & Associates, LLC, as municipal advisor to the Port Authority, has considered certain matters on behalf of the Port Authority in connection with this offering of the Series 2024 Bonds.

## **PART 27 – CONTINUING DISCLOSURE**

In order to enable the Underwriters to comply with the requirements of Rule 15c2-12 (the “Rule”) promulgated by the Securities and Exchange Commission (the “SEC”), pursuant to the Securities Exchange Act of 1934, as amended, the Borrower will execute the Continuing Disclosure Undertaking to periodically provide certain financial information and operating data to the Municipal Securities Rulemaking Board (the “MSRB”), and to provide notice to the MSRB of certain events, pursuant to the requirements of the Rule. The Issuer will have no responsibility or liability to the holders of the Series 2024 Bonds or any other person with respect to such continuing disclosure. The form of the Continuing Disclosure Undertaking is set forth in APPENDIX J to this Official Statement.

The Borrower has not prior to the date of this Official Statement entered into any undertakings pursuant to the Rule.

(Remainder of Page Intentionally Left Blank)

The execution and delivery of this Official Statement by Authorized Officers have been duly authorized by the Issuer and the Borrower.

**NEW YORK TRANSPORTATION  
DEVELOPMENT CORPORATION**

## APPENDIX A

### DEFINITIONS

#### Rules of Interpretation

1. The words “include”, “includes” and “including” shall be deemed to be followed by the phrase “without limitation.”
2. Definitions of terms shall apply equally to the singular and plural forms of the terms defined.
3. The word “will” shall be construed to have the same meaning and effect as the word “shall.”
4. A reference to a Person shall be construed to include its successors and permitted assigns.
5. A reference in a document to an Article, Section, Exhibit, Schedule, Annex or Appendix is to the Article, Section, Exhibit, Schedule, Annex or Appendix of such document, regardless of whether the word “herein” is used, unless otherwise indicated. Exhibits, Schedules, Annexes or Appendices to any document shall be deemed to be part of such document, unless expressly indicated otherwise.
6. Any definition of or reference to any agreement, instrument or other document shall be construed (a) including all exhibits, schedules and other attachments thereto, (b) as referring to such agreement, instrument or other document as from time to time amended, restated, supplemented and/or otherwise modified (subject to any restrictions on such amendments, supplements or modifications set forth in the Financing Documents) and (c) including all documents, instruments or agreements issued or executed in replacement or substitution thereof.
7. The words “hereof,” “herein” and “hereunder” and words of similar import when used in any document shall refer to such document as a whole and not to any particular provision of such document.
8. References to “days” means calendar days, unless the term “Business Days” shall be used. References to a time of day means such time in New York, New York, unless otherwise specified.
9. A reference to a day as it relates to a transfer of funds, if such day is not a Business Day, shall mean the next day that is a Business Day.
10. All accounting terms used which are not expressly defined herein have the meanings given to them in accordance with GAAP. Except as otherwise specifically provided herein, all computations made shall be made in accordance with GAAP.

Unless otherwise specified, capitalized terms used in the Financing Documents shall have the meanings set forth below:

“**10 Year Cash Sweep Date**” has the meaning ascribed to such term in Section 2.12(a) of the Second Supplemental Indenture.

“**2022 TDC Building Notes**” means the Series 2022A Building Note, the TDC Bank Debt Building Note and any additional promissory notes of the Borrower evidencing the indebtedness of the Borrower under the TDC Building Loan Agreement.

“**2022 TDC Project Notes**” means Series 2022A Project Note, the TDC Bank Debt Project Note, the TDC Security Deposit Project Note and any additional promissory notes of the Borrower evidencing the indebtedness of the Borrower under the TDC Project Loan Agreement.

“**2022A Tax-Exempt Bond Interest Payment Sub-Account**” means the “2022A Tax-Exempt Bond Interest Payment Sub-Account” within the Senior Obligations Payment Account established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**2022A Tax-Exempt Bond Principal Payment Sub-Account**” means the “2022A Tax-Exempt Bond Principal Payment Sub-Account” within the Senior Obligations Payment Account established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**2024A Tax-Exempt Bond Interest Payment Sub-Account**” means the “2024A Tax-Exempt Bond Interest Payment Sub-Account” within the Senior Obligations Payment Account established and created in the name of the Borrower pursuant to Section 2.01(a) of the First CAAA Amendment.

“**2024A Tax-Exempt Bond Principal Payment Sub-Account**” means the “2024A Tax-Exempt Bond Principal Payment Sub-Account” within the Senior Obligations Payment Account established and created in the name of the Borrower pursuant to Section 2.01(a) of the First CAAA Amendment.

“**2024B Tax-Exempt Bond Interest Payment Sub-Account**” means the “2024B Tax-Exempt Bond Interest Payment Sub-Account” within the Senior Obligations Payment Account established and created in the name of the Borrower pursuant to Section 2.01(a) of the First CAAA Amendment.

“**2024B Tax-Exempt Bond Principal Payment Sub-Account**” means the “2024B Tax-Exempt Bond Principal Payment Sub-Account” within the Senior Obligations Payment Account established and created in the name of the Borrower pursuant to Section 2.01(a) of the First CAAA Amendment.

“**5-year Redemption Date**” has the meaning given in Section 10.07(g) of the Collateral Agency and Accounts Agreement.

“**5 Year Cash Sweep Date**” has the meaning ascribed to such term in Section 2.12(a) of the Second Supplemental Indenture.

“**Acceleration Action**” has the meaning given in Section 3.3(a)(v) of the Intercreditor Agreement.

“**Acceleration Payment**” means all payments made to a Secured Debt Representative or Secured Party pursuant to an Acceleration Action.

“**Acceptable Letter of Credit**” means any standby letter of credit in favor of the Collateral Agents (a) substantially in the form attached to the Collateral Agency and Accounts Agreement as Exhibit I (Form of Letter of Credit), and issued by an Eligible LC Issuer, (b) the reimbursement obligations with respect to which shall not be (i) recourse to the Borrower or the Project or (ii) secured by a lien on, or a security interest in, the Collateral, (c) the term of which is at least one year from the date of issue (except that for letters of credit issued as a replacement letter of credit with less than one year remaining until the stated expiration date of the original letter of credit, the term shall be for such shorter period) and (d) which allows drawing (i) during the 30 day period prior to expiry (unless otherwise replaced), (ii) upon downgrade of the issuer such that it is no longer an Eligible LC Issuer if not replaced within twenty days of such downgrade

and, (iii) if such letter of credit is used to fund any reserve account established under the Collateral Agency and Accounts Agreement, when funds would otherwise be drawn from such reserve account.

“**Accession Agreement**” means an Accession Agreement substantially in the form of Exhibit A to the Intercreditor Agreement.

“**Account Bank Fee Letter**” means that certain Account Bank Fee Letter, dated on or about the date hereof, between the Borrower and the Deposit Account Bank, setting forth the fees payable to the Deposit Account Bank.

“**Account Collateral**” means, subject to the Collateral Agency and Accounts Agreement, (a) all Project Accounts and funds deposited therein and moneys, funds, instruments, securities and all other property from time to time credited to such Project Accounts, (b) all “securities accounts” (within the meaning of Section 8-501 of the UCC), all deposit accounts and any and all other bank accounts, and (c) all “proceeds” (as defined in the UCC) of any or all of the foregoing, in each case of (a) through (c) that is subject to a security interest granted by the Borrower, as applicable, pursuant to the Senior Security Agreement.

“**Account Control Agreement**” means that certain Account Control Agreement, dated as of November 1, 2022, among the Borrower, the Collateral Agents and the Deposit Account Bank in respect of the Operating Account and any replacement Account Control Agreement to which the Collateral Agents are a party.

“**Accounts,**” “**Sub-Accounts,**” “**Subaccounts,**” or “**Funds**” means, with respect to the Indenture, the funds established and created under Section 4.02 of the Master Indenture and any Accounts or Subaccounts therein, or under any Supplemental Indenture, and, with respect to the Collateral Agency and Accounts Agreement, the funds established and created under Sections 5.01, 5.05, 5.17(b), 5.18 and 5.19 of the Collateral Agency and Accounts Agreement, or under any amendment or supplement to the Collateral Agency and Accounts Agreement.

“**Accredited Investor**” has the meaning given in Rule 501 of Regulation D under the Securities Act of 1933, as amended.

“**Accreted Redemption Price**” means for Current Interest Bonds, the Redemption Price and for Compounding Interest Bonds, the Accreted Value.

“**Accreted Value**” means, with respect to any Compounding Interest Bond, (a) as of any Compounding Date, the amount established by the schedule of Accreted Values relating to such Bond, which amount represents the initial principal amount at issuance of such Bond plus interest accrued and compounded on each Compounding Date to the date of determination, calculated on the basis of a three hundred sixty (360) day year of twelve (12) thirty (30) day months, and (b) as of any date other than a Compounding Date, the sum of (i) the Accreted Value on the preceding Compounding Date plus (ii) the product of (x) a fraction, the numerator of which is the number of days having elapsed from the preceding Compounding Date and the denominator of which is the number of days from such preceding Compounding Date to the next succeeding Compounding Date, multiplied by (y) the difference between the Accreted Values on such Compounding Dates, which amount represents the principal plus the amount of interest that has accrued to such date of determination. The Issuer may provide in a Supplemental Indenture that, with respect to any Series of Bonds, the Accreted Value as of any date other than a Compounding Date shall be determined using a constant interest rate method rather than as provided in (b).

“**Act**” means the New York Not-for-Profit Corporation Law, being Chapter 35 of the Consolidated Laws of New York, the Issuer being created by action of the JDA established under Section 1802, Subtitle I, Title 8, Article 8, of the New York Public Authorities Law, as each may be amended from time to time.

“**Act of Secured Parties**” means, as to any matter at any time:

- (a) prior to the Discharge of Senior Obligations, one or more written directions provided to the Senior Collateral Agent by the Intercreditor Agent, with the written consent of holders of Senior Obligations representing the Required Senior Secured Parties; and
- (b) following the Discharge of Senior Obligations, one or more written directions provided to the Subordinate Collateral Agent by the Intercreditor Agent with the written consent of holders of Subordinate Obligations representing the Required Subordinate Secured Parties.

For purposes of this definition, votes will be determined in accordance with Article 8 of the Intercreditor Agreement.

“**Additional Bonds**” means any additional bonds issued as Additional Obligations pursuant to and in accordance with the Master Indenture and any related Supplemental Indenture. Each series of Additional Bonds shall be designated as Senior Bonds or Subordinate Bonds for purposes of the Indenture and the Collateral Agency and Accounts Agreement at the time of issuance.

“**Additional Class Obligations**” has the meaning ascribed to such term in Section 11.06 of the Collateral Agency and Accounts Agreement.

“**Additional Conditions Notice**” has the meaning set forth in Section 5.04(c) of the Collateral Agency and Accounts Agreement.

“**Additional Insured Bonds**” means any Additional Bonds specified in a Supplemental Indenture with respect to the issuance of such Series of Bonds as having the benefit of a Bond Insurance Policy.

“**Additional Note**” means a promissory note issued in connection with the making of a TDC Additional Loan, which promissory note shall be in substantially the form of Exhibit C attached to the TDC Loan Agreements, or such other form as may be agreed by the Borrower and the Issuer, and shall include any and all supplements or amendments thereto made in conformity with the applicable Additional Obligations Loan Agreement Supplement and the Master Indenture.

“**Additional Obligations**” means Additional Senior Obligations and Additional Subordinate Obligations.

“**Additional Obligations Loan Agreement Supplement**” means, for each series of Additional Senior Obligations and Additional Subordinate Obligations, the loan agreement, supplement or amendment to be executed by the Issuer and the Borrower in connection with the incurrence of Additional Obligations by the Borrower.

“**Additional Senior Creditor**” means, with respect to any Class of Additional Senior Obligations, the holders of such Additional Senior Obligations, any Secured Debt Representative with respect to such Additional Senior Obligations, and any other trustee or agent or any other similar agent or Person therefor under any related Additional Senior Financing Document.

**“Additional Senior Financing Documents”** means, with respect to any Senior Obligations incurred after the Closing Date, the notes, credit agreements, indentures, security documents and other operative agreements evidencing or governing such Indebtedness, and each other agreement entered into for the purpose of securing such Senior Obligations.

**“Additional Senior Obligations”** means (i) any Additional Bonds issued as Senior Bonds, (ii) any Senior Bond Insurer Obligations related to any Additional Insured Bonds, and (iii) any additional Senior Obligations (other than the Senior Bank Obligations and the Permitted Hedge Agreements) in each case, secured by the liens created pursuant to the Senior Collateral Documents, the holders of which (or an agent or trustee on their behalf) are or have become parties to the Intercreditor Agreement pursuant to an Accession Agreement as a Senior Secured Party in accordance with Section 5.5 of the Intercreditor Agreement. Additional Senior Obligations shall exclude Bond Insurer Unsecured Obligations.

**“Additional Senior Obligations Loan Agreement Supplement”** means an Additional Obligations Loan Agreement Supplement entered into in connection with the incurrence of Additional Senior Obligations.

**“Additional Subordinate Creditor”** means, with respect to any Class of Additional Subordinate Obligations, the holders of such Additional Subordinate Obligations, any Secured Debt Representative with respect to such Additional Subordinate Obligations, any other trustee or agent or any other similar agent or representative therefor under any related Additional Subordinate Financing Documents.

**“Additional Subordinate Financing Documents”** means, with respect to any Subordinate Obligations incurred after the Closing Date, the notes, credit agreements, indentures, security documents and other operative agreements evidencing or governing such Indebtedness, and each other agreement entered into for the purpose of securing such Subordinate Obligations.

**“Additional Subordinate Obligations”** means any Additional Bonds issued as Subordinate Bonds, and any additional Subordinate Obligations secured by the liens created pursuant to the Subordinate Collateral Documents, the holders of which (or an agent or trustee on their behalf) have become parties to the Intercreditor Agreement pursuant to an Accession Agreement as a Subordinate Secured Parties in accordance with Section 5.5 of the Intercreditor Agreement.

**“Adjusted SIFMA Rate”** means the SIFMA Index plus the Applicable Spread; provided, however, that from and after the Taxable Date, the “Adjusted SIFMA Rate” means the Taxable Rate; provided, further, however, that upon the occurrence and during the continuance of any Event of Default, the “Adjusted SIFMA Rate” shall equal the Post-Default Rate.

**“Adjustment Date”** means Thursday of each week (whether or not such day is a Business Day); provided, however, if the Alternative Index is the Daily Simple SOFR Rate, the “Adjustment Date” shall mean each SOFR Interest Day.

**“Administrative Agency Fee Letter”** means an Administrative Agent Fee Letter, between the Borrower and the Administrative Agent, setting forth the fees payable to the Administrative Agent.

**“Administrative Agent”** means ING Capital, LLC in its capacity as administrative agent.

**“Adverse Action”** has the meaning given in Section 3.5(b)(ii) of the Intercreditor Agreement.

**“Affiliate”** of any Person means any other Person that is Controlling, Controlled by or under common Control with such Person.

“**Agents**” means, individually or collectively, as the context may require, the Senior Secured Debt Representatives, the Collateral Agents, the Subordinate Secured Debt Representative and the Intercreditor Agent.

“**Aggregate Bank Debt Exposure**” equals Funded Bank Debt *plus* unfunded available Bank Commitments.

“**Aggregate Debt Service**” means, for any applicable period:

- (a) when calculating “Aggregate Debt Service” on a historical basis, such amount shall consist of:
  - (i) all interest accrued during such period (whether paid or unpaid) in respect of Secured Obligations (other than interest accruing with respect to Compounding Interest Bonds), (A) plus the net amounts payable by the Borrower as Ordinary Course Payments under Secured Hedge Agreements in respect of such period, or (B) minus the net amounts receivable by the Borrower as Ordinary Course Payments under Secured Hedge Agreements in respect of such period; *plus*
  - (ii) all principal due during such period in respect of Secured Obligations (including, without limitation, the Accreted Value of any Compounding Interest Bonds maturing or scheduled for redemption in such applicable period);
- (b) when calculating “Aggregate Debt Service” on a prospective basis with respect to any Secured Obligations, the aggregate amount of Debt Service on such Secured Obligations for such applicable period, provided that:
  - (i) in determining the amount of principal to be funded in such applicable period, payment shall (unless a different clause of this definition of Aggregate Debt Service applies for purposes of determining principal maturities or amortization) be assumed to be made on Outstanding Secured Obligations in accordance with any amortization schedule established by the applicable Financing Document setting forth the terms of such Secured Obligations, including, as a principal payment, the Accreted Value of any Compounding Interest Bonds maturing or scheduled for redemption in such applicable period; in determining the amount of interest to be funded in such applicable period, interest payable at a fixed rate shall (except to the extent clause (ii) or (iii) of this definition of Aggregate Debt Service applies) be assumed to be made at such fixed rate and on the required funding dates as provided in the applicable Financing Document; provided, however, that interest payable on any Secured Obligations shall be excluded to the extent such payments are to be capitalized and added to principal outstanding during such applicable period;
  - (ii) Balloon Indebtedness shall be treated in accordance with the terms set out in the applicable Balloon Indebtedness Certificate, including amortization over the term specified in such Balloon Indebtedness Certificate (provided that such term shall be not more than the remaining term of the Lease Agreement or 35 years, whichever is shorter); and with respect to any Secured Obligations only a portion of which constitutes Balloon Indebtedness, the remaining portion will be treated as described in clause (i) or such other provision of this definition of Aggregate Debt Service;

- (iii) Tender Indebtedness shall be treated as if the principal amount of such Secured Obligations were to be amortized over a term as specified in a Tender Indebtedness Certificate or of not more than the remaining term of the Lease Agreement and with principal amortization and sinking funds as specified in a certificate signed by the Authorized Borrower Representative attached to the Financing Document setting forth the terms of such Secured Obligations that constitutes Tender Indebtedness (the “Tender Indebtedness Certificate”); the interest rate used for such computation shall be a rate determined by a Consultant to be a reasonable market rate for fixed-rate Secured Obligations of a corresponding term on the date of such calculation, with no credit enhancement and taking into consideration whether such Secured Obligations bear interest which is or is not excluded from gross income for federal income tax purposes; and with respect to all funding requirements of principal and interest payments becoming due prior to the year in which such Tender Indebtedness is first subject to tender, such payments shall be treated as described in clause (b)(i) of this definition of Aggregate Debt Service unless the interest during that period is subject to fluctuation, in which case the interest becoming due prior to such first tender date shall be determined as provided in clause (v) of this definition of Aggregate Debt Service;
- (iv) for Variable Rate Indebtedness, unless otherwise provided in the particular Financing Document governing particular Secured Obligations (except to the extent otherwise provided in an applicable Balloon Indebtedness Certificate or Tender Indebtedness Certificate, or to the extent clause (b)(vi) of this definition of Aggregate Debt Service applies), the interest rate on such Secured Obligations shall be the sum of (A) the swap rate for the applicable index and corresponding term, plus (B) the Applicable Spread or “Applicable Margin” as defined in the Common Terms Agreement, as applicable;
- (v) Debt Service on Repayment Obligations; and
- (vi) for Secured Obligations with respect to which a corresponding Secured Hedge Agreement applies (except to the extent otherwise provided in an applicable Balloon Indebtedness Certificate), all interest to be accrued during such period (whether to be paid or unpaid in such period) in respect of Secured Obligations, (A) plus the net amounts payable by the Borrower as Ordinary Course Payments under the applicable Secured Hedge Agreements in respect of such period, or (B) minus the net amounts receivable by the Borrower as Ordinary Course Payments under the applicable Secured Hedge Agreements in respect of such period; plus all principal due during such period in respect of such Secured Obligations.

“**Aggregate Hedging Agreement Termination Values**” means, the aggregate value under each Secured Hedge Agreement for each Hedge Provider, after taking into account the effect of any legally enforceable netting agreement relating to such Secured Hedge Agreement, (a) for any date on or after the date any Secured Hedge Agreement has been closed-out, liquidated or terminated and termination value(s) determined in accordance with such agreement, (in each case, however so defined) such termination value(s), and (b) for any date prior to the date referenced in clause (a), the amount(s) determined as the mark-to-market value(s) for any Secured Hedge Agreement, as determined based upon one or more mid-market or other readily available quotations provided by any recognized dealer in such Secured Hedge Agreements (which may include a Hedge Provider or Bank Lender or any Affiliate of a Hedge Provider or a Bank Lender).

“**Airline Sublease**” has the meaning set forth in the Lease Agreement.

“**Airport**” means John F. Kennedy International Airport in Queens, New York.

“**Airport Consultant**” means Ricondo & Associates, Inc.

“**Alternative Index**” means the S&P Municipal Bond 7 Day High Grade Rate Index as published by S&P Dow Jones Indices, which appears on the Bloomberg Screen SPMUV7DY. If the S&P Municipal Bond 7 Day High Grade Rate Index or a successor equivalent index is no longer calculated and published by S&P Dow Jones Indices, or its successors and assigns, in its current form, then the S&P Municipal Bond 7 Day High Grade Rate Index shall be replaced by a fluctuating rate per annum, determined as of each applicable Daily Simple SOFR Computation Date for each Adjustment Date, equal to the Daily Simple SOFR Rate, as in effect on the applicable Daily Simple SOFR Computation Date.

“**Annual Operating Budget**” means, with respect to any Fiscal Year of the Borrower, the Borrower’s annual operating and capital expenditure budget approved by the Borrower and the HoldCo in accordance with the provisions of its respective Organizational Documents.

“**Applicable Collateral Agent**” means (a) prior to the Discharge of Senior Obligations, the Senior Collateral Agent and (b) from and after the Discharge of Senior Obligations, the Subordinate Collateral Agent, if applicable; provided, that in the case of this clause (b), if and for so long as the Discharge of Senior Obligations shall be deemed not to have occurred pursuant to Section 6.5 of the Intercreditor Agreement, “**Applicable Collateral Agent**” means the Senior Collateral Agent.

“**Applicable Law**” means with respect to any Person, property or matter, all applicable international, foreign, Federal, state and local statutes, treaties, rules, regulations, ordinances, codes and administrative or judicial precedents or authorities, including the interpretation or administration thereof by any Governmental Authority charged with the enforcement, interpretation or administration thereof, and all applicable administrative orders, licenses, authorizations and permits of any Governmental Authority, whether in effect as of date hereof or thereafter and in each case as amended, including any of the foregoing pertaining to land use or zoning restrictions and the UCC.

“**Applicable Spread**” means 140 basis points (1.40%) for the period from and including the Initial Drawing Date to but not including the third anniversary of the Initial Drawing Date; 165 basis points (1.65%) for the period from and including the third anniversary of the Initial Drawing Date to but not including the fifth anniversary of the Initial Drawing Date; and 190 basis points (1.90%) for the period from and including the fifth anniversary of the Initial Drawing Date to maturity.

“**Approvals**” has the meaning ascribed to such term in Appendix E hereto.

“**Asset Preservation Schedule**” has the meaning ascribed to such term in the Lease Agreement.

“**Assignment of Leases and Rents**” means, collectively, (i) the Assignment of Leases and Rents (Building Loan) and (ii) the Assignment of Leases and Rents (Project Loan).

“**Assignment of Leases and Rents (Building Loan)**” means the Assignment of Leases and Rents (Building Loan), dated as of November 1, 2022, between the Borrower, the Issuer and the Senior Collateral Agent).

**“Assignment of Leases and Rents (Project Loan)”** means the Assignment of Leases and Rents (Project Loan), dated as of November 1, 2022, between the Borrower, the Issuer and the Senior Collateral Agent.

**“Assignment of Project Documents”** means the Assignment of Project Documents, Permits and Licenses, dated as of November 1, 2022, between the Borrower and the Senior Collateral Agent.

**“Authorized Borrower Representative”** means (a) the Chief Executive Officer of the Borrower; or (b) any other individual (or individuals) so designated by the Borrower to act as Authorized Borrower Representative by written certificate of the Borrower furnished to the Collateral Agents, containing the specimen signature of such Person.

**“Authorized Denominations”** means, unless otherwise specified in the Supplemental Indenture governing the respective Bonds, (a) with respect to Compounding Interest Bonds, if any, a denomination equal to the principal amount that, when interest is accrued and compounded thereon at the applicable compounding interest rate on each Interest Accretion Date to the date of maturity thereof (with respect to a Capital Appreciation Bond) or to the Interest Commencement Date (with respect to a Convertible Capital Appreciation Bond), will result in a Maturity Amount at maturity (with respect to a Capital Appreciation Bond) or an Accreted Value on the Interest Commencement Date (with respect to a Convertible Capital Appreciation Bond) equal to \$5,000 or any whole multiple thereof and (b) with respect to Current Interest Bonds, a denomination of \$5,000 or any whole multiple thereof.

**“Available Amount”** means, with respect to any Letter of Credit or any other letter of credit, at any time, the undrawn stated amount of such Letter of Credit or other letter of credit, as applicable, in effect at such time; provided, that with respect to any Letter of Credit or other letter of credit that, by its terms or the terms of any other agreement or instrument relating thereto, provides for one or more automatic increases in the stated amount thereof, the stated amount of such Letter of Credit or other letter of credit, as applicable, shall be deemed to be the maximum stated amount of such Letter of Credit or other letter of credit, as applicable, after giving effect to all such increases, whether or not such maximum stated amount is in effect at such time (assuming compliance at such time with all conditions to drawing).

**“Available Funding”** means, as of any date of determination, an amount equal to the aggregate of (without double-counting): (a) amounts available to the Borrower under the Financing Documents on such date; (b) amounts standing to the credit of the Project Accounts on such date, to the extent such funds are available for application towards payment of Project Costs in accordance with the Collateral Agency and Accounts Agreement; (c) amounts due and payable to the Borrower (including milestone payments) from the Port Authority under the Lease Agreement prior to the Completion Date and which remain unpaid, to the extent such amounts are undisputed, are not outstanding following the due date and the expiration of any applicable cure period for payment therefor and are available for application towards payment of Project Costs in accordance with the Lease Agreement and the Collateral Agency and Accounts Agreement; (d) undisputed tax refunds due and payable to the Borrower prior to the Completion Date and which remain unpaid; (e) outstanding amounts due and payable to the Borrower under any Material Project Document (other than the Lease Agreement) prior to the Completion Date and which remain unpaid, to the extent that such amounts are (i) undisputed and are not outstanding following the due date and the expiration of any applicable cure period for payment therefor and (ii) prior to the Discharge of Senior Bank Obligations, if security is typically obtained for such type of Material Project Document, the counterparty to such Material Project Document (other than a Material Sublease) has provided the Borrower with an Acceptable Letter of Credit or other comparable security satisfactory to the Administrative Agent (acting on the instructions of the Required Bank Finance Parties) in support of such payment obligations; (f) proceeds of any insurance claim expected to be received by the Borrower prior to the Completion Date with respect to the Project or the Borrower and to be available to be applied to the payment of Project Costs pursuant to the terms of the

Financing Documents, which remain unpaid, to the extent that such amounts are undisputed and are not outstanding following the due date and the expiration of any applicable cure period for payment therefor; (g) the aggregate amount of the Unfunded Equity Commitments of all Sponsors available to the Borrower pursuant to the Equity Contribution Agreement on such date (and the amount of any other Equity Contributions committed by the Sponsors to the Borrower in excess of such Sponsors' Unfunded Equity Commitments, so long as Equity Contributions are secured by Equity Support) that can be used to pay Project Costs, and (h) amounts projected to be available for the payment of Project Costs (including from operating revenues, and including amounts not yet due and payable under Material Project Documents but expected to be due and payable thereunder in the ordinary course) pursuant to the Lessee's Base Case Financial Model and Construction Schedule and Budget, in each case, most recently delivered to the Administrative Agent, to the extent that such amounts (i) are undisputed and are not outstanding following the due date for payment therefor (plus any applicable grace period), (ii) are certified by the Lessee as consistent with such Base Case Financial Model and Construction Schedule and Budget, as applicable, and (iii) are capped at an increase of 20% against the projections contained in the Base Case Financial Model delivered on the Closing Date and (i) any other funding arrangements available to pay Project Costs satisfactory to the Administrative Agent (acting on the instructions of the Required Bank Finance Parties).

**"Balloon Indebtedness"** means, with respect to (a) any separate Series of Bonds, (b) Secured Obligations pursuant to the Bank Commitments, assuming the Bank Commitments are fully utilized, or (c) any set of Additional Obligations issued and/or committed on a single date pursuant to the terms of a single associated set of Financing Documents, in any such case, that portion of principal of (a), (b) or (c) maturing on a single date or within a Fiscal Year (i) that equals or exceeds 10% of the aggregate amount thereof and (ii) which the Borrower designates as Balloon Indebtedness in a Balloon Indebtedness Certificate. For purposes of this definition, the principal amount maturing on any date shall be reduced by the amount of such Secured Obligations scheduled to be amortized by prepayment or redemption prior to their stated maturity date. Commercial Paper shall not be considered to be Balloon Indebtedness.

**"Balloon Indebtedness Certificate"** means a certificate signed by an Authorized Borrower Representative and attached to a Financing Document issuing or loaning Secured Obligations that (a) designates certain portions of such Secured Obligations as Balloon Indebtedness, (b) indicates that the Borrower intends to refinance such Secured Obligations and states the probable terms of such refinancing, including the anticipated interest rate (which shall be the rate determined by a Consultant to be a reasonable market rate assuming the refinancing of the Outstanding Secured Obligations pursuant to terms outlined in such certificate), with no credit enhancement, and taking into consideration whether such Secured Obligations bear interest which is or is not excluded from gross income for federal income tax purposes, and the final maturity date and principal amortization and sinking fund deposits of such refinancing (provided that such refinanced Outstanding Secured Obligations shall be amortized over a term of not more than the remaining term of the Lease Agreement), (c) certifies that the debt capacity of the Borrower is sufficient to successfully complete such refinancing, if applicable, and (d) sets forth any additional terms of such Secured Obligations that are designated as Balloon Indebtedness.

**"Bank Commitments"** has the meaning assigned to the term "Commitments" in the Common Terms Agreement.

**"Bank Consents"** means, collectively: (i) that certain Limited Consent and Waiver dated December 28, 2023, executed by the Borrower, the Senior Collateral Agent, the Intercreditor Agent, the Trustee, and the Administrative Agent; (ii) that certain Limited Consent and Waiver Regarding Fit-Out Allowance, dated January 12, 2024, executed by the Borrower and the Administrative Agent; (iii) that certain Limited Consent and Waiver – Owner Controlled Insurance Program – Claims Reserve Funding, dated February 23, 2024, executed by the Borrower, the Senior Collateral Agent, the Intercreditor Agent, the Trustee, and the Administrative Agent; and (iv) any additional consents granted to the Borrower by the

Administrative Agent on behalf of the Bank Finance Parties pursuant to the terms of the Senior Financing Documents.

**“Bank Finance Parties”** means the Bank Lenders, the Initial Purchaser, the Purchaser, any Series 2022A Bondholder and any Credit Protection Provider (as defined in the Bondholder’s Agreement), and “Bank Finance Party” means any of them, as the context requires.

**“Bank Financing TDC Loan Agreements”** means the TDC Loan Agreements solely as they relate to the lending of any proceeds of the Loan Facility.

**“Bank Lenders”** means the Lenders and the Security Deposit Facility LC Issuing Banks.

**“Bank Proceeds Sub-Account”** means the “Bank Proceeds Sub-Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Bankruptcy Code”** means Title 11 of the United States Code entitled “Bankruptcy,” as now and hereafter in effect, or any successor statute.

**“Bankruptcy Law”** means the Bankruptcy Code and any other federal, state, or foreign law for the relief of debtors, or any arrangement, reorganization, insolvency, moratorium, assignment for the benefit of creditors, any other marshaling of the assets or liabilities of the Borrower, or similar law affecting creditors’ rights generally.

**“Bankruptcy Related Event”** means the events of default described in Section 8.1(m) of the TDC Building Loan Agreement, Section 8.1(m) of the TDC Project Loan Agreement or Section 7.01(h), (i) or (j) of the Common Terms Agreement.

**“Base Case Financial Model”** means a mechanically sound financial model delivered on the Closing Date and thereafter when required by Section 5.14(d) of the Common Terms Agreement or otherwise delivered by the Borrower to the Administrative Agent pursuant to the Common Terms Agreement (except where otherwise provided in the Financing Documents), prepared by the Borrower, forecasting the revenues and expenditures of the D&C Work and the Operations and Maintenance Work for the time periods and based upon the assumptions and methodology provided by the Borrower.

**“Basic Lease”** means that certain Amended and Restated Agreement of Lease of the Municipal Air Terminals between The City of New York, as landlord, and the Port Authority, as tenant, dated as of November 24, 2004 and recorded in the office of the City Register of the City on December 3, 2004 under City Register File No. 2004000748687, as the same from time to time may have been or may be supplemented, amended and/or restated.

**“Beneficial Owner”** means, so long as the Bonds are negotiated in the Book-Entry System, any Person who acquires a beneficial ownership interest in a Bond held by the Securities Depository. If at any time the Bonds are not held in the Book-Entry System, Beneficial Owner shall mean “Owner” for purposes of the Indenture.

**“Best Management Practice”** has the meaning ascribed to such term in Appendix E hereto.

**“BHC Act Affiliate”** of a party means an “affiliate” (as such term is defined under, and interpreted in accordance with, 12 U.S.C. 1841(k)) of such party.

**“Blue Sky Laws”** means the laws and accompanying regulations regulating the offers and sales of securities and of those selling them in each of the 50 states, the District of Columbia and territories of Puerto Rico and Guam.

**“Bond Counsel”** means, collectively, Squire Patton Boggs (US) LLP and Hardwick Law Firm, LLC, or such other law firm or firms selected by the Issuer, with the consent of the Borrower, which consent shall not be unreasonably withheld, who have nationally recognized expertise in the issuance of municipal securities, the interest on which is excluded from gross income for federal and State income tax purposes.

**“Bond Interest Payments”** means, with respect to a payment date for Bonds, the interest (including the interest component of the Redemption Price due in connection with any mandatory redemption payment on any Bond) due on such date on the Bonds.

**“Bond Insurance Policy”** means (i) with respect to the Insured Series 2024 Bonds, the bond insurance policy issued at the request of the Borrower by the Bond Insurer guaranteeing the scheduled payment of the principal of and interest on the Insured Series 2024 Bonds when due and (ii) with respect to any other Additional Bonds, a bond insurance policy issued at the request of the Borrower by a Bond Insurer guaranteeing the scheduled payment of the principal of and interest on all or a portion of such Additional Bonds as specified in such bond insurance policy and in the Supplemental Indenture pursuant to which such Additional Bonds were issued.

**“Bond Insurer”** means, (i) with respect to the Insured Series 2024 Bonds, the Series 2024 Bond Insurer, and (ii) with respect to any Additional Insured Bonds, the bond insurer specified in the Supplemental Indenture pursuant to which such Additional Insured Bonds were issued.

**“Bond Insurer Advances”** means the “Bond Insurer Advances” as defined with respect to any Insured Bonds in the Supplemental Indenture therefor.

**“Bond Insurer Default”** means, with respect to a Bond Insurer, the existence and continuance of any of the following:

(a) the failure of such Bond Insurer to pay when, as and in the amounts required, any amount due and payable under its Bond Insurance Policy;

(b) such Bond Insurer (i) filing any petition or commencing any case, proceeding or other action under any provision or chapter of the United States Bankruptcy Code or any other similar federal or state law relating to insolvency, bankruptcy, rehabilitation, dissolution, winding-up, arrangement, adjustment, composition, liquidation, reorganization or similar relief, (ii) making a general assignment for the benefit of its creditors, or (iii) having an order for relief entered against it under the United States Bankruptcy Code or any other similar federal or state law relating to insolvency, bankruptcy, rehabilitation, dissolution, winding-up, arrangement, adjustment, composition, liquidation, reorganization or similar relief which shall not have been dismissed, stayed or bonded (pending appeal) within sixty (60) days after the entry thereof;

(c) a court of competent jurisdiction, the Maryland Insurance Administration or other competent regulatory authority entering an order, judgment or decree (i) appointing a custodian, trustee, agent or receiver for such Bond Insurer or for all or any material portion of its property or (ii) authorizing the taking of possession by a custodian, trustee, agent or receiver of such Bond Insurer (or the taking of possession of all or any material portion of the property of such Bond Insurer), which in each case shall not have been dismissed, stayed or bonded (pending appeal) within sixty (60) days after the entry thereof; or

(d) its Bond Insurance Policy ceasing (or such Bond Insurer claiming in writing that it has ceased) to be in full force and effect.

**“Bond Insurer Fees”** means (i) with respect to the Insured Series 2024 Bonds, the “Bond Insurer Fees” as defined in the First Amendments to TDC Loan Agreements, and (ii) with respect to any Additional Insured Bonds, as defined in the Additional Obligations Loan Agreement Supplement related to the payment of Bond Insurer fees in connection with such Additional Insured Bonds.

**“Bond Insurer Fiscal Agent”** means the “Bond Insurer Fiscal Agent” as defined with respect to any Insured Bonds in the Supplemental Indenture therefor.

**“Bond Insurer Late Payment Interest”** means the “Bond Insurer Late Payment Interest” as defined with respect to any Insured Bonds in the Supplemental Indenture therefor.

**“Bond Insurer Late Payment Rate”** means the “Bond Insurer Late Payment Rate” as defined with respect to any Insured Bonds in the Supplemental Indenture therefor.

**“Bond Insurer Premium”** has the meaning set forth in the applicable Bond Insurer Premium Schedule.

**“Bond Insurer Premium Schedule”** means (i) with respect to the Insured Series 2024 Bonds, the Bond Insurer Premium Schedule attached as Schedule I to the Second Supplemental Indenture, as acknowledged by the Borrower, in respect of the premium and other amounts payable by the Borrower in consideration of the issuance of the applicable Bond Insurance Policy by the Bond Insurer, and (ii) with respect to any Additional Insured Bonds, (A) a schedule attached to the Supplemental Indenture for such Additional Insured Bonds or (B) an instrument among the relevant Bond Insurer and the Borrower, in each case, in respect of the premium and other amounts payable by the Borrower in consideration of the issuance of the relevant Bond Insurance Policy for such Additional Insured Bonds by such Bond Insurer.

**“Bond Insurer Reimbursement Amounts”** means the “Bond Insurer Reimbursement Amounts” as defined with respect to any Insured Bonds in the Supplemental Indenture therefor.

**“Bond Insurer Unsecured Obligations”** means all non-monetary claims of the Bond Insurer under the Senior Financing Documents; provided, that each monetary judgment arising from non-monetary claims under the Senior Financing Documents shall constitute Senior Bond Insurer Obligations and shall be secured by the Senior Collateral. The Bond Insurer Unsecured Obligations shall not be secured by the Senior Collateral and shall not constitute Secured Obligations.

**“Bond Payment Accounts”** means, collectively, the Senior Obligations Payment Account, the Subordinate Obligations Payment Account, if applicable, and the respective Sub-Accounts related to the payment of principal of and interest on the Series 2022A Bonds and any Additional Bonds.

**“Bond Proceeds Sub-Accounts”** means, together, the Building Loan Tax-Exempt Bond Proceeds Sub-Account, the Project Loan Tax-Exempt Bond Proceeds Sub-Account.

**“Bond Register”** means the books maintained and kept by the Bond Registrar for registration and transfer of Bonds pursuant to Section 2.05 of the Master Indenture.

**“Bond Registrar”** means The Bank of New York Mellon, as the initial authenticating agent, bond registrar, transfer agent, and paying agent for the Bonds, and until a successor shall have become such pursuant to the terms of the Indenture and, thereafter, “Bond Registrar” shall mean the successor.

“**Bondholder**” or “**Holder**” or “**Owner**” of a Bond means the registered owner of such Bond as shown in the registration records of the Trustee.

“**Bondholder’s Agreement**” or “**Series 2022A Bondholder Agreement**” means, with respect to the Series 2022A Bonds, that certain Bondholder’s Agreement, dated as of November 1, 2022, between the Borrower and the Purchaser.

“**Bond Purchase Agreement**” means, with respect to the Series 2022A Bonds, the Series 2022A Bond Purchase Agreement, and, with respect to any Additional Bonds, an agreement entered into from time to time regarding the purchase of such Additional Bonds, among the Issuer, the Borrower, and an Initial Purchaser, a Purchaser or Underwriter.

“**Bonds**” means the Series 2022A Bonds, together with the Additional Bonds issued from time to time pursuant to the Indenture, if any.

“**Book-Entry System**” means the system maintained by the Securities Depository described in Section 2.03 of the Master Indenture.

“**Borrower**” or “**Lessee**” means JFK Millennium Partners, LLC, a Delaware limited liability company.

“**Borrower Bankruptcy Event**” means any Bankruptcy Related Event, where Borrower is the debtor subject to the Bankruptcy Related Event.

“**Borrower Condemnation Proceeds**” has the meaning ascribed to such term in Section 5.15(a) of the Collateral Agency and Accounts Agreement.

“**Borrower Covenants**” means, collectively, the covenants of the Borrower in Article X of the Collateral Agency and Accounts Agreement.

“**Borrower Insurance Proceeds**” means all proceeds of insurance (other than proceeds of business interruption insurance and delay in start up insurance or other insurance coverages against anticipated losses of revenue) payable to or received by the Borrower (whether by way of claims, return of premiums, ex gratia settlements or otherwise).

“**Borrowing Request**” means a drawing request under the Credit Agreement in substantially the form attached thereto as Exhibit B.

“**Building Leasehold Mortgage**” means that certain TDC Building Loan Leasehold Mortgage, Assignment of Leases and Rents, Security Agreement and Fixture Filing, dated as of November 1, 2022, among the Borrower, the Issuer, and the Senior Collateral Agent.

“**Building Loan Bank Proceeds Sub-Account**” means the “Building Loan Bank Proceeds Sub-Account” within the Construction Account created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**Building Loan Costs**” means all costs and expenses incurred in connection with the design, construction, commissioning and financing of the Project that constitute the “cost of improvements” pursuant to the provisions of Section 22 of the New York State Lien Law, which costs, if advanced pursuant to the provisions of the TDC Building Loan Agreement, will have priority over subsequently filed mechanic’s liens.

**“Building Loan Tax-Exempt Bond Proceeds Sub-Account”** means the “Building Loan Tax-Exempt Bond Proceeds Sub-Account” within the Construction Account created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Building Loans”** means the Series 2022A Bond Building Loan, the Series 2024 Bond Building Loan, the TDC Senior Term Loan Building Loan, and any Additional Obligations identified as “Building Loans” in the Financing Documents pursuant to which such Additional Obligations are issued.

**“Business Day”** means any day that is not (i) a Saturday, a Sunday or other day on which commercial banks in New York, New York are authorized or required by law, regulation or executive order to be closed, or (ii) a day on which the New York Stock Exchange is closed.

**“Calculation Agent”** means, initially, the Trustee, and thereafter any other Calculation Agent designated from time to time by the Issuer at the direction of the Borrower with the consent of the Purchaser in accordance with Section 2.08 of the First Supplemental Indenture.

**“Calculation Date”** means each March 31, June 30, September 30 and December 31 following the Phase 2 End of Funding Date.

**“Calculation Period”** has the meaning ascribed to such term in Section 2.12(a) of the Second Supplemental Indenture.

**“Capital Appreciation Bonds”** means Bonds which are Compounding Interest Bonds throughout their entire term.

**“Capital Expenditures”** means, for any period, all expenditures made, directly or indirectly, by the Borrower during such period for equipment, fixed assets, real property or improvements, or for replacements or substitutions therefor or additions thereto, that have been or should be, in accordance with GAAP, reflected as additions to property, plant or equipment on a balance sheet of the Borrower or have a useful life of more than one year.

**“Capital Lease”** means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

**“Capital Lease Obligation”** means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

**“Capital Stock”** means any and all shares, interests, participations or other equivalents (however designated) of capital stock of a corporation, any and all equivalent ownership interests in a Person (other than a corporation), including, without limitation, partnership interests and membership interests, and any and all warrants, rights or options to purchase any of the foregoing.

**“Capitalized Interest”** means the net amounts payable by the Borrower of (i) interest on the Secured Obligations, and (ii) Ordinary Course Payments pursuant to a “qualified hedge” under section 148 of the Code with respect to the Secured Obligations, in each case accruing prior to the respective placed-in-service date, as defined for purposes of the Code, of the Project or portion thereof.

**“Cash”** means money, currency or a credit balance in any demand account or deposit account (as such term is defined in the UCC).

“**Cash Collateral**” has the meaning given in Section 6.1(a) of the Intercreditor Agreement.

“**Casualty Event**” means any partial or total loss of, destruction of or damage to any property of the Borrower.

“**Casualty Proceeds Sub-Account**” means the Casualty Proceeds Sub-Account established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**City**” means The City of New York.

“**Claim**” has the meaning set forth in Section 4.05 of the Second Supplemental Indenture.

“**Class**” means

- (a) with respect to the Senior Secured Parties, each of:
  - (i) the Senior Bank Creditors (in their capacity as such);
  - (ii) collectively, the Senior Bondholders (other than the Bondholders of the Series 2022A Bonds, in their capacity as such) and Bond Insurer with respect to the Senior Bond Insurer Obligations;
  - (iii) each Hedge Provider individually; and
  - (iv) any Additional Senior Creditors that become subject to the Intercreditor Agreement pursuant to an Accession Agreement and are identified therein as a Class;
- (b) with respect to any Senior Obligations, each of:
  - (i) the Senior Bank Obligations;
  - (ii) without duplication, the Senior Bond Obligations (excluding obligations under the Series 2022A Bonds);
  - (iii) the Obligations of the Issuer or the Borrower under each of the Secured Hedge Agreement (including Ordinary Course Payments and Hedge Terminations Payments); and
  - (iv) any Additional Senior Obligations that are identified as a Class;
- (c) with respect to the Subordinate Secured Parties, each of:
  - (i) the Subordinate Bondholders (in their capacity as such); and
  - (ii) any Additional Subordinate Creditors that become subject to the Intercreditor Agreement pursuant to an Accession Agreement and are identified therein as a Class;
- (d) with respect to any Subordinate Obligations, each of:

- (i) the Subordinate Obligations; and
- (ii) the Additional Subordinate Obligations (excluding any additional Hedge Agreements) and that is identified therein as a Class.

“**Class Percentage**” means, the total percentage of a Class of Senior Secured Party’s Senior Obligations as calculated in accordance with the following for purposes of determining the threshold required for Required Senior Secured Parties and an Intercreditor Vote in Section 8.4(b)(ii):

(a) Pre-Enforcement Action:

- (i) Senior Bondholders and Bond Insurers, collectively: Senior Bond Par Amount (excluding the Series 2022A Bonds) over Total Pre-Enforcement Senior Secured Voting Value;
- (ii) Senior Bank Creditors: Aggregate Bank Debt Exposure (including the Series 2022A Bonds) over Total Pre-Enforcement Senior Secured Voting Value;
- (iii) Hedge Providers: Zero percent; and
- (iv) Holders of Additional Senior Obligations: the available or committed value and principal amount of such Additional Senior Obligations over Total Pre-Enforcement Senior Secured Voting Value;

(b) Post-Enforcement Action:

- (i) Senior Bondholders and Bond Insurers, collectively: Senior Bond Par Amount (excluding the Series 2022A Bonds) over Total Post-Enforcement Senior Secured Voting Value;
- (ii) Senior Bank Creditors: Funded Bank Debt over Total Post-Enforcement Senior Secured Voting Value;
- (iii) Hedge Providers: Aggregate Hedging Agreement Termination Values over Total Post-Enforcement Senior Secured Voting Value; and
- (iv) Holders of Additional Senior Obligations: the principal amount outstanding of such Additional Senior Obligations over Total Post-Enforcement Senior Secured Voting Value.

“**Clearing Agency**” has the meaning ascribed to such term in Section 5.21(k) of the Collateral Agency and Accounts Agreement.

“**Closing Date**” means November 17, 2022.

“**Code**” means the Internal Revenue Code of 1986, as from time to time amended, and any regulations promulgated thereunder that are applicable to the Tax-Exempt Bonds, including, without limitation, any Treasury Regulations or Temporary or Proposed Regulations, as the same shall from time to time be amended, including (until modified, amended or superseded) Treasury Regulations or Temporary or Proposed Regulations under the Internal Revenue Code of 1954, as amended.

**“D&C Contractor Direct Agreement”** means that certain Consent to Assignment, dated as of the Closing Date, among the Collateral Agents, the D&C Contractor and the Borrower.

**“D&C Guarantor”** means AECOM, a Delaware corporation.

**“D&C Guaranty”** means that certain Parent Company Guaranty, dated as of the Closing Date, made by the D&C Guarantor in favor of the Borrower.

**“D&C Letter of Credit”** means an Acceptable Letter of Credit in favor of the Collateral Agents, delivered in accordance with the Lease Agreement.

**“D&C Work”** has the meaning ascribed to such term in Appendix E hereto.

**“Daily Simple SOFR”** means, for any day (a “SOFR Interest Day”), a rate per annum (rounded upward to the next one-sixteenth (1/16th) of one percentage (0.0625%), if necessary) equal to SOFR for the related Daily Simple SOFR Computation Date. Any change in Daily Simple SOFR due to a change in SOFR shall be effective from and including the effective date of such change in SOFR without notice to the Issuer or the Borrower.

**“Daily Simple SOFR Computation Date”** means, with respect to Daily Simple SOFR, the day that is two (2) U.S. Government Securities Business Days prior to (a) if such SOFR Interest Day is a U.S. Government Securities Business Day, such SOFR Interest Day or (b) if such SOFR Interest Day is not a U.S. Government Securities Business Day, the Business Day immediately preceding such SOFR Interest Day. For example, with respect to the foregoing clause (b), and without modifying the foregoing definition, if such SOFR Interest Day is a Saturday that is not a U.S. Government Securities Business Day, and the

immediately preceding Friday, Thursday and Wednesday are all U.S. Government Securities Business Days, the Daily Simple SOFR Computation Date for such SOFR Interest Day would be the immediately preceding Wednesday.

**“Daily Simple SOFR Rate”** means a fluctuating rate per annum, determined as of each applicable Daily Simple SOFR Computation Date for each Adjustment Date, equal to the product of (a) Daily Simple SOFR, as in effect on such Daily Simple SOFR Computation Date and (b) 80%.

**“DB Event of Default”** has the meaning assigned to the term “Event of Default” in the D&C Contract.

**“DB Outside Completion Date”** means the ninetieth (90<sup>th</sup>) day prior to the Outside Completion Date.

**“Debt Service”** means, with respect to any Secured Obligations and during the applicable period, the aggregate amount of the interest, principal, Accreted Value, Redemption Price or Acceleration Payment on the relevant Senior Obligations, or, in the case of Secured Hedge Agreements, the net amount payable by the Borrower thereunder, in each case, that is payable during such period.

**“Debt Service Reserve Accounts”** means, collectively, the Senior Debt Service Reserve Account and the Subordinate Debt Service Reserve Account.

**“Debt Service Reserve Requirements”** means, collectively the Senior Debt Service Reserve Requirement and the Subordinate Debt Service Reserve Requirement.

**“Debtor Relief Laws”** means any Bankruptcy Law, or any other applicable state, provincial territorial, or federal bankruptcy laws and all other liquidation, conservatorship, bankruptcy, assignment for the benefit of creditors, moratorium, rearrangement, receivership, insolvency, reorganization, or similar debtor relief statute, law, ordinance, rule or regulation of the United States of America, any state thereof, or the District of Columbia, or other applicable jurisdictions from time to time in effect, including any corporate law of any jurisdiction permitting a debtor to obtain a stay or a compromise of the claims of its creditors against it and including any rules and regulations pursuant thereto.

**“Decision Period”** means the period of time determined by the Intercreditor Agent and designated in any notice delivered by the Intercreditor Agent to the Agents to make any decision in accordance with Section 8.4(b) of the Intercreditor Agreement; provided, that (a) subject to clause (b) below, each Decision Period shall end not earlier than 30 days after the date of such notice; provided, further, that the Intercreditor Agent may designate such lesser period (being at least 15 Business Days) as it may consider necessary or advisable in circumstances where the interests of the Secured Parties or any of them would otherwise be likely to be prejudiced, and (b) any such period of time may be extended at the request of the Administrative Agent, the Trustee or any other Agent for a period not to exceed an additional 15 Business Days (or such longer period as all Parties may otherwise agree in writing) on a one-time basis only for any notice.

**“Deemed Drawing”** shall have the meaning ascribed to such term in the Series 2022A Bond Purchase Agreement.

**“Default”** means any event, omission or circumstance that with the lapse of time, the giving of notice or both, could become an Event of Default.

**“Default Notice Date”** has the meaning given in Section 5.22(e) of the Collateral Agency and Accounts Agreement.

“**Default Right**” has the meaning assigned to that term in, and shall be interpreted in accordance with, 12 C.F.R. §§ 252.81, 47.2 or 382.1, as applicable.

“**Defaulted Interest**” means the term set forth in Section 2.18(e) of the Master Indenture.

“**Defaulting Sponsor**” means a Sponsor that fails to make a payment or Equity Contribution or provide Equity Support in accordance with the Equity Contribution Agreement.

“**Defeasance Obligations**” means Government Obligations that are not subject to redemption (other than at the option of the holder thereof) prior to the date or dates on which the proceeds thereof are required pursuant to the terms of the Indenture.

“**Defect**” has the meaning ascribed to such term in Appendix E hereto.

“**Deferral Period**” has the meaning ascribed to such term in Section 5.05 of the Collateral Agency and Accounts Agreement.

“**Deferred Concessions Revenue Rent**” has the meaning ascribed to such term in Appendix E hereto.

“**Deferred Interest Obligations**” means Convertible Capital Appreciation Bonds and any other Secured Obligation with interest payment deferred beyond (12) twelve months after the initial issuance of, or the binding written commitment with respect to, the applicable Secured Obligation.

“**Delay Event**” has the meaning ascribed to such term in Appendix E hereto.

“**Deposit Account Bank**” means The Bank of New York Mellon, a banking corporation organized under the laws of the State of New York, in its capacity as Deposit Account Bank under the Collateral Agency and Accounts Agreement, and its successors and assigns pursuant to the Collateral Agency and Accounts Agreement.

“**Deposit Account Bank Termination Notice**” has the meaning ascribed to such term in Section 5.25(b) of the Collateral Agency and Accounts Agreement.

“**Design Manager**” has the meaning ascribed to such term in the Lease Agreement.

“**Designated Rating Agency**” means Fitch, Moody’s or S&P and, in each case, any successors thereto, or, if none of the foregoing (or any successor thereof) exists, any other Nationally Recognized Rating Agency.

“**Determination of Taxability**” means:

(I) with respect to the Series 2022A Bonds, (a) a published or private ruling, technical advice memorandum or field service advice is issued or provided by the Internal Revenue Service concluding that the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes in connection with a process in which the Borrower has participated or has been given the opportunity to participate, and which ruling, memorandum or advice the Borrower, in its discretion, does not contest or from which no further right of judicial review or appeal exists, in each case in the manner provided below, (b) a final determination by a court of competent jurisdiction in the United States or by the Internal Revenue Service that the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes from which no further right of

appeal exists in a proceeding in which the Borrower has participated or has been a party, or has been given the opportunity to participate or be a party, or (c) the delivery to the Issuer, the Borrower or the Purchaser of a written opinion of Squire Patton Boggs (US) LLP or Hardwick Law Firm, LLC, as Bond Counsel, or any other Bond Counsel to the effect that the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes or of written advice to the effect that the opinion of such Bond Counsel delivered on the Issuance Date of the Bonds of such Series to the effect that interest on such Bonds is not includable in the gross income of the holders thereof for federal income tax purposes may no longer be relied upon; provided, however, that no such Determination of Taxability described in (a) or (b) shall be considered to exist unless (i) the registered or Beneficial Owner or former registered or Beneficial Owner of such Series of Bonds involved in such proceeding or action (A) gives the Borrower and the Trustee prompt notice of the commencement thereof and (B) (if the Borrower agrees to pay all expenses in connection therewith) offers the Borrower the opportunity to control the defense thereof and (ii) either (A) the Borrower does not agree within 30 days of receipt of such offer to pay such expenses and liabilities and to control such defense or (B) the Borrower shall exhaust or choose not to exhaust all available proceedings for the contest, review, appeal or rehearing of such decree, judgment or action which the Borrower determines to be appropriate; provided further that no such Determination of Taxability described in (c) above shall be considered to exist if upon receipt of such opinion or written advice described in (c) above, the Borrower gives the Issuer and the Purchaser prompt written notice of its intent to obtain (at the Borrower's expense) a second opinion and, within 60 days of the receipt such opinion or written advice described in (c) above, delivers to the Issuer and the Purchaser an opinion of a nationally recognized attorney or firm of attorneys experienced in matters relating to municipal bond law and the tax exemption of interest on bonds of states and their political subdivisions, reasonably acceptable to the Issuer and the Purchaser, to the effect that interest on such Bonds is (and in the case of the Series 2022A Bonds, addition future Drawings, if such Drawings are made prior to the Series 2022A Commitment End Date, will be) excludable from the gross income of the holders thereof for federal income tax purposes; provided, further, no Determination of Taxability described above will result from the inclusion of interest on any Bond in the computation of minimum or indirect taxes; and

(II) with respect to any Series of Tax-Exempt Bonds other than the Series 2022A Bonds, (a) a published or private ruling, technical advice memorandum or field service advice is issued or provided by the Internal Revenue Service concluding that the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes in connection with a process in which the Borrower has participated or has been given the opportunity to participate, and which ruling, memorandum or advice the Borrower, in its discretion, does not contest or from which no further right of judicial review or appeal exists, in each case in the manner provided below, (b) a final determination by a court of competent jurisdiction in the United States or by the Internal Revenue Service that the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes from which no further right of appeal exists in a proceeding in which the Borrower has participated or has been a party, or has been given the opportunity to participate or be a party, or (c) the delivery to the Issuer, the Borrower or the Bondholder of a written opinion of Squire Patton Boggs (US) LLP or Hardwick Law Firm, LLC, as Bond Counsel, or any other Bond Counsel, in any of the foregoing cases, to the effect that, as a result of a failure by the Borrower to observe any covenant or agreement of the Borrower in any Financing Document or any applicable Tax Certificate, or the inaccuracy of any Borrower representation or warranty therein, the interest payable on the Bonds of such Series is includable in the gross income of the holders thereof for federal income tax purposes or of written advice to the effect that the opinion of such Bond Counsel delivered on the Issuance Date of the Bonds of such Series to the effect that interest on such Bonds is not includable in the gross income of the holders thereof for federal income tax purposes may no longer be relied upon; provided, however, that no such Determination of Taxability described in (a) or (b) shall be considered to exist unless (i) the registered or Beneficial Owner or former registered or Beneficial Owner of such Series of Bonds involved in such proceeding or action (A) gives the Borrower and the Trustee prompt notice of the commencement thereof and (B) (if the

Borrower agrees to pay all expenses in connection therewith) offers the Borrower the opportunity to control the defense thereof and (ii) either (A) the Borrower does not agree within 30 days of receipt of such offer to pay such expenses and liabilities and to control such defense or (B) the Borrower shall exhaust or choose not to exhaust all available proceedings for the contest, review, appeal or rehearing of such decree, judgment or action which the Borrower determines to be appropriate; provided further that no such Determination of Taxability described in (c) above shall be considered to exist if upon receipt of such opinion or written advice described in (c) above, the Borrower gives the Issuer and the Bondholder prompt written notice of its intent to obtain (at the Borrower's expense) a second opinion and, within 60 days of the receipt such opinion or written advice described in (c) above, delivers to the Issuer and the Bondholder an opinion of a nationally recognized attorney or firm of attorneys experienced in matters relating to municipal bond law and the tax exemption of interest on bonds of states and their political subdivisions, reasonably acceptable to the Issuer and the Bondholder, to the effect that interest on such Bonds is excludable from the gross income of the holders thereof for federal income tax purposes; provided, further, no Determination of Taxability described above will result (i) from the inclusion of interest on any Bond in the computation of minimum or indirect taxes or (ii) if the events that would otherwise give rise to a Determination of Taxability occur as a result of a change in the Code or regulations under the Code adopted after the date of issuance of the applicable Tax-Exempt Bonds.

**“DIP Financing”** has the meaning given in Section 6.1(a) of the Intercreditor Agreement.

**“Direct Agreements”** means, collectively, (a) the Manager Direct Agreement, (b) the D&C Contractor Direct Agreement, (c) if and when entered into pursuant to Section 6.08(c) of the Common Terms Agreement, any direct agreement in respect of the Concession Management Services Agreement, and (d) if and when entered into pursuant to Section 6.08(d) of the Common Terms Agreement, each direct agreement in respect of a Material Sublease (other than those described in the preceding clause (c)).

**“Direction Notice”** has the meaning ascribed to such term in Section 6.03 of the Collateral Agency and Accounts Agreement.

**“Discharge of Senior Bank Obligations”** means, subject to Section 6.5 of the Intercreditor Agreement:

- (a) irrevocable and indefeasible, payment in full in cash or discharge in full (including by defeasance, if applicable) of (i) the outstanding principal amount of all Senior Loans, Series 2022A Bonds and notes under the Senior Financing Documents, (ii) unreimbursed amounts with respect to any Letter of Credit issued under the Senior Bank Financing Documents and (iii) interest, fees, expenses and other amounts outstanding at such time under the Senior Bank Financing Documents (including interest, fees, expenses and other amounts accruing on or after the commencement of an Insolvency or Liquidation Proceeding, in each case at the applicable rate provided for in the respective Senior Bank Financing Documents, whether or not such interest, fees, expenses or other amounts would be allowed in such Insolvency or Liquidation Proceeding, and any premium or make-whole, if any);
- (b) the termination or expiration of all commitments, if any, to extend credit (including the issuance of any Letter of Credit) that would constitute Senior Bank Obligations;
- (c) cancellation, termination or cash collateralization at 102.5% of aggregate Available Amount of all Letters of Credit issued and outstanding under the Senior Bank Financing Documents (unless the outstanding amount of exposure under the relevant Letter of Credit has been back-stopped by a letter of credit reasonably satisfactory to the applicable issuing bank);

- (d) the termination or expiration of all Secured Hedge Agreements that hedge or mitigate commercial risk with respect to the Senior Bank Obligations (or as of the date of execution, were intended or designed to hedge or mitigate commercial risk with respect to the Senior bank Obligations), or the entering into of any arrangement(s) (that are satisfactory to the applicable Hedge Provider in its sole and absolute discretion) which provide for the effective termination, cancellation, netting or set-off of such Secured Hedge Agreements;
- (e) payment in full in cash or discharge in full of all Senior Bank Obligations (excluding contingent indemnification and reimbursement obligations, that, by their express terms, survive the termination, expiration, or cancellation of the Secured Hedge Agreements) outstanding under the Secured Hedge Agreements that hedge or mitigate commercial risk with respect to the Senior Bank Obligations (or as of the date of execution, were intended or designed to hedge or mitigate commercial risk with respect to the Senior bank Obligations);
- (f) payment in full in cash or discharge in full of all other Senior Bank Obligations that are then due and payable or otherwise accrued and owing at or prior to the time such amounts are paid; and
- (g) adequate provision being made to the satisfaction of the applicable Senior Bank Creditors for any contingent or unliquidated Senior Bank Obligations related to claims, causes of action or liabilities that have been asserted against the related Senior Bank Creditors and for which indemnification is required under the Senior Bank Financing Documents.

**“Discharge of Senior Obligations”** means, subject to Section 6.5 of the Intercreditor Agreement:

- (a) payment in full in cash or discharge in full (including by defeasance, if applicable) of (i) the outstanding principal amount of all Senior Obligations under the Senior Financing Documents, (ii) unreimbursed amounts with respect to any Letter of Credit issued under the Senior Financing Documents and (iii) interest, fees, expenses and other amounts outstanding at such time under the Senior Financing Documents (including interest, fees, expenses and other amounts accruing on or after the commencement of an Insolvency or Liquidation Proceeding, in each case at the applicable rate provided for in the respective Senior Financing Documents, whether or not such interest, fees, expenses or other amounts would be allowed in such Insolvency or Liquidation Proceeding, and any premium or make-whole, if any);
- (b) the termination or expiration of all commitments, if any, to extend credit (including the issuance of any Letter of Credit) that would constitute Senior Obligations;
- (c) cancellation, termination or cash collateralization at 102.5% of aggregate Available Amount of all Letters of Credit issued and outstanding under the Senior Financing Documents (unless the outstanding amount of exposure under the relevant Letter of Credit has been back-stopped by a letter of credit reasonably satisfactory to the applicable issuing bank);
- (d) the termination or expiration of all Secured Hedge Agreements, or the entering into of any arrangement(s) (that are satisfactory to the applicable Hedge Provider in its reasonable discretion) which provide for the effective termination, cancellation, netting or set-off of such Secured Hedge Agreements;

- (e) payment in full in cash or discharge in full of all Senior Obligations (excluding contingent indemnification and reimbursement obligations, that, by their express terms, survive the termination, expiration, or cancellation of the Secured Hedge Agreements) outstanding under the Secured Hedge Agreements;
- (f) payment in full in cash or discharge in full of all other Senior Obligations that are then due and payable or otherwise accrued and owing at or prior to the time such amounts are paid; and
- (g) adequate provision being made to the satisfaction of the applicable Senior Bank Creditors for any contingent or unliquidated Senior Obligations related to claims, causes of action or liabilities that have been asserted against the related Senior Secured Parties and for which indemnification is required under the Senior Financing Documents;

provided, that the Discharge of Senior Obligations shall not be deemed to have occurred if the applicable payments are made with the proceeds of other Senior Obligations that constitute an exchange or replacement for or a Refinancing of such Senior Obligations.

**“Discharge of Subordinate Obligations”** means, subject to Section 6.5 of the Intercreditor Agreement:

- (a) the irrevocable and indefeasible payment in full in cash or discharge in full (including by defeasance, if applicable) of (i) the outstanding principal amount of all Subordinate Obligations, (ii) unreimbursed amounts with respect to any Letter of Credit issued under the Subordinate Financing Documents and (iii) interest, fees, expenses and other amounts outstanding at such time under the Subordinate Financing Documents (including interest, fees, expenses and other amounts accruing on or after the commencement of an Insolvency or Liquidation Proceeding, in each case at the applicable rate provided for in the respective Subordinate Financing Documents, whether or not such interest, fees, expenses or other amounts would be allowed in such Insolvency or Liquidation Proceeding, and any premium or make-whole, if any);
- (b) the termination or expiration of all commitments, if any, to extend credit (including the issuance of any Letter of Credit) that would constitute Subordinate Obligations;
- (c) cancellation, termination or cash collateralization at 102.5% of aggregate Available Amount of all Letters of Credit issued and outstanding under the Subordinate Financing Documents (unless the outstanding amount of exposure under the relevant Letter of Credit has been back-stopped by a letter of credit reasonably satisfactory to the applicable issuing bank);
- (d) payment in full in cash or discharge in full of all other Subordinate Obligations that are then due and payable or otherwise accrued and owing at or prior to the time such amounts are paid; and
- (e) adequate provision being made for any contingent or unliquidated Subordinate Obligations related to claims, causes of action or liabilities that have been asserted against the related Subordinate Secured Parties and for which indemnification is required under the Subordinate Financing Documents;

provided, that the Discharge of Subordinate Obligations shall not be deemed to have occurred if the applicable payments are made with the proceeds of other Subordinate Obligations that constitute an exchange or replacement for or a Refinancing of such Subordinate Obligations.

“**Disposition**” or “**Dispose**” means the sale, transfer, license, lease or other disposition (including any sale and leaseback transaction) of any property by any Person, including any sale, assignment, transfer or other disposal, with or without recourse, of any notes or accounts receivable or any rights and claims associated therewith.

“**Disposition Proceeds**” has the meaning ascribed to such term in Section 5.15(d) of the Collateral Agency and Accounts Agreement.

“**Disputed Payment Amount**” has the meaning ascribed to such term in Section 5.30 of the Collateral Agency and Accounts Agreement.

“**Distribution Account**” means the “Distribution Account” established and created in the name of the Borrower pursuant to Section 5.19(b) of the Collateral Agency and Accounts Agreement.

“**Dollars**” and the sign “**\$**” mean the lawful currency of the United States of America.

**“Non-Recourse Parties”** has the meaning given in Section 10.16 of the Intercreditor Agreement.

**“Non-U.S. Plan”** means any plan, fund (including, without limitation, any superannuation fund) or other similar program established or maintained outside the United States of America by the Borrower primarily for the benefit of employees of the Borrower residing outside the United States of America, which plan, fund or other similar program provides, or results in, retirement income, a deferral of income in contemplation of retirement or payments to be made upon termination of employment, and which plan is not subject to ERISA or the Code.

**“Non-Voting Senior Creditor”** has the meaning given in Section 8.3 of the Intercreditor Agreement.

**“Notice Address”** means, as to each Notice Party, the address for such Notice Party set forth in Section 12.04 of the Collateral Agency and Accounts Agreement and Section 11.08 of the Master Indenture, respectively.

**“Notice Parties”** means the Parties provided notice in Section 12.04 of the Collateral Agency and Accounts Agreement and Section 11.08 of the Master Indenture and pursuant to any Supplemental Indenture.

**“O&M Expenses”** means, for any period, any actual cash expenditure incurred by the Borrower in performing Operations and Maintenance Work (other than Major Maintenance) including (a) wages, salaries, fringe benefits and other payroll costs or remuneration (including reimbursement of employee expenses) paid to or for employees employed for the benefit of the Operations and Maintenance Work, (b) the cost of routine maintenance, repairs, improvements, alterations and changes related to the areas in the Premises, including payments to Contractors and Suppliers for cleaning, rubbish removal, snow removal, facility maintenance, equipment maintenance, extermination and other cleaning and maintenance services furnished by such Contractors and Suppliers, (c) payments for electricity, water, sewer rents and other fuel and Utility services, (d) the cost of provision, maintenance, repair and replacement of fixtures, furniture, furnishings, operating supplies, equipment and tools, (e) (i) the cost of any insurance carried by the Borrower with respect to the Premises or the Operations and Maintenance Work or with respect to any accident or casualty occurring with respect thereto and (ii) the cost of any such accident or casualty paid for by the Borrower to the extent such accident or casualty is not reimbursed by insurance proceeds and such accident or casualty was not caused by the gross negligence or willful neglect of the Borrower, (f) the costs of (i) telephone, telegraph, postage, messenger service and other communications services and (ii) trucking and other shipping services, (g) payments for rental of leased equipment and supplies, (h) payments to third parties for legal, accounting, architectural, engineering, space planning and other professional services and other professional fees paid to third parties, (i) advertising and promotional expenses paid to third parties, (j) Taxes actually paid by the Borrower including excise taxes, New York City sales and use tax and taxes on utilities or on the provision of utility services but excluding New York State Corporation Franchise tax, New York City General Corporation tax and New York City Unincorporated Business tax, (k) costs and fees incurred in connection with the obtaining and maintaining in effect of any Governmental Approval from any Governmental Authority and filing any reports or requests for review with any Governmental Authority, (l) any fees, charges, penalties, judgments or other amounts assessed against the Borrower by any Governmental Authority, (m) costs and fees incurred in the development, implementation and operation of computer systems, (n) costs incurred by the Borrower, including reasonable attorney’s fees, for adjudication, arbitration, mediation or other dispute resolution mechanisms used to resolve disputes between the Borrower and the Port Authority or third parties, (o) amounts payable to third parties for services provided as part of the Operations and Maintenance Work, including financial services and any other services, (p) amounts refunded to Sublessees and other third parties with respect to amounts overpaid by such Persons, (q) amounts payable in respect of the Borrower’s indemnification obligations to the Port Authority or third parties unless such obligation results from the willful misconduct, negligence, or other culpable act, error or omission of the Borrower, (r) Ground Rent, First Additional Rent, Second Additional Rental and Third Additional Rent (but not Concessions Revenue Rent, Excess Value Rent or Equity Gain Share) and (s) fees and other amounts that are paid to the Manager under the Management Services Agreement; it being understood that O&M Expenses shall not include Permitted Tax Distributions or any reimbursement or payment of amounts that are contemplated in the definition of Permitted Tax Distributions.

**“O&M Reserve Account”** means the “O&M Reserve Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“O&M Reserve Requirement”** means, as of any date (a) prior to the Phase 1 End of Funding Date, zero, (b) on and after the Phase 1 End of Funding Date, fifty percent (50%) of the budgeted O&M Expenses for the next succeeding twelve (12) months, as shown in the then-applicable Annual Operating Budget, it being understood that, to the extent any portion of such twelve (12) month period is not included in the latest available Annual Operating Budget, the amount of O&M Expenses for such portion shall be deemed

to be equal to 110% of the amount of O&M Expenses for the same portion of the twelve (12) month period that is included in such Annual Operating Budget.

**“Obligations”** means all advances to, and debts, liabilities, obligations, covenants and duties of, the Borrower arising under any Financing Document or otherwise with respect to any Credit Extension (including erroneous payment subrogation rights pursuant to Section 9.10(b)(iii) of the Common Terms Agreement), whether direct or indirect (including those acquired by assumption), absolute or contingent, due or to become due, now existing or hereafter arising and including interest and fees that accrue after the commencement by or against the Borrower or any Affiliate thereof of any proceeding under any Debtor Relief Laws naming such Person as the debtor in such proceeding, regardless of whether such interest and fees are allowed claims in such proceeding. Without limiting the foregoing, the Obligations include (a) the obligation to pay principal, interest, charges, expenses, fees, indemnities, Ordinary Course Payments, Hedge Termination Payments and other amounts payable by the Borrower under any Financing Document and (b) the obligation of the Borrower to reimburse any amount in respect of any of the foregoing that the Administrative Agent or any Bank Finance Party, in each case in its sole discretion, may elect to pay or advance on behalf of the Borrower.

**“Obligations Payment Account”** means the Senior Obligations Payment Accounts or the Subordinate Obligations Payment Accounts.

**“Obligors”** means, collectively, the Borrower and Pledgor.

**“OFAC”** means the Office of Foreign Assets Control of the U.S. Department of the Treasury.

**“Off-Premises Facilities”** has the meaning ascribed to such term in Appendix E hereto.

**“Officer’s Certificate”** means a certificate of a Senior Financial Officer or other Responsible Officer of the Borrower whose responsibilities extend to the subject matter of such certificate.

**“Operating Account”** has the meaning ascribed to such term in Section 5.01(c) of the Collateral Agency and Accounts Agreement.

**“Operating Cashflow Sub-Account”** means the “Operating Cashflow Sub-Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Operations and Maintenance Term Requirements”** has the meaning ascribed to such term in the Lease Agreement.

**“Operations and Maintenance Work”** means the operation, management, administration, and maintenance of Terminal 7, Terminal 6 and the Ground Transportation Center, including any repair, modification, reconstruction, rehabilitation, restoration, renewal and replacement of Terminal 7, Terminal 6 and the Ground Transportation Center, all as required under the Lease Agreement.

**“Opinion of Bond Counsel”** means a written opinion of Bond Counsel.

**“Opinion of Counsel”** means a written opinion of Counsel.

**“Ordinary Course Payments”** means all regularly scheduled payments due from either party under any Secured Hedge Agreement from time to time, calculated in accordance with the terms of such Secured Hedge Agreement, (including after any offset expressly contemplated thereby) but excluding, for

the avoidance of doubt, any Hedge Termination Payments due and payable under such Secured Hedge Agreement.

**“Organizational Documents”** means, (a) with respect to any Person that is a Governmental Authority, (i) the constitutional and statutory provisions that are the basis for the existence and authority of such Governmental Authority, including any enabling statutes, ordinances or public charters and any other organic laws establishing such Governmental Authority and (ii) the bylaws, code of regulations, operating procedures or other organizational documents of or adopted by such Governmental Authority by which such Governmental Authority, its powers, operations or procedures or its securities, bonds, notes or other obligations are governed or from which such powers are derived; and (b) with respect to any other Person, the charter, articles or certificate of organization, formation or incorporation, limited liability company agreement, operating agreement, by-laws or partnership agreement, as applicable, or other similar or equivalent organizational documents of such Person.

**“Other Remedial Action”** has the meaning given in Section 3.7(a) of the Intercreditor Agreement.

**“Outside Completion Date”** has the meaning ascribed to such term in Appendix E hereto.

**“Outstanding”** means,

- (a) when used in respect of Senior Loans, the TDC Bank Debt Loans, or the Security Deposit Loans as of any date of determination, all such loans that have been drawn by the Issuer or the Borrower, as applicable, and that are then unpaid,
- (b) all Ordinary Course Payments and Hedge Termination Payments that have become due and payable under the Secured Hedge Agreements and remain unpaid,
- (c) when used with respect to Bonds as of any date of determination, all Bonds that have been executed, authenticated and delivered under the Indenture, including, without limitation, in the case of Series 2022A Bonds, all Series 2022A Bonds purchased by the Initial Purchaser pursuant to the terms of the Series 2022A Bond Purchase Agreement, except:
  - (i) any Bond, or portion thereof, on which all principal and interest due or to become due on or before maturity has been paid; provided that, to the extent a Bond was paid by the Bond Insurer, that portion of the Bond so paid shall be treated as Outstanding until such time as a new Series 2024 Bond has been issued in the name of the Bond Insurer pursuant to Section 4.02(b) of the Second Supplemental Indenture;
  - (ii) any Bond, or portion thereof, on which the Redemption Price due or to become due has been paid in accordance with the redemption provisions applicable to such Bond;
  - (iii) Bonds in lieu of which other Bonds have been executed, authenticated and delivered pursuant to the provisions of the Indenture relating to the transfer and exchange of Bonds or the replacement of mutilated, lost, stolen or destroyed Bonds;
  - (iv) Bonds that have been canceled by the Trustee or that have been surrendered to the Trustee for cancellation;

- (v) Bonds which, under the terms of the Supplemental Indenture pursuant to which they were issued, are deemed to no longer be Outstanding; and
- (vi) Bonds that have been defeased pursuant to and in accordance with the Indenture; and
- (d) with respect to any other Secured Obligation, the amount thereof that has been issued and is then unpaid.

“**Participant**” means a member of or a participant in the Securities Depository.

“**Party**” means, with respect to any written agreement, a party to such agreement.

“**Pay-Over Amount**” has the meaning given in Section 6.3(b)(iv) of the Intercreditor Agreement.

“**Paying Agent**” means the Trustee or any other bank or trust company designated by the Issuer as Paying Agent pursuant to Section 9.01(b) of the Master Indenture.

“**Payment Date**” means the “Payment Date” as defined with respect to any Insured Bonds in the Supplemental Indenture therefor.

“**Performance Security**” means any performance bonds, guarantees, other credit enhancement or liquidity instruments issued or posted in respect of any Material Project Document by any party thereto (other than the Borrower).

“**Permitted Action Notice**” has the meaning given in Section 3.3(b) of the Intercreditor Agreement.

“**Permitted Actions**” has the meaning given in Section 3.3(a) of the Intercreditor Agreement.

“**Permitted Hedge Agreements**” means any Hedge Agreement entered into by the Borrower with a Permitted Hedge Provider in connection with the Borrower’s obligations under Section 5.13 of the Common Terms Agreement.

“**Permitted Hedge Provider**” means any Person that, as of the date of the applicable Permitted Hedge Agreement is a Bank Finance Party (or an Affiliate thereof).

“**Permitted Indebtedness**” means any of the following Indebtedness of the Borrower:

- (a) Indebtedness incurred under the Financing Documents entered into on the Closing Date;
- (b) Additional Obligations permitted to be incurred pursuant to Section 10.27 of the Collateral Agency and Accounts Agreement;
- (c) Subordinated Affiliate Obligations;
- (d) after the Discharge of Senior Bank Obligations in their entirety, reimbursement obligations incurred in connection with the issuance of letters of credit or bond insurance policies (other than the Bond Insurer Reimbursement Amounts) in connection with the Project which letters of credit or bond insurance policies are permitted pursuant to the Lease Agreement and the Financing Documents, including letters of credit with respect to any Debt Service Reserve Account, the O&M Reserve Account, the Major Maintenance

Reserve Account, the Liquidity Reserve Account, and the Ramp-Up Reserve Account and any letters of credit required by the Lease Agreement;

- (e) Purchase money obligations in an amount not to exceed in the aggregate \$5 million and incurred to finance discrete items of equipment not comprising an integral part of the Terminal Facilities that extend to, and are secured by, only the equipment being financed and proceeds thereof, as long as such purchase money obligations do not exceed the purchase price paid for such equipment and, prior to the Discharge of Senior Bank Obligations, so long as the incurrence of such purchase money obligations does not result in a downgrade of the credit ratings applicable to any Senior Obligations from the rating applicable to any such Senior Obligations immediately prior to such incurrence, without giving effect to the Bond Insurance Policy, if any;
- (f) Current accounts payable arising, and accrued expenses incurred, in the ordinary course of business that are payable in accordance with customary practices that are not overdue by more than ninety (90) days (unless subject to a good faith contest);
- (g) Indebtedness under Permitted Hedge Agreements;
- (h) Indebtedness incurred as permitted by any of the Bank Consents described in clauses (i)-(iii) of the definition thereof but, in each case, only to the extent contemplated thereby, and only for so long as the consents or waivers set forth therein remain in effect; and
- (i) (x) the Senior Bond Insurer Obligations related to the Insured Series 2024 Bonds, and (y) Senior Bond Insurer Obligations related to Insured Bonds other than the Insured Series 2024 Bonds, so long as, with respect to this clause (y), the applicable Bond Insurer has entered into an agreement in form and substance reasonably acceptable to the Administrative Agent (so long as the Discharge of Senior Bank Obligations has not occurred) and each other Secured Debt Representative (other than the Hedge Providers) of each Senior Obligation then Outstanding, agreeing to be subject to the terms of the Intercreditor Agreement and such agreement (or any replacement thereof complying with the terms of this clause (i) of the definition of “Permitted Indebtedness”) remains in full force and effect.

**“Permitted Liens”** means:

- (a) Any Security Interest arising by operation of Law or any Security Interest arising in the ordinary course of business in connection with or to secure the performance of bids, tenders, contracts, leases, statutory obligations, surety bonds or appeal bonds;
- (b) Any mechanic’s, materialmen’s, workmen’s, repairmen’s, employees’, warehousemen’s, carriers’ or any like lien or right of set-off arising in the ordinary course of business or under applicable Law, securing obligations incurred in connection with the Project which are not overdue by more than thirty (30) days or are being contested in good faith;
- (c) Any purchase-money security interest or right of title retention in connection with the acquisition of assets in the ordinary course of business, provided that, in each case, (i) such interest or right secures Permitted Indebtedness, (ii) such interest or right extends only to the asset purchased and proceeds thereof, (iii) such interest or right is created, and the Indebtedness secured thereby is incurred, within ninety (90) days after such acquisition,

and (iv) the Indebtedness secured thereby does not exceed the fair market value of such asset at the time of acquisition;

- (d) Any Security Interest for taxes, assessments or governmental charges not yet due or being diligently contested in good faith, pursuant to adequate proceedings and for which adequate reserve have been created;
- (e) Any Security Interest arising out of judgments or awards fully covered by insurance or with respect to which an appeal or proceeding for review is being prosecuted, enforcement has been stayed, or which has been bonded;
- (f) Any Security Interest created pursuant to or contemplated by the Financing Documents or to secure Secured Obligations, or any Security Interest pursuant to or contemplated by the Security Agreement dated as of the Closing Date between the Borrower and the Port Authority (as such Security Agreement is in effect on the Closing Date);
- (g) Any right of set-off arising under a Financing Document;
- (h) Any other lien granted over assets with a value not exceeding \$5,000,000 (or its equivalent) in the aggregate;
- (i) Any Security Interest securing Permitted Indebtedness, including, any Security Interest on cash deposits on reimbursement obligations, as described in clause (d) of the definition of “Permitted Indebtedness”;
- (j) Any Security Interest incurred or deposit made in the ordinary course of business in connection with workers’ compensation, unemployment insurance or other forms of governmental insurance or benefits;
- (k) Any Security Interest arising solely by virtue of any statutory or common law provision relating to banker’s liens, rights to set-off or similar rights;
- (l) Any easements, covenants, conditions, rights-of-way or other exceptions or defects or irregularities to title with respect to the Mortgaged Property (as defined in each of the Building Leasehold Mortgage and the Project Leasehold Mortgage) existing on the date of authentication and delivery of the Series 2022A Bonds, provided that no such easements, covenants, conditions, rights-of-way or other exceptions or defects or irregularities may be expanded, renewed or modified to apply to any portion of the Mortgaged Property (as defined in each of the Building Leasehold Mortgage and the Project Leasehold Mortgage) not subject to such easements, covenants, conditions, rights-of-way or other exceptions or defects or irregularities on such date, unless such Security Interest as so expanded, renewed or modified otherwise qualifies as a Permitted Lien under this definition;
- (m) Licenses or sub-licenses of intellectual property granted in the ordinary course of business;  
or
- (n) The following mechanic’s liens as listed on Schedule B to that certain title report from Stewart Title Commercial Services dated September 17, 2022 (Amended 11/15/22), Title No. NY10634, delivered to the Bank Financing Parties in advance of the Closing Date (the “Title Report”):

- (i) Owner: Flight Center Hotel LLC  
Lienor: Hailey Insulation Corp.

- (o) Any liens related to the amounts shown as past due on the DataTrace Tax Search Continuation, order number 12307923, included in the Title Report, in an aggregate amount not to exceed the sum of all those amount showing as past due in such Tax Search Continuation as of the date of the Title Report; or
- (p) Any liens or other Security Interests permitted by any of the Bank Consents described in clauses (i)-(iii) of the definition thereof but, in each case, only to the extent contemplated thereby, and only for so long as the consents or waivers set forth therein remain in effect; or
- (q) Any Liens related to water supply amounts owed to the Department of Environmental Protection with respect to any account other than an account of or for the account of the Borrower; or
- (r) Any other Security Interest approved in writing by the Secured Parties in accordance with the Intercreditor Agreement.

“**Permitted O&M Expenses**” has the meaning ascribed to such term in Appendix E hereto.

“**Permitted Tax Distributions**” means, for a taxable period (or portion thereof) following the Discharge of Senior Bank Obligations, in their entirety, for which the Borrower is a flow through entity for tax purposes, distributions in an amount equal to (a) the total net taxable income generated by the Borrower for U.S. federal income tax purposes for such period (taking into account deductibility of state and local taxes to the extent applicable) less net losses generated in a prior tax period to the extent not previously taken into account hereunder, multiplied by (b) the highest effective marginal combined United States federal, state or local income tax rate for such taxable year prescribed for an individual or a corporation (whichever is higher) residing in New York City taking into account the character (e.g., long term or short

term capital gain or ordinary or exempt) of the applicable income, provided that to the extent that a limitation on the use of current or prior losses to offset future income exists for federal, state or local income Tax purposes with respect to an individual or a corporation, the amount of losses taken into account for purposes of clause (a) above will be reduced to the extent such limitation prevents the current utilization of such losses by an individual or corporation, as applicable (it being understood such losses may be taken into account in a future tax period to the extent the applicable limitation no longer prevents the utilization of such losses in such future period).

**“Person”** means an individual, association, unincorporated organization, corporation, partnership, limited liability company, joint venture, business trust or a government or agency or a political subdivision thereof or other entity or organization.

**“Phase 1 End of Funding Date”** means the first day of the month following the month in which Substantial Completion of Phase 1 occurs (or if such day is not a Business Day, then the next succeeding Business Day).

**“Phase 2 End of Funding Date”** means the first day of the month following the month in which Substantial Completion of Phase 2 occurs (or if such day is not a Business Day, then the next succeeding Business Day).

**“Plan of Reorganization”** means any plan of reorganization, plan of liquidation, agreement for composition, or other type of plan of arrangement proposed in or in connection with any Insolvency or Liquidation Proceeding.

**“Pledged Funds”** has the meaning ascribed to such term in Section 4.04 of the Master Indenture.

**“Pledgor”** means the HoldCo.

**“Port Authority”** means the Port Authority of New York and New Jersey, in its capacity as party to the Lease Agreement.

**“Port Authority Default Termination Payment”** has the meaning ascribed to such term in Appendix E hereto.

**“Port Authority Milestone Payment”** has the meaning ascribed to such term in Appendix E hereto.

**“Post-Default Rate”** means an interest rate (before as well as after judgment) equal to (a) in the case of overdue principal or during the existence of an Event of Default, the rate that would otherwise be applicable on the Senior Loans or the Series 2022A Bonds, as applicable, plus 2% per annum (provided that, with respect to a SOFR Loan, the determination of the applicable interest rate is subject to Section 2.20 of the Credit Agreement to the extent that SOFR Loans may not be converted to, or continued as, SOFR Loans (as defined in the Common Terms Agreement), pursuant thereto) or (b) in the case of overdue fees or other amounts due hereunder or under any other Senior Bank Financing Document, to the extent permitted by Applicable Law, the rate applicable to ABR Loans (as defined in the Common Terms Agreement) plus 2% per annum, in each case, from and including the date of such non-payment or occurrence of an Event of Default to but excluding the date on which such amount is paid in full or such Event of Default has ceased to exist or has been waived in accordance with the terms of the Senior Bank Financing Documents.

**“Post-Substantial Completion Revenue Account”** means the “Post-Substantial Completion Revenue Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Pre-Substantial Completion Revenue Account”** means the “Pre-Substantial Completion Revenue Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Premises”** has the meaning ascribed to such term in “PART 10 – THE LEASE AGREEMENT.”

**“Prepayment Date”** means any date on which the Senior Loans must be mandatorily prepaid in accordance with the Common Terms Agreement or the Credit Agreement.

**“Principal”** or **“principal”** means the principal of the specified obligations; in the case of Compounding Interest Bonds, the interest component of the value of such Compounding Interest Bonds at maturity (or Accreted Value payable upon redemption) shall be deemed to constitute principal; provided, however, that for purposes of any limitation contained in a resolution or any Supplemental Indenture on the issuance of an aggregate principal amount of Bonds of any Series, the principal amount of Compounding Interest Bonds shall be the initial principal amount of such Compounding Interest Bonds on the issuance date.

**“Principal Office”** means, with respect to the Trustee, the address of such Person identified as its Notice Address in the Indenture or otherwise notified in writing by such Person.

**“Principal Payment Calculation Start Date”** means, with respect to any Secured Obligations, the date occurring twelve (12) months prior to the first Principal Payment Date for such Secured Obligations.

**“Principal Payment Date”** means (a) for the Series 2022A Bonds, the maturity date or the date of any mandatory redemption as set forth in the First Supplemental Indenture, and (b) for the Senior Loans, TDC Bank Debt Loans or the TDC Security Deposit Project Loan, the “Bank Financing Maturity Date” as defined in the Common Terms Agreement, (c) for any other Secured Obligations, the date or dates on which principal of such Secured Obligations, including pursuant to any mandatory sinking fund requirements, is due and payable as set forth in the documents pursuant to which such Secured Obligations were incurred or (d) for Secured Obligations constituting Balloon Indebtedness, the date or dates on which principal of such Balloon Indebtedness, including pursuant to any mandatory sinking fund requirements, is due and payable as set forth in the Balloon Indebtedness Certificate.

**“Principal Payment Period”** mean, with respect to any Secured Obligations, twelve months (12), unless otherwise specified in the Financing Document for the applicable Secured Obligations or, in the case of Balloon Indebtedness, the applicable Balloon Indebtedness Certificate; provided that, in no event shall the Principal Payment Period of any Tax-Exempt Obligations exceed thirteen (13) months.

**“Principal Payment Sub-Accounts”** means, collectively, the 2022A Tax-Exempt Bond Principal Payment Sub-Account, the Senior Loan Principal Payment Sub-Account, and any other sub-account of the Senior Obligations Payment Account or Subordinate Obligations Payment Account established by the Securities Intermediary in respect of any Series of Bonds, as specified in the Supplemental Indenture pursuant to which such Series of Bonds were issued, or other Secured Obligation, pursuant to the applicable Financing Document, established for the payment of principal on the applicable Secured Obligation.

**“Principal Payments”** means, with respect to a payment date, the principal (including mandatory sinking fund payments and the principal component of the Redemption Price or mandatory prepayment due

in connection with any mandatory redemption payment on any Bond or prepayment of any Senior Bank Obligations) due or to become due prior to the next succeeding Principal Payment Date.

“**Project**” has the meaning ascribed to such term in the first Whereas clause to the Collateral Agency and Accounts Agreement and the Master Indenture, respectively.

“**Project Accounts**” means the Accounts and Sub-Accounts established pursuant to Section 5.01(a) and 5.01(c) of the Collateral Agency and Accounts Agreement or under any amendment or supplement to the Collateral Agency and Accounts Agreement, and the Operating Account. The Non-Pledged Accounts do not constitute Project Accounts.

“**Project Costs**” means all costs and expenses incurred in connection with the design, construction, commissioning and financing of the Project that are the obligation of the Borrower, including, without limitation, (a) Building Loan Costs, (b) the contract price of the D&C Contract, (c) amounts payable under all construction, engineering, technical and other contracts entered into by the Borrower in connection with performing the Borrower’s obligations under the Lease Agreement and in accordance with the Financing Documents, (d) all operating, maintenance and capital expenditures, including any expenditures in connection with Major Maintenance and other Operations and Maintenance Work incurred prior to the Phase 2 End of Funding Date, (e) financing costs, including costs of issuance, interest during construction, initial working capital costs, and funding of the Debt Service Reserve Accounts, O&M Reserve Account, the Ramp-Up Reserve Account and the Major Maintenance Reserve Account, (f) development costs and fees paid on the Closing Date in accordance with a flow of funds memorandum, (g) fees incurred by the Sponsors in connection with the procurement or issuance and maintenance of Equity Support, such maintenance fees to be at a rate not to exceed 3% per annum of the amount available to be drawn thereunder or withdrawn therefrom, as applicable, (h) any taxes, assessments or governmental charges payable by the Borrower in connection with the Project, and (i) any other payments required to be made by the Borrower in accordance with the Lease Agreement.

“**Project Director**” has the meaning ascribed to such term in the Lease Agreement.

“**Project Documents**” has the meaning ascribed to such term in Appendix E hereto.

“**Project Leasehold Mortgage**” means that certain TDC Project Loan Leasehold Mortgage, Assignment of Leases and Rents, Security Agreement and Fixture Filing, dated as of November 1, 2022, among the Borrower, the Issuer and the Senior Collateral Agent.

“**Project Loan Bank Proceeds Sub-Account**” means the “Project Loan Bank Proceeds Sub-Account” within the Construction Account created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**Project Loan Tax-Exempt Bond Proceeds Sub-Account**” means the “Project Loan Tax-Exempt Bond Proceeds Sub-Account” within the Construction Account created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**Project Loans**” means the Series 2022A Bond Project Loan, the Series 2024 Bond Project Loan, the TDC Senior Term Loan Project Loan, the TDC Security Deposit Project Loan and any Additional Obligations identified as “Project Loans” in the Financing Documents pursuant to which such Additional Obligations are issued.

“**Project Manager**” has the meaning ascribed to such term in Appendix E hereto.

**“Project Revenues”** means, for any period (without duplication), all revenue received by or on behalf of the Borrower during such period, including but not limited to revenues received by the Borrower from the operation of the Project, interest earned on and paid to the Borrower in respect of any Project Accounts (except for interest earned on Sub-Accounts of the Construction Account holding proceeds of Secured Obligations), proceeds from any business interruption insurance and delay in start up insurance, revenue derived from any third-party concession, lease or contract, liquidated damages paid under the D&C Contract, and any other receipts otherwise arising or derived from or paid or payable in respect of the Project, but excluding (i) proceeds of borrowings by the Borrower, (ii) equity contributions to the Borrower, (iii) proceeds of condemnation proceedings and asset sales, (iv) insurance payments other than proceeds from business interruption insurance and delay in start up insurance, (v) proceeds in respect of Secured Hedge Agreements (including Ordinary Course Payments and Hedge Termination Payments) and (vi) the Non-Pledged Receipts.

**“Property”** or **“properties”** means, unless otherwise specifically limited, real or personal property of any kind, tangible or intangible, choate or inchoate.

**“Purchase Date”** means the “Purchase Date” as defined with respect to any Series of Bonds in the Supplemental Indenture therefor.

**“Purchase Price”** means the “Purchase Price” as defined with respect to any Series of Bonds in the Supplemental Indenture therefor.

**“Purchaser”** means Royal Bank of Canada and its successors and assigns.

**“QFC”** has the meaning assigned to the term “qualified financial contract” in, and shall be interpreted in accordance with, 12 U.S.C. 5390(c)(8)(D).

**“QFC Credit Support”** means any support, through a guarantee or otherwise, for Permitted Hedge Agreements or any other agreement or instrument that is a QFC.

**“Qualified Terminal Operator”** has the meaning ascribed to such term in Appendix E hereto.

**“Quarterly Distribution Date”** means a date specified by the Securities Intermediary within a thirty (30) day period following each Calculation Date.

**“Ramp-Up Debt Service Coverage Ratio”** means, for any DSCR Calculation Period, the ratio of A divided by B where:

A = the Free Cash Flow for such period plus all amounts transferred from the Ramp-Up Reserve Account to the Senior Obligations Payment Account during the immediately succeeding calendar quarter; and

B = the DSCR Debt Service (provided that, notwithstanding clause (iii) in the definition of DSCR Debt Service, any amounts paid or expected to be paid (as applicable) from Equity Contributions shall not be subtracted from Aggregate Debt Service in determining the DSCR Debt Service for purposes of calculating the Ramp-Up Debt Service Coverage Ratio) for such period with respect to the Senior Obligations.

**“Ramp-Up End Date”** means the first date after the day on which the Ramp-Up Debt Service Coverage Ratio has been equal to or above 1.40:1.00 for eight consecutive Calculation Dates.

**“Ramp-Up Period”** means the period commencing on the Phase 2 End of Funding Date and ending upon the Ramp-Up End Date.

**“Ramp-Up Reserve Account”** means the “Ramp-Up Reserve Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Ramp-Up Reserve Requirement”** means, on the Phase 2 End of Funding Date and on each Transfer Date thereafter until the Ramp-Up End Date, an amount equal to the Aggregate Debt Service with respect to all Outstanding Senior Obligations during the next succeeding nine (9) month period.

**“Rating Agencies”** means Moody’s, S&P and Fitch if then providing a rating on a Series of Bonds, or any other Nationally Recognized Rating Agency then providing a rating on a Series of Bonds.

**“Rating Category”** means a generic securities rating category, without regard, in the case of a long-term rating category, to any refinement or gradation of such long-term rating category by a numerical modifier or otherwise.

**“Rating Confirmation”** means written evidence from each Rating Agency then rating a Series of Bonds that no rating assigned to such Series of Bonds or any portion thereof by such Rating Agency, if any, will be withdrawn or reduced below the rating on such Series of Bonds as a result of the action under review, without giving effect to the Bond Insurance Policy, if applicable.

**“Rebate Account”** means the Rebate Account established pursuant to Section 4.02(a) of the Master Indenture, the Series 2022A Rebate Account, the Series 2024A Rebate Account, the Series 2024B Rebate Account, and any other Rebate Account established pursuant to any other Supplemental Indenture.

**“Rebate Amount”** means the amount required to be rebated to the United States pursuant to Section 148(f)(2) of the Code or successor provisions applicable to the Bonds.

**“Rebate Fund”** means the Rebate Fund established pursuant to Section 4.02(a) of the Master Indenture.

**“Reciprocal Rights Agreement”** means each of (a) the Reciprocal Rights Agreement, dated as of the Closing Date, between the Borrower and JetBlue Airways Corporation and (b) any other agreement that provides the Lessee with easements or other right to access and use any portion of Terminal 5 (as defined in the Lease Agreement) for the purposes of the Lessee’s carrying out the D&C Work (as defined in the Lease Agreement) and use and access of those portions of Terminal 5 as may be necessary for use and operation of the New Terminal Facilities, which is entered into by the Lessee with a Person that becomes a tenant of Terminal 5 after the Closing Date.

**“Recognized Mortgagee”** has the meaning given to the term in Appendix E hereto.

**“Record Date”** means the fifteenth (15th) day (whether or not a Business Day) of the month immediately preceding each Interest Payment Date in respect of the Bonds.

**“Recovery”** has the meaning given in Section 6.5 of the Intercreditor Agreement.

**“Redemption Date”** means the date fixed for redemption of Bonds subject to redemption in any notice of redemption given in accordance with the terms of the Indenture.

**“Redemption Price”** means, unless otherwise set forth with respect to a particular Series of Bonds in the applicable Supplemental Indenture, (a) the principal, interest and any premium, if any, due on a Bond on the date on which it is redeemed prior to maturity pursuant to the redemption provisions of the applicable Supplemental Indenture and (b) the Accreted Redemption Price for any Bonds pursuant to the applicable Supplemental Indenture. For the avoidance of doubt, the Redemption Price of Series 2022A Bonds subject to mandatory redemption pursuant to Section 2.04(f) of the First Supplemental Indenture shall include any interest that has accrued at the Taxable Rate.

**“Refinance”** or **“Refinancings”** means, in respect of any Secured Obligations, to refinance, extend, renew, defease, amend, increase, modify, supplement, restructure, refund, replace or repay, or to issue other indebtedness or enter alternative financing arrangements, in exchange or replacement for such Secured Obligations (in whole or in part), including by adding or replacing lenders, creditors, agents, or borrowers, and including in each case, but not limited to, after the original instrument giving rise to such indebtedness has been terminated and including, in each case, through any credit agreement, indenture or other agreement.

**“Related Parties”** means, with respect to any Person, such Person’s Affiliates and the partners, directors, officers, employees, agents, trustees, administrators, managers, advisors and representatives of such Person and of such Person’s Affiliates.

**“Release”** means, any release, spill, emission, emanation, leaking, pumping, injection, deposit, disposal, discharge, dispersal, leaching or migration into or through the indoor or outdoor environment, including movement through ambient air, soil, surface water, ground water, wetlands, land or subsurface strata.

**“Remaining Revenue Account”** means the “Remaining Revenue Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Remaining Revenue Account Limit”** has the meaning ascribed to such term in Section 2.12(a) of the Second Supplemental Indenture.

**“Rental”** has the meaning ascribed to such term in the Lease Agreement.

**“Repayment Obligations”** means an obligation arising under a written agreement of the Borrower and a Credit Provider pursuant to which the Borrower agrees to reimburse the Credit Provider for amounts paid through a Credit Facility used to pay Debt Service on any Bonds, or an obligation arising under a written agreement of the Borrower and a Liquidity Provider pursuant to which the Borrower agrees to reimburse the Liquidity Provider for amounts paid through a Liquidity Facility used to purchase Bonds.

**“Required Bank Finance Parties”** has the meaning set forth in the Common Terms Agreement.

**“Required Bondholders”** means the minimum percentage of Senior Bondholders (without regard to the registered owners of Series 2022A Bonds) required under the Indenture to direct the Trustee to exercise remedies with respect to the Collateral or, in the case of any Segregated Pledged Account held for the benefit of the Subordinate Bondholders, the minimum percentage of Subordinate Bondholders required under the Indenture to direct the Trustee to exercise remedies with respect to such Collateral.

**“Required Liquidity Reserve Amount”** means an amount equal to, from and after the Phase 2 End of Funding Date, six (6) months of the aggregate of Ground Rent, First Additional Rent, Second Additional Rental, Third Additional Rent, and Concession Revenue Rent.

**“Required Percentage”** means, with respect to any matter, the minimum percentage of Secured Parties required under such Secured Party’s applicable Financing Documents to direct their respective Agent to exercise remedies with respect to the Collateral.

**“Required Senior Secured Parties”** means, at any time, the holders of more than 50% of (1) prior to any Enforcement Action, the Total Pre-Enforcement Senior Secured Voting Value and (2) following any Enforcement Action, the Total Post-Enforcement Senior Secured Voting Value.

**“Required Subordinate Secured Parties”** means, as of any date, the holders of more than 50% of the sum of the Subordinate Obligations under the Subordinate Financing Documents.

**“Reserve Accounts”** means, collectively, the Senior Debt Service Reserve Account, the Subordinate Debt Service Reserve Account, and the Ramp-Up Reserve Account.

**“Reserved Rights”** means the rights of the Issuer to (a) execute and deliver supplements and amendments to the Indenture and the TDC Loan Agreements, pursuant to Article X of the Master Indenture, (b) be held harmless and indemnified pursuant to Section 7.2(a) of the TDC Loan Agreements, (c) receive any funds for its own use, whether as administration fees pursuant to Section 7.2(a) of the TDC Loan Agreements or indemnification pursuant to Section 7.2(a) of the TDC Loan Agreements, (d) receive notices and other documents as required under the TDC Loan Agreements to be delivered to the Issuer, (e) provide any consent, acceptance or approval with respect to matters as provided in the TDC Loan Agreements, and (f) receive payments under, and enforce pursuant to Article VIII of the TDC Loan Agreements.

**“Responsible Officer”** means, with respect to any Person, the chief executive officer, president, any senior vice president or chief financial officer of such Person, or, in the case of the Borrower only, other individual identified under the Management Services Agreement (or any replacement thereof) as being responsible for administering the Intercreditor Agreement and the other Financing Documents.

**“Restricted Payment”** means (a) any dividend payment or other distribution of assets, properties, cash rights, obligations or securities on account of any Equity Interests in the Borrower, (b) any purchase, redemption or any other acquisition for value of any Equity Interests in the Borrower or of any warrants, rights or options to acquire any such Equity Interests, in each case, now or hereafter outstanding, (c) any other payment to the Pledgor, any Equity Member, any Sponsor or any of their respective Affiliates, other than any amount properly payable in accordance with (i) the Material Project Documents, (ii) the other agreements, instruments and documents listed in Schedule 3.04(b) to the Common Terms Agreement (as in effect on the Closing Date) or (iii) any additional agreements, instruments or documents entered into between the Borrower and any such party (or any modification of the agreements, instruments and documents listed in clauses (i), (ii) or (iii)) entered into in compliance with the Financing Documents and, prior to the Discharge of Senior Obligations in their entirety, with the consent of the Required Bank Finance Parties (such consent not to be unreasonably withheld or delayed) and, if applicable, consistent with the Annual Operating Budget, or (d) any payment of principal or interest on any Indebtedness of the Borrower to or for the benefit of the Pledgor, any Equity Member, any Sponsor or any of their respective Affiliates.

**“Restricted Payment Conditions”** has the meaning ascribed to such term in Section 5.17(d) of the Collateral Agency and Accounts Agreement.

**“S&P”** means S&P Global Ratings Inc.

**“Sanctioned Country”** means a country or territory that is the target of comprehensive country- or territory-wide sanctions, including, as of the date hereof, Cuba, Iran, North Korea, Syria, and the Crimea, Donetsk People’s Republic and Luhansk People’s Republic regions of Ukraine.

**“Sanctioned Person”** means, at any time, any Person (a) that is the subject of sanctions administered or enforced by OFAC (including by being listed on the Specially Designated Nationals and Blocked Persons List, the Consolidated Sanctions, or any similar list maintained by OFAC), the U.S. Department of State, or the United Nations Security Council, the European Union, His Majesty’s Treasury, or other relevant sanctions authority (b) that is fifty-percent or more owned, directly or indirectly, in the aggregate by one or more Persons described in clause (a) above; (c) that is operating, organized or resident in a Sanctioned Country; or (d) with whom a United States Person is otherwise prohibited or restricted by Sanctions Laws from engaging in trade, business or other activities.

**“Sanctions Laws”** means the laws, rules, regulations and executive orders promulgated or administered to implement economic sanctions or anti-terrorism programs by (a) any U.S. Governmental Authority (including, without limitation, OFAC), including Executive Order 13224, the USA PATRIOT Act, the Trading with the Enemy Act, the International Emergency Economic Powers Act and the laws, regulations, rules and/or executive orders relating to restrictive measures against Iran Sanctioned Persons and Sanctioned Countries; and (b) the United Nations Security Council or any other legislative body of the United Nations.

**“Scheduled Borrowing Date”** means, (a) Scheduled Credit Extension Date and/or (b) Scheduled Drawing Date.

**“Scheduled Credit Extension Date”** means each date set forth in Schedule 2.04 to the Credit Agreement, or if such date is not an U.S. Government Securities Business Day, the immediately preceding U.S. Government Securities Business Day.

**“Scheduled Drawing”** shall have the meaning ascribed to such term in the Series 2022A Bond Purchase Agreement.

**“Scheduled Drawing Date”** means each date set forth in Schedule 1 to the Series 2022A Bond Purchase Agreement, or if such date is not a Business Day, the immediately preceding Business Day.

**“Second Additional Rental”** has the meaning ascribed to such term in Appendix E hereto.

**“Second Supplemental Indenture”** means that certain TDC Second Supplemental Bond Indenture of Trust between the Issuer and the Trustee, dated as of November 1, 2024, as consented to by the Intercreditor Agent, the Senior Collateral Agent and the Administrative Agent, and as acknowledged and agreed to by the Borrower.

**“Secured Accounts”** has the meaning ascribed to such term in the Senior Security Agreement.

**“Secured Debt Representative”** means:

- (a) in the case of the Senior Bank Creditors, the Administrative Agent; provided that, solely in the case of the obligation of each Secured Debt Representative to provide notice of the delineated information described in the last paragraph of Section 5.02(b) of the Collateral Agency and Accounts Agreement and the third-to-last paragraph of Section 5.03(b) of the Collateral Agency and Accounts Agreement with respect to the Series 2022A Bonds, the Secured Debt Representative shall be the Trustee;
- (b) in the case of the Senior Bondholders (except as provided in clause (a) above, excluding Senior Bondholders of the Series 2022A Bonds) and the Bond Insurer with respect to the

Senior Bond Insurer Obligations, the Trustee in its capacity as trustee for such Senior Bondholders and Bond Insurer with respect to the Senior Bond Insurer Obligations;

- (c) in the case of any Additional Senior Creditor, any agent or trustee (or equivalent) specified therein as the representative of such Additional Senior Creditors; provided, that such Person shall have acceded to the Intercreditor Agreement in such capacity, in accordance with the terms thereof on behalf of itself and all such Additional Senior Creditors;
- (d) the Hedge Provider party to such Secured Hedge Agreement (unless such Hedge Provider specifies another Person as its Secured Debt Representative by notice to the Applicable Collateral Agent);
- (e) in the case of the Subordinate Bondholders, the Trustee in its capacity as trustee for such Subordinate Bondholders; and
- (f) in the case of any Additional Subordinate Creditor, any agent or trustee (or equivalent) specified therein as the representative of such Additional Subordinate Creditors; provided, that such Person shall have acceded to the Intercreditor Agreement in such capacity, in accordance with the terms thereof on behalf of itself and all such Additional Subordinate Creditors.

**“Secured Hedge Agreement”** means any interest rate swap, floor, cap, collar, option, swaption, hedge, or any other similar agreement or arrangement or any combination of the foregoing (including any agreement or arrangement entered into under and pursuant to a master agreement or other similar arrangement) entered into by the Borrower.

**“Secured Obligations”** means, all obligations of Issuer or the Borrower now existing or hereafter arising under the Financing Documents, relating to and including the Senior Obligations and Subordinate Obligations. Secured Obligations shall exclude Bond Insurer Unsecured Obligations.

**“Secured Parties”** or **“Secured Party”** means, collectively or individually as the context requires, (a) the Collateral Agents, with respect to amounts owed to them by the Borrower under the Collateral Agency and Accounts Agreement, (b) the Trustee, for the benefit of the Indenture Secured Parties, from time to time and with respect to amounts payable to it as fees and expenses pursuant to the Indenture, (c) the Issuer, with respect to amounts payable to it pursuant to the Reserved Rights, (d) each Hedge Provider, (e) the Bondholders (f) each Bank Lender, (g) the Administrative Agent, (h) the Deposit Account Bank, (i) the Securities Intermediary, (j) the Intercreditor Agent, (k) the Bond Insurer with respect to the Senior Bond Insurer Obligations, (l) any Additional Senior Creditors, and (m) any Additional Subordinate Creditors.

**“Securities Act”** means the federal Securities Act of 1933, as amended.

**“Securities Depository”** means, while the Series 2022A Bonds are maintained in the Book-Entry System, DTC.

**“Securities Intermediary”** means The Bank of New York Mellon, as securities intermediary.

**“Security Deposit Facility LC Issuing Bank”** has the meaning ascribed to such term in Common Terms Agreement.

**“Security Deposit Facility Lender”** has the meaning ascribed to such term in Credit Agreement.

“**Security Deposit LC**” has the meaning ascribed to such term in Credit Agreement.

“**Security Deposit Loans**” has the meaning ascribed to such term in Credit Agreement.

“**Security Documents**” means, collectively, any agreement, document or instrument entered into or delivered by the Borrower that creates a Security Interest in favor of the Collateral Agents for the benefit of the Secured Parties (including, without limitation, the Senior Collateral Documents and the Subordinate Collateral Documents, the Account Control Agreement, the Issuer Assignment Agreements, and the Assignment of Project Documents).

“**Security Interest**” means: (a) a mortgage, deed of trust, pledge, lien charge, assignment, hypothecation, security interest, title retention arrangement, preferential right, trust arrangement or other arrangement having the same or equivalent commercial effect as a grant of security; or (b) any agreement to create or give any arrangement referred to in clause (a) of this definition.

“**Segregated Collateral**” means the Collateral held in each Segregated Pledged Account and any Senior Cash Collateral Account only for the benefit of the respective Secured Parties specified in the Collateral Agency and Accounts Agreement and the Collateral held in each Segregated Policy Payment Account only for the benefit of the Owners of Insured Bonds and the relevant Bond Insurer related to such Segregated Policy Payment Account, as specified in the Supplemental Indenture with respect to any such Insured Bonds.

“**Segregated Pledged Accounts**” means the Segregated Proceeds Pledged Accounts, the Segregated Reserve Pledged Accounts and the Surplus Remaining Revenue Account.

“**Segregated Policy Payments Account**” means the “Segregated Policy Payments Account” as defined with respect to any Insured Bonds in the Supplemental Indenture therefor.

“**Segregated Proceeds Pledged Accounts**” means the Bank Proceeds Sub-Account and the Series 2022A Bond Proceeds Sub-Account.

“**Segregated Reserve Pledged Accounts**” means the Ramp-Up Reserve Account, the Senior Debt Service Reserve Account and the Subordinate Debt Service Reserve Account.

“**Senior Bank Creditors**” means, collectively, the Administrative Agent, the Senior Collateral Agent (but solely as an agent of the Bank Finance Parties) and the Bank Finance Parties.

“**Senior Bank Financing Documents**” means the Common Terms Agreement, the Credit Agreement, the Series 2022A Bonds, the Bank Financing TDC Loan Agreements, the TDC Bank Debt Building Note, the Series 2022A Building Note, the Indenture (but only to the extent related to the Series 2022A Bonds), the Series 2022A Bond Purchase Agreement, the Bondholder’s Agreement, the Tax Certificate and the Senior Collateral Documents (but only to the extent related to Loan Facility, the Loan Facility Loans or any TDC Additional Loan from proceeds from the Loan Facility).

“**Senior Bank Obligations**” means (a) Senior Obligations owed to the Senior Bank Creditors and (b) the Obligations of the Borrower under the Bank Financing TDC Loan Agreements.

“**Senior Bond Fund**” has the meaning ascribed to such term in Section 4.02(a)(i) of the Master Indenture.

**“Senior Bond Insurer Obligations”** means, any amounts payable by the Issuer or the Borrower (whether directly or through the Trustee or the Senior Collateral Agent) to any Bond Insurer pursuant to the Senior Financing Documents, including, but not limited to, the Bond Insurer Premium, the Bond Insurer Reimbursement Amounts, the Bond Insurer Fees, any monetary claim under the Senior Financing Documents (including any subrogation rights with respect to any Senior Obligations), any monetary judgment in relation thereto, any monetary judgments arising from non-monetary claims under the Senior Financing Documents, and all other rights, remedies or claim against the Borrower, other than the Bond Insurer Unsecured Obligations. For the avoidance of doubt, Senior Bond Insurer Obligations shall exclude Bond Insurer Unsecured Obligations. The Senior Bond Insurer Obligations are Additional Senior Obligations, Senior Obligations, Senior Bond Obligations and Senior Secured Debt.

**“Senior Bond Obligations”** means, (a) Senior Obligations owed to the Senior Bondholders, (b) with respect to TDC Loan Agreements, or any Additional Obligations Loan Agreement Supplement entered into in connection with any Senior Bonds, all principal of, and interest, fees and expenses payable with respect to, such TDC Loan Agreement or any Additional Obligations Loan Agreement Supplement, but only to the extent such agreements evidence or provide for Indebtedness in respect of Senior Bonds and (c) the Senior Bond Insurer Obligations; it being understood that when calculating the aggregate amount of Senior Bond Obligations, such calculation shall be made without duplication of Bond Insurer Reimbursement Amounts and Senior Obligations to which Bond Insurer may have been subrogated or Senior Bonds that may have been issued to the Bond Insurer in connection with any payment made on the Bond Insurance Policy. Senior Bond Obligations shall exclude Bond Insurer Unsecured Obligations.

**“Senior Bond Par Amount”** means the principal amount of outstanding Current Interest Bonds constituting Senior Bonds (excluding the Series 2022A Bonds) plus the Accreted Value, as applicable, of outstanding Compounding Interest Bonds constituting Senior Bonds (excluding the Series 2022A Bonds).

**“Senior Bondholder”** means, at any time, the registered owner of any Senior Bond.

**“Senior Bonds”** means the Series 2022A Bonds and any Additional Bonds issued in compliance with the Indenture on parity with the Series 2022A Bonds, and that by the terms thereof are specifically superior with respect to payment of principal and interest thereon to Subordinate Bonds issued in the future.

**“Senior Cash Collateral Account”** has the meaning given in Section 5.4(c) of the Intercreditor Agreement.

**“Senior Collateral”** means all collateral in which a Security Interest is granted or intended to be granted in favor of the Senior Secured Parties (or any sub-agent or other Person acting for or on behalf of the Senior Secured Parties), for the benefit of the Senior Secured Parties, by the Issuer, the Borrower or the HoldCo under the Senior Collateral Documents.

**“Senior Collateral Agent”** means The Bank of New York Mellon, a banking corporation organized under the laws of the State of New York, in its capacity as collateral agent on behalf of the Senior Secured Parties, and its successors and assigns pursuant to the Collateral Agency and Accounts Agreement.

**“Senior Collateral Documents”** means the Collateral Agency and Accounts Agreement (but only to the extent it provides for Indebtedness or other obligations related to the Loan Facility or other Senior Obligations), Senior Security Agreement, the Senior Equity Pledge Agreement, the Leasehold Mortgages, the Assignments of Leases and Rents, the Account Control Agreement (to the extent it provides control of the applicable deposit or securities account to the Senior Collateral Agent), the Issuer Assignment Agreements, the Assignment of Project Documents, the Intercreditor Agreement, the Collateral Account Control Agreement and each other agreement, indenture, assignment, mortgage or other instrument that

creates or purports to create a Security Interest in favor of the Senior Collateral Agent for the benefit of the Senior Secured Parties.

**“Senior Debt Service Coverage Ratio”** or **“Senior DSCR”** means, for any DSCR Calculation Period, the ratio of A divided by B where:

A = the Free Cash Flow for such period; and

B = the DSCR Debt Service for such period with respect to the Senior Obligations, if any.

**“Senior Debt Service Reserve Account”** means the “Senior Debt Service Reserve Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Senior Debt Service Reserve Requirement”** means, on the Phase 2 End of Funding Date and on each Transfer Date thereafter, an amount equal to the Aggregate Debt Service with respect to all Outstanding Senior Obligations calculated for the twelve (12) month period after such date, net of any amounts (up to the Aggregate Debt Service with respect to the Outstanding Senior Obligations for the three (3) months after such date) then on deposit in the Ramp-Up Reserve Account.

**“Senior Equity Pledge Agreement”** means that certain Amended and Restated Senior Equity Pledge Agreement, dated as of the Closing Date, by and among the HoldCo, the Borrower, and the Senior Collateral Agent.

**“Senior Financing Documents”** means, the Indenture (but only to the extent the Indenture provides for Indebtedness in respect of the Series 2022A Bonds, or any other Senior Bonds issued under the Indenture), the Senior Bonds, the TDC Loan Agreements (to the extent issued in connection with loans made with proceeds from Senior Obligations), the 2022 TDC Building Notes, the 2022 TDC Project Notes, any Additional Note (to the extent issued in connection with loans made with proceeds from Senior Obligations), any other Additional Obligations Loan Agreement Supplement (but only to the extent entered into in connection with Senior Bonds or Senior Bond Insurer Obligations), the Credit Agreement, the Credit Agreement Bank Notes, the Common Terms Agreement, the Bond Purchase Agreement, the Series 2022A Bondholder Agreement, each Direct Agreement, each Additional Senior Financing Document, each Secured Hedge Agreement, the Senior Collateral Documents, the Letter of Representation, the Fee Letters, the Tax Certificate, any other agreement, document or instrument providing for or evidencing any Obligations owed to the Senior Secured Parties (in such capacity) and any other document or instrument executed or delivered at any time in connection with any of the Obligations owed to the Senior Secured Parties (in such capacity), including any other fee letters and any other intercreditor or accession agreement among holders of the Senior Obligations, to the extent such are effective at the relevant time, in each case as amended, restated, amended and restated, supplemented or otherwise modified or waived from time to time.

**“Senior Loan Interest Payment Sub-Account”** means the “Senior Loan Interest Payment Sub-Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Senior Loan Principal Payment Sub-Account”** means the “Senior Loan Principal Payment Sub-Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Senior Loans”** means the Senior Term Loans and the Security Deposit Loans.

**“Senior Obligations”** means all obligations of the Issuer or the Borrower of every nature outstanding under the Senior Financing Documents that constitute or relate to Senior Secured Debt (including erroneous payment subrogation rights under Section 9.10(b)(iii) of the Common Terms Agreement, principal, Ordinary Course Payments, Hedge Termination Payments, interest, fees, make-whole, breakage and other similar amounts (including any interest, fees, expenses, or make-whole accrued or accruing (or which would, absent the commencement of any Insolvency or Liquidation Proceeding of the Borrower, accrue) on or after commencement of any Insolvency or Liquidation Proceeding of the Borrower in accordance with the rate specified in the relevant Senior Financing Documents, whether or not the claim for such interest, fees, expenses, any make-whole or breakage is allowed or allowable as a claim in such Insolvency or Liquidation Proceeding) and any Senior Bond Obligations; provided, that for the avoidance of doubt, Senior Obligations shall not include any Subordinate Obligations (including any such Subordinate Obligations evidenced by or outstanding under any Senior Financing Document); provided, further, that “Senior Obligations” shall exclude Excluded Swap Obligations and Bond Insurer Unsecured Obligations.

**“Senior Obligations Payment Account”** means, the “Senior Obligations Payment Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Senior Secured Debt”** means all Indebtedness of the Issuer or the Borrower under the Senior Financing Documents that is intended to be secured by first priority liens on the Collateral. Senior Secured Debt shall exclude Bond Insurer Unsecured Obligations.

**“Senior Secured Debt Representative”** means with respect to any Class of Senior Secured Parties, the Secured Debt Representative of such Class of Senior Secured Parties.

**“Senior Secured Parties”** means (a) the Senior Collateral Agent, (b) the Trustee, in its capacity as Secured Debt Representative for the Indenture Secured Parties holding Senior Obligations, (c) the Senior Bondholders, (d) the Issuer, with respect to amounts payable to it pursuant to the Reserved Rights, (e) each Hedge Provider, (f) the Bank Lenders, (g) the Administrative Agent, (h) the Bond Insurer with respect to the Senior Bond Insurer Obligations, and (i) other holders of Senior Obligations from time to time (including their Secured Debt Representatives); provided, that, no Equity Member or any Affiliate of an Equity Member shall be a “Senior Secured Party” except to the extent permitted (or, if not addressed therein, not prohibited) under any other Senior Financing Document or any Subordinate Financing Document.

**“Senior Secured Party Unanimous Decision”** has the meaning given in Section 10.3(b)(i) of the Intercreditor Agreement.

**“Senior Security Agreement”** means the Senior Security Agreement, dated as of November 1, 2022, between the Borrower and the Senior Collateral Agent.

**“Senior Term Loan Commitments”** means, with respect to each Bank Lender, the commitment, if any, of such Bank Lender to make or otherwise fund Senior Term Loans to the Issuer, as such commitment may be (a) reduced from time to time pursuant to Section 2.07 of the Credit Agreement or Section 2.10 of the Credit Agreement and (b) reduced or increased from time to time pursuant to assignments by or to such Bank Lender pursuant to Section 8.04 of the Credit Agreement. The initial amount of each Term Loan Commitment of each Bank Lender is set forth on Schedule 2.01 of the Credit Agreement, or in the Assignment and Assumption (as defined in the Common Terms Agreement) pursuant to which such Bank Lender shall have assumed its Senior Term Loan Commitment, as applicable. The initial aggregate amount of the Senior Term Loan Commitments was \$3,009,000,000.

“**Senior Term Loans**” has the meaning ascribed to such term in Section 2.01(a) of the Credit Agreement.

“**Series**” or “**Series of Bonds**” means the original issuance thereof of each of the Series 2022A Bonds and any Additional Bonds thereafter authenticated and delivered therefor pursuant to the Indenture.

“**Series 2022 Bond Payment Account**” means the Series 2022 Senior Bond Payment Account created pursuant to Section 4.02(a) of the Master Indenture, including the Series 2022A Senior Bond Interest Payment Sub-Account, the Series 2022A Senior Bond Principal Payment Sub-Account, and the Series 2022A Senior Bond Redemption Payment Sub-Account.

“**Series 2022A Bond Building Loan**” has the meaning given in Section 3.1(a) of the TDC Building Loan Agreement.

“**Series 2022A Bond Building Proceeds Sub-Account**” means the “Series 2022A Bond Proceeds Sub-Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**Series 2022A Bond Documents**” means the Master Indenture, the First Supplemental Indenture, the Series 2022A Bond Purchase Agreement, the Series 2022A Bondholder Agreement and the Series 2022A Bonds.

“**Series 2022A Bond Proceeds Sub-Account**” means the “Series 2022A Bond Proceeds Sub-Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**Series 2022A Bond Project Loan**” has the meaning given in Section 3.1(a) of the TDC Project Loan Agreement.

“**Series 2022A Bond Project Proceeds Sub-Account**” means the “Series 2022A Bond Proceeds Sub-Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

“**Series 2022A Bond Purchase Agreement**” means, with respect to the Series 2022A Bonds, that certain Bond Purchase Agreement dated October 21, 2022, among the Issuer, the Borrower, the Initial Purchaser and the Purchaser.

“**Series 2022A Bondholder**” means “Owner”, as defined in the Bondholder’s Agreement.

“**Series 2022A Bonds**” means the New York Transportation Development Corporation Special Facilities Bonds, Senior Series 2022A (Tax-Exempt) (AMT) (JFK Airport Terminal 6-7 Redevelopment Project), issued from time to time in the aggregate principal amount of up to \$435,000,000 and, subject to any redemption thereof, Outstanding in the aggregate principal amount of all Drawings under the Series 2022A Bonds, and issued, executed, authenticated and delivered under the Indenture.

“**Series 2022A Building Note**” means the promissory note of the Borrower in the form attached to the TDC Building Loan Agreement as Exhibit C-1, evidencing a portion the indebtedness of the Borrower under the TDC Building Loan Agreement with respect to the Series 2022A Bonds.

“**Series 2022A Commitment End Date**” has the meaning ascribed to the term “Commitment End Date” in the Series 2022A Bond Purchase Agreement.

**“Series 2022A Project Note”** means the promissory note of the Borrower in the form attached to the TDC Project Loan Agreement as Exhibit A-1, evidencing a portion the indebtedness of the Borrower under the TDC Project Loan Agreement with respect to the Series 2022A Bonds.

**“Series 2022A Rebate Account”** means the “Series 2022A Rebate Account” established pursuant to Section 3.01 of the First Supplemental Indenture.

**“Series 2022A Senior Bond Interest Payment Sub-Account”** means the “Series 2022A Senior Bond Interest Account” established pursuant to Section 3.01 of the First Supplemental Indenture.

**“Series 2022A Senior Bond Par Amount”** means the principal amount of outstanding Current Interest Bonds constituting the Series 2022A Bonds.

**“Series 2022A Senior Bond Principal Payment Sub-Account”** means the “Series 2022A Senior Bond Principal Account” established pursuant to Section 3.01 of the First Supplemental Indenture.

**“Series 2022A Senior Bond Redemption Payment Sub-Account”** means the “Series 2022A Senior Bond Redemption Account” established pursuant to Section 3.01 of the First Supplemental Indenture.

**“Series 2024 Bond Building Loan”** has the meaning given in Section 3.1(a) of the First Building Loan Agreement Amendment.

**“Series 2024 Bond Building Proceeds Sub-Account”** means the “Series 2024 Bond Building Proceeds Sub-Account” within the Construction Account established and created in the name of the Borrower pursuant to Section 2.01(c) of the First CAAA Amendment.

**“Series 2024 Bond Loans”** means, collectively, the Series 2024 Bond Building Loan and the Series 2024 Bond Project Loan.

**“Series 2024 Bond Proceeds Sub-Account”** means the “Series 2024 Bond Proceeds Sub-Account” within the Construction Account established and created in the name of the Borrower pursuant to Section 2.01(b) of the First CAAA Amendment.

**“Series 2024 Bond Project Loan”** has the meaning given in Section 3.1 of the First Project Loan Agreement Amendment.

**“Series 2024 Bond Project Proceeds Sub-Account”** means the “Series 2024 Bond Project Proceeds Sub-Account” within the Construction Account established and created in the name of the Borrower pursuant to Section 2.01(d) of the First CAAA Amendment.

**“Series 2024 Bonds”** means collectively, the Series 2024A Bonds and the Series 2024B Bonds.

**“Series 2024 Bond Insurer”** means Assured Guaranty Inc., a Maryland domiciled financial guaranty insurance company, or any successor thereto or assignee thereof.

**“Series 2024 Building Note”** means the promissory note of the Borrower in the form attached to the First Building Loan Agreement Amendment as Exhibit B-1, evidencing a portion the indebtedness of the Borrower under the TDC Building Loan Agreement with respect to the Series 2024 Bonds.

**“Series 2024 Closing Date”** means November 5, 2024.

**“Series 2024 Financing Documents”** means, collectively, (a) the First CAAA Amendment, (b) First Amendments to TDC Loan Agreements, (c) the Series 2024 Notes, (d) the Second Supplemental Indenture, (e) the Series 2024 Bonds, (f) the First Amendments to Issuer Assignment Agreements and (g) the Tax Certificate delivered in respect of the Series 2024 Bonds.

**“Series 2024 Issuer Documents”** means, collectively, (a) the Collateral Agency and Accounts Agreement, (b) the Indenture, (c) the Tax Certificates, (d) the Loan Agreement, (e) the Series 2024 Bonds, (f) the First Amendments to Issuer Assignment Agreements, (g) the Leasehold Mortgages, (h) the Bond Purchase Agreement, and (i) the DTC Letter of Representation, but in each case, only as related to the Series 2024 Bonds.

**“Series 2024 Notes”** means, together, the Series 2024 Building Note and the Series 2024 Project Note.

**“Series 2024 Project Note”** means the promissory note of the Borrower in the form attached to the First Project Loan Agreement Amendment as Exhibit A-1, evidencing a portion the indebtedness of the Borrower under the TDC Project Loan Agreement with respect to the Series 2024 Bonds.

**“Series 2024 Rebate Accounts”** has the meaning ascribed to such term in Section 3.02(c) of the Second Supplemental Indenture.

**“Series 2024 TDC Resolution”** means that resolution adopted by the Issuer on October 1, 2024 authorizing the issuance of the Series 2024 Bonds and related matters.

**“Series 2024 Underwriters”** means Goldman Sachs & Co. LLC, as Bookrunning Senior Manager, and Siebert Williams Shank & Co. LLC, as Co-Senior Manager.

**“Series 2024A Balloon Indebtedness”** means the Series 2024A Bonds designated as Balloon Indebtedness in the Series 2024A Balloon Indebtedness Certificate delivered to the Senior Collateral Agent pursuant to the First Building Loan Agreement Amendment.

**“Series 2024A Bonds”** means the New York Transportation Development Corporation, Special Facilities Revenue Bonds, Senior Series 2024A, (Green Bonds) (AMT) (Current Interest Bonds) (JFK Airport Terminal 6 Redevelopment Project), issued in the aggregate principal amount of \$1,845,640,000. The Series 2024A Bonds are Additional Bonds, Senior Bonds, Additional Senior Obligations and Senior Secured Debt.

**“Series 2024A Rebate Account”** means the “Series 2024A Rebate Account” established pursuant to Section 3.01 of the Second Supplemental Indenture.

**“Series 2024A Senior Bond Interest Payment Sub-Account”** means the “Series 2024A Senior Bond Interest Account” established pursuant to Section 3.01 of the Second Supplemental Indenture.

**“Series 2024A Senior Bond Principal Payment Sub-Account”** means the “Series 2024A Senior Bond Principal Account” established pursuant to Section 3.01 of the Second Supplemental Indenture.

**“Series 2024A Senior Bond Redemption Payment Sub-Account”** means the “Series 2024A Senior Bond Redemption Account” established pursuant to Section 3.01 of the Second Supplemental Indenture.

“**Series 2024B Bonds**” means the New York Transportation Development Corporation, Special Facilities Revenue Bonds, Senior Series 2024B (AMT) (Convertible Capital Appreciation Bonds) (JFK Airport Terminal 6 Redevelopment Project), issued in the aggregate principal amount of \$99,997,768. The Series 2024B Bonds are Additional Bonds, Senior Bonds, Additional Senior Obligations and Senior Secured Debt.

“**Series 2024B Rebate Account**” means the “Series 2024B Rebate Account” established pursuant to Section 3.01 of the Second Supplemental Indenture.

“**Series 2024B Senior Bond Interest Payment Sub-Account**” means the “Series 2024B Senior Bond Interest Account” established pursuant to Section 3.01 of the Second Supplemental Indenture.

“**Series 2024B Senior Bond Principal Payment Sub-Account**” means the “Series 2024B Senior Bond Principal Account” established pursuant to Section 3.01 of the Second Supplemental Indenture.

“**Series 2024B Senior Bond Redemption Payment Sub-Account**” means the “Series 2024B Senior Bond Redemption Account” established pursuant to Section 3.01 of the Second Supplemental Indenture.

“**Shared Collateral**” means, at any time, Collateral in which the holders of two or more Classes of Secured Obligations (or their respective Agents) hold a valid and perfected security interest at such time. If more than two Classes of Secured Obligations are outstanding at any time and the holders of less than all Classes of Secured Obligations hold a valid and perfected security interest in any Collateral at such time, then such Collateral shall constitute Shared Collateral for those Classes of Secured Obligations that hold a valid and perfected security interest in such Collateral at such time and shall not constitute Collateral for any Class which does not have a valid and perfected security interest in such Collateral at such time.

“**Shortfall**” has the meaning given in Section 6.3(b)(iv) of the Intercreditor Agreement.

“**Shortfall Contribution Notice**” means a request for equity contribution to be delivered by the Securities Intermediary to the Sponsors, substantially in the form of Exhibit K-1 to the Collateral Agency and Accounts Agreement.

“**SIFMA Determination Date**” means Wednesday of each week or, if Wednesday is not a Business Day, the next succeeding Business Day.

“**SIFMA Index**” means for any day the SIFMA Municipal Swap Index (a weekly, high-grade market index comprised of seven (7) day tax exempt, variable rate demand notes produced by Municipal Market Data) rounded upward to the second decimal place in effect on each SIFMA Determination Date and effective on each Adjustment Date. If the SIFMA Index or a successor equivalent index is no longer calculated and published by Municipal Market Data in its current form, then the SIFMA Index shall be replaced by the Alternative Index. If at any time neither such index is available, the “SIFMA Index” means instead the most recently effective index that the Purchaser determines most closely approximates the SIFMA Index, and which is procedurally acceptable to the Calculation Agent. If the SIFMA Index shall be less than zero, such rate shall be deemed to be zero.

“**Sinking Fund Requirement**” means the principal amount of Bonds subject to mandatory redemption in accordance any Supplemental Indenture.

“**SOFR**” means, with respect to any Business Day, a rate per annum equal to the secured overnight financing rate for such Business Day published by the SOFR Administrator on the SOFR Administrator’s

Website on the immediately succeeding Business Day. No information available on or through such website shall be deemed to be part of or incorporated in this Official Statement.

“**SOFR Administrator**” means the Federal Reserve Bank of New York.

“**SOFR Administrator’s Website**” means the website of the Federal Reserve Bank of New York, currently at <http://www.newyorkfed.org>, or any successor source for the secured overnight financing rate identified as such by the SOFR Administrator from time to time. No information available on or through such website shall be deemed to be part of or incorporated in the Official Statement.

“**SOFR Interest Day**” has the meaning set forth in the defined term “Daily Simple SOFR” herein.

“**Special Record Date**” means a special date fixed by the Trustee to determine the names and addresses of Holders of the Bonds for purposes of paying interest on a special interest payment date for the payment of Defaulted Interest.

“**Sponsors**” means Corsair-Vantage Airport Fund Aggregator, L.P., ATI Javelin Holdings LP, RXR JFK MP Holdings Member LLC, and JetBlue Airways Corporation.

“**Standstill Period**” has the meaning given in Section 3.5(b)(iii) of the Intercreditor Agreement.

“**State**” means the State of New York.

“**Sublease**” has the meaning ascribed to such term in Appendix E hereto.

“**Sublessees**” has the meaning ascribed to such term in Appendix E hereto.

“**Subordinate Adequate Protection Payments**” has the meaning given in Section 6.3(b)(iv) of the Intercreditor Agreement.

“**Subordinate Bond Fund**” has the meaning ascribed to such term in Section 4.02(a)(ii) of the Master Indenture.

“**Subordinate Bond Par Amount**” means the principal amount of outstanding Current Interest Bonds constituting Subordinate Bonds plus the Accreted Value, as applicable, of outstanding Compounding Interest Bonds constituting Subordinate Bonds.

“**Subordinate Bondholder**” means, at any time, the registered owner of any Subordinate Bond.

“**Subordinate Bonds**” means any Additional Bonds issued in compliance with the Indenture that by the terms thereof are specifically subordinate and junior to the Senior Bonds, including the Series 2022A Bonds, with respect to payment of principal and interest thereon.

“**Subordinate Collateral**” means all collateral in which a Security Interest is granted or intended to be granted in favor of the Subordinate Collateral Agent, for the benefit of the Subordinate Secured Parties, by the Issuer, the Borrower, or HoldCo pursuant to the Subordinate Collateral Documents.

“**Subordinate Collateral Agent**” has the meaning ascribed to such term in Section 2.11(c) of the Collateral Agency and Accounts Agreement.

“**Subordinate Collateral Documents**” means the Collateral Agency and Accounts Agreement (but only to the extent it provides for Indebtedness or other obligations related to the Subordinate Obligations),

the Intercreditor Agreement, and each other agreement that creates or purports to create a Security Interest in favor of the Subordinate Collateral Agent for the benefit of the Subordinate Secured Parties.

**“Subordinate Concessions Revenue Rent”** has the meaning ascribed to such term in Appendix E hereto.

**“Subordinate Debt Service Reserve Account”** means the “Subordinate Debt Service Reserve Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Subordinate Debt Service Reserve Requirement”** means, on the Phase 2 End of Funding Date and on each Transfer Date thereafter, an amount specified in the Subordinate Financing Documents.

**“Subordinate Financing Documents”** means, the Subordinate Collateral Documents, the Indenture (but only to the extent the Indenture provides for Indebtedness in respect of Additional Bonds issued as Subordinate Bonds issued under the Indenture), any Subordinate Bonds, any Additional Obligations Loan Agreement Supplement entered into in connection with Subordinate Bonds, any Additional Note (to the extent issued in connection with loans made with proceeds from Subordinate Bonds), each Direct Agreement, each Additional Subordinate Financing Document, any other agreement, document or instrument providing for or evidencing any Obligations owed to the Subordinate Secured Parties (in such capacity) and any other document or instrument executed or delivered at any time in connection with any of Obligations owed to the Subordinate Secured Parties (in such capacity), including any other intercreditor or accession agreement among holders of the Subordinate Obligations, to the extent such are effective at the relevant time.

**“Subordinate Obligations”** means all obligations of the Issuer or the Borrower of every nature outstanding under the Subordinate Financing Documents that constitute or relate to Subordinate Secured Debt (including principal, interest, fees, make-whole, breakage and other similar amounts (including any interest, fees, expenses, or make-whole accrued or accruing (or which would, absent the commencement of any Insolvency or Liquidation Proceeding of the Borrower, accrue) on or after commencement of any Insolvency or Liquidation Proceeding of the Borrower in accordance with the rate specified in the relevant Subordinate Financing Documents, whether or not the claim for such interest, fees, expenses, any make-whole or breakage is allowed or allowable as a claim in such Insolvency or Liquidation Proceeding)); provided, that for the avoidance of doubt, Subordinate Obligations shall not include any Senior Obligations (including any such Senior Obligations evidenced by or outstanding under any Subordinate Financing Document).

**“Subordinate Obligations Payment Account”** means the “Subordinate Obligations Payment Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Subordinate Secured Debt”** means all Indebtedness of the Issuer or the Borrower under the Subordinate Financing Documents that is intended to be secured by liens on the Subordinate Collateral with a priority that is junior to the liens created for the benefit of the Senior Secured Parties, but senior to all other liens (other than Permitted Liens).

**“Subordinate Secured Debt Representative”** means the Trustee in its capacity as trustee for the Subordinate Bondholders.

**“Subordinate Secured Party”** means, at any time, the holder of any Subordinate Obligations (including its Secured Debt Representative) solely in its capacity as a holder of Subordinate Obligations;

provided, that no Affiliate of an Equity Member shall be a “Subordinate Secured Party” except to the extent permitted (or, if not addressed therein, not prohibited) under any other Senior Financing Document or any Subordinate Financing Document.

“**Subordinate Secured Party Unanimous Decision**” has the meaning given in Section 10.3(b)(ii) of the Intercreditor Agreement.

“**Subordinated Affiliate Obligations**” means any unsecured indebtedness or other unsecured obligations owed by the Borrower to the Pledgor, any Equity Member, any Sponsor, their respective Affiliates or any other direct or indirect holders of equity in the Borrower that are expressly subordinated in right of payment to the Secured Obligations (prior to Discharge of Senior Bank Obligations, in their entirety, in form and substance satisfactory to the Required Bank Finance Parties) and the source of repayment of which is solely limited to funds on deposit in the Remaining Revenue Account (as defined in Section 5.01(a)(xiv) of the Collateral Agency and Accounts Agreement).

“**Subsidiary**” means, with respect to any Person (the “parent”) at any date, any corporation, limited liability company, partnership, association or other entity the accounts of which would be consolidated with those of the parent in the parent’s consolidated financial statements if such financial statements were prepared in accordance with GAAP, as well as any other corporation, limited liability company, partnership, association or other entity (a) of which securities or other ownership interests representing more than 50% of the equity or more than 50% of the ordinary voting power or, in the case of a partnership, more than 50% of the general partnership interests are, as of such date, owned, Controlled or held, or (b) the management of which is, as of such date, otherwise Controlled, directly or indirectly, through one or more intermediaries, by such Person.

“**Substantial Completion Date**” means the date of Substantial Completion of the Project under, and as defined in, the Lease Agreement.

“**Substantial Completion of Phase 1**” has the meaning ascribed to such term in Appendix E hereto.

“**Substantial Completion of Phase 2**” has the meaning ascribed to such term in Appendix E hereto.

“**Substantial Completion of the Project**” has the meaning ascribed to such term in the Lease Agreement.

“**Supplemental Indenture**” means any indenture supplemental to or amendatory of the Indenture, executed and delivered by the Issuer and the Trustee in accordance with Article X of the Indenture.

“**Supplier**” has the meaning ascribed to such term in the Lease Agreement.

“**Supported QFC**” means any Permitted Hedge Agreement or other agreement or instrument that is a QFC for which the Financing Documents provide QFC Credit Support.

“**Surplus Remaining Revenue Account**” has the meaning ascribed to such term in Section 5.17(e) of the Collateral Agency and Accounts Agreement.

“**Surplus RRA Transfer Conditions**” has the meaning ascribed to such term in Section 5.17(e) of the Collateral Agency and Accounts Agreement.

**“Swap Obligation”** means, with respect to any guarantor, any obligation to pay or perform under any agreement, contract or transaction that constitutes a “swap” within the meaning of section 1a(47) of the Commodity Exchange Act.

**“Tax Certificate”** means with respect to any issuance of Bonds under the Indenture or incurrence of Senior Term Loans, (a) one or more certificates or agreements that sets forth the Issuer’s or the Borrower’s expectations regarding the investment and use of proceeds of any Series of Bonds and Senior Term Loans and other matters relating to Bond Counsel’s opinion regarding the federal and State income tax treatment of interest on such Bonds, including any instructions delivered by Bond Counsel in connection with any such certificate or agreement and any appendices, schedules and exhibits thereto; and (b) any amendment or modification of any such certificate or agreement that is accompanied by an opinion of Bond Counsel stating that the amendment or modification will not adversely affect the exclusion of interest on such Bonds from gross income for federal and State income tax purposes or the ability to refinance such Senior Term Loans with proceeds from Bonds or other Indebtedness which interests are excluded from gross income for federal and State income tax purposes.

**“Tax Covenant”** means the covenants of the Borrower pursuant to Sections 10.7 and 10.24 of the Collateral Agency and Accounts Agreement.

**“Tax-Exempt Bond Interest Payment Sub-Account”** means any “Tax-Exempt Bond Interest Payment Sub-Account” within the Senior Obligations Payment Account or the Subordinate Obligations Payment Account that is or may be established and created in the name of the Borrower pursuant to the Collateral Agency and Accounts Agreement for a Series of Bonds.

**“Tax-Exempt Bond Proceeds Sub-Account”** means the “Tax-Exempt Bond Proceeds Sub-Account” established and created in the name of the Borrower pursuant to Section 5.01(a) of the Collateral Agency and Accounts Agreement.

**“Tax-Exempt Bonds”** means Bonds issued pursuant to the Indenture, interest on which is exempt for federal income tax purposes.

**“Tax-Exempt Obligations”** means, collectively the Tax-Exempt Bonds and any additional Secured Obligations, interest on which is exempt for federal income tax purposes.

**“Taxable Bonds”** means Bonds issued pursuant to the Indenture, interest on which is not exempt for federal income tax purposes.

**“Taxable Date”** means the date on which interest on any Series 2022A Bonds is first includable in gross income of any Holder thereof (including, without limitation, the Purchaser) as a result of a Determination of Taxability.

**“Taxable Obligations”** means, collectively, the Taxable Bonds and the Senior Loans, interest on which is not exempt for federal income tax purposes.

**“Taxable Period”** means the period during which interest on any of the Series 2022A Bonds is includable in the gross income of any holder of such Bonds as a result of a Determination of Taxability beginning on the Taxable Date.

**“Taxable Rate”** means, for each day during a Taxable Period, the sum of (a) Daily Simple SOFR in effect on such day and (b) the product of (i) the Applicable Spread and (ii) the Taxable Rate Factor.

“**Taxable Rate Factor**” means, for each day that the Taxable Rate is determined, the quotient of (i) one divided by (ii) one minus the Maximum Federal Corporate Tax rate in effect for such day, rounded upward to the second decimal place.

“**Taxes**” means all present or future taxes, levies, imposts, duties, deductions, withholdings (including backup withholding), assessments, fees or other charges imposed by any Governmental Authority, including any interest, additions to tax or penalties thereto.

“**TDC Additional Loan**” means a loan made in connection with the issuance of Additional Obligations.

“**TDC Bank Debt Building Note**” means the promissory note of the Borrower in the form attached to the TDC Building Loan Agreement as Exhibit C-2, evidencing a portion the indebtedness of the Borrower under the TDC Building Loan Agreement with respect to the TDC Senior Term Loan Building Loan.

“**TDC Bank Debt Loans**” means the TDC Senior Term Loan Building Loan and the TDC Senior Term Loan Project Loan.

“**TDC Bank Debt Project Note**” means the promissory note of the Borrower in the form attached to the TDC Project Loan Agreement as Exhibit A-2, evidencing a portion the indebtedness of the Borrower under the TDC Project Loan Agreement with respect to the TDC Senior Term Loan Project Loan.

“**TDC Building Loan Agreement**” means that certain TDC Building Loan Agreement, dated as of November 1, 2022, between the Borrower and the Issuer.

“**TDC Loan Agreements**” means, collectively, the TDC Building Loan Agreement, the TDC Project Loan Agreement and each Additional Obligations Loan Agreement Supplement.

“**TDC Notes**” means the 2022 TDC Building Notes, the 2022 TDC Project Notes and any additional promissory notes of the Borrower evidencing the indebtedness of the Borrower under the TDC Building Loan Agreement or the TDC Project Loan Agreement.

“**TDC Project Loan Agreement**” means that certain TDC Project Loan Agreement, dated as of November 1, 2022, between the Borrower and the Issuer.

“**TDC Resolution**” means that resolution adopted by the Issuer on October 20, 2022.

“**TDC Security Deposit Project Loan**” has the meaning given in Section 3.1(c) of the TDC Project Loan Agreement.

“**TDC Security Deposit Project Note**” means the promissory note of the Borrower in the form attached to the TDC Project Loan Agreement as Exhibit A-3, evidencing a portion the indebtedness of the Borrower under the TDC Project Loan Agreement with respect to the TDC Security Deposit Project Loan.

“**TDC Senior Term Loan Building Loan**” has the meaning given in Section 3.1(b) of the TDC Building Loan Agreement.

“**TDC Senior Term Loan Project Loan**” has the meaning given in Section 3.1(b) of the TDC Project Loan Agreement.

“**TDC Series 2022A Bond Loans**” means the Series 2022A Bond Building Loan loaned pursuant to the TDC Building Loan Agreement and the Series 2022A Bond Project Loan loaned pursuant to the TDC Project Loan Agreement.

“**Technical Advisor**” means BTY Group, and its successors and assigns, or such other nationally-recognized independent engineering firm performing similar services (a) selected by the Borrower in compliance with the Financing Documents and (b) that has acknowledged that it is acting on behalf of the Collateral Agents.

“**Tenant Security Deposit Account**” has the meaning ascribed to such term in Section 5.09(a) of the Collateral Agency and Accounts Agreement.

“**Tender Indebtedness**” means any Bonds or portions of Bonds a feature of which is an obligation on the part of the Bondholders, under the terms of such Bonds, to tender all or a portion of such Bonds to the Borrower, the Trustee, the Paying Agent or other fiduciary or agent or Credit Provider or Liquidity Provider for payment or purchase and requiring that such Bonds or portions of Bonds be purchased if properly presented.

“**Term**” means the term of the Lease Agreement.

“**Terminal 6**” means the new Terminal 6 being constructed by the Borrower on the sites of the former Terminal 6 and current Terminal 7 at the Airport.

“**Terminal 7**” means Terminal 7 at the Airport.

“**Terminal Facilities**” means, collectively, the Existing Terminal Facilities and the New Terminal Facilities, and each individually, a “**Terminal Facility**.”

“**Termination Date**” means (a) with respect to the Financing Documents, the date when all obligations to be paid or performed by the Borrower, as applicable, thereunder have been indefeasibly paid and performed in full; or (b) with respect to the Lease Agreement, the date of expiration of the Term or if applicable, any early termination thereof.

“**Third Additional Rent**” has the meaning ascribed to such term in Appendix E hereto.

“**Total Debt Service Coverage Ratio**” or “**Total DSCR**” means, for any DSCR Calculation Period, the ratio of A divided by B where:

A = the Free Cash Flow for such period; and

B = the DSCR Debt Service for such period with respect to all Secured Obligations, if any.

“**Total Loss**” means a Casualty Event or Expropriation Event resulting in damage to, destruction or loss of all or substantially all of the Project.

“**Total Post-Enforcement Senior Secured Voting Value**” equals, on or following the Intercreditor Agent having instructed the Applicable Collateral Agent to take any Enforcement Action, Funded Bank Debt plus Aggregate Hedging Agreement Termination Values plus the principal amount outstanding of Additional Senior Obligations pursuant to the applicable Additional Senior Financing Documents.

**“Total Post-Enforcement Subordinate Secured Voting Value”** equals, on or following the Intercreditor Agent having instructed the Applicable Collateral Agent to take any Enforcement Action, the principal amount outstanding of the Additional Subordinate Obligations pursuant to the applicable Additional Subordinate Financing Document.

**“Total Pre-Enforcement Senior Secured Voting Value”** equals, prior to the Intercreditor Agent having instructed the Applicable Collateral Agent to take any Enforcement Action, the Aggregate Bank Debt Exposure plus the principal amount outstanding and available or committed value of the Additional Senior Obligations pursuant to the applicable Additional Senior Financing Document.

**“Total Pre-Enforcement Subordinate Secured Voting Value”** equals, prior to the Intercreditor Agent having instructed the Applicable Collateral Agent to take any Enforcement Action, the principal amount outstanding and available or committed value of the Additional Subordinate Obligations pursuant to the applicable Additional Subordinate Financing Document.

**“Traffic Advisor”** means Informa Princeton LLC.

**“Transaction Documents”** means the Financing Documents and the Material Project Documents.

**“Transfer Date”** means the first Business Day of each calendar month.

**“Treasury Rate”** means, as of any Redemption Date, the yield to maturity as of such Redemption Date of United States Treasury securities with a constant maturity (as compiled and published in the most recent Federal Reserve Statistical Release as H.15 (519) that has become publicly available at least two Business Days prior to the Redemption Date (excluding inflation indexed securities) (or, if such statistical release is no longer published, any publicly available source of similar market data)) most nearly equal to the period from the Redemption Date to the Maturity Date of a Series of Bonds to be redeemed; provided, however, that if the period from the Redemption Date to such Maturity Date is less than one year, the weekly average yield on actually traded United States Treasury securities to a constant maturity of one year will be used.

**“Treasury Regulations”** means the temporary, proposed or final federal income tax regulations promulgated by the U.S. Department of the Treasury, together with the other published written guidance thereof as applicable to the Bonds under the Code.

**“True-Up Drawing”** shall have the meaning ascribed to such term in the Series 2022A Bond Purchase Agreement.

**“Trust”** means (a) a common law trust established by the Purchaser or an Affiliate of the Purchaser under the laws of the State of New York, (b) a statutory trust established by the Purchaser or an Affiliate of the Purchaser under the Delaware statutory trust statute or (c) any other type of trust, including, without limitation, a custodial arrangement established by the Purchaser or any Affiliate, which, in any case, has an interest in any Series 2022A Bonds.

**“Trust Estate”** has the meaning set forth in the Master Indenture.

**“Trustee”** means The Bank of New York Mellon, a banking corporation organized and existing under the laws of the State of New York, as Trustee under the Indenture, and any successor pursuant to the terms of the Indenture.

“**Trustee Representative**” means any officer of the Trustee assigned to the corporate trust department or any other officer of the Trustee customarily performing functions similar to those performed by any such officer, with respect to matters related to the administration of the Indenture.

“**UCC**” means the Uniform Commercial Code as in effect in the applicable state or jurisdiction.

“**Underwriter**” means (i) any Person that agrees pursuant to a written contract with the Issuer (or with the lead underwriter to form an underwriting syndicate) to participate in an initial public sale of the Bonds, and (ii) any Person that agrees pursuant to a written contract directly or indirectly with a Person described in clause (i) hereof to participate in the initial public sale of the Bonds (including a member of a selling group or a party to a retail distribution agreement participating in the initial public sale of a Series of Bonds).

“**Unfunded Equity Commitment**” has the meaning ascribed to such term in the Equity Contribution Agreement.

“**Unilaterally Enforcing Senior Creditor**” has the meaning given in Section 7.2(a)(vi)(C) of the Intercreditor Agreement.

“**Unpaid Project Costs**” has the meaning ascribed to such term in Section 5.04(j) of the Collateral Agency and Accounts Agreement.

“**U.S. Government Securities Business Day**” means any day except for (a) a Saturday, (b) a Sunday or (c) a day on which the Securities Industry and Financial Markets Association recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in United States government securities.

“**Utility**” has the meaning ascribed to such term in Appendix E hereto.

“**Variable Rate Indebtedness**” means any Secured Obligations the interest rate on which is not, at the time in question, fixed to maturity, excluding any Commercial Paper.

“**Voting Certification**” has the meaning given in Section 8.4(b)(ii) of the Intercreditor Agreement.

“**Work**” has the meaning ascribed to such term in the Lease Agreement.

“**WSJ Prime**” means a per annum rate of interest equal to the Prime Rate, as published in the Wall Street Journal and as in effect from time to time. WSJ Prime is available as of the Series 2024 Closing Date at <https://www.wsj.com/market-data/bonds/moneyrates>. No information available on or through such website shall be deemed to be part of or incorporated in this Official Statement.

“**Yield**” means, with respect to an issue of Tax-Exempt Bonds, the discount rate that, when used in computing the present worth of all payments of principal and interest to be paid on the issue, computed on the basis of a 360-day year and semi-annual compounding, produces an amount equal to the “issue price” of the issue of Tax-Exempt Bonds, less the fees for any “qualified guarantees” as defined in Treasury Regulations § 1.148-4(f). Yield is computed on an issue by treating any fixed yield bond as redeemed at its stated redemption price on the optional redemption date that would produce the lowest Yield on the issue if that fixed yield bond either (a) is subject to optional redemption within five years of its issue date, or (b) bears interest at increasing interest rates (i.e., is a stepped coupon bond), or (c) has an issue price that exceeds its stated redemption price at maturity by more than one-fourth of one percent (.25%) multiplied by the product of the stated redemption price at maturity and the number of complete years to the first

optional redemption date for that bond. Yield is further computed on an issue by treating any bonds of the issue that are subject to mandatory early redemption as redeemed on their mandatory early redemption dates at their present value, rather than at their stated principal amount, if their stated principal amount exceeds their initial offering price by more than one-fourth of 1% multiplied by the product of their stated redemption price at maturity and the number of years to their weighted average maturity date.

October 10, 2024

Mr. Steve Thody, CEO  
JFK Millennium Partners, LLC  
295 Madison Avenue, Suite 1125  
New York, NY 10017

RE: New York Transportation Development Corporation Special Facilities Revenue Bonds, Senior Series 2024A and 2024B (JFK Airport Terminal 6 Redevelopment Project)

Dear Mr. Thody:

Ricondo & Associates, Inc. (Ricondo) is pleased to present this Report of the Airport Consultant (Report) for inclusion as Appendix B-1 to the Official Statement for the New York Transportation Development Corporation Special Facilities Revenue Bonds, Senior Series 2024A and 2024B (the Series 2024 Bonds), as defined herein and described in the Report. The Series 2024 Bonds will be issued pursuant to the Transportation Development Corporation (TDC) Master Bond Indenture of Trust (as amended and supplemented, the Indenture) between the New York Transportation Development Corporation (Issuer), a local development corporation formed under Section 1411 of the New York Not-for-Profit Corporation Law, and The Bank of New York Mellon, as trustee (Trustee).

The proceeds of the Series 2024 Bonds will be loaned to JFK Millennium Partners, LLC (JMP) pursuant to the TDC Building Loan Agreement (the Loan Agreement) and the TDC Project Loan Agreement (collectively, and each as amended and supplemented, the Loan Agreements), each between JMP and the Issuer. Proceeds from the Series 2024 Bonds are anticipated to be used to:

- (i) repay principal and associated accrued interest of a portion of the Loan Facility outstanding balance,
- (ii) pay charges, fees and mark to market payments related to settlement of certain interest rate hedge instruments associated with the portion of Loan Facility that is being repaid, and
- (iii) to pay certain costs of issuance related to the Series 2024 Bonds.

The Series 2024 Bonds will be secured as set forth in the Indenture and in the Collateral Agency and Accounts Agreement (as amended and supplemented, the CAAA) and will be payable from and secured by, in part, revenues generated by JMP via the operation of the Project (defined herein). Project revenues will consist primarily of terminal rentals and fees collected from the existing Terminal 7 airlines prior to its demolition and the airlines expected to operate in the new Terminal 6 and concession revenues that will be generated from the operation of Terminal 7 prior to its demolition and Terminal 6. Both Project Revenue sources are described in the Report.

JMP is a special purpose limited liability company wholly owned by JFK Millennium Partners Holdings, LLC, a special purpose limited liability company owned (directly or indirectly) by affiliates of Vantage Group, American Triple I Partners, LLC, RXR Realty, and JetBlue Airways Corporation. Through a Lease Agreement executed in 2022 between JMP and the Port Authority of New York and New Jersey (the Port Authority or

PANYNJ), JMP is responsible for:

- (i) The operation, maintenance, and demolition of the existing Terminal 7 and related infrastructure at John F. Kennedy International Airport (JFK or the Airport);
- (ii) the design, construction, financing, operation, and maintenance of Terminal 6, a new facility which is being built on the existing and currently vacant Terminal 6 site and the existing Terminal 7 site, and the operating and maintaining of Terminal 7 prior to its closure and demolition, as part of the Terminal 6 construction;
- (iii) the design and construction of a ground transportation center and certain off-premises facilities at the Airport on behalf of the Port Authority, which will not be operated or maintained by JMP and will not constitute part of the facilities leased to the JMP under the Lease Agreement.

Unless otherwise defined herein, all capitalized terms in the Report are used as defined in the Official Statement, including Appendix A “Definitions” thereto, the Indenture, or the Lease Agreement between JMP and the Port Authority.

The Report was prepared in accordance with the scope of Ricondo’s engagement with JMP and is subject to the terms of that engagement. Ricondo, its officers, staff, or agents do not make any representation or warranty as to the factual accuracy of the information provided to us by or on behalf of JMP, the Issuer, or their subcontractors or agents, upon which the Report is based. Any advice, opinions, or recommendations within this document should be read and relied upon only in the context of the Report as a whole. The contents of the Report do not provide legal, financial, insurance, or tax advice or opinions.

The Report presents the analyses undertaken by Ricondo to evaluate the ability of JMP to comply with the requirements of the Loan Agreement, the CAAA, and the Indenture on a *pro forma* basis for Fiscal Years (FY) ending December 31, 2024 through 2032 (the Projection Period) based on the assumptions regarding the planned issuance of the Series 2024 Bonds and the timely completion of the Project. In developing our analyses, Ricondo reviewed and verified certain projections and forecasts provided by JMP and its advisors, including activity forecasts developed by Airline Strategy & Marketing (ASM), a technical advisor on air traffic activity to JMP. Ricondo reviewed and verified ASM’s assessment of the ability of the area served by the Airport (the Air Trade Area) to generate demand for air service at the Airport, specifically at the existing Terminal 7 and the new Terminal 6; trends in air service and passenger activity in existing Terminal 7 and the new Terminal 6; and the financial performance of the existing Terminal 7 and the new Terminal 6 for the Projection Period. Information and assumptions used by Ricondo in the development of the analyses are described in the Report including references to the source of the material. The Report is organized as follows:

- Summary and Findings
- Chapter 1: JFK Millennium Partners, LLC, the Port Authority, and the Series 2024 Bonds
- Chapter 2: Airport Facilities, JFK Redevelopment Program, and Terminal 6 Redevelopment Project
- Chapter 3: Demographic and Economic Analysis

- Chapter 4: Passenger Demand and Air Service Analysis
- Chapter 5: Financial Analysis

On the basis of the analysis set forth in the Report, Ricondo is of the opinion that the Project Revenues generated each year of the Projection Period are expected to be sufficient to comply with the rate covenant established in the CAAA and the rate covenant in the Common Terms Agreement (CTA) while the existing Loan Facility is outstanding. Although summary information is provided, a complete understanding of the justification for our conclusion cannot be attained without reading the Report in its entirety.

Founded in 1989, Ricondo is a full-service aviation consulting firm providing physical and financial planning services to airport owners and operators, airlines, and federal and state agencies. Ricondo has prepared Reports of the Independent Airport Consultant in support of more than \$46 billion of airport-related revenue bonds from 1996. Ricondo is not registered as a municipal advisor under Section 15B of the Securities Exchange Act of 1934. Ricondo is not acting as a municipal advisor and has not been engaged by JMP to provide advice with respect to the structure, timing, terms, or other similar matters concerning the issuance of municipal securities. The assumptions regarding such matters included in the Report were provided by JMP or JMP's technical advisors, or were derived from general, publicly available data approved by JMP. Ricondo owes no fiduciary duty to JMP. Ricondo recommends that JMP discuss the information and analyses contained in the Report with internal and external advisors and experts that JMP deems appropriate before taking any action. Any opinions, assumptions, views, or information contained herein are not intended to be, and do not constitute, "advice" within the meaning of Section 15B of the Securities Exchange Act of 1934.

The techniques and methodologies used by Ricondo in preparing this Report are consistent with industry practices for similar studies in connection with airport revenue bond sales. While Ricondo believes that the approach and assumptions are reasonable, some assumptions regarding future trends and events discussed in the Report, including the implementation schedule, forecasts of passenger activity, and the projections of financial performance, may not materialize. Therefore, actual performance will likely differ from the forecasts and projections set forth in the Report and the variations may be material. In developing our analyses, Ricondo used information from various sources, including JMP, JMP's technical advisors, federal and local governmental agencies, and independent private providers of economic and aviation industry data, as identified in the notes accompanying the related tables and exhibits in the Report. Ricondo believes these sources to be reliable but has not audited the data and does not warrant their accuracy. The analyses presented are based on conditions known as of the date of this letter. Ricondo has no obligation to update this Report on an ongoing basis.

Sincerely,

RICONDO & ASSOCIATES, INC.

## SUMMARY AND FINDINGS

JFK Millennium Partners, LLC (JMP) commissioned Ricondo & Associates, Inc. (Ricondo) to prepare this Report of the Airport Consultant (Report) in conjunction with the issuance of the New York Transportation Development Corporation Special Facilities Revenue Bonds, Senior Series 2024A and 2024B (JFK Airport Terminal 6 Redevelopment Project) (collectively the Series 2024 Bonds)<sup>1</sup> to evaluate JMP's ability to generate Project Revenues sufficient to meet the obligations under the Collateral Agency and Accounts Agreement (as amended and supplemented, the CAAA) and the Common Terms Agreement (the CTA), including JMP's obligations with respect to the Series 2024 Bonds and the Loan Facility (described herein), including but not limited to the rate covenants included therein, on a pro forma basis.

The proceeds from the Series 2024 Bonds are part of the plan of finance for the development of Terminal 6 at John F. Kennedy International Airport (JFK or the Airport). In developing this analysis, Ricondo reviewed the purpose, cost, schedule, and expected financial projections of the JFK Terminal 6 Redevelopment Project (the Project)<sup>2</sup>, the terms of the CAAA and Indenture that govern the issuance of the Series 2024 Bonds, the terms of the Series 2024 Bonds and the terms of the Loan Facility, all as provided by JMP, and the ability of Terminal 6 to meet its leasing objectives and to accommodate demand.

To develop the *pro forma* analysis of JMP's financial performance, Ricondo reviewed the Lease Agreement between the Port Authority of New York and New Jersey (the Port Authority) and JMP (the Lease Agreement) that establishes the business arrangements between the Port Authority and JMP along with proposed airline rate setting methodologies and pro forma revenue projections provided by JMP. JMP is expected to generate Project Revenues primarily from the airlines serving Terminal 6 through various rentals for gates,<sup>3</sup> terminal space, and other spaces, Federal Inspection Services (FIS) facility fees; from fees and rents charged to concessionaires providing various goods and services to passengers within Terminal 6; from other users of Terminal 6; and from the operation of existing Terminal 7 until its demolition. These Project Revenues are, in large measure, driven by passenger demand for air service at the Airport, which is a function of global, national, and local economic conditions, the ability and willingness of the airlines to provide service at a level commensurate with this demand, and JMP's ability to fully use the gates at Terminal 6, and lease airline exclusive-use, concession and other rentable space.

The analysis presented in this Report is derived from a series of findings provided by JMP and its technical advisors. Ricondo has received, reviewed, and evaluated these assumptions in compiling this Report.

Ricondo reviewed the historical relationships between economic activity and demand for air service, the airlines' provision of air service at the Airport, the activity projections provided by Airline Strategy & Marketing (ASM), a technical advisor on air traffic activity to JMP, and the financial projections provided by JMP and its technical advisors.

---

<sup>1</sup> "Series 2024 bonds" will refer to the Senior Series 2024A and 2024B Bonds, collectively, throughout this Report unless otherwise noted.

<sup>2</sup> For purposes of this Report, the Project includes design, construction, and operation of Terminal 6 including contiguous aircraft ramp and apron areas, new contiguous frontage roads and supporting buildings, site utilities, and the operation and demolition of the Existing Terminal 7 facilities.

<sup>3</sup> Gate, also referred to as "contact gate," is an aircraft parking position with access to the terminal via a passenger loading bridge.

## KEY FINDINGS

The key findings of this Report, to be elaborated in subsequent sections, include the following:

### ***Economic and demographic base supports long-term air traffic demand***

- Projected economic variables indicate that the Air Trade Area (defined herein) will remain a destination that attracts both business travelers and tourists and that it will continue to benefit from increases in local outbound passenger volume. The Airport benefits from serving the largest population base in the country with high household and per capita personal income, and being located in a city that receives the most visitors of any US city,<sup>4</sup> and consistently ranks in the top 10 most visited cities globally.<sup>5</sup>

### ***The New York City Market and JFK drive demand for air service***

- The New York City air service market is one of the highest-ranking markets in the world, typically ranking first or second in the world and first in the United States in terms of total origin and destination (O&D) passengers. Airlines recognize the New York City market as an essential destination, and demand is expected to continue in the long-term. JFK is the largest international gateway airport in the United States (as measured by arriving international passengers) and the largest airport in the New York City market, with 42 percent of the market's total passengers in 2023. This strong demand for air service supports long-term activity and the potential to create a favorable position for airlines from a pricing perspective when assessing the reasonableness of airport costs.

### ***JFK Redevelopment Program provides necessary gates to accommodate demand, and choices for airlines***

- The overall JFK Redevelopment Program addresses the ability to serve long-term demand and improve efficiency and passenger experience Airport-wide. Ricondo estimated that 2019 flight schedules utilized 96 percent to 97 percent of gate capacity in 2019 and future schedules within the Projection Period (2024 through 2032) may have demand that exceeds the availability of existing gate capacity.
- The analysis indicated that demand for terminal facilities will remain strong even with the Airport-wide terminal redevelopment. The JFK Redevelopment Program will not create a substantially different number of gates; therefore, demand for gates, especially at peak periods, is anticipated to remain similar, even after the several terminal projects described herein are completed. Additionally, existing operations reach long-imposed FAA slot constraints in peak periods, limiting additional activity at these times.
- As terminal operators secure airline tenants for future terminal use, including JMP with Terminal 6, competitive offerings will play a part in airline selection and various factors will inform airline decision-making. Although some airline tenants at Terminal 6 are known and expected at this time, the precise mix of airline tenants that will use Terminal 6 is unknown. However, the diverse mix of airlines provides for a variety of combinations that may result in similar passenger volumes assumed in the financial analysis included in this Report.

### ***The Terminal 6 Redevelopment Project includes benefits to airlines and demonstrated market support***

- Airline charges at existing and new JFK terminals, including Terminal 6, are projected to be some of the highest airport charges in the country on a per enplaned passenger basis, but the higher charges are supported by the airlines serving JFK given its strategic importance in airline route networks.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

- In competing for specific airline tenants, the terminal operators at JFK must include offerings that are attractive to secure existing and new airlines. To compete effectively with other JFK terminal operators, JMP has strategically positioned Terminal 6 as a boutique terminal with differentiated services, amenities, benefits, and commercial and operational terms in subleases. JMP reports these terms have been positively received by (1) the airlines with whom JMP has negotiated non-binding letters of intent with term sheets outlining the terms and conditions of a sublease, including, Lufthansa AG and its affiliates (Austrian Airlines, Brussels Airlines, and Swiss International Air Lines) Cathay Pacific, Aer Lingus, and one additional long-haul foreign flag airline (the Expected Airlines), and (2) airlines JMP is actively engaged in discussions with about relocating to Terminal 6 (the Additional Targeted Airlines). In this Report, Expected Airlines and Additional Targeted Airlines are collectively referred to as the "Other Airlines."
- The strategic positioning of Terminal 6 includes the following major elements:
  - flexible airline sublease terms, with certain terms extending for 20-years
  - a single move for those airlines relocating from Terminal 7 to Terminal 6
  - an independent non-airline terminal operator with Vantage Group (Vantage), which has proven experience at New York airports (5-star Skytrax Terminal B at LGA and Terminal 7 at JFK)
  - a dedicated arrivals and departure Terminal 6 roadway, meaning that the roadway will not include traffic from the adjacent Terminal 5
  - shortest walk-times at JFK of 3 to 6 minutes from the TSA passenger security checkpoint to Terminal 6 gates
  - a seamless post-security connection between Terminal 6 and Terminal 5, creating efficient connections with JetBlue, with lower minimum connecting times than would be achieved from other JFK terminals, which will likely lead to additional revenues for airlines with connections to JetBlue
  - airline departure lounges with some providing direct access to board flights from the lounge
  - a dedicated FIS facility for arriving international passengers with the latest processing technology
  - an arrivals hall after exiting Terminal 6 FIS facility with direct access to two AirTrain stations and a centralized Ground Transportation Center (GTC)
  - arrivals lounge with amenities for passengers on long-haul flights (e.g., showers, food, and beverage)
  - shortest taxi-in and taxi-out times for most-used runway configurations at JFK
  - on-site aircraft parking positions and de-icing pads
- Increases in cost to airlines attributable to terminal charges may be partially offset by cost savings due to operational efficiencies or certainty of gate availability, depending on the specific airline sublease.
- Vantage has successfully managed significant and complex airport construction projects and operated several airports during their construction. Vantage was the lead developer, equity investor, and terminal manager (including construction management) of the LaGuardia Airport (LaGuardia or LGA) Terminal B Redevelopment, a project of similar scale and complexity which was recognized by several industry awards.
- The average projected revenues from the Expected Airlines are at or above the total airline averages assumed in the financial analysis on a per enplaned passenger basis.
- Given Terminal 6 will be independent (i.e., not airline managed), it will provide JMP the flexibility to adapt airline subleases to the needs of an airline tenant, such as, but not limited to, cost certainty, preferential access to gates, and lounge space, catering to airline priorities and structuring charges accordingly.

## JFK MILLENNIUM PARTNERS, LLC, THE PORT AUTHORITY, AND THE SERIES 2024 BONDS

JMP—indirectly owned by, or by affiliates of, Vantage, American Triple I Partners, LLC (ATI), RXR Realty, LLC (RXR), and JetBlue Airways Corporation (JetBlue) (together, the Sponsors)—was created as a special purpose company (JFK Millennium Partners, LLC) to design, build, finance, operate, and maintain the Project at the Airport under a lease arrangement with the Port Authority dated November 17, 2022.<sup>6</sup> Terminal 6 is being constructed as a new facility which is being built on the existing and currently vacant Terminal 6 site and the existing Terminal 7 site. JMP is also responsible for operating and maintaining Terminal 7 prior to its closure.

The organizational structure of the Project is shown in **Exhibit S-1**.

In 2022, JMP raised \$3.444 billion of senior secured credit facilities that included \$3.009 billion from a consortium of banks as part of a construction financing (the Senior Term Loans), and \$435 million through the Series 2022A floating rate bonds privately placed with the Royal Bank of Canada (the Series 2022A Bonds together with the Senior Term Loans and certain security deposit letter of credit obligations with respect to an \$8 million security deposit facility, the Loan Facility). The Series 2024 Bonds, which repay a portion of the Loan Facility outstanding balance, will be issued pursuant to the New York Transportation Development Corporation (TDC) Master Bond Indenture of Trust (Indenture) (as amended and supplemented) between the New York TDC (the Issuer), which will act as the conduit issuer for this transaction between the Trustee and JMP. JMP will borrow the proceeds from the Series 2024 Bonds and the remaining Loan Facility from the Issuer pursuant to the Loan Agreements. Project funds will be held and administered pursuant to the CAAA among JMP, the Trustee, the Senior Collateral Agent, the Subordinate Collateral Agent (if any) (together, the Collateral Agents), the Intercreditor Agent, the Issuer, the Administrative Agent with respect to the Loan Facility (the Administrative Agent), the Securities Intermediary, and the Deposit Account Bank.

JMP anticipates that, upon the issuance of the Series 2024 Bonds, approximately \$985 million of the existing Loan Facility will remain outstanding.

JMP's obligations with respect to the Loan Facility and the Series 2024 Bonds will be secured on a parity basis as Senior Obligations.

Proceeds from the Series 2024 Bonds are anticipated to be borrowed from TDC by JMP and used to:

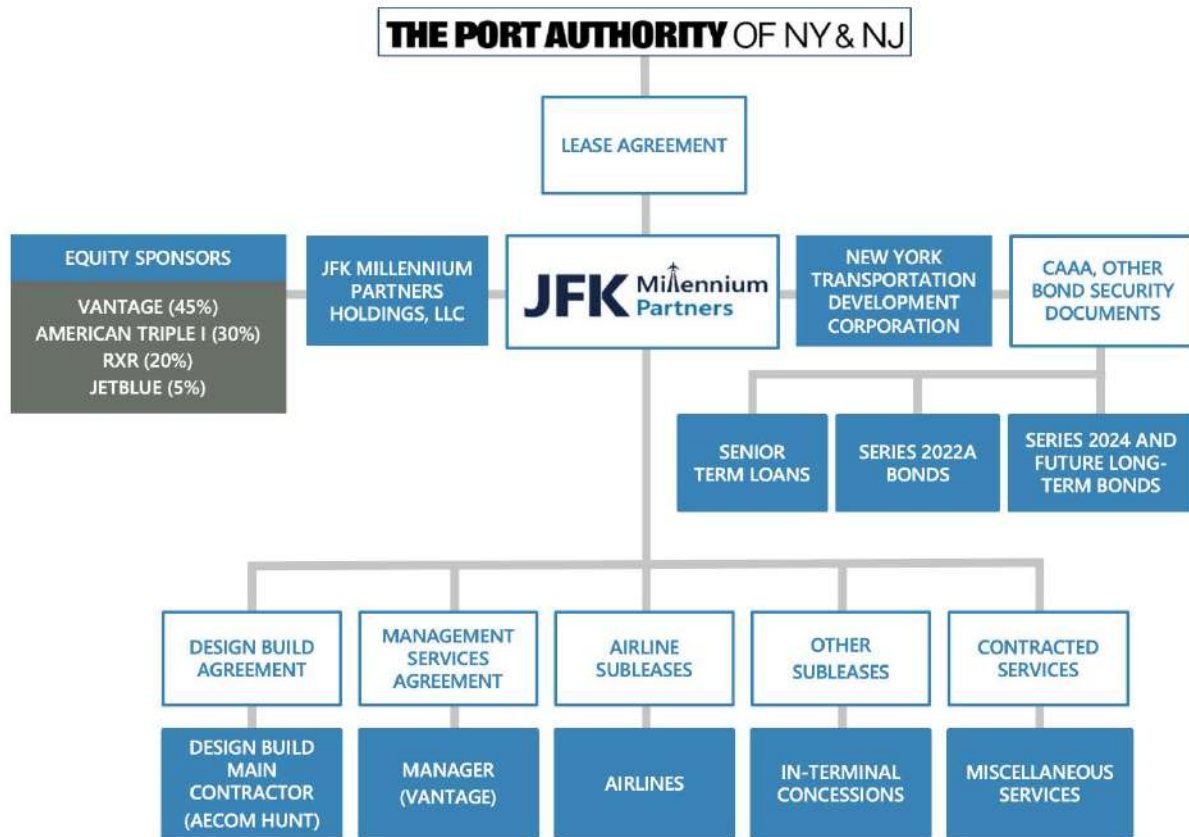

- (i) repay principal and associated accrued interest of a portion of the Loan Facility outstanding balance,
- (ii) pay charges, fees, and mark-to-market payments related to settlement of certain interest rate hedge instruments associated with the portion of Loan Facility that is being redeemed, and
- (iii) to pay certain costs of issuance related to the Series 2024 Bonds.

A portion of the proceeds from the Series 2024 Bonds available for Project costs will be eligible for "green" projects as designated by Kestrel, an Approved Verifier accredited by the Climate Bonds Initiative (CBI).

---

<sup>6</sup> JFK Millennium Partners Holdings LLC (JMP HoldCo) was formed in August 2022 for the sole purpose of owning the membership interests in JMP to facilitate the financing of the Project.

EXHIBIT S-1 ORGANIZATIONAL STRUCTURE OF THE PROJECT

SOURCE: JFK Millennium Partners, LLC, October 2024.

## JFK AIRPORT

The Airport is a large-hub<sup>7</sup> commercial service airport serving New York City (the City) and the surrounding region. Its primary facilities consist of the airfield, terminal area, maintenance/airport support areas, and parking areas. The airfield consists of four runways; the terminal area includes five operating passenger Terminals 1, 4, 5, 7, and 8 connected via JFK's AirTrain system and collectively provide a total of 120 aircraft gates.<sup>8</sup>

## TERMINAL REDEVELOPMENT

The Airport is currently undergoing the JFK Redevelopment Program, an extensive redevelopment program in an effort to provide capacity for expected ongoing growth in demand, and to improve customer experience, customer service, and operational efficiency. This redevelopment program includes the Project in addition to other terminal redevelopment and ground transportation projects, which together will allow for connected terminals, an increase in terminal and gate capacity and efficiency, better roadway access, modern amenities, more efficient taxiways, and updated security features.<sup>9</sup>

The JFK Redevelopment Program includes all terminals at JFK which will result in expanded or new terminal facilities and will involve the movement and expansion of airline service operations. **Exhibit S-2** presents the progression of the JFK terminal complex redevelopment since 2019 through the completion of ongoing projects. Completed and ongoing JFK Redevelopment Program terminal projects include the following:

- **Terminal 1:** The original terminal was built and is currently being operated by Terminal One Group Association (TOGA), L.P., a consortium of international airlines. The Terminal 1 redevelopment, branded the "New Terminal One (NTO)" project is being built and will be operated by JFK NTO, LLC.<sup>10</sup> The NTO footprint will encompass the former Terminal 2 and Terminal 3 sites, a portion of the Terminal 4 site, the Green garage site, and the existing Terminal 1 site. NTO will be delivered in phases—the first, NTO Phase A is scheduled to open in June 2026 with subsequent phases subject to certain activity triggers described later in this Report. The NTO, including all 23 gates, could be completed by the end of 2029 if Phase B1 commences following Phase A, and Phase B2 commences following the completion of Phase B1. Additional information about the NTO project and associated triggers are included in **Section 2.2**.
- **Terminal 4:** The terminal opened in 2001 and is operated by JFK International Air Terminal (JFKIAT), a consortium comprised of Delta Air Lines and Schiphol USA Inc., a US affiliate of Amsterdam-based Royal Schiphol Group. Terminal 4 completed its \$1.5 billion expansion in 2023 adding five net new gates, coinciding with Delta relocating all its Terminal 2 (10 gates) operations to Terminal 4.
- **Terminal 5:** The existing terminal was funded by the Port Authority and built by JetBlue which operates the terminal under a lease. There will be a direct, post-security seamless connection between Terminal 5 and new Terminal 6.

---

<sup>7</sup> As defined by the FAA, a large-hub airport enplanes one percent or more of enplaned passengers nationwide during a calendar year. In 2023, one percent equaled approximately 9.4 million enplaned passengers.

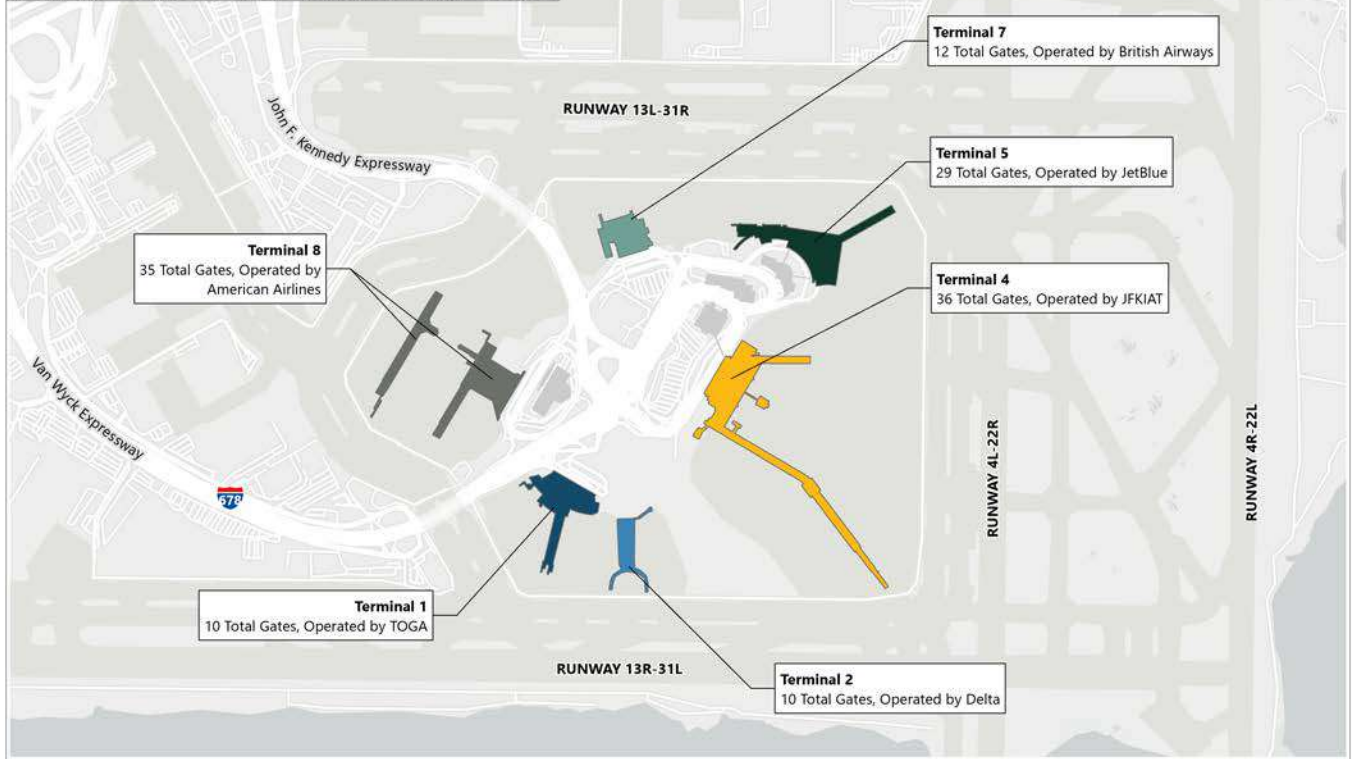

<sup>8</sup> See **Table S-3** for details about gates. Airport gates control terminal access to passenger aircraft. A narrowbody gate can accommodate an aircraft that has passenger seats arranged around a single aisle such as a Boeing 737 or Airbus A320 models, while a widebody gate can accommodate aircraft with passenger seating arranged around multiple aisles such as Boeing 787 or Boeing 777 models. Gate counts for the same terminal facility may vary due to parking positions and configurations. In certain conditions, a single widebody gate may accommodate multiple smaller aircraft.

<sup>9</sup> Direct interterminal connectivity without exiting security is a feature exclusive to Terminals 6 and 5.

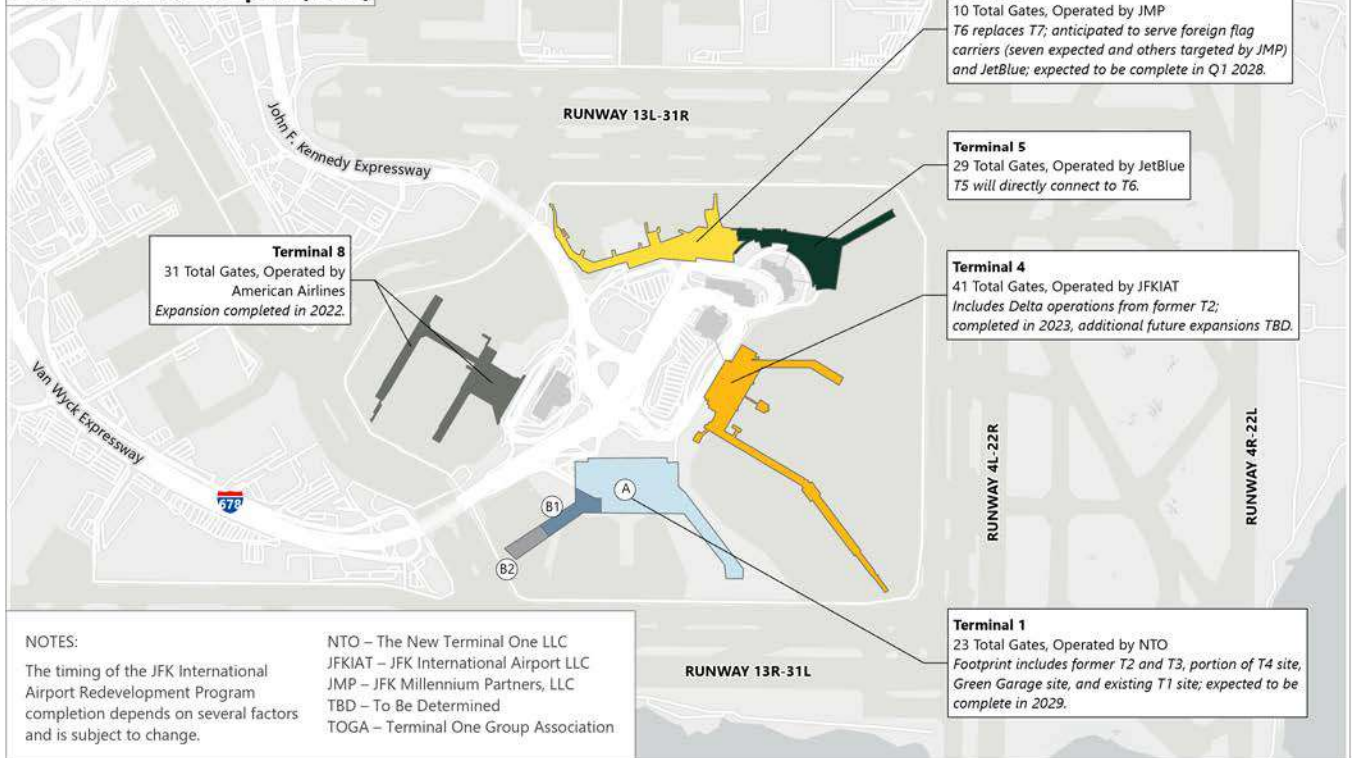

<sup>10</sup> Unlike Terminal One Group Association, JFK NTO, LLC is a non-airline entity.

Kennedy (JFK) International Airport Redevelopment Program at JFK International Airport," May 24, 2016; "Written Re-Evaluation and Record of Decision for the Final Environmental Assessment Prepared for the John F. Kennedy (JFK) International Airport Redevelopment Program at JFK International Airport," May 31, 2022; Terminal layout interpretations by Ricardo & Associates, Inc.

**EXHIBIT S-2**

**JFK TERMINAL COMPLEX REDEVELOPMENT**

- **Terminal 6:** Terminal 6 is being built and will be operated by JMP and will replace Terminal 7. Terminal 5 and Terminal 6 will have a post-security seamless connection, and the Terminal 6 Redevelopment Project will include 10 gates (9 widebody and 1 narrowbody), replacing the 12 Terminal 7 gates<sup>11</sup>. The terminal can accommodate up to 13 aircraft because three of the nine widebody gates are Multiple Apron Ramp System (MARS) capable gates, each of which can accommodate two narrowbody aircraft in lieu of one widebody aircraft. JetBlue has agreed through its sublease to preferentially lease a narrowbody gate in Terminal 6 and use the FIS facility in Terminal 6. As of the date of this Report, JMP has negotiated non-binding letters of intent with term sheets outlining the terms and conditions for a sublease with each of the seven Expected Airlines to operate in Terminal 6 in addition to JetBlue. These Expected Airlines, along with the Additional Targeted Airlines, will operate from the nine widebody gates.

Construction began in the fourth quarter of 2022. Phase 1 of the Terminal 6 redevelopment is anticipated to be completed by the first quarter of 2026 and will provide five gates. Phase 2 includes demolition of Terminal 7 and completion of five additional Terminal 6 gates and is currently expected to start in 2026 and be completed by the first quarter of 2028. Airlines will cease operations in Terminal 7 upon completion of Phase 1 of Terminal 6 and will relocate to Terminal 6 or other JFK terminals. **Exhibit S-3** shows the site layout of Terminal 6 (highlighted in blue).

**Table S-1** sets forth the current, as of October 2024, sources and uses of funds for the Terminal 6 Redevelopment Project, including the proceeds of the Series 2024 Bonds.

Additional information on JMP, the Port Authority, the Loan Facility, and the Series 2024 Bonds is provided in **Chapter 1** and **Chapter 2** of this Report.

- **Terminal 8:** The terminal was built and is operated by American Airlines and was expanded in 2022, adding 130,000 square feet of space, five new widebody gates, some of which were converted from existing narrowbody gates, four new widebody parking positions, and an improved baggage handling system. Following the redevelopment and the completion of the Terminal 8 expansion plan, British Airways and American Airlines co-located their operations in the renovated terminal.

**Table S-2** presents the terminal operators and hub airlines at those terminals, where applicable. At JFK, American, Delta, and JetBlue operate hubs, with each airline scheduling 90 or more scheduled average daily departures to at least 50 different destinations. The number and size of available gates at the JFK terminals will change as part of the redevelopment. **Table S-3** presents the estimated gates by terminal in 2019, 2024, and in the future following the completion of ongoing terminal projects. The net change between 2019 and the end of the JFK Redevelopment at the Airport is expected to result in just two additional gates; and, consequently, gates should remain in demand.

Ricondo conducted an analysis of flight schedules with consideration of future gates in the planned JFK Redevelopment Program. The analysis evaluated the availability of gates and linear feet of terminal frontage<sup>12</sup> relative to existing airline flight schedules (prior to the impact of the COVID-19 pandemic) and estimated future flight schedules. The analysis confirmed that the terminal redevelopment projects are necessary to accommodate 2019 and estimated future flight schedules. Ricondo estimated 2019 flight schedules utilized 96 percent to 97 percent of existing gate capacity and future schedules within the Projection Period (2024 through 2032) may have demand that exceeds the availability of existing gate capacity. The analysis indicated that demand for terminal facilities will remain strong even with the Airport-wide terminal development.

---

<sup>11</sup> Prior to the commencement of Terminal 6 construction, Terminal 7 included 12 gates (6 widebody and 6 narrowbody). At the time of this Report, there are a total of 9 gates at Terminal 7 (5 widebody and 4 narrowbody).

<sup>12</sup> Terminal frontage takes into account the potential for adapting gates based on the aircraft fleet demand.

EXHIBIT S-3 TERMINAL 6 SITE LAYOUT

Terminal 8				

NOTES:

Hub Airline indicates an airline that has a concentration of activity at the terminal and represents a material portion or majority of passenger activity at the terminal. Terminal 1 is operated by Terminal One Group Association (TOGA), L.P., a consortium of international airlines that consists of Air France, Korean Air, and Lufthansa as current partner airlines. As of October 2024, 27 airlines operate from Terminal 1. New Terminal One has previously disclosed they have secured commitments from Air France, Etihad Airways, KLM Royal Dutch Airlines, Korean Air, LOT Polish Airlines, EVA Air, Air Serbia, Scandinavian Airlines, and Neos.

As of the date of this Report, JMP has negotiated letters of intent with term sheets outlining the terms and conditions for a sublease with seven Expected Airlines including Aer Lingus, Cathay Pacific, Lufthansa AG (including its affiliates Austrian Airlines, Brussels Airlines and Swiss International Air Lines), and one additional long-haul foreign flag airline."

NOTES:

Gate counts may vary due to parking positions. In certain conditions, a single widebody gate may accommodate multiple smaller aircraft.

1 Future gates represent the estimated gates for ongoing capital programs, as described in this Report.

2 New Terminal One will be delivered in phases; Phase A, Phase B1, and Phase B2, Total includes all three phases allowed in the NTO lease and assumes triggers are met.

3 Does not include a potential second phase of Concourse A expansion (first phase completed in 2023).

## HISTORICAL AND FORECAST AIR TRAFFIC

### AIR SERVICE DEMAND DRIVERS

The demand for air transportation at an airport is, to a large degree, dependent upon the demographic and economic characteristics of its surrounding geographical area. This relationship is particularly strong for origin and destination (O&D) passenger traffic, which has historically accounted for the largest portion of airline traffic demand at the Airport—approximately 80 percent in 2023.<sup>13</sup> Therefore, the major portion of demand for air travel at the Airport is influenced more by the local socioeconomic characteristics of the Airport’s Air Trade Area<sup>14</sup> than by individual airline decisions regarding service patterns in support of connecting activity.

The Airport benefits from a large and diverse local economic base that supports business and leisure travel. The Airport serves the largest population base in the country with high household and per capita personal income. From 2012 to 2022, the Air Trade Area gross regional product (GRP) averaged approximately 9.0 percent of the annual US GDP.<sup>15</sup> In 2023, New York City was ranked the wealthiest city in the world, with the City’s cumulative wealth of more than \$3 trillion.<sup>16</sup> The City receives the most visitors of any US city<sup>17</sup> and consistently ranks in the top 10 cities with the highest visitation globally.<sup>18</sup> Projected economic variables indicate that the Air Trade Area will remain a destination that attracts both business travelers and tourists, positively affecting the demand for future inbound airline travel. Projected Air Trade Area economic variables further support the continued increase in numbers of local outbound passengers.

**Table S-4** presents selected 2022 and 2032 economic data for the Air Trade Area and the United States, as projected by Woods & Poole Economics, Inc. Ricondo considered these factors when evaluating the activity forecast for the Airport.

The New York City market was ranked second in the world and first in the United States in 2023 in terms of total O&D passengers, as presented in **Table S-5** and **Table S-6**. JFK is the largest airport serving the Air Trade Area, with 42 percent of total passengers in 2023, followed by Newark Liberty International Airport (EWR) with 33 percent and LaGuardia Airport (LGA) with 22 percent. Three smaller airports, Westchester County Airport (HPN), Long Island MacArthur Airport (ISP), and New York Stewart International Airport accounted for approximately 3 percent of the Air Trade Area passengers in 2023. JFK is the largest international gateway airport in the US, serving more international passengers than any other airport and represented 68.1 percent of the international passengers at Air Trade Area airports in 2023. In 2024, 8 US airlines and 65 foreign flag airlines are scheduled to provide nonstop service to 74 domestic destinations and 123 international destinations, as seen in **Section 4.4**.

---

<sup>13</sup> US Department of Transportation T-100 database and O&D Survey, 2023.

<sup>14</sup> As defined in **Chapter 3**, an air trade area is the geographical area served by an airport. John F. Kennedy’s International Airport’s Air Trade Area consists of the New York-Newark-Jersey City, NY-NJ-PA Metropolitan Statistical Area and the Bridgeport-Stamford-Norwalk, CT Metropolitan Statistical Area; for further information, please refer to **Section 3.1** of this Report.

APPROACH TO JFK AND TERMINAL 6 FORECAST

A forecast of passengers and aircraft operations for JFK and specifically for Terminal 6 were prepared by ASM and reviewed by Ricondo. Ricondo has reviewed and validated the activity forecasts prepared by ASM through the Projection Period for purposes of the financial analysis included in this Report. In this process, Ricondo developed an independent forecast for JFK including a similar approach to ASM with detailed buildup of activity in the near-term and socioeconomic driven results thereafter. ASM and Ricondo’s forecasts of total JFK and Terminal 6 enplaned passengers are similar in trajectory and volume. **Table S-7** presents the Ricondo and ASM baseline JFK forecast total passengers and Terminal 6 forecast enplaned passengers in 2025 through 2032.

TABLE S-7 RICONDO AND ASM JFK AND TERMINAL 6 TOTAL PASSENGER FORECAST

YEAR	JFK TOTAL PASSENGER			TERMINAL 6 ENPLANED PASSENGERS		
	RICONDO FORECAST	ASM BASELINE FORECAST	ASM H/(L) THAN RICONDO	RICONDO FORECAST	ASM BASELINE FORECAST	ASM H/(L) THAN RICONDO
2025	64,420,000	65,610,000	1.8%	3,902,000	3,970,000	1.7%
2026	64,966,000	67,640,000	4.1%	3,936,000	4,019,000	2.1%

## FINANCIAL ANALYSIS

JMP provided Ricondo with projected financial results through the term of the Lease Agreement. These projections, as shown in **Table S-8**, include Terminal 6 Project Revenues, including concession and other non-airline revenues, airline revenues; expenses such as operating and maintenance (O&M) expenses, payments to the Port pursuant to the Lease Agreement, asset repair and replacement costs; debt service for existing and future Senior Obligations, and the resulting debt service coverage.

The Debt Service Coverage Ratios (DSCRs) for the anticipated Senior Obligations, including the Series 2024 Bonds and the anticipated Series 2028 Bonds, are projected to meet the minimum requirements of the Total DSCR of 1.25x and Senior DSCR of 1.30x through the Ramp-up Period (projected to be FY 2028 to FY 2031) and a Total DSCR of 1.15x and Senior DSCR of 1.20x through the remainder of the Projection Period. The minimum DSCR within the Projection Period is projected to be 1.53x in 2028 and 1.51x during the remaining lease period. Ricondo reviewed, with the support of its subconsultant Infrastructure Advisors, LLC, JMP's projected cashflows and debt service coverage results through the Projection Period and assessed the reasonableness of the revenues.

Ricondo also assessed the reasonableness of airline revenues and finds the projected charges to airlines (on a per enplanement basis) reasonable through the Projection Period when taking into account the air service market and capacity constraints at other Air Trade Area airports and JFK terminals. Additional information on the financial projections and analysis is included in **Chapter 5** and **Appendix A** of this Report.

SOURCE: JFK Millennium Partners, LLC, October 2024.

# 1. JFK MILLENNIUM PARTNERS, LLC, THE PORT AUTHORITY, AND THE SERIES 2024 BONDS

In 2017, A *Vision Plan for John F. Kennedy International Airport (Vision Plan)* was prepared by an Airport Advisory Panel as a report for the Governor of New York.<sup>19</sup> The Vision Plan provided recommendations for infrastructure development at the airports operated by the Port Authority of New York and New Jersey (Port Authority), including the need to maximize private sector investments in modernizing the terminals at JFK. As part of this plan, JetBlue Airways Corporation (JetBlue), which held the development rights for Terminal 6, ran a competitive tender process in July 2017 to select a development partner to redevelop the Terminal 6 site. A consortium of Vantage Group (Vantage) and RXR Realty, LLC (RXR) was selected as JetBlue's development partner in March 2018. American Triple I Partners, LLC (ATI) was later added as a Minority-Owned Business Enterprise (MBE) Equity Investor in September 2019.

## 1.1 JFK MILLENNIUM PARTNERS, LLC (JMP)

JFK Millennium Partners, LLC, (JMP) is indirectly owned by, or by affiliates of, Vantage, RXR, ATI, and JetBlue. Collectively, and through their sponsors, JMP has extensive experience in the development, financing, and long-term asset management of airports and public-private partnership (P3) infrastructure in the United States, Canada, and outside of North America.

JMP was created as a special purpose company to design, build, finance, operate, and maintain Terminal 6 (the Terminal 6 Development Project, or the Project)<sup>20</sup> at John F. Kennedy International Airport (the Airport or JFK) under a lease arrangement with the Port Authority. Terminal 6 is being constructed as a new facility which is being built on the existing and currently vacant Terminal 6 site and the existing Terminal 7 site. JMP is also responsible for operating and maintaining Terminal 7 prior to its closure which is a part of the Terminal 6 construction.

In August 2021, the Port Authority approved the key terms of a lease agreement with JMP (JMP Lease or Lease Agreement) for the Project. On November 17, 2022, JMP entered into the Lease Agreement which runs through December 30, 2060, to construct and operate Terminal 6, among other responsibilities described herein. JMP is wholly owned by JFK Millennium Partners Holdings, LLC (JMP HoldCo). JMP HoldCo is owned directly or by affiliates of:

- Vantage (45 percent)
- ATI (30 percent)
- RXR (20 percent)
- JetBlue (5 percent)

---

<sup>19</sup> "A Vision Plan for John F. Kennedy International Airport" (New York City, NY: Airport Advisory Panel, 2017).

<sup>20</sup> For purposes of this Report, the Project includes design, construction, and operation of Terminal 6 including contiguous aircraft ramp and apron areas, new contiguous frontage roads and supporting buildings, site utilities, and the operation and demolition of the Existing Terminal 7 facilities.

### 1.1.1 VANTAGE GROUP (VANTAGE)

Vantage is a leading investor, developer, and manager of airports and terminals. Throughout their 30+ year history, Vantage has provided project delivery, terminal operations, and investor services to more than 30 airports globally. Vantage is a wholly owned strategic platform of Investcorp Corsair Infrastructure Partners for capital deployment in the airport and transportation sectors.

In 2023, Vantage's airports served over 80 million passengers, traveling on 160 different airlines to 265 global destinations. As part of integrated design-build-operate teams, Vantage has completed approximately \$7.2 billion in capital projects with another approximately \$4.2 billion underway.<sup>21</sup>

Vantage has successfully managed significant and complex airport construction projects in different environments and operated several airports during their construction, including construction coordination, operational readiness and transition, and transitions from existing terminals to new terminals. In addition to leading transitions for terminals in Nassau, Larnaka, Pafos and Santiago; Vantage was the lead developer, equity investor, and terminal manager (including construction management) of the LaGuardia Airport (LaGuardia or LGA) Terminal B Redevelopment project. This Terminal B project, also under a long-term lease agreement with the Port Authority, was substantially completed in 2022, has similarities in scale and complexities to the Project at JFK, and is also located in the NYC market, and has received awards, such as the 5-star Skytrax rating and the Best New Terminal in the World 2023 by Skytrax based on its design and excellence in facility management.

### 1.1.2 AMERICAN TRIPLE I PARTNERS, LLC (ATI)

ATI is a New York-based investor, owner, developer, and manager of infrastructure assets. ATI has experience in infrastructure, government, and finance, which positions the firm to effectively source, invest, and manage public and private opportunities.

ATI targets the transportation, digital, and social verticals that demonstrate attractive secular growth trends or which need significant capital for upgrade or modernization. ATI's mission to create value for investors and communities through innovative infrastructure investments closely aligns with the firm's origin as a Minority and Women Owned Business Enterprise (MWBE). ATI seeks to operate in a manner that reflects the same diversity of constituencies and to deliver a positive impact to communities.

### 1.1.3 RXR REALTY, LLC (RXR)

RXR is a private real estate company with expertise in investment management, property management, development, design, construction, leasing, and financing. RXR currently has over \$1.3 billion in active construction underway in the New York metro area and has 93 properties with an estimated aggregate gross asset value under management of over \$18 billion.<sup>22</sup>

RXR's experience in public-private developments in the New York metro area include major redevelopment projects such as 175 Park Avenue, a 2 million+ square-foot supertall office tower adjacent to Grand Central Station; Pier 57, an adaptive reuse of a historic NYC pier into a 400,000 square-foot mixed-use building anchored by Google; the Willoughby, a 476-unit multifamily rental building on Long Island University (LIU) Brooklyn's campus; Garvies Point Master Development, a mixed-use community located at Glen Cove that resulted from transforming a brownfield waterfront site into a community with 28 acres of park and an esplanade; Nasau Hub, a Nassau County-based

---

<sup>21</sup> Vantage Group, <https://www.vantagegroup.com/>

<sup>22</sup> RXR by the Numbers, December 30, 2023.

redevelopment of the Nassau Veterans Coliseum area with an aim to create a mixed-use, Innovation District in a 70-acre area that will bring new economic activity, jobs, and entertainment to the area, and provide a walkable neighborhood; and the New Rochelle Master Plan Development.<sup>23</sup>

#### 1.1.4 JETBLUE AIRWAYS CORPORATION

Based in Long Island City and *New York's hometown airline*®, JetBlue is the only major airline headquartered in New York. JetBlue's differentiated product and culture combined with its competitive cost structure enables JetBlue to compete effectively in high-value markets with service to over 100 destinations. As of Q3 2024, JetBlue operates 166 average daily departures from JFK to 81 destinations with plans to increase to 200 daily departures. Its flagship Terminal 5 at JFK has been celebrated for its customer-friendly design, facilities, and amenities.

## 1.2 THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (PORT AUTHORITY)

### 1.2.1 GOVERNING STRUCTURE

The Port Authority, established in April 1921, is responsible for the construction, operation, and maintenance of transportation infrastructure supporting the Greater New York – New Jersey region's trade and transportation network. Its jurisdictional area, the "Port District," includes a radius of approximately 25 miles from the Statue of Liberty in New York Harbor.

In addition to four of the region's commercial service airports (JFK, LGA, Newark Liberty International, and Stewart International Airports), the Port Authority operates Teterboro Airport (a general aviation facility), six tunnels and bridges, bus terminals, marine terminals, and ports throughout the New York Harbor region as well as the Port Authority Trans-Hudson (PATH) transit rail system. The Port Authority's transportation, terminal, and other facilities of commerce within the Port District are divided into five lines of business:

- Aviation,
- Port Authority Trans-Hudson Corporation (PATH) (rail),
- Port Commerce,
- Tunnels-Bridges-Terminals, and
- The World Trade Center.

A 12-member Board of Commissioners governs the Port Authority, with the Governors of New York and New Jersey each appointing 6 members with the approval of their respective state's Senate. The Port Authority operates its airports through an Aviation Department.

The Port Authority is a financially self-supporting entity. It does not receive tax revenue from either state or from any local jurisdiction and has no power to tax, nor does it have the power to pledge the credit of either state or any municipality. The Port Authority relies primarily on revenues generated from facility operations.

---

<sup>23</sup> RXR, September 2024.

### 1.2.2 THE PORT AUTHORITY AIRPORT LEASES WITH THE CITY OF NEW YORK

The Port Authority has operated both LGA and JFK pursuant to the *Amended and Restated Lease of Municipal Air Terminals* (the Basic Lease) between the City of New York and the Port Authority since 1947. In addition, the Port Authority operates Newark Liberty International Airport (Newark or EWR) under a lease agreement with the City of Newark and arrangements with the City of Elizabeth. The Port Authority has also operated Teterboro Airport since its purchase in 1949 and New York Stewart International Airport through a lease with the State of New York in 2007.

The Basic Lease was most recently amended and restated in early 2021, with a term extending through December 31, 2060. In addition to the establishment of rental payments due from the Port Authority to the City of New York, the Basic Lease provides the Port Authority the right to enter into subleases regarding the development of facilities at LGA and JFK.

### 1.3 THE JMP LEASE WITH THE PORT AUTHORITY

The Lease Agreement between the Port Authority (lessor) and JMP (lessee) for the Terminal 6 Parcel (23.1 acres) and the Terminal 7 Parcel (35.4 acres) was executed on November 17, 2022. Under the terms of the Lease Agreement, JMP is responsible for the financing, design, development, construction, operation, and maintenance of the Project, which will be situated on the Terminal 6 Parcel and the Terminal 7 Parcel for the duration of the lease (December 30, 2060).

Terminal 6 is being constructed as a new facility. This new unified interconnected passenger terminal building is being built on the existing and currently vacant Terminal 6 site and the existing Terminal 7 site. Consisting of approximately 1.2 million square feet, the new terminal will include the capacity for 10 gates including 9 widebody gates. With a direct connection with JetBlue's Terminal 5, it will replace the existing terminal facilities on the Terminal 7 Parcel and the apron and taxi lanes on the vacant Terminal 6 Parcel.

The design, development, and construction of Terminal 6 has started and is scheduled to be completed in two phases. Phase 1 includes design, development, and construction on the Terminal 6 Parcel and continued operation and maintenance of Terminal 7. Phase 2 includes demolition of the existing Terminal 7 and new construction on the Terminal 7 Parcel. Pursuant to the Lease Agreement, JMP will also be responsible for the construction of certain Off-Premises Facilities which are included in the Project costs. Off-Premises Facilities will not be operated or maintained by JMP and will not constitute part of the facilities leased to JMP under the Lease Agreement.<sup>24</sup> The total Project is scheduled to be completed by the second quarter of 2028. Additional information regarding lease rentals and JMP's responsibilities and obligations for the operation of Terminal 7 are included in **Section 5.1**.

The Lease Agreement includes several categories of rental payments to the Port Authority over the term of the lease which generally include Ground Rent, first additional rent, second additional rent, Third Additional Rent, Excess Value Rent, and concession revenue rent. Additional information about the Project is included in **Section 2.1.3** of this Report.

---

<sup>24</sup> These off-Premises facilities generally include projects that tie into work on-Premises such as adjustments to the Terminal 5 frontage and access roads, connectivity of supporting infrastructure, adjustments to the Yellow Garage ground floor entrance area, construction of the bridge connector connecting the Terminal 5 Parking Garage and the Orange Garage, the construction of a new Taxi Plaza, adjustments to the Terminal 5 HOV curbside, aesthetic improvements to the existing bridge between the Terminal 7 AirTrain station and the Existing Terminal Facilities, the relocation of existing Terminal 5 Gate 30 and certain other modifications to Terminal 5 necessary to accommodate the connection of Terminal 6, adjustment to the off-Premises taxiway throats on the north side of the Terminal 6 Parcel, and necessary temporary facilities off the Premises.

## 1.4 THE SERIES 2024 BONDS

The plan of finance for the Project includes proceeds from the Series 2024 Bonds, proceeds from the Loan Facility, equity contributions, and project revenues. In 2022, JMP obtained a Loan Facility to fund a portion of the Project costs, the proceeds of which are held under a Collateral Agency and Accounts Agreement (as amended and supplemented, the CAAA) between JMP and the New York Transportation Development Corporation (TDC). The Loan Facility includes (i) Special Facilities Bonds, Senior Series 2022A (Tax-Exempt) (AMT) (JFK Airport Terminal 6-7 Redevelopment Project) (the Series 2022 Bonds) issued in November 2022 under a Credit Agreement through a direct placement with the Royal Bank of Canada, and (ii) the Senior Term Loans, a Credit Agreement by and among the issuer, JMP, the Administrative Agent and the financial institutions listed therein, pursuant to which bank lenders agreed to lend approximately \$3.0 billion to the New York TDC (the Issuer) and to provide an \$8 million security deposit facility, all for the benefit of JMP. The Loan Facility is administered in accordance with a Common Terms Agreement (CTA).

The Series 2024 Bonds will be issued pursuant to the TDC Master Bond Indenture of Trust (as amended and supplemented, the Indenture) between the Issuer and the Trustee and are anticipated to refinance a portion of the Loan Facility.

It is anticipated that JMP will borrow the proceeds of the Series 2024 Bonds from the Issuer pursuant to the TDC Loan Agreements. The Project funds will be held and administered pursuant to the CAAA among JMP, the Trustee, the Collateral Agents, the Intercreditor Agent, the Issuer, the Administrative Agent, the Securities Intermediary, and the Deposit Account Bank.

**Exhibit 1-1** presents the organizational structure of the transaction.

JMP's obligations with respect to the Series 2024 Bonds and Loan Facility will be payable, in part, from and secured under the Indenture (with respect to the Series 2024 Bonds and the Series 2022 Bonds), the CTA (with respect to the Loan Facility), and the CAAA by revenues generated from the Project. Project Revenues consist primarily of terminal rentals and charges collected from the airlines operating in Terminal 7 and the future Terminal 6 and concession revenues generated from the operation of Terminal 7 and the future Terminal 6, both described in **Chapter 5** of this Report. The Series 2024 Bonds and Loan Facility are non-recourse to the Issuer and the Port Authority.

Proceeds from the Series 2024 Bonds are anticipated to be used to:

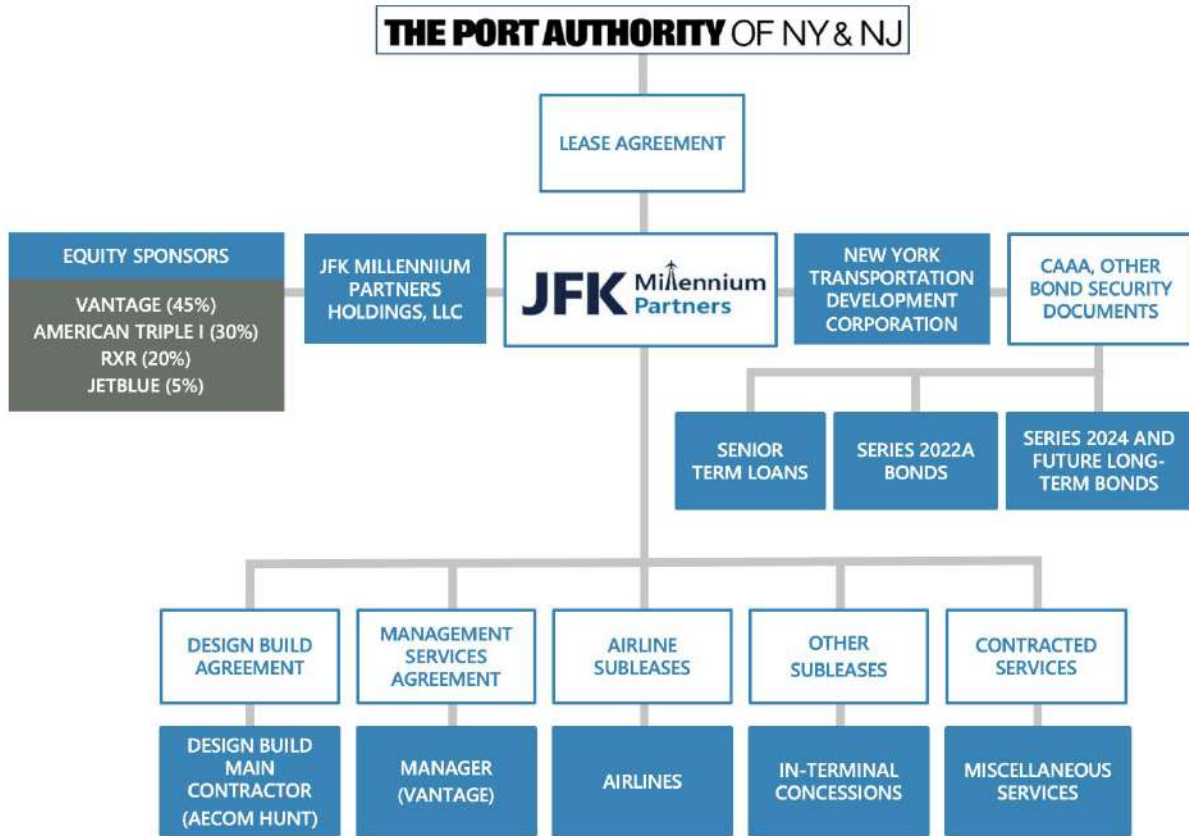

- (i) repay principal and associated accrued interest of a portion of the Loan Facility outstanding balance,
- (ii) pay charges, fees and mark-to-market payments related to settlement of certain interest rate hedge instruments associated with the portion of Loan Facility that is being refinanced, and
- (iii) to pay certain costs of issuance related to the Series 2024 Bonds.

A portion of the proceeds from the Series 2024 Bonds available for Project costs will be eligible for "green" projects as designated by Kestrel, an Approved Verifier accredited by the Climate Bonds Initiative (CBI).

Unless otherwise defined herein, all capitalized terms in this Report are used as defined in the Official Statement, including Appendix A "Definitions" thereto, the Indenture, or the Lease Agreement between JMP and the Port Authority.

**Exhibits 1-2** and **1-3** presents the Flow of Funds, Pre-substantial Completion and Post-substantial Completion, respectively, for the Project.

## 2. AIRPORT FACILITIES, JFK REDEVELOPMENT PROGRAM, AND TERMINAL 6 REDEVELOPMENT PROJECT

Located in the New York City Borough of Queens, the Airport is 15 miles from midtown Manhattan. Accommodated within the existing Airport site are five operating passenger terminals and an elevated people mover system (the AirTrain) providing access to each of the terminals and other parts of the Airport, including the rental car center. In addition, the Airport has four runways, an airport traffic control tower (ATCT), associated hangars, multiple cargo facilities, associated parking facilities, and the on-airport TWA Hotel. The remainder of Airport property is used for airport or airline support functions, such as navigational aids and lighting, aircraft fuel storage, and equipment storage and maintenance. **Exhibit 2-1** is an aerial view of the Airport.

EXHIBIT 2-1 JFK INTERNATIONAL AIRPORT

SOURCE: Nearmap, August 2024 (aerial photography – for visual reference only, may not be to scale); JFK International Airport “Maps” <https://www.jfkairport.com/at-airport/airport-maps>, (accessed July 22, 2024)

## 2.1 PASSENGER TERMINALS

The airlines serving the Airport currently operate from Terminals 1, 4, 5, 7, and 8 which provide a total of 120 aircraft gates<sup>25</sup> and are connected via JFK's AirTrain system. Terminal 2 was demolished in 2023 to accommodate an expansion of Terminal 1. Terminals 3 and 6 were demolished in 2014 and 2011, respectively, to accommodate other terminal area developments. In contrast to most airports in the United States, where terminals are generally constructed and operated by the airport sponsor, the terminals at JFK were privately developed and are operated by private entities under long-term unit terminal ground leases with the Port Authority.

This section describes existing terminal facilities. Terminal development projects that are anticipated to impact and expand existing facilities are described in **Section 2.2**.

### *Terminal 1*

Terminal 1, which opened in May 1998, was built and is operated by the Terminal One Group Association (TOGA), L.P., a consortium of international airlines that consists of Air France, Korean Air, and Lufthansa as current partner airlines. The 700,000-square foot building provides access to 10 contact gates (defined as an aircraft parking position with access to the terminal via a passenger loading bridge), and 2 remote aircraft parking positions (defined as an aircraft parking position without direct access to a terminal). Terminal 1 has the ability to serve up to two Airplane Design Group (ADG) VI aircraft (equivalent to the Airbus A380 and Boeing 747-8), however, this restricts the use of adjacent gates. The terminal houses its own FIS facility to process inbound international passengers through customs and immigration. As of October 2024, 27 airlines operate from Terminal 1.<sup>26</sup>

As described in **Section 2.1.2**, Terminal 1 is currently undergoing redevelopment. It will replace the existing terminal and expand to encompass the area of the recently demolished Terminal 2 and the previously demolished Terminal 3. The redeveloped terminal, branded "New Terminal One (NTO)," is further described in **Section 2.2**. The lease for Terminal 1 held by TOGA expires at the time NTO Phase A opens, which is anticipated to be on June 1, 2026, or in 2028 if Phase A is not completed by then.

### *Terminal 4*

The two million square foot Terminal 4, developed and operated by JFK International Air Terminal (JFKIAT)<sup>27</sup>, opened in May 2001. Terminal 4 has undergone three major expansions/renovations, one in 2013 (Phase 1), one in 2015 (Phase 2), and another that concluded in 2023 (Phase 2.5).<sup>28</sup> Terminal 4 completed its \$1.5 billion expansion as part of the JFK Redevelopment Program in 2023 adding five net new gates. This coincided with Delta relocating all its Terminal 2 operations (10 gates) to Terminal 4 and the demolition of Terminal 2. The terminal houses two

---

<sup>25</sup> See **Table 2-2** for details on gates. Gate counts may vary due to parking positions. In certain conditions, a single widebody gate may accommodate multiple smaller aircraft.

<sup>26</sup> John F. Kennedy International Airport, "Airlines," <https://www.jfkairport.com/flight/airlines> and "Terminals" <https://new-york-jfk-airport.com/guide/terminals> (accessed July 22, 2024).

<sup>27</sup> JFKIAT's airline parties include Delta, Aeromexico, Air Europa, Air India, Avianca, Caribbean Airlines, China Airlines, Copa Airlines, El Al, Emirates, Etihad Airways, Hawaiian Airlines, Kenya Airways, KLM Royal Dutch Airlines, LATAM, Singapore Airlines, Uzbekistan Airlines, Virgin Atlantic, WestJet Airlines, and Xiamen Airlines.

<sup>28</sup> Delta's portion of the expansion is complete while \$150 million of upgrades for the rest of the terminal are expected to be completed by 2025. Furthermore, Delta has an option, which it has not exercised, to commence a second phase of the Terminal 4 redevelopment which would add 12 more narrowbody aircraft gates, an expanded headhouse, and upgraded terminal frontage according to the New York Transportation Development Corporation Special Facilities Revenue Bonds, Series 2024 Offering Statement published June 2024.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

concourses and a 24-hour, 7 days a week, FIS facility and serves several international airlines in addition to its largest tenant, Delta. As of October 2024, 20 airlines operate from Terminal 4 which has 38 gates in operation.<sup>29</sup>

### **Terminal 5**

Terminal 5 was constructed behind the former TWA Flight Center, which closed in 2001 and is currently the site for the Airport's only on-airport hotel, as discussed in **Section 2.2.5**. Terminal 5 opened in October 2008 and underwent expansion in 2014. The facility was funded by the Port Authority and built by JetBlue, which operates the terminal under a lease that extends through October 2041. The 676,000-square-foot facility provides access to 29 narrowbody aircraft contact gates and 13 remote aircraft parking positions, including six international gates with FIS facilities that opened in November 2014. As of October 2024, two airlines operate from Terminal 5, JetBlue and Cape Air.<sup>30</sup>

### **Terminal 7**

Terminal 7 opened in 1972 and was previously operated by British Airways but is now operated by JFK Millennium Partners, LLC pursuant to the Lease Agreement. Under the Lease Agreement, JMP will operate Terminal 7 until Phase 1 of Terminal 6 is complete (in the first quarter of 2026), at which point Terminal 7 will be demolished and Phase 2 of Terminal 6 will be constructed in its place. Serving both international and domestic flights, the 534,456-square-foot terminal building provides access to nine contact gates and houses an FIS facility. As of October 2024, 13 airlines operate from Terminal 7.

### **Terminal 8**

The new Terminal 8 opened in 2007 and services both international and domestic flights. The terminal was built and is operated by American Airlines under a lease that expires in December 2036. The 1.8 million-square-foot terminal building was expanded in 2022 at a cost of \$400 million which consisted of the addition of 130,000 square feet of space, five new widebody gates, four new widebody parking positions, and an improved baggage handling system, as well as a reduction of narrowbody and regional jet gates.

Following the redevelopment and the completion of the Terminal 8 expansion plan, British Airways and American Airlines co-located their operations in the new terminal. As of October 2024, 11 airlines<sup>31</sup> operate from Terminal 8 which has 31 gates<sup>32</sup> in operation and houses an FIS facility.

## **2.1.2 JFK REDEVELOPMENT PROGRAM**

The Airport is currently undergoing an extensive redevelopment program (including the Project) in an effort to improve customer experience, customer service, operational efficiency, and to address needs for additional capacity. The Port Authority intends for the Airport-wide program to provide redeveloped terminals, better roadway access, modern amenities, more efficient taxiways, and updated security. Note the redevelopment of Terminals 4 and 8 is functionally complete and is described in **Section 2.1**.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

**Table 2-1** presents the terminal operators and hub airlines at those terminals, where applicable. At JFK, American, Delta, and JetBlue operate hubs, with each airline scheduling 90 or more scheduled average daily departures to at least 50 different destinations.

TABLE 2-1 JFK REDEVELOPMENT PROGRAM TERMINAL USE

TERMINAL	EXISTING		FUTURE	
	OPERATOR	HUB AIRLINE	OPERATOR	HUB AIRLINE
Terminal 1		NONE		NONE
Terminal 4				
Terminal 5				
Terminal 6				NONE
Terminal 7		NONE		
Terminal 8				

NOTES:

Hub Airline indicates an airline that has a concentration of activity at the terminal and represents a material portion or majority of passenger activity at the terminal. Terminal 1 is operated by Terminal One Group Association (TOGA), L.P., a consortium of international airlines that consists of Air France, Korean Air, and Lufthansa as current partner airlines. As of October 2024, 27 airlines operate from Terminal 1. New Terminal One has previously disclosed they have secured commitments from Air France, Etihad Airways, KLM Royal Dutch Airlines, Korean Air, LOT Polish Airlines, EVA Air, Air Serbia, Scandinavian Airlines, and Neos.

As of the date of this Report, JMP has negotiated letters of intent with term sheets outlining the terms and conditions for a sublease with seven Expected Airlines including Aer Lingus, Cathay Pacific, Lufthansa AG (including its affiliates Austrian Airlines, Brussels Airlines and Swiss International Air Lines), and one additional long-haul foreign flag airline.

SOURCES: New York Transportation Development Corporation Special Facilities Revenue Bonds, Series 2024 Offering Statement published June 2024 (applies to New Terminal One); The New Terminal One, "The New Terminal One and Italian Airline Neos announce partnership for operations at JFK Airport," September 2024; Ricondo and Associates, October 2024.

### ***New Terminal 1***

The NTO project includes the construction of a new terminal in replacement of current operating Terminal 1 and the recently demolished Terminal 2. The NTO footprint will encompass the demolished Terminal 2 site, the former Terminal 3 site, a portion of the Terminal 4 site, the Green Garage site, and the existing Terminal 1 site. It is anticipated to be built in three phases, subject to certain passenger activity triggers. The project is privately financed by a consortium of labor, operating and financial partners, including Ferrovial, JLC Infrastructure, Ullico and Carlyle.

Phase A, which has an estimated cost of \$8.424 billion (including demolition, construction, financing, and other costs),<sup>33</sup> will include the construction of the headhouse, east concourse, and associated aprons and roadways adding up to approximately 1.8 million square feet of terminal space<sup>34</sup>. Expected to be complete by mid-2026, Phase A will provide 13 widebody gates, one temporary widebody gate, five hardstands, a departures level and arrivals level, and an FIS facility. Phases B1 and B2, which require reaching specific triggers to commence, include a second concourse with an additional 9 gates for a total of 23 gates (Phase B1 will include 4 widebody gates and 1 narrowbody gate and Phase B2 will include 4 widebody gates). The new terminal is anticipated to have the capability to serve ADG VI aircraft and, while capable, is not intended to serve domestic operations.

All three phases of the NTO could be completed by the end of 2029 if Phase B1 commences following Phase A, and Phase B2 follows the completion of Phase B1. Triggers related to the phases include traffic levels and credit rating conditions. The traffic triggers, different for Phase B1 and B2, address Airport-wide international enplaned passenger activity or NTO enplaned passenger activity. If traffic levels are reached, the NTO lease requires the operator to proceed with the next project phase, subject to certain provisions. A traffic trigger for Phase B1 is reached when six months of Airport international enplaned passengers are equal to or exceed the activity in the same six-month period in 2019. Based on Port Authority data, international enplaned passengers at JFK during the six-month period from March to August 2024 were approximately 102.6 percent of the count for the same period in 2019.

### ***Terminal 6***

Terminal 6, the focus of this Report, is an ongoing, approximately \$5.0 billion development of a new terminal to replace Terminal 7. Terminal 6 will include 10 gates, of which 9 are international widebody gates. Construction began in 2022 and will be delivered in two phases. Terminal 6 will open at the completion of the first phase which is scheduled to be in the first quarter of 2026 with the second phase scheduled to be complete in the first quarter of 2028. Further details regarding Terminal 6 are provided in **Section 2.1.3**.

**Exhibit 2-2** presents a comparison of the Airport terminal complex during the JFK Redevelopment Program in 2019, 2024, and in the future following the completion of ongoing projects. **Table 2-2** presents the corresponding gates by size and terminal.

Kennedy International Airport, "Terminals" <https://new-york-jfk-airport.com/guide/terminals> (accessed July 22, 2024); ASM, "Airline Traffic and Economic Analysis Report, JFK International Airport Terminal 6," June 2024; New York Transportation Development Corporation Special Facilities Revenue Bonds, Series 2024 Offering Statement published June 2024; Department of Transportation, Federal Aviation Administration Eastern Region, "Preliminary Draft of Environmental Assessment Prepared for the John F Kennedy (JFK) International Airport Redevelopment Program at JFK International Airport; Department of Transportation, Federal Aviation Administration Eastern Region, "Written Re-Evaluation and record of Decision for the Final Environmental Assessment Prepared for the John F Kennedy (JFK) International Airport Redevelopment Program at JFK International Airport," May 31, 2022; JFK Millennium Partners, LLC, September 2024; Terminal layout interpretations by Ricondo & Associates, October 2024.

### ***The Roadways, Utilities and Ground Transportation Center Project***

In conjunction with the terminal projects, the JFK Redevelopment Program includes a \$1.24 billion Roadways, Utilities and Ground Transportation Center Project (RUGTC) with an expected completion date of December 2027.<sup>35</sup> It will be delivered by Skanska Halmar JFK Joint Venture (SHJV), a Port-sanctioned joint venture consisting of Skanska USA Civil NE and Halmar International LLC. The project includes streamlining and modernizing the Airport's roadway network, improving traffic and wayfinding technologies, and relocating and upgrading utilities. The main part of the RUGTC project is constructing an eco-conscious, multi-level Ground Transportation Center (GTC) with a modern design.<sup>36</sup> The project's GTC will feature 1,950 parking spaces, electric vehicle charging stations, an elevated pedestrian bridge with a bicycle lane, and renewable energy features such as solar paneling and a rainwater harvesting facility.

#### **2.1.3 TERMINAL 6 REDEVELOPMENT PROJECT**

The original Terminal 6 was demolished in 2011, and Terminal 7 is anticipated to cease operations and be demolished in 2026, providing a 65-acre site for the Terminal 6 development to be completed by 2028. In August 2021, the Port Authority approved a lease agreement as one of the first post-COVID lease agreements in JFK's Redevelopment Program. This lease agreement, executed in 2022 and extending through 2060, is in partnership with JMP to finance, redesign, build, and operate Terminal 6 and also to operate and ultimately demolish Terminal 7 (at the time of completion of Terminal 6 Phase 1).

The construction of Terminal 6 includes an estimated 1.2 million square foot terminal with 10 gates (nine are widebody gates and one is a narrowbody gate), six premier airline lounges post-TSA security, seamless connectivity between Terminals 5 and 6, and improved airside operations with expanded taxilanes which will facilitate more efficient turn times and Minimum Connect Times (MCTs) between airlines. The Project also includes direct access to two AirTrain stations, and a Ground Transportation Center (separate from the centralized GTC which is part of the RUGTC project). Terminal 6 will connect with Terminal 5 (on Level 2 of Terminal 6) to allow airline interconnectivity and a dedicated Terminal 6 FIS facility creating efficient passenger flow. Terminal 6 is anticipated to accommodate ADG V aircraft (equivalent to up to the Boeing 777x and Airbus 350 families) and include three Multiple Apron Ramp System (MARS) gates that can each accommodate one widebody or two narrowbody aircraft. Other highlights of the Terminal 6 project include a modern self-service bag drop, automated Transportation Security Administration (TSA) security lanes, a biometric-based access control systems, on-site aircraft parking positions, inbound and outbound baggage systems, and on-site de-icing pads.

Pursuant to the Lease Agreement, JMP will also be responsible for the construction of certain Off-Premises Facilities which are included in the Project costs, but JMP will not be responsible for operating these new off-Airport facilities.<sup>37</sup>

**Exhibit 2-3** shows the site layout of the Terminal 6 project.

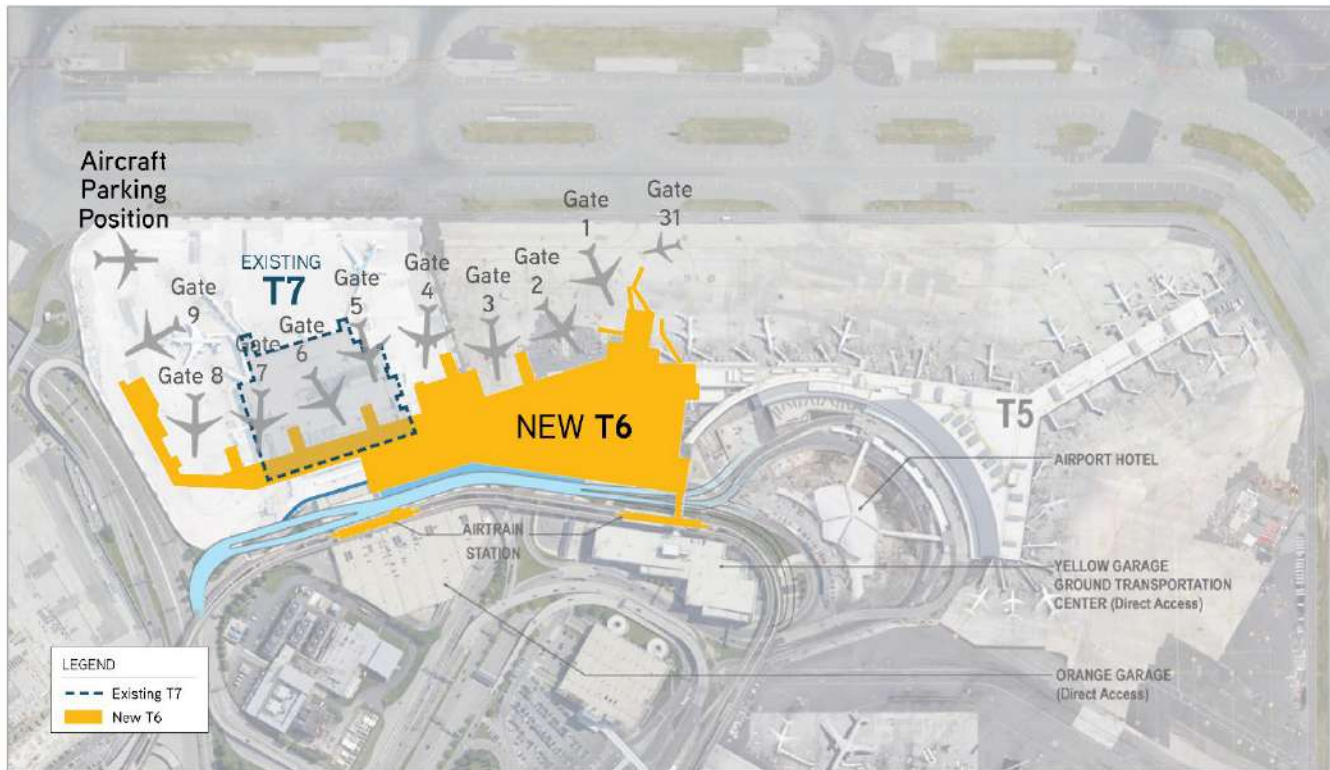

---

<sup>35</sup> John F. Kennedy International Airport, <https://www.anewjfk.com/projects/shjv-roadways-and-gtc/> (accessed July 22, 2024).

<sup>36</sup> The centralized GTC that is a part of the JFK Redevelopment Program RUGTC project is separate and distinct from the Terminal 6 Redevelopment Project's ground transportation center adjacent to Terminals 5 and 6.

<sup>37</sup> These off-Premises facilities generally include projects that tie into work on-Premises such as adjustments to the Terminal 5 frontage and access roads, connectivity of supporting infrastructure, adjustments to the Yellow Garage ground floor entrance area, construction of the bridge connector connecting the Terminal 5 Parking Garage and the Orange Garage, the construction of a new Taxi Plaza, adjustments to the Terminal 5 HOV curbside, aesthetic improvements to the existing bridge between the Terminal 7 AirTrain station and the Existing Terminal Facilities, the relocation of existing Terminal 5 Gate 30 and certain other modifications to Terminal 5 necessary to accommodate the connection of Terminal 6, adjustment to the off-Premises taxiway throats on the north side of the Terminal 6 Parcel, and necessary temporary facilities off the Premises.

## EXHIBIT 2-3 TERMINAL 6 SITE LAYOUT

## NOTE:

Gate T6-6 and T6-9 are Multiple Apron Ramp System (MARS) gates that can also accommodate 1 WB or two NB aircraft.

SOURCE: JFK Millennium Partners, LLC, June 2022.

In addition to a sublease with JetBlue for rental of one narrowbody gate in Terminal 6. JMP has negotiated non-binding letters of intent with term sheets outlining the terms and conditions of a sublease with each of the seven Expected Airlines including Aer Lingus, Cathay Pacific, Lufthansa AG (including its affiliates Austrian Airlines, Brussels Airlines and Swiss International Air Lines), and one additional long-haul foreign flag airline through at least 2040.

For purposes of this Report, the elements of the Project that are the subject to the Lease Agreement with the Port Authority and generate the Project Revenues pledged to the Series 2024 Bonds and parity lenders are listed below and are collectively defined as the Project.

- **Terminal 6** –Terminal 6 will include four levels with the following organization:
  - Level 3 will include the east and west check-in halls with a central TSA security checkpoint and post-security airline lounges;
  - Level 2 will be the concourse level with terminal concessions, airline lounges, and holdrooms; will connect to Terminal 5, post-TSA security
  - Level 1.5 will include a sterile corridor connecting gates to the FIS facility; and
  - Level 1 will include arrival experiences such as a premium arrival lounge for both international and domestic passengers, ground transportation, and a domestic baggage claim.
- **Terminal 6 Apron Improvements** – Construction of the apron for the 10 new gates, nine of which will be widebody capable; three of the nine widebody gates will be MARS capable gates.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

- **Roadways** – Construction of temporary and permanent terminal frontage and access roads.

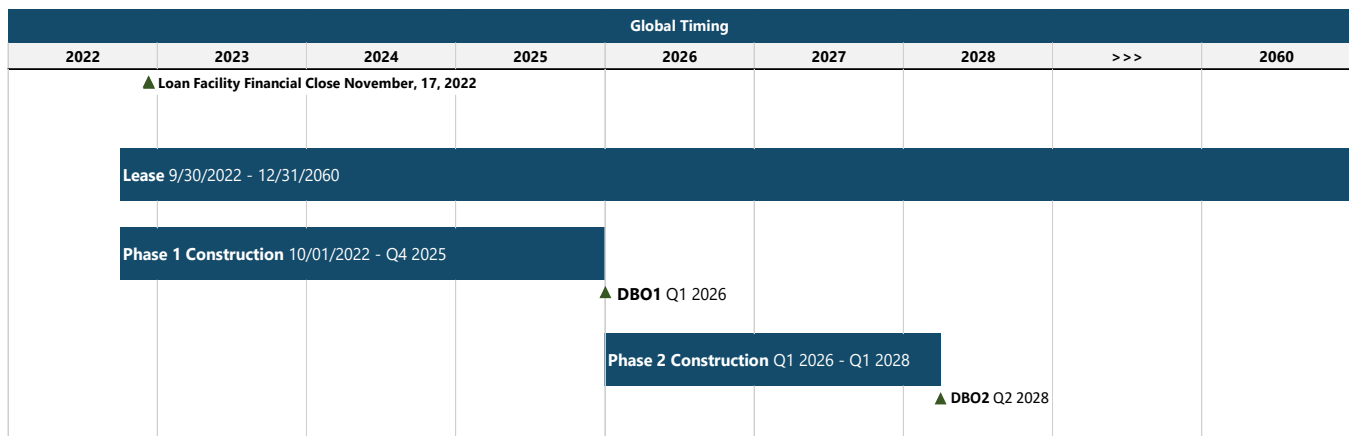

As part of the Project, JMP is also responsible for delivering the GTC (part of the off-premises work described above), but there are no revenues associated with it. Development will include a transformation of the ground floor of the Terminal 5 Yellow Parking Garage and the adjacent portion of the roadway network into a new GTC. The GTC will include a for-hire-vehicle (FHV) and personal vehicles loading area and will create a consolidated area for Terminal 6’s passengers to access ground transportation options to and from the Airport that are within walking distance from Terminal 6’s arrivals area. In addition, the roadways portion of the project will separate Terminal 6 landside traffic from Terminal 5’s landside traffic. This work is separate from the RUGTC’s centralized GTC described in **Section 2.1.2**.

**2.1.3.1 TERMINAL 6 CONSTRUCTION SCHEDULE AND PHASING**

**Exhibit 2-4** shows the anticipated construction schedule for Terminal 6. Construction began in the third quarter of 2022 and will continue through the first quarter of 2028. During the construction period, Terminal 7 will operate and be replaced in phases. Demolition of certain existing structures, fixtures, and other improvements on the existing Terminal 7 site and development of Terminal 6 and GTC will occur simultaneously, with different parts of existing Terminal 7 taken offline as Terminal 6 becomes operational in order to support the transition of operations. The development is divided into two major phases, during which existing facilities will be demolished and replaced with new facilities.

During Phase 1, JMP is operating the existing Terminal 7. Phase 1 includes the construction of the Terminal 6 headhouse and departure and arrivals area, which will include five new gates anticipated to be open in 2026: four widebody and one narrowbody, to be built on the vacant site previously occupied by Terminal 6 before its demolition in 2011. After Phase 1’s anticipated completion in 2026, Phase 2 will commence with the demolition of Terminal 7. It is anticipated that one additional widebody gate will be added by the third quarter of 2026 after completion of Phase 1 but before the completion of Phase 2. The construction of Phase 2 is anticipated to be completed before the second quarter of 2028. In total, the Project will include the construction of 10 gates, including nine widebody gates, and associated terminal space which will replace the decommissioned gates at Terminal 7.

**EXHIBIT 2-4 TERMINAL 6 REDEVELOPMENT CONSTRUCTION SCHEDULE**

NOTES:  
 DBO – Date of Beneficial Occupancy  
 The schedule reflects estimates provided by JMP in September 2024.  
 SOURCE: JFK Millennium Partners, LLC, October 2024.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

**2.1.3.2 TERMINAL 6 GATE CAPACITY**

Pre-construction gate capacity in existing Terminal 7 is 6 narrowbody gates and 6 widebody gates. Upon Terminal 6 Phase 1 Date of Beneficial Occupancy (DBO1), 5 new gates will open and Terminal 7 gates will close in anticipation of its demolition. The aircraft parking plan for the full Terminal 6 Redevelopment Project includes 10 gates capable of international service of which nine are widebody gates and one is a narrowbody gate. The improvements replace several narrowbody gates with widebody gates, which should accommodate greater passenger activity through Terminal 6.

In the initial construction phases, it is expected that all airlines will continue operating from the same existing gates as they operate today, although three gates have closed in existing Terminal 7 to accommodate construction of Terminal 6. The number of available gates at Terminal 7 will fluctuate during construction.

Airline facilities within the Terminal 6 check-in area and concourses will use common-use equipment, anticipated to allow operational flexibility during irregular and normal operations. JMP expects that Terminal 6 will have sufficient gate capacity to accommodate projected aeronautical activity discussed in Section 4.6 of this Report.

**2.1.3.3 PROJECT FUNDING SOURCES AND USES**

A combination of sources will be used to fund Terminal 6 development, including the Loan Facility,<sup>38</sup> sponsor equity, Project Revenues, interest income, and potentially proceeds from the termination of hedges related to the refinancing of the Loan Facility. **Table 2-3** shows the sources and uses of funds. The total cost is approximately \$5.0 billion. Approximately \$3.54 billion is funded with loan proceeds; approximately \$84.3 million is funded with net operating cash; approximately \$1.3 billion is funded from sponsor equity; and approximately \$61.9 million of the Project costs is funded by interest income. The uses of funds include construction of the new facilities, the payment of ongoing financing related costs and capitalized interest, and reserves and contingencies.

Total Project costs for construction, design, and financing are estimated to be approximately \$5.0 billion]. The estimated Project costs are provided in Table 2-3.

**TABLE 2-3 TERMINAL 6 REDEVELOPMENT ESTIMATED SOURCES AND USES OF FUNDS**

SOURCES OF FUNDS	MILLIONS \$	USES OF FUNDS	MILLIONS \$
Series 2024 Bond Proceeds	\$1,578.1	Construction Costs	\$2,790.7
Construction Loan Facility Proceeds	\$1,965.3	Prepayment of 3rd Additional Rent	\$33.0
Construction Cash Account Withdrawal	\$84.3	Port Authority Oversight Costs	\$40.0
Interest Income from Reserves	\$19.0	Development Costs	\$220.7
Interest Income Other	\$42.9	Interest During Construction	\$811.5
Equity	\$1,300.0	Funding of Reserves and Cash Account Deposit	\$668.8
		Cost of Issuance	\$208.9
		LOC Costs	\$216.1
<b>Total Sources of Funds</b>	<b>\$4,989.7</b>	<b>Total Project Costs</b>	<b>\$4,989.7</b>

## NOTES:

Figures may not sum precisely due to rounding.

SOURCE: JFK Millennium Partners, LLC, October 2024.

<sup>38</sup> The proceeds of the Series 2024 Bonds will be used to pay down a portion of the Loan Facility.

## 2.2 OTHER AIRPORT FACILITIES

### 2.2.1 AIRFIELD

The Airport has four runways, made up of two pairs of parallel runways:

- Runway 13R-31L, 14,500 feet long and 200 feet wide;
- Runway 13L-31R, 10,000 feet long and 200 feet wide;
- Runway 4L-22R, 12,000 feet long and 200 feet wide; and
- Runway 4R-22L, 8,400 feet long and 200 feet wide.

All runways have high-intensity runway edge lighting, centerline and taxiway exit lighting, and a sign system that is illuminated at night for taxiing aircraft. All runways are grooved to enhance safety.

### 2.2.2 AIRPORT SUPPORT AND AIR CARGO AREAS

The Airport's cargo facilities consist of nearly 4 million square feet of air cargo and office space. Facilities include cargo handling and service facilities (including an animal handling facility), a US Post Office Airport Mail Facility, and an Airport Travel Plaza facility. The Airport Travel Plaza also includes truck fueling, truck parking, and other services. The ARK at JFK is the Airport's animal handling facility, offering veterinary capabilities; kenneling; and handling of equine, bovine, swine, birds, and exotic and zoo animals.

In late 2023, Worldwide Flight Services (WFS) announced it was building a new, 346,000-square-foot cargo facility at the Airport.<sup>39</sup> The facility is anticipated to open in early 2025 and will include a handling facility for temperature-controlled goods such as pharmaceuticals and perishables.<sup>40</sup>

### 2.2.3 LANDSIDE ACCESS

The Airport is accessible directly from Interstate-678 and provides access to the interstate highway system in and around the Air Trade Area. The Airport includes designated lots to pick up and drop off passengers, as well as staging lots for ride share and taxi services. Public transportation to the Airport includes the AirTrain, which provides landside access between Airport terminals and directly connects to both the Metropolitan Transportation Authority (MTA) subway lines and the Long Island Rail Road (LIRR) at Jamaica Station. The AirTrain also connects to the MTA subway at Howard Beach Station, allowing easy access to New York City, Penn Station, Atlantic Terminal, and all Long Island destinations. Additionally, the AirTrain connects to Federal Circle Station, providing access to car rentals at the Airport. MTA buses provide service between the Airport, Brooklyn, Queens, and beyond with subway connections. Currently, no rail or subway, besides the AirTrain, serves the Airport directly.

### 2.2.4 PARKING

The Airport currently provides over 14,000 public parking spaces, including terminal parking and long-term parking. Each operating terminal connects to a designated parking lot. The Blue Lot is located across Terminal 4, the Yellow Lot is located across Terminal 5, the Orange Lot is located across Terminal 7, and the Red Lot is located across Terminal 8 and currently serves Terminal 1 as well. Each parking lot has access to the AirTrain, providing transportation between the terminals, parking lots, parking garages, and two train stations. Parking Lot 9, designated as long-term parking, is located off the Nassau Expressway, and can be accessed by the AirTrain or MTA buses.

---

<sup>39</sup> Aviation Business News, "WFS to grow cargo capacity at JFK with new 346,000sq ft facility," October 26, 2023.

<sup>40</sup> *Ibid.*

### 2.2.5 ON-AIRPORT HOTEL

The Airport currently has one on-airport hotel with direct access to the terminals. The TWA Hotel was originally built in 1962 as an airport terminal for Trans World Airlines (TWA), but the airline ceased all passenger activity in 2001 after it was acquired by American Airlines.<sup>41</sup> The terminal's original headhouse, listed in the National Register of Historic Places, was preserved and is now the site of a 512-guestroom hotel.

The hotel is located with direct walking access to Terminal 5 which is adjacent to Terminal 6 and the AirTrain which can be used to access the other Airport terminals. Facilities in the hotel include 50,000 square feet of meeting and event space, a fitness center, food halls and shop, a rooftop swimming pool, an observation deck overlooking the Airport's runways, and a cocktail lounge inside a restored Lockheed Constellation L-1649A aircraft.

<sup>41</sup> "TWA History," TWA history, December 11, 2013, <http://twamuseum.com/htdocs/twahistory2.htm>.

## 3. DEMOGRAPHIC AND ECONOMIC ANALYSIS

The demand for air transportation at an airport is, to a large degree, dependent upon the demographic and economic characteristics of the geographical area surrounding the airport. This chapter presents data indicating that the Airport's Air Trade Area (defined in **Section 3.1**) has an economic base capable of supporting increased airline traffic demand discussed in Chapter 4.

### 3.1 AIR TRADE AREA

An Air Trade Area is the geographical area served by an airport, and the boundaries of an airport's Air Trade Area are influenced by such factors as the location of other metropolitan areas and their associated airport facilities. For purposes of this Report, the Airport's Air Trade Area consists of the New York-Newark-Jersey City, NY-NJ Metropolitan Statistical Area and the Bridgeport-Stamford-Norwalk, CT Metropolitan Statistical Area).<sup>42</sup> As presented in **Exhibit 3-1**, the Airport's Air Trade Area encompasses 23 counties in three states: Fairfield County in Connecticut; Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex, and Union Counties in New Jersey; and Bronx, Kings, Nassau, New York, Putnam, Queens, Richmond, Rockland, Suffolk, and Westchester Counties in New York.<sup>43</sup> The Air Trade Area is served by five commercial airports, which are discussed in further detail in this Chapter. Demographic, economic, and competitive factors all affect the market for air travel in the Air Trade Area. Ricondo considered these factors when evaluating the activity forecast for the Airport and, specifically, for Terminal 6.

#### 3.1.1 AIRPORTS SERVING THE AIR TRADE AREA

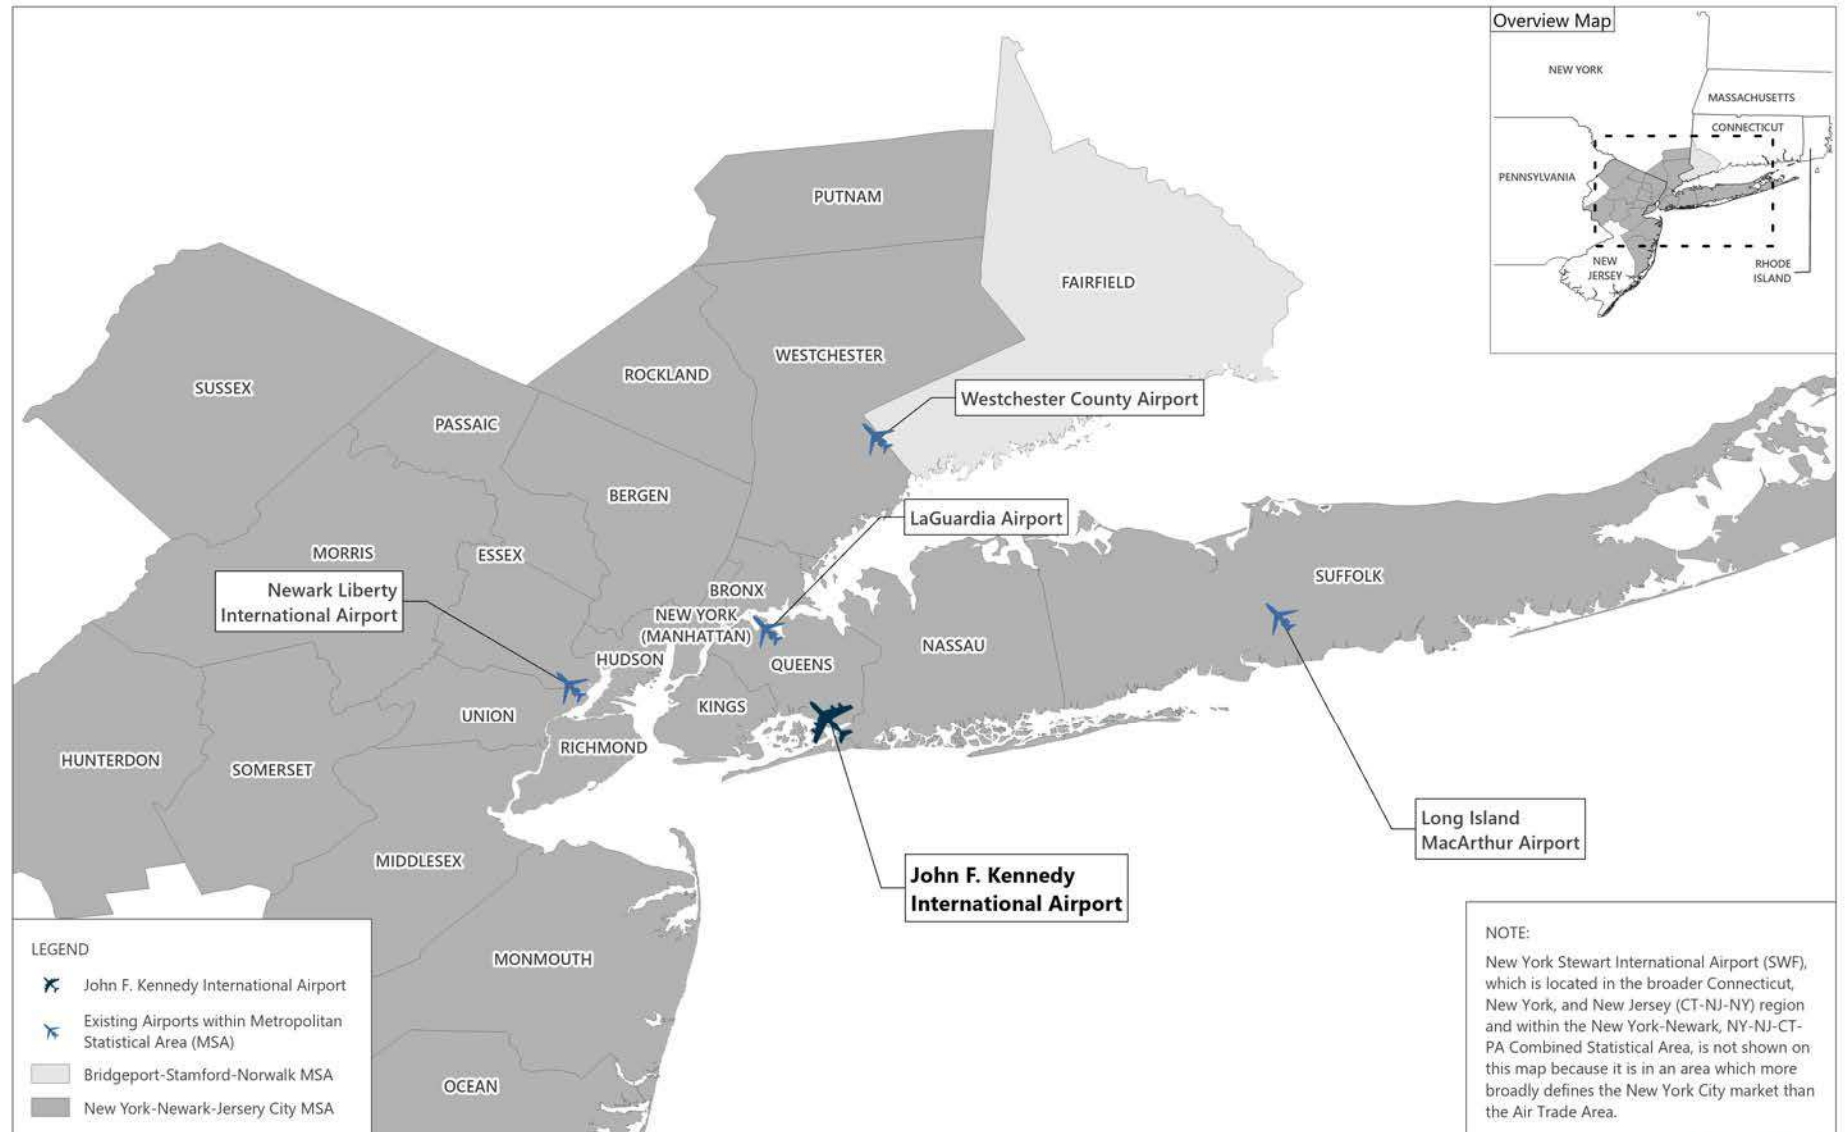

The Air Trade Area is served by five commercial airports. The Port Authority operates the three largest airports: JFK, EWR, and LGA. The airports in the Air Trade Area that are not operated by the Port Authority are Westchester County Airport (HPN) in White Plains, New York and Long Island MacArthur Airport (ISP) in the Town of Islip, New York. Factors such as the number of airlines serving the airport, the destinations served from the airport, fares, level of service, access to/from the point of origination/destination within the New York Area, and air traffic congestion/potential for travel delays all factor into a passenger's selection of an airline and airport for flights on a particular trip. JFK is located slightly farther than LGA from the densely populated core area surrounding Manhattan. However, constraints at LGA such as lack of FIS facilities and restriction on flight distances, which are described in **Section 4.5.9**, direct much of the international and long-haul market shares to JFK and EWR. The key physical aspects of each of the five airports serving the New York-New Jersey region is described in **Section 4.2.1**.

---

<sup>42</sup> A Metropolitan Statistical Area is a geographic entity delineated by the Office of Management and Budget for use by federal statistical agencies in collecting, tabulating, and publishing federal statistics. As defined by the Office of Management and Budget, Metropolitan Statistical Areas have at least one urbanized area with a population of 50,000 or more, plus adjacent territory that has a high degree of social and economic integration with the urbanized area, as measured by commuting ties.

<sup>43</sup> In defining the Air Trade Area, the driving time to/from the Airport was taken into consideration. Without traffic congestion, the Bridgeport-Stamford-Norwalk, CT Metropolitan Statistical Area (consisting of Fairfield County) is within 60 minutes driving time of the Airport and, while certain portions of the 23-county New York-Newark-Jersey City, NY-NJ Metropolitan Statistical Area are beyond 60 minutes driving time of the Airport, the New York-Newark-Jersey City, NY-NJ Metropolitan Statistical Area in its entirety is considered within the Air Trade Area for purposes of this Report.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

SOURCES: National Atmospheric and Atmospheric Administration, 2024 (state and county boundaries); Federal Aviation Administration, 2024 (airports).

EXHIBIT 3-1

JFK AIR TRADE AREA

## 3.2 DEMOGRAPHIC ANALYSIS

The relationship between the demographic and economic characteristics of an area and the related demand for air travel is particularly true for origin and destination (O&D) passenger traffic, which has historically accounted for the largest portion of airline traffic at the Airport—approximately 80 percent of total traffic at the Airport in 2023.<sup>44</sup> Therefore, the majority of demand for air travel at the Airport is influenced more by the local socioeconomic characteristics of the surrounding area than by individual airline decisions regarding service patterns in support of connecting activity. The following three subsections present data that indicate that the demographic and economic base of the Airport's Air Trade Area is capable of supporting increased demand for air travel. For purposes of comparison, demographic and socioeconomic data for the combined states of Connecticut, New Jersey, and New York (the CT-NJ-NY region) and the United States is provided in addition to demographic and socioeconomic data for the Air Trade Area.

### 3.2.1 POPULATION

There is typically a positive correlation between population growth in a local area and air travel demand. Historical population for the Air Trade Area, the CT-NJ-NY region, and the United States is presented in **Table 3-1**. As shown, Table 3-1 illustrates the population trends and compound growth rates for the Air Trade Area, the CT-NJ-NY region, and the United States. The Air Trade Area's population grew from approximately 19.4 million in 2002 to 20.5 million in 2022. Approximately 8.3 million of the Air Trade Area's 20.5 million residents lived in New York City<sup>45</sup> in 2022, making up roughly 41.2 percent of the Air Trade Area's population. The 23-county Air Trade Area is the most populous metropolitan region in the United States and is a major air transportation market.

Compared to the Air Trade Area, the CT-NJ-NY region experienced similar growth with the region's population increasing from 31.1 million in 2002 to 32.5 million in 2022. In contrast, population for the United States grew more rapidly between 2002 and 2022 than the Air Trade Area and the Tri-State Area, (0.7 percent CAGR compared to 0.3 percent and 0.2 percent, respectively).

Table 3-1 also presents population projections prepared by Woods & Poole Economics, Inc., for the Air Trade Area, the CT-NJ-NY region, and the United States in 2032.<sup>46</sup> Population in the Air Trade Area is projected to increase at a CAGR of 0.2 percent between 2022 and 2032, reaching approximately 21.0 million in 2032. The tri-state region's population is projected to reach approximately 33.1 million by 2032. This reflects a consistent but slow growth pattern, with a CAGR of 0.2 percent from 2022 to 2032, the same as the Air Trade Area's projected growth CAGR during the same period. Population in the US is projected to grow at a CAGR of 0.6 percent between 2022 and 2032 which is greater than the projected CAGR for the Air Trade Area and the CT-NJ-NY region (0.2 percent for each).

CY – Calendar Year

1 CY 2022 is the last year of historical data in the Woods & Poole database and is the basis for Woods & Poole’s future projections. Therefore, it is the last year of historical data displayed in this table. More recent data may be available from other sources.

SOURCE: Woods & Poole Economics, Inc., 2024 Complete Economic and Demographic Data Source, July 2024.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

According to the United States Census Bureau, the three largest metropolitan areas in the United States have each experienced population decreases from 2020 to 2023. New York-Newark-Jersey City, NY-NJ Metropolitan Statistical Area, despite being the most populated, saw its population decline from approximately 20.1 million in 2020 to 19.5 million in 2023. Similarly, Los Angeles-Long Beach-Anaheim, CA Metropolitan Statistical Area's population decreased from 13.2 million to 12.8 million, and the Chicago-Naperville-Elgin, IL-IN Metropolitan Statistical Area shrank from 9.45 million to 9.26 million over the same period.<sup>47</sup> The COVID-19 pandemic led to a significant exodus of residents from these urban centers, as people sought to avoid close personal interactions and shifted to remote work. However, recent data suggests that these population losses are subsiding due to increased immigration from abroad and a reduction in domestic out-migration.<sup>48</sup>

Furthermore, the Air Trade Area's lagging projected population growth is not unusual for its geographic region. As the region's population ages and domestic out-migration continues, future population growth in the Air Trade Area will largely be due to continued immigration.<sup>49</sup> Despite these relatively modest population growth trends, the projected increase of nearly 450,000 new residents in the Air Trade Area between 2022 and 2032 is expected to generate additional demand for airline service at the Airport.

### 3.2.2 AGE DISTRIBUTION AND EDUCATION

The demand for airline travel varies across different age groups, which significantly influences O&D passenger activity at the Airport. According to Consumer Expenditure Survey data from the US Department of Labor, Bureau of Labor Statistics, in the United States, persons between the ages of 35 and 54 account for 44.5 percent of expenditures on airfares and other types of transportation that charge fares.<sup>50</sup> Furthermore, according to Airlines for America, adults aged 25 to 39 had the highest propensity to fly in 2023.

**Table 3-2** indicates that, in 2022, the percentage of the population in the 35-54 age range was 26.0 percent in the Air Trade Area, slightly higher than the CT-NJ-NY region's 25.4 percent and the national average of 25.2 percent. The median age in the Air Trade Area was 39.6 years, which is slightly lower than the CT-NJ-NY region's median age of 40.1 years but greater than the national median age of 39.2 years. Table 3-2 also indicates that the Air Trade Area had 27.4 percent of its population within the age group with the highest propensity to fly in 2022, which is greater than both the CT-NJ-NY area (26.5 percent) and the national average (26.8 percent). This demographic's high propensity to travel aligns with its cohorts' professional and personal needs, involving frequent travel for work, vacations, and visiting, thereby driving a substantial portion of air travel activity.

This demographic's high propensity to travel aligns with its cohorts' professional and personal needs, involving frequent travel for work, vacations, and visiting, thereby driving a substantial portion of air travel activity.

## NOTES:

1 Median age data for the Air Trade Area and the combined Connecticut-New Jersey-New York region are not available. The median age for the Air Trade Area shown above is the weighted average median age of Bridgeport-Stamford-Norwalk, CT Metropolitan Statistical Area and the New York-Newark-Jersey City NY-NJ Metropolitan Statistical Area and the three-state region median age shown above is the weighted average median age of each of the respective states.

2 Percentages for educational attainment were taken from the 2022 American Community Survey.

SOURCES: Woods & Poole Economics, Inc., 2024 Complete Economic and Demographic Data Source, July 2024 (Age); US Census Bureau, 2022 American Community Survey 1-Year Estimates.

The education attainment of a region's population also impacts air travel demand. Higher education levels are typically associated with higher travel frequencies. According to Consumer Expenditure Survey data,<sup>51</sup> people with a college or associate's degree generate a high percentage of expenditures on airline travel. Data indicate that 83.4 percent of airfares are purchased by college graduates, while 8.3 percent are purchased by consumers who have had some college, and 8.3 percent are purchased by consumers who never attended college. As shown in Table 3-2, 50.9 percent of the Air Trade Area's population over the age of 25 have a post-secondary degree (associate's, bachelor's, master's, or doctorate), which is higher than both the CT-NJ-NY region (49.3 percent) and the nation (48.1 percent).

### 3.2.3 PER CAPITA INCOME AND INCOME DISTRIBUTION

Another indicator of a region's demand for airline travel is per capita personal income.<sup>52</sup> Per capita personal income indicates the relative affluence of a region's residents, as well as their ability to afford airline travel. It can also be an indicator of an area's attractiveness to business and leisure travelers. Regions with higher per capita personal income often have stronger business connections to the rest of the nation, as well as a more developed market for tourism, both of which the NYC region is known for. It should be noted, however, that per capita personal income is not adjusted for the cost of living in a particular area.

**Table 3-3** presents historical per capita personal income in the Air Trade Area, the CT-NJ-NY region, and the nation (in 2017 dollars) from 2012 through 2022 and projected for 2032. As shown, per capita personal income in the Air Trade Area exceeded that of both the CT-NY-NJ region and the nation. Between 2012 and 2022, the Air Trade Area experienced a CAGR of 1.5 percent in per capita personal income, slightly surpassing the 1.4 percent CAGR of the CT-NJ-NY region. However, both regions lagged behind the national CAGR of 1.9 percent during the same period, suggesting that while the Air Trade Area maintains a higher income level, its growth pace has been more modest in comparison to the national trend.

Woods & Poole Economics, Inc., projects per capita personal income in the Air Trade Area to increase from \$74,166 in 2022 to \$90,822 in 2032. This increase corresponds to a CAGR of 2.0 percent that is the same as the projected CAGR for the CT-NY-NJ region and exceeds the national projected CAGR of 1.7 percent.

The percentage of higher-income households (defined as those earning \$100,000 or more annually) within the Air Trade Area is another key indicator of potential demand for airline travel. According to Consumer Expenditure Survey data from the US Department of Labor, Bureau of Labor Statistics, 65.4 percent of airfare expenditures are made by households with annual incomes of \$100,000 or more.<sup>53</sup> **Exhibit 3-2** presents the percentages of households in various per capita personal income categories (as expressed in 2020 dollars) for the Air Trade Area, the CT-NJ-NY region, and the United States in 2022. In the Air Trade Area, 33.8 percent of households earned \$100,000 or more, greater than 30.2 percent in the CT-NY-NJ region, and 23.1 percent in the United.

---

<sup>51</sup> US Department of Labor, Bureau of Labor Statistics, "Consumer Expenditure Survey 2022," <https://www.bls.gov/cex/tables.htm> (accessed June 26, 2024).

<sup>52</sup> Per capita personal income is the sum of wages and salaries, other labor income, proprietors' income, rental income, dividend income, personal interest income, and transfer payments, less personal contributions for government social insurance, divided by the region's population.

<sup>53</sup> US Department of Labor, Bureau of Labor Statistics, "Consumer Expenditure Survey 2022," <https://www.bls.gov/cex/tables.htm> (accessed June 26, 2024).

### 3.3 ECONOMIC ANALYSIS

#### 3.3.1 GROSS DOMESTIC/REGIONAL PRODUCT

Gross Domestic Product (GDP) for the United States as a whole, and its state and county equivalent, Gross Regional Product (GRP), are measures of the market value of all final goods and services produced within a particular area for a specific period. GDP and GRP are among the broadest measures of the economic health of a particular area and, consequently, the area’s potential air travel demand.

**Table 3-4** presents historical GRP and GDP for the Air Trade Area, the CT-NY-NJ region, and the United States from 2012 through 2022, as expressed in 2017 dollars, and projected GRP and GDP for 2032. As shown, the GRP for the Air Trade Area increased at a CAGR of 2.1 percent, from approximately \$1.6 trillion in 2012 to approximately \$1.9 trillion in 2022. In comparison, the GRP for the CT-NY-NJ region grew 1.9 percent on average and the nation’s equivalent measure increased at CAGR of 2.5 percent.

Woods & Poole Economics, Inc. projects GRP for the Air Trade Area to increase from \$1.9 trillion in 2022 to \$2.4 trillion in 2032. This increase represents a CAGR of 2.4 percent, which is greater than the CAGRs projected for the CT-NY-NJ region and the nation over the same period, both of which are 2.2 percent.

TABLE 3-4 GROSS REGIONAL/DOMESTIC PRODUCT

### 3.3.2 EMPLOYMENT TRENDS

Employment growth is an additional factor that typically drives air travel demand. Recent employment trends for the Air Trade Area, the CT-NJ-NY region, and the United States are presented on **Table 3-5**. As shown, the Air Trade Area’s civilian labor force, defined as the civilian population over the age of 16 that is available for work, increased from approximately 10.4 million workers in 2013 to approximately 10.8 million workers in 2023. This represents a compound annual growth rate (CAGR) increase of 0.4 percent over the period, compared to an approximately 0.3 percent increase in the CT-NY-NJ region, and an approximately 0.7 percent increase for the labor force in the United States.

As also shown in Table 3-5, annual unemployment rates for the Air Trade Area and the CT-NY-NJ region were generally at or below the national unemployment rates each year from 2013 until the onset of the COVID-19 pandemic in 2020. The pandemic had a significant impact on employment, with the Air Trade Area’s unemployment rate peaking at 10.1 percent in 2020, compared to 9.5 percent for the CT-NY-NJ region and 8.1 percent nationally. By 2021, the unemployment rate in the Air Trade Area had decreased to 7.5 percent, though it remained higher than the 6.9 percent in the CT-NY-NJ region and the national rate of 5.3 percent.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

TABLE 3-5 CIVILIAN LABOR FORCE AND UNEMPLOYMENT RATE (2013-2023)

YEAR	CIVILIAN LABOR FORCE		
	AIR TRADE AREA	CT-NY-NJ REGION	UNITED STATES

NOTES:

CY – Calendar Year

The civilian labor force is in thousands.

Annual data is not seasonally adjusted.

Monthly data is seasonally adjusted.

SOURCE: US Department of Labor, Bureau of Labor Statistics, August 2024.

Employment in the Air Trade Area was particularly hard hit by the COVID-19 pandemic, and recovery has been slower than the rest of the United States, due in part to the significant role of tourism, hospitality, and retail in the Air Trade Area.<sup>54</sup> In 2022 and 2023, the unemployment rates remained consistent across the regions, with the Air Trade Area at 4.4 percent, the CT-NJ-NY region at 4.2 percent, and the United States at 3.6 percent. As of July 2024, the unemployment rate in the Air Trade Area increased slightly to 4.5 percent, while the CT-NJ-NY region and the nation each increased to 4.3 percent.

**Table 3-6** presents an analysis of nonagricultural employment trends by major industry sector; the Air Trade Area's employment trends are compared to those for the United States in CY 2013 and CY 2023. As shown, nonagricultural employment in the Air Trade Area increased from 9.4 million workers in CY 2013 to approximately 10.5 million workers in CY 2023. The increase represents a CAGR of 1.1 percent during this period (CY 2013 to CY 2023), compared to a 1.4 percent CAGR nationwide.

Most of the major industry groups in the Air Trade Area experienced positive employment growth between CY 2013 and CY 2023, with the greatest average annual growth occurring in the transportation/utilities sector. Along with the transportation/utilities sector, the education and health services, construction, and professional and business services sectors led employment growth in the Air Trade Area.

Compared to the US on the basis of CAGR, the Air Trade Area's growth in employment in each sector between CY 2013 and CY 2023 was less rapid except for employment in education and health services which grew more rapidly in the Air Trade Area than the nation— 2.6 percent compared to 1.9 percent, respectively. As shown in the bar chart in Table 3-6, employment in the Air Trade Area in CY 2023 is more concentrated in the education and health services, professional and business services, financial, other services, and information sectors than it is in the nation. Contrarily, employment in the government, trade, leisure and hospitality, transportation/utilities, construction, and manufacturing sectors are less concentrated in the Air Trade Area than it is in the United States.

Changes in the Air Trade Area's nonagricultural employment sector makeup differ from the national trends that occurred between CY 2013 and CY 2023. In the Air Trade Area during that period, it was primarily trade and government employment that lost part of their share of employment to the education and health services sector, as employment in the latter increased at greater CAGRs than the former. Manufacturing, other services, and financial employment as a percent of total employment decreased minimally (by less than 1 percent) for in the Air Trade Area, and employment in the information, construction, transportation/utilities, leisure and hospitality, and professional and business services sectors increased minimally (by less than 1.0 percent) for each industry. In the United States, the changes in employment by sector were not as significant as in the Air Trade Area, with only the government and trade sectors decreasing by more than a percentage point of total employment for each industry between CY 2013 and CY 2023 and no sectors increasing by more than 1 percent within the same period.

### 3.3.3 BUSINESS CLIMATE

The New York metropolitan area has historically been an economic leader of the nation and the world. From 2013 to 2023, the New York metropolitan area represented approximately 8.8 percent of the annual US GDP.<sup>55</sup> In 2023, New York City was ranked the wealthiest city in the world, home to 359,500 millionaires and 60 billionaires, with the city's cumulative wealth of more than \$3 trillion.<sup>56</sup> As a global financial center, New York City is characterized by its concentration of major financial institutions, including the two largest stock exchanges, financial markets, and numerous major banks, asset managers, insurance companies, and other financial institutions. New York City ranked first in the 2023 Global Financial Centres Index (GFCI 35) based on future competitiveness, with strengths in business environment, financial sector development, infrastructure, human capital, and reputation<sup>57</sup>

New York continues to be an attractive location for national and global businesses. Employers are drawn to the Air Trade Area and its educated labor force. In 2022, the *INSEAD Global Talent Competitiveness Index*<sup>58</sup> ranked New York #23 out of 173 cities for its ability to grow, attract, and retain talent.<sup>59</sup> New York was ranked #2 in the Global Power City Index, which assesses a city's comprehensive power, including research and development, cultural interaction, livability, environment, and accessibility, all of which contribute to its overall business attractiveness.<sup>60</sup>

The Air Trade Area fosters a favorable climate for businesses headquartered abroad, boosting international air travel demand. In 2023, over 500,000 workers in New York are employed due to international investment, and more than 1,830 international employers have operations in New York.<sup>61</sup> New York also received first place for its foreign direct investment (FDI) strategy according to FDI's Global Cities of the Future ranking.<sup>62</sup> Foreign-owned establishments and FDI contribute significantly to the economy of the Air Trade Area, facilitating the spread of global knowledge, technology, and ideas to innovation and competitiveness in the economy.

The startup activity in the region continues to attract new businesses, further solidifying the city's status as a global innovation hub. New York City ranked second in the Startup Genome Global Startup Ecosystem among 300 ecosystems globally, tied with London in 2023.<sup>63</sup> The ranking evaluates cities on several critical factors including the availability of venture capital, the presence of large and innovative companies, the quality of the workforce, market reach, and the strength of networking among startups.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

Despite New York City's strengths in retaining talent and entrepreneurs, the city underperforms in quality of life and environment categories compared to other top cities.<sup>64</sup> Issues such as income inequality and housing affordability remain significant challenges. In 2023, while the number of millionaires surged, lower and middle-income New Yorkers are increasingly leaving the city due to the high cost of living.<sup>65</sup> As detailed in a report by the Fiscal Policy Institute, these financial pressures make it difficult for lower and middle-income residents to maintain their standard of living, leading them to seek more affordable options elsewhere. This trend threatens essential services and white-collar industries critical to the city's stability and growth.<sup>66</sup>

### 3.3.3.1 MAJOR EMPLOYERS

A list of the 23 largest employers in the New York Area is presented in **Table 3-7**.<sup>67</sup> Major private sector employers, alongside higher education institutions, rely heavily on passenger service for business travel, education, and partnerships. Accessibility and connectivity are crucial for sustaining the dynamic and expansion of these sectors, fostering economic growth and maintaining the New York Area's position as a global hub for finance, education, and healthcare.

Each year, *Fortune* magazine ranks the top 500 US public companies by annual revenue. Per 2024 rankings, 70 Fortune 500 company headquarters are located in the Air Trade Area. New York City leads with 43 of these top companies, ranking first among other cities and serves as the home to major banks including JPMorgan Chase (ranked 12), Citigroup (ranked 21), Goldman Sachs Group (ranked 35), and Morgan Stanley (ranked 41). The diversified financial and commercial banking industries are the predominant sectors among the Fortune 500 companies in the Air Trade Area. Additionally, 15 Fortune 500 companies are located in Connecticut, with 10 of them based in Fairfield County which is in the Air Trade Area. A list of the 2024 Fortune 500 companies headquartered in the Air Trade Area is provided in **Table 3-8**. Some of the major employers listed in Table 3-8 are Fortune 500 companies headquartered in the Air Trade Area and are therefore listed in Table 3-7 as well.

The significance of the Air Trade Area extends beyond its high concentration of Fortune 500 company headquarters, encompassing the national and international headquarters of foundations, charities, and governmental institutions. Major entities like the Rockefeller Foundation, the global headquarters of the United Nations, and the New York Stock Exchange are situated in New York City. These institutions are pivotal to the economic infrastructure, enabling national and international collaborations, which underscores and drives the demand for air travel to the Air Trade Area.

### 3.3.4 EMPLOYMENT BY MAJOR INDUSTRIAL SECTOR

The Air Trade Area benefits from an economically diverse labor force. Sources of economic diversity in the region are discussed in this section by focusing on the following nonagricultural employment sectors, listed in order of their contribution to the Air Trade Area's employment base (see Table 3-6): education and health services, professional and business services, government, trade, leisure and hospitality, financial, transportation and utilities, other services, construction, manufacturing, and information.

### 3.3.4.1 EDUCATION AND HEALTH SERVICES

In CY 2023, the education and health services sector accounted for approximately 2.3 million employees in the Air Trade Area, representing 16.2 percent of its total nonagricultural employment. Employment in this sector within the Air Trade Area increased at a CAGR of 2.6 percent between CY 2013 and CY 2023, compared to a 1.9 percent CAGR increase for the United States over the same period. Northwell Health is the largest employer in the education and health services sector in the New York Area, with over 85,000 employees, making it the third-largest employer overall in the region. It comprises over 21 hospitals across 13 campuses and more than 850 outpatient facilities, serving as New York State's largest healthcare provider and private employer.<sup>68</sup> Other significant healthcare employers in the New York Area include New York-Presbyterian Hospital with 43,203 employees, Mount Sinai Health System with 41,486 employees, NYC Health + Hospitals with 37,272 employees, Montefiore Health System with 29,992 employees, and New York University Langone Health with 28,405 employees.

There are three relatively large higher education employers in the New York Area: New York University, Columbia University in the City of New York, and Stony Brook University. New York University (NYU), a private research university with its main campus in New York City, is the fourteenth largest employer in the New York Area, with 26,657 employees and approximately 57,000 students enrolled across its 11 schools and colleges in Manhattan and Brooklyn.<sup>69</sup> Columbia University has 19,110 employees and 35,872 enrolled students, making it the eighteenth largest employer in the area.<sup>70</sup> Stony Brook University employs 16,309 individuals and has approximately 25,865 enrolled students.<sup>71</sup>

New York City is a premier destination for international students in the United States, home to prestigious universities like Columbia University, New York University (NYU), Fordham University, and the City University of New York (CUNY).<sup>72</sup> During the 2022 to 2023 academic year, NYU hosted the greatest number of international students in the country, with over 25,000 international students and scholars from more than 120 countries.<sup>73</sup> These educational institutions generate significant airline traffic due to the high volume of international students traveling to and from their home countries, attending academic conferences, participating in study abroad programs, and engaging in research collaborations.

### 3.3.4.2 PROFESSIONAL AND BUSINESS SERVICES

Professional and business services employment in the Air Trade Area increased at a CAGR of 1.6 percent between CY 2013 and CY 2023, compared to a 2.1 percent increase for the United States over the same period. In CY 2023, this sector accounted for approximately 1.7 million employees in the Air Trade Area, representing 16.5 percent of

total nonagricultural employment and holding the second largest share of nonagricultural employment among all industries.

Professional services providers, while large in number, primarily employ smaller numbers of employees per firm. However, a notable example of a larger professional services provider in the Air Trade Area is Ernst & Young (EY). Providing services across assurance, consulting, law, strategy, tax, and transactions, EY employs 13,888 individuals in the Air Trade Area.<sup>74</sup>

### 3.3.4.3 GOVERNMENT

In CY 2023, the government sector accounted for approximately 1.3 million employees in the Air Trade Area, representing 12.8 percent of total nonagricultural employment in the Air Trade Area. Government employment in the Air Trade Area decreased at a CAGR of -0.2 percent between CY 2013 and CY 2023, which was lower than the growth rate for the United States (0.4 percent) during the same period.

Among the top 10 major employers in the Air Trade Area, as listed in Table 3-7, six are from the government sector. The largest overall employer in the New York Area is the Department of Education, with 144,594 employees. The New York City school system is the largest school district in the United States, overseeing 1,870 schools, including 274 charter schools, with a total of 1,047,895 students in 2023.<sup>75</sup> The second largest employer in the New York Area is the City of New York, with 100,868 employees. Other significant government employers in the New York Area include the MTA with 74,111 employees, the State of New York with 68,000 employees, the Police Department with 53,885 employees, and the Fire Department with 17,613 employees.

### 3.3.4.4 TRADE

In CY 2023, the trade sector accounted for approximately 1.3 million employees in the Air Trade Area, representing 12.5 percent of total nonagricultural employment. Trade employment in the Air Trade Area decreased at a CAGR of -0.7 percent between CY 2013 and CY 2023, compared to a 0.5 percent increase in the United States during the same period. Retail trade in the Air Trade Area accounted for approximately 31.1 percent of all trade employees in CY 2023, whereas wholesale trade accounted for approximately 68.9 percent of trade employees.

One of the primary reasons for the downturn in retail trade employment is the impact of the COVID-19 pandemic, which severely disrupted retail operations and caused a slower recovery compared to other industries. The shift toward e-commerce has significantly reduced the demand for physical retail spaces, and the high operational costs in New York City have forced many retail businesses to close.<sup>76</sup> The rise of remote and hybrid work has also reduced commuter traffic, making it difficult for retailers to sustain their business. As a result, the MTA has seen its retail revenue fall from \$72 million in 2019 to \$52 million in 2023.<sup>77</sup>

Despite the downturn, New York City is still home to some of the largest retailers, including a mix of high-end department stores, flagship locations of global brands, and popular local stores.<sup>78</sup> Saks Fifth Avenue, for example, is

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

a renowned luxury department store offering a wide range of designer brands and premium products headquartered in New York City. Macy's, the largest department store in the world, provides an extensive selection of clothing, accessories, and home goods. Bergdorf Goodman, an iconic store on Fifth Avenue, is known for its luxury fashion. One of the largest outlet malls in the Air Trade Area is The Mills at Jersey Gardens, located in Elizabeth, NJ, which contains over 190 stores, including high-end and popular brands like Ralph Lauren and Nike Factory Store.<sup>79</sup>

### 3.3.4.5 LEISURE AND HOSPITALITY

In CY 2023, the leisure and hospitality sector accounted for approximately 966,700 employees in the Air Trade Area, representing 9.2 percent of total nonagricultural employment. This is lower than the national average, where the sector accounted for 10.6 percent of total nonagricultural employment. Leisure and hospitality employment in the Air Trade Area increased at a CAGR of 1.3 percent between CY 2013 and CY 2023, compared to a 1.5 percent increase for the United States over the same period.

According to NYC & Company, the official destination marketing organization, convention, and visitors bureau for New York City, 62.2 million people visited the New York City area in 2023, with 11.6 million of them being international visitors, bringing the total visitor number to 93.4 percent of pre-pandemic levels in 2019.<sup>80</sup> International visitation saw a 23.4 percent increase compared to 2022.<sup>81</sup> Although the total number of visitors has not fully recovered to pre-pandemic levels, visitor spending showed an approximate 2.1 percent year-over-year increase from CY 2022 to CY 2023 (from \$47 million to \$48 million, respectively) and a CAGR of 0.2 percent from 2019 to 2023.<sup>82,83</sup>

International leisure travel has rebounded more quickly than business travel, reaching 84 percent of pre-pandemic levels and contributing more significantly to the total visitor recovery figure.<sup>84</sup> Meanwhile, international business travel in 2023 remained 33.3 percent below pre-pandemic levels.<sup>85</sup> The shift to remote work across the country has reduced the need for travel for meetings, leading companies to cut travel budgets and causing a notable effect on the overall international business visitor numbers.<sup>86</sup>

New York City continues to lead the nation in attracting the most visitors.<sup>87</sup> In 2023 and based on several criteria, New York ranked eighth among the top 10 destinations worldwide, moving up two spots from 2022, as shown in **Table 3-9**. Hotel performance remained strong, with an estimated 36.1 million room nights sold, approximately 10 percent below 2019 record levels and 7 percent increase from 2022.<sup>88</sup> This performance placed New York City among

The Air Trade Area serves as a bustling hub of sports, entertainment, and major events, drawing millions of domestic and international visitors annually. This area is home to iconic arenas and stadiums that host a variety of sports teams, events, and concerts. Notably, Madison Square Garden in New York City is home to the New York Knicks (basketball) and New York Rangers (ice hockey), as well as hundreds of events that attract millions of visitors each year. The Prudential Center in Newark hosts the New Jersey Devils (ice hockey), while MetLife Stadium in East Rutherford is the home field for both the New York Giants and New York Jets (football). Additionally, New York is renowned for hosting major sports events such as the US Open Tennis Championships in Flushing Meadows and the New York City Marathon, attracting international audience, athletes, and spectators to the Air Trade Area. The Air Trade Area is also a vibrant center for arts and culture that offers over 100 museums, galleries, and historic sites. Specific attractions include the Metropolitan Museum of Art, the National September 11 Memorial, Grand Central Terminal, the Statue of Liberty, and the Empire State Building. The Metropolitan Museum of Art regained its place as the most visited museum in the United States in 2023, with over 5.4 million visitors and receiving 10 percent more

visitors than in 2019.<sup>94</sup> Live theater, such as Broadway Shows, saw 12.3 million admissions in the 2022 to 2023 season, with attendance up 6 percent from 2022.<sup>95</sup>

Upcoming notable events in the Air Trade Area include the 2026 FIFA World Cup and the United States Semi-quincentennial (America 250) celebration. The 2026 FIFA World Cup final will be hosted at MetLife Stadium in East Rutherford, New Jersey, expecting to attract global audiences to the Air Trade Area for the final match on July 19, 2026.<sup>96</sup> Moreover, 2026 will see New York City commemorate America 250, celebrating 250 years since the founding of the United States. These celebrations will feature a variety of events and activities, likely drawing significant domestic and international attention and visitation to the Air Trade Area.

### 3.3.4.6 FINANCIAL

Financial, insurance, and real estate services comprise the financial sector. In CY 2023, the financial sector accounted for approximately 861,700 employees in the Air Trade Area. Unsurprisingly, employment in the financial sector plays a more significant role in the Air Trade Area than in the nation. The financial sector accounted for 8.2 percent of total nonagricultural employment in CY 2023 in the Air Trade Area compared to 5.9 percent in the nation. Employment in the financial sector in the Air Trade Area increased at a CAGR of 0.9 percent between CY 2013 and CY 2023, compared to a 1.5 percent increase for the United States over the same period.

New York City is home to some of the largest commercial and investment banks in the world, including JPMorgan Chase & Co., Goldman Sachs, Morgan Stanley, Bank of America, and Citigroup. These financial giants significantly contribute to employment in the Air Trade Area. JP Morgan Chase & Co. is ranked as the eight largest employers in the New York Area with 46,000 employees. Similarly, Bank of America, Morgan Stanley, and Citigroup employ 24,000, 21,000, and 18,500 people, respectively. The financial sector in New York City also offers some of the highest salaries across industries, including banking, fund and trust management, and corporate management, with the securities industry paying the highest average salary of any major sector in the city.<sup>97</sup> Globally, the financial sector is expected to see the most substantial growth in business travel, with a projected 72 percent increase in spending through 2028.<sup>98</sup> As shown in Table 3-8, the Air Trade Area is also home to several Fortune 500 insurance companies that contribute significantly to the Air Trade Area's employment landscape. Notable companies include MetLife, New York Life Insurance, and AIG, which employ thousands of individuals and play a critical role in the area's financial sector.

### 3.3.4.7 TRANSPORTATION AND UTILITIES

In CY 2023, the transportation and utilities sector accounted for approximately 428,800 employees in the Air Trade Area, which accounted for 4.1 percent of total nonagricultural employment. The transportation and utilities sector plays a relatively smaller role in the Air Trade Area's employment base than in the nation overall (a 4.1 percent share of total nonagricultural employment versus a 4.6 percent share, respectively). Transportation and utilities

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

employment in the Air Trade Area increased at a CAGR of 2.7 percent between CY 2013 and CY 2023, compared to an increase of 3.5 percent for the nation over the same period.

The common modes of transportation offered by transit service providers in the area include subways, buses, light-rail systems, commuter trains, and various ground transportation options such as taxis, ride-shares, and car rentals. Helicopter transfers between JFK, Newark, and Manhattan are also available.

The MTA is the largest public transit authority in the United States. The New York City Subway, with 472 stations, provides round-the-clock service throughout the five boroughs. Key lines include the 1, 2, 3, 4, 5, 6, A, C, E, F, N, Q, R, and W, which connect major hubs like Times Square, Grand Central Station, and Penn Station. The MTA also operates the Long Island Rail Road (LIRR) and Metro-North Railroad, which connect the city to Long Island, Westchester County, and Hudson Valley. In addition to the subway station, the MTA also operates a comprehensive bus network in New York City. Key routes include the M15 Select Bus Service (SBS) running along the First and Second Avenues in Manhattan, the Bx12 SBS in the Bronx, and the Q44 SBS in Queens. These buses feature dedicated lanes and limited stops to improve travel times.

The Port Authority provides critical transportation facilities in the New York City metropolitan area, including the PATH train system. The PATH provides 24-hour service between Manhattan and New Jersey, with major stations at World Trade Center, 33<sup>rd</sup> Street, Hoboken, and Newark. The Port Authority also manages major bus terminals, including the Port Authority Bus Terminal in Manhattan, the George Washington Bridge Bus Station in Upper Manhattan, and Journal Square Transportation Center in Jersey City. The Port Authority bus terminals serve as major transit hubs for commuter routes and long-distance intercity bus service.

The Staten Island Ferry is an important transportation link between Staten Island and Manhattan, operated by the New York City Department of Transportation (NYCDOT). The ferry provides 24-hour service for commuters and tourists, connecting the St. George Terminal in Staten Island with the Whitehall Terminal in Lower Manhattan. The Roosevelt Island Tramway provides a unique transit option between Roosevelt Island and Manhattan; it runs from the Tramway Plaza on 59<sup>th</sup> Street and Second Avenue in Manhattan to Tramway Plaza on Roosevelt Island.

Ride-sharing services, along with taxis, provide flexible transportation for New Yorkers and visitors. According to the NYC Taxi & Limousine Commission, there were a total of 177,673 active driver licenses in CY 2023, covering taxis, For-Hire Vehicles (FHV), paratransit, and commuter vans, an increase from 173,980 in CY 2022.<sup>99</sup>

Notable transportation and utility employers in the Air Trade Area, (see Table 3-7), include the MTA which is the fifth largest employer in the Air Trade Area with 74,111 employees and Consolidated Edison Co. of New York (ConEdison) with 14,592 employees.

### 3.3.4.8 OTHER SERVICES

In CY 2023, the other services sector accounted for approximately 424,400 employees in the Air Trade Area, which accounted for 4.1 percent of total nonagricultural employment. Other services employment in the Air Trade Area increased at a CAGR of 0.3 percent between CY 2013 and CY 2023, compared to an increase of 0.6 percent for the United States over the same period.

Other services employment includes personal services (e.g., assisting the elderly with activities of daily living); dry cleaning and laundry services; repair and maintenance services; religion, grant making, civic, professional, and similar organizations; and private household employment. Because the demand for these services is on an individual or

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

household level, trends in other services employment do not independently drive economic growth, but rather tend to reflect growth in other industry sectors, which results in an increased demand for other services by individuals and households.

### 3.3.4.9 CONSTRUCTION

In CY 2023, the construction sector accounted for approximately 417,800 employees in the Air Trade Area, which accounted for 4.0 percent of total nonagricultural employment. Construction employment in the Air Trade Area increased at a CAGR of 2.0 percent between CY 2013 and CY 2023, compared to an increase of 2.6 percent for the nation over the same period.

As major companies look to expand their presence in New York City, notable planned or ongoing construction projects in New York City include 270 Park Avenue, 70 Hudson Yards, and 2 World Trade Center.<sup>100</sup> Set to be the new global headquarters for JPMorgan Chase in 2025, 270 Park Avenue is a 60-story skyscraper featuring 2.5 million square feet of office space with a capacity of 15,000 employees; it will be the tallest structure in New York completely powered by hydroelectric energy.<sup>101</sup> The 70 Hudson Yards is a mixed-used, 45-story tower that is expected to open in 2026 with over 1.3 million square feet.<sup>102</sup> 2 World Trade Center is a planned office tower as part of the World Trade Center complex redevelopment. This project aims to add more than 80 stories and 2.8 million rentable square feet of space to the World Trade Center site, including a public plaza with access to over 350,000 square feet of shopping and restaurants in the adjacent transportation hub and concourses.<sup>103</sup>

Both building permits and housing sales and prices are indirect indicators of employment in the construction sector. As shown in **Table 3-10**, Air Trade Area residential building permits and valuation<sup>104</sup> experienced a greater increase than what was experienced by the CT-NY-NJ region and an equivalent increase in units and more modest increase in valuation compared to the United States over the CY 2013 to CY 2023 period. The Air Trade Area's residential building permit units grew by 4.3 percent on average from CY 2013 through CY 2023 (compared to 3.5 percent for the CT-NY-NJ region and 4.3 percent for the United States). Residential building valuation for the new units increased at a CAGR of 6.9 percent; comparing favorably to a lesser increase of 6.3 percent for the CT-NY-NJ region while not as high as the nation's CAGR of 7.5 percent.

The New York City residential real estate market experienced notable changes in fiscal year ended June 30, 2023.<sup>105</sup> The inventory of units for rent increased by 20.6 percent, reaching 37,420 units compared to 31,036 units in FY 2022. Concurrently, the median asking rent rose by 7.1 percent, from \$3,500 in FY 2022 to \$3,750 in FY 2023 while the inventory for sale also increased by 1.9 percent to 17,731 units. However, the median sale price for residential properties decreased by -1.9 percent, from \$800,005 in FY 2022 to \$785,000 in FY 2023. This highlights a mixed pattern in the NYC residential real estate market, with increasing rental inventory and prices, but a slight decrease

## NOTES:

CY – Calendar Year

Dollar amounts in thousands.

SOURCE: US Department of Commerce, Bureau of the Census, July 2024.

The vacancy rate in the Manhattan office market ended FY 2023 at 22.4 percent, exceeding the previous peak of 21.5 percent in FY 2022.<sup>106</sup> Although higher vacancy rates have not led to lower asking rents, market conditions remain challenging as demand for office space adjusts to hybrid schedules. In July 2024, office availability rates have held steady around 17 percent citywide since the end of 2021 with office attendance in the NYC metropolitan area from Tuesday to Thursday reached 57.3 percent of pre-pandemic levels in the fourth quarter of FY 2023.<sup>107, 108</sup>

### 3.3.4.10 MANUFACTURING

In CY 2023, the manufacturing sector accounted for approximately 378,500 employees in the Air Trade Area, representing 3.6 percent of total nonagricultural employment. Manufacturing employment in the Air Trade Area is significantly less concentrated than that in the nation, compared to a share of 8.3 percent in the nation. Manufacturing employment in the Air Trade Area decreased at a CAGR of -0.7 percent between CY 2013 and CY 2023 compared to an increase of 0.7 percent for the nation over the same period. The decline in New York City's manufacturing employment is primarily due to high real estate and labor costs, restrictive zoning regulations, and competition for space from other industries.<sup>109</sup>

<sup>106</sup> *Ibid.*

<sup>107</sup> The City of New York, "New York by the Numbers Monthly Economic and Fiscal Outlook," July 9, 2024, <https://comptroller.nyc.gov/newsroom/newsletter/new-york-by-the-numbers-monthly-economic-and-fiscal-outlook-no-91-july-9-2024/#new-york-city-economy>.

<sup>108</sup> *Ibid.*

<sup>109</sup> McDonough, Annie, "New York City's Uphill Battle to Save Manufacturing," *City & State New York*, July 5, 2023, <https://www.cityandstateny.com/policy/2023/07/new-york-citys-uphill-battle-save-manufacturing/388172/#:~:text=Once%20home%20to%20all%20kinds,New%20Yorkers%20worked%20in%20factories.>

Notable manufacturers in the Air Trade Area include pharmaceutical companies such as Pfizer Inc., Johnson & Johnson, and Merck. Consumer goods manufacturers in the region encompass General Electric, which produces appliances, lighting, and industrial products; Unilever, known for its personal care, hygiene, and food products; PepsiCo, a leader in beverages and snack foods; and Estee Lauder Companies, specializing in cosmetics and skincare products.

#### 3.3.4.11 INFORMATION, TECHNOLOGY, AND MEDIA

The information, technology, and media sector combines telecommunications service providers, traditional publishing, motion picture and sound recording, broadcasting, software, online services, and data processing. In CY 2023, the information sector accounted for approximately 328,600 employees in the Air Trade Area, representing 3.1 percent of total nonagricultural employment. The sector plays a significant role in the Air Trade Area's employment base compared to a share of 1.9 percent in the nation. Information, technology, and media employment in the Air Trade Area grew at a CAGR of 1.1 percent between CY 2013 and CY 2023, which was the same for the nation.

The Air Trade Area is home to some of the largest and most influential companies in the information, technology, and media sector. NBCUniversal Media, a global leader in media and entertainment known for its extensive portfolio of television broadcast networks and film studios; Verizon, one of the largest telecommunications service providers in the United States; and notable software companies such as Spotify and Bloomberg are all headquartered in New York City. Additionally, Altice USA, a provider of broadband and telephony services, is headquartered in Long Island City, NY, while IBM, a global technology and innovation company, is based in Armonk, NY. These notable companies collectively enhance the diverse information sector within the Air Trade Area, driving innovation and economic growth.

### 3.4 ECONOMIC OUTLOOK

#### 3.4.1 SHORT-TERM ECONOMIC OUTLOOK

The Congressional Budget Office (CBO) economic outlook released in June 2024 projects a 2.6 percent year-over-year increase in real GDP for 2024, which is similar to the real GDP growth in 2023 (2.5 percent). The real GDP growth rate is projected by the CBO to decrease to 2.1 percent in 2025, and then fall to 1.8 percent by 2026, around where it stays until the end of the CBO outlook period (2034).<sup>110</sup> Real GDP growth projected by CBO is similar to that projected by the International Monetary Fund (IMF). The IMF economic outlook released in April 2024 projects a 2.7 percent year-over-year increase in real US GDP for 2024. 2025 is then projected to see slower year-over-year US GDP growth of 1.9 percent.<sup>111</sup> The CBO projects the national unemployment rate to rise to 4.4 percent by the end of CY 2027.<sup>112</sup>

The City of New York, per its Executive Budget for fiscal year 2025, expects its economy (i.e., real gross city product) will grow from CY 2024 through CY 2028 by a Compound Average Annual Growth Rate (CAGR) of 1.7 percent and the unemployment rate to increase from a projected 3.9 percent in CY 2024 to 4.4 percent in CY 2028.<sup>113</sup>

<sup>113</sup> The City of New York Mayor's Office of Management and Budget, "Executive Budget Fiscal Year 2025," April 2024.

### 3.4.2 LONG-TERM ECONOMIC ASSUMPTIONS CONSIDERED IN VALIDATING THE ENPLANED PASSENGER FORECASTS

As described in more detail in Chapter 4, the methodologies used in developing forecasts of enplaned passengers at the Airport and of Terminal 6 included (among other methodologies) statistical linear regression modeling, with local and national socioeconomics and demographics as independent variables and O&D passengers as the dependent variable. Independent variables considered for this analysis included population, employment, earnings (total and net), personal income (per capita and total), and GRP/GDP (per capita and total) for the combined area of two Metropolitan Statistical Areas which comprise the Air Trade Area, and the United States.

For each socioeconomic and demographic variable, Ricondo utilized regression modeling which produced a coefficient that was applied to the corresponding variable projection developed by Woods & Poole to provide a forecast of enplaned passengers at JFK. **Table 3-11** presents the CY 2022 and CY 2032 figures used in the modeling that Ricondo developed to evaluate forecasts of activity prepared by Airport Strategy & Marketing (ASM) for the Airport and Terminal 6, as well as the CAGR for each independent variable in CY 2022 and CY 2032. As previously stated, the demand for air transportation at an airport is, to a large degree, dependent upon the demographic and economic characteristics of an airport's Air Trade Area. The projected growth during the Projection Period in the economic indicators in Table 3-11 supports the underlying assumptions that drive the Ricondo forecast which was used to evaluate ASM's airline activity forecast discussed in **Section 4.6.3**.

TABLE 3-11 PROJECTED ECONOMIC VARIABLES USED IN THE PASSENGER DEMAND FORECASTS

VARIABLE <sup>1,2</sup>	CY 2022 <sup>5</sup>	CY 2032	CAGR CY 2022 - CY 2032
Air Trade Area Gross Regional Product (GRP) <sup>3</sup>	\$1,933,990	\$2,443,237	2.4%
US Gross Domestic Product (GDP) <sup>3</sup>	\$21,788,014	\$26,995,687	2.2%
Air Trade Area Net Earnings <sup>3</sup>	\$986,890	\$1,240,109	2.3%
US Net Earnings <sup>3</sup>	\$11,644,967	\$14,510,547	2.2%
Air Trade Area Total Earnings <sup>3</sup>	\$1,133,784	\$1,472,841	2.7%
US Total Earnings <sup>3</sup>	\$13,105,445	\$16,891,768	2.6%
Air Trade Area Total Employment	14,072,581	16,583,954	1.7%

Air Trade Area Total Personal Income <sup>3</sup>	\$1,522,394	\$1,905,040	2.3%
US Total Personal Income <sup>3</sup>	\$18,803,588	\$23,670,984	2.3%
Air Trade Area Per Capita Personal Income <sup>4</sup>	\$74,166	\$90,822	2.0%
US Per Capita Personal Income <sup>4</sup>	\$56,421	\$66,646	1.7%
Air Trade Area Population	20,526,852	20,975,445	0.2%
US Population	333,271,411	355,174,678	0.6%

NOTES:

CY – Calendar Year

CAGR – Compound Annual Growth Rate

1 Employment data include wage and salary workers, proprietors, private household employees, and miscellaneous workers. Establishment data from the US Department of Commerce, Bureau of Economic Analysis is used in this table, which differs from employment data in Table 3-5 due to differing sources, definitions, and methodologies.

2 Some variables presented in this table are exclusive to the aviation forecast and are not included in the demographic and economic analysis discussed in this chapter.

3 Figures displayed in millions of 2017 dollars.

4 Figures in 2017 dollars.

5 CY 2022 is the last year of historical data in the Woods & Poole database and is the basis for Woods & Poole's future projections. Therefore, it is the last year of historical data displayed in this table. More recent data may be available from other sources.

SOURCE: Woods & Poole Economics, Inc., 2024 Complete Economic and Demographic Data Source, July 2024.

### 3.4.3 CONCLUSIONS

The Air Trade Area population was 20.5 million in CY 2022, and it is projected by Woods & Poole to increase to approximately 21.0 million by CY 2032. This represents a 0.2 percent CAGR for the Air Trade Area, which is the same as that of CT-NJ-NY region and below that of the United States during the same period (0.6 percent).

Per capita personal income was greater in the Air Trade Area than in the CT-NJ-NY region and the United States between CY 2012 and CY 2022. The Air Trade Area's per capita personal income in CY 2022 (\$74,166) was 31 percent greater than per capita personal income in the United States (\$56,421) and 12 percent greater than personal income in the CT-NJ-NY region (\$80,346). Per capita personal income in the Air Trade Area is projected by Woods & Poole to increase at a CAGR of 2.0 percent between CY 2022 and CY 2032, which is the same as the projected CAGR of the CT-NJ-NY region and greater than that of the United States (1.7 percent).<sup>114</sup>

Between CY 2012 and CY 2022, the Air Trade Area's GRP grew at a CAGR of approximately 2.1 percent, which is greater than that of the CT-NJ-NY region and less than that of the United States during the same period, 1.9 percent and 2.5 percent, respectively. GRP in the Air Trade Area is projected by Woods & Poole to increase at a CAGR of 2.1 percent between CY 2022 and CY 2032; CT-NJ-NY region GRP and US GDP are projected to increase less rapidly by comparison, each with CAGRs of 2.2 percent.

Between CY 2013 and CY 2023, the Air Trade Area's labor force grew at a CAGR of approximately 0.4 percent, which is greater than that of the CT-NJ-NY region and less than that of the United States during the same period (0.3 percent and 0.7 percent, respectively).

In terms of percentages of industry sector shares, CY 2023 employment in the following industry sectors in the Air Trade Area exceeded employment in the United States: Education and Health Services, Professional Services, Financial, Other Services, and Information.

The data cited in this chapter supports the conclusion that the Air Trade Area has a large and diverse economy with projected growth that is anticipated to increase the demand for airline travel at the Airport through the Projection Period (ending FY 2032).

---

<sup>114</sup> Amounts are in 2017 dollars.

## 4. PASSENGER DEMAND AND AIR SERVICE ANALYSIS

This chapter describes historical and forecast aviation activity at the Airport and discusses key factors affecting these trends.

### 4.1 GLOBAL AND NATIONAL PERSPECTIVE OF THE AIRPORT

The New York City market includes the five commercial service airports located within the Air Trade Area (JFK, Newark Liberty International (EWR), Westchester County (HPN), Long Island MacArthur (ISP), and LaGuardia (LGA) airports) as well as New York Stewart International Airport (SWF), which is located in the broader Connecticut, New York, and New Jersey (CT-NJ-NY) region and within the New York-Newark, NY-NJ-CT-PA Combined Statistical Area, which more broadly defines the New York City market than the Air Trade Area. Based on historical airline bookings data, the New York City market was ranked second in the world and first in the United States (US) in terms of total origin and destination (O&D) passengers. O&D passengers represent passengers that begin or end their journey at an Air Trade Area airport. **Table 4-1** presents the top five metropolitan areas globally in terms of total O&D passengers in 2023 as well as total O&D passengers and the market ranking from 2019 through 2022; **Table 4-2** presents this data for the top five metropolitan areas in the US in terms of total O&D passengers in 2023. New York City has remained a significant global market for O&D passengers throughout the past five years, including the COVID-19 pandemic period, and has also been the largest market in the US throughout the period.

**Table 4-3** presents the top 25 airports in the US by domestic enplaned revenue passengers carried by scheduled passenger airlines as recorded in the US Department of Transportation (USDOT) T-100 database; **Table 4-4** presents the top 25 airports by international enplaned revenue passengers. JFK ranked 17<sup>th</sup> among US airports by domestic enplaned revenue passengers in 2023. The Airport currently ranks one position higher than prior to the pandemic, and the Airport recovered to pre-pandemic domestic enplaned revenue passenger levels in 2023. Throughout the period from 2019 to 2023, JFK has been the largest US airport by volume of international enplaned revenue passengers, and the volume recorded in 2023 represents 96.6 percent of pre-pandemic international enplaned revenue passenger volumes recorded in 2019. In 2023, JFK handled 51 percent more international enplaned passengers than the second largest US airport by volume of international enplaned passengers, LAX.

## 4.2 REGIONAL PERSPECTIVE OF THE AIRPORT

### 4.2.1 AIRPORTS SERVING THE NEW YORK CITY AIR TRADE AREA

The New York City Air Trade Area is served by three major airports. These airports are all defined by the Federal Aviation Administration (FAA) as large-hub airports based on the percentage of nationwide passenger activity handled at each facility.<sup>115</sup> A brief overview of each airport is presented below:

- JFK is the largest airport serving the Air Trade Area; serving 62.4 million total passengers in 2023, representing 99.8 percent of passenger volumes recorded in 2019.<sup>116</sup> It is the region's primary international gateway and is served by 65 foreign flag airlines in addition to 8 US airlines.<sup>117</sup> JFK also serves as a hub for three airlines: Delta Air Lines (Delta), JetBlue Airways (JetBlue), American Airlines (American). The role that JFK plays in each of these airlines' route networks is presented in more detail in **Section 4.5.7**.
- EWR is the second largest airport serving the Air Trade Area, serving 49.1 million total passengers in 2023, a 5.8 percent increase relative to 2019.<sup>118</sup> It is the region's secondary international gateway and a hub for United Airlines (United), which is the largest single airline hub among the Air Trade Area's airports.
- LGA is the region's third-largest airport, serving 32.4 million total passengers in 2023, a 4.2 percent increase relative to 2019.<sup>119</sup> LGA serves as a hub for Delta and American and primarily accommodates passengers traveling on domestic itineraries.

The large-hub airports serving the Air Trade Area have constraints in the form of slot and destination limitations, which are discussed in **Section 4.5.9**.

Two smaller airports also serve the Air Trade Area:

- HPN, located approximately 33 miles north of Manhattan, served 2.4 million revenue passengers in 2023, representing a 30.6 percent increase from 2019.<sup>120</sup> JetBlue has represented the largest share of passengers and departing seats at HPN throughout the period, and HPN is also served by American, BermudAir, Breeze Airways (Breeze), Cape Air, Delta, and Tradewind Aviation. BermudAir commenced service to Bermuda L. F. Wade International Airport (BDA) in 2023, while the remaining destinations served from HPN are located in the US.
- ISP, located approximately 55 miles east of Manhattan, served 1.3 million total passengers in 2023, a 17.5 percent decrease relative to 2019.<sup>121</sup> Southwest Airlines (Southwest) currently represents the largest share of revenue passengers and departing seats at ISP, followed closely by Frontier Airlines (Frontier), which was the largest airline by both metrics in 2022. Breeze also serves ISP, and JetBlue is scheduled to begin service during 2024. All destinations served from ISP are within the US.
- The catchment areas of HPN and ISP have some overlap with the catchment areas of JFK, EWR, and LGA, but they capture a small component of the overall New York City market due to their distance from Manhattan and

---

<sup>115</sup> As defined by the FAA, a large-hub airport enplanes 1.0 percent or more of nationwide revenue enplaned passengers. This was equal to approximately 9.4 million revenue enplaned passengers in FY 2023.

<sup>116</sup> Port Authority of New York and New Jersey, July 2024.

<sup>117</sup> Per published airline schedules for the year ending December 2024.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

the core of the New York City metropolitan area as well as their relatively limited air service compared to the large-hub airports serving the Air Trade Area. Similar to the large-hub airports, SWF is also operated by the Port Authority and is located within the New York-Newark, NY-NJ-CT-PA Combined Statistical Area. However, it is located outside the Air Trade Area, approximately 64 miles from Manhattan and the core of the metropolitan area.

#### 4.2.2 AIRPORT SHARE OF NEW YORK CITY TRAFFIC

**Table 4-5** presents the total domestic passengers and passenger shares among JFK, EWR, LGA, and the consolidated passengers and passenger share of HPN, ISP, and SWF (i.e., "Other"). Between 2014 and 2023, JFK represented between 28 percent and 33 percent of total domestic passengers, with EWR and LGA representing similar shares during most of this period. JFK domestic passengers increased by a 2.4 percent CAGR between 2014 and 2019 compared to a 3.8 percent CAGR for all airports serving the New York City market during the same period. JFK, EWR, LGA, and the consolidated other airports with commercial service each recovered to pre-pandemic domestic passenger volumes in 2023. Growth in domestic passenger volumes at JFK from 2014 to 2023 represented a 1.7 percent CAGR, whereas domestic passenger volumes at commercial service airports serving New York City as a whole increased at a 2.8 percent CAGR.

TABLE 4-5 HISTORICAL SHARES OF DOMESTIC PASSENGERS FOR AIRPORTS SERVING THE NEW YORK CITY MARKET

YEAR	DOMESTIC PASSENGERS <sup>1</sup>

## NOTES:

EWR – Newark Liberty International Airport

LGA – LaGuardia Airport

JFK – John F. Kennedy International Airport

1 Includes passengers as reported by the Port Authority of New York and New Jersey for EWR, LGA, JFK, and SWF and revenue passengers reported by the US Department of Transportation T-100 database for other airports.

2 Other includes Westchester County Airport (HPN), Long Island MacArthur Airport (ISP), and New York Stewart International Airport (SWF).

SOURCES: Port Authority of New York and New Jersey, August 2024 (EWR, LGA, JFK, and SWF passenger data); Cirium Diio, August 2024 (US Department of Transportation, T-100 data, HPN and ISP passenger data).

JOHN F. KENNEDY INTERNATIONAL AIRPORT

**Table 4-6** presents the total international passengers and passenger shares among JFK, EWR, LGA, and the consolidated passengers and passenger share of HPN, ISP, and SWF. Between 2014 and 2023, JFK represented between approximately 65 percent and 69 percent of total international passengers, with EWR representing the next largest share, ranging between approximately 27 percent and 34 percent. LGA represented most of the remainder, between approximately 2 and 4 percent during the period. JFK international passengers increased by a 4.0 percent CAGR between 2014 and 2019 compared to a 4.1 percent CAGR for all airports serving the New York City market during the same period. International passenger volumes at JFK, EWR, LGA, and the consolidated other airports with commercial service remained below pre-pandemic volumes in 2023, though recovery continued relative to the prior year. Growth in international passenger volumes at JFK from 2014 to 2023 represented a 1.9 percent CAGR, slightly higher than the 1.8 percent CAGR recorded for international passenger volumes at all commercial service airports serving New York City.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

**Exhibit 4-1** presents the airport share of the Air Trade Area’s total passengers between 2014 and 2023. Throughout the period, JFK has represented the largest share of total passengers. The Airport represented between 43 percent and 45 percent of total passengers prior to the pandemic, decreasing to 40 percent during 2020 and 2021 due to the effects of the pandemic on international passenger demand, which are detailed further in **Section 4.5.1**. The Airport handled 42 percent of total passengers in 2022 and 2023, nearer to pre-pandemic levels. EWR represented the next largest share of total passengers, ranging between 30 percent and 32 percent prior to the pandemic, peaking at 38 percent in 2020, and decreasing to 33 percent in 2022 and 2023. LGA has represented between 12 percent and 23 percent of total enplaned passengers between 2014 and 2023. **Exhibit 4-2** presents the share of New York City market O&D passengers by airport. JFK’s share of O&D passengers has been nearly the same as its share of total enplaned passengers throughout the historical period, ranging between approximately 39 percent and 45 percent of total O&D passengers.

4.2.3 JFK AS AN INTERNATIONAL GATEWAY

The Airport is the primary international gateway for the Air Trade Area, representing approximately two-thirds of international enplaned passengers during the period from 2014 to 2023. EWR is the second largest international gateway serving the New York City market, serving between one-quarter and one-third of international demand. **Table 4-7** presents the share of international passengers at the large-hub airports serving the Air Trade Area, as well as the aggregate total from the other three airports with commercial service in the broader New York City market. The table also includes the international destinations served, foreign countries served, and the number of foreign flag airlines serving the airports. JFK leads all airports serving the New York City market in each metric.

TABLE 4-7 INTERNATIONAL PASSENGERS, DESTINATIONS AND FOREIGN FLAG AIRLINES

METRIC	JFK	EWR	LGA	OTHER
2023 Share of International Passengers	68.1%	28.0%	3.7%	0.2%
International Destinations Served Nonstop	123	91	5	3
Foreign Countries/Regions Served Nonstop	79	55	3	3
Foreign Flag Airlines	65	25	1	3

NOTE: International destinations and foreign countries served and the number of foreign flag airlines based on published airline schedules for 2024. Some scheduled activities may not actually operate.

SOURCES: Port Authority of New York and New Jersey, August 2024 (EWR, LGA, JFK, and SWF passenger data); Cirium Diio, August 2024 (US Department of Transportation, T-100 data, HPN and ISP passenger data); Cirium Diio, August 2024 (published airline schedules).

JOHN F. KENNEDY INTERNATIONAL AIRPORT

Transatlantic markets, inclusive of Europe, Africa, the Middle East, and Central and South Asia, represent approximately 52 percent of the total international traffic at JFK. The Airport and the broader New York City market are well-positioned to serve as a transatlantic gateway given their geographical position in the northeast US; travel across the Atlantic connecting through most other US airline hubs would require a circuitous routing. The Air Trade Area is very well served by foreign flag airlines on transatlantic routes. In 2024, all but one foreign flag airline providing regular transatlantic service to the US served one or more Air Trade Area airports.<sup>122</sup> As presented in **Exhibit 4-3**, nearly all, 99.5 percent, of transatlantic O&D passengers in the New York City area depart or arrive on the transatlantic leg of their journey from an airport in the Air Trade Area, with the remainder connecting at another North American gateway.

EXHIBIT 4-3 AIR TRADE AREA TRANSATLANTIC O&D PASSENGER ITINERARIES

NOTES:

ATL – Hartsfield-Jackson Atlanta International Airport; BOS – Boston Logan International Airport; CLT – Charlotte Douglas International Airport; O&D – Origin & Destination passengers; US – United States; YUL – Montréal-Pierre Elliott Trudeau International Airport; YYZ – Toronto Pearson International Airport

SOURCE: Sabre Market Intelligence, August 2024 (passenger bookings data).

JFK and EWR are the only major airports serving the Air Trade Area that have nonstop transatlantic service. **Exhibit 4-4** presents a comparison of scheduled departing seats from JFK and EWR to transatlantic destinations for the 12-month period ending December 2024. JFK seat capacity on transatlantic routes is more than double that of EWR. JFK also has more service to unique transatlantic destinations than EWR, with 91 percent of EWR’s seat capacity on transatlantic routes to destinations that are also served from JFK, compared to 83 percent for JFK. The residual 17 percent of JFK’s transatlantic seat capacity represents transatlantic destinations that are only served from JFK.

### 4.3 AIRLINES SERVING THE AIRPORT

More airlines serve JFK than any other airport in the US. As of August 2024, 73 airlines served provide scheduled passenger service at JFK during the 12 months ending in December 2024, 67 served LAX, the next most served

<sup>122</sup> Based on published airline schedules for the year 2024; excludes charter operations and subsidiary airlines. The scheduled passenger airline serving exclusively non-New York City area airports is Air Tahiti Nui, which operates service from Paris Charles de Gaulle Airport (CDG) to Tahiti Faa’a International Airport (PPT) in Papeete, Tahiti by way of Los Angeles International Airport (LAX) and Seattle-Tacoma International Airport (SEA).

JOHN F. KENNEDY INTERNATIONAL AIRPORT

airport, and MIA, SFO, and ORD the third, fourth, and fifth most served airports had service from 55, 53, and 50 airlines, respectively.<sup>123</sup>

EXHIBIT 4-4 JFK AND EWR TRANSATLANTIC CAPACITY (2024)

NOTE:  
 EWR – Newark Liberty International Airport; JFK – John F. Kennedy International Airport  
 SOURCE: Cirium Diio, August 2024 (published airline schedules).

**Table 4-8** lists the passenger airlines providing scheduled service at the Airport during the 12 months ending in December 2024 as of August 2024. The Airport is currently served by 8 scheduled US airlines and 65 foreign flag airlines.

**Table 4-9** presents US airlines providing scheduled service during the period from 2014 to 2024. The Airport benefits from a stable core of five US airlines that have provided scheduled service to the Airport throughout the historical period. Sun Country Airlines (Sun Country) and Frontier have begun service to the Airport since the onset of the COVID-19 pandemic, commencing service in 2023 and 2024, respectively. United, which operates a hub at EWR, briefly resumed service at the Airport in 2021, but the airline suspended service at the Airport in 2023.

**Table 4-10** presents foreign flag airlines providing scheduled service during the period from 2014 to 2024. The number of foreign flag airlines peaked in 2018 and 2019, when 71 airlines served the Airport. Thirty-five airlines have consistently served the Airport throughout the historical period. During the period, the number of foreign flag airlines serving the Airport has increased from 62 airlines in 2014 to 64 airlines in 2024. Among airlines currently serving the Airport, eight airlines that did not operate at the Airport prior to the COVID-19 pandemic have commenced service from the Airport since 2020, including Azores Airlines, Neos, and Air Senegal in 2021; Norse Atlantic Airways, Air New Zealand, and Flair Airlines in 2022; as well as Scandinavian Airlines in 2023. These airlines provide service to a wide range of destinations, including Africa, Canada, and Europe along with the Airport’s first nonstop links to Oceania. Several airlines that provided service to the Airport in 2019 and early 2020 have not resumed service since the onset of the pandemic due to shifting business models, cessation of operations, or other

<sup>123</sup> Cirium Diio (published airline schedules), August 2024.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

strategic and financial changes. Similarly, no service to Ukraine nor Russia has operated since the onset of war between the two countries in early 2022. Potential resumption of service or lack thereof by either grouping of airlines is not anticipated to have a material impact on the activity forecast for Terminal 6.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

## 4.4 HISTORICAL AIRPORT ACTIVITY

The following sections present a review of JFK's historical passenger activity, air service, and passenger airline operations.

### 4.4.1 PASSENGERS

**Table 4-11** presents historical domestic, international, and total passengers (enplaned and deplaned) at the Airport. Passenger volumes increased in the period prior to the pandemic, with growth in domestic, international, and total passengers from 2014 to 2019 representing 2.4 percent, 4.0 percent, and 3.3 percent CAGRs, respectively. Passenger volumes fell in 2020 because of the COVID-19 pandemic; the effects of the pandemic are discussed further in **Section 4.5.1**. Domestic passenger volumes recovered to pre-pandemic levels in 2022 and grew at a 1.7 percent CAGR from 2014 to 2023. International passengers, which represent a large share of total passengers at the Airport, were slower to recover from the effects of the pandemic and represented 97.2 percent of pre-pandemic volumes in 2023. Total passenger volumes in 2023 represented 99.8 percent of pre-pandemic volumes.

TABLE 4-11 JFK HISTORICAL DOMESTIC, INTERNATIONAL, AND TOTAL PASSENGERS

YEAR	DOMESTIC PASSENGERS	ANNUAL GROWTH	INTERNATIONAL PASSENGERS	ANNUAL GROWTH	TOTAL PASSENGERS	ANNUAL GROWTH
2014	25,021,432	4.7%	28,198,994	6.2%	53,220,426	5.5%
2015	26,806,854	7.1%	30,077,876	6.7%	56,884,730	6.9%
2016	27,324,138	1.9%	31,779,334	5.7%	59,103,472	3.9%
2017	26,961,081	-1.3%	32,527,901	2.4%	59,488,982	0.7%
2018	28,117,337	4.3%	33,518,898	3.0%	61,636,235	3.6%
2019	28,233,791	0.4%	34,337,672	2.4%	62,571,463	1.5%

2021	18,037,803	118.2%	12,750,519	52.5%	30,788,322	85.1%
2022	28,449,455	57.7%	26,838,256	110.5%	55,287,711	79.6%
2023	29,094,515	2.3%	33,369,816	24.3%	62,464,331	13.0%
Jan to Jun 2023	14,465,934		15,502,603		29,968,537	
Jan to Jun 2024	13,601,782	-6.0%	16,704,436	7.8%	30,306,218	1.1%
<b>Compound Annual Growth Rate</b>						
2014 – 2019	2.4%		4.0%		3.3%	
2014 – 2023	1.7%		1.9%		1.8%	

## NOTE:

Passengers represent revenue passengers only.

SOURCE: Port Authority of New York and New Jersey, August 2024

Notable details regarding passenger activity at the Airport between 2014 and 2024 are included below. Additional context regarding the evolution of the route networks and seat capacity offered by the Airport's hub airlines, American, Delta, and JetBlue, is provided in **Section 4.5.7**.

- **2014 to 2019:** Both domestic and international passenger volumes grew prior to the pandemic. During the period, several new airlines began providing service to the Airport along with new nonstop destinations served

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

from JFK. New domestic airlines providing service included Alaska Airlines (Alaska) and Cape Air. New international airlines included Air Serbia, China Southern Airlines, Condor, Ethiopian Airlines, Kenya Airways, Philippine Airlines, TAP Air Portugal, Viva Aerobus, Volaris, WestJet Airlines, and Xiamen Airlines. These airlines provided service to several new nonstop destinations on four continents, including Félix-Houphouët-Boigny International (ABJ; Abidjan, Ivory Coast), Belgrade Nikola Tesla (BEG), Guangzhou Baiyun International (CAN), Fuzhou Changle International (FOC), Miguel Hidalgo y Costilla Guadalajara International (GDL), Lisbon (LIS), Ninoy Aquino International (MNL; Manila, Philippines), Jomo Kenyatta International (NBO; Nairobi, Kenya), and Calgary International (YYC) airports. Incumbent airlines also provided new service to a variety of domestic and international destinations. New domestic destinations served by these airlines included Ted Stevens Anchorage International (ANC), Bangor International (BGR), Cape Cod Gateway (HYA), Ontario International (ONT), Worcester Regional (ORH), Reno-Tahoe International (RNO), Savannah/Hilton Head International (SAV), and John Wayne (SNA; Orange County, California) airports, and new international destinations included Chhatrapati Shivaji Maharaj International Airport, Mumbai (BOM), Curaçao International Airport (CUR), Blaise Diagne International Airport (DSS; Dakar, Senegal), Edinburgh Airport (EDI), Ponta Delgada–João Paulo II Airport (PDL), Pointe-à-Pitre International Airport (PTP), Los Cabos International Airport (SJD; San José del Cabo, Mexico), Argyle International Airport (SVD), Islam Karimov Tashkent International Airport (TAS), and Mariscal Sucre International Airport (UIO; Quito, Ecuador).

- **2020 to 2022:** Passenger activity decreased sharply following the onset of the pandemic in March 2020. Several airlines suspended service to JFK during the period, reflecting government-imposed restrictions on international travel as well as decreased domestic and international passenger travel demand more broadly. As travel demand began to recover, several airlines commenced service at the Airport, including Air New Zealand, Air Senegal, Azores Airlines, Flair Airlines, Neos, and Norse Atlantic Airways which provided service to several destinations, including nonstop service to previously unserved destinations such as Auckland Airport (AKL), Berlin Brandenburg Airport “Willy Brandt” (BER), Madeira Airport (FNC; Funchal, Portugal), and Lajes Airport (TER). Incumbent airlines added service to a few new destinations, including Bozeman Yellowstone (BZN) and Alfonso Bonilla Aragón (CLO; Santiago de Cali, Colombia) international airports, reflective of the relatively early return of passenger demand for outdoor leisure markets and short-haul international destinations in Latin America from the pandemic-era downturn in demand. Of note, Singapore Airlines, which has historically served JFK with flights that stop in Europe en route to Singapore, commenced nonstop flights to Singapore Changi Airport (SIN) in 2020, using specially configured Airbus A350-900 Ultra-Long-Range (ULR) aircraft, becoming the longest nonstop flight in the world. In 2020, American and JetBlue launched a strategic partnership called the “Northeast Alliance” whereby the two airlines coordinated scheduling and marketing in the region to grow their combined presence and market share. By 2022, both airlines exceeded their pre-pandemic levels of capacity and passengers at the Airport. In 2023, the US Department of Justice ruled the alliance was anti-competitive and the two airlines unwound the partnership.
- **2023 to 2024:** As passenger demand recovered from the effects of the pandemic, additional airlines resumed service at the Airport. Among airlines serving the Airport in 2019 that did not provide any scheduled service in 2020, two had resumed service by 2024, while five airlines that served the Airport during at least a portion of 2020 resumed service at some point in 2022, 2023, or 2024. New airlines serving the Airport in 2023 and 2024 include Scandinavian Airlines, providing service to Copenhagen Airport, Kastrup (CPH), HiSky Europe, providing service to Bucharest Henri Coandă International Airport (OTP), and Frontier, adding competition on domestic routes to Hartsfield-Jackson Atlanta International Airport (ATL), Harry Reid International Airport (LAS; Las Vegas), and Luis Muñoz Marín International Airport (SJU; San Juan, Puerto Rico). Incumbent airlines added several new destinations as well, including domestic service to Ithaca Tompkins International (ITH) and international flights to Flamingo International (BON; Kralendijk, Bonaire) Philip S. W. Goldson International (BZE; Belize City, Belize),

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

Porto (OPO), and Tulum International (TQO) airports. In 2023, total passengers represented just under 100 percent of total 2019 passengers. Total passengers from January 2024 through June 2024 are 1.1 percent higher than the same period in 2023 and 0.4 percent lower than January through June 2019.

**Table 4-12** presents the historical O&D, connecting, and total passengers at JFK. During the period between 2014 and 2023, all categories have grown, with increases of 2.0 percent, 1.1 percent, and 1.8 percent CAGRs, respectively. In the first half of 2024, O&D passengers increased 6.1 percent compared to the first half of 2023 while connecting passengers decreased 16.0 percent during the same period. Connecting passenger volumes decreased in the period preceding the pandemic; connecting passenger volume has returned to the pre-pandemic activity level observed in 2019. O&D passengers have represented between approximately 78 percent and 87 percent of total passengers over the historical period.

TABLE 4-12 JFK HISTORICAL ORIGIN AND DESTINATION AND CONNECTING PASSENGERS

YEAR	O&D PASSENGERS	O&D YOY % CHANGE	CONNECTING PASSENGERS	CONNECTING YOY % CHANGE	TOTAL PASSENGERS	TOTAL YOY % CHANGE	O&D SHARE OF TOTAL
2014	41,765,329	5.6%	11,455,097	5.1%	53,220,426	5.5%	78.5%

2014 – 2023	2.0%		1.1%		1.8%		

## NOTES:

O&D – Origin and Destination; YOY – year-over-year

SOURCES: Port Authority of New York and New Jersey, August 2024 (historical data); Cirium Diio, August 2024 (US Department of Transportation DB1B data).

**Table 4-13** presents the airline share of total passengers between 2014 and 2023. Traffic at JFK is distributed across many airlines, with no single airline representing more than one-third of total passengers during this period. Delta and JetBlue have been the largest and second largest airlines by share of total passengers during the period, except for 2021 and 2022, when the order was reversed. American has consistently represented the third-largest share. British Airways represented the fourth-largest share from 2014 to 2018, while Alaska (inclusive of Virgin America, which it acquired in 2018) has grown from the fifth largest to the fourth-largest airline by share due to an expansion of its route network as well as the effects of the COVID-19 pandemic on international demand and foreign flag airline activity.

#### 4.4.2 AIR SERVICE

An important characteristic of airport activity is the distribution of an airport's O&D markets, which are reflective of both air travel demand in a market, available air service and airport facilities, and the availability of services at competing airports. **Table 4-14** presents the top 20 domestic JFK O&D markets for the year ending December 2023; **Table 4-15** presents the top 20 JFK international O&D markets for the same period. Markets are ranked based on O&D passenger booking counts, and the tables also include the airlines providing service to these markets as well as the average weekly nonstop departures during the period. South Florida represents the largest domestic market by passenger bookings, and London represents the largest international market. The top 20 domestic markets represent 77.1 percent of domestic O&D passenger bookings, while international demand is more dispersed, with the top 20 markets representing 43 percent of international O&D passenger bookings.

**Exhibit 4-5** provides an illustration of the domestic markets served nonstop from the Airport; **Exhibit 4-6** illustrates the international markets served nonstop from the Airport. In 2024, an average of 342 domestic daily departures are scheduled to serve 74 nonstop destinations and an average of 255 international daily departures are scheduled to serve 123 nonstop destinations.

#### 4.4.3 PASSENGER AIRLINE OPERATIONS

**Table 4-16** presents the JFK annual passenger airline operations for 2014 through 2023. From 2014 to 2023, total passenger airline operations increased at a 1.3 percent CAGR. During this period, regional aircraft, narrowbody aircraft, and widebody aircraft operations grew at 0.3 percent, 0.9 percent, and 2.7 percent CAGRs, respectively. Regional aircraft operations and total aircraft operations had recovered to pre-pandemic levels by 2023, with narrowbody and widebody aircraft operations representing 97.8 percent and 97.4 percent of 2019 operations. Between 2014 and 2019, the average seats per departure increased for regional aircraft and narrowbody aircraft operations, while seats per widebody aircraft departure decreased slightly, with the decrease representing a 0.1 percent CAGR. JFK is operationally constrained by FAA-imposed slot restrictions related to the number of hourly arrivals. Additional information on the slot constraints is included in **Section 4.5.9**.

**Table 4-17** presents JFK's average seats per departure, load factor, and passengers per departure between 2014 and 2023. During the historical period, seats per departure increased at a 0.5 percent CAGR and load factor increased at a 0.2 percent CAGR, enabling growth in passengers per departure, which represented a 0.8 percent CAGR during the period. The average seats per departure remains slightly below pre-pandemic levels, while load factors have recovered to 83 percent, equivalent to 2019 levels. The average load factor at JFK is similar to those at other international gateways and large-hub airports.<sup>124</sup> Additional discussion on load factors and the activity forecast is included in **Section 4.6**.

<sup>124</sup> Cirium Diio, (T-100 database), September 2024.

## 4.5 FACTORS AFFECTING AVIATION DEMAND AT THE AIRPORT

This section discusses the qualitative factors that may influence future aviation activity at the Airport. These factors were considered, either directly or indirectly, in developing the aviation activity forecasts for the Airport and for Terminal 6.

### 4.5.1 IMPACT OF THE COVID-19 PANDEMIC

The outbreak and spread of the COVID-19 pandemic severely curbed global aviation demand. The impact to air travel began in East Asia in December 2019 and accelerated to other regions of the world in the first quarter of 2020. Airlines responded by reducing capacity across their networks due to decreased demand, travel restrictions, and border closures. May 2020 represented the low point in terms of passenger airline seat capacity. In June 2020, seat capacity began to recover, with the initial recovery focused primarily on domestic markets with outdoor leisure activities where people could visit while also remaining socially distanced.

**Exhibits 4-7** and **Exhibit 4-8** illustrate the recovery of seat capacity at the Airport, competing airports, the New York City area as a whole, and in the US market. The New York market experienced a larger decrease in departing seat capacity relative to the US as whole, due to the relatively slow recovery of international travel and business travel demand. As the primary airport for international passengers in the area, JFK was particularly impacted by the downturn in demand for international travel and associated government travel restrictions. However, the Airport experienced a recovery in line with that of competing airports in the region, and the minimum rolling annual seat capacity relative to 2019 was observed in February 2021, the same month as the rest of the US. As the rest of the US returned to pre-pandemic seat capacity, capacity recovery slowed, and JFK eclipsed the national recovery beginning in August 2022. Departing seat capacity relative to 2019 at the Airport has generally remained in line with the US, with a slightly higher relative capacity observed from August 2022 to February 2024 and a slightly lower relative capacity since February 2024.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

The recovery in demand was uneven across different international regions due in part to travel restrictions that have varied by country in terms of timing and severity. **Exhibit 4-9** depicts the scheduled seat capacity recovery for JFK by region. Mexico, Central America, Caribbean, and South American markets, where travel was supported by leisure demand as well as visiting friends and family, have recovered faster than other international markets, with scheduled seat capacity on South American flights recovering to 2019 levels in May 2022. Similarly, domestic leisure travel recovered relatively quickly, reaching 2019 levels in July 2022. Scheduled seat capacity in transatlantic markets remained just above 50 percent of 2019 levels into spring 2022; however, the recovery accelerated following the relaxation of travel restrictions, with departing seat capacity in the 12 months ending in March 2023 representing 90 percent of 2019 levels, recovering to 100 percent in May 2024. In the 12 months ending December 2024, transpacific market capacity is expected to represent 80 percent of 2019 levels based on published schedules as of August 2024. Travel between the US and Canada was severely restricted through most of 2021, though recovery was rapid following the relaxation of travel restrictions, increasing from 10 percent of 2019 levels in June 2022 to 82 percent of 2019 levels in June 2023; the market recovered to 2019 levels in September 2023.

EXHIBIT 4-9 SEAT CAPACITY RECOVERY INDEXED TO 2019 BY REGION – JFK

NOTE:  
 Rolling 12-month departing seat capacity indexed to 2019 total.  
 SOURCE: Cirium Diio, August 2024 (published airline schedules).

**Exhibit 4-10** presents the enplaned revenue passenger recovery at the Airport. Enplaned passenger volumes saw a smaller decline relative to 2019 compared to seat capacity, as airlines reduced their scheduled flights. However, load factors remained relatively low due to limited demand for travel in the height of pandemic-era lockdowns. In March 2021, 14 percent of 2019 passenger levels were observed, the pandemic period minimum. Following March 2021, enplaned passenger volumes increased steadily, with approximately 100 percent of 2019 passenger levels observed in the year ending December 2023.

EXHIBIT 4-10 ENPLANED REVENUE PASSENGER RECOVERY INDEXED TO 2019 - JFK

SOURCE: Port Authority of New York and New Jersey, August 2024.

Globally, airlines experienced an operating loss of \$137.7 billion in 2020, which lessened to a \$40.4 billion operating loss in 2021. In 2022, North American airlines returned to profitability, while airlines throughout the rest of the world were estimated to have returned to profitability in 2023. In 2024, operating profits are forecast to remain unchanged for North American airlines, while profit for airlines in other regions is forecast to increase approximately 24.6 percent.<sup>125</sup> **Exhibit 4-11** shows the airline profitability for North America and for the rest of the world from 2019 to 2024 (as currently forecast).

NOTES:

2023E – Estimated

2024F – Forecast

SOURCE: International Air Transport Association, *Global Outlook for Air Transport – Deep Change – June 2024 – Data Tables*, July 2024.

Continued spread of existing and new variants of the COVID-19 virus may result in the extension of existing travel restrictions and implementation of new restrictions that may affect the recovery to pre-pandemic levels of demand for air travel.

**4.5.2 NATIONAL ECONOMY**

Historically, trends in airline travel have been closely correlated with national economic trends, most notably changes in gross domestic product (GDP). Chapter 3 of this Report presents an analysis of the general economic trends, both national and local, that may influence demand for air service over time. National GDP is expected to increase approximately 2.0 percent annually through the Projection Period, which should support generally increasing demand for air service over the Projection Period. Actual economic activity may differ from this forecast, especially on a year-to-year basis. Demand for air service may be impacted by changes in economic performance.

**4.5.3 MERGERS, ACQUISITIONS, AND NEW ENTRANT AIRLINES**

US airlines have merged or acquired competitors to achieve operational and commercial synergies and to improve their financial performance. A wave of consolidation began in 2005 when America West Airlines merged with US Airways, retaining the US Airways brand for the consolidated airline. In 2009, Delta acquired Northwest Airlines. In 2010, United acquired Continental Airlines. In 2011, Southwest acquired AirTran Airways. In 2013, US Airways and American merged, with the consolidated airline retaining the American brand. In 2016, Alaska acquired Virgin America and the two airlines completed their integration in 2018. The most recent consolidation occurred in

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

September 2024 when Alaska closed its acquisition of Hawaiian Airlines, while Hawaiian Airlines will remain a separate brand. Consolidation across the industry has resulted in the realignment of several airline route networks as airlines have sought to improve network efficiency. Further consolidation of the US airline industry could affect the amount of capacity offered at the Airport and could alter the competitive landscape.

Two new airlines, Avelo and Breeze, have commenced operations in the US domestic passenger airline industry during the pandemic recovery period, but neither airline has commenced service at the Airport. As of August 2024, Avelo operates its primary East Coast base at Tweed New Haven Airport (HVN), located approximately 63 miles northeast of the Airport in New Haven, Connecticut, while Breeze currently provides service to HPN and ISP.

#### 4.5.4 THREAT OF TERRORISM AND GEOPOLITICAL ISSUES

Since September 11, 2001, the recurrence of terrorism incidents against either domestic or world aviation has remained a risk to achieving forecast levels of activity. Tighter security measures have restored the public's confidence in the integrity of the US and global aviation security systems. However, any terrorist incident targeting aviation could have an immediate and significant impact on the demand for air travel.

Additionally, geopolitical issues may affect aviation activity during the Projection Period. Potential governmental or regional instability in certain countries or locations may affect access to, or demand for, aviation service in these places. At the time of this report, the Russian invasion of Ukraine, which began in February 2022, is still ongoing. The conflict has resulted in the closure of airspace over Russia and Ukraine to most airlines. Restrictions on Russian airlines have resulted in the suspension of nearly all service between Russia and other countries. These restrictions have limited airlines' ability to operate certain nonstop routes that would otherwise overfly Russia or Ukraine. Additionally, an escalation of conflict between Israel and Hamas, which began in October 2023, remains an evolving situation. Further developments in these conflicts could exacerbate geopolitical and economic uncertainty and potentially impact demand for travel to certain regions. As the largest international gateway in the US, JFK provides service to nearly all major regions of the world. Future geopolitical instability may affect international aviation service demand.

#### 4.5.5 COST OF AVIATION FUEL

As of the second quarter of Calendar Year (CY) 2024, jet fuel accounted for 21.5 percent of total airline operating costs, second only to labor, according to Airlines for America.<sup>126</sup> The average price of jet fuel peaked in June 2022 at \$4.04 per gallon, having grown steadily since April 2020, which represented the lowest price observed during the historical period. Jet fuel prices have generally decreased since June 2022, with an average \$2.75 jet fuel price per gallon recorded in April 2024. Fluctuating fuel costs affect airline profitability, which could lead to air service changes as airlines adjust capacity and pricing to address changes in the cost of fuel. **Exhibit 4-12** shows the monthly averages for jet fuel and crude oil prices from August 2014 through August 2024.

---

<sup>126</sup> Airlines for America, *Passenger Airline Cost Index (PACI)*, <http://airlines.org/dataset/a4a-quarterly-passenger-airline-cost-index-u-s-passenger-airlines/> (accessed June 28, 2024).

EXHIBIT 4-12 HISTORICAL MONTHLY AVERAGES OF JET FUEL AND CRUDE OIL PRICES

SOURCES: US Bureau of Transportation Statistics, October 2024; US Energy Information Administration, October 2024.

4.5.6 CAPACITY OF THE NATIONAL AIRSPACE SYSTEM

Increased delays at busy airports may affect the efficiency of the National Airspace System (NAS). In its report, *Airport Capacity Needs in the National Airspace System* (January 2015), the FAA emphasized the need to continue to invest in system improvements with airfield enhancements and NextGen capabilities to address delays at key airports. Several NextGen projects specifically affected JFK, one of several airports in the highly congested and complex local airspace. While these projects have been implemented, the hourly arrival slot limitations remain in place and JFK continues to be identified by the FAA in its biannual National Plan of Integrated Airport Systems Report as a severely capacity constrained airport. Other procedural or technological opportunities may exist to provide improved arrival capacity at the Airport. However, should the FAA pursue updates or changes, evaluation, approval, and implementation of new procedures or technology may take several years.

4.5.7 HUB AIRLINES

American, Delta, and JetBlue operate hubs at JFK, with each airline scheduling 90 or more scheduled average daily departures to at least 50 different destinations. American and Delta also operate hubs at LGA, while United operates a hub at EWR. The following section describes each of the New York City airline hubs and the roles they play in the airlines’ route networks.

**Delta Air Lines**

Delta represented 30.0 percent of the Airport’s total enplaned passengers in 2023, the highest share of any airline at the Airport. Delta operates its sixth largest hub at JFK, out of nine total hubs, in terms of average daily departures. **Table 4-18** presents average daily departures and hub rankings at each of Delta’s hubs in 2019, 2022, 2023, and 2024. JFK’s ranking in average daily departures is the same in 2024 as in 2019. Delta also operates a hub at LGA. On

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

a consolidated basis JFK and LGA would rank second behind Delta's hub at ATL. Delta also serves EWR as a spoke airport with service to its other hubs.

TABLE 4-18 DELTA AIR LINES DEPARTURES BY AIRPORT

The Airport is Delta’s largest transatlantic gateway. **Exhibit 4-13** presents the share of scheduled departing seats to transatlantic destinations that corresponds to each of Delta’s hubs between 2019, 2022, 2023, and 2024. The Airport has consistently represented the largest share of Delta’s scheduled transatlantic seat capacity this period, which has increased from 32 percent in 2019 to 34 percent in 2024.

EXHIBIT 4-13 DELTA AIR LINES HUB SHARE OF TRANSATLANTIC SEAT CAPACITY

SOURCE: Cirium Diio, August 2024 (published airline schedules).

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

**JetBlue Airways**

In 2023 JetBlue represented 25.6 percent of total enplaned passengers at the Airport, the second highest share after Delta. As presented in **Tables 4-21** and **4-22**, the Airport has consistently ranked higher than any other airport in JetBlue's network in terms of departures and destinations served. JetBlue's next largest base of operations is Boston Logan International Airport (BOS). Whereas the network strategies of American and Delta are based on the hub and spoke network model, JetBlue's network is based primarily on point-to-point service, with large operations of over 100 average daily departures at JFK and BOS, and smaller focus city operations at other airports.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

JetBlue operates from Terminal 5 at JFK and is expected to utilize at least one gate at Terminal 6 upon the completion of the Terminal 6 Redevelopment. More specifically, an Anchor Tenant Agreement and Sublease has been executed between JMP and JetBlue (JetBlue Sublease) with a commencement date of the Terminal 6 Phase 1 Date of Beneficial Occupancy (DBO1). Additional information on the JetBlue Anchor Agreement and Sublease is included in **Section 5.2.2**.

JetBlue’s average daily departures and number of destinations served increased between 2019 and 2022 at JFK as well as EWR and LGA due in part to the launch of the Northeast Alliance (NEA) with American in 2021. In 2023 the US Department of Justice ruled the alliance was anti-competitive and the two airlines unwound the partnership. Average daily departures decreased from a peak of 177 in 2022 to 158 in 2024.

**American Airlines**

American represented 12.9 percent of the Airport’s total enplaned passengers in 2023, the third highest share after JetBlue. American operates its tenth largest hub at JFK, out of 10 total hubs, in terms of average daily departures. **Table 4-23** presents average daily departures and hub rankings at each of American’s hubs in 2019, 2022, 2023, and 2024. While JFK’s ranking among American’s hubs has not changed during this period, the number of scheduled average daily departures has increased from 77 in 2019 to 90 in 2024. American’s scheduled average daily departures from the Airport peaked in 2022 at 100, due in part to the Northeast Alliance, which ended in 2023. American also operates a hub at LGA and serves EWR as a spoke airport with service to its other hubs.

American currently operates out of Terminal 8 at JFK. It is expected that American will continue to operate from Terminal 8 upon completion of the JFK Redevelopment Program.

**Table 4-24** and **Table 4-25** present the number of domestic and international destinations American serves from each of its hubs in 2019, 2022, 2023, and 2023. JFK has consistently ranked tenth in terms of domestic destinations served during this period. The Airport has consistently ranked fifth in terms of international destinations served during this period.

**Exhibit 4-14** presents the share of scheduled departing seats to transatlantic destinations that corresponds to each of American's hubs in 2019, 2022, 2023, and 2024. The Airport's share has increased from 16 percent in 2019 to 19 percent in 2024. In 2024, the Airport ranks second behind Philadelphia International Airport (PHL) in terms of American's scheduled transatlantic departing seats.

EXHIBIT 4-14 AMERICAN AIRLINES HUB SHARE OF TRANSATLANTIC SEAT CAPACITY

SOURCE: Cirium Diio, August 2024 (published airline schedules).

**Other Air Trade Area Hubs**

United’s hub at EWR is the largest single airline hub at any of the Air Trade Area airports. **Table 4-26** presents the average scheduled daily departures and destinations served from each of the airline hubs at JFK, EWR, and LGA in 2024. United’s EWR hub ranks first in terms of average daily departures, domestic destinations served, and international destinations served. United also serves LGA as a spoke airport with service to other connecting hubs. United suspended service to JFK in October 2022.

TABLE 4-26 NEW YORK CITY AIRLINE HUB 2024 SCHEDULED DEPARTURES AND DESTINATIONS SERVED

AIRLINE AND HUB	AVERAGE DAILY DEPARTURES	RANK	DOMESTIC DESTINATIONS SERVED	RANK	INTERNATIONAL DESTINATIONS SERVED	RANK	TOTAL DESTINATIONS SERVED	RANK

JOHN F. KENNEDY INTERNATIONAL AIRPORT

**Exhibit 4-15** presents the segmentation of passengers between O&D and connecting at each of the hubs at JFK, EWR, and LGA for the 12-month period ending December 2023. Delta’s hub at JFK has the largest share of connecting passengers, at 28 percent. United’s hub at EWR ranks second in terms of percentage of connecting passengers, at 25 percent, followed by American’s JFK hub at 23 percent and Delta’s hub at LGA at 20 percent. Connecting passengers at the other hubs represent less than 15 percent of total passengers. The relatively low share of connecting passengers at these hubs is indicative of several factors:

- The Air Trade Area represents a large O&D market which enables airlines to fill most of the available seat capacity with local passengers.
- The Air Trade Area airports are not geographically well-positioned to link domestic destinations across airlines’ route networks.
- American and Delta have split their operations between JFK and LGA, with most international service from JFK, which limits the opportunity to build connecting passenger itineraries to and from international destinations.
- The network airlines have other hubs that are well-positioned as transatlantic connecting gateways due to their geography as well as more capacity to accommodate connecting passengers (due to less O&D demand and fewer capacity constraints than at Air Trade Area airports). These include PHL for American, ATL for Delta, and IAD for United.

While the Air Trade Area airline hubs do not accommodate a large volume of connecting passengers, they establish a meaningful presence for the hub airlines in the largest O&D market in the United States. This presence is critically valuable to establishing market share nationally and competing effectively for business travelers.

**EXHIBIT 4-15 2023 O&D AND CONNECTING PASSENGER SHARE AT AIR TRADE AREA AIRLINE HUBS**

SOURCE: Cirium Diio, August 2024 (US DOT T-100 Database and O&D Survey).

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

#### 4.5.8 FOREIGN FLAG AIRLINES

The Airport is the largest international gateway in the United States, with scheduled service in 2024 from 65 foreign flag airlines. **Table 4-27** presents the number of foreign flag airlines serving the top US international gateway airports from 2019 through 2024. JFK has consistently ranked the highest, followed by LAX with scheduled service from 54 foreign flag airlines in 2024.

TABLE 4-27 NUMBER OF FOREIGN FLAG AIRLINES SERVING TOP US INTERNATIONAL GATEWAY AIRPORTS

AIRPORT	2019	2020	2021	2022	2023	2024
JFK	70	64	56	61	63	65
LAX	56	50	41	51	54	54

SEA	22	21	17	22	23	26
EWR	29	27	21	20	22	25

SOURCE: Cirium Diio, August 2024 (published airline schedules).

**Table 4-28** presents the home country, JFK terminal, global alliance affiliation, and JFK codeshare partners for each of the foreign flag airlines with scheduled service to JFK as of August 2024. Terminal 1 was served by 28 foreign flag airlines, more than any other terminal at JFK. Terminal 4 ranked second with 18 foreign flag airlines. The residual foreign flag airlines were spread across Terminals 7 and 8. Members of the three global airline alliances, Oneworld, SkyTeam, and Star Alliance, are distributed across different terminals with no single terminal necessarily representing a single alliance. As of August 2024, of the foreign flag airlines, 29 had codeshare cooperation with US airlines on JFK routes, whereby codeshare partners market the same flight under their own airline designator and flight number. The foreign flag airlines are not necessarily located in the same terminal as their US codeshare partner, which limits interconnectivity between some partner airlines.

In 2024, for five foreign flag airlines, JFK is their only destination served in the United States, and for an additional 25 foreign flag airlines, JFK is their largest destination served in the United States in terms of scheduled seat capacity.

## NOTES:

- 1 Represents country/region where airline headquarters is based. Subsidiary airlines may be based in other countries.
- 2 Represents the departure terminal. Some airlines may use a different terminal for arrivals.
- 3 Includes US airline codeshare partners for flights to and from JFK only.
- 4 Air Senegal discontinued service to JFK on September 19, 2024.
- 5 Scandinavian Airlines discontinued its Star Alliance membership on August 31, 2024, and joined SkyTeam on September 1, 2024.
- 6 Aerolineas Argentinas discontinued service to JFK on August 8, 2024.

SOURCES: Port Authority of New York and New Jersey (terminal assignments), August 2024; Cirium Diio, August 2024 (published airline schedules).

#### 4.5.9 REGULATORY CONSTRAINTS

Access to the Air Trade Area is constrained due to restrictions at the three large airports. The airspace surrounding the New York City metropolitan area is some of the most complex airspace in the world. This complexity results from the location of JFK, EWR, and LGA, within 10 miles of each other, as well as HPN and ISP in the same area, and a fourth large airport, PHL, within 90 miles. The same airspace also accommodates aircraft transitioning to arrive at the Washington, DC area airports, and is in the middle of the heavily congested Northeast Corridor between Washington, DC, and Boston, Massachusetts. JFK, EWR, and LGA are subject to slot constraints due to limited airspace and airfield capacity. International Air Transport Association (IATA) Level 2 slot constraints are in place at EWR due to activity at peak periods, which approaches capacity limits. Voluntary schedule facilitation is used to limit systemic delays at Level 2 airports. IATA Level 3 slot constraints are in place at JFK and LGA due to demand that significantly exceeds operational capacity, and scheduled operations are restricted during peak hours.<sup>127</sup> Activity per hour is capped and flight schedules are coordinated:

- 81 scheduled operations per hour during peak hours at JFK
- 71 scheduled operations per hour during peak hours at LGA

LGA is further restricted by additional factors:

- The perimeter rule restricts nonstop flights to points beyond 1,500 statute miles, with the exception of flights to Denver and flights operating on Saturdays.
- Due to lack of FIS facilities, international service at LGA is limited to destinations with Customs and Border Patrol (CBP) pre-clearance.
- At 7,002 feet, the length of both of LGA's runways limits widebody aircraft operations.

To the extent slot restrictions remain at JFK, additional passenger activity growth may be limited to operational growth at periods when scheduled flight activity is less than the cap (typically off-peak hours), increasing load factors or upgauging of aircraft size. Slot constraints will continue to influence the demand for gate capacity. As demand grows without additional slot or gate capacity growth, the market value of existing capacity may increase.

#### 4.6 ASM FORECASTS OF AVIATION ACTIVITY AND RICONDO REVIEW

Forecasts of aviation demand at the Airport in total and, specifically at Terminal 6 (i.e., total passengers and aircraft operations) were developed by ASM in June 2024 for the period 2024 through 2060.<sup>128</sup> The assumptions, methodology, and forecasts are described in ASM's *Airline Traffic and Economic Analysis Report, JFK International Airport Terminal 6* (June 28, 2024). The following subsections provide an overview of the methodologies and assumptions used by ASM and the forecast results. The financial analysis discussed in Chapter 5 uses the ASM forecasts of activity as underlying assumptions for the Projection Period (2024 through 2032). Ricondo has reviewed and validated the forecasts of activity used for the financial analysis through the Projection Period.

The ASM Terminal 6 activity forecast was based on the following analyses:

- A bottom-up forecast was developed at the airline and route level for JFK through 2028. The 2029 through 2060 forecast of passenger activity was based on socioeconomic regression analysis using United States GDP.

---

<sup>127</sup> JFK is identified as a Level 3 for purposes of runway capacity and Level 2 for gate/terminal capacity.

<sup>128</sup> ASM, *Airline Traffic and Economic Analysis Report, JFK International Airport Terminal 6*, June 28, 2024

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

- The subsequent baseline forecast of Terminal 6 activity was based on the identification of 21 airlines that would potentially operate from Terminal 6. High and low scenarios forecasts were also developed that consider different groupings of airlines operating from Terminal 6.
- Ricondo reviewed and developed an independent forecast through the Projection Period which produced similar results validating the use of the ASM forecast for the financial analysis included in Chapter 5.

#### 4.6.1 ASM JFK FORECAST

The ASM bottom-up forecast for JFK was developed at the airline and route level through 2028. The forecast considered published airline schedules through December 2024 as of April 2024. For 2025 through 2028, the forecast of departures, average seats per departure, and average load factors considered the recent performance of airlines and specific routes. The fleet mix assumptions were based on airlines' current and expected future fleet. Consideration was also given to JFK's slot limitations and how airlines may use larger aircraft and/or higher load factors to accommodate passenger growth instead of incremental frequencies.

The long-term forecast for JFK was based on an econometric model that uses historical and projected United States GDP from Oxford Economics. The historical analysis was based on passenger activity that occurred at JFK between 2001 and 2019 as well as 2022 and 2023. Historical activity that occurred in 2020 and 2021 was not incorporated into the socioeconomic regression analysis as it was heavily influenced by factors specific to the COVID-19 pandemic that are not assumed to influence demand for air travel in the long-term. The regression analysis of the historical passenger activity at JFK and United States GDP produced an R-squared value of 89 percent, which indicates that United States GDP is a strong predictor of future passenger activity. The long-term forecast assumes that airlines will increase average seats per aircraft through deployment of larger aircraft and/or increased seat densification, resulting in an increase in average seats per departure from 175 in 2024 to 229 in 2060. The forecast assumes airlines will develop tools and processes to manage seat inventory more efficiently, resulting in an increase in average load factor from 81 percent in 2024 to 91 percent in 2060.

The long-term forecast does not assume that any specific future events that would result in a meaningful decrease in air travel, such as terrorism, pandemics, or airline failures, will occur during the Projection Period. While the forecast does not specifically consider a future economic downturn, economic downturns occurred during the historical period that was analyzed. Data from this period were incorporated into the development of the regression equations that were used in the long-term passenger forecast.

**Exhibit 4-16** presents the JFK unconstrained total passenger forecasts prepared by ASM as well as the FAA's 2023 Terminal Area Forecast (TAF). Unconstrained forecasts are developed independent of constraining factors, which include airspace capacity, slots, the ability of airlines to supply sufficient capacity to accommodate demand, and similar limits on passenger airline operations. The TAF, which goes through 2050, forecasts a 2023 to 2050 CAGR of 2.8 percent compared to 1.8 percent in the ASM forecast for the same period. The TAF forecast of total passengers in 2050 is 127.0 million compared to 101.9 million in the ASM forecast. The TAF is forecast on a federal fiscal year basis (October through September) while the ASM forecast is on a calendar year basis. Both the TAF and the ASM forecast are unconstrained.

EXHIBIT 4-16 ASM AND TAF TOTAL PASSENGER FORECAST FOR JFK

NOTE:

Years reflect 12 months ending December 31 for Airport Strategy & Marketing activity and 12 months ending September 30 for the FAA TAF.  
 SOURCES: Port Authority of New York and New Jersey, August 2024 (actual passengers); Airport Strategy & Marketing (forecast passengers); Federal Aviation Administration, 2023 Terminal Area Forecast, March 2023.

### 4.6.2 ASM TERMINAL 6 FORECAST

The ASM Terminal 6 forecast was based on the identification of airlines that could potentially use Terminal 6. The bottom-up forecast was used to project each airline’s passengers through 2028. From 2029 through 2060, the econometric growth rate for all JFK passengers was applied to each airline individually. The baseline forecast identifies 21 different airlines that could potentially operate from Terminal 6. High and low scenario forecasts were based on different combinations of airlines operating from Terminal 6. The baseline and low and high scenario forecasts assume that JetBlue will use a single gate at Terminal 6, operating an average of 5 daily departures and an average 172 seats per departure, increasing by one seat every three years beginning in 2031. JetBlue’s average load factor is forecast to increase from 82 percent in 2026 to 87 percent in 2030 and remain at that level through 2060.

Additionally, the baseline, low, and high scenario forecasts all assume that the Expected Airlines including Aer Lingus, Cathay Pacific, Lufthansa AG (including its affiliates Austrian Airlines, Brussels Airlines and Swiss International Air Lines), and one additional long-haul foreign flag airline will operate from Terminal 6. Each of these airlines have fully negotiated non-binding letters of intent with term sheets outlining proposed terms of the sublease. With the exception of the long-haul foreign flag airline, all the Expected Airlines have publicly announced their intent to operate at Terminal 6. The identification of Additional Targeted Airlines that may operate at Terminal 6 in each scenario considered several factors that influence the propensity for airlines to choose to locate in a terminal at the Airport, including gate access, support facility availability, and connectivity or colocation with partner airlines or airlines within the same ownership group. The airline combinations modeled in the scenarios represent a selection of the potential combinations of these airlines.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

**Table 4-29** presents the ASM baseline and low and high scenario Terminal 6 enplaned passenger forecasts in interval years from 2025 to 2060. Total Passengers are forecast to increase from 3.7 million in 2025 to 6.0 million in 2060 in the low scenario forecast, from 3.9 million in 2025 to 6.4 million in 2060 in the baseline forecast, and from 3.8 million in 2025 to 6.6 million in 2060 in the high scenario forecast.

TABLE 4-29 ASM TERMINAL 6 ENPLANED PASSENGER FORECAST

YEAR	LOW SCENARIO	BASELINE	HIGH SCENARIO
2025	3,651,000	3,970,000	3,820,000
2030	3,998,000	4,231,000	4,334,000
2035	4,347,000	4,601,000	4,714,000
2040	4,700,000	4,976,000	5,098,000
2045	5,051,000	5,349,000	5,481,000
2050	5,395,000	5,715,000	5,856,000
2055	5,725,000	6,065,000	6,215,000
2060	6,036,000	6,395,000	6,554,000
<b>Compound Annual Growth Rate</b>			
2014 – 2023	1.4%	1.4%	1.6%

SOURCE: Airport Strategy & Marketing, August 2024.

**Exhibit 4-17** presents the breakdown of the ASM baseline Terminal 6 enplaned passenger forecast by Expected Airlines, JetBlue, and other potential airlines. Airlines that are currently under contract, inclusive of JetBlue, represent approximately 39 percent of the total Terminal 6 forecast passengers.

EXHIBIT 4-17 ASM BASELINE TERMINAL 6 ENPLANED PASSENGER FORECAST

SOURCE: Airport Strategy & Marketing, August 2024.

### 4.6.3 RICONDO EVALUATION OF THE ASM ACTIVITY FORECAST

Ricondo has reviewed and validated the activity forecasts prepared by ASM through the Projection Period for purposes of the financial analysis included in this Report. In this process, Ricondo developed an independent forecast for JFK including a similar approach to ASM with detailed buildup of activity in the near-term and socioeconomic driven results thereafter. Growth assumptions of airline capacity, the regions served, and markets were developed to forecast activity by airline through 2025. Airlines capacity assumptions were based on published airline schedules through December 2024. The long-term forecast was based on independent socioeconomic regression analyses of domestic and international O&D passengers. The socioeconomic variables incorporated into the regression analysis were sourced from Woods & Poole Economics, Inc. and are discussed in **Section 3.4.2**. The variables included GRP, personal income, employment, and total earnings for the total United States as well as the New York City CSA. The regression analysis produced R-squared values between 71 percent and 82 percent for domestic O&D passengers and between 92 percent and 98 percent for international O&D passengers. Connecting passengers were modeled as a percentage of O&D passengers. Long-term demand was apportioned to airlines based on the forecast 2025 share of passengers as established in the short-term forecast.

The ASM and Ricondo forecasts of total JFK enplaned passengers are similar in trajectory and volume, with the Ricondo Airport-wide forecast marginally lower than the ASM forecast through most of the Projection Period and the Terminal 6 forecast marginally higher. **Exhibit 4-18** presents the ASM and Ricondo forecasts of total JFK passenger through the Projection Period. ASM forecasts total JFK passengers will increase from 62.5 million in 2023 to 76.8 million in 2032, which represents a CAGR of 2.3 percent. Ricondo forecasts total JFK passengers will increase from 62.5 million in 2023 to 73.1 million in 2032, which represents a CAGR of 1.8 percent.

EXHIBIT 4-18 ASM AND RICONDO TOTAL PASSENGER FORECAST FOR JFK

SOURCES: Airport Strategy & Marketing, June 2024, Ricondo & Associates, Inc., October 2024.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

Ricondo validated the ASM forecast for Terminal 6 through the Projection Period by developing activity forecasts for the 21 airlines expected to operate at Terminal 6 as identified in the ASM baseline forecast. Activity forecasts by airline were developed in the short-term utilizing bottom-up forecasts of airline activity based off of published schedules and historical trends and in the long-term by applying the annual growth rate forecast in the regression analysis model explained passenger volumes by airline. The forecasts were constrained on an airline-by-airline basis using estimates of maximum annual operations by airline, projected seats per departure, and load factor estimates. **Table 4-30** and **Exhibit 4-19** presents the Ricondo and ASM baseline Terminal 6 forecast explained passengers for the years 2025 through 2032.

TABLE 4-30 RICONDO AND ASM TERMINAL 6 ENPLANED PASSENGER FORECAST

YEAR	RICONDO FORECAST	ASM BASELINE FORECAST	ASM H/(L) THAN RICONDO
2025	3,902,000	3,970,000	1.7%
2026	3,936,000	4,019,000	2.1%
2027	4,022,000	4,043,000	0.5%
2028	4,104,000	4,073,000	-0.8%
2029	4,188,000	4,156,000	-0.8%
2030	4,270,000	4,231,000	-0.9%
2031	4,337,000	4,304,000	-0.8%
2032	4,362,000	4,377,000	0.3%
Compound Annual Growth Rate			
2025 - 2032	1.6%	1.4%

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

Ricondo evaluated key factors that support the growth in activity levels identified in the ASM forecast for JFK and Terminal 6, specifically:

- Slots – The forecast activity can be accommodated within the existing FAA slot program. As demand approaches and exceeds pre-COVID-19 pandemic levels, it is expected that airlines may increase operations during certain peak periods, but the slot constraints will remain in place. Airlines may be able to increase utilization of existing slots and add flights outside of slot-controlled hours (06:00 to 23:00), but JFK is assumed to remain a Level 3 slot-controlled airport.<sup>129</sup> Future FAA airspace system improvements, as described in **Section 4.5.6**, may enable an increase in the number of peak-hour slots and increase JFK's overall operational capacity, but these improvements are not assumed during the Projection Period.
- Average Seats Per Departure – Growth in average seats per departure is expected for many airlines on a system-wide basis as they continue to retire smaller regional aircraft and take delivery of larger mainline aircraft on order. Between 2014 and 2023 the average seats per departure for passenger airlines at all JFK terminals increased from 163 to 171 as average seat size increased for regional, narrowbody, and widebody aircraft types. JFK, given the market and constraints, will logically be a location where airlines schedule larger aircraft. However, the growth of seat size of the largest aircraft is not anticipated. Historically, several foreign flag airlines have operated the largest passenger aircraft types, the Airbus A380 and Boeing 747, on JFK routes. Production of these aircraft types has ceased and there are no equivalent-sized aircraft in development. These aircraft will likely be replaced with aircraft such as the Airbus A350 and Boeing 777-9, as the A380 and Boeing 747 are retired. While the availability of larger aircraft may limit the growth in average seats per departure, the growth assumed through the Projection Period is consistent with the anticipated availability of large aircraft.
- Load Factor – The forecast assumes that the passenger load factor will increase as demand for air travel grows. The growth in load factor in the Projection Period, increasing to 91 percent in 2060, is high for industry standards, but reasonable given constraints to access the market. Airlines may struggle to manage inventory and pricing levels to consistently achieve high load factors. Consistently full flights may also impose additional requirements on airline operations, potentially requiring longer turn times and leaving minimal available seat inventory to accommodate stranded or delayed passengers during irregular operations.
- Airline Mix – The Terminal 6 forecast is based on an assumed combination of airlines that could operate from the terminal, but the specific airline mix beyond JetBlue and the Expected Airlines is currently unknown and could continue to change throughout the Projection Period. Airline considerations with regard to terminal preference may include colocation with airlines, availability of appropriately sized gates, facilities to accommodate their operations, cost, terminal amenities, and preferential access to gates. Terminal 6 will be integrated with the existing Terminal 5, supporting interconnectivity with JetBlue which has 158 scheduled average daily departures to 92 destinations from the JFK in 2024.<sup>130</sup> JetBlue is an attractive partner for foreign airlines serving JFK because it is not a member of a global airline alliance and has few restrictions on alliance partners, unlike American, Delta, and United, members of Oneworld, SkyTeam, and Star Alliance, respectively, which typically cannot develop alliances with members of competing global alliances.
- Operational Efficiencies – The integration of Terminal 5 and Terminal 6 will potentially support an improvement in the MCT between airlines operating at Terminal 6 and JetBlue in Terminal 5. The standard MCT with JetBlue

---

<sup>129</sup> Airlines must maintain 80 percent usage of their slots to retain user rights. In 2019, airlines flew approximately 86 percent of their available operational slots at JFK per analysis of reported operations sourced from the US Department of Transportation T-100 Database.

<sup>130</sup> Per published airline schedules, as of August 2024.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

and other airlines at JFK is 2 hours. Simplified baggage transfer between terminals and shorter distance to JetBlue gates is estimated to reduce the MCT by approximately 45 minutes, creating an advantage for Terminal 6 airlines compared to airlines operating from other terminals that require additional steps in the connection process and longer MCTs. Terminal 6 will also have access to two AirTrain stations facilitating access to other terminals and ground transportation. Other features of Terminal 6 include a dedicated FIS facility, space for multiple airline lounges, and efficient passenger flow with low average walking time between the security checkpoint to gates as well as between gates and domestic baggage claim.

- Terminal Capacity – While JFK has a limited number of total gates and most terminals approach their maximum operational capacity at peak hours, there are other terminals that could represent an alternative to Terminal 6. The various terminal operators will compete for airline tenants as the redevelopment projects occur. Airline preference for other terminals could result in a lower level of activity at Terminal 6, or lower lease rates, or both. However, the analysis of daily schedules at JFK and those schedules at higher activity levels developed within the Projection Period indicates that terminal facilities at peak periods are at or near capacity for aircraft operations, including the planned terminal redevelopment projects. During peak periods, hard stand positions must be available to accommodate aircraft that are towed off the gate to allow use of the gate for other arrivals or departures. The forecast assumes hardstand positions are available for this tow-on, tow-off operation. The availability of these hardstand positions and the ability to operate a significant tow operation during peak periods will influence the ability to accommodate the demand. It is reasonable to assume demand and airline capacity will continue to build in off-peak periods, but the addition of operations at peak periods is limited, and access to facilities at peak desirable periods will be highly desirable.

## 5. FINANCIAL ANALYSIS

This chapter describes JMP's financial framework, the projections of Terminal 6 Project Revenues, concession and other non-airline revenues, operating and maintenance (O&M) expenses, asset repair and replacement costs, debt service and debt service coverage. Ricondo reviewed, with the support of its subconsultant Infrastructure Advisors, LLC, JMP's projected cashflows and debt service coverage results and assessed the reasonableness of the projected revenues and associated airline charges. Ricondo finds the projected Terminal 6 airline costs per enplaned passenger reasonable through the Projection Period when taking into account the air service market and capacity constraints at other New York Area airports and JFK terminals. This chapter presents financial information reflecting the baseline activity forecast described in Chapter 4. In addition, summary financial information reflecting the low activity scenario described in Chapter 4 is included as a sensitivity in Section 5.10. The full JMP baseline financial projections are included as **Appendix A** to this Report.

### 5.1 FINANCIAL FRAMEWORK

The City owns the Airport, and the Port Authority has operated the Airport under a lease with the City (Basic Lease) since 1947. The Basic Lease was amended and restated in early 2021, with a term extending through December 31, 2060. In addition to establishing the Port Authority's rental payments, the Basic Lease provides the Port Authority the right to enter into subleases to develop facilities at the Airport. JMP's fiscal year (FY) ends December 31.

#### 5.1.1 THE JMP LEASE AGREEMENT

The Lease Agreement between the Port Authority and JMP sets forth the rights and obligations of JMP and the Port Authority with respect to the design, construction, financing, operation, and maintenance of the Terminal 6 Development. The Lease Agreement is the principal contractual vehicle that encapsulates the transaction between JMP and the Port Authority.

The term of the Lease Agreement between JMP and the Port Authority is defined in Section 3 of the Lease Agreement as commencing on November 17, 2022 and expiring on the earlier of (a) 11:59 p.m. on the 30th day of December 2060, or upon the termination of the Basic Lease, whichever is earlier (the Expiration Date); and (b) any earlier termination of the Lease Agreement in accordance with its terms.

JMP has passed down the majority of construction obligations incurred under the Lease Agreement through the Design-Build Contract with Hunt Construction Group, Inc. The Design-Build Contract sets forth the terms and conditions for the design and construction of the development of Terminal 6. JMP has transferred the majority of construction risk during the construction period to the Designer-Builder under a guaranteed maximum price (GMP) contract. JMP will retain a certain scope under a budget managed by the Lessee.

JMP will be responsible for managing the operation of Terminal 7 during the construction of Terminal 6. Once construction is complete, JMP will be responsible for Terminal 6 operations for the duration of the Lease Agreement. JMP entered into a Management Services Agreement with an affiliate of Vantage (the Manager), under which the Manager provides JMP with certain management and support services related to the O&M work for Terminal 7 and Terminal 6. In addition to O&M, the Manager manages and assists with Design Build Agreement (D&C Services), concession-related services, Operational Readiness and Transition (ORAT) services, and personnel deployment for operations, design-build, and company management. The Manager, through additional personnel, including a Project Manager, Project Director, Design Manager, Executive and non-Executive staff, and other third-party

resources, provides day-to-day management of the Borrower's business and operations, including concession management and the management of the D&C Work. Additionally, Vantage Airport Group (US) Ltd. has guaranteed the obligations of the Manager (such guaranty, the "Manager Parent Guaranty").

### 5.1.2 PORT AUTHORITY RENTS UNDER THE LEASE

Under the Lease Agreement, JMP agrees to pay, fund, or apply rentals and other payments as follows:

- i. Ground Rent: For each year or portion thereof during the Term, pay the Port Authority a rental equal to \$148,300 per acre, as adjusted annually from the 2018 base year by the greater of (1) 50 percent of the Consumer Price Index (CPI) Percentage Increase or (2) 4 percent. The total land is 58.5 acres, including 23.1 acres for the Terminal 6 Parcel (Phase 1) and 35.4 acres for the Terminal 7 Parcel (Phase 2). For the purpose of financial analysis, Ground Rent is assumed to escalate by 4 percent annually and in 2024 is \$187,647 per acre.
- ii. First Additional Rent: Pay the Port Authority \$500,000 for each Senior Leasehold mortgage on December 1 of each Calendar Year commencing in the Calendar Year in which Substantial Completion of Phase 1 shall occur until all amounts secured by such Senior Leasehold Mortgage have been repaid in full, provided that if more than one Senior Leasehold Mortgage is entered into contemporaneously with respect to a single debt financing, only one First Additional Rent will be due annually. For the purpose of the analysis, it is assumed that the First Additional Rent will be paid each year from 2026 to 2060.
- iii. Second Additional Rental: For each year or a portion thereof during the Term, pay the Port Authority a rental equaling the Second Additional Rental Rate as provided in Exhibit 12 of the Lease, payable in monthly installments. In addition, the First Supplement sets forth criteria under which Second Additional Rental may be deferred through 2035 if the debt service coverage ratio is less than 1.2x. As set forth in Exhibit 12 of the Lease, the Second Additional Rental Rate in 2024 is \$55.3 million and will be paid each year until 2027, and then from 2030 to 2060, in amounts ranging from \$36.1 million in 2030 to \$137,349 million in 2060.
- iv. Third Additional Rental: Pay the Port Authority \$33 million on the Effective Date and an additional \$1M annually for each year of the Term, beginning in 2027, payable in monthly installments.
  - i. Excess Value Rent: For any calendar quarter in which JMP is permitted to distribute cash from the Remaining Revenue Account, a portion of Cash Available for Distribution, other than reasonable reserves, may be distributed to the Port Authority following the provisions of the Lease Agreement. Excess Value Rent has not been estimated for the purpose of financial analysis.
  - ii. Concessions Revenue Rents to JMP and the Port Authority: From the Lease Commencement Date and throughout the Term, collect rentals from each Concession Sublessee and pay Concessions Revenue Rent to the Port Authority as calculated in the following:
    - a. Prior to DBO2, an amount equal to the greater of (1) 50 percent of the Gross Rents for the Current Calendar Year and (2) the sum of (i) \$5.00 per International Enplanement during the Current Calendar Year, compounded annually from 2016 according to CPI, and (ii) \$2.00 per Domestic Enplanement during the Current Calendar Year, compounded annually from 2016 according to CPI.
    - b. Following DBO2, an amount equal to the greater of (1) 50 percent of the Gross Rents for the Current Calendar Year and (2) the greater of (i) the product of (a) 80 percent of the Concessions Revenue Rent for the preceding Calendar Year divided by the Aggregate Enplanements during that preceding Calendar Year and (b) the Aggregate Enplanements during the Current Calendar Year; and (ii) the sum of (a) \$2.75 per International Enplanement during the Current Calendar Year,

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

- adjusted from 2021 based on CPI, and \$0.91 per Domestic Enplanement during the Current Calendar Year, adjusted from 2021 based on CPI. For the years 2029 to 2060, the Concession Revenue Rents are based on 50 percent of the Gross Concession Revenues and exceed the other values and hence have been used for projections.
- iii. Port Authority Cost Reimbursement: Reimburse the Port Authority for reasonable third-party out-of-pocket expenses incurred by the Port Authority directly related to the development of the Premises pursuant to the Lease Agreement in an aggregate amount not to exceed \$40 million. The reimbursements will comprise \$25 million during the construction of Phase 1 of the Project and \$15 million during the construction of Phase 2 of the Project, provided the Port Authority provides invoices to substantiate the actual third-party out-of-pocket expenses. Total amounts incurred were \$7.1 million and \$1.2 million in 2023 and 2022, respectively.
  - iv. Advertising Rents: The Port Authority reserves the right to enter a contract for the management or ownership of advertising with respect to any airports-wide advertising program within the New Terminal Facilities with the understanding that 50 percent of the revenues paid to the Port Authority which are allocable to the New Terminal Facilities are to be paid to the Lessee. With respect to any airports-wide advertising program entered by the PA after the effective date, the PA has the right to reserve 20 percent of all available advertising inventory at the Premises for the PA's own use. The locations, quantities, and types of advertising will be approved by the PA.
  - v. Milestone Payments: On the date which is 12 months following the Port Authority's notification to JMP that it has commenced its work that enables roadway work to commence ("the Milestone Payment Date") the following Lessee payments will be made:
    - JMP shall pay the Port Authority \$23.0 million with respect to roadways.
    - JMP shall pay the Port Authority \$9.0 million with respect to the backup power source.
  - vi. Airport-Wide Facilities and Services Payment: JMP shall make contributions of up to approximately \$13.8 million (in addition to a requirement to spend, as directed by the Port Authority, up to \$35.0 million) to support Airport-wide traffic mitigation efforts which will be made during the performance of the D&C Work.

Ground Rent, First Additional Rent, Second Additional Rental, Third Additional Rent, Concessions Revenue Rent, Milestone Payments, and Port Authority Cost Reimbursement must be paid by JMP prior to the payment of any debt. During the period 2027 through 2036, 50 percent of the of Concessions Revenue Rent amount is subordinate to payment of Lessee Debt constituting senior debt or subordinate debt (of any tier) extended to the Lessee by any party other than a direct or indirect constituent owner of the Lessee, but senior and prior to the payment of Lessee Debt constituting loans made by the direct or indirect constituent owners of the Lessee to the Lessee (whether structured as loans or preferred equity). The payment of rentals required to be paid under the Lease Agreement (other than Excess Value Rent) must be senior and prior to the payment of any other O&M Expenses. See Exhibits 1-2 and 1-3 for Flow of Funds before and after substantial completion of the Project.

Port Authority rents are anticipated by JMP to total approximately 104.6 million in FY 2032, including 93.1 million in Port Authority rents payable prior to debt service on Senior Obligations, and \$11.5 million in Concessions Revenue Rent. **Exhibit 5-1** presents the annual Port Authority rents anticipated by JMP over the projection period.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

EXHIBIT 5-1 ANNUAL PORT AUTHORITY RENTS

NOTE:

Exhibit 12 of the Lease Agreement does not include Second Additional Rental rates for 2028 and 2029. Rent resumes in 2030. Second Additional Rental may be deferred between 2030 through 2035 under certain criteria, which are not assumed in this financial analysis.

Concession Rent does not assume Excess Value Rent through the Projection Period and does not include the Concession Rent subordinated to Senior Debt Obligations.

SOURCE: JFK Millennium Partners, LLC, October 2024.

5.1.3 OPERATIONAL FRAMEWORK

JMP assumed the O&M responsibilities of Terminal 7 from the Port Authority on the Terminal 7 Parcel Lease Commencement Date (December 1, 2022), and JMP will be responsible for operating and maintaining Terminal 6 once constructed. The Manager will provide certain management services to JMP under the Management Services Agreement, and the Manager will implement an operational readiness and transition plan to ensure the smooth transition of operations and maintenance from the Port Authority to JMP.

5.2 AIRLINE REVENUES

Airline revenues include (i) all activity-based or per enplaned passenger fees as well as fixed leased space revenue from (a) airlines and (b) other businesses that provide support directly related to the operation of aircraft, enplaning and deplaning of passengers and ground or passenger handling services and (ii) certain fixed lease space revenue from concessionaires for storage or office space in Terminal 7 and Terminal 6 through the term of the Lease Agreement. Upon taking over management in late 2022, JMP negotiated new subleases with all airlines operating in Terminal 7. For Terminal 6, JMP has entered into a sublease with JetBlue for the rental of one narrowbody Terminal 6 gate, and has negotiated non-binding letters of intent with term sheets outlining the terms and conditions for a sublease with each of the seven additional Expected Airlines (including Aer Lingus, Cathay Pacific, Lufthansa AG [along with their affiliates Austrian Airlines, Brussels Airlines and Swiss International Airlines] and one additional long-haul foreign flag airline). At the time of producing this Report, Expected Airlines represent an estimated 57 percent of Phase 1 airline revenues as estimated for 2027 and 36 percent of Phase 2 airline revenues as estimated for 2029.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

## 5.2.1 TERMINAL 7 AIRLINE REVENUES

Effective December 1, 2022, JMP began negotiating new subleases with all of the airlines operating in Terminal 7. JMP also negotiated subleases with 10 additional airline tenants that were not previously operating at Terminal 7 who have since begun operations. The terms of these subleases related to the use and occupancy of Terminal 7 and airline rates and charges were substantially similar to subleases in place for Terminal 7 prior to the Lease Agreement. **Table 5-1** shows the airlines operating at Terminal 7 in 2024.

TABLE 5-1 TERMINAL 7 AIRLINES

AIRLINE	EXISTING <sup>1</sup>	ADDED

NOTES:

- 1 Existing airline tenant of Terminal 7 at the time of the Lease Agreement (November 2022).
  - 2 Discontinued service to JFK as of August 2024.
  - 3 Includes Aer Lingus UK.
  - 4 Includes Norse Atlantic Airways UK.
  - 5 Scandinavian Airlines was added in February 2023 but discontinued service as of March 2024.
- SOURCE: JFK Millennium Partners, LLC, October 2024.

Pursuant to the Lease Agreement between JMP and the Port Authority, JMP is operating Terminal 7 during the construction of Phase 1 of Terminal 6 (2022 through 2025). During this period, JMP receives revenues from the airlines operating from Terminal 7 pursuant to the terms of subleases negotiated with each such airline.

As Terminal 6 facilities become available, airlines operating from Terminal 7 will transition to Terminal 6 or to other terminals at the Airport. The majority of the airlines in Terminal 7 are expected to or already have negotiated letters of intent and term sheets, though not fully executed and approved subleases, to relocate to Terminal 6 once Terminal 6 Phase 1 construction is complete.

Terminal 7 airline revenue is estimated to total approximately \$97.5 million in FY 2024 and decrease to \$89.4 million in FY 2025 due to the possibility of an airline leaving Terminal 7 prior to the Phase 1 opening of Terminal 6.

## 5.2.2 TERMINAL 6 AIRLINE REVENUES

### 5.2.2.1 JETBLUE AIRWAYS CORPORATION

An Anchor Tenant Agreement and Sublease has been executed between JMP and JetBlue (JetBlue Sublease) with a commencement date of the Terminal 6 Phase 1 Date of Beneficial Occupancy (DBO1). For the purpose of the financial analysis included in this Report, the JetBlue Sublease commences on January 1, 2026, and expires on December 31, 2050.

The JetBlue Sublease provides JetBlue with preferential use of the Gate 31 holdroom and aircraft apron, and access to the Terminal 6 FIS facility. The JetBlue Sublease also includes provisions related to FIS facility access rights in Terminal 6. Beginning on DBO1, JetBlue will have the ability, but not the obligation, to process through the Terminal 6 FIS facility with a limited number of international arriving passengers from Terminal 5 gates, including Gate 31.

Revenues from JetBlue are projected to total approximately \$9.2 million in FY 2026, the first full year of Phase 1 operations and projected to increase to \$23.2 million in FY 2032. Projected JetBlue revenues for Terminal 6 begin in 2030 and include (1) Gate 31 revenues and (2) charges paid by JetBlue for international passengers arriving at Terminal 5 that use the Terminal 6 FIS facility. **Exhibit 5-2** presents total revenues projected to be received by JMP from JetBlue during the Projection Period for Terminal 6.

EXHIBIT 5-2 PROJECTED TERMINAL 6 JETBLUE REVENUES (IN MILLIONS)

SOURCE: JFK Millennium Partners, LLC, October 2024.

### 5.2.2.2 OTHER AIRLINES REVENUES

Other Airlines (which includes the seven Expected Airlines as well as certain Additional Targeted Airlines) will operate at Terminal 6, and these Other Airlines are anticipated to use the remaining gates through various tenant subleases.

JMP is in various stages of securing airlines to operate at Terminal 6. Securing an airline as a tenant in Terminal 6 typically involves negotiating a non-binding letter of intent, accompanied by a term sheet outlining the agreed upon terms and conditions for a new sublease (including, but not limited to, proposed rates and charges). The sublease is then drafted and negotiated between JMP and the airline and is subject to the consent of the Port Authority. All Expected Airlines have negotiated a non-binding letter of intent with JMP and, other than the additional long-haul foreign flag airline, have publicly announced their intent to operate at Terminal 6; however, none of the airlines have a sublease that has been consented to by the Port Authority and executed by the airline and JMP. Depending upon

their terms, such subleases may also be subject to approval of the Administrative Agent if they are projected to constitute 15 percent or more of JMP's total revenue in a consecutive 12-month period from all then effective airline subleases.

Airline subleases will include the payment of rates, fees, and charges by airlines for the use of check-in counters, TSA screening, inbound and outbound baggage system, FIS facility, gate areas, and the rental of exclusive use space (e.g., lounges and office space). According to JMP, it currently expects to use a "market-based approach" (rather than cost recovery at most other US airports) to establish the rates and charges paid by airlines operating in Terminal 6. It is anticipated that most airline subleases will include activity-based charges imposed for enplaned passengers and/or aircraft use of gates and will set these fees to escalate with time.

### ***Expected Airlines***

As of the date of this Report, JMP has negotiated non-binding letters of intent with term sheets outlining terms and conditions for a sublease with each of the seven Expected Airlines including Aer Lingus, Cathay Pacific, Lufthansa AG (including its affiliates Austrian Airlines, Brussels Airlines and Swiss International Air Lines), and one additional long-haul foreign flag airline. Aer Lingus and the other foreign flag airline currently operate from Terminal 7. Cathay Pacific and Lufthansa AG (and its affiliates) currently operate from Terminal 8 and Terminal 1, respectively. Based on the current airline alliance relationships of the Expected Airlines, JMP, through its leasing efforts, has built a foundation for a Star Alliance hub in Terminal 6.

The respective subleases for each of the Expected Airlines are anticipated to have terms greater than 15 years.

### ***Additional Targeted Airlines***

JMP is also engaged in discussions with other selectively targeted and interested airlines to operate from Terminal 6 (including certain airlines operating at Terminal 7) based on a number of factors, including expected schedule and use of gate and or FIS facilities, passenger profile, airline alliance (e.g., Star Alliance), and the strategic fit with Terminal 6. In connection with its airline leasing plan, JMP has identified various combinations of these Additional Targeted Airlines, providing JMP with the potential to maximize revenues from these airlines as well as to balance projected use of gate and FIS facilities. The financial analysis in this Report assumes that JMP will be successful in securing certain Additional Targeted Airlines at rates and charges equal to those included in the projection of airline revenues. Ricondo estimates there are other possible airline combinations and sublease terms that could produce similar revenues. However, revenues would be subject to future subleases with airlines and actual terms to be negotiated between JMP and each Additional Targeted Airline.

The total revenue (excluding leased space and ancillary revenues) of Other Airlines is projected to increase from \$96.9 million in FY 2026 to \$326.6 million in FY 2029. The revenue is projected to total \$387.1 million in FY 2032, representing a CAGR of 5.8 percent from FY 2029 to FY 2032.

The non-binding letters of intent and terms negotiated with the Expected Airlines demonstrate the potential to achieve the revenue assumed for the Additional Targeted Airlines given that the average rental revenue of the Expected Airlines is higher than the average assumed for the remaining Additional Targeted Airlines to achieve the total airline revenue in the financial projections. In addition, JMP has demonstrated flexibility in airline sublease terms. This adaptable approach will likely help in securing certain Additional Targeted Airlines.

**Exhibit 5-3** presents the projected airline revenues from the Expected Airlines and the Additional Targeted Airlines. The combined share of the seven Expected Airlines is projected to be approximately 52 percent of the total airline revenue in FY 2026, decreasing to 36 percent in FY 2032. It is JMP's expectation that the projection of airline revenues

JOHN F. KENNEDY INTERNATIONAL AIRPORT

included in this Report will be met through a combination of revenues from Expected Airlines and revenues from certain of the Additional Targeted Airlines.

EXHIBIT 5-3 PROJECTED TERMINAL 6 OTHER AIRLINE REVENUES (IN MILLIONS)

NOTES:

Does not include JetBlue.

Expected Airlines include Aer Lingus, Cathay, Lufthansa AG (and its affiliates Austrian Airlines, Brussels Airlines, and Swiss International Air Lines), and one additional long-haul foreign flag airline.

SOURCE: JFK Millennium Partners, LLC, October 2024.

**Airline Leased Space Revenues**

Leased space revenues reflect airline payments for the exclusive use of lounge space, check-in desk office and other office space, and operations space. The anticipated leasable airline space, including a vacancy factor, was estimated by JMP based on Terminal 7 operations, commitments from the Expected Airlines, and assumptions about the amount of space to be leased by certain of the Additional Targeted Airlines based on JMP’s industry knowledge. Rental rates in the first year of each airline sublease are established for pre-and post-security airline leasing office and operations space, and lounge space, and are assumed to be adjusted each year by JMP pursuant to Expected Airline letters of intent and term sheets and assumptions regarding terms and conditions with certain of the Additional Targeted Airlines. Projected leased space revenues are approximately \$9.0 million for FY 2026, the first year in which these Terminal 6 revenues are collected. Leased space revenues are projected to increase to \$15.1 million in FY 2027, \$22.6 million in FY 2028, and \$24.4 million in FY 2029 (the first full year after DBO2). Leased space revenues are projected to increase to approximately \$30.7 million in FY 2032, reflecting a CAGR of 8.1 percent between FY 2029 and FY 2032.

**Exhibit 5-4** presents the projected airline leased space revenues. The Expected Airlines projected lease space revenue represents approximately 80.5 percent of the total estimated leased space revenues shown in Exhibit 5-4 in FY 2026 and 76.8 percent in FY 2032. **Exhibit 5-5** presents the projected Other Airline revenues, including activity-based revenues and leased space revenues, broken down by Expected Airlines and Additional Targeted Airlines.

NOTES:

Does not include JetBlue.

Revenues include activity-based and lease revenues.

Expected Airlines include Aer Lingus, Cathay, Lufthansa AG (and its affiliates Austrian Airlines, Brussels Airlines, and Swiss International Air Lines), and one additional long-haul foreign flag airline.

SOURCE: JFK Millennium Partners LLC, October 2024.

**Ancillary Revenues**

Ancillary revenues include above- and below-wing service providers<sup>131</sup>, and concessions storage rent. Total projected ancillary revenues are approximately \$4.6 million in 2029 (the first full year after DBO2) and will increase to approximately \$5.0 million in 2032, reflecting a CAGR of 2.8 percent. JMP does not anticipate increases to the real charges for services generating ancillary revenues throughout the projection period; increases in projected charges reflect inflation assumptions.

**5.2.3 TOTAL AIRLINE AND ANCILLARY REVENUES**

**Table A-1 in Appendix A** presents airline revenues projected to be received by JMP, resulting from the previously described rentals and fees. **Exhibit 5-6** presents the projected airline revenues.

As shown, JMP anticipates receiving Terminal 7 airline revenues from FY 2024 through FY 2025, and Terminal 6 airline revenues are anticipated to begin in FY 2026 upon DBO1.

Airline revenues are projected to total approximately \$369.2 million in FY 2029, the first full year of operation after Phase 2 completion. Airline revenues are projected to increase at a CAGR of 6.5 percent from FY 2029 through FY 2032, totaling approximately \$446.0 million in FY 2032. The increase in airline revenues is primarily due to additional enplaned passenger activity for these years and airline rate adjustments to compensate for inflation. A summary of airline revenues received by JMP is provided in **Table 5-2**.

### 5.3 NON-AIRLINE REVENUES

JMP anticipates receiving non-airline revenues in the form of concession revenues, advertising revenues, rebate revenues, other non-airline revenues, and interest income. The non-airline revenues included in the financial analysis reflect the forecast of activity discussed in Chapter 4 and the commercial strategy plan developed by JMP.

**Exhibit 5-7** presents the breakdown of projected non-airline revenue by category in Terminal 6 for 2029.

EXHIBIT 5-7 2029 ESTIMATED NON-AIRLINE REVENUES IN TERMINAL 6

NOTE:  
 Revenues related to news and convenience are included in Specialty Retail.  
 SOURCES: JFK Millennium Partners, LLC, October 2024.

### 5.3.1 CONCESSION REVENUES

JMP (through the MSA with Vantage) has been managing the concession program at Terminal 7 from the start of the Lease Agreement term and has implemented commercial strategies for Terminal 6 in terms of concessionaire management, space design and layout, and product category mix. Vantage’s experience in terminal concessions programs includes LaGuardia Airport Terminal B, Albuquerque International Sunport, Chicago Midway serving as concessions manager, alongside SSP and Hudson, and the new terminal at Kansas City International Airport. The non-airline revenues included in the financial analysis reflect the ASM forecast of activity discussed in **Chapter 4** and the commercial strategy plan developed by JMP.

Terminal 6 concession revenues will generally include the following core categories:

- Duty-Free and News & Retail
- Food & beverage

The construction of Terminal 6 includes a total terminal commercial area of approximately 59,600 square feet delivered through a combination of Phase 1 and Phase 2. Further, 90 percent of this commercial space will be in the airside concourse, while the remaining offerings will be located landside on the arrivals level (9 percent) and landside on the departures level (1 percent).

Terminal 6 passengers will pass through security and flow into the main retail space, where passengers may eat, shop, or dwell before continuing to the nearby holdrooms. Terminal 6 concessions are anticipated to provide a mix of premium, local, regional, national, and internationally recognized brands. Passengers flowing from both

Terminal 6 check-in areas will pass the first commercial area adjacent to the Terminal 5 connector; however, only passengers departing from the seven most westerly gates will transition past the second commercial area.

Key assumptions regarding contractual arrangements concerning the Terminal 6 concession program include the following:

- Effective December 1, 2022, JMP was required to negotiate new lease subleases with the non-airline tenants currently operating from Terminal 7. JMP receives revenues in the form of concessions revenue, including O&M/Marketing Fee; advertising revenue (via the airports-wide advertising program administered by Clear Channel); and revenue from other service providers in Terminal 7.
- JMP has commenced a competitive process to select concessionaires in the form of travel retail partners. Bidders have been selected for all Phase 1 concession spaces, as well as approximately 75 percent of Terminal 6 food & beverage space and all of the duty-free and news & retail space across both Phase 1 and Phase 2.
- Concession revenues will be collected monthly and will be structured as the greater of 1/12<sup>th</sup> of a minimum annual guarantee (MAG) or percentage rent. For a standard sublease, the MAG is calculated based on a MAG per enplanement negotiated for Phase 1 and Phase 2 as part of the tenant selection process. For all other years, the MAG per enplanement will be increased by CPI. At the beginning of each calendar year, the MAG will be calculated based on the current year escalated MAG per enplanement (or negotiated Phase 1 or Phase 2 MAG per enplanement for those years) multiplied by the projected enplanements for the year. The MAG will be adjusted at the end of each year based on actual enplanements and the total rent owed by each subtenant will be reconciled accordingly.
- For the concessions, a Common Area Maintenance fee will be calculated to cover common operating costs. The Common Area Maintenance fee will be calculated on a per-square-foot basis with no markup of the operating costs to the tenant and will be provided as part of the terms of the tenant contract.
- Marketing Revenues will be collected as a percentage of gross sales, using a common industry benchmark. Marketing Revenues will be used to promote the concessions program across different mediums and to create a clear retail brand. A marketing calendar and budget for all activities will be developed by JMP and agreed upon with the concessionaires at the start of each year.
- In Terminal 6, 30 percent of gross sales are required to be generated by the Airport Concession Disadvantaged Business Enterprises and Disadvantaged Business Enterprises. This requirement has been incorporated into the ongoing terminal retail planning and contract negotiations for the procurement packages described above.

Concession revenues include anticipated rents from duty-free, specialty retail, news, and gifts,<sup>132</sup> and food and beverage concessionaires. The projected concession revenue assumes the spend rates per enplaned passenger ("SPE") and effective rental rates determined by JMP with SPE increased throughout the Projection Period based on inflation. Enplaned passengers are increased according to the ASM activity forecast described in **Chapter 4**. Assumptions regarding the specific categories include the following:

- **Duty-Free and News & Retail:** JMP has successfully selected all Terminal 6 duty-free and news & retail concession space vendors. Estimates of duty-free and news & retail revenues in the financial analysis are based on the SPEs assumed in the successful bids and effective rental rates negotiated (i.e., portion of sales shared with JMP as a percentage, which may be tiered depending on the product type) included in the successful bids.

---

<sup>132</sup> Category "News and Gifts" also can refer to "News and Convenience."

JOHN F. KENNEDY INTERNATIONAL AIRPORT

The effective rental rates bid by the successful proposers are anticipated to be incorporated into contracts between JMP and the proposers.

- Food & Beverage:** JMP has successfully bid and awarded all concession spaces for Phase 1, as well as approximately 75 percent of Terminal 6 food & beverage concession space across both Phase 1 and Phase 2, and the remaining 25 percent is currently in the bidding process. Accordingly, approximately 75 percent of estimated food & beverage revenues in the financial analysis are based on the estimated SPEs and effective rental rates included in the successful bids. The effective rental rates are anticipated to be incorporated into contracts between JMP and the successful proposers. The remaining 25 percent of estimated food & beverage revenues are estimated based on spend rates from a third-party concession consultant and assume effective rental rates that are less than those included in the successful bids for purposes of conservative financial projections.

Ricondo finds the concessions revenues in the Projection Period reasonable based on the terms already negotiated, potential increases in revenue based on passenger demographics with Expected Airlines, and industry benchmarking for similarly situated terminals and markets.

**Exhibit 5-8** presents the total concession revenues projected to be received by JMP during the Projection Period for Terminal 6, the portion of this revenue to be paid to the Port Authority in concessions revenue rents, and projected concession revenues per Terminal 6 enplaned passenger. As described in **Section 5.1.2** of this Report, JMP will pay Concessions Revenue Rents to the Port Authority which are reflected in the Port Authority Rents section of **Appendix A-3**. The portion of concessions revenues projected to be paid to the Port Authority in Concessions Revenue Rents (including the Concession Rent subordinate to Senior Debt Obligations) represents an 85 percent share of total concessions revenues in FY 2026, an 86 percent share in FY 2027, a 56 percent share in FY 2028, and a 50 percent share for FY 2029 through the end of the Projection Period.

**EXHIBIT 5-8 PROJECTED CONCESSION REVENUES (IN MILLIONS) AND CONCESSION REVENUES PER TERMINAL 6 ENPLANED PASSENGER**

NOTE: PA - Port Authority of New York and New Jersey.

SOURCES: JFK Millennium Partners, LLC, October 2024.

### 5.3.2 ADVERTISING REVENUES

JMP anticipates receiving advertising revenues which reflect the Terminal 6 portion of the Port Authority's airports-wide advertising revenue program administered by Clear Channel. Advertising revenue projections for Terminal 6 are calculated based on a metric of Terminal 7 advertising revenues per enplaned passenger which, in turn, are based on spend per enplaned passenger rates that were benchmarked against other JFK terminals, adjusted for inflation, and applied to the number of enplaned passengers departing from Terminal 6 gates.

It is anticipated that JMP will begin receiving advertising revenues in 2026, after the completion of Phase 1 construction. Advertising revenue is projected to be \$1.2 million in FY 2026 and increase to \$1.8 million in FY 2027, Advertising revenues are projected to increase again in FY 2028 to \$3.0 million and increase at a CAGR of 4.0 percent for the remainder of the projection period, from \$3.4 million in FY 2029 to \$3.8 million in FY 2032. However, throughout the Projection Period, advertising on a per passenger basis is anticipated to remain flat and increases in the projected revenues are a result of inflation. Clear Channel will provide JMP with its share of advertising revenue attributable to Terminal 6. Of the Terminal 6 advertising revenue received from Clear Channel, 50 percent is to be paid to the Port Authority in the form of advertising rent.

### 5.3.3 REBATE REVENUES

JMP anticipates receiving rebate revenues in the form of concessions storefronts tenant cost recovery and solar PV installation vendor rebates. Tenant cost recovery reflects revenues from concessionaires associated with the repayment of capital expenditures incurred in preparing storefronts that were initially provided by JMP. It is anticipated JMP will receive rebate revenues from FY 2026 to FY 2029, with rebate revenues totaling approximately \$1.5 million in FY 2026, approximately \$4.7 million in FY 2028 and approximately \$1.0 million in FY 2029.

### 5.3.4 OTHER NON-AIRLINE REVENUES

In addition to rental income received from concessionaires, JMP will also receive two other payments from the concessionaires:

- A Common Area Maintenance fee, which reflects the contribution of concessionaires to general terminal operating costs and is calculated on a per-square-foot basis (only affected by space increases and inflation).
- Contribution to a centralized Marketing Fund, which is calculated as a percentage of concession sales, and all of which is applied by JMP to pay for promotional and marketing activity for the terminal and its tenants.

It is anticipated JMP will receive the above-mentioned revenues totaling approximately \$1.1 million in FY 2026, approximately \$2.6 million in FY 2028 and the revenues are projected to increase at a CAGR of 4.2 percent for the remainder of the projection period, from \$2.9 million in FY 2029 to \$3.3 million in FY 2032.

### 5.3.5 INTEREST INCOME

JMP will receive interest income from deposits in various reserve accounts, including the Debt Service Reserve Account, the Ramp-Up Reserve Account, the Liquidity Reserve Account the O&M Reserve Account, and the Major Maintenance Reserve Account. The interest income is projected to be approximately \$7.2 million in FY 2028 and \$8.6 million in FY 2032. The interest rate on the deposits is assumed to be 3.0 percent throughout the lease period.

### 5.3.6 TOTAL NON-AIRLINE REVENUES

It is anticipated that JMP will begin receiving non-airline revenues from Terminal 6 operations in 2026, after the completion of Phase 1 construction. Non-airline revenues are projected to total approximately \$17.5 million for FY 2026, increasing to \$51.7 million in FY 2028, the year in which Phase 2 of construction is completed and Terminal 6 becomes fully operational. Non-airline revenues are projected to increase to \$57.8 million in FY 2029, the first full year of the new terminal’s operation. From FY 2029 to FY 2032, non-airline revenues are projected to increase at a CAGR of 2.3 percent, with \$61.7 million in non-airline revenues projected for FY 2032.

Total projected non-airline revenues to be received by JMP from the operation of Terminal 6 are presented in **Table A-2** in **Appendix A** of this Report.

**Exhibit 5-9** presents total non-airline revenues projected to be received by JMP during the Projection Period for Terminal 6.

EXHIBIT 5-9 PROJECTED TERMINAL 6 TOTAL NON-AIRLINE REVENUES (IN MILLIONS)

SOURCES: JFK Millennium Partners, LLC, October 2024.

### 5.4 OPERATING AND MAINTENANCE EXPENSES

O&M Expenses include those expenses incurred by JMP related to operating and maintaining Terminal 6 during the term of the Lease Agreement and described within **Section 5.4.2**. O&M Expenses do not include costs directly incurred by the airlines or costs directly incurred by the concessionaires. O&M Expenses are classified into the following categories. Certain expenses are limited to the construction period. Durations for each category are described in **Section 5.4.2**:

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

- Construction management fee
- Contracted services
- Utilities
- Personnel or Staffing Costs
- Insurance during operations
- Operating management fee
- Repairs and maintenance
- General & Administrative
- Ground Transportation Center (GTC) Operating Expenses
- Personnel

O&M Expenses and GTC Operating Expenses are anticipated to occur throughout the Projection Period. Insurance During Construction and construction management fees are anticipated during the construction period of the Project, while the operating management fees are anticipated to begin in 2028 after the completion of Terminal 6.

For all categories except Insurance During Construction and repairs and maintenance, O&M Expenses were estimated by Vantage, which has strong experience operating airports and managing operations during project construction. Vantage used benchmark data from the LGA Terminal B Redevelopment, with project-specific factors applied. In 2016, Vantage led the LaGuardia Gateway Partners consortium on the LaGuardia Airport Terminal B Redevelopment project to financial close and lease commencement. Estimated Insurance During Construction O&M Expenses were developed by JMP's technical advisors as described in **Section 5.4.2**. Projections of the repairs and maintenance O&M Expense were developed by JMP's technical advisors using asset modeling and inputs from Vantage that were based on the Designer-Builder's construction price and in-house historical data. This section of the Report presents key information provided by Vantage and JMP's technical advisors.

**Exhibit 5-10** presents the breakdown of estimated Terminal 6 O&M Expenses by category for 2029, the anticipated first full year of Terminal 6 operations. Projected O&M Expenses for Terminal 6 are presented in **Table A-3** in **Appendix A**. Estimated O&M Expenses for 2029 serve as the base year expenses from which future Terminal 6 O&M Expenses were projected. O&M Expenses were projected based on the type of expense, expectation of future inflation rates, and anticipated phasing related to the development of Terminal 6.

Additional information for each category of O&M Expense is included in **Section 5.4.2**.

EXHIBIT 5-10 ESTIMATED 2029 TERMINAL 6 OPERATING AND MAINTENANCE EXPENSES (IN MILLIONS)

NOTES:

GTC – Ground Transportation Center

SOURCE: JFK Millennium Partners LLC, October 2024.

**5.4.1 OPERATING AND MAINTENANCE EXPENSE PROJECTIONS**

During the remaining years of construction of the Project (2024 through 2028), O&M Expenses are projected to fluctuate between approximately \$101.6 million and \$44.4 million annually, primarily as a result of many construction period insurance costs requiring upfront payment. Upon Phase 1 DBO, additional O&M Expenses are required (e.g., G&A, contracted services, utilities), increasing the total O&M Expenses to approximately \$101.6 million for 2026.

O&M Expenses and management fees are projected to increase to \$95.6 million in FY 2029, the first full year of operations for Terminal 6. Between FY 2029 and FY 2032, O&M Expenses are projected to increase by a CAGR of 3.5 percent, increasing to \$106.1 million by FY 2032.

**Exhibit 5-11** presents the projected O&M Expenses for Terminal 6.

EXHIBIT 5-11 PROJECTED TERMINAL 6 OPERATING AND MAINTENANCE EXPENSES (IN MILLIONS)

NOTES:

GTC – Ground Transportation Center

SOURCE: JFK Millennium Partners LLC, October 2024.

5.4.2 OPERATING AND MAINTENANCE EXPENSE CATEGORIES

The following subsections describe the various categories of O&M Expenses.

**Insurance During Construction and Operations**

Insurance payments during the construction of the Project will be made from the commencement of Phase 1 construction in 2022 through FY 2027. Insurance costs were estimated for both construction-related insurance costs during the 2022 through 2027 construction period and operations-related insurance costs from 2027 through the term of the lease. Estimates are based on a buildup of individual policies, including general liability, workers compensation, umbrella, builder’s risk, and professional liability, among others. Where final pricing of a given policy was not yet available, market research and industry standards were used to estimate approximate insurance costs.

O&M Expenses associated with Insurance During Construction are projected by JMP to total approximately \$36.4 million in FY 2024 and are anticipated to range between approximately \$8.4 million and approximately \$41.8 million between FY 2025 and FY 2027.

O&M Expenses related to insurance during operations are incurred starting in FY 2027 and are projected to be \$6.5 million.<sup>133</sup> The insurance expenses for FY 2029, the first full year of operations at Terminal 6, are projected to be

<sup>133</sup> Terminal 7 related insurances through 2025 are included in "Insurance During Construction."

\$11.0 million. Insurance expenses during operations are projected to increase by a CAGR of 2.3 percent from FY 2029 through FY 2032 to \$11.8 million. JMP does not anticipate any increase to the real cost of insurance throughout the projection period; this CAGR of 2.3 percent is in line with expected inflation over the same period.<sup>134</sup>

### **Construction Management Fee**

The construction management fee is incurred from the commencement of Phase 1 construction in 2022 through the completion of Phase 2 construction in 2028. Each calendar quarter will require approximately \$1.9 million in construction management costs, which total approximately \$7.6 million annually during each full year of construction. The total annual construction management fee reflects the terms of the Management Services Agreement (MSA), which includes a \$6.6 million fee in 2018 that is increased by CPI at the start of construction, with no inflation applied thereafter, equaling \$7.6 million. These fees relate to services provided under the MSA for the design and construction of the Project, concessions related to Terminals 6 and 7, and the operations of Terminal 7 and Phase 1 of Terminal 6.

### **Contracted Services**

Contracted services are comprised of outsourced operating services. Total O&M Expenses for contracted services were estimated by type of contracted service and are based on the Port Authority lease requirements as well as comparable figures from LGA Terminal B. For each category, the relevant key driver was used to project expenses. Examples of relevant key drivers include square footage of the terminal, apron acreage, expected passenger volume, number of Full-Time Equivalent (FTE) employees, or the number of passenger loading bridges.

Outsourced services include the following:

- Cleaning and sanitation-related services based on space, including janitorial services, which include common area space, septic services, waste disposal, and pest control.
- Security, police, and fire services, which are allocated based on space (measured in square feet).
- Snow removal services based on space (measured in acres).
- Facilities and technology, including common-use systems; heating, ventilation, and air conditioning (HVAC) and electrical and mechanical systems; elevators and escalators; and certain other maintenance based on space (measured in square feet).
- Environmental services based on space (measured in square feet).
- Baggage system based on number of passengers.
- Passenger loading bridges and doors based on number of bridges.
- Security Identification Display Area (SIDA), Secure Worker Access Consortium (SWAC), drug testing, and employee wellness based on FTE employees.
- Communications and marketing services based on space (measured in square feet).

As shown on **Table A-3**, contracted services for Terminal 6 are anticipated to begin in FY 2026 and total approximately \$31.6 million in FY 2026, the first full year of Phase 1 operation. The completion of Phase 2 in FY 2028 marks an increase in projected contracted services, to a total of approximately \$38.9 million. Contracted services are

---

<sup>134</sup> The Federal Reserve Projection Long-Term (10-Year) Average Annual Inflation as of 2024 Q3 report is 2.3 percent.

<https://www.philadelphiafed.org/surveys-and-data/real-time-data-research/inflation-forecasts> (accessed August 22, 2024)

projected to increase at the rate of 4.4 percent CAGR from \$38.9 million in FY 2028 to \$46.2 million in FY 2032. JMP does not anticipate increases in the real cost of contracted services throughout the Projection Period; increases in the projected costs reflect inflation assumptions.

### **Utilities**

The utility costs include electricity, chilled water, hot water, gas, water and sewer, and telephones. Utility costs were estimated using benchmarking data from JFK Terminal 7 and an assumed energy consumption for the planned Terminal 6 facility. The projection for utility costs accounts for the expected cost and consumption requirement for each utility category.

As shown on **Table A-3**, Terminal 6 utility costs are estimated to begin in FY 2026 and total approximately \$10.7 million. An increase to approximately \$13.2 million is projected for FY 2028 as Phase 2 is completed. Utility costs are projected to increase to \$15.2 million by 2032, reflecting a CAGR of 3.5 percent from FY 2028 to FY 2032.

### **Personnel or Staffing Costs**

O&M Expenses related to personnel assume full pay and benefits for staff, including management staff and the terminal and ramp operations team. All other services in the building are assumed to be outsourced and are contained in contracted services. Personnel or staffing costs were estimated by Vantage using a staffing model that was rebuilt in the fourth quarter of 2021, which considers a 20-hours-per-day, 7-days-per-week operation, and uses assumptions based on LGA Terminal B benchmarking, as well as New York market rate information.

The O&M Personnel costs for the Terminal 6 operating period are shown as a dedicated line item in the O&M financial model.

As shown on **Table A-3**, personnel O&M Expenses for Terminal 6 are assumed to begin in January 2026 with a team of staff supporting operations in Terminal 7. This team will transition to Terminal 6 at the commencement of Phase 1 operations, along with additional personnel to meet Requirement for Performance of Work (RPW) requirements.

Personnel expenses are projected to be \$14.0 million for FY 2026 and are projected to increase to \$14.8 million for FY 2029. Between FY 2029 and FY 2032, personnel expenses are projected to increase to \$16.3 million by a CAGR of 3.4 percent, attributable primarily to wage and benefits increases.

### **Operating Management Fee**

JMP's Management Services Agreement (MSA) requires payment of an operating management fee to the Manager, which will commence in FY 2028 when Terminal 6 becomes fully operational following the completion of Phase 2 construction. The operating management fee is projected to total approximately \$9.4 million in FY 2029, the first full year of Terminal 6 operations. The operating management fee is projected to increase by a CAGR of 2.1 percent from FY 2029 through FY 2032 to \$10.0 million, which is in line with expected inflation over the same period.

### **Repairs and Maintenance**

JMP will maintain common systems and assets while the airlines will maintain airline-specific systems and assets. In projecting O&M Expenses, the maintenance of any airline assets was not assumed.

Repair and maintenance O&M Expenses are anticipated by JMP to increase from approximately \$315,469 in FY 2026 to approximately \$2.0 million in FY 2028, followed by an increase to approximately \$4.8 million in FY 2030. Repairs and maintenance O&M Expenses are projected to remain relatively constant through the remainder of the projection period, totaling approximately \$4.7 million in FY 2032.

### **General and Administrative Expenses**

General and Administrative (G&A) expenses were estimated by JMP based on benchmarking data from LGA Terminal B. Major administrative expenses include professional services (including legal services, public relations and marketing services, and environmental consulting); telephone; training; information technology (IT) system license, fees, upgrade, and maintenance; and transition budget.

As shown on **Table A-3**, G&A expenses are projected to be \$1.1 million in FY 2026, the first full year of G&A expenses under Phase 1. Terminal 6 G&A expenses are projected to remain relatively constant through FY 2027, before increasing at a CAGR of 2.2 percent from \$1.2 million in FY 2028 to \$1.3 million in FY 2032. JMP does not anticipate increases in the real cost of G&A expenses throughout the Projection Period; increases in projected costs reflect inflation assumptions.

### **Ground Transportation Center Operations**

GTC O&M Expenses are estimated based on the Ground Rent agreed among JMP, the Port Authority, and JetBlue, plus annual O&M Expenses to maintain the operational hours. The total cost is distributed among the Port Authority, JMP, and JetBlue as follows: 50 percent is allocated to the Port Authority, and the remaining 50 percent is allocated between JMP and JetBlue based on assumed traffic. The GTC O&M Expenses included in this analysis reflect the JMP share of GTC costs.

GTC O&M Expenses are projected to total approximately \$287,467 in FY 2024 and increase to \$594,999 in FY 2025. In FY 2026, the first full year of operations after DBO1, GTC O&M Expenses are projected to total approximately \$614,336 and increase by a CAGR of 2.2 percent throughout the Projection Period to approximately \$699,537 in FY 2032. This 2.2 percent CAGR reflects assumed inflation over the same period and does not assume increases in real costs for GTC operations.

## **5.5 ASSET REPAIR AND REPLACEMENT**

After construction is complete, Terminal 6 will require routine capital investment in all common-use systems and assets. The following asset categories have been identified: fire protection, HVAC, plumbing, baggage handling, conveying, interiors, shell, fuel, civil (landside and airside), passenger loading bridges, Furniture Fixtures & Equipment (FF&E), electrical communications and security, and electrical power.

As described in the Lease Agreement, JMP will be required to perform Major Maintenance of Terminal 6 and will establish and fund a Major Maintenance Reserve Fund annually from revenues to pay for the Major Maintenance of assets. Upon the expiration of the Lease Agreement, JMP must ensure that the condition of Terminal 6 satisfies the terms of the Handback Requirements found in the Lease Agreement.

Nearly all asset components require annual inspections; however, repair and replacement needs will vary with the useful lives of the assets. The need for asset repair and replacement is first anticipated in FY 2026. Initial asset replacement will be required for items with shorter useful lives, such as IT and security system components. Additional asset replacements in Terminal 6 are scheduled to occur throughout the Projection Period, depending on the estimated useful life of the component. Projected annual asset repair and replacement costs are presented in Table A-3 in Appendix A. The expenses, as developed by a third-party consultant, are projected to total approximately \$41,560 in FY 2026 and increase to \$3.0 million for the year 2032.

**Exhibit 5-12** presents the projected asset repair and replacement costs for Terminal 6 during the Projection Period.

EXHIBIT 5-12 TERMINAL 6 PROJECTED ASSET REPAIR AND REPLACEMENT EXPENSES (IN MILLIONS)

NOTE:  
 Asset repair and replacement projections include major maintenance expenses.  
 SOURCE: JFK Millennium Partners, LLC, October 2024.

### 5.6 FINANCING RELATED COSTS

In addition to O&M Expenses, asset repair and replacement, and Port Authority rents, additional operating costs will be required in the form of ongoing financing related costs for O&M Expense cashflow purposes and to maintain credit ratings on the Project. Projected financing related costs include the cost of maintaining ratings with rating agencies as well as admin agent, depository, and collateral agent fees. JMP projections for financing related costs include an estimated \$1.2 million in FY 2024, increasing annually based on the rate of inflation to \$1.4 million in 2032.

### 5.7 ANNUAL DEBT SERVICE

JMP intends to issue Series 2024 Bonds to refund a portion of the Series 2022A Bonds and the Senior Term Loans. A summary of the par amount (including premium) of each of the anticipated issuances is provided in **Table 5-3** and the outstanding debt is shown in **Table 5-4** before and after the issuance of the Series 2024 Bonds and annually thereafter through 2028.

TABLE 5-3 ESTIMATED JFK TERMINAL 6 SERIES 2024 BONDS

FY 2024 DEBT ISSUANCES	BOND ISSUE AMOUNT
2024A Current Interest Bonds	\$1,468.1 million
2024B Convertible Capital Appreciation Bonds (CABs)	\$110.0 million

1 Refers to 2024A Current Interest Bonds and 2024B Convertible Capital Appreciation Bonds (CABs)

2 Refers to anticipated future JMP Bonds that will refund the Series 2022A Bonds Facility and Loan Facility in Q1 2028. More details are provided in Section 5.7.4.

SOURCE: JFK Millennium Partners, LLC, October 2024.

**Table A-4 in Appendix A** presents the details of JMP's annual debt service on the Series 2022A Bonds, Series 2024 Bonds, Loan Facilities, and anticipated Additional Bonds. As a special purpose company created to develop the Project, JMP has no other outstanding debt.

### 5.7.1 DEBT SERVICE ON THE EXISTING SERIES 2022A BONDS

In 2022, JMP raised approximately \$435 million from Series 2022A Bonds as part of the construction financing. The Series 2022A Bonds are structured as a Flexible Drawdown Bond (FDB) direct purchase). The amount was drawn completely in FY 2022. Of the \$435 million, approximately \$240 million is anticipated to be retired in FY 2024 from a portion of the proceeds of the Series 2024 Bonds and the remaining \$195 million is anticipated to be retired in Q1 FY 2028 from a portion of the proceeds of a bond issuance (Series 2028 Bonds). The interest on this variable tax-exempt facility is calculated at the Securities Industry and Financial Markets Association (SIFMA) Municipal Swap Index, plus applicable margin. JMP has entered into a variable-to-fixed swap agreement to change this variable interest obligation into a fixed interest obligation of 3.401 percent + applicable margin. The margin varies from 1.4 percent to 1.9 percent over the period. The effective interest rate to JMP translates to 4.8 percent to 5.3 percent from FY 2024 to FY 2028.

The projected Debt Service on the 2022A Bonds is shown in **Table 5-5**.

TABLE 5-5 PROJECTED DEBT SERVICE – SERIES 2022A BONDS (IN MILLIONS)

## 5.7.2 DEBT SERVICE ON THE SENIOR TERM LOANS

Also in 2022, JMP raised approximately \$3,009 million from a consortium of banks as part of the construction financing. By the end of Q3 of FY 2024, JMP expects to have drawn \$2,047 million out of the total amount. The remaining \$962 million is anticipated to be drawn by Q4 of FY 2025. Out of the drawn amount of \$2,047 million, \$1,258 million is anticipated to be retired in Q4 FY 2024 from the proceeds of the Series 2024 Bonds. The entire remaining balance of \$1,751 million (post disbursement of \$962 million) is anticipated to be retired in Q1 FY 2028 through Series 2028 Bonds.

The interest on this variable taxable Senior Term Loans is calculated at Secured Overnight Financing Rate (SOFR) Index plus applicable margin. JMP has entered into a variable-to-fixed swap agreement to change this variable interest obligation into a fixed interest obligation of 3.637 percent plus applicable margin. The margin varies from 2.25 percent to 2.75 percent over the period. The effective interest rate for JMP translates to 5.9 percent to 6.4 percent from FY 2024 to FY 2028.

Payments on the Senior Term Loans include commitment fees throughout the term of the Senior Term Loans prior to its refunding, as well as hedge payments and interest on the amount of funding drawn from the Senior Term Loans. The projected Debt Service on the Senior Term Loans is shown in **Table 5-6**:

TABLE 5-6 PROJECTED DEBT SERVICE – SENIOR TERM LOANS (IN MILLIONS)

## 5.7.3 DEBT SERVICE ON SERIES 2024 BONDS

JMP intends to issue multiple series of bonds in 2024 to refund a portion of the Series 2022A Bonds and the Senior Term Loans, and to finance the remaining construction.

### **Senior Series 2024A Current Interest Bonds**

JMP intends to issue Senior Series 2024A Current Interest Bonds to the amount of approximately \$1.39 billion to refinance a portion of the existing Senior Term Loans and Series 2022A Bonds. The Current Interest Bonds are assumed to carry an interest rate between 5.25 and 5.50 percent and will mature over a period from FY 2055 to FY 2060. The annual full-year interest expense from FY 2025 to FY 2054 is \$74.9 million and begins decreasing from FY 2055 onward due to commencement of principal repayments.

### **Series 2024B Convertible Capital Appreciation Bonds**

JMP intends to issue Senior Series 2024B Convertible Capital Appreciation Bonds (CABs) to the amount of approximately \$110 million to refinance a portion of the existing Senior Term Loans and Series 2022A Bonds. The CABs are expected to mature in FY 2054. The outstanding principal amount of the CABs will increase each year and is projected to increase from \$110 million in FY 2024 to \$180 million by Q2 FY 2034 as interest accrued during the year will be added to the outstanding principal amount at the end of the year. From Q3 FY 2034 onwards, interest payments will commence on the outstanding principal amount of \$180 million. The annual full-year interest expense from FY 2035 onwards is \$10.0 million. During the Projection Period, there is no projected debt service on the CABs.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

The projected Debt Service on the Series 2024 Bonds is shown in **Table 5-7**.

#### 5.7.4 DEBT SERVICE ON FUTURE SERIES 2028 BONDS

For financial projection purposes, JMP currently assumes refunding the remaining Series 2022A Bonds (outstanding amount of \$195.4 million) and Senior Term Loans (outstanding amount of \$1,751.3 million) with additional Senior Bonds in 2028 (the Series 2028 Bonds), with an anticipated par amount of \$1,953.5 million. For the purpose of this analysis, the Series 2028 Bonds will carry interest rates of 5.00 to 5.25 percent. The Series 2028 Bonds will start maturing in FY 2034 and have a term of 28 years from FY 2028 to FY 2055.

The projected Debt Service on the 2028 Bonds is shown in **Table 5-8**.

TABLE 5-8 PROJECTED DEBT SERVICE – SERIES 2028 BONDS (IN MILLIONS)

#### 5.7.5 TOTAL ANTICIPATED DEBT SERVICE

**Exhibit 5-13** presents annual total debt service on the Series 2022A Bonds, Senior Term Loans, Series 2024 Bonds and future Series 2028 Bonds throughout the Projection Period.

While the Projection Period is through FY 2032, JMP anticipates that the total debt service payments will continue to increase throughout the term of the Lease Agreement. Principal payments on the Senior Series 2024A Current Interest Bonds, Senior Series 2024B CABs, and Series 2028 Bonds are anticipated to begin in 2055, 2054 and 2034, respectively.

EXHIBIT 5-13 ESTIMATED TOTAL DEBT SERVICE (IN MILLIONS)

NOTES:

- 1 Debt service shown includes gross accrued interest that includes the interest capitalized during the construction period.
  - 2 Debt service for Senior 2022A Bonds and Loan Facilities does not include the principal retired by refinancing in FY 2024 and FY 2028
- SOURCE: JFK Millennium Partners, LLC, October 2024.

## 5.8 EVALUATION OF TERMINAL 6 AIRLINE CHARGES

The strong demand in the New York City air service market means there is less airline sensitivity to airport charges, which are higher in New York than in other US markets. At JFK specifically, charges are anticipated to increase as dated facilities are replaced with new terminals and gates. Terminal 6 is projected to be competitive with similar or lower than average fees for other newer JFK terminals which represent the greatest competition for alternatives to Terminal 6. While all terminals present potential competition for tenants, some provide greater competition than others due to the availability of gate capacity and alignment with existing carriers. The New Terminal One (NTO) presents the strongest competition for the future Terminal 6's potential airline tenants other than JetBlue because the NTO is not anticipated to have a primary tenant or hub airline that would utilize a significant amount of the terminal capacity and potentially attract affiliated carriers. Therefore, the 23 gates, assuming NTO Phase B1 and B2 are constructed, will generally be available for consideration by those tenants that may also consider Terminal 6. Based on public disclosures, NTO has projected annual airline revenue that reflects an average cost per forecast enplaned passenger increasing from \$104 in 2026 to \$126 in 2035.<sup>135 136</sup> These charges may vary greatly by carrier depending on services and fees, but reflect that NTO, on average, is not positioned to be a low-cost alternative to Terminal 6.

<sup>135</sup> New York Transportation Development Corporation, *Special Facilities Revenue Bonds, Series 2024, (John F Kennedy International Airport New Terminal One Project) Official Statement*, Appendix B-1, June 18, 2024 (data); Ricondo & Associates, Inc., September 2024 (calculations).

<sup>136</sup> Does not include landing fees or other charges imposed by the Port Authority.

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

Terminal 4, while predominately occupied by Delta, has an ongoing development program that includes eight additional gates that may provide additional options for other airlines. Terminal 8 is occupied by American and its alliance partner, British Airways, relocated to Terminal 8 at the end of 2022. Therefore, while there are other foreign flag carriers that operate out of Terminal 8, there is limited gate availability, and the terminal is not undergoing a significant increase in gate capacity.

JMP has demonstrated a market for Terminal 6 and its charges by negotiating non-binding letters of intent with term sheets outlining the terms and conditions of subleases with each of the seven international airlines for Terminal 6 through at least 2040. These airlines will have specific business, commercial, and operational terms that demonstrate JMP's ability to adapt terms based on the tenant and secure long-term subleases. Importantly, the average revenue of the seven Expected Airlines is above the average targeted revenue projected in this Report.

In addition, airline decision-making is often influenced by other factors, such as the market revenue potential or the role of a critical market in the system. Of US passenger airline costs in the first quarter of 2024, approximately 2.0 percent was for airport landing fees, and approximately 5.2 percent was for non-aircraft rent and ownership, which includes terminal rents.<sup>137</sup> This indicates the potential revenue from a market will still play a more significant role in decision-making than airport charges, especially in a market as significant and as important as New York.

The following are factors airlines may consider when contemplating the cost reasonableness of Terminal 6 relative to other alternatives:

**Service to Other US Markets**

- While other US airports could serve as an alternative and airlines could assess the incremental cost JFK Terminal 6 represents relative to other airports, foregoing the New York market to reduce airline charges is not likely. One fact that demonstrates this is all regularly scheduled transatlantic foreign flag carriers currently serving the US serve New York City.
- In 2019, JFK served approximately 13.4 million of the 34.9 million O&D transatlantic passengers at the US gateway airports used in the comparison analysis. The next highest was LAX, with 5.6 million passengers. While certain airports offer an alternative with a lower cost, the size of the market and scale of the operation are materially different.
- JFK's location on the East Coast means transatlantic flights to alternative US gateway airports would incur additional distances to travel and the resulting associated costs from those additional distances, most notably fuel.

**Service to Other New York Airports**

- The three primary New York large commercial service airports (JFK, EWR, and LGA) have had historically high estimated CPEs when compared to other reported US airport CPEs. Therefore, the EWR, LGA, and JFK terminals can be considered more directly comparable than estimated sample flight charges across all international gateway airports in the United States.
- LGA does not present a viable alternative and comparison to JFK Terminal 6 due to a perimeter rule that prevents nonstop flights beyond 1,500 miles (except DEN or Saturday flights), slot and FAA flight limitations, and lack of

---

<sup>137</sup> Airlines for America, *Passenger Airline Cost Index (PACI)*, <http://airlines.org/dataset/a4a-quarterly-passenger-airline-cost-index-u-s-passenger-airlines/> (accessed August 22, 2024).

## JOHN F. KENNEDY INTERNATIONAL AIRPORT

FIS facilities. However, the high airline cost at LGA demonstrates that airlines are willing to pay a premium to access the New York market.

- EWR and its facilities are more directly comparable to JFK Terminal 6 than LGA and could provide alternative access to a similar market. However, the markets for the two airports are not identical due to their locations, and more than half of the international destinations served by the New York City market are served by both EWR and JFK. In addition, existing gates at EWR have high utilization and cannot likely accommodate a significant amount of activity without development. Should redevelopment of EWR facilities occur in a manner that could provide a material amount of gate capacity, the cost would be significant enough that fees may come in line with Terminal 6. In addition, the project would take a significant amount of time to plan, design, obtain necessary approvals—including environmental review—and construct. Finally, while potentially a lower cost option, EWR does not offer a low-cost alternative based on historically reported data.

***Service to Other John F. Kennedy International Airport Terminals***

- JFK has a unique environment where there is a diverse selection of terminal options, each operated by a different party with independent charging approaches and agreements. This creates choices for airlines and potential competition among terminal operators. The non-JetBlue airlines that may find Terminal 6 operated by JMP attractive may be similarly attracted to the JFK terminals operated by other entities.
- At this time, there is no certainty regarding which airlines will use and lease facilities at Terminal 6 beyond those that have already committed to doing so. However, even with the ongoing terminal development programs at JFK, it is not anticipated that there will be an excess of gate capacity relative to demand.
- More than 70 airlines served JFK in 2024, each with different operating needs and business objectives. Carriers who are not currently obligated to have a long-term lease at a particular terminal have begun to target facilities and many factors will inform the decision-making, including, but not limited to costs. These may include:
  - Alignment of facility capabilities with operating requirements (aircraft size, international processing capabilities, etc.),
  - Colocation with alliance partners or connecting airlines,
  - Congestion of existing facilities,
  - Terminal operator’s experience,
  - Availability of leasable space such as lounge and operating space,
  - Prioritization and rights to facility use, and
  - Indirect operating costs.
- Between the number of carriers and the variety of factors influencing the selection of terminals by airlines, there are ways to achieve activity or revenues projected in the Projection Period without dependency on a particular set of circumstances. This allows for flexibility, although competition for airlines amongst the terminal operators is also anticipated to remain high throughout the Projection Period.
- Negotiating non-binding letters of intent with term sheets outlining terms and conditions of subleases with seven Expected Airlines for Terminal 6 through at least 2040 demonstrates the market supports the terminal charges and charging structure.

**Based on the reasons described in this section, Ricondo finds that the projected Terminal 6 user fees are not anticipated to have a material impact on the projected air traffic demand for Terminal 6.**

## 5.9 CASH FLOW AND DEBT SERVICE COVERAGE

**Table 5-9** and **Table A-5** in **Appendix A** present the Project cash flows, including airline revenues, non-airline revenues, O&M Expenses, Port Authority rents, financing related costs, asset repair and replacement, reserve requirements and adjustments, and debt service. The tables also present the DSCRs projected for the Senior and Subordinate Obligations associated with the Project.

As contained in Section 10.25 of the CAAA with respect to the Rate Covenant for Secured Obligations:

(a) The Borrower covenants and agrees to take all lawful measures to establish, prescribe and collect Project Revenues sufficient, after paying all O&M Expenses (including all O&M Expenses not constituting Permitted O&M Expenses and all Ground Rent, First Additional Rent, Second Additional Rental, and Third Additional Rent), to achieve, in each DSCR Calculation Period, (i) during the Ramp-up Period, (A) a Total Debt Service Coverage Ratio of 1.25x and (B) a Senior Debt Service Coverage Ratio of 1.30x, and (ii) after the Ramp-Up End Date, (A) a Total Debt Service Coverage Ratio of 1.15x and (B) a Senior Debt Service Coverage Ratio of 1.20x, both on a prospective basis (based on its forecasts prepared by the Borrower, which forecasts shall be based on reasonable assumptions (on the basis of information known to the Borrower on the date of preparation thereof) as to all factual matters material to the estimates therein) and on a retrospective basis (based on its annual audited and quarterly unaudited financial statements most recently required to be delivered), subject to the terms of Section 5.12.

(b) If the Total Debt Service Coverage Ratio or the Senior Debt Service Coverage Ratio does not meet the conditions outlined in Section 10.25(a) for an upcoming fiscal year, then the Borrower shall request a third-party to recommend revisions to its Annual Operating Budget and, after taking into account such recommendations, shall revise its Annual Operating Budget to produce (to the extent practicable using prudent business judgment) sufficient revenues to satisfy such Total Debt Service Coverage Ratio or Senior Debt Service Coverage Ratio requirement.

(c) If the Borrower revises its Annual Operating Budget pursuant to Section 10.25(b), then failure to satisfy the conditions set forth in Section 10.25(a) shall not be deemed an Event of Default under the TDC Loan Agreements, the Credit Agreements, or the other Financing Documents.

The Ramp-up Period is defined as the timeframe beginning at substantial completion of Phase 2 and continuing until the Ramp-Up Debt Service Coverage Ratio has been equal to or above 1.40:1.00 for eight consecutive quarterly calculation dates. .

The projected Debt Service on the outstanding and future debt is shown in the **Table 5-10**:

**The Senior Debt Service Coverage Ratios (DSCRs) for the anticipated Senior Obligations, including the Series 2024 Bonds and the Series 2028 Bonds, are projected to meet the minimum requirements of 1.30x through the Ramp-up Period (projected to be FY 2028 to FY 2031) and 1.20x through the remainder of the Projection Period. In addition, the Total DSCR requirements are projected to be satisfied. The minimum DSCR is projected to be approximately 1.53x within the Projection Period and approximately 1.51x during the remaining lease period, assuming the ASM baseline activity forecast.**

## NOTE:

1 Includes operating expense for Terminal 7 (\$48.8 million in FY 2024 and \$44.1 million in FY 2025)

SOURCE: JFK Millennium Partners, LLC, October 2024.

## 5.10 LOW ASM TERMINAL 6 PASSENGER FORECAST SCENARIO

Additional analysis was performed to assess the results of the low activity scenario from the AMS forecast, as presented in Chapter 4. Underlying assumptions of the financial analysis remained consistent with the baseline financial analysis, with the exception of activity-driven revenue or expense calculations, which were adjusted to reflect the lower activity.

For the low activity scenario, as shown in Table 5-10, the Senior DSCRs for the anticipated Senior Obligations, including the Series 2024 Bonds and the Series 2028 Bonds, are projected to meet the minimum requirements of 1.30x through the Ramp-up Period (projected to be FY 2028 to FY 2031) and 1.20x through the remainder of the Projection Period. The minimum DSCR is projected to be approximately 1.28x within the Projection Period and through the remaining lease period.

## 5.11 SUPPLEMENTAL LONG-TERM FINANCIAL PROJECTIONS

For the purposes of this Report, the Projection Period is FY 2024 through FY 2032. However, JMP has contemplated financial projections through the term of the Lease Agreement between JMP and the Port Authority, which extends through FY 2060. Ricondo conducted minimal analysis to determine the validity of the financial projections beyond FY 2032. Tables in **Appendix A** of this Report present total projected Project Revenues and projected expenditures in 2040, 2050, and 2060. In each year, JMP projects Project Revenues to be sufficient to cover projected expenditures and debt service requirements. The projection methodologies used in the long-term calculations are consistent with the methodologies described for the Projection Period and are subject to risks identified in **Chapters 4** and **5**.

## 5.12 ASSUMPTIONS FOR FINANCIAL PROJECTIONS

The techniques and methodologies used in preparing this financial analysis are consistent with industry practices for similar studies in connection with airport revenue bond sales. While Ricondo believes the approach and assumptions used are reasonable, some assumptions regarding future trends and events presented in this Report, including the implementation schedule and forecasts of enplaned passengers, may not materialize. Achievement of the projections and forecasts presented in this Report, therefore, is dependent upon the occurrence of future events, which cannot be assured, and the variations may be material.

**LETTER OF THE AIRPORT CONSULTANT**

**(THIS PAGE INTENTIONALLY LEFT BLANK)**

October 23, 2024

Mr. Steve Thody, CEO  
JFK Millennium Partners, LLC  
295 Madison Avenue, Suite 1125  
New York, NY 10017

RE: New York Transportation Development Corporation  
Special Facilities Revenue Bonds,  
Senior Series 2024A and 2024B (JFK Airport Terminal 6 Redevelopment Project)

Dear Mr. Thody:

Ricondo & Associates, Inc. (Ricondo) prepared the October 10, 2024, Report of the Airport Consultant (Report) in conjunction with the offering of the New York Transportation Development Corporation Special Facilities Revenue Bonds, Senior Series 2024A and 2024B (JFK Airport Terminal 6 Redevelopment Project) (collectively the Series 2024 Bonds), pursuant to a contractual engagement with JFK Millennium Partners, LLC (JMP).

This letter serves to reaffirm the findings of the Report with consideration of the pricing information that has been agreed with respect to the actual issuance of the Series 2024 Bonds. This letter and Report are for inclusion in the Official Statement for the Series 2024 Bonds.

The Report was included in Appendix B-1 of the Preliminary Official Statement for the Series 2024 Bonds dated October 11, 2024. Certain assumptions were made for the purposes of the financial analysis within the Report related to the Series 2024 Bonds and other financing and funding sources for the Terminal 6 Redevelopment Project (defined within the Report). The results of the financial analysis and underlying assumptions are described within the Report.

Subsequent to the issuance of the Report, the pricing information with respect to the Series 2024 Bonds has been agreed, including the aggregate principal amount, principal amount per maturity, and interest rates of the Series 2024 Bonds. The agreed pricing information reflects an increase in Series 2024 Bond proceeds and a reduction of the construction Loan Facility proceeds as funding sources for the Terminal 6 Redevelopment as compared to those reflected in the Report. The project construction costs remain unchanged. **Table 1** shows the updated sources and uses of funds for the Terminal 6 Redevelopment based on final pricing information as compared to those assumed in the Report.

**TABLE 1**      **UPDATED TERMINAL 6 REDEVELOPMENT ESTIMATED SOURCES AND USES OF FUNDS**

SOURCES OF FUNDS	MILLIONS \$		USES OF FUNDS	MILLIONS \$	
	REPORT	UPDATED		REPORT	UPDATED
Series 2024 Bond Proceeds	\$1,578.1	\$2,029.8	Construction Costs	\$2,790.7	\$2,790.7
Construction Loan Facility Proceeds	\$1,965.3	\$1,499.6	Prepayment of 3rd Additional Rent	\$33.0	\$33.0
Construction Cash Account Withdrawal	\$84.3	\$83.4	Port Authority Oversight Costs	\$40.0	\$40.0
Interest Income from Reserves	\$19.0	\$19.0	Development Costs	\$220.7	\$220.7

## Updated Financial Analysis

JMP provided Ricondo with updated financial projections that incorporate the final pricing information for the Series 2024 Bonds as presented by the sources and uses of funds shown in Table 1. **Table 2** shows an updated version of projected cash flows and Senior Debt Service Coverage Ratios through the Projection Period for the baseline activity scenario described in the Report. This table is directly comparable to Tables S-8 and 5-9 of the Report. A comparison of the Project Revenues and Senior Debt Service Coverage between the Report and the updated analysis reflecting final pricing information is shown in **Table 3**.

The Report describes underlying assumptions and methodologies that remain unchanged for the purposes of the updated analysis. For example, the following material assumptions were made for the purposes of the financial analysis included in this letter relative to the financial analysis in the Report:

- no changes to air traffic activity forecast and revenues,
- no changes to non-airline revenues,
- no changes to projected operating expenses,
- no changes to the capital program construction costs,
- updated the annual debt service for the Series 2024 Bonds to reflect the actual debt service, and
- updated other funding sources and associated revenues and expenses such as interest earnings and fund deposits to reflect the final pricing information.

**TABLE 2** UPDATED PROJECTED CASH FLOW AND SENIOR DEBT SERVICE COVERAGE RATIO (DOLLARS IN MILLIONS) – BASELINE SCENARIO

Based on these assumptions, there is no material change to the projection of the Senior Debt Service Coverage Ratio and Ricondo reaffirms the findings described in the Report.

## Confirmation of the Report Findings

**On the basis of the analysis set forth in the Report and updated in this letter, Ricondo is of the opinion that the Project Revenues generated in each year of the Projection Period are expected to be sufficient to comply with the rate covenant established in the Collateral Agency and Accounts Agreement (as amended and supplemented, the CAAA) and the rate covenant in the Common Terms Agreement (CTA) while the existing Loan Facility is outstanding. Although summary information is provided within this letter, a complete understanding of the analysis, assumptions, opinions, and justification for our conclusion cannot be attained without reading the Report in its entirety.**

Ricondo is not registered as a municipal advisor under Section 15B of the Securities Exchange Act of 1934. Ricondo is not acting as a municipal advisor and has not been engaged by JMP to provide advice with respect to the structure, timing, terms, or other similar matters concerning the issuance of municipal securities. The assumptions regarding such matters included in the Report and this letter were provided by JMP or JMP's technical advisors, or were derived from general, publicly available data approved by JMP. Ricondo owes no fiduciary duty to JMP. Any opinions, assumptions, views, or information contained herein are not intended to be, and do not constitute, "advice" within the meaning of Section 15B of the Securities Exchange Act of 1934.

The techniques and methodologies used by Ricondo in preparing the Report and this letter are consistent with industry practices for similar studies in connection with airport revenue bond sales. While Ricondo believes that the approach and assumptions are reasonable, some assumptions regarding future trends and events discussed in the Report, including the implementation schedule, forecasts of passenger activity, and the projections of financial performance, may not materialize. Therefore, actual performance will likely differ from the forecasts and projections set forth in the Report and the variations may be material. In developing our analyses, Ricondo used information from various sources, including JMP, JMP's technical advisors, federal and local governmental agencies, and independent private providers of economic and aviation industry data, as identified in the notes accompanying the related tables and exhibits in the Report. Ricondo believes these sources to be reliable but has not audited the data and does not warrant their accuracy. The analyses presented are based on conditions known as of the date of this letter. Ricondo has no obligation to update this Report on an ongoing basis.

Sincerely,

RICONDO & ASSOCIATES, INC.

## Introduction

This report provides the results of an ASM passenger forecast for John F. Kennedy International Airport (JFK) and JFK's Terminal 6 from 2024 through 2060 as a key input to JFK Millennium Partners, LLC (JMP) for determining the revenue generation of Terminal 6. ASM's approach was to segment the overall forecast period as follows:

- **2024 – 2028:** A highly detailed bottom-up forecast of every route and airline at JFK was prepared. It included consideration of routes that are projected to be added or cancelled based on route performance and other factors. Actual airline schedules through April 2024 were used alongside published schedules for the remainder of 2024.
- **2029 – 2060:** GDP-based econometric forecast for JFK. Terminal 6: Combinations of potential airline occupants provided by JMP using the bottom-up forecast for the years 2024 – 2028 and the GDP-driven growth rate for all of JFK applied to each airline for the years 2029 – 2060.

The New York area's population, economy, demographics, and air transportation marketplace are analyzed to provide context for the forecast results and the outlook for future passenger traffic and capacity at JFK. The Combined Statistical Area (CSA) for New York-Newark, NY-NJ-CT-PA (New York CSA), as defined by the U.S. Census Bureau, is used as the primary measure of population, economic activity, and other statistics for the New York region. The region is served by six commercial airports. The major airports are JFK, LaGuardia (LGA), and Newark Liberty (EWR). The region is also served by three smaller secondary airports: Long Island MacArthur (ISP), Westchester County (HPN), and New York Stewart (SWF).

This report relies primarily on U.S. Department of Transportation T100 data for the analysis of passenger traffic as reflected in passenger enplanements. Data measuring the number of passengers travelling between their true origin and destination (regardless of itinerary and known as "O&D traffic") is sourced from Sabre Market Intelligence. The most recent and forward-looking airline schedules and capacity (through March 2025) are used throughout the report as available. Airline schedules and capacity change frequently, so the data in this report is only accurate as of the day it is accessed.

Airports are identified in this report by their three-letter International Air Transport Association (IATA) airport codes, as listed in Appendix A.

## Executive Summary

JFK Millenium Partners, LLC (JMP), a consortium established by Vantage Group, American Triple I, RXR Realty, and JetBlue Airways, was selected by the Port Authority of New York and New Jersey to finance, build, and operate JFK’s Terminal 6 from 2024 through 2060. An approximately 1.2 million square-foot terminal is being developed at the cost of approximately \$5 billion, with the first phase set to open in 2026 and project completion expected in 2028.

This report provides the results of a passenger traffic forecast for JFK airport and Terminal 6 through 2060, along with the context for the growth projected during the forecast period.

### JFK Airport

JFK is the largest airport in the New York metropolitan area (defined by its Combined Statistical Area, or CSA<sup>1</sup>), and it generated 30.7 million passengers in 2023. JFK plays a key role in both the U.S. and world air transportation markets. In 2023, it was ranked the sixth-busiest U.S. airport and the 13<sup>th</sup>-busiest airport in the world.<sup>2</sup> JFK is also the leading international airport in the U.S., attracting 16.3 million international passengers in 2023, or 13.9% of all international passenger enplanements in the U.S. In 2023, JFK generated approximately 51% more international enplaned passengers than the second largest U.S. international gateway at MIA.<sup>3</sup> JFK is one of six airports situated in the New York CSA, which also includes EWR, LGA, HPN, ISP, and SWF. In 2023, JFK had a 41.8% share of New York CSA passenger traffic.

### New York CSA

New York is the largest of all the U.S. CSAs, with 21.9 million residents in 2023. Three decades of population growth ended with a decline in the New York CSA during the COVID-19 pandemic. From the start of the COVID-19 pandemic through 2023, 573,000 residents left the area as a result of the rise in remote working and the relocation of companies incentivized by states in the South and Southwest. However, the out-migration trend has slowed, and the New York CSA is predicted to reach 23 million people by 2030. The region has maintained its position as the largest U.S. CSA, and that is likely to continue as the New York CSA resumes growth trajectory similar to before the COVID-19 pandemic.

The New York CSA also has the largest economy of all U.S. CSAs, with a GDP of more than \$2.2 trillion in 2023. Its economy is diverse: It is a leading finance hub, a major manufacturing center, a thriving technological sector, and a key location for global arts and culture activities. Unemployment has now fallen to 4.4% after peaking near the start of the COVID-19 pandemic in early 2020 peak of 10.2% — still above the 30-year record low of 3.6% in 2019 but making continued progress as economic conditions improve. Growth in the labor market will be supported

---

<sup>1</sup> As defined by the U.S. Census Bureau

<sup>2</sup> Source: U.S. DoT T100 for enplaned passenger, and U.S. DoT O&D Survey for origin-destination passengers (Jan-Dec)

<sup>3</sup> Source: U.S. DoT T-100 via Airline Data Inc.

by the continued recovery of New York’s tourism industry, which reached 93% of 2019 levels in 2023 and is anticipated to continue to improve and surpass pre-pandemic levels in 2025, when 68 million visitors are forecasted.

- A resilient economy with employment levels returning to pre-pandemic levels, rising wages and high per capita incomes.
- The most important CSA economically, with a GDP of more than \$2 trillion in 2023.
- The largest population of all the U.S. CSAs, with 21.3 million residents in 2023.
- The biggest U.S. CSA aviation market — 73.3 million passenger enplanements in 2023.
- An important business center with diverse sector opportunities and major employers.
- A leading global tourism market — a record 68 million visitors are predicted to arrive in 2025.

## JFK Recovery

In 2023, JFK served 30.7 million passengers, reaching 98% of 2019 traffic levels and 13.3% above 2022. JFK’s 2024 scheduled capacity is 3% above 2019. JFK has not yet fully recovered to pre-pandemic levels as a higher proportion of its passengers are international, and that traffic has recovered more slowly than domestic traffic because of border restrictions, testing requirements, and geopolitical issues. The return of strong demand for international travel has bolstered traffic, and JFK’s total international capacity is projected to be 2.8% higher in 2024 than in 2019.

U.S.-based airlines have led JFK’s post-pandemic recovery thanks to the early relaxation of domestic travel restrictions. JFK’s domestic capacity fully recovered to pre-pandemic levels in 2023, with total domestic seat capacity 2.0% higher than in 2019. Fewer domestic seats will be available in 2024, however, primarily because of a capacity reduction by JetBlue, but also an ongoing waiver of FAA slot utilization regulations.

The number of airlines serving JFK has now exceeded pre-pandemic levels — there are 73 airlines operating in June 2024 compared to 71 in June 2019. JFK continues to benefit from having a diverse airline mix without a dominant carrier or airline alliance group. The range of international and domestic airlines, both alliance members and unaligned, offers extensive connectivity, which protects JFK’s traffic base from major disruptions caused by a single carrier’s exit or termination. JFK serves as a primary hub for Delta Air Lines and is a large focus city for American Airlines and JetBlue. Delta and JetBlue had a combined share of 55.8% of enplanements in 2023, with all U.S. carriers having a 70.8% enplanement share, which is comparatively smaller than at other U.S. hubs.

New entrant airlines have been quick to replace those that leave JFK because of commercial or other reasons. For example, during the COVID-19 pandemic, Air Italy and Interjet withdrew from the Italian and Mexican markets because of bankruptcy; however, ITA Airways and Viva Aerobus replaced them. When Norwegian Air Shuttle stopped flying its low-cost long-haul operation, Norse Atlantic launched JFK service in its place.

JFK continues to be attractive to airlines because it gives them the ability to charge the profitable airfares that play a significant role in route revenue generation. Its average base fare of \$373 in 2023 was 45% higher than the average base fare across the 10 busiest U.S. airports.<sup>4</sup> JFK’s airfares are consistently high, and in 2023, fare revenues were up by 23% against 2022 and 12% against 2019, even though passengers were down by 2%.

JFK has a solid base for future traffic growth due to the positive outlook for economic and population growth in the New York CSA, popularity of the region for business and tourism, and importance of JFK as a gateway to the region.

## Passenger Forecasts

A passenger forecast for JFK was conducted for the period 2024 through to 2060 with the results summarized in Figure 1.

- A bottom-up or near-term forecast was completed for the period from 2024 to 2028. JFK’s total passengers grow from 62.4 million before the forecast period in 2023 to 71.2 million passengers in 2028.
- An econometric or long-term forecast covering the years from 2029 to 2060 results in JFK’s total passengers reaching 114.6 million passengers in 2060.

The ASM forecasts are unconstrained, meaning no limitations on passenger traffic or aircraft movements have been included. Route performance was considered, with strong routes receiving additional capacity while capacity was reduced or withdrawn from poor-performing routes. JFK’s slot limitations have been indirectly considered through the use of larger aircraft (upgauging) and/or higher load factors to enable passenger traffic growth. Fleet changes in terms of aircraft retirements and order deliveries have also been accounted for.

---

Figure 1: JFK Airport Forecast Results Summary<sup>5</sup>

	Actual			Forecast						
	2019	2023	2025	2030	2035	2040	2045	2050	2055	2060
JFK Total Passengers (millions)	62.6	62.4	65.6	74.1	81.0	88.0	95.0	101.9	108.4	114.6

The bottom-up forecast details JFK passenger traffic on a route-by-route, carrier-by-carrier basis, resulting in 71.2 million passengers in 2028 for a CAGR of 2.7% from 2023 to 2028. The bottom-up forecast uses 2024 as a base year and applies an anticipated average annual load factor to JFK’s published capacity and flying program for 2024, resulting in a base year projection of 63.5 million JFK passengers, which is 1.7% higher than the 2023 enplanements. Figure 2 summarizes the bottom-up forecast results.

<sup>5</sup> Source: ASM Forecast

Figure 2: Bottom-Up Forecast Results

The long-term forecast results in 114.6 million passengers in 2060 for a CAGR of 1.7% for the period between 2023 and 2060. Table 1 summarizes the long-term passenger forecast results.

Despite the unconstrained nature of the long-term forecast, the CAGR of JFK’s passenger traffic between 2019 and 2060 is 1.5%, which is well below the historical rate of 3.5% for the period 1991 to 2019 and includes the impact of past events such as the 9/11 attacks and the 2007 – 2008 Global Financial Crisis. The lower future growth rate is primarily driven by a period of strong growth in the 2000s when both JetBlue and Delta increased their JFK presence and lower-than-historical GDP growth rate projections.

Table 1: Long-Term Forecast Results Summary (000s)

	2023	2024	2030	2040	2050	2060
Domestic	29,095	28,246	32,154	36,530	40,409	43,455
International	33,337	35,224	41,922	51,499	61,449	71,121
<b>Total</b>	<b>62,432</b>	<b>63,471</b>	<b>74,075</b>	<b>88,029</b>	<b>101,858</b>	<b>114,576</b>

The long-term forecast has been produced using regression analysis aligning passenger growth trends to the historical correlation of GDP growth in the U.S. against passenger traffic from 2000 through 2019, 2022, and 2023, as well as the expected outturn from the bottom-up forecast covering the period 2024 to 2028.

While the unconstrained forecast does not take into account specific measures airlines will use to fulfill the growth in demand, airlines have several ways to achieve passenger growth within the existing slot control regime:

- Use of larger aircraft
- Higher load factors
- Increasing utilization of existing slots
- More departures outside of slot-controlled hours

A forecast of passenger traffic in **Terminal 6** was completed based on a list of airlines provided by JMP. The baseline airline combination forecast projects passenger enplanements to reach 6.4 million by 2060. The bottom-up forecast for the airlines was used to determine their traffic through to 2028. For the period 2029 through 2060, the econometric growth rate for JFK airport was applied to each airline. The exception was JetBlue, which was forecasted using one gate’s worth of utilization and a projection of average aircraft size and load factor growth through the forecast period.

Additional combinations of airlines provided by JMP were forecasted to analyze the sensitivity of potential airline combinations resulting in more (high case) or fewer (low case) passenger enplanements in Terminal 6. The results of all three airline combination forecasts are summarized in Table 2 and Figure 3.

**Table 2: Terminal 6 Enplaned Passenger Forecast (000s)**

	2025	2030	2035	2040	2045	2050	2055	2060	2025-2060 CAGR
Low Case	3,651	3,998	4,347	4,700	5,051	5,395	5,725	6,036	1.4%
Baseline	3,970	4,231	4,601	4,976	5,349	5,715	6,065	6,395	1.4%
High Case	3,820	4,334	4,714	5,098	5,481	5,856	6,215	6,554	1.6%

In 2060, Terminal 6 would operate below its peak operating capacity of 8.5 million passengers, as shown in Figure 3.

Figure 3: Terminal 6 Enplaned Passenger Forecast

## JFK Terminal 6 Project

JMP, a consortium established by JetBlue Airways and affiliates of Vantage Group, RXR Realty, and American Triple I, is financing, designing, constructing, operating, and managing the new Terminal 6 at JFK.

JFK is owned by the City of New York and operated by the Port Authority of New York and New Jersey (Port Authority) under a lease with the City of New York that expires in 2060.

The facility will include a central headhouse on the former Terminal 6 site and existing Terminal 7 site. The new Terminal 6 will include an approximately 1.2 million square-foot terminal with 10 gates, passenger processing, TSA security screening facilities, and a U.S. Customs and Border Protection Federal Inspection Service (FIS) facility for international arrivals.

The terminal will have 10 new gates, including 9 capable of handling international widebody aircraft. In addition to a seamless Terminal 5 connection, the new Terminal 6 will also have access to two JFK AirTrain stops to facilitate connectivity with other JFK terminals, other JFK airport services, and the New York public transit system.

Key milestone dates for the Terminal 6 project include:

- **August 2021:** Port Authority Board of Directors approves the key terms to a lease through 2060 with JMP.
- **November 2022:** JMP achieves financial close and announces Lufthansa Group will relocate to Terminal 6 from Terminal 1.
- **February 2023:** Formal ground-breaking ceremony with New York Governor Kathy Hochul
- **1<sup>st</sup> Quarter 2026:** Phase one is anticipated to be completed with the opening of five gates.
- **1<sup>st</sup> Quarter 2028:** Phase two is anticipated to be completed with the opening of five additional gates.

Figure 4: New Terminal 6 at JFK

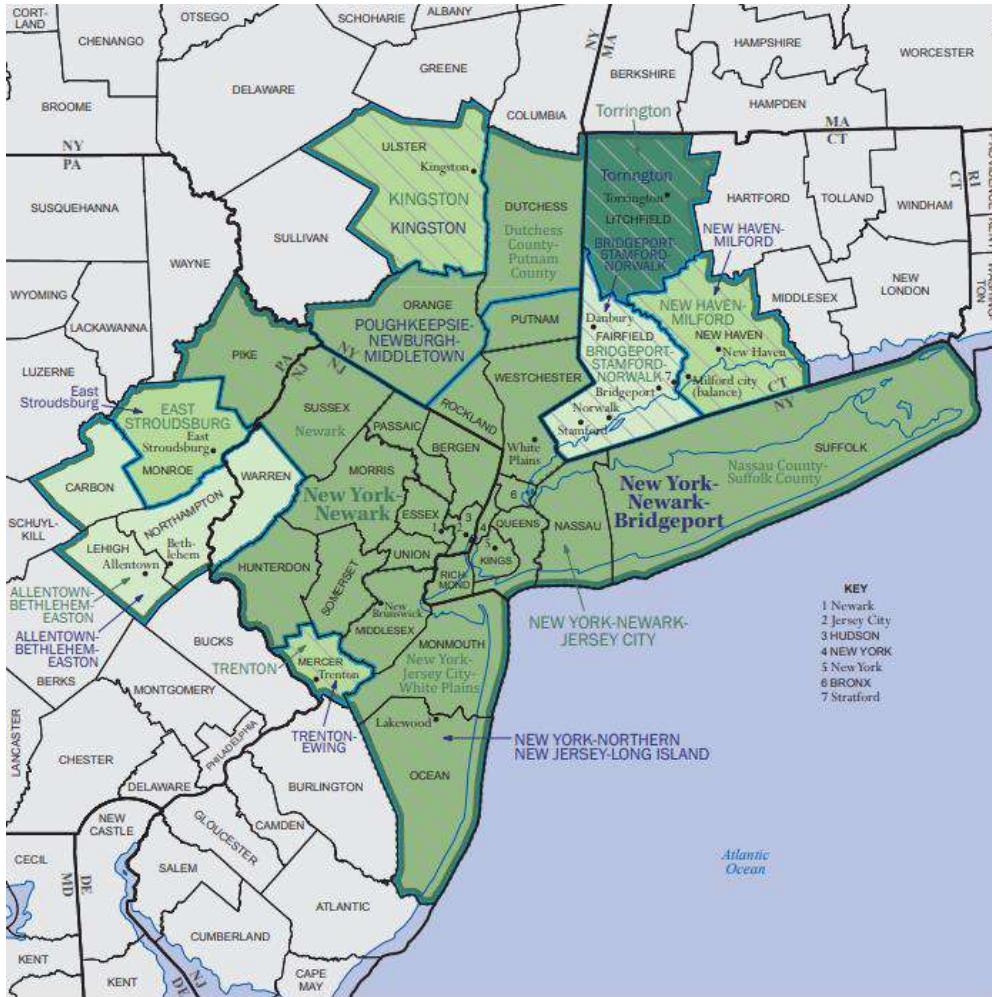

## New York and Role of JFK

Key Takeaways	
1	The New York CSA has the largest population of any region in the U.S. with 21.9 million people
2	The New York CSA has the most air travel volume of any CSA in the U.S., generating 73.3 million passenger enplanements in 2023, a 2.2% increase over 2019.
3	JFK has the most enplanements among the New York CSA airports with 30.7 million passenger enplanements in 2023. It is 25% and 90% more than EWR and LGA respectively, the next busiest New York CSA airports.
4	JFK's location means 51% of the New York CSA population is within its primary catchment area. The scale and scope of flights offered at JFK also make it attractive to the rest of the New York CSA population.
5	New York is a global tourism and business destination, which along with its large population base and natural geographical gateway to North and South America from Europe, fuels air service growth in the New York region. JFK remained the country's largest international gateway in 2023.

### New York Region

The New York region is the largest urban area in the U.S. in terms of population and one of the most economically important metropolitan areas in North America and globally. Figure 5 shows a map of the New York CSA.

Figure 5: New York CSA

The New York CSA has by far the largest population in the U.S. with 21.9 million people, based on 2023 U.S. Census Bureau estimates. It has 19% more people than the second-largest CSA in Los Angeles and 117% more than the third largest in the Washington, D.C. – Baltimore area. Figure 6 shows the 2023 estimated population for the 10 most populated U.S. CSAs.

Figure 6: 2023 10 Largest CSAs by Population<sup>6</sup>

Region	CSA Definition – Geographic Area
New York CSA	New York-Newark, NY-NJ-CT-PA CSA
Los Angeles CSA	Los Angeles-Long Beach, CA CSA
Washington CSA	Washington-Baltimore-Arlington, DC-MD-VA-WV-PA CSA
Chicago CSA	Chicago-Naperville, IL-IN-WI CSA
San Francisco CSA	San Jose-San Francisco-Oakland, CA CSA
Dallas-Fort Worth CSA	Dallas-Fort Worth, TX-OK CSA
Boston CSA	Boston-Worcester-Providence, MA-RI-NH CSA
Houston CSA	Houston-Pasadena, TX CSA
Philadelphia CSA	Philadelphia-Reading-Camden, PA-NJ-DE-MD CSA
Atlanta CSA	Atlanta-Athens-Clarke County-Sandy Springs, GA-AL CSA

During the COVID-19 pandemic, the U.S. population grew by 1% to 334.9 million (April 2020 to July 2023). Larger urban CSAs saw declines in population over this period, while less densely populated CSAs witnessed population growth. The New York CSA’s population declined 2.6%, for example, while Los Angeles and San Francisco declined 1.8% and 2.4% respectively. The population change in the 10 largest U.S. CSAs is shown in Figure 7.

<sup>6</sup> Source: U.S. Census Bureau

Conversely, urban centers located in less-expensive regions with more available land and real estate saw population growth that was higher than the national average. As an example, the Dallas-Fort Worth and Houston CSAs have grown 6.1% and 5.0% respectively since April 2020. Despite the pandemic-related population decline, the New York CSA continues to be significantly larger than other U.S. CSAs, and its population growth is projected to continue through the rest of the decade.

Figure 7: Change in U.S. CSA Population, April 2020 to July 2023<sup>7</sup>

While New York City’s population dipped during the COVID-19 pandemic, longer-term population growth in New York City has been consistent: over the past three decades, the city’s population grew 12.9% for a compound annual growth rate (CAGR) of 0.4%. New York’s continued growth occurred despite its density, high cost of living, and significant external shocks such as the 9/11 attacks and the 2007-2008 Global Financial Crisis. Additionally, United Nations populations predictions forecast that New York City’s population will continue to grow at historical levels or greater to 20.8 million by 2035 from its current 18.9 million. Figure 8 shows the population of New York City over the past 30 years.

<sup>7</sup> Source: U.S. Census Bureau

Figure 8: New York City Population, 1994-2023<sup>8</sup>

The population outflow has turned to growth over the past 12 months, and the largest number of new New York CSA residents are from the following regions:<sup>9</sup>

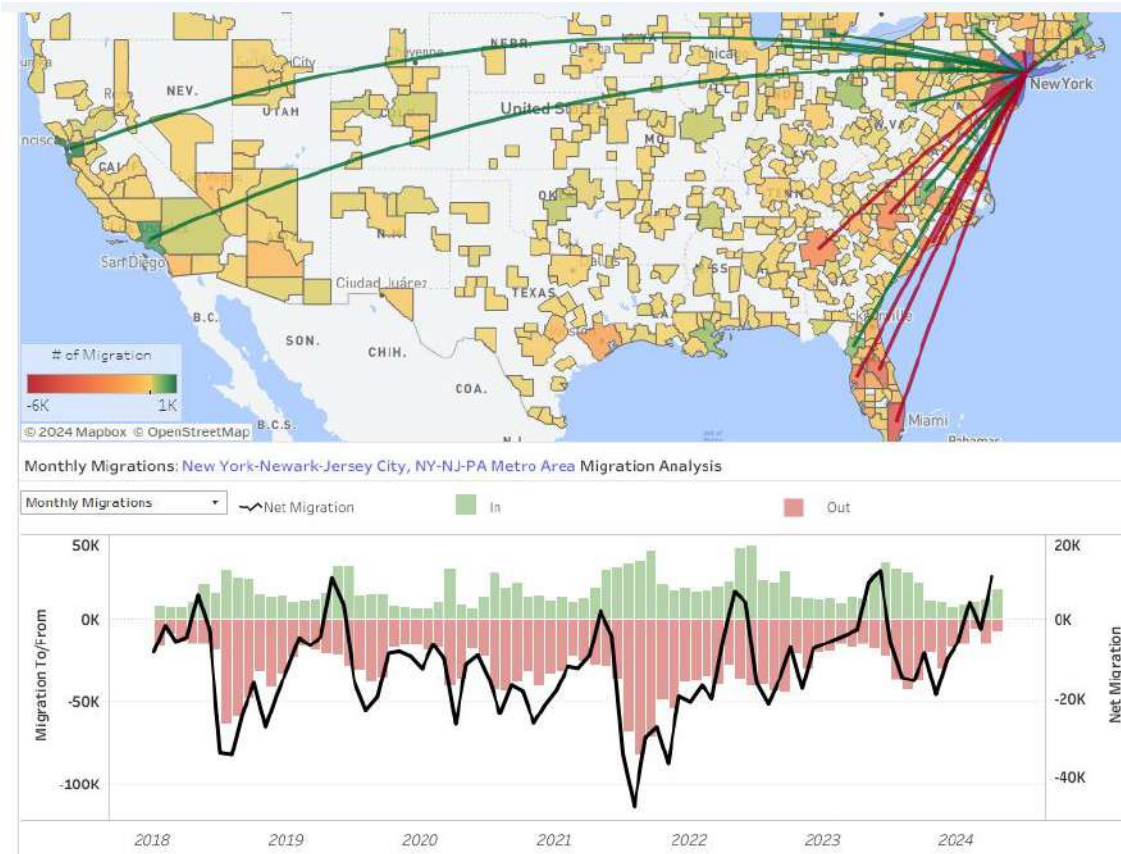

1. State College, PA
2. San Francisco-Oakland-Berkeley, CA
3. Ann Arbor, MI
4. Los Angeles-Long Beach-Anaheim, CA
5. Durham-Chapel Hill, NC
6. Boston-Cambridge-Newton, MA-NH
7. Ithaca, NY
8. Gainesville, FL
9. South Bend-Mishawaka, IN-MI
10. Morgantown, WV

Figure 9 shows the flow of outmigration and immigration in the New York CSA between 2018 and 2024.

Figure 9: New York CSA Net Migrations<sup>10</sup>

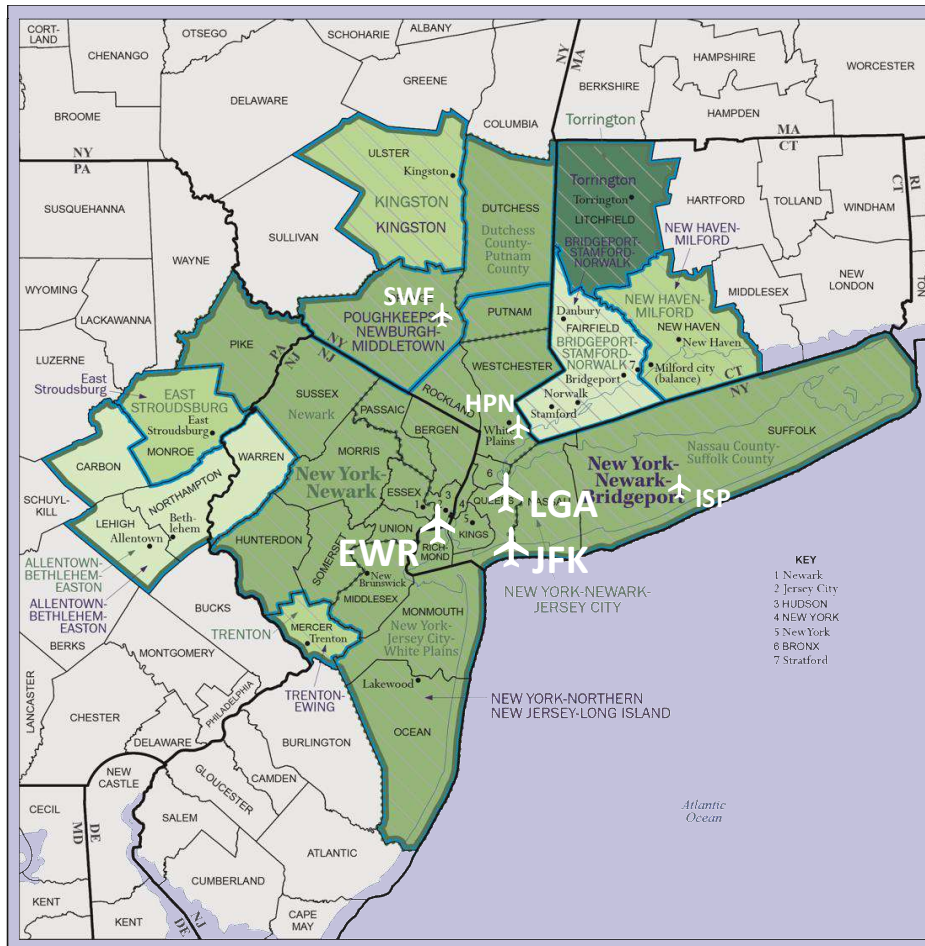

## New York CSA Airports

The New York CSA represents the primary and secondary catchment areas for the region’s three major airports (JFK, LGA, and EWR) and three smaller secondary airports (ISP, HPN, and SWF). The six commercial airports located in the New York CSA are shown in Figure 10.

The location and size of the major airports are driven by the population density of the areas surrounding the airports and their proximity to major Manhattan businesses and tourism attractions, along with suburban areas surrounding New York City.

<sup>10</sup> Source: Placer.ai 2023 Migration Report as of 14th June 2023

Figure 10: New York CSA with Largest Commercial Airports<sup>11</sup>

Besides having the largest population base in the U.S., the New York CSA is also the largest air transportation market by passenger volume, as shown in Figure 11. In 2023, passenger enplanements in the New York CSA airports exceeded those for 2019, making it one of five of the 10 largest CSAs to exceed 2019 traffic levels.

<sup>11</sup> Source: CSA Map – U.S. Census Bureau, Airport Location – gcmmap.com

Figure 11: 10 Largest CSA Passenger Enplanements<sup>12</sup>

From 2013 to 2023, New York CSA airport passenger enplanements have grown by a CAGR of 2.5%, despite the impact of the COVID-19 pandemic. In the last decade, the New York CSA air transportation market registered the fourth-highest traffic growth rate among the 10 largest U.S. CSAs, as shown in Figure 12.

The strong growth of the New York CSA airports demonstrates robust travel demand, despite aircraft movements being limited by slot controls at the key New York airports (JFK and LGA). By contrast, no other airport in the 10 largest CSAs, except for DCA, has similar slot restrictions in place.

<sup>12</sup> Source: U.S. Department of Transportation (DoT) T-100 via Airline Data Inc. CSA Airports: New York (JFK, EWR, LGA, ISP, HPN, SWF), Los Angeles (LAX, BUR, ONT, SNA, LGB), Chicago (ORD, MDW), Dallas-Fort Worth (DFW, DAL), San Francisco (SFO, OAK, SJC), Washington (IAD, DCA, BWI), Houston (IAH, HOU), Orlando (MCO, MLB, SFB)

Figure 12: Largest Enplanement Growth Among U.S. CSAs, 2013-2023<sup>13</sup>

## JFK’s Primary Catchment Area

A number of factors drive passengers’ choice of airport, including airport location, accessibility, cost, and usability. The services that airlines offer – such as the breadth of the route network, schedules, and airfares – play a significant role as well. Different customer groups will place different values on the same attributes when choosing an airport. Business travelers will have different needs and priorities than leisure travelers, for example. Airline loyalty programs and other frequent-flyer perks also influence traveler choice.

However, when applicable, airport location is also a meaningful consideration for most passengers. The three primary New York CSA airports (JFK, EWR, and LGA) draw passengers from across the region based on their location. Passengers are more likely to choose an airport closer to their home and with less traffic congestion, particularly if the same level of air service is available at the closer airport. Passengers on either side of Manhattan, for example, are likely to avoid crossing Manhattan, especially during rush hour, and will opt for the most convenient airport.

LGA, while a more convenient airport for many domestic passengers, is limited in its service because of the Port Authority restriction on flights of more than 1,800 miles from Sunday to Friday.

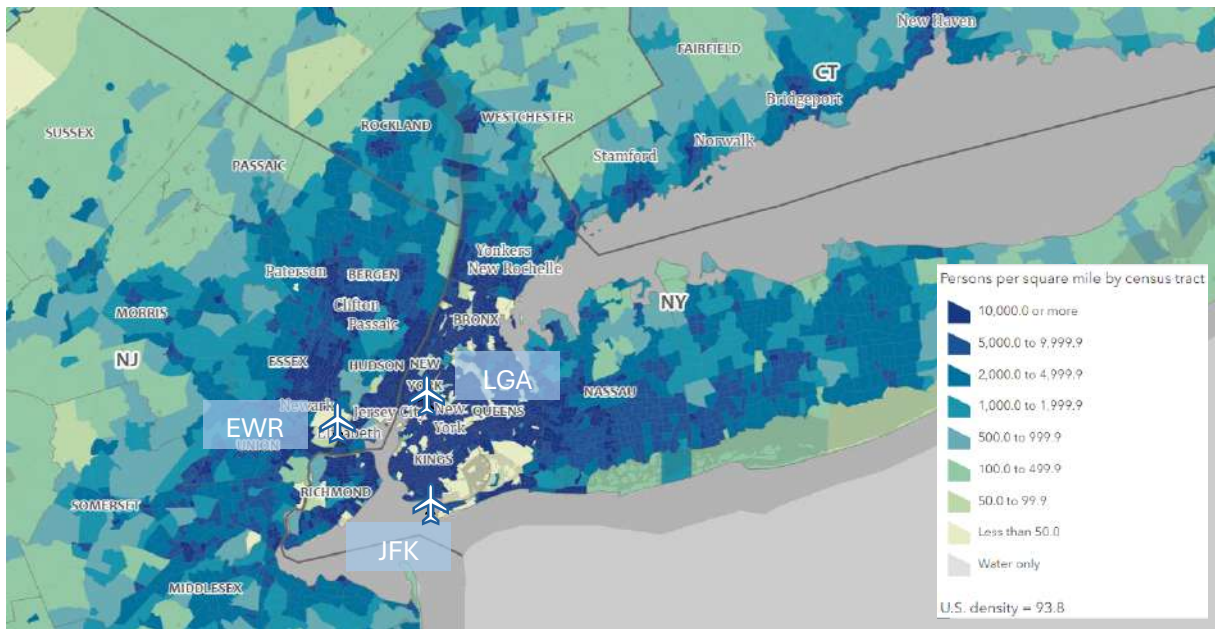

<sup>13</sup> Source: U.S. DoTT-100 via Airline Data Inc. CSA Airports: New York (JFK, EWR, LGA, ISP, HPN, SWF), Los Angeles (LAX, BUR, ONT, SNA, LGB), Chicago (ORD, MDW), Dallas-Fort Worth (DFW, DAL), San Francisco (SFO, OAK, SJC), Washington (IAD, DAC, BWI), Houston (IAH, HOU), Orlando (MCO, MLB, SFB)

Table 3 shows the population distribution across the New York CSA with JFK’s primary and secondary catchment areas, which are defined by proximity to the airport. Figure 13 shows the New York CSA population density relative to the location of the three busiest New York airports.

Table 3: 2023 JFK Catchment Population<sup>14</sup>

JFK Primary Catchment	Population (000s)	% of Catchment	% of New York Area
Kings County (Brooklyn)	2,561	22.9%	11.7%
Queens County	2,252	20.2%	10.3%
New York County (Manhattan)	1,597	14.3%	7.3%
Suffolk County	1,523	13.6%	7.0%
Nassau County	1,382	12.4%	6.3%
Bronx County	1,356	12.2%	6.2%
Richmond County (Staten Island)	491	4.4%	2.2%
<b>Subtotal: JFK Primary Catchment</b>	<b>11,163</b>	<b>100%</b>	<b>51.1%</b>
Surrounding Counties	10,697		48.9%
<b>Total JFK Catchment</b>	<b>21,860</b>		<b>100.0%</b>

Figure 13: New York CSA Population Density<sup>15</sup>

JFK’s primary catchment area has a population of 11.2 million people and on its own would be the second largest CSA in the U.S. behind the Los Angeles CSA, as shown in Figure 14.

<sup>14</sup> Source: U.S. Census Bureau

<sup>15</sup> Source: U.S. Census Bureau 2020 Census Demographic Map

Figure 14: JFK Primary Catchment Area Population<sup>16</sup> vs 10 Largest U.S. CSAs<sup>17</sup>

### Busiest Airport and Primary International Gateway in the New York CSA

JFK was the busiest airport in the New York region in terms of passengers both before the COVID-19 pandemic and in 2023, as shown in Figure 15.

<sup>16</sup> Source: ASM analysis

<sup>17</sup> Source: U.S. Census Bureau

Figure 15: New York CSA Airport Enplanements<sup>18</sup>

The New York airports in aggregate have surpassed pre-pandemic enplanement levels, as shown in Table 4. JFK has not fully recovered to pre-pandemic levels because of international traffic still suppressed by ongoing demand recovery and travel restrictions in some regions.

<sup>18</sup> Source: U.S. DoT T-100 via Airline Data Inc

Table 4: New York CSA Airport Domestic and International Enplanements<sup>19</sup>

Airport	2019 Enplanements (millions)			New York CSA Share		
	Domestic	International	Total	Domestic	International	Total
JFK	14.2	17.0	31.2	30.5%	67.1%	43.5%
EWR	16.1	7.1	23.2	34.7%	28.1%	32.4%
LGA	14.3	1.1	15.4	30.8%	4.4%	21.5%

ISP	0.6	-	0.6	1.3%	-	0.9%
SWF	0.1	0.1	0.1	0.2%	0.2%	0.2%
<b>Total</b>	<b>48.7</b>	<b>24.6</b>	<b>73.3</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>

Before the COVID-19 pandemic, international traffic represented 54% of JFK’s total passengers compared to 31% in EWR and 7% in LGA<sup>20</sup>. JFK received 67% of the New York region’s international passenger traffic prior to the COVID-19 pandemic. JFK’s share of international traffic did not change significantly in the interim and was 66.5% in 2023. In 2023, international traffic in the New York region was 97% of 2019 and domestic traffic was 104%. Figure 16 shows pre- and post-pandemic domestic and international enplanements from the New York CSA airports.

<sup>19</sup> Source: U.S. DoT T-100 via Airline Data Inc

<sup>20</sup> LGA does not have customs and immigration facilities for international flights. However, flights pre-cleared at their origin can operate at LGA. Most pre-cleared passengers at LGA are coming from Canadian airports.

Figure 16: New York CSA Airport Domestic and International Enplanements<sup>21</sup>

In addition to serving as a gateway to the New York metropolitan area, JFK also serves as a connect point between the domestic U.S., Canada, Latin America, Caribbean, Europe, and other regions. Some of these connections are offered via the major global airline alliances (represented by Delta for SkyTeam and American for Oneworld, for example), with the unaligned JetBlue, or bilateral arrangements between other airlines.

Star Alliance connectivity in the New York area is focused on EWR where United has its hub. However, JFK is also served by several Star Alliance carriers including Lufthansa and Air Canada that also use the airport for connections.

### Role of Other New York CSA Airports

The United hub at EWR offers substantial connectivity from a wide range of North American markets to United’s transatlantic and southbound international network, as well as Star Alliance partner flights.

LGA, the region’s third major airport, is largely a domestic airport with a perimeter distance set by the Port Authority of 1,500 miles between Sunday and Friday. The perimeter rule was designed to keep JFK and EWR as the primary facilities for longer New York-area domestic and international flights.

<sup>21</sup> Source: U.S. DoT T-100 via Airline Data Inc

LGA also does not have a Federal Inspection Station (FIS) for international arrivals, so flights arriving from outside the U.S. must depart from airports with pre-clearance facilities<sup>22</sup>. Currently, the only such facilities within the perimeter are Canadian, although longer-distance flights from pre-cleared airports are possible on Saturdays when the perimeter rule is not in effect.

In addition to the three primary airports, the New York CSA is also served by secondary airports in Islip (ISP), White Plains (HPN), and Newburgh (SWF). Islip primarily serves suburban Long Island communities with service to leisure destinations. White Plains serves Westchester and surrounding counties, although it has flight capacity limitations. New York Stewart airport is approximately 55 miles north of New York City and has seen some service by ultra-low-cost airlines, including some international flights (currently headlined by the Icelandic ultra-low-cost carrier Play).

### JFK Passenger Traffic Share in New York CSA

JFK’s share of the New York CSA’s enplanements has remained in the 40% - 45% range over the past 15 years, following an increase from approximately 35% during the decade before that, as shown in Figure 17.

Figure 17: New York CSA Airports Passenger Enplanement Share<sup>23</sup>

<sup>22</sup> In 2023, pre-cleared flights operated to LGA from Aruba, Bermuda, the Bahamas, and Canada (Montreal and Toronto).

<sup>23</sup> Source: U.S. DoT T-100 via Airline Data Inc. Other airports are ISP, HPN, and SWF.

JFK's increasing share of New York area enplanements in the 2000s was attributable to JetBlue's launch and growth as well as the development of Delta's JFK presence and hub. Not only did both of those airlines grow at JFK in their own right, but their increasing level of capacity also attracted other airlines to the airports for connecting purposes.

All three of New York's major airports have federally regulated limits on the number of aircraft movements, as detailed in the next section. JFK and LGA have specific time-based slots that are granted and controlled under a centrally coordinated slot system. EWR was under similar regulations as JFK and EWR until 2016. The relaxation of restrictions resulted in a small increase in its regional enplanement share that came from both JFK and LGA. Even though the level of regulation at EWR is not as stringent as JFK and LGA, its operating constraints do limit the potential for a large share shift from JFK over the long term.

## Airport Slot Constraints

A slot is the permitted movement of an aircraft to either takeoff or land at an airport. Each flight, therefore, requires a pair of slots to operate. They are used at airports where an operational constraint such as airspace, runway, or terminals creates a limitation on the number of flights.

The Federal Aviation Administration (FAA) regulates slot controls in the United States, with the Port Authority managing the program<sup>24</sup> at the New York area airports. To prevent gridlock, slot controls are used to limit the number of movements at all three major New York airports.

The New York region has some of the busiest airspace and most congested airports in North America. At JFK and LGA, where operational demand exceeds airport capacity, airlines obtain slots for specific 30-minute increments of arrival and departure times for the slot-controlled hours of the day.<sup>25</sup> EWR is less stringently controlled, and airlines have more flexibility to schedule flights with their slots. Airlines can trade or lease slots with each other, but they are not owned assets that can be bought or sold.

Slots are assigned in pairs (for an arrival and departure) by day of week and by the winter and summer seasons.<sup>26</sup> To ensure that the airports are utilized efficiently, airlines are required to use their slots 80% of the time or risk forfeiture. However, during the COVID-19 pandemic, the FAA issued waivers for some usage rules because of widespread low passenger demand and international operating restrictions. More recently, the waivers were extended to relieve additional congestion and delays caused by a shortage of air traffic controllers. The waivers now in effect through October 25, 2025, allow airlines to reduce their slot usage by 10% without the risk of losing the slot. Given the FAA's staffing challenges, and the time required to train and qualify new air traffic

<sup>24</sup> Slots controls are more common at airports outside the United States. Globally, slot policies and procedures follow guidelines set by the International Air Transport Association (IATA). Slots in the U.S. largely follow these guidelines.

<sup>25</sup> JFK's slot-controlled hours are 6:00 am – 10:59 pm every day. At LGA, slot controls are in effect from 6:00 am – 9:59 pm Monday – Friday and 12:00 pm – 9:59 pm on Sunday. LGA slot controls are not in effect on Saturdays. Source: Federal Aviation Administration

<sup>26</sup> Timing of the seasonal airline schedules are determined by the date for daylight savings time change in Europe, which is the last Sunday in March (start of summer season) and the last Sunday in October (start of winter season).

controllers (particularly in the busy and complex airspace in and around New York), the waiver is likely to be extended beyond October 2025.

The importance of the New York market means slots in the area are highly sought after. Airlines consider the strategic and long-term value of operating in a slot-controlled airport, not only for the current economic value of the flights but also for the value to the airline's long-term strategy as there is no guarantee that slots will be available in the future.

The number of slots at JFK and LGA is highly unlikely to grow for the foreseeable future. Increasing the number of slots would require growth in runway and airspace capacity through additional infrastructure or technological improvements that are not currently planned and would require substantial time and investment to implement.

It is also unlikely that the number of New York area slots would decrease in the near-term or short-term, absent a substantial externality such as a major change in safety regulations. Capacity is not expected to decrease at the airport, and taking away slots from incumbent airlines would be a highly politically controversial move. Continued growth at EWR could lead to the return of stricter slot controls like those at JFK and EWR (which were in place at the airport until 2016).

Over the long-term, changes in the number of slots at JFK or the slot regulation are possible as technology, airport infrastructure, aircraft design and operations, demand patterns, and other circumstances evolve. However, the scale and nature of those changes are difficult to forecast from the perspective of the current regulatory, operational, and commercial environment.

## JFK Passenger Traffic

Key Takeaways	
1	JFK generated 30.7 million passenger enplanements in 2023, 81.7% of which O&D passengers while 18.3% were connecting.
2	In 2023, local enplanements were down 6.7% on 2019 but up 14.6% on 2022. Connecting enplanements were up 29.9% on 2019 and increased 7.8% from 2022.
3	JFK remains the busiest international gateway in the U.S. For 2023, the airport had 16.3 million international passenger enplanements, accounting for 53.3% of JFK's total enplanements for the year.
4	International traffic has been slower to recover than domestic. In 2023, international enplanements were 3.9% below 2019 while domestic enplanements were 1.1% above 2019. International traffic improved throughout 2023 and is expected to return to 2019 levels in 2024. International scheduled capacity in 2024 is 7.7% higher than 2023 and 2.8% higher than 2019.
5	Passenger traffic in 2023 recovered to 98% of 2019 levels. In 2023, total JFK enplanements increased by 13.3% over 2022. The current 2024 airline schedules <sup>27</sup> indicate planned seat capacity will be 2.4% higher than 2023 and 0.8% higher than 2019. The growth is backloaded in the year as total Jan – May 2024 capacity is 0.7% below the same period in 2022 and 3.7% below the same period in 2019.

## Passenger Volumes at JFK

As an air transport hub, JFK continues to play a key role globally. For 2023, by total passengers, JFK was ranked the 13<sup>th</sup>-busiest airport in the world (down two places from its 2022 global ranking of 11<sup>th</sup>, but seven places higher than its ranking 20<sup>th</sup> in 2019). For 2023, ahead of JFK were five airports in the U.S. (ATL, DFW, DEN, LAX, ORD), three in Asia (HND, CAN, DEL), three in Europe (LHR, IST, CDG) and one in the Middle East (DXB).<sup>28</sup>

In 2023, while demand continued to recover within the Asia-Pacific region and specifically the reopening of China, only one Chinese airport move ahead of JFK in the global rankings<sup>29</sup>. CAN was ranked 12<sup>th</sup> and is the primary hub for China Southern. The other two primary hubs, PEK and PVG for Air China and China Eastern respectively, also saw growth in 2023 but did not reach the top rankings of global airports. Chinese airport growth is the result of the return of domestic demand

<sup>27</sup> As of 15 May 2024

<sup>28</sup> Source: ACI World

<sup>29</sup> Source: Sabre Market Intelligence

rather than international. In 2024, China’s domestic capacity is up 7% on 2019 while its international capacity is down 29% overall and down 72% to the U.S.<sup>30</sup>

For the last few years, JFK has held a constant position among the busiest airports in the U.S. JFK was ranked the sixth-busiest airport for enplaned passengers in 2019, 2022, and 2023. As shown in Figure 18 for 2023, no other Northeast airport was within the 10 busiest U.S. airports. Looking at the other primary New York airports in 2023, EWR was ranked 12<sup>th</sup> busiest with 24.5 million passengers (+1 from 2022 and the same ranking as 2019). LGA was ranked 19<sup>th</sup> busiest with 16.1 million passengers (same ranking as 2022 and +2 from 2019).

Figure 18: 10 Busiest U.S. Airports by 2023 Enplaned Passengers<sup>31</sup>

As previously reported, the New York CSA has the largest population among U.S. CSAs. JFK draws demand from this surrounding population and, as such, a large portion of its enplaned passengers have journeys that originate or terminate in New York (Origin & Destination, or “O&D” passengers) as opposed to passengers making connections at JFK. In 2023, 82% of JFK’s enplaned passengers were O&D while 18% were connecting. The number and proportion of O&D passengers reflects the large amount demand from the New York CSA, and therefore the region’s strength as a market. The number of connecting passengers reflects the scale and breadth of capacity, although it is also reflective of the airlines’ choice to connect passengers at the airport.

<sup>30</sup> Source: Sabre Market Intelligence (as of 31 May 2024)

<sup>31</sup> Source: Enplaned Passengers - U.S. DoTT-100 via Airline Data Inc, Origin & Destination Passengers - U.S. DoT O&D Survey via Airline Data Inc

By comparison, the average composition across the 10 busiest U.S. airports was 63% O&D and 37% connecting. In 2019, 86% of JFK’s enplaned passengers were O&D (+4pts on 2023), while the average across the busiest airports was 67% O&D (+3pts on 2023). While JFK has a large local traffic base, New York is also a very popular leisure and business destination, so it has a strong inbound flow of traffic as well as outbound. For 2023, JFK ranked third highest among the busiest U.S. airports for O&D passenger market size (behind LAX and MCO).

### Year-on-Year Growth and COVID-19 Pandemic Passenger Traffic Recovery

Looking at year-on-year passenger traffic growth across the 10 busiest CSAs, enplaned passenger volumes increased an average of 12% over 2022, while scheduled capacity for 2024 is up an average of 4% on 2023. Compared to the 10 busiest CSAs, annual growth in enplanements within the New York CSA for 2023 was above average at 3% year-on-year (2022-2023). Using the same benchmark, current schedules data indicates that the annual capacity increase within the New York CSA for 2024 will be slightly below average at 1% from 2023 to 2024, as shown in Figure 19.

Figure 19: Passenger Traffic and Seat Capacity Year-on-Year Growth in 10 Largest U.S. CSAs<sup>32</sup>

<sup>32</sup> Source: Passenger Traffic - U.S. DoT T-100 via Airline Data Inc, Schedules - Airline Data Inc

For 2023, across the 10 busiest CSAs, enplaned passenger volumes recovered to 99% of 2019 levels. Looking at 2024, scheduled capacity for the calendar year is up 3% on 2019. Within the six New York CSA airports, 2023 enplaned passengers and 2024 seat capacity both exceed 2019 volumes. Among the 10 largest CSAs, New York CSA airports enplaned passenger recovery is slightly above average at 2% (2023 vs 2019), while seat recovery is in line with the average at 3% (2024 vs 2019), as shown in Figure 20.

Figure 20: Passenger Traffic and Seat Capacity Recovery in 10 Largest U.S. CSAs<sup>33</sup>

Compared to other airports based within the Northeast<sup>34</sup>, JFK enplaned passengers in 2023 increased 13.3% over 2022, which was slightly above the Northeast regional average of 12.8%. EWR and LGA increased at rates of 13.1% and 12.6% respectively. According to current 2024 schedules, JFK annual seat capacity growth from 2023 to 2024 is projected to be below the Northeast regional average of 4.3%. This is primarily due to JFK, and the other New York CSA airports, having experienced a greater return of capacity to 2019 volumes in 2023 than other airports in the Northeast. For the New York CSA airports, 2023 annual capacity was up 2% on 2019, while the average for the Northeast was -8%.<sup>35</sup> Figure 21 shows the year-on-year enplanement and seat capacity growth at the 10 busiest Northeastern U.S. airports.

<sup>33</sup> Source: Passenger Traffic - U.S. DoT T-100 via Airline Data Inc, Schedules - Airline Data Inc

<sup>34</sup> Northeast U.S. sub region is as defined by Airline Data Inc. Busiest airports include: JFK, EWR, LGA, HPN, ISP, BOS, PHL, PIT, BDL, BUF, PVD, SYR, ALB, ROC, PWM, MDT, BTM, MHT, HVN, ACY, ABE (listed are those with more than 1,000 outbound passengers per day in 2023).

<sup>35</sup> Source: Sabre Market Intelligence

Figure 21: Passenger Traffic and Seat Capacity Year-on-Year Growth at 10 Busiest Northeast U.S. Airports<sup>36</sup>

The New York CSA major airports have recovered at an above average rate compared to other Northeast U.S. airports, as shown in Figure 22. Among the 10 Northeast airports with the most passenger enplanements in 2023, JFK ranked fourth highest in enplaned passenger recovery (2023 vs 2019). Enplaned passenger recovery at JFK was slightly less than seen at EWR and LGA, primarily because of the size of its international market. The proportion of international enplanements at JFK is much higher than any other airport in the Northeast region. In 2023, 53% of JFK enplanements were international, while the average for the Northeast was 24%.

<sup>36</sup> Source: Passenger Traffic - U.S. DoT T-100 via Airline Data Inc, Schedules - Airline Data Inc

Figure 22: Passenger Traffic and Seat Capacity Recovery at 10 Busiest Northeast U.S. Airports<sup>37</sup>

### International U.S. Gateways

For 2023, JFK retained its long-held position as the busiest international gateway of the U.S., as shown in Figure 23. The airport enplaned over 16.3 million international passengers in 2023, which is a 13.9% share of the U.S. total. JFK has been the busiest U.S. international gateway since at least 2000. During that period, its share has ranged from a high of 14.7% in 2016 to a low of 11.9% in 2002.

<sup>37</sup> Source: U.S. DoT T-100 via Airline Data Inc (data period Jan-Dec). Regions as defined by Airline Data Inc.

Figure 23: 10 Busiest U.S. International Gateway Airports<sup>38</sup>

EWB is the sixth busiest international U.S. gateway with 7.2 million enplaned passengers in 2023. Compared to JFK, EWB carried fewer passengers to every major international market except Canada.

As shown in Table 5, JFKs international traffic consists primarily of European bound enplaned passengers (42.8%) and Caribbean (18.4%). Of the 10 busiest international U.S. gateways, JFK served the largest number of enplaned passengers to Africa, Europe, and the Middle East.

<sup>38</sup> Source: U.S. DoT T-100 via Airline Data Inc.

Table 5: Regional Composition of JFK International Enplaned Passenger Traffic Compared to the Average of the 10 Busiest U.S. International Gateways<sup>39</sup>

Region	JFK Average	10 Busiest U.S. Int'l Gateway Average	JFK Variation (pts)
Europe	42.8%	30.9%	11.9
Caribbean	18.4%	11.3%	7.1
Middle East	9.7%	7.1%	2.6
Asia	8.5%	10.4%	-1.9
South America	7.4%	7.5%	-0.1
Mexico	5.3%	14.3%	-8.9
Central America	3.1%	7.2%	-4.0
Africa	2.4%	1.5%	0.9
Canada	2.1%	7.8%	-5.7
Oceania	0.2%	2.0%	-1.8

In 2023, following the return of European demand, JFK’s total international passenger enplanements were up 24.8% vs 2022 and down by 3.9% vs 2019. Among the 10 busiest U.S. international gateways, 41% of ORD’s international enplanements were to Europe – the closest to JFK’s European share of 42.8%. ORD saw a similar rate of recovery to JFK, with international enplanements recovering to 95% of 2019 levels by 2023, which is 0.8 pts lower than JFK. At LAX and SFO, the relatively slow reopening of Asia-Pacific international borders has limited recovery of international enplanements. Out of the 10 busiest U.S. international gateways, LAX has seen the slowest international traffic recovery to pre-pandemic levels, with 2023 international enplanements 14.5% lower than 2019.

<sup>39</sup> Source: U.S. DoT-T-100 via Airline Data Inc. Destinations and regions as defined by Airline Data Inc.

Figure 24: Indexed International Passenger Enplanements at 10 Busiest U.S. International Gateway Airports<sup>40</sup>

## Enplaned Passenger Trends

As shown in Table 6, JFK’s enplanements grew by 37.3% from 2009 to 2019 (+8.5 million enplaned passengers), which is a compound annual growth rate (CAGR) of 3.5% and despite the current limit of 81 aircraft movements per hour having been imposed by the FAA in January 2008. The growth, which occurred with slot controls in place, was primarily due to increases in international traffic rather than domestic. From 2009 to 2019, international enplanements at JFK grew by 58.6%, which as a CAGR of 4.7%. Across the decade between 2009 and 2019, international enplanements accounted for 74% of JFK’s total enplaned passenger growth. The share of JFK’s international enplaned traffic grew 7.3 points during those 10 years to 54.6%. In 2023, international enplanements comprised 53.3% of JFK’s total enplanements, which is a 4.9-point increase from 2022 but down 1.3 points from 2019.

While international enplanements did not fully recover to 2019 levels in 2023, the ongoing recovery was clearly apparent. During the year there were several months where JFK’s international and domestic enplanements exceeded the same month in 2019. In the fourth quarter of 2023, JFK’s total enplanements were 1% above the fourth quarter 2019.

<sup>40</sup> Source: U.S. DoT-T-100 via Airline Data Inc. Destinations as defined by Airline Data Inc.

Table 6: JFK Historical Enplaned Domestic and International Passengers<sup>41</sup>

Year	Enplaned Passengers (000)			Annual Percentage Change

<sup>41</sup> Source: U.S. DoT T-100 via Airline Data Inc

While enplanement volumes oscillated during the COVID-19 pandemic, JFK’s seasonality has remained consistent, as shown in Figure 25. In 2023, annual traffic was distributed such that slightly fewer enplaned passengers flew during the first three quarters and slightly more traveled during the fourth quarter. Even so, the seasonal share of fourth quarter traffic only increased by 0.7 pts between 2019 and 2023.

Figure 25: Distribution of Enplaned JFK Passengers By Quarter<sup>42</sup>

### Capacity Growth and Passenger Enplanements

Historically, passenger enplanements increased at a greater rate than seat capacity, with the average annual growth in total enplanements exceeding capacity growth rate by 1.1 points between 2009 and 2019.

The use of larger aircraft to increase seat capacity, or upgauging, is a common approach that airlines use at operationally constrained airports like JFK. Larger aircraft also have a lower operating cost per seat, which can lead to more efficient route economics. Aircraft manufacturers have been responding to airline calls for larger aircraft with the latest generation of widebody aircraft (e.g. B777 and A350) and narrowbody aircraft (e.g. B737 and A321) being larger than the previous ones.

As mentioned previously, JFK total enplanements from 2009 to 2019 grew at a CAGR of 3.2% (domestic at 1.7% CAGR and international at 3.9% CAGR). Throughout the decade, growth in capacity was primarily driven by airlines’ use of larger aircraft. From 2009 to 2019, total departures grew by only 0.7% at JFK, which was 1.6 pts less than the average annual growth in seat capacity.

<sup>42</sup> Source: U.S. DoT T-100 via Airline Data Inc

From 2009 to 2019, the average seats per movement at JFK increased by 25 seats, or 16.6%, from 152 seats to 177 seats.

During the COVID-19 pandemic (2019 – 2022), JFK seats per movement declined by 4.9%. Starting in 2023, however, departures grew at a slower rate than seat capacity signalling the return of larger aircraft to the airport. From 2023 to 2024, the average seats per movement is projected to increase from 170 seats to 176 seats, an increase of 3.5% and almost back to the 2019 level as shown in Figure 26. The upward trend in average seats per movement is expected to continue over the long term given the capacity constraints returning in some JFK markets (including airports at the other end of the route), airlines looking for additional aircraft efficiencies, and the larger aircraft coming into the market.

Figure 26: JFK Average Scheduled Seats Per Movement<sup>43</sup>

### JFK Passenger Traffic Resilience Following Downturns

Over the past two decades, passenger traffic at the New York CSA airports, and JFK in particular, have demonstrated passenger demand resilience during periods of recovery from major economic downturns and other adverse events. Figure 27 shows the recovery pattern since 2000.

<sup>43</sup> Source: Passenger Traffic - U.S. DoT T-100 via Airline Data Inc, Schedules - Airline Data Inc. 2024 is projected based on schedules published through the end of the year.

Figure 27: JFK Historical Enplaned Passengers<sup>44</sup>

JFK’s enplaned traffic recovered in approximately three years following both the 9/11 attacks and the 2007–2008 Global Financial Crisis. In each case, traffic then resumed a growth trajectory. In 2004, the year that traffic recovered following the 9/11 attacks, passenger enplanements grew beyond pre-crisis levels by 16.0%. After the 2007–2008 Global Financial Crisis in 2011, traffic grew 12% beyond 2006 levels. Both cases show that the New York CSA strongly rebounds during recoveries from economic and other types of downturns. The easing of COVID-19 pandemic measures in 2023<sup>45</sup> helped JFK passenger enplanements reach 98% of 2019 levels. Currently, 2024 passenger enplanements are on pace to exceed those of 2019, following the recovery patterns experienced during the previous crises of the past quarter century.

<sup>44</sup> Source: US DoT T-100 via Airline Data Inc

<sup>45</sup> While U.S. restrictions had mostly been lifted by 2023, some of JFK’s key source markets were still in the process of fully reopening borders. For example, Canada did not lift all restrictions until October 2022 and Japan in April 2023.

## Passenger Traffic Trends

Between 2022 and 2023, The Asia-Pacific region showed the fastest rate of JFK passenger traffic growth at 68%. Seat capacity declined 22% from 2022 to 2023 due to expectations of continued demand weakness and continuation of COVID-19 travel restrictions in the region. However, restrictions eased, resulting in the strong passenger traffic growth seen in 2023. Carriers responded in 2024 with a capacity increase of 14%. All other regions (other than U.S./Canada) are projected to see more seat capacity in 2024 than 2023, as shown in Figure 28. The decrease in the U.S./Canada region is largely due to a reduction in domestic seat capacity by 4%. JetBlue accounts for most of the decline, with more than 760,000 fewer domestic scheduled seats in 2024 than 2023.<sup>46</sup>

Figure 28: JFK O&D Passenger Traffic and Seat Capacity Year-on-Year Growth<sup>47</sup>

For 2023, JFK enplanements to both Latin America and the Caribbean have recovered to 10% and 3% above 2019 levels, as shown in Figure 29 below. The Caribbean is JFK’s second largest international market behind Europe. If capacity is used as an indicator of demand and airline confidence in the market, enplanements could continue to grow into 2024, with capacity continuing to increase.

<sup>46</sup> Schedules as of 15 May via Airline Data Inc.

<sup>47</sup> Source: Sabre Market Intelligence

Figure 29: JFK O&D Passenger Traffic and Seat Recovery by Global Region<sup>48</sup>

### Passenger Connections

The New York CSA provides a strong and stable source of O&D passenger traffic to JFK. A large O&D market is important to airlines, as it can often feed services more reliably than connecting flows. This is because there can be a lot of competition for connecting passengers, with multiple airports providing connections to the same destination.

In 2023, 18.3% of JFK’s passenger enplanements were connecting, which was the third lowest share among the 10 busiest U.S. airports and as shown in Figure 30. Since 2019, JFK has seen a 4-point increase in its connecting market’s share of total enplaned passengers, although other airports saw similar shifts and JFK’s ranking position did not change.

<sup>48</sup> Source: Sabre Market Intelligence

Figure 30: Share of Connecting Passengers at 10 Busiest U.S. Airports<sup>49</sup>

As shown in Table 7, JFK O&D passenger grew at a greater rate than connecting between 2009 and 2019. More recently, however, the trend has reversed. From 2019 to 2023, JFK O&D passengers declined by 6.7%, while connecting passengers increased by 29.9%. Between 2022 and 2023, however, historic patterns of growth began to resume with O&D passengers once again increasing at a greater rate than connecting passengers with O&D traffic up 14.6% and connecting traffic increasing by 7.8%. The growth in JFK’s connecting passengers, despite the reduction in O&D traffic, is likely due to the importance of maintaining as much service to the New York market as was possible through the COVID-19 pandemic. With the local market weakened, airlines flowed connecting passengers through JFK to keep flights as viable as possible. The focus on preserving service to JFK and the New York market through the crisis demonstrates the airport’s and region’s importance to airline networks.

## International Passenger Traffic

As previously mentioned, JFK is the busiest U.S. gateway for international passenger traffic with 16.3 million international enplanements in 2023. As shown in Table 8, Europe was the largest regional destination for JFK international enplanements in 2023, with a 48.2% share. The Caribbean was second with 18.4%. Both Europe and the Caribbean have strong economic ties with JFK – the Caribbean with outbound tourism and a sizeable diaspora in New York, and Europe with inbound and outbound tourism and business traffic. In addition, JFK’s geographic location enables efficient connections to both regions from each other and North American cities.

Table 8: 2023 World Destinations for JFK International Enplanements<sup>51</sup>

Region	2023		Change in Share (pts)	
	Enplanements (000)	% Share	2019-2023	2022-2023
Europe	6,990	42.8%	-2.5	-0.1
Caribbean	3,007	18.4%	1.0	-1.5
Middle East	1,588	9.7%	1.2	-1.1
Asia	1,388	8.5%	-2.4	3.1
South America	1,209	7.4%	1.1	-0.6
Mexico	874	5.3%	0.1	-0.5
Central America	511	3.1%	1.2	-0.3
Africa	391	2.4%	-0.1	-0.2
Canada	348	2.1%	0.6	1.1
Oceania <sup>52</sup>	38	0.2%	-0.2	0.2

From 2019 to 2023, the regions that have seen the most change in their share of JFK’s total international enplanements have been Europe and Asia, with respective decreases of 2.5pts and 2.4pts. The reintroduction of airline capacity from JFK has been slower to these two regions than elsewhere. In Europe, the reduction in market share is connected to geopolitical issues such as the war in Ukraine and the slower return of business travel relative to leisure. Since March 2022, Russian flights have been banned from U.S. airspace. In 2019, Russia accounted for 4% of JFK to Europe enplanements, representing 280,000 passengers. In 2023 there was no discernable Russian traffic. Also, airlines are prohibited from using Russian airspace (at least for North American flights), which negatively impacts some routings to Europe and other regions, while making other flights unworkable from either an operational or commercial perspective. The second greatest decrease in European enplanements came from the UK, although it still accounts for 28% of JFK’s European traffic (same share as 2019), saw a reduction of 153,000 enplanements between 2019 and 2023. One significant cause for the decline is the relatively slow return of business travel.

<sup>51</sup> Source: U.S. DoT T-100 via Airline Data Inc. Regions as defined by Airline Data Inc

<sup>52</sup> Oceania includes Australia, New Zealand, and their Pacific Islands

In Asia, the overall reduction in market share is due to the relatively slow return of enplaned passengers to China. In 2023, excluding China, enplaned passengers between Asia and JFK were up 1.5% vs 2019.

The slow growth to China is likely connected to the delayed reopening of the Chinese border following the COVID-19 pandemic and capacity restrictions imposed by the U.S. and Chinese governments. For 2019 to 2023, JFK to China enplaned passengers were down by 90%. In 2024, capacity remains 80% below 2019 levels. On March 26, 2020, the U.S. Department of Transportation (DoT) banned all scheduled services operated by Chinese airlines in response to a ban on U.S. airlines imposed by the Chinese Aviation Authority (CAAC). While borders are now open, capacity remains limited with a cap on the number of U.S.-China flights. At the end of March 2024, the DoT agreed to raise its cap on U.S.-China flights from 35 weekly roundtrip flights to 50. By comparison, in 2019 there were an average of 45 weekly roundtrip flights to China from JFK alone. As of 2024, there are currently an average of eight weekly flights scheduled (up from four in 2023).<sup>53</sup>

### JFK's Busiest International Markets

In 2023, the 20 busiest international passenger markets from JFK, ranked by O&D passengers, accounted for 52% of the airport's international total, which is down 3pts from 2022 but a similar share to 2019. The 20 international routes with the most O&D traffic at JFK are shown in Table 9.

<b>Total</b>		<b>14,357</b>	<b>100%</b>				<b>241</b>	

In general, business travel has seen a slower return to 2019 levels than leisure, a trend that is reflected in the markets on the list of JFK's busiest international destinations. From 2019 to 2023, leisure destinations have seen the greatest rates of growth, with the largest percentage increase in enplanements in Punta Cana (+49%), Montego Bay (+27%), and Cancún (+12%), as shown in Figure 31.

<sup>54</sup> Source: Departing Passengers - U.S. DoT O&D Survey via Airline Data, Schedules - Airline Data Inc

Looking at 2024, capacity has increased significantly to Rome, Hong Kong, and Istanbul. Both Hong Kong and Istanbul are major hubs, although tourism in Hong Kong (globally and not just from JFK) has declined considerably over the past few years while Istanbul’s tourism has grown. Among the busiest 20 international markets, capacity to hub airports is projected to increase 7% over 2023 while capacity to non-hub airports is expected to grow by 3%.

Figure 31: Growth in Seats and O&D Passengers to JFK's Busiest International Destinations<sup>55</sup>

In 2023, international O&D passengers increased 23.8% over 2022 and had recovered to 92% of 2019 levels. International capacity is projected to recover to 2019 levels in 2024 with annual seats expected to be 2.8% higher than 2019 and 7.7% above 2023, as shown in Figure 32.

<sup>55</sup> Source: Departing Passengers - U.S. DoT O&D Survey via Airline Data, Schedules - Airline Data Inc

Figure 32: JFK International Seats and O&D Passengers

### Domestic Passenger Traffic

In 2023, there were 14.3 million domestic enplanements at JFK, which was 46.7% of JFK’s total enplanements. Domestic enplanements in 2023 increased 2.5% over 2022 and were 1.1% above 2019, as shown in Table 10 and Figure 33. In 2023, the 20 busiest domestic O&D passenger markets accounted for 75.2% of the airport’s total annual domestic O&D passengers, which is 1.1pts lower than 2022 and 0.3pts lower than 2019.

Table 10: Busiest JFK Domestic O&D Markets, 2023<sup>56</sup>

Rank	Market	O&D Passengers (000)	% of JFK Domestic O&Ds	% Change		Air Miles from JFK	Avg. Daily Scheduled Nonstop Departures	Number of Airlines Providing Nonstop Service

<sup>58</sup> Miami includes FLL, MIA

<sup>59</sup> San Francisco includes OAK, SFO, SJC

<sup>60</sup> Chicago includes MDW, ORD

Figure 33: JFK Domestic Seats and O&D Passengers<sup>61</sup>

JFK’s domestic O&D passenger demand has grown the most to Midwest and Southern markets where passenger volumes increased 24.1% and 2.6% respectively from 2019, as shown in Table 11. During the same period, the Northeast and West have seen declines of 14.6% and 14.8% respectively from 2019.

Capacity in 2024 is projected to decline from 2023 in all domestic regions other than the Northeast. Current schedules indicate that the West is the only domestic region with seat capacity remaining below 2019 levels. The reduction is a result of airline network consolidation. American’s and JetBlue’s 2024 seats to the West are projected to both decrease 25% from 2019, and Alaska’s seats are expected to decrease 20%. Delta is the only carrier at JFK increasing seats to the region, including 2% growth from 2023 to 2024. As a result of all of these changes, one million fewer seats are projected to fly from JFK to the West in 2024 than 2019. Most of the reduction is due to decreases in capacity between JFK and domestic hub airports. JFK domestic capacity to hub airports in 2024 is projected to be down 4% from 2019 while capacity to non-hub airports is expected to increase by 6%.

<sup>61</sup> Source: Departing Passengers - U.S. DoT O&D Survey via Airline Data, Schedules - Airline Data Inc

Table 11:Regional Growth in Domestic Seats and O&D Passengers<sup>62</sup>

Region	% of 2019		
	2023 O&D Passengers	2023 Seats	2024 Projected Seats
Midwest	124%	142%	136%
South	103%	108%	104%
Northwest	85%	111%	121%
West	85%	88%	85%

In 2023, domestic O&D traffic was 5% lower than 2019 while seat capacity increased 2%. For 2024, domestic seats are projected to be 2% lower than 2019, as shown in Figure 34.

Figure 34: JFK Domestic Seats and O&D Passengers<sup>63</sup>

## Global Traffic

In 2023, global O&D passenger traffic recovered to 97% of 2019 levels. With 5.7 billion seats projected in 2024, global capacity is expected to only be 2.0 million seats below 2019, as shown in Figure 35. Global O&D passengers grew by 25% from 2022 to 2023 as borders continued to re-open. Global scheduled seats increased 17% from 2022 to 2023 and are projected to increase by 5% from 2023 to 2024.

<sup>63</sup> Source: Departing Passengers - U.S. DoT O&D Survey via Airline Data, Schedules - Airline Data Inc

Figure 35: Global Year-on-Year Growth in Passengers and Seats<sup>64</sup>

North America accounted for 44% of JFK’s O&D passengers in 2023. In terms of O&D passenger recovery to 2019 levels, North America ranked third among all global regions in 2023 as shown in Figure 36. Projecting ahead to 2024, North American seat capacity is expected to be 6% higher than 2019, which is a 4.2% increase from 2023.

<sup>64</sup> Source: Sabre Market Intelligence

Figure 36: Global Passenger Traffic and Seat Capacity Recovery by Region<sup>65</sup>

### Global Forecasts

Most major worldwide passenger traffic forecasts show global passenger traffic returning to 2019 levels in 2024. The Airports Council International (ACI) forecast shows global passenger traffic growing at a CAGR of 4.3% from 2023 to 2042 with annual global passengers doubling over the next 20 years, as shown in Figure 37.

<sup>65</sup> Source: Sabre Market Intelligence

Figure 37: Long-Term Global Passenger Traffic Forecast<sup>66</sup>

By 2042, ACI predicts China will replace the U.S. as the world’s busiest market by total passengers (domestic and international). It also anticipates that emerging markets (namely Indonesia, Türkiye, and Thailand) will grow enough to move into the rankings of the busiest global aviation markets. The forecasted progression of the busiest global aviation markets is shown in Table 12.

Table 12: Forecasted 10 Busiest Markets by Total Passenger Traffic<sup>67</sup>

Rank	2023	2042 (f)	2052 (f)
1	United States	China	China

## Airline Service Trends

Key Takeaways	
1	JFK is served by a wide range of airlines in terms of business model and geography, without being dominated by a single airline or global alliance.
2	The 73 airlines flying from JFK in June 2024 exceeds the 71 airlines operating in June 2019. Airlines that stopped operating at JFK because of the COVID-19 pandemic have been replaced.
3	JFK’s large and diverse airline population enables connections within the major airline alliances and partnerships with otherwise unaffiliated airlines, which in turn supports positive route economics.
4	JFK is, and will remain, significantly important to JetBlue despite the overturning of the Northeast Alliance partnership with American airlines and merger with Spirit Airlines.

### Airlines Serving JFK

The number of scheduled airlines serving JFK now exceeds pre-pandemic levels, with 73 in June 2024 compared to 71 in June 2019, as shown in Table 13. The number and diversity of the airlines indicates the importance of JFK to airlines globally.

Table 13: Regional Distribution of Scheduled Passenger Airlines Serving JFK<sup>68</sup>

Region of Airline Base	Number of Scheduled Airlines Serving JFK	
	June 2019	June 2024
Europe	27	25

<b>Total</b>	<b>71</b>	<b>73</b>

<sup>68</sup> Source: Marketing airline schedules via Airline Data Inc. as of 29 May 2024

Fourteen airlines have initiated service to JFK since the COVID-19 pandemic, as shown in Table 14. New domestic entrants include Cape Air, Frontier Airlines, and Sun Country Airlines. New international carriers are represented by both recently launched airlines like ITA Airways and Norse Atlantic, as well as more established new entrants such as Air New Zealand, Azores Airlines, Air Senegal, Condor, HiSky, Air Canada, Flair, and VivaAerobus.

The airlines that have not returned to JFK have either ceased operations entirely (such as Thomas Cook, Air Itlay, XL Airways, and Interjet) or have changed their business model. Norwegian Air Shuttle, for example, stopped operating its longhaul flights even though the airline remains in business. Aeroflot has not returned because of sanctions related to the ongoing conflict in Ukraine.

Asia Pacific carriers have largely returned, although restrictions that remain in place limit some destinations and frequencies. Hainan Airlines is a notable exception as it has yet to restart JFK service. And although Aerlineas Argentinas is currently operating at JFK, the airline plans to suspend service in August 2024 citing profitability issues.<sup>69</sup>

---

<sup>69</sup> Aerlineas Argentina's exit is reflected in the ASM forecast.

## Airline Traffic

As described earlier, JFK passenger enplanements were close to 2019 levels, as shown in Figure 28.

Figure 38: JFK Annual Passenger Enplanements<sup>71</sup>

U.S. airlines have led in the recovery because of the early relaxation of domestic travel restrictions, as shown in Figure 39 and Table 15. International airlines’ passenger activities in JFK are still recovering given the slower pace of travel restriction relaxation globally, but the trend toward a full recovery is evident. Market growth will drive additional passenger demand at JFK. Key airline trends such as growing connectivity within their own networks and through an increasing number of airline partnership structures, new and more efficient aircraft types, and growing competition will continue to maintain a strong interest in JFK among international airlines.

## JFK Not Dependent on Single Carrier

JFK is served by a diverse set of airlines with no one dominant carrier. Delta and JetBlue are JFK's largest operators, with a combined 55.8% share of enplanements in 2023. Delta's and JetBlue's combined enplanement share has increased by almost 6pts since 2019. The U.S. flag carrier share of JFK's total enplanements was 70.8% in 2023, which is 6% higher than 2019. The share of foreign flag enplanements at JFK decreased from 35.4% in 2019 to 29.2% in 2023, with international demand recovery still lagging.

Although Delta held the largest share of JFK enplanements in 2023 with 30.2%, its JFK share is significantly below the airline's 76.7% share at its other major hub at ATL, as shown in Figure 40 below. American's nearly 13% share of JFK enplanements is also quite low compared to its other large hub at DFW with 82.5%. Similarly, United has a much higher share of traffic where it is the dominant carrier including 48% at ORD, 46.4% at SFO, and 46.5% at DEN. JFK's size and importance drives a level of interest from a wide range of carriers that makes dominance by any one of them very difficult – especially when additional slots are needed to acquire additional share. The diverse carrier base provides a hedge against major service disruptions caused by a single carrier's exit or cessation of operations.

In the same vein, there is no overreliance on any foreign flag carrier at JFK. Most are major hub carriers in their respective regions that provide a multitude of connections globally. If one were to exit JFK, its traffic would likely be redistributed over other international connecting hubs if not available to another airline to fly nonstop.

Figure 40: Share of Enplaned Passengers Carried by Primary Airline at 10 Busiest U.S. Hubs<sup>74</sup>

Airport's Primary Airline										
	DFW	ATL	SEA	ORD	SFO	DEN	LAS	JFK	MCO	LAX
<b>2019</b>	AA	DL	AS	UA	UA	UA	WN	DL	WN	AA
<b>2023</b>	AA	DL	AS	UA	UA	UA	WN	DL	WN	DL

## Airline Alliances

JFK is served by all three major alliance groupings without being dominated by any one of them. In fact, the three major alliances group do not even encompass most of the operations at JFK. The airport is a significant hub for Delta and its SkyTeam partners, as they have carried the most passengers out of JFK over the past five years, through the pandemic and into the recovery. American Airlines and its Oneworld alliance partners also have a significant presence at JFK. Table 16 shows the global alliance membership of JFK's airlines.

<sup>74</sup> Source: U.S. DoT T-100 via Airline Data Inc.

Table 16: JFK Airlines by Global Alliance<sup>75</sup>

SkyTeam	Oneworld	Star Alliance	Unaffiliated
Aerolineas Argentinas	Aer Lingus	Air Canada	Air Senegal
Aeromexico	Alaska Airlines	Air China	Air Serbia
Air Europa	American Airlines	Air India	Azores Airlines
Air France	British Airways	Air New Zealand	Cape Air
China Airlines	Cathay Pacific Airways	All Nippon Airways	Caribbean Airlines
China Eastern Airlines	Finnair	Asiana Airlines	Cayman Airways
China Southern Airlines	Iberia	Austrian Airlines	Condor
Delta Air Lines	Japan Airlines	Avianca	EL AL
ITA Airways	Qantas Airways	Brussels Airlines	Emirates
Kenya Airways	Qatar Airways	Copa	Etihad Airways
KLM	Royal Air Maroc	Egyptair	Flair Airlines
Korean Air	Royal Jordanian Airlines	Ethiopian Airlines	Hawaiian Airlines
Saudi Arabian Airlines		Eva Airways	Icelandair

<b>Total</b>		<b>100.0%</b>	<b>100.0%</b>

<sup>76</sup> Source: U.S. DoT T-100 via Airline Data Inc

<sup>77</sup> Source: U.S. DoT T-100 via Airline Data Inc

JetBlue mostly operates in Terminal 5 at JFK. The proximity and relative ease of connections between Terminal 6 and Terminal 5 makes Terminal 6 an attractive option of existing carriers and new entrants to JFK who are not part of the three major airline alliance groups. These unaffiliated carriers represent a 33.4% share of JFK enplanements.

EWR is a major hub for United Airlines and its Star Alliance partners. Despite JFK not being the primary airport for Star Alliance carriers, JFK’s importance is demonstrated by several key Star Alliance airlines, such as Lufthansa and Air Canada, providing JFK service to their home hubs. Star Alliance carriers account for 73% of EWR’s seat capacity and approximately 10% of seats at JFK in June 2024. Figure 42 shows how much more diverse JFK’s air carrier base is compared to EWR’s. In June 2024, unaffiliated carriers at EWR make up only 16% of the overall capacity, whereas their share at JFK is double that of EWR, at 32%.

Figure 42: JFK and EWR Seat Capacity by Airline Alliance<sup>78</sup>

### Joint Ventures

An airline joint venture (JV) is an advanced form of codesharing where the airline partners share the revenues and costs. It typically requires extensive government approval and allows the partners to coordinate pricing and schedules along with the financial arrangement. From a customer’s standpoint, the concept is meant to provide a seamless travel experience and multiple flight

<sup>78</sup> Source: Scheduled seat capacity at JFK and EWR in June 2024 as of 5 June 2024 via Airline Data Inc

options. However, some consider JV’s as anti-competitive as they essentially reduces or eliminates competition in the market, which can adversely affect fares.

There are major transatlantic and transpacific JVs involving U.S. flag carriers that are aligned with each of the three major global airline alliances. The most relevant ones in the case of JFK are the transatlantic JVs listed in Table 18. The presence of the transatlantic JV service at JFK minimizes the risk to any one carrier in the case of drastic capacity changes by another carrier, since capacity is one of the joint decisions regulated by the JV partners.

Table 18: Transatlantic JVs with Airlines Operating at JFK<sup>79</sup>

SkyTeam	Oneworld	Star Alliance
Air France	Aer Lingus	Air Canada
Delta Air Lines	American Airlines	Austrian Airlines
KLM	British Airways	Brussels Airlines
Virgin Atlantic Airways	Finnair	Lufthansa
	Iberia	Swiss

In 2023, the Delta/Air France/KLM JV carried approximately 34% of JFK’s enplanements. Air France/KLM purchasing an equity stake in SAS and that carrier’s plans to join SkyTeam later in 2024 has fueled speculation that SAS will join the SkyTeam JV and will also likely mean a shift in its New York capacity from EWR to JFK.

The JFK passenger enplanements for each alliance’s JV is shown in Figure 43.

<sup>79</sup> Source: U.S. DoT List of Active Antitrust Immunized Alliances

Figure 43: JFK Enplanements by Transatlantic JV<sup>80</sup>

### JetBlue Partnerships

JFK is the key hub for JetBlue. It is the largest airport operation in the airline’s network (as shown in Figure 44), and JetBlue is the second largest airline at JFK for passenger enplanements. JetBlue’s 2023 passenger enplanements exceeded 2019 passenger enplanements by 9.3%, although upcoming capacity reductions will decrease near-term traffic levels.

<sup>80</sup> Source: U.S. DoT T-100 via Airline Data Inc

Figure 44: JetBlue's Largest Focus Cities by Average Daily Departures, June-August 2024<sup>81</sup>

Although it is not part of an airline alliance group, JetBlue has a global range of airline partners – some are global alliance members while others are unaffiliated. All of JetBlue’s partner airlines continue to provide service into JFK post-pandemic except for South African Airways, which did not return due to severe financial challenges. JetBlue’s airline partners are listed in Table 19.

Table 19: JetBlue Airline Partners<sup>82</sup>

Loyalty Program Partners	Codeshare Partners
Etihad Airways	Aer Lingus
Hawaiian Airlines	Air Serbia
Icelandair	Cape Air
JSX	El Al
Qatar Airways	Porter
Silver Airways	Turkish Airlines
Singapore Airlines	
South African Airways	

<sup>81</sup> Source: Schedules valid as of 6 June 2024 via Airline Data Inc.

<sup>82</sup> Source: JetBlue

In May 2024, JetBlue announced that it is seeking a codeshare with British Airways that would allow the two airlines to significantly expand their networks in the U.S. and Europe. Interestingly, British Airways is tightly aligned with another major U.S. flag carrier, American, in a transatlantic JV.

JetBlue and American used to be closely aligned in a partnership named the Northeast Alliance (NEA) through which they were able to codeshare, coordinate schedules, share revenue, and provide reciprocal loyalty program benefits across their operations in Boston and New York - including JFK. In May 2023, the partnership was terminated, as the U.S. Department of Justice prevailed in a lawsuit, making the case that the NEA was anti-competitive.

JetBlue's recovery from the COVID-19 pandemic and growth at JFK as a result of the NEA initiated in 2021 can be seen in Figure 45, where JetBlue's JFK seat capacity in 2022 exceeded 2019 levels. Subsequently, growth stalled and capacity reduced because of a series of internal and external factors. Among the primary capacity growth disruptors at JetBlue were the dissolution of the NEA with American, the failed merger with Spirit Airlines (also because of a U.S. government lawsuit), and ongoing issues with Pratt and Whitney engine issues<sup>83</sup>. These issues, along with rising costs, debt, and increasing competition in non-core parts of its network (such as the West Coast) led to a loss of \$310 million in 2023<sup>84</sup>. Among the carrier's plans to return to profitability are the reduction in flights and capacity in 2024 as well as revenue-improving and cost-reduction initiatives being initiated by the airline's new leadership team. JetBlue's published schedules show a system-wide reduction of 7.2% of departures, 5.4% of departing seats, and 3.2% of ASMs from calendar year 2023 to calendar year 2024.<sup>85</sup>

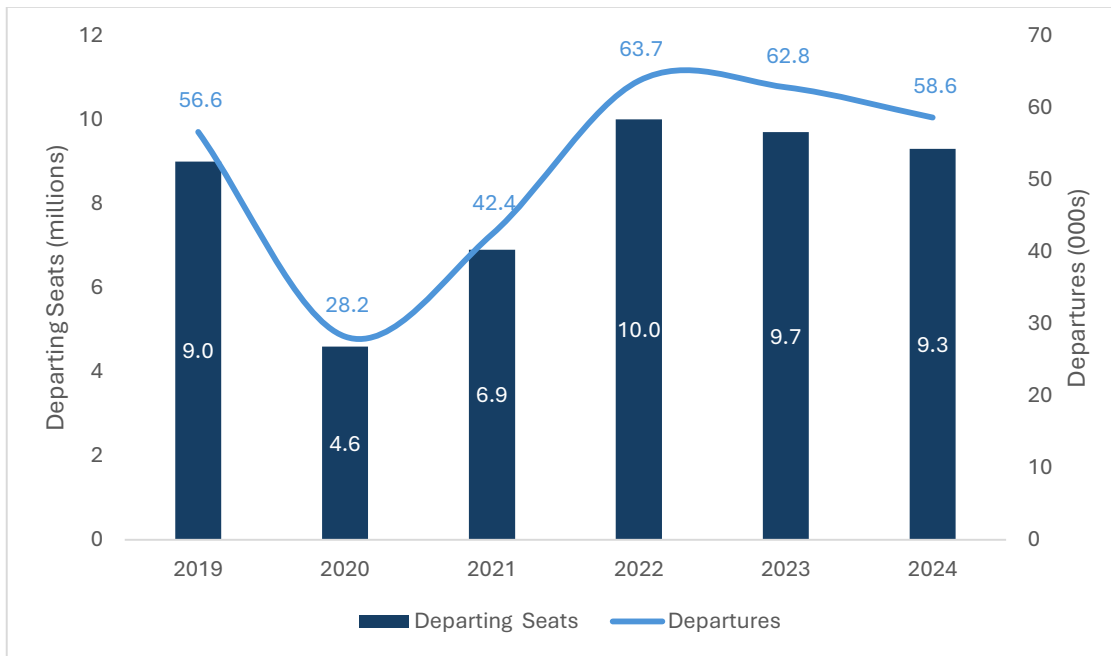

---

<sup>83</sup> Some of JetBlue's aircraft have the Pratt and Whitney geared turbofan (GTF) engine that is currently subject to long and earlier-than-expected engine maintenance checks, grounding dozens of JetBlue's aircraft. The problem affects the same aircraft at other airlines, which has strained Pratt and Whitney's ability to produce replacement parts and maintenance facility ability to service the aircraft affected around the world.

<sup>84</sup> Source: JetBlue 2023 annual results.

<sup>85</sup> Source: Sabre Market Intelligence as of 30 July 2024.

Figure 45: JetBlue JFK Departures and Seats<sup>86</sup>

Despite these changes, New York remains a strategic focus for JetBlue. The carrier can take advantage of the slot waivers in effect through the summer 2025 scheduling season to reduce capacity while preserving its key slots for future use.

### Regional Distribution of JFK Capacity

JFK continues to be a significant global gateway with a wide range of domestic and international destinations: 69 domestic and 117 international unique markets as of June 2024. While service in some international markets has been cancelled since the COVID-19 pandemic, they have been replaced by new ones. Although 13 destinations that operated in 2019 are no longer scheduled for 2024, they have been replaced with 14 new destinations, constituting a net gain of one new route. Table 20 shows the JFK seat capacity deployed to global regions and Table 21 lists JFK’s international nonstop destinations.

Travel restrictions in Asia – and in particular, China – were stricter and more prolonged than the rest of the world. Chengdu and Chongqing are two Chinese destinations that have not returned post-pandemic. Chinese provincial governments provided hefty airline incentives to boost direct connectivity of the Chinese third-tier cities to key global markets pre-pandemic. If this funding becomes available again, and capacity restrictions are further relaxed, JFK may see service to additional points in China reinstated.

<sup>88</sup> Source: JFK scheduled service as of 7 June 2024 via Airline Data Inc.

JFK continues to see strong from global airlines. JFK, as one of the primary international gateways into the U.S., holds significant international prestige and gives many international travelers their first impression of the U.S. It continues to play an important role in tourism, business, and international relations.

## Airfare Revenue

Key Takeaways	
1	Airfares are high at JFK. In 2023, the airport generated the second largest amount of leg base fare revenue among U.S. airports, despite being ranked sixth busiest in passenger enplanements. JFK has consistently generated higher airfares than most of its competitors. It also held these rankings in 2019 and 2022.
2	JFK leg base fare revenue increased 23% from 2022 to 2023 and were 12% higher than 2019. In both years, the percentage increase was above the average for other U.S. airports
3	JFK's routes produce high yields, which improves the airport's attractiveness to airlines. In 2023, JFK had the second highest yield among U.S. airports. <sup>89</sup>
4	JFK has consistently been among the 10 highest revenue generating airports in the route networks of its three largest airlines: Delta, JetBlue, and American.
5	JFK had the highest premium base fare revenue as a percentage of total revenue among the busiest U.S. airports in 2023. The ability to attract premium fare passengers is a key driver of route profitability.

The strong demand for travel to and from New York, coupled with the capacity scarcity created by slot controls, New York CSA demographics, and airline mix enables airlines to generate relatively high fares at JFK. High yields help enable the profitability needed for airlines to continue growing their capacity.

### Fare Revenue at Large Airports

Positioned as a major international hub airport and gateway to the New York CSA, JFK is not only an important component of airline route networks, but also plays a significant role in their revenue generation. In 2023, JFK's airlines generated \$11.5 billion in leg base fare revenues<sup>90</sup> from outbound passengers, which is 23% higher than 2022 and 12% higher than 2019. While JFK is the sixth busiest U.S. airport in terms of annual passenger enplanements, it ranked second in passenger leg base fare revenues in 2023, as shown in Table 22.

<sup>89</sup> On a stage-length adjusted basis

<sup>90</sup> Leg base fare revenue is the revenue generated by the airline on the specific segment flown and exclusive of taxes, fees, and ancillary charges. The approach includes an allocation of fare revenue to each segment of a connecting itinerary to most appropriately apply fare revenues to a departing airport or individual flight segment.

Table 22: Leg Base Fare Revenue at Busiest U.S. Airports, 2023<sup>91</sup>

Revenue Rank	Enplaned Passenger Rank	Airport	Leg Base Fare Revenue (billions)	Leg Base Fare Revenue/Enplaned Passengers
1	4	Los Angeles (LAX)	\$ 12	\$ 322
<b>2</b>	<b>6</b>	<b>New York (JFK)</b>	<b>\$ 11</b>	<b>\$ 373</b>
3	1	Atlanta (ATL)	\$ 10	\$ 196
4	13	San Francisco (SFO)	\$ 9	\$ 373
5	2	Dallas (DFW)	\$ 9	\$ 221
6	5	Chicago (ORD)	\$ 9	\$ 241
7	12	Newark (EWR)	\$ 7	\$ 296
8	3	Denver (DEN)	\$ 6	\$ 172
9	10	Miami (MIA)	\$ 6	\$ 246
10	11	Seattle (SEA)	\$ 6	\$ 225
		<b>Average</b>	<b>-</b>	<b>\$ 258</b>

An analysis of the leg base fare revenues from the 10 busiest U.S. airports in 2023 shows that JFK passengers contribute an above average amount to airline revenues. Across the 10 busiest airports, the average base fare revenue per enplaned passenger was \$258, while the average at JFK was 45% higher at \$373. JFK’s average base fare of \$373 was tied with that of San Francisco. JFK’s revenue rank is higher than that of enplaned passengers due to the airlines’ ability to charge higher airfares at JFK, which is an important factor behind the potential for strong route profitability. For example, LAX generated 4% more base fare revenue than JFK but required an additional 21% more passengers to do so. This demonstrates the value of JFK’s passengers to airline revenues.

Although there was no overall change in JFK’s position among the 10 busiest airports by base fare revenue in 2023, JFK’s base fare increased at an above average rate. From 2022 to 2023, JFK leg base fare revenue increased by 23%, while the average across the 10 busiest U.S. airports was 18%, as shown in Table 23. In the same period, JFK’s leg base fare revenue per enplaned passenger increased by 9%, while the average across the 10 busiest U.S. airports was 7%. JFK’s increase in leg base fare revenue was driven by higher airfares rather than just additional passengers.

<sup>91</sup> Source: Enplanement ranking – U.S. DoTT-100 via Airline Data Inc, Leg base fare revenue and average leg base fare – Sabre Market Intelligence. Data is one-way outbound and includes both domestic and international revenue.

Table 23: Year-on-Year Change in Leg Base Fare Revenue at Busiest U.S. Airports by Revenue, 2022 to 2023<sup>92</sup>

Change in Revenue Rank	Change in Enplaned Passenger Rank	Airport	Change in Leg Base Fare Revenue	Change in Leg Base Fare Revenue/Enplaned Passengers

-	-1	Miami (MIA)	16%	11%
-	-	Seattle (SEA)	14%	3%
		<b>Average</b>	<b>18%</b>	<b>7%</b>

Comparing 2023 to 2019, JFK maintained its position as the second largest U.S. airport by leg base fare revenue with above average increases and leg base fare revenue per enplaned passenger, as shown in Table 24. For 2023, JFK passengers decreased 2% on 2019 and leg base fare revenues increased by 12%, which resulted in a 14% increase in average leg base fare revenue per enplaned passenger.

<sup>92</sup> Source: Enplanement ranking – U.S. DoTT-100 via Airline Data Inc, Leg base fare revenue and average leg base fare – Sabre Market Intelligence. Data is one-way outbound from JFK

		<b>Average</b>	<b>4%</b>	<b>17%</b>

### Average Yield at Large Airports

The unit measurement of base fares is yield, which is the base fare revenue charged per mile (expressed in cents/mile). Unlike average fares, yield provides a measurement of an airline’s revenue-generating ability that takes distance into consideration. Table 25 details the average yields at JFK and the nine other busiest U.S. airports in terms of revenue generation. In 2023, with an average yield of 14.14 cents/mile, JFK was the second highest yielding airport, maintaining its position from 2022 but down from 2019. In 2019, JFK was the highest yielding airport among the 10 busiest U.S. airports. Since yield is a function of flight length, the yield figures have been adjusted to the average flight length at JFK to enable a consistent comparison between airports.

In 2023, airlines at JFK improved their yields both year-on-year and compared to 2019. When comparing 2023 to 2022, JFK’s average yield increased 2% while its average flight distance increased by 13%, indicating strong revenue-generating potential at the airport. Compared to 2019, in 2023 JFK’s average yield was up 20% while the average flight distance had reduced by 6%.

<sup>93</sup> Source: Enplanement ranking – U.S. DoTT-100 via Airline Data Inc, Leg base fare revenue and average leg base fare – Sabre Market Intelligence. Data is one-way outbound from JFK.

Table 25: Stage Length Adjusted Yield at 10 Busiest U.S. Airports by Revenue<sup>94</sup>

Airport	2023		2022		2019	
	Adjusted Leg Yield (cent/mile)	Avg. Flight Distance (mile)	Adjusted Leg Yield (cent/mile)	Avg. Flight Distance (mile)	Adjusted Leg Yield (cent/mile)	Avg. Flight Distance (mile)

Seattle (SEA)	10.86	1,350	11.51	1,260	9.14	1,303
Denver (DEN)	10.37	849	11.19	866	8.71	897

JFK generates significant amounts of revenue for each of its largest market share airlines: JetBlue, Delta, and American. In 2019, 2022, and 2023, the airport has been an important and consistent source of revenue for the three carriers, as shown in Table 26. In 2023, JFK maintained its position among JetBlue’s and American’s highest revenue generating airports. At Delta, in 2023 JFK became the airline’s second largest revenue generating airport by overtaking MSP, one of Delta’s major hubs with a dominating presence in the market, thus signifying JFK’s increasing importance within the airline’s network and contributor to its profitability.

Table 26: JFK Major Airline Leg Base Fare Revenue Ranking<sup>95</sup>

## JFK Airfares

Between 2022 and 2023, the average domestic fare increase across the New York CSA was 0.8%, while JFK’s average domestic fare increased by 1%, as shown in Figure 46. From 2019 to 2023, the average growth in domestic airfares across the New York CSA was 2.7%. The growth was driven by JFK, which saw the largest percentage increase in domestic fares across the four year period at 6.4%

Figure 46: Year-on-Year Growth in Average Domestic, One-Way Fares at New York CSA Airports<sup>96</sup>

The average domestic one-way base fares among the 20 busiest domestic O&D markets from JFK in 2023 are compared in Table 27. At \$227, JFK had the highest average domestic base fare from the New York CSA airport, a position it also held in 2022 and 2019.

<sup>96</sup> Source: Sabre Market Intelligence

Table 27: Comparison of Airfares in JFK's 20 Busiest Domestic O&D Markets, 2023<sup>97</sup>

Rank	O&D Market	JFK Departing O&D Passengers (000s)	Average O&D Distance from JFK (miles)	JFK Share of New York CSA O&D Passengers	Average One-Way Domestic O&D Base Airfare

<b>JFK Top 20</b>		<b>8,046</b>	<b>1,644</b>	<b>32.7%</b>	<b>\$ 234</b>	<b>\$ 209</b>	<b>\$ 156</b>	<b>108</b>	<b>\$ 179</b>
Other Cities		2,660	1,459	17.5%	\$ 204	\$ 196	\$ 181	\$ 125	\$ 176
<b>Total Domestic</b>		<b>10,706</b>	<b>1,475</b>	<b>26.9%</b>	<b>\$ 227</b>	<b>\$ 204</b>	<b>\$ 169</b>	<b>112</b>	<b>\$ 178</b>

As was the case in 2019, JFK's domestic O&D demand is influenced by the 1,500-mile perimeter rule at LGA. In 2023, 10 of JFK's top 20 domestic markets (by O&D passengers) were over 1,500 miles from the airport (the same number of markets as 2019). In 2023, JFK captured a greater proportion of New York CSA traffic on longer-haul markets than shorter-haul markets. Among JFK's

<sup>97</sup> Source: U.S. DoT O&D Survey via Airline Data Inc, SWF excluded due to low traffic volumes.

<sup>98</sup> Los Angeles includes BUR, LAX, LGB, ONT, SNA

<sup>99</sup> Miami includes FLL, MIA

<sup>100</sup> San Francisco includes OAK, SFO, SJC

<sup>101</sup> Chicago includes MDW, ORD

20 busiest domestic O&D markets that were 1,500 miles or more from JFK, the airport accounted for 48% of the New York CSA traffic; for those that were less than 1,500 miles from JFK, the airport accounted for 22% of New York CSA traffic. For all of the 20 busiest JFK domestic O&D markets, JFK accounted for an average of 27% of New York CSA traffic.

## Premium Passenger Revenue

An important source of airline revenue, and aid to profitability, is the sale of premium cabin seats in business and first class. Routes that can generate strong revenue streams from premium cabin sales are attractive to airlines.

Among the 10 busiest U.S. airports for passenger enplanements in 2023, JFK had the highest percentage of premium cabin base fare revenue, as shown in Figure 47. In 2023, 37.6% of JFK's total base fare revenue was generated from premium cabin passenger fares, which was 0.2pts lower than 2022 and 2.1pts lower than 2019. For 2019 and 2022, JFK also had the highest percentage of premium cabin base fare revenue. The consistency demonstrates JFK's resilience as a market and its importance as a reliable source of revenue to airline route networks.

Figure 47: Premium Cabin Fare Revenue as a Percentage of Total Base Fare Revenue at 10 Busiest U.S. Airports<sup>102</sup>

## Economic Basis for Airline Traffic

Key Takeaways	
1	Despite a decline in population during the COVID-19 pandemic, the New York CSA remains the largest of all the U.S. CSAs and is forecasted to continue to be so for the remainder of the current decade.
2	Employment has returned to pre-pandemic levels. New York offers diverse sector opportunities and is home to major employers, including 47 of the Fortune 500 firms.
3	Wages have risen. Per capita incomes remain higher than the U.S. average, with 46% of New York CSA households having an income above \$100,000 indicating a high propensity to travel.
4	Tourism is on its way to returning to its previous peak, with a record 68 million visitors predicted to arrive in New York City in 2025.
5	The economy is robust. The New York CSA remains the most important U.S. CSA in economic terms with a GRP of more than \$2 trillion in 2023. Economic growth is projected to outpace the national average.
6	The COVID-19 pandemic economic recovery is following a similar timeline to previous economic crises as the New York CSA demonstrates its economic resilience.

JFK’s long-term growth is rooted in the continued development and growth of the New York metropolitan area. The New York CSA continues to have the largest population, the biggest economy, and is a leading visitor destination. It is historically resilient to shocks and downturns of different kinds and has demonstrated that it continues to be robust in the post COVID-19 pandemic world.

### Population

Despite experiencing a population decline of 3% since the beginning of the COVID-19 pandemic, the New York CSA remains the largest of the 166 CSAs in the U.S. with an estimated 21.9 million residents in 2023, as shown in Table 28.<sup>103</sup>

<sup>103</sup> Source: U.S. Census Bureau

Table 28: 10 Largest U.S. Combined Statistical Areas, 2023<sup>104</sup>

Rank	Combined Statistical Area	Estimated Population
1	New York–Newark, NY-NJ-CT-PA CSA	21,859,598
2	Los Angeles–Long Beach, CA CSA	18,316,743
3	Washington–Baltimore–Arlington, DC-MD-VA-WV-PA CSA	10,069,592
4	Chicago–Naperville, IL-IN-WI CSA	9,794,558
5	San Jose–San Francisco–Oakland, CA CSA	9,001,024
6	Dallas–Fort Worth, TX-OK CSA	8,654,750
7	Boston–Worcester–Providence, MA-RI-NH CSA	8,345,067
8	Houston–Pasadena, TX CSA	7,706,626
9	Philadelphia–Reading–Camden, PA-NJ-DE-MD CSA	7,390,919
10	Atlanta–Athens–Clarke County–Sandy Springs, GA-AL CSA	7,221,137

The reduction in population in 2020 arrived after steady growth from 1990 onwards.<sup>105</sup> The New York CSA experienced the largest decline in population of all U.S. CSAs during the COVID-19 pandemic, and in 2023 is estimated to have a total population 573,000 below its levels in April 2020.<sup>106</sup> Figure 48 shows the percentage change in population among the 10 largest U.S. CSAs between Q1 2020 and Q1 2023, while Table 29 and Figure 49 shows the New York CSA population decline relative to the whole U.S.

The shift in population from the larger CSAs in the Northeast and California to those in the South and Southwest was due to the rise in remote, flexible working arrangements and an already ongoing trend of companies relocating to states that have incentivized businesses with lower taxes, less stringent regulations, and lower operating costs.<sup>107</sup>

Figure 48: Top 10 Largest Changes in U.S. CSA Population Q1 2020 vs 2023<sup>108</sup>

Table 29: New York CSA and State vs U.S. Population Change (millions)<sup>109</sup>

Year	New York CSA	New York State	United States
1990	18.9	18.0	249.5
2000	20.5	19.0	282.1
2010	21.3	19.4	309.8
2020	22.5	20.2	329.8
2023	21.9	19.6	335.9

<sup>108</sup> Source: U.S. Census Bureau

<sup>109</sup> Source: U.S. Census Bureau

Figure 49: Population Growth of the New York CSA, New York State, and U.S.<sup>110</sup>

The population growth rate in the New York CSA has historically been slightly lower than the population growth rate of the U.S. However, both the CSA and the state experienced population declines at the start of the current decade, while the population of the U.S. grew. As shown in Figure 50, the pace of population decline in the New York CSA did slow in 2023. The population of the New York CSA in 2030 is currently predicted to be 23.1 million people.<sup>111</sup>

Forecasts prior to the COVID-19 pandemic indicated that the population of the New York CSA would be in the range of 23 million to 24 million by 2030.<sup>112</sup> The expectation that the long-term population growth will resume demonstrates the CSA’s resilience and attractiveness as a place to live and work.

## Employment

Historical employment trends in the New York CSA and New York State have tracked alongside national levels. In general, non-agricultural employment has increased in the New York CSA during the past three decades, with the region seeing periods of robust growth, particularly in the service-providing sectors such as education, health services, leisure and hospitality, and financial activities. There has been a noticeable shift from manufacturing and good producing sectors to more service-oriented industries. Figure 51 shows the 2023 distribution of non-agricultural employment in the New York CSA.

<sup>113</sup> Source: U.S. Census Bureau

Figure 51: Distribution of Non-Agricultural Employment by Industry Sector in the New York CSA, 2023<sup>114</sup>

The unemployment rate has historically tracked higher than the national level in both the New York CSA and New York State, as shown in Figure 52. The overall unemployment rate in the U.S. was 3.9% in April 2024, 0.4pts above 2019. Both the New York CSA and New York state unemployment rates were 0.4pts and 0.3pts higher than the U.S. unemployment rate, at 4.3% and 4.2% respectively.<sup>115</sup> These are typical differences: Since 1990, the average unemployment rate for both the New York CSA and New York state has been 0.4pts higher than the unemployment rate for the U.S.<sup>116</sup> However, 2019 was a record low year for unemployment in both the U.S. and New York, with the New York CSA and New York State having lower unemployment rates than in 2018<sup>117</sup>, and unemployment is expected to decline in 2024 and 2025 as economic conditions improve.

<sup>116</sup> Source: U.S. Bureau of Labor Statistics

<sup>117</sup> U.S. Bureau of Labor Statistics, April 2020 Monthly Labor Review

Figure 52: Unemployment Rate Evolution<sup>118</sup>

### 1991 Recession

After the 1991 recession, the unemployment rate in the New York CSA peaked at 8.8% in 1992 but then fell consistently throughout the rest of the decade, reaching a low of 4.1% in 2000 which was only 0.1pts higher than the U.S. average.<sup>119</sup>

### 9/11 Attacks

The next recession in 2001, after the 9/11 attacks, had fewer impacts than the 1991 recession largely due to a financial support package put in place by the government in response to the attacks.<sup>120</sup> Unemployment peaked at 6.3% in the New York CSA and 6.4% in New York State in 2003.

### 2007 – 2008 Global Financial Crisis

The 2007 – 2008 Global Financial Crisis significantly impacted unemployment rates in the U.S. In 2009, the unemployment rate rose to 9.3% in the U.S. and 8.6% in the New York CSA. As shown in Figure 52, both the New York CSA and New York State had noticeably lower peak unemployment during this period than the rest of the U.S. During the following decade, the annual rate of change in non-agricultural employment remained steady, with the New York CSA seeing an annual increase of between 1.5% and 2%, in line with the rest of the U.S. Except for 2012, unemployment rates fell

<sup>118</sup> Source: U.S. Bureau of Labor Statistics

<sup>119</sup> Source: U.S. Bureau of Labor Statistics

<sup>120</sup> Source: U.S. Bureau of Labor Statistics

consistently in the New York CSA, from 9% in 2010 to 3.6% in 2019. The decline in the New York CSA unemployment rate during the 2010s was lower than the U.S. decline, though that was because the New York CSA unemployment rate was lower than the national rate at the start of the decade. Therefore, the New York CSA suffered less economic loss and had a stronger recovery than the U.S. from the 2007 – 2008 Global Financial Crisis, so the New York CSA had a lower unemployment rate than the U.S. in 2010.<sup>121</sup>

## COVID-19 Pandemic

The COVID-19 pandemic affected employment across the U.S., but the New York CSA was particularly hard hit in the early days because of high case rates and government restrictions on businesses. As a result, unemployment rates were highest among workers in the hospitality, tourism, transportation, and leisure industries. New York CSA unemployment jumped to a peak of 10.2% in 2020 from a 30-year historical low of 3.6% in 2019.<sup>122</sup>

However, the resilience of the New York economy demonstrated in prior recession once again helped the region to rebound. New York lost 20.3% of its payroll jobs between February and April 2020 but had returned to pre-pandemic employment levels by October 2023.<sup>123</sup>

The New York CSA’s employment rate in March 2024 was 0.3pts above February 2020,<sup>124</sup> demonstrating that a higher proportion of the population is working. The growth rate in New York is not as pronounced as in cities in Southern states (as shown in Figure 53), which have benefitted from the previously mentioned shift in corporate relocation and working practices. However, in March 2024 the New York metropolitan area added 118,700 jobs – its largest year-over-year increase in jobs and the highest of all 51 U.S. metropolitan areas.<sup>125</sup> The recent growth is also strong by historical standards: From 2010 to 2019, 890,000 private sector jobs were added (or approximately 100,000 annually), indicating that the job market is now recovering, and the New York CSA has made progress in recovering its labor force numbers.

### Major Employers

New York is home to many major employers across diverse industry sectors. It is a leading hub for banking, finance, and communications in the U.S., as well as a major manufacturing center with a thriving technical sector.

New York has more than 330,000 people<sup>127</sup> working in the financial sector with companies such as JP Morgan Chase, Citigroup, and Morgan Stanley as shown in Table 30. However, the New York CSA also has a highly diversified industrial economy that includes technology, pharmaceuticals, fashion, and manufacturing, with companies such as IBM, Verizon Communications, Pfizer, and Colgate-Palmolive.

Healthcare and social assistance are rapidly growing industries substituting employment in construction, retail, and leisure and hospitality, which are still below 2019 levels.

New York benefits from industry sectors that require a large amount of air travel: finance, professional and business services, technology, healthcare (incorporating the pharmaceutical sector), and information and technology. All require frequent travel for client meetings, on-site services, events and conferences, product launches, and sales and marketing.<sup>128</sup>

<sup>128</sup> Source: McKinsey & Company, New York: A Concrete Jungle Where Dreams Are Still Made, 21 December 2021 & Deloitte, Navigating Toward A New Normal: 2023 Deloitte Corporate Travel Study, 10 April 2023

New York is also one of the top states in the U.S. for major corporate head offices. New York State is the headquarters for 47 Fortune 500 firms, 40<sup>129</sup> of which are based in New York City and shown in Table 30. New York is home to more Fortune 500 headquarters than any other city in the U.S. Nearly all these companies operate globally, with hundreds of thousands of employees in offices, manufacturing plants, and other facilities across the world. Consequently, they are significant participants in air travel.

Moving forward, education and health services are projected to continue their employment gains driven by their ongoing demand and advancements.<sup>130</sup> Following on from its COVID-19 pandemic recovery, the leisure and hospitality sector is seeing a resurgence boosted by increased tourism and local spending. Tech companies and professional services are also expected to remain strong employers in New York City, although remote work has impacted them more than other sectors because the nature of the work is less reliant on a physical location. Certain aspects of the financial sector face a similar change, although continued job growth located in the region is anticipated. Figure 54 summarizes the changes in employment by industry sector between October 2022 and October 2023.

Figure 54: Changes in New York Employment by Industry, October 2022 - October 2023<sup>131</sup>

## Income

The per capita income in both New York State and the New York CSA has historically been higher than in the U.S. as a whole, while following the national trends of growth and decline, as shown in Figure 55. In 2022, the per capita personal income in New York State was 15% higher than the national average at \$75,423 and it was 28% higher than the national average in the New York CSA at \$84,084.

<sup>130</sup> Source: Manhattan Institute, “New York City Jobs Data Shines Light On NYC’s Economic Strengths and Weaknesses”, 25 April 2024

<sup>131</sup> Source: Bloomberg/THE CITY – NYC News

Figure 55: Per Capita Personal Income Trend in U.S., New York State, and New York CSA<sup>132</sup>

The New York CSA has one of the highest propensities to travel in all the U.S. CSAs, as shown in Figure 56. It can be attributed to the large population, financial and corporate sector, high-income households, and access to major airports.

<sup>132</sup> Source: U.S. Bureau of Economic Analysis - Federal Economic Data

Figure 56: Largest 5 CSA's With the Highest Propensity to Travel, 2023<sup>133</sup>

Total wage earnings in New York are projected to increase by 3.9% in 2024 and grow by similar rates through to 2027 amid lower inflation and modest job growth.<sup>134</sup> The factors that have brought higher-income workers to New York in the past remain in place and are likely to continue to be a draw over the longer term. The New York CSA is likely to be attractive to people driven by career opportunities as the economy continues to strengthen, expanding hybrid working models growing cultural and recreational opportunities, and providing ongoing access to a high concentration of top-tier educational institutions at primary, secondary, and university levels.<sup>135</sup> The strengthening economy will also additional investments in transportation and infrastructure improvements for rail, road, and air that can drive additional economic activity in the region.<sup>136</sup>

### Household Income Above \$100,000

Historically, the New York CSA has had the highest number of households with an income of more than \$100,000 of all U.S. CSAs. The number of households with incomes of over \$100,000 is an indicator of propensity to travel because 55% of airline fare expenditures are made by households with an income of \$100,000 or more.<sup>137</sup> The combination of continued economic growth and a

<sup>133</sup> Source: Passenger Traffic - Sabre Market Intelligence, Population – U.S. Census Data

<sup>137</sup> Source: U.S. Bureau of Labor Statistics - Consumer Expenditure Survey Data

strong job market should see an increase in the number of households earning an income above \$100,000 in 2024.

Salaries in New York are often higher than the national average to compensate for New York’s cost of living, which is approximately 78% higher<sup>138</sup> than the national average. However, while New York State has the fourth highest cost of living across the U.S., its residents have the most disposable income with an average of \$25,427 in leftover pay annually.<sup>139</sup> As shown in Figure 57, 46% of households in the New York CSA have an income higher than \$100,000, which is 10% higher than the national rate for those who fall into the \$100,000 to \$200,000 bracket and more than 1.5 times higher for those who earn over \$200,000.<sup>140</sup>

Figure 57: New York CSA Share of Income Per Household<sup>141</sup>

## Visitor Activity and Leisure Travel

New York is one of the most well-known tourist destinations in the world and frequently among the places international visitors go on their first trips to the United States. It offers a vast array of attractions, including more than 170 museums<sup>142</sup>, 41 Broadway and more than 100 Off Broadway theatres<sup>143</sup>, world-renowned sites like the Statue of Liberty and the Empire State Building, teams in

all major sports leagues, historical sites, and a wide range of convention and event space. In addition, New York is a city of many local neighborhoods with restaurants, shopping, festivals, and entertainment.

Tourism to New York rebounded strongly in 2023. A 10-year growth period had ended in 2020 for visitors to New York after tourism peaked in 2019 with 66.6 million visitors.<sup>144</sup> With the onset of the COVID-19 pandemic in early 2020, 47 million fewer visitors arrived. As a result, revenues fell from \$80.3 billion to \$20.2 billion, 89,000 jobs were lost, including 46% of staff in the hotel sector.<sup>145</sup>

Visitor numbers recovered to 62.2 million in 2023, which was 93% of the city’s 2019 visitation levels. The tourism recover led to the industry generating \$75 billion in economic impact, including \$48 billion from direct spending in 2023.<sup>146</sup> Hotel performance was strong in 2023, with an estimated 36.5 million room nights sold, or 92% of 2019 levels. Hotel occupancy was 81.6%, a 10pt increase over 2022 but still 5pts below 2019. However, the average daily rate of \$302 in 2023 was 8.5% above 2022 and 21% higher than 2019 levels.<sup>147</sup> New York City was the highest performing hotel city in the U.S. in the fourth quarter of 2023 in terms of room nights sold.<sup>148</sup>

Almost 10,000 new or renovated hotel rooms opened in New York City in 2022 and 2023. New York City Tourism + Conventions<sup>149</sup> reports that an additional 6,400 rooms will be added in 2024 and 2025.

New York City Tourism + Conventions is forecasting 64.5 million visitors in 2024 and 68.0 million visitors for the first time in 2025 (as shown in Figure 58) with continued strong recovery and growth through to 2030. Together with hotel developments, tourism growth will be assisted by the upgrades to JFK, LGA and EWR, an increase in cultural and recreational attractions including new museums in 2024 and 2025<sup>150</sup>, and the hosting of significant events, including the FIFA World Cup in 2026.

### International Visitors

New York is the largest international tourism destination in the U.S. There were 11.6 million international visitors in 2023 who accounted for nearly half of all visitor spending.<sup>152</sup> International travel has seen mixed results across origin markets, with the Asia Pacific market returning at a slower pace than Europe or other regions, as shown in Figure 59. China, which was the second largest international market in 2019, has seen a particularly slow recovery because flights remain limited by both countries’ governments. The U.S. DoT and China agreed in 2023 to gradually increase capacity and air services between the two countries.<sup>153</sup> International tourism is expected to fully recover in 2024 with growth expected from the key markets and a still-slow recovery of Chinese visitors.

## Business Travel

Business travel was the hardest-hit travel sector during the COVID-19 pandemic<sup>155</sup> and continued to recover at a slower rate in 2023 than the leisure sector<sup>156</sup>, as shown in Figure 60. It accounted for approximately 20% of all visitors to New York in 2023, growing year-on-year by 3 million to 11.6 million.<sup>157</sup> However, the outlook is changing: Global business travel spending is expected to exceed pre-pandemic levels for the first time in 2024<sup>158</sup>, and U.S carriers reported a strong performance for business travel in the first quarter of 2024<sup>159</sup>:

- **Alaska Airlines** reported that revenues from corporate travel matched pre-pandemic levels.
- **United Airlines** announced it had recorded some of the largest numbers of corporate bookings in its history.
- **Delta Air Lines** saw a double-digit year-on-year increase in corporate sales in the first quarter, and it said 90% of its corporate travelers are planning to maintain or increase volumes during the second quarter of 2024.

### Ethnic Community Travel

Ethnic community travel is an important source for visiting friends and relatives as well as business connections and investment. The New York CSA is a major hub for immigration, as the region’s diverse economy attracts a steady flow of new residents from around the world. In 2022, 29.8% of the New York CSA population was foreign born, which equates to 5.8 million people and 12.7% of the total foreign-born population in the U.S.<sup>161</sup> Among the foreign-born population, 30% come from Asia and 14% from Europe. Many of the other top source country markets are in the Caribbean and Latin America, as shown in Table 31.

<sup>160</sup> Source: Office of the New York State Comptroller

<sup>161</sup> Source: U.S. Census Bureau

Table 31: To 10 Birth Countries of Foreign-Born Residents in the New York CSA, 2022<sup>162</sup>

Rank	Country of Birth	Number of New York CSA Residents	Percentage of Total Foreign-Born Population
1	Dominican Republic	612,968	10%
2	China	431,588	7%
3	Mexico	287,829	5%
4	Jamaica	277,042	5%
5	India	234,315	4%
6	Ecuador	189,043	3%

10	Trinidad and Tobago	102,603	2%
	Others	3,244,101	55%
	<b>Total</b>	<b>5,849,869</b>	<b>100%</b>

## Economy

New York has a large and diverse economy. While it has been subject to shocks and downturns in the past, it has shown itself to be historically resilient. The attributes that have made New York successful in the past remain in place, providing a strong long-term outlook for growth.

## Global Economic Outlook

The outlook for the global economy in 2024 is cautiously optimistic. World GDP is projected to grow by 2.7% in 2024.<sup>163</sup> Global inflation is predicted to decline from 6.8% in 2023 to 5.9% in 2024.<sup>164</sup> However, threats of oil prices rising and increased geopolitical tensions could put additional pressure on inflation, push back further interest rate cuts, erode disposable incomes, and reduce consumer spending. Elections are scheduled in numerous countries and territories in 2024, which will collectively affect 75% of the world’s population, adding a level of future uncertainty with economic policies, taxation, international trade relations, and market stability.

Advanced economies are expected to see moderate growth, while emerging markets and developing economies are projected to grow at a slower pace, as shown in Table 32. EU growth is predicted to be 1.2% and China 4.7% in 2024 – subdued rates by historical standards. However, the easing of inflation in the Eurozone and the fiscal support in China mean that both economies are in the midst of economic growth momentum.

United States	3.7%	3.1%	1.9%
Europe	1.8%	3.2%	1.4%

## United States Economic Outlook

As shown in Figure 61, the U.S. continues to be the key player in the global economy. The IMF estimates the country is taking the largest share of global GDP in 2024, at 26.3%, which is 0.2pts above 2023.<sup>167</sup>

<sup>165</sup> Source: Oxford Economics as of May 2024

<sup>167</sup> Source: The International Monetary Fund, April 2024 Outlook

Figure 61: Estimated Share of Global GDP, 2024<sup>168</sup>

The U.S. economy remained resilient in 2023 and outperformed almost all econometric forecasts. After a strong end to 2023, U.S. GDP is forecasted to continue growing by 2.6% in 2024 before moderating to a steady pattern of slower growth in 2025 and growing an average of 1.8% between 2025 and 2028<sup>169</sup>, as shown in Figure 62. All regions of the U.S. are forecast to see medium-term growth.

<sup>168</sup> Source: Oxford Economics as of May 2024

<sup>169</sup> Source: Oxford Economics as of May 2024

Figure 62: U.S. GDP Growth Rate<sup>170</sup>

Growth is underpinned by a strong labor market; on a national basis the employment rate has remained close to 60% for the past two years, which is similar to that experienced in the 10 years prior to the COVID-19 pandemic.<sup>171</sup> U.S. job growth is projected to slow to 0.7% in 2024 followed by slow expansion thereafter.<sup>172</sup>

A stable labor market is also aiding steady growth in salaries and disposable incomes. Economic concerns such as supply chain bottlenecks, labor supply shortages, and oil and agricultural pressures because of Russia’s invasion into Ukraine have all lessened. The supply of labor has improved thanks to immigration. The U.S. Congressional Budget Office estimates that more than three million legal immigrants entered the country in 2023. New immigrants have raised the economy’s supply of workers and allowed the U.S. to generate jobs without accelerating inflation.<sup>173</sup> Inflation has gradually been falling: In March 2024, U.S. inflation stood at 3.4% which was much lower than its 9.1% peak, but not yet at the national target of 2%.<sup>174</sup> Analysts therefore believe that interest rate cuts will take place later in the year – Oxford economics is forecasting September and December 2024 interest rate decreases.<sup>175</sup> Inflation is projected to decrease to 2.3% by 2027.<sup>176</sup>

## GDP and Passenger Growth

The growth in GDP historically correlates with increased air passenger enplanements (as shown in Figure 63), since economic prosperity leads to higher demand for business and leisure travel. Economic downturns lead to decreases in passenger numbers, as witnessed in the 1990 – 1991 recession, the 9/11 attacks, the 2007 – 2008 Global Financial Crisis, and the COVID-19 pandemic. From 1990 to 2010, enplaned passengers in the U.S. increased by 2.3% while real GDP increased by 2.5%. From 2011 to 2019, enplaned passengers increased 3.8% while real GDP grew at 3.1%.<sup>177</sup> The COVID-19 pandemic had a greater initial impact on air passenger numbers than GDP growth rates, with public health concerns, government restrictions, and changes in consumer and business behavior all creating a drop in demand for air travel while the wider economy was supported by government interventions and workplace practice adaptations. Real GDP for the U.S. in 2023 was 6% higher than in 2019, whereas total enplaned passengers were only 1% above their 2019 levels.<sup>178</sup>

During the nine years following the 2007 – 2008 Global Financial Crisis (2010 – 2019), JFK’s passenger enplanements grew by 37.8%, outpacing U.S. enplanement growth of 31.5%. During the COVID-19 pandemic, enplaned passengers at JFK decreased by 54% compared to 2019 levels, which was larger than the decrease in the U.S. of 44.4%. The sharper decline at JFK was caused by its relatively high proportion of international traffic.

While it is always subject to economic cycles, the size and robustness of the U.S. economy have helped buttress the country against major economic downturns. The U.S. annual GDP did not decline in 2000 to 2001, though quarterly decreases of 0.3% and 0.4% (Q4 2000 – Q1 2001 and Q2 2001 – Q3 2001, respectively) happened.<sup>179</sup> JFK’s resulting loss of enplaned passenger traffic was less than that of the U.S., at 1.7% versus 2.7%. Passenger traffic at JFK returned to pre-crisis levels in 2004, compared to 2005 for the U.S.

Since 1945, the average U.S. recession has lasted approximately 11 months.<sup>180</sup> The scale and scope of a recession determines its effect on passenger demand across the country or specific regions. For example, from 2008 to 2009, during the 2007 – 2008 Global Financial Crisis recession, U.S. GDP fell by 2.6%. While the drop led to a 7% decrease in passenger traffic across the U.S. between 2008 and 2009, JFK’s passenger traffic only declined by 3.8%. The smaller drop can be attributed to JFK’s large international route network, meaning passenger traffic is less reliant on U.S. GDP alone. Key country markets from JFK, such as those in Asia and Latin America, experienced a smaller and shorter decrease in GDP compared to the U.S., allowing demand for air travel in those countries to recover quickly. As a region, Asia did not experience a recession – GDP continued to grow throughout 2007 to 2009, driven by strong performance by large economies such as China. Latin American experienced a small decline in GDP in 2009, but it recovered quickly compared to other

<sup>177</sup> Source: GDP - U.S. Bureau of Economic Analysis, Enplanements – U.S. Department of Transportation T-100 data via Airline Data Inc.

<sup>179</sup> Source: US Department of Commerce, Bureau of Economic Analysis

<sup>180</sup> Source: National Bureau of Economic Research, U.S Business Cycle Expansions and Contractions

regions and returned to pre-crisis levels in 2010. As global GDP started to increase again through 2009, JFK passenger numbers returned to pre-crisis levels in 2012, while total U.S. passenger traffic did not recover to pre-recession levels until 2015.

In 2023, JFK’s total enplaned passengers reached 62.5 million, on par with the 62.6 million achieved in 2019. In fact, December 2023 was the first month in which international passenger traffic surpassed totals from the same month in 2019.<sup>181</sup> Continued domestic and international economic growth is likely to support further increases in air passenger enplanements, and while the COVID-19 pandemic posed significant challenges in GDP recovery, the outlook for future travel remains positive.

## New York State Economy

New York State’s economy is the third largest in the U.S. behind California and Texas.<sup>183</sup> New York State has a resilient economy with GDP and employment recovering quickly after each downturn as shown in Figure 64. After the 2007 – 2008 Global Financial Crisis, GDP returned to pre-crisis levels seen in Q1 2007 by Q3 2009 (just over two years). The recent COVID-19 pandemic related downturn created a short, sharp recession, but New York GDP had already exceeded Q4 2019 levels by Q3 2021, or 1.5 years after the crisis began. Following on from recoveries in 2021 and 2022, the state’s economy expanded by 0.8% in 2023 and is forecasted to expand by 1.9% in 2024 and by 1.7% in 2025.<sup>184</sup>

Figure 64: New York State GDP Evolution<sup>185</sup>

## New York CSA Economy

The New York CSA economic trends are broadly similar to those at the state level. However, the New York State economy includes rural and urban contributions whereas the New York CSA is predominantly urban and suburban, with a focus on industries prevalent in metropolitan areas,

<sup>183</sup> Source: U.S. Bureau of Economic Analysis

<sup>184</sup> Source: New York State Division of The Budget, “Comments on U.S. and New York State Economy and Financial Markets – Hugh Johnson”, 28 February 2024

<sup>185</sup> Source: Federal Reserve Bank of St Louis

such as finance, business, and professional services. The New York CSA benefits from having a larger and denser population and several state economies<sup>186</sup> feeding into its overall GDP.

The New York CSA is a dynamic and influential region and has a GDP of over \$2 trillion. It is the largest metro area economy in the U.S. (as shown in Figure 65) and one of the largest regional economies in the world.<sup>187</sup>

The New York CSA’s inherent strengths and resilience have already enabled a rebound from the COVID-19 pandemic. The New York CSA has a stable economic outlook and will benefit from GDP growth from the tech and professional and business services sector as well as continuing to be a place where millions want to live, work, and visit. Its long-standing strengths will ensure it continues to be the most important CSA economically and the leading U.S. economic center for the rest of the decade.

The pandemic officially ended on May 11, 2023, and the New York region has once again demonstrated its economic resilience, rebounding at a similar rate to that after previous economic crises and continuing to be a key driver of the U.S. economy.

## Airline Traffic Forecasts

Key Takeaways	
1	The near-term forecast projects JFK’s passenger volume at 71.2 million in 2028, a CAGR of 2.7% from 2023 to 2028.
2	Growth in 2024 is expected to be limited, largely due to the reduction of more than one million seats by JetBlue from the domestic market, although growth is expected from 2025 and beyond.
3	Long-term unconstrained econometric forecast, performed against projections for U.S. GDP, projects total JFK passengers to reach 114.6 million passengers in 2060, representing a CAGR of 1.7% from 2023 to 2060.
4	Terminal 6 enplaned passenger volume is forecasted to reach 6.4 million passengers in 2060 using a baseline airline combination provided by JMP.

### Bottom-Up (near-term) and Econometric (long-term) Forecast

ASM completed a forecast of annual passenger traffic at JFK for the years 2024 through 2028. Passenger traffic during the initial five years is forecast using a bottom-up approach that provides a detailed projection of JFK passenger traffic on a route-by-route, carrier-by-carrier basis. The process involves analyzing every scheduled route operating at JFK by airline using historic changes to annualized movements, seats per movement, and load factors in addition to the extent of the recover from the COVID-19 pandemic to forecast future annual traffic and capacity. Each airline’s changes in fleet mix, route network recovery and strategy, and source market conditions are applied to each route.

The long-term passenger throughput forecast from 2029 to 2060 is performed on an econometric basis, applying regression analysis to a forecast of GDP growth of the U.S. obtained from Oxford Economics.

The entire forecast period was analyzed on an unconstrained basis and therefore did not take into account any operational, infrastructure, regulatory, or other limitations on passenger traffic or aircraft movements at the airport.

The near-term bottom-up forecast illustrates overall unconstrained passenger growth for JFK from 62.4 million passengers in 2023 to 71.2 million passengers in 2028 for a CAGR of 2.7%. The long-term econometric projection performed on an unconstrained basis shows traffic progression to 114.6 million passengers by 2060, a CAGR of 1.7% between 2023 and 2060.

## Bottom-Up Methodology

As the base year of the bottom-up forecast, the projections for 2024 are based upon the published and anticipated flying program as of April 2024. With the summer season already underway at the time of forecasting, and with good visibility of the anticipated program for the early part of the winter 2024/2025 schedules, the 2024 scheduled movements and capacity are largely fully visible except for any minor schedule and/or operational changes that may occur throughout the season. An anticipated annualized load factor is applied to this planned capacity to provide a projection of passenger traffic.

The historic data, in addition to the base year of the forecast (2024), is used to conservatively forecast movements, average seats per movement, and load factor annually for 2025 through 2028. While some routes may grow in-line with historic trends and changing market conditions, others could remain flat and some decline during the forecast period.

As is normal in the dynamic airline environment, strong routes receive additional capacity through a combination of more frequency, larger aircraft, and/or the lengthening of the seasonal program. Weaker routes lose capacity or are cancelled outright.

JFK's slot limitations are indirectly considered as part of this process, without applying any hard cap or limit, where routes with increasing passenger traffic are geared toward growth by using larger aircraft (upgauging) and or/higher load factors rather than frequency increases.

To determine the forecasted seats per movement, available future schedules were reviewed alongside known and anticipated fleet mix changes for each airline. Airline order books and publicly stated fleet plans were analyzed along with the typical age of the aircraft types being utilized at JFK to determine the balance between aircraft retirements, replacements, and growth during the bottom-up period.<sup>189</sup>

## Fleet Changes

The U.S. carriers are continuing to implement substantial changes to the makeup of their fleets through the retirement of older aircraft types and the delivery of newer variants, including some with new extended-range capabilities. The impact of these changes, such as those outlined in Table 33, is considered throughout the forecast.

Although these older variants are expected to be retired in part during the near-term forecast period, challenges with aircraft delivery schedules, maintenance issues, and shifting demand patterns are changing aircraft retirement plans, and particularly U.S. major airlines Delta and American. JetBlue has a younger fleet, so the impact of retirements is negligible, although future deliveries of the A220 and A321neo have been considered.

---

<sup>189</sup>Source: Aviation Week Fleet Discover and the Centre for Aviation (CAPA) fleet database

Foreign flag airlines were assessed on an individual basis, since a smaller portion of their fleets are applicable to JFK service. For example, the forecast assumes that Emirates will deploy more high-density A380s, Lufthansa will replace its A380s with other aircraft types, and Cathay Pacific will deploy more A350s, in line with their respective aircraft retirement and delivery schedules.

Table 33: Sample Aircraft Variant Replacement<sup>190</sup>

Airline	Pending Retirements		Potential Replacement Candidate		Market(s) Impacted
	Aircraft	Seats	Aircraft	Seats	
Delta Air Lines	A319-100	132	A220-300	130	DTW, AUS
	A320-200	157	B737-10	172	Not scheduled at JFK

	B777-200	273	B787-9	285	EZE, CDG, BCN, MIA, GIG, PHX

### New and Cancelled Routes

The forecast assumes that routes would lose capacity or be cancelled outright if they perform poorly, while unserved routes with sufficient demand could see the introduction of service. Airlines would most likely replace a cancelled route rather than remove the capacity from JFK entirely because the slots remain valuable assets. Therefore, the risk of traffic degradation from the cancellation of weak routes is low. Airlines frequently increase and decrease capacity on their routes as the route’s performance evolves, as reducing capacity on poor-performing routes, increasing capacity on stronger routes, and adding new routes are all normal activities as airline route networks evolve. The JFK routes cancelled and added for the bottom-up forecast are shown in Table 24.

<sup>190</sup> Source: Sabre Market Intelligence, ASM Forecast

### Long-Term Methodology

The highly detailed and granular bottom-up forecast applies during the time when specific network and fleet changes can be reasonably anticipated, and airline network strategies are discernible. Forecasting passenger traffic for more than a few years out requires an approach beyond relying on plans that airlines within a highly dynamic and volatile industry cannot yet see themselves.

Therefore, an econometric regression was used to forecast the longer-term period from 2029 to 2060. The historic relationship between demand and GDP is correlated and tested, and this relationship is used to forecast unconstrained passenger demand based on a GDP predictor. GDP and passenger traffic have historically been closely correlated, so the ASM long-term methodology is a standard approach that is used for long-term airport forecasts across the aviation industry.

While passenger traffic is known to have some correlation to other casual factors, including population size, average airfare, and disposable income, GDP is a reliable univariate predictor of demand for which long-term forecasts are readily available.

Regression analysis of the GDP of the U.S. against historic traffic between 2000 and 2019 inclusive plus 2022 and 2023 in addition to the expected outturn from the bottom-up forecast covering 2024 to 2028 inclusive results in an  $r^2$  value of 0.89. In other words, 89% of the year-on-year changes to passenger throughput at JFK airport can be explained by changes to the GDP of the U.S., with the remaining 11% attributable to other casual factors.

When considering the GDP of other potentially relevant countries or regions, such as Western Europe, for example, there is an increasing disconnect between non-U.S. GDP values and traffic throughput at JFK, as demonstrated in Figure 66 and excluding the pandemic years of 2020 and 2021.

GDP data, both historic and forecasted, was obtained from Oxford Economics.

Figure 66: Relationship Between Historic Traffic and GDP Values<sup>191</sup>

The long-term forecast (2029 – 2060) is unconstrained, meaning no limitations to future growth have been included for slot restrictions, terminal or other maximum capacity, or for any other commercial, technical, or operational reason. Unconstrained forecasts are used to anticipate full passenger demand at an airport. If constraints were applied, the amount of long-term traffic forecasted would likely be lower. Also, no future economic downturns or other shocks are reflected

<sup>191</sup> Source: Traffic – Sabre Market Intelligence, GDP – Oxford Economics

in the GDP forecast. However, over the long-term forecast period from 2029 to 2060, passenger enplanements are forecasted to grow at a CAGR of 1.5%, which is conservatively below JFK's actual 2009 – 2019 CAGR of 3.6%

## Forecast Results

### Near-Term Results

The bottom-up forecast shows limited growth at JFK in 2024 year-on-year, with domestic enplanements expected to decline 2.9% to 28.2 million passengers, while international enplanements are expected to grow 5.7% year-on-year to 35.2 million passengers, resulting in 63.5 million JFK passengers, 1.7% higher than 2023 passengers. The major cause of the decline in domestic traffic in 2024 is the removal of more than one million seats by JetBlue, whose domestic capacity is projected to be down 12% from 2023 according to current schedules. Several major markets have been suspended or cancelled by JetBlue, including Dallas/Ft. Worth, Minneapolis, and Portland (Oregon) as the carrier consolidates its activity at JFK onto the most profitable routes only, reducing activity on marginal or unprofitable routes and/or those with particularly strong competitive pressures.

However, from 2025 and beyond, JFK passenger traffic is expected to return to a steadier growth trajectory, albeit with greater emphasis on international traffic for growth, as shown in Figure 67 and Table 35. By 2028, the end of the bottom-up period, domestic traffic is projected to grow to 31.2 million passengers, equivalent to a CAGR of 1.4% in the 2023 to 2028 period. International traffic is projected to grow to 40.0 million passengers by 2029, representing a CAGR of 3.7% from 2023 to 2028. Total traffic is therefore projected to reach 71.2 million passengers by 2028, representing a CAGR of 2.7% between 2023 and 2028.

<sup>192</sup> Source: Historic – Sabre Market Intelligence, Projected – ASM Forecast

Figure 68: JFK Passenger, Capacity, and Load Factor Progression<sup>193</sup>

Although total traffic returned to pre-pandemic levels in 2023, because of the loss of growth during this time, total traffic is not expected to return to the pre-pandemic trendline. This is representative of normal post-shock trends, as it is well documented that following previous shocks to the aviation industry (such as the 9/11 attacks and the 2007 – 2008 Global Financial Crisis), there was a resulting loss of growth of traffic that did not return to the pre-shock trend. Figure 69 illustrates how following the 2007 – 2008 Global Financial Crisis, passenger traffic at JFK did not return to the pre-shock trendline, and similarly how the near-term forecasted passenger figures for JFK are also not expected to return to the pre-pandemic trendline.

<sup>193</sup> Source: Actual – Sabre Market Intelligence, Forecast – ASM Forecast

Figure 69: Pre- and Post-Shock Traffic Changes<sup>194</sup>

Compared to the previous forecast performed in 2021, the recovery of traffic following the COVID-19 pandemic has been quicker than anticipated, as shown in Table 36 and Figure 70. The 2021 forecast was produced while significant uncertainty remained about vaccine availability, border reopening, travel restrictions and testing requirements, and international economic recovery. Although the initial recovery happened at an accelerated rate, this rate of annual growth is expected to decelerate into 2024, largely as a result of JetBlue’s capacity reduction as well as other factors.

Table 36: Comparison of 2021 and 2024 Passenger Traffic Forecasts

Year	Passengers (000s)			% Change
	2021 Forecast	2024 Forecast	Difference	
2022	51,254	55,175	3,921	7.7%
2023	58,529	62,432	3,903	6.7%
2024	62,268	63,471	1,203	1.9%
2025	64,493	65,610	1,117	1.7%
2026	66,082	67,640	1,558	2.4%
2027	67,389	69,542	2,153	3.2%
2028	68,505	71,223	2,718	4.0%

<sup>194</sup> Source: Historic Traffic – Sabre Market Intelligence, Forecast – ASM Forecast

Figure 70: Near-Term Passenger Forecast Passenger Traffic Comparison<sup>195</sup>

The near-term forecast for JFK movements is shown in Table 37 and Figure 71. Compared to the prior forecast produced in 2021, the overall number of movements projected in the 2024 forecast is expected to be relatively static, with passenger growth coming from larger aircraft and more efficient use of seat capacity through higher load factors. However, there is still expected to be some marginal growth in the overall number of aircraft movements in line with historic growth rates on an unconstrained basis and representing an overall growth rate from 2023 to 2060 of 18.8% with a corresponding CAGR of 0.5% in this period.

Table 37: 2024 Near-Term Forecast Results, Aircraft Movements

	2023	2024	2025	2026	2027	2028

Figure 71: JFK Movements Forecast, Historic and Projected<sup>196</sup>

Figure 72 illustrates the nature of the growth between passengers, capacity, and movements, Except for the base year of 2024, passengers are expected to grow at a stronger rate year-on-year compared to capacity and movements. In 2024, passenger growth is not expected to keep pace with capacity growth, as some corresponding passenger growth is expected to materialize in 2025 instead.

<sup>196</sup> Source: Historic – Sabre Market Intelligence, Projected – ASM Forecast

Figure 72: Near-Term Forecast Year-on-Year Growth

### Long-Term Results

The long-term forecast projects JFK reaching 74.1 million passengers in 2030, growing to 114.6 million passengers in 2060, as shown in Figure 73 and Table 38.

Figure 73: JFK Long-Term Passenger Forecast Results<sup>197</sup>

Table 38: JFK Long-Term Unconstrained Passenger Forecast Results (000s)

	2023	2024	2030	2040	2050	2060
Domestic	29,095	28,246	32,154	36,530	40,409	43,455
International	33,337	35,224	41,922	51,499	61,449	71,121
Total	62,432	63,471	74,075	88,029	101,858	114,576

As previously described, the econometric nature of the long-term forecast means that no specific operational constraints are considered and that the future growth in demand for travel to/from JFK will continue to have the same relationship with GDP as it has historically. Despite the unconstrained nature of the forecast, the CAGR of JFK’s passenger traffic between 2019 and 2060 is 1.5%, well below the historical rate (1991 – 2019) of 3.5%, which includes the impact of past events such as the 9/11 attacks and 2007 – 2008 Global Financial Crisis. The additional passenger demand will be partially satisfied with more use of existing aircraft movement capacity through:

- Larger aircraft:** New aircraft entering airline fleets are larger than the previous generation of aircraft performing the same missions. The increasing size reflects growing global passenger demand, global airport capacity constraints, and better economic efficiencies. The major aircraft manufacturers have indicated that increasing industry costs, further market growth, and technological improvements will all continue to drive the upgauging trend for the foreseeable future. Between 2009 and 2019, the average seats per movement at JFK increased by 22 from 153 to 175 for a CAGR of 1.4%. Although the COVID-19

<sup>197</sup> Source: Historic – Sabre Market Intelligence, Forecast – ASM Forecast

pandemic has resulted in a reduction in average aircraft size, by 2025 the average seats per movement is expected to resume growing to 178. The average aircraft capacity is projected to continue increasing in line with international movement growth, particularly among widebody aircraft. The trend is expected to persist over the long term as airlines optimize fleet size against limited slot availability at JFK and other major global airports.

- **Higher load factors:** The average annual load factor at JFK increased from 73% to 82% between 2009 and 2019. Although the COVID-19 pandemic brought on lower load factors, in 2023 the average load factor returned to 82%. Consequently, in 2023, 13.5 million seats still arrived at or departed from JFK unfilled. As airlines face increasing operating and cost efficiencies, the improving technology used to sell seats, optimize revenue, and manage inventory will result in an overall decrease in the number of unoccupied seats with a corresponding improvement in load factor. It is projected that the average load factors achieved for movements into and out of JFK will gradually increase over the forecast period.

It was previously discussed how following a shock to the industry, traffic levels do not typically return to the pre-shock trend. This phenomenon can be observed throughout the long-term duration of this forecast, where traffic is expected to return to a broadly similar rate of annual growth, albeit from a lower starting point, and will not return to the pre-pandemic trendline.

The projected deviation from the pre-pandemic trend widens as time progresses. This is initially caused by the compounding impact of the loss of growth (i.e. the loss of “growth of the growth” over time) and secondly as a result of the projected slowdown in the GDP growth rate as forecasted by Oxford Economics, which is the casual factor driving the long-term projection, causing this deceleration of JFK passenger traffic growth.

Compared to the forecast produced in 2021, the earlier 15 to 20 years of the updated long-term forecast suggest an increased outturn in passenger traffic, largely driven by the increased baseline based on which the econometric projection is performed. However, the rate of growth in the later years of the forecast is expected to slow down compared to the 2021 forecast, resulting in a “crossing over” of the two trajectories in 2046 when compared, as shown in Figure 74. The driver of this change is the downgrading of the economic outlook as per the Oxford Economics forecast used to perform the econometric regression, which typical loss between 0.4pts and 0.7pts of growth per year. Figure 75 and Figure 76 illustrate the changes to this GDP projection and trajectory, which is the cause of the change to the trajectory of the traffic forecast.

Figure 74: Forecast JFK Passengers Compared to 2021 Forecast

Figure 75: Changes to Oxford Economics GDP Forecast

Figure 76: Oxford Economics Year-on-Year GDP Forecast Growth Rate

Figure 77 illustrates the indicative capacity and load factor required to achieve the projected long-term passenger enplanement throughput. It demonstrates steady improvement to load factor and capacity through the increases to movements and average seats to movement. Appendix B shows the detailed indicative extrapolation. While not itself a forecast, the movements, load factor, and seats per movement projections are indicative of the levels that would be required to achieve the forecasted passenger throughput.

Although JFK has constraints relating to slot availability and the number of possible aircraft movements in any period of time, the number of aircraft movements can still continue to grow via:

- Increased use of existing slots:** Airlines must maintain 80% usage of their slots to keep them. In 2019, airlines flew approximately 85.5% of the available aircraft movement slots. In 2024, airlines are utilizing approximately 81.0% of their slots.<sup>198</sup> Slot usage is lower because of the waiver currently in place. As passenger demand grows, airlines add frequency, extend the operating season on routes, and add new markets. Without additional slots to acquire, the growth in flights would be accomplished by operating a higher percentage of the slots they already have.
- Additional flights outside of slot-controlled hours:** JFK’s slot control rules are in effect for 17 hours each day. In 2019, 9.7% of JFK’s aircraft movements were scheduled outside of the slot-controlled hours, primarily to Asia, Central America, South America, and Florida. In 2024, 8.1% of aircraft movements are scheduled outside of slot-controlled hours.<sup>199</sup> The

<sup>198</sup> Source: Airline schedules via Airline Data Inc

<sup>199</sup> Source: Airline schedules via Airline Data Inc.

decline from 2019 is attributable to airlines using non-slot controlled hours not yet returning to JFK (primarily from Asia) and the slot waiver putting less pressure on operations in slot-controlled hours. As passenger demand grows, airlines will add movements outside slot-controlled hours either because slots are not available or the available gaps in their JFK schedules are during these hours (for example, to meet a connecting bank at their hubs).

Figure 77: Indicative Progression of Capacity and Load Factor<sup>200</sup>

## Terminal 6 Forecast

The passenger traffic forecasted to utilize Terminal 6 was produced from a list of airlines provided by JMP. The bottom-up forecast was used to determine each airline’s traffic through 2028. From 2029 through 2060, the econometric growth rate for all of JFK was applied to each airline individually. The JFK-wide growth rate was used because forecasting individual airline growth rates over the long-term is not possible while remaining consistent with the passenger enplanement totals for the airport as a whole.

JetBlue will only be occupying a single gate in Terminal 6, which creates a limit on the number of flights and seats that can operate. Its forecast reflected JetBlue’s typical five daily flights per gate, 172 average seats per departure, and 82% annual load factor. Between 2026 and 2030, JetBlue’s load factor is assumed to gradually increase to 87% and then remain steady through the end of the

<sup>200</sup> Source: Actual – Sabre Market Intelligence, Forecast – ASM Forecast

forecast period. Starting in 2031, JetBlue’s average seats per departure is increased by one seat every three years.<sup>201</sup>

Terminal 6 is forecasted to have 6.4 million passenger enplanements in 2060, as shown in Figure 78 and Table 39. Between 2025 and 2060, enplaned passenger traffic is projected to grow 61.1% for a CAGR of 1.4%. However, even in 2060 passenger volumes would remain below the peak operating capacity of 8.5 million. Terminal 6 passenger enplanements for each year of the forecast are shown in Appendix C.

Figure 78: Terminal 6 Enplaned Passenger Forecast

Table 39: Terminal 6 Enplaned Passenger Forecast (000s)

	2025	2030	2035	2040	2045	2050	2055	2060
T6 Airline Combination	3,970	4,231	4,601	4,976	5,349	5,715	6,065	6,395

Additional combinations of airlines were forecasted to analyze the sensitivity of potential airline combinations resulting in more (high case) or fewer (low case) passenger enplanements in Terminal 6. The high and low case airline combinations were provided by JMP and forecasted using the same methodology as the baseline case.

<sup>201</sup> 2031 was selected because in July 2024 the airline announced a deferral of its larger Airbus A321 aircraft until 2030.

Based on the JMP-provided airline combinations, Terminal 6 is expected to generate between 6.0 million and 6.6 million annual passengers in 2060, as shown in Figure 79 and Table 40. The Baseline Case is expected to generate 185.7 million enplaned passengers between 2025 and 2060 while the High Case and Low Case would generate 189.7 million and 175.2 million enplaned passengers respectively.

Figure 79: Terminal 6 Airline Combination Forecast

Table 40: Airline Combination Enplaned Passenger Forecast (000s)

	2025	2030	2035	2040	2045	2050	2055	2060	2025-2060 CAGR

## 1.0 Executive Summary

### 1.1 INTRODUCTION

The Port Authority of New York and New Jersey (the “Port Authority”) and JFK Millennium Partners (the “Developer” or “Lessee”) have entered into a lease (the “Lease”) for the design, construction, financing, operations and maintenance of the redevelopment of Terminals 6 and 7 at John F. Kennedy International Airport (“JFK Airport”), in New York City (the “Project”). The Project achieved Financial Close on November 17, 2022.

Vantage Group (“Vantage”), American Triple I Partners (“ATI”), RXR (“RXR”), and JetBlue Airways Corporation (“JetBlue”) are the equity sponsors of JFK Millennium Partners Holdings, LLC, which owns 100% of JFK Millennium Partners, LLC (“JMP” or the “Lessee”). The Lessee is a special purpose vehicle entity through which the Project will be designed, built, financed, operated and maintained between Financial Close and December 30, 2060 (the “Term”).

The Project is currently in construction. The Lessee has engaged Hunt Construction Group, Inc. (the “Design-Builder”) for the design and construction of the Project under the Design-Build Agreement (“DBA”). Please refer to Section 1.5 of this report for an overview of key risk transfer elements under the DBA.

BTY US, LLC (“BTY”) is the Lenders’ Technical Advisor (“LTA”) on the Project. The purpose of this report is to provide an independent review and evaluation of JMP’s approach to the Project, including technical solutions and contractual arrangements on behalf of the Lenders. Key areas reviewed include the Project structure and risk transfer, site conditions, permitting, design and construction approach, cost, schedule, operations, maintenance and lifecycle. Section 2 includes an overview of key findings, with further detail provided throughout the report.

### 1.2 KEY INPUTS

Below are the key project inputs:

Phase 1 Terminal Area	877,969 sf
Phase 2 Terminal Area	322,031 sf
Total Project Area	1,200,000 sf
Financial Close	November 17, 2022
Scheduled Phase 1 Completion Date	December 4, 2025
Phase 1 Date of Beneficial Occupancy (“DBO”)	February 10, 2026
Scheduled Completion Date	February 23, 2028
Phase 2 DBO	April 19, 2028
Construction Schedule ( <i>Financial Close to Phase 2 DBO</i> )	66 months

Overall Project Cost	\$2.79B	
Design-Builder Guaranteed Maximum Price	\$2.46B	\$2,052/sf
Lessee Costs	\$331M	
Term <i>(Financial Close to End of Term)</i>	38 years	
End of Term	December 30, 2060	
Annual Operations Cost Model T6 – Phase 1 (844,636sf)	\$58,250,688	\$70/sf/year
Annual Operations Cost Model T6 – Phase 2, Complete (1,200,000sf)	\$75,188,066	\$65/sf/year
Operator Mobilization Amount	\$2,400,000	
Total Lifecycle Cost Model <i>(over term)</i>	\$1,075,945,174	\$26/sf/year

### 1.3 SECURITY PACKAGE SUMMARY

The security packages provided by the Design-Builder and Manager are as follows:

	Design Builder	Manager
Parent Company Guarantee (“PCG”)	Provided by AECOM, a Delaware corporation, in amount equal to \$500M	Provided by Vantage Airport Group (U.S.) Ltd.
Limit of Liability	35% of the GMP, subject to typical exclusions	Prior to Substantial Completion: 75% of the Management Fee payable in a Calendar Year  Following Substantial Completion: 100% of the Management Fee payable in a Calendar Year
Performance and Payment Bond	\$500M	
Liquid Security / Letter of Credit	Liquid security equal to 10% of the GMP	
Cash Retention	10% retention from each monthly payment to the Design-Builder until the DB D&C Work is 50% complete, which will be released after Substantial Completion	

	Design Builder	Manager
Bonds, Subcontractor Default Insurance and Assignment of Subcontracts	The Design-Builder requires all subcontractors to post payment and performance bonds as permitted by the Port Authority, Lessee and the Lenders. As an alternative to payment and performance bonds, the Lessee may also implement the Design-Builder’s subcontractor default insurance (“SDI”) program to cover certain subcontractors as approved by the Port Authority or Lenders. The Lessee also has the right to take assignment of subcontracts upon termination of the Design-Build Agreement	
Liquidated Damages (Design-Builder to Lessee and includes Liquidated Damages payable from the Lessee to the Port Authority)	<ul style="list-style-type: none"> <li>• \$375,000/day for a delay to Substantial Completion of Phase 1</li> <li>• \$330,000/day for a delay to Substantial Completion of Phase 2</li> <li>• Liquidated Damages are capped at \$232M</li> </ul>	
Lifecycle Tests	<ul style="list-style-type: none"> <li>• N/A</li> </ul>	Major Maintenance Reserve look-forward funding mechanism equal to 100% / 66% / 33% of the lifecycle costs over a rolling 3-year period

**1.4 KEY PARTIES**

Entity	Party	Responsibilities
The Port Authority	The Port Authority of New York and New Jersey	Governmental authority as Lessor
Lessee	JFK Millennium Partners, LLC	Design, build, finance, operate and maintain
HoldCo	JFK Millennium Partners Holdings, LLC	Owens 100% of the Lessee
HoldCo Equity	45% Vantage Airport Group 30% American Triple I Partners 20% RXR 5% JetBlue Airways Corporation	Provide equity to HoldCo
Design-Builder	Hunt Construction Group, Inc.	Design and construction

Entity	Party	Responsibilities
Design-Builder Guarantor	AECOM, a Delaware corporation	Guarantee the obligations of the Design-Builder
Manager	Vantage Airport Group (JFK) Ltd.	Facilities management and lifecycle over the Operational Term
Manager Guarantor	Vantage Airport Group (US) Ltd.	

## 1.5 SUMMARY OF KEY CONTRACTS

Contract	Intent
Lease	Contract between the Port Authority of New York and New Jersey and the Lessee detailing the acceptance of the design, build, finance, operation and maintenance responsibilities with respect to Terminals 6 and 7 by the Lessee, and responsibilities retained by the Port Authority of New York and New Jersey.
Design-Build Agreement	The DBA is a guaranteed maximum price (“GMP”), date certain contract between the Lessee and the Design-Builder which constitutes a drop down of certain Lessee responsibilities for the D&C Work, which make up the “DB D&C Work.” The Project Definition Document (“PDD”) describes certain carveouts from the Design-Builder’s scope which are retained by the Lessee, including, without limitation, that the Lessee is responsible for the cost and design risk of the Fit-Out Allowance scope between Financial Close and the time the Fit-Out Allowance scope is fully procured. Refer to Section 8.2 and 8.3 for details. The DB D&C Work excludes the tenant and concession fit-outs, artwork and advertising installations which will be performed by third party Separate Contractors at the cost of the tenants.
Management Services Agreement (“MSA”)	Agreement between the Lessee and Manager under which the Manager will provide the Services for the duration of the Term. The Services include the management of the D&C Work, operational readiness and transition services and management of contracted third-party services, terminal leasing and terminal operations. The Lessee will retain the responsibility for O&M and lifecycle cost and will pay the Manager based on Annual Services Budgets prepared by the Manager each year. Once an Annual Service Budget is agreed, the Manager will not be permitted to make expenditures in excess of the budgeted amount.
Construction Coordination Agreement (“CCA”)	Agreement between the Lessee and Port Authority outlining the Lessee’s responsibility for coordinating the work with the Other Redevelopment Entities performing work in the central terminal area, which consist of JFK NTO LLC (the developer for the Terminal 1 redevelopment), JFK International Air Terminal LLC (the operator of Terminal 4) and the Design-Builders retained by the Port Authority to construct Central Substation 2 and the roadway network. The Lessee has transferred its responsibilities under the CCA for all costs known at the time the GMP was tendered to the Design-Builder via the DBA.

Contract	Intent
Lending Agreements	Agreements between the Lessee, the Lenders and certain other parties detailing financing terms, including (without limitation) a Collateral Agency and Accounts Agreement, a Common Terms Agreement and a Credit Agreement
Anchor Tenant Agreement and Sublease	Agreement between the Lessee and JetBlue detailing the terms of JetBlue's sublease at Terminal 6

## 1.6 DEFINITIONS

In this report, capitalized terms have the same meaning as ascribed to them in the Lease, DBA, or Management Services Agreement, as determined by the context of the section being read.

## 2.0 Risk Summary

The general technical aspects presently known have been assessed against experience of P3 Projects of similar type, as well as generally considered market positions.

The status rating for the following table should be interpreted as follows:

Draft Report	Final Report	
Project aspect that requires further assessment, information or mitigation prior to the Final Report. A red item indicates points to be considered with substantial Project impact.	Project aspect with a red rating should be considered by the creditor as a significantly higher than expected risk profile that could have significant impact on the Project from a technical perspective.	R
Project aspect that requires further assessment, information or mitigation prior to the Final Report, but is not anticipated to have significant Project impact.	Project aspect with an amber rating should be noted by the Creditor as a higher than expected risk profile but should not have significant impact on the Project from a technical perspective.	A
Project aspect that has an appropriate risk profile and therefore appropriate from a technical perspective.	Project aspect with a green rating is considered typical or an appropriate Project risk or suitable full technical mitigation has been received to ensure minimal technical Project effects.	G

We note that some items have not been assigned a risk rating of green, amber or red. The risk assessment of such items will be completed following the receipt and review of all necessary and relevant information.

Report Ref	Item	Summary	
3.4	Sustainability Requirements	<ul style="list-style-type: none"> <li>The Lease and RPWs have requirements to achieve Leadership in Energy &amp; Environmental Design (“LEED”)-NC Silver (50 points), Envision Gold v3 (40%) and SITES certification (70 credits)</li> <li>It is the intention to pursue Gold certification across all three sustainability frameworks</li> <li>Most of the Lessee’s risk related to the achievement of LEED Silver, Envision Gold and SITES Certification is transferred to Design-Builder</li> <li>We note that the Design-Builder’s draft targeted LEED Scorecard indicates that 55 points are achievable and 40 points are probable/maybe, which puts the Design-Builder above the 50 points required for LEED Silver</li> <li>We note the Design-Builder’s draft targeted Envision scorecard indicates a score of 43%, which puts the Design-Builder above the 40% threshold required for Envision Gold</li> <li>We note the Design Builder’s draft targeted SITES scorecard indicates that 83 credits are achievable and 32 credits are probable/maybe, which puts the Design-Builder above the 70 credits required for “SITES Certified” certification level</li> <li>BTY has reviewed the Sustainability Plan and notes that the pursuit of LEED Silver, Envision (Gold) and SITES certifications exceed the Port Authority Sustainable Building and Infrastructure Guidelines</li> </ul>	G
3.6	Design Solution Overview	<ul style="list-style-type: none"> <li>Most of the Lessee’s risk related to design is transferred to Design-Builder</li> <li>The design solution is reasonable</li> <li>There are no new or unproven technologies/techniques to be used</li> </ul>	G
3.7	Design Review Procedure	<ul style="list-style-type: none"> <li>The design is well advanced, and the Project is largely de-risked from a design perspective</li> <li>We understand that the Port Authority has generally complied with its required review times</li> <li>The Lessee and Design-Builder have effectively managed the Executive Design Review Committee (“EDRC”) and Design Review Working Committee (“DRWC”) process. There are only four packages remaining that are subject to the EDRC and DRWC reviews (advertising, wayfinding, branding and digital media displays)</li> <li>We understand that there are currently no concerns with design progress affecting the Design-Builder’s ability to progress the work on site. The Design-Builder is able to progress work for packages that are disapproved by receiving conditional approval from the Port Authority for specific scopes of work. The Lessee and Design-Builder is proactively managing this process</li> </ul>	G

Report Ref	Item	Summary	
4	Consortium	<ul style="list-style-type: none"> <li>• The major parties’ substantial experience in air transportation is testament of their abilities to successfully complete large and complex aviation projects</li> <li>• The experienced equity partners should have no issues collaboratively carrying out the responsibilities of the Lessee</li> <li>• The Design-Builder is well established in the aviation industry with over \$4.5B of aviation work and \$9B of design-build projects completed nationwide. Hunt’s extensive experience planning and managing complex logistics, security challenges and multi-level coordination on large infrastructure projects across the United States will be leveraged on the Project</li> <li>• In Vantage, the consortium brings award winning airport management expertise to the table. Their experience not only in airport operations, but managing operations during complex construction phasing and transitioning to a private facility, only enhances the overall consortium’s strength</li> <li>• Vantage will leverage its experience working on airports within the New York area. In 2016, Vantage led the LaGuardia Gateway Partners consortium on the LaGuardia Airport Terminal B redevelopment project to financial close and lease commencement. The project achieved Final Acceptance in 2023 and all of the new facilities are now open and operational</li> <li>• RXR brings significant local New York experience in its role as co-developer and equity investor in the Lessee, including experience with the Port Authority where senior RXR executives have previously held leadership positions. The company manages 71 commercial real estate properties and investments with an aggregate gross asset value of approximately \$20.5 billion</li> <li>• ATI has experience working with various state and local entities for financing their infrastructure projects and the firm is minority-owned and minority-managed with a 100% ethnic minority ownership, enabling responses to public and/or private sector mandates or incentives</li> </ul>	G

Report Ref	Item	Summary	
5	Regulatory Approvals	<ul style="list-style-type: none"> <li>The Lessee’s risk related to regulatory approvals for the DB D&amp;C Work, including its obligations related to obtaining the Governmental Approvals for the construction work, is transferred to the Design-Builder</li> <li>There is no re-zoning required for the Project</li> <li>The PA has received the Finding of No Significant Impact (“FONSI”) / Record of Decision (“ROD”) under the National Environmental Policy Act (“NEPA”) process, which is the key environmental permit required for the Project</li> <li>The Detailed Baseline Schedule includes a detailed breakdown and sequencing of the Tenant Alteration Applications (“TAA’s”) required by the Port Authority. These are the equivalent of the building permits that we would see on other projects</li> <li>The Design-Builder is getting TAA packages conditionally approved by the Port Authority in order to avoid delays in the construction schedule</li> </ul>	G
6	Site Conditions	<ul style="list-style-type: none"> <li>The Project has been partially derisked with respect to geotechnical and environmental site conditions. The remaining exposure is limited to the Phase 2 work at the existing Terminal 7 site. The Design-Builder did not encounter significant challenges related to geotechnical or environmental site conditions during the Phase 1 foundation work</li> <li>The Lessee’s risk related to site conditions is being managed through a series of budgets and contingencies, as well as certain risk transfer to the Design-Builder with respect to conditions that are known or should have been known based upon the standard of care</li> <li>The Lease includes a Delay Event for the discovery of any Unknown Condition that adversely affects the D&amp;C Work</li> <li>The Lessee is responsible for the Remediation of all Hazardous Substances encountered within the Excavation Boundary, and of all Releases of Hazardous Substances on the Premises occurring after the Commencement Date. With regard to Hazardous Substances encountered outside of the Excavation Boundary, the Lessee is only required to remediate if required by a Governmental Authority</li> <li>The Lessee is responsible for all necessary operations, maintenance and modifications related to the existing Tanks and Utilities</li> <li>Overall, the Final Environmental Assessment (“EA”) has determined that the Project will not result in significant impacts to the environmental resources, and that mitigation measures in addition to those already included in the Project plan are not required</li> <li>British Airways provided the Lessee with a \$14M settlement for the Remediation and Closure Costs for the Terminal 7 Jet Fuel Hydrant System</li> <li>The Lessee contemplates using three above ground storage tanks currently in place at Terminal 7 and will remediate any releases from those tanks upon shutdown of Terminal 7 operations. Any required remediation will be funded out of the British Airways settlement</li> </ul>	G

Report Ref	Item	Summary	
7	Project Schedule	<ul style="list-style-type: none"> <li>The Lessee’s risk related to the Project Schedule is transferred to the Design-Builder under the DBA with the exception of delays due to Material Developer Changes and certain Unavoidable Delays</li> <li>The schedule reporting requirements are more stringent than we typically see on similar P3 projects, which shows a high degree of attention being paid to schedule. We are not aware of any issues with the Design-Builder complying with the schedule reporting requirements</li> <li>There have been no adjustments to the contractual milestone dates since Financial Close</li> <li>BTY is of the opinion that the overall duration of the schedule is reasonable, but the roadway activities no longer contain as much float to recover future delays as the baseline schedule due to the resequencing and mitigation of delay that has already taken place</li> <li>The Lessee submitted a Compensation and Delay Event notice to the Port Authority for the delays to the roadway work caused by coordination challenges with the Roadways DB. The Roadways DB is the contractor engaged by the Port Authority for the design and construction of the Roadway Network in the Central Terminal Area (“CTA”)</li> <li>We note that with the exception of overtime work to complete the terminal structural steel, the remaining terminal schedule is based on standard working day and shift assumptions, which will allow for future acceleration if needed to recover potential delays, including the current forecasted delay to the contractual milestones</li> </ul>	G
8	Project Costs	<ul style="list-style-type: none"> <li>We consider the Design-Builder’s methodology in developing the Guaranteed Maximum Price for the Project to be reasonable and consistent with industry standards</li> <li>We have reviewed the construction price and supporting details, including the unit rates used in its preparation, and consider it to be reasonable and appropriate for this Project</li> <li>Procurement has advanced significantly since Financial Close, which has derisked the Project from a cost perspective. As of August 31, 2024, the Lessee and Design-Builder have awarded 98% of Category 2 Work (design and engineering) and 85% of Category 3 Work (direct construction costs)</li> <li>We have received a detailed breakdown of the Lessee’s cost build up for each line item and we are satisfied that the budget reflects the scope of work to be performed by the Lessee</li> <li>We consider the overall contingencies to be appropriate for the Project</li> </ul>	G

Report Ref	Item	Summary	
8.7	Design-Builder Replacement Scenarios	<ul style="list-style-type: none"> <li>We note the total premiums identified in the replacement scenarios include delay liquidated damages for approximately 16 to 24 weeks of delay in total, which equates to <math>\pm 2.3</math> to 4.1% of the Construction Price</li> <li>The likelihood of both the Design-Builder and Parent Company becoming insolvent is in our opinion, extremely low, and represents a worst-case scenario given their strength</li> <li>The Design-Builder's 35% liability cap is adequate to cover the total replacement premium and the liquid security is adequate to cover the short-term replacement premiums calculated in each of our five Design-Builder replacement scenarios outlined in this section</li> </ul>	G
9	Operations and Maintenance	<ul style="list-style-type: none"> <li>The Lessee transferred the responsibility for performance of the Operations and Maintenance Work to the Manager under the MSA but has retained the risk for the O&amp;M costs. The Lessee will pay the Manager based on Annual Services Budgets prepared by the Manager each year. Once an Annual Service Budget is agreed, the Manager will not be permitted to make expenditures in excess of the budgeted amount unless approved by the Lessee</li> <li>The Manager has a structured organization and performance plan that is consistent with anticipated operations procedures and is overall in a position to mitigate risks and unknown factors</li> <li>Vantage has a long track record of successfully managing airports, including its experience at LaGuardia Terminal B in the New York market</li> <li>Facilities Management requirements are typical of the current social infrastructure P3 market. The requirements are reasonable and achievable for an experienced Facility Manager, such as the Manager</li> <li>The Manager has developed the FM Cost Model using a combination of quotes from subcontractors, in-house historical data and existing contracts for Terminal 7 and the LaGuardia Terminal B project. The Manager's methodology in developing the FM Cost Model is consistent with their approach on other US P3 projects and considered appropriate</li> <li>The FM Cost Model has been developed using the Manager's ongoing experience at Terminal 7. The Manager has hired key staff with extensive facilities management experience at Terminal 7 and JFK Airport more broadly</li> <li>Based on our review of the FM Cost Model, including the methodology used in its development, we consider the FM Cost Model to be reasonable for a project of this size and complexity, with this combination of services and to be low risk</li> </ul>	G

Report Ref	Item	Summary	
10	Lifecycle	<ul style="list-style-type: none"> <li>• The Lessee has transferred the responsibility for ongoing capital and Lifecycle planning assistance and coordination to the Manager under the MSA but retains the Lifecycle cost risk. The Lessee will pay the Manager based on Annual Services Budgets prepared by the Manager each year. Once an Annual Service Budget is agreed, the Manager will not be permitted to make expenditures in excess of the budgeted amount</li> <li>• Lifecycle requirements are reasonable and achievable for an experienced Manager, such as Vantage</li> <li>• Handback requirements are typical of social infrastructure P3 projects</li> <li>• There remain some peaks within the lifecycle profile due to the Manager deliberately aligning certain asset replacements to achieve economies of scale and minimize disruptions. The Manager will likely smooth these activities out over 2-3 years in reality, which we consider reasonable</li> <li>• Manager’s extensive experience, client list and company resource on a local and global basis provides the LTA with the evidentiary detail to be reassured that the Manager will have no issue in meeting the designated requirements</li> <li>• We have reviewed the Lifecycle Cost Model and discussed the delivery strategy with the Manager to understand their approach to carrying out the FM and Lifecycle services. The Manager has developed the Lifecycle Cost Model using the Design-Builder’s Construction Price, in-house historical data and experience</li> <li>• Based on our review of the Lifecycle Cost Model, including the methodology used in its development and the factors noted above, we consider the Lifecycle Cost Model to be reasonable for a project of this size and complexity, and to be low risk</li> <li>• We consider that the Handback Plan is satisfactory and responds well to the Handback Requirements as stipulated within the Lease</li> </ul>	G

Report Ref	Item	Summary	
11	Payment Mechanism	<ul style="list-style-type: none"> <li>The Lessee will be responsible for making Milestone Payments to the Port Authority at defined points during construction for specific scopes of work to be provided by the Port Authority. These costs are included in the Project Management category of Lessee Costs, which are described in Section 8.4 of this report</li> <li>The Lessee will be responsible for making rental payments to the Port Authority during the Term. These costs are held separately in the Financial Model outside of the Lessee Costs described in Section 8.4 of this report</li> <li>The Lease includes Incentive KPIs to incentivize the Manager’s performance of the O&amp;M Work. The Lessee’s risk related to the incentive and deduction regime is transferred to the Manager under the MSA</li> <li>The Manager does not anticipate incurring either deductions or incentives related to the ACI-ASQ Overall Satisfaction Score based on Vantage’s experience on its other airport projects</li> <li>The deduction thresholds related to the Systems Availability KPIs are considered challenging and above industry standard and there is a likelihood that deductions will be incurred for conveyance systems, baggage systems and passenger loading bridges. We note that the risk exposure for these deductions is capped at \$490,000/year and the Manager has included a \$500,000/year contingency in its annual budget (indexed to inflation) to address this risk. Therefore, we consider the risk to be adequately mitigated</li> </ul>	G
12	Equator Principles	<ul style="list-style-type: none"> <li>The appropriate categorization for the Project is Category C where the project has “minimal or no social or environmental impacts” as defined by the IFC guidelines which categorizes the Project as having minimal, or no, social or environmental impacts</li> </ul>	G

## 3.0 Project Description

### 3.1 INTRODUCTION

The JFK Terminal 6 and 7 Replacement Project entails the design, build, finance, operation and maintenance of terminal facilities over the Lease Term for Terminal 6 and Terminal 7 sites at the John F. Kennedy International Airport, located in Queens, New York. The new terminal facilities will need to provide space for the following:

- Ground Transportation Center, which will link terminals, garages, AirTrain stations and passenger amenities;
- Pre- and post-security connections to Terminal 5;
- The passenger and commercial curb front roadways;
- Terminal access and exit roadways;
- New Terminal Building;
- Automated Check-in Capabilities;
- Gate area configured for 9 widebody aircraft and 1 narrow body aircraft (which can accommodate wide-body aircraft with a gate adjacency restriction), as well as 1 widebody aircraft parking position and two on-premise de-icing pads;
- Security areas for passenger and baggage screening;
- Connection of the Terminal 5 and Terminal 7 AirTrain stations to the New Terminal Facilities; and
- Terminal Amenities, including retail concessions and lounges.

The Phase 1 construction period, which is currently ongoing, consists of the design and construction of five new gates (four widebody plus one narrow body) on the Terminal 6 Parcel. Following completion of Phase 1, the Phase 2 construction period will consist of the demolition of Terminal 7 and the design and construction of five new widebody gates on the Terminal 7 Parcel.

The image below shows a rendering of the Project.

### 3.2 PROJECT SITE

The Project site consists of the Terminal 6 Parcel and Terminal 7 Parcel, which are shown in an Exhibit to the Lease. Any land, structures, improvements, additions, buildings, installations or other facilities on the Terminal 6 Parcel are deemed the Initial Premises. Similarly, any land, structures, improvements, additions, buildings, installations or other facilities on the Terminal 7 Parcel are deemed the Terminal 7 Premises. The Initial Premises and the Terminal 7 Premises collectively make up the Premises.

Prior to Financial Close, the Design-Builder prepared and submitted a Project site logistics plan for the Lessee, which designates the following:

- Field offices;
- Storage Areas;
- Protection (netting, cables, etc.);
- Hoists;
- Cranes;
- Fences;
- Sidewalk bridges;
- Temporary loading docks;
- Temporary lighting;
- Temporary protection;
- Temporary circulation and routes;
- Procedure for material delivery;

- Location of equipment; and
- Any other information required for the efficient performance of D&C Work.

The implementation of the Site logistics plan ensures that the D&C Work will be carried out in an organized manner, ultimately verifying that the occupied portions of the Project site or adjacent buildings and businesses will not interfere with the operations of the Lessee, JetBlue, Port Authority or other tenants.

### 3.3 SCOPE OF WORK

The Project is split into two phases: Phase 1 D&C Work and Phase 2 D&C Work. The first phase of D&C Work (“Phase 1 D&C Work”), which is currently ongoing, includes the following elements (Section 2 of the Lease):

- Construction of the portion of the New Terminal Facilities on the Terminal 6 Parcel expanded to the east building edge of the Existing Terminal Facilities on the Terminal 7 Parcel;
- Decommissioning of two Gates on the east side of the existing Terminal 7;
- Construction of the Ground Transportation Center; and
- Construction of the associated Off-Premises Facilities, including necessary roadways and utilities.

The second phase of D&C Work (“Phase 2 D&C Work”) includes the following elements:

- Demolition of the Existing Terminal Facilities on the Terminal 7 Parcel;
- Construction of the remaining portion of the New Terminal Facilities on the Terminal 7 Parcel; and
- Construction of the associated Off-Premises Facilities, including necessary roadways and utilities.

The image below provides a general overview of the Phase 1 and 2 D&C Work.

The scope of work on the Premises includes the following (Section 2(b)(2) of the Lease):

- The decommissioning and demolition of certain existing structures, fixtures and other improvements comprising the Existing Terminal Facilities;
- A unified inter-connected passenger terminal building (the “New Terminal Building”) consisting of approximately 1.150 million square feet of floor space, including a Federal Inspection Services (“FIS”) facility accessible to both the New Terminal Building and Terminal 5 for international flights, together with all associated and related areas and facilities, including concourses, supporting buildings, utility and mechanical rooms, concession areas, stairwells, stairways, escalators and elevators, and all fixtures, furnishings and equipment necessary, to replace the Existing Terminal Facilities on the Terminal 7 Parcel and the apron and taxi lanes on the Terminal 6 Parcel. While the FIS is sized to accommodate the future JetBlue international arrival flights, the operation will not be consolidated until after 2030 and so the Terminal 5i FIS will stay in use for the first few years of operation;
- All necessary and appropriate contiguous aircraft ramp and apron areas to serve the New Terminal Building;
- Adjustment to the taxiway lane on the north side of the Terminal 6 Parcel to allow for effective operations following Substantial Completion of Phase 1;
- All necessary and appropriate D&C Work necessary for the construction of temporary and permanent terminal frontage and access roads together with all appropriate ground lighting, lines, pipes, drains, wires, cables, manholes and conduits;
- All necessary and appropriate temporary facilities on the Premises to support passenger terminal services during the D&C Work Period;
- All necessary relocations or modifications to existing facilities, structures, service and utilities to facilitate D&C Work performed by the Lessee;
- All necessary and appropriate D&C Work on the Premises for the connecting of the New Terminal Building with Terminal 5;
- All appropriate lines, mains, cables, manholes, wires, conduits and other facilities required in connection with or relating to the mechanical, utility, electrical, storm sewer, sanitary sewer, telephone, fire alarm, fire protection, gas and other systems on the Premises needed for the New Terminal Building, including all necessary relocations and upgrades with sufficient capacity for the New Terminal Building, two de-icing pads and related de-icing fluid capture systems, communication systems, and all work necessary or required to tie to existing or new utility demarcation points, including all necessary valves and other equipment and accessories necessary to the use and operation of the heating, cooling, electrical, water and other utility systems which are to serve the Premises;
- All grading and paving of ground areas and appropriate landscaping for the New Terminal Facilities;
- All necessary or required blast fences, concertina wire on fences, and other fencing on the Premises;
- All necessary and required D&C Work required to implement security measures as required by the Port Authority;
- Transformation of the ground floor of the Terminal 5 Parking Garage (the Yellow Garage) and the adjacent part of the roadway network into a new ground transportation center servicing the New Terminal Facilities including for-hire-vehicle parking and personal vehicle loading area; and
- The KIAC fuel line, as shown in Annex U1.6 of Exhibit 3 of the Lease.

The scope of D&C Work for the Off-Premises Facilities includes the following (Section 2(b)(2) of the Lease):

- Construction of temporary and permanent adjustments to the terminal frontage and access roads on premises of Terminal 5, including the extension of the Terminal 5 departures and arrivals frontage on the west side of Terminal 5, and other limited roadway work to tie into existing structures, together

- with all appropriate ground lighting, lines, pipes, drains, wires, cables, manholes and conduits and other related facilities and infrastructure work (the “Off-Premises Roadway D&C Work”);
- All work necessary or required to tie the Lessee’s on-Premises utility work to the utility access stubs provided by the Port Authority off the Premises;
  - Adjustments to the Yellow Garage ground floor entrance area associated with the design and construction of the Ground Transportation Center, together with all work for the construction of the bridge connector connecting the Terminal 5 Parking Garage and the Orange Garage and, on Terminal 5’s premises, the construction of a new Taxi Plaza and adjustments to the Terminal 5 HOV curbside;
  - Limited aesthetic improvements to the existing bridge between the Terminal 7 AirTrain station and the Existing Terminal Facilities;
  - Relocation of existing Terminal 5 Gate 30 and certain other modifications to Terminal 5 necessary to accommodate the connection of the New Terminal Building with Terminal 5;
  - Adjustment to the off-Premises taxiway throats on the north side of the Terminal 6 Parcel; and
  - All necessary relocations or modifications to existing facilities, structures, services and utilities to facilitate the D&C Work.

In addition to the D&C Work to be performed by the Lessee, the Lessee and the Port Authority acknowledge that the Port Authority shall perform all appropriate and necessary work for the construction of the following Port Authority Enabling Work:

- Roadways connecting the CTA roadways to Terminal 5 and the New Terminal Facilities; and
- Construction of a new Central Substation 2 along with a back-up power source connected to the 15kV supply to the Premises as required for the operation of the New Terminal Facilities and all other appropriate lines, mains, cables, manholes, wires and conduits required to tie the mechanical, utility, electrical, storm sewer, sanitary sewer, phone, fire alarm, fire protection, gas and other systems off the Premises to the New Terminal Facilities.

### 3.4 SUSTAINABILITY REQUIREMENTS

BTY has reviewed the Sustainability Plan prepared by Corgan Associates Architects (“Corgan”), dated March 24, 2022 and note the following salient points:

- The Lease and RPWs mandate the achievement of LEED Silver certification under United States Green Building Council (“USGBC”) which means achieving the prerequisites and credits required to achieve the LEED-NC Silver Rating and achieve the LEED credits;
- The RPWs mandate the achievement of Envision Gold v3 certification under the Institute for Sustainable Infrastructure, which means achieving the prerequisites and credits required to achieve the Envision Gold v3 framework;
- The RPWs mandate the achievement of SITES Certification under the Sustainable SITES Initiative, which means achieving the prerequisites and credits required to achieve the “SITES Certified” certification level;
- The T6 Sustainable Design and Construction Plan will consist of LEED, SITES and Envision certifications;
- The pursuit of LEED, Envision and SITES certifications exceed the Port Authority Sustainable Building and Infrastructure Guidelines; and
- It is the intention to pursue Gold level certification across the LEED, SITES and Envision frameworks.

### 3.4.1 LEED Silver Certification

The Lessee’s risk related to the achievement of LEED Silver is transferred to Design-Builder. The Design-Builder will perform the D&C Work to achieve the Project’s sustainability requirements and goals as required by the Port Authority (Section 2.13 of the DBA).

BTY has reviewed the updated draft LEED Scorecard for the Project included in the Sustainability Plan. We note the Design-Builder’s draft targeted LEED Scorecard indicates that 55 points are believed to be achievable, and 40 points are probable/maybe, which puts the Design-Builder above the 50 points required for LEED Silver. Therefore, the Project will achieve a minimum certification of LEED Silver, but the Lessee has established LEED Gold as it’s target, which requires 60 points. In either case, the sustainability requirements of the Port Authority Sustainable Building Guideline will be met.

### 3.4.2 Envision Gold Certification

The Lessee’s risk related to the achievement of Envision Gold V3 is transferred to the Design Builder. BTY has reviewed the draft targeted Envision scorecard indicating a score of 43%, which puts the Design-Builder above the 40% threshold required to achieve Envision Gold.

### 3.4.3 SITES Certification

The Lessee’s risk related to the achievement of SITES Certification is transferred to the Design-Builder. The Sustainability Plan highlights that the Project’s minimum goal is to achieve SITES Certification, with the objective of achieving SITES Gold Certification. BTY has reviewed the draft SITES scorecard, which indicates that 83 credits are believed to be achievable and 32 credits are probable/maybe, which puts the Design-Builder above the 70 credits required for “SITES Certified” certification level. To achieve SITES Gold certification, the Design-Builder must earn 100 credits.

## 3.5 SCHEDULE OF AREAS

The gross floor area (“GFA”) for the Project is summarized as follows:

Project Area	Phase 1 Area (sf)	Phase 2 Area (sf)	Total Area (sf)
Level 1 – Arrivals/Ramp Level	326,024	87,722	413,746
Level 1.5 – Sterile Corridor	60,268	57,729	117,997
Level 2 – Concourse	302,528	131,537	434,065
Level 3 – Departures	180,767	31,481	212,248
Level 3.5 – Departures Intermediate Level	8,382	13,562	21,944
<b>Total Project Area</b>	<b>877,969</b>	<b>322,031</b>	<b>1,200,000</b>

### 3.6 DESIGN SOLUTION OVERVIEW

The Project’s design is summarized by major element as follows:

Element	Description
Substructure	<ul style="list-style-type: none"> <li>• Driven steel taper pile foundations, with anticipated capacity of 160 tons</li> <li>• Reinforced concrete pile caps and grade &amp; tie beams</li> <li>• Perimeter wall footings, misc. pits, core &amp; stair footings</li> <li>• Other standard foundation system where required</li> </ul>
Structure	<ul style="list-style-type: none"> <li>• Reinforced concrete framing and slabs to the Arrivals level</li> <li>• Steel framing of non-composite beams, columns and bracing to the Concourse, Departures and Roof levels</li> <li>• Lateral resistance provided by steel concentrically braced frames</li> <li>• Exposed structural steel bracing with intumescent paint and AESS-level finish</li> <li>• Concrete topping with welded wire mesh on metal deck floor system for Sterile corridor, Concourse, Departures and Roof levels</li> <li>• Steel Roof structure to long-span roof at Main Atrium</li> <li>• Main roof cantilevered to act as a canopy, supported by tapered structural steel members and stainless steel cables</li> <li>• Concrete stairs and landings for stair cores, steel for exterior stairs</li> </ul>
Exterior Enclosure	<ul style="list-style-type: none"> <li>• Dry floodproofing consisting of reinforced concrete curbs and flood gates to the Arrivals level to resist up to four feet of water pressure</li> <li>• Metal panel rain screen</li> <li>• Clear glass within unitized curtain wall system, also Spandrel glass within unitized curtain wall system, Louver W/ 50% free area within curtain wall system</li> <li>• Solar shading, as required</li> <li>• Glazed exterior doors</li> <li>• Overhead doors with automatic door operators</li> <li>• Membrane waterproof roofing with rigid insulation</li> <li>• Aluminum frames ETFE membrane cushion skylight system</li> </ul>
Partitions & Doors	<ul style="list-style-type: none"> <li>• Metal stud drywall system</li> <li>• CMU (Masonry)</li> <li>• Hollow metal interior doors</li> <li>• Aluminum doors, Aluminum sliding doors with auto door operator</li> <li>• Glazed interior doors</li> <li>• Wood interior doors</li> <li>• Stainless steel interior doors</li> <li>• Sliding glass exterior doors</li> </ul>

Element	Description
Finishes	<ul style="list-style-type: none"> <li>• Terrazzo flooring to restrooms</li> <li>• Porcelain wall tiling to restrooms and nursing rooms</li> <li>• Exposed concrete, LVT and VCT to Back of house</li> <li>• Mix of tile and carpet to level 2 concourse &amp; level 3 ticket counter queue</li> <li>• Porcelain tile flooring to Arrivals, Circulation Paths at Departure Gates, Ticketing Hall/Check-In, public stairs and baggage claim</li> <li>• Broadloom Carpet flooring to Sterile corridors, Holdrooms</li> <li>• Carpet flooring and premium ceiling finish to Security Screening Checkpoint</li> <li>• Airline Club and Retail Fit-Out by tenant</li> <li>• Acoustic ceiling to Concourse and gate counter areas, lounges, ticket hall, baggage claim, etc.</li> <li>• Suspended drywall ceiling to public washrooms and other area</li> <li>• Exposed structure to service areas, concession areas, support areas, egress stairs, etc.</li> <li>• Painting to interior partitions</li> <li>• Metal paneling and Mosaic Tile to Ticketing/Check-In feature walls</li> <li>• Artwork at various locations, excluded from the Design-Builder’s scope. The art program is managed by the Lessee</li> <li>• Special featured wall finishes to where required</li> </ul>
Fittings & Equipment	<ul style="list-style-type: none"> <li>• Guardrails / handrails and crash rails</li> <li>• Millwork including check-in desks, washroom vanities checking and boarding gate counters, etc.</li> <li>• Hold room bench and casual seating and tabletops</li> <li>• Washroom/janitor accessories, toilet partitions, urinal screens</li> <li>• Horizontal/vertical blinds</li> <li>• Way-finding system</li> <li>• Lockers, interior planters and other miscellaneous specialties</li> </ul>
Conveying Systems	<ul style="list-style-type: none"> <li>• Elevators</li> <li>• Escalators</li> <li>• Moving walkways</li> </ul>
Special Equipment	<ul style="list-style-type: none"> <li>• Baggage Screening and Handling System</li> <li>• Passenger Boarding Bridges</li> <li>• Pre-conditioned Air Units</li> <li>• Ground Power</li> <li>• Electrical GSE Charging Equipment</li> <li>• Aircraft de-icing fluid isolation and capture system</li> </ul>

Element	Description
Mechanical	<ul style="list-style-type: none"> <li>• HVAC System including air handling units, fan coil units, cooling tower, chillers and chilled water system, hot water system, unit heaters, direct expansion air conditioning system, snow melting, make up air units, loading bridge pressurization fans, smoke removal and purging fans, general exhaust system, pumps, variable frequency/speed drives, gas fired infrared radiant heaters, terminal devices, ductwork &amp; insulation, heating and chilled water piping and connection work of chilled water piping to existing, etc.</li> <li>• Controls including SCADA, DDC/BMS system, energy monitoring/metering system, etc.</li> <li>• Emergency generator fuel system including underground fuel oil tank, cathodic protection, leak detection system, piping and pumps, exhaust &amp; ventilation system etc.</li> <li>• Plumbing &amp; drainage system including new fixtures, electric water heaters, booster pumps, domestic hot / cold water supply and return piping system, aircraft potable water piping system, sanitary drainage piping system, storm water piping system, natural gas piping system and aircraft de-icing system, etc.</li> <li>• Fire protection including sprinkler fire protection system, smoke detection, fire alarm system, smoke control, miscellaneous extract systems, clean agent fire protection system, standpipe system, fire extinguishers, Fire Department connections, fuel oil storage protection, fire pumps &amp; jockey pumps and air compressor for dry type sprinkler fire protection system, etc.</li> </ul>
Mechanical Site Services	<ul style="list-style-type: none"> <li>• Mechanical site services include demolition works, storm water management system inclusive of storm water piping, catch basins, oil/grit interceptor, storm &amp; sanitary manholes, adjustment of existing manhole elevation, connection to existing pump/lift station. It also consists of sanitary system including sewage ejectors, force main, manholes and connection to existing pump/lift station; fire and water main inclusive of rerouting of existing mains, construction of new water and fire main, relocation of high-pressure piping, fire hydrants and connection work; relocation of gas piping mains and connection to utility.</li> </ul>
Electrical	<ul style="list-style-type: none"> <li>• Service and distribution system including normal power, emergency diesel generator power systems, UPS, grounding &amp; lighting protection and miscellaneous items where required</li> <li>• Internal &amp; external Lighting, devices and heating system including emergency lighting, branch devices, heating, etc.</li> <li>• Ancillaries including fire alarm system, security system, communication system, PA and intercom system, clock system, dynamic signage, CCTV system</li> </ul>
Electrical Site Services	<ul style="list-style-type: none"> <li>• Electrical site services including removal and relocation works of existing duct bank, new communications, ground and mounted lighting and security systems</li> <li>• New substation</li> </ul>

Element	Description
Site Works	<ul style="list-style-type: none"> <li>• Existing portion of airside and airside utility removal for new Terminal 6</li> <li>• Airside alignment</li> <li>• New airside utility/site service</li> <li>• New apron and taxi lanes, Wayfinding Signage</li> <li>• Hydrant Fuel System (aircraft fueling)</li> <li>• Other miscellaneous site works</li> </ul>
Landscaping	<ul style="list-style-type: none"> <li>• Between Terminals 5 and 6</li> <li>• At the Departures roadway ramp</li> <li>• At the Terminal 6 Arrivals Plaza</li> </ul>
Information Technology Systems	<ul style="list-style-type: none"> <li>• Telecommunications Networks</li> <li>• Paging and Mass Notification System</li> <li>• Security</li> <li>• Information Display Systems</li> <li>• Passenger Processing</li> </ul>
Landside Information Technology Systems	<ul style="list-style-type: none"> <li>• Closed Circuit Television</li> <li>• Road Weather Information Systems</li> <li>• Dynamic Messaging Signs</li> <li>• Vehicle Detection Count System</li> <li>• License Plate Reader System</li> <li>• TI-MED Readers</li> <li>• Parking Guidance System</li> <li>• Other miscellaneous systems</li> </ul>
Airside Information Technology Systems	<ul style="list-style-type: none"> <li>• Visual Docking Guidance Systems</li> <li>• Airport Operations Systems</li> <li>• Baggage Reconciliation System</li> </ul>
Roadways	<ul style="list-style-type: none"> <li>• New arrivals and departures roads serving the new terminal and dedicated Terminal 5 exit roadway</li> <li>• New elevated vehicular connector between Orange and Yellow Parking Garages</li> <li>• Drainage, lighting and traffic signals</li> <li>• Arrivals level Plaza</li> <li>• Ground Transportation Center</li> </ul>
Works Outside Terminal 6 Lease Limits	<ul style="list-style-type: none"> <li>• Roadway works near T5i Taxi Plaza</li> <li>• Roadway work in front of the TWA Hotel</li> <li>• Roadway Ramp to the Yellow Parking Garage</li> <li>• Approach Roadways to Terminal 5 and 6</li> <li>• Utility Connections to the existing Port Authority source</li> <li>• Utility Connections in the Vicinity of the Orange Garage</li> <li>• Roadway Demolition work</li> <li>• Traffic shifts and related Maintenance of Traffic</li> </ul>

### 3.7 DESIGN PROCESS

The Lessee is responsible for the preparation and presentation of the design submittals to the Port Authority to verify that the requirements in the Lease, Requirements and Provisions for Design and Construction Work (“RPW”), Port Authority Tenant Construction and Alteration Process (“TCAP”) Manual and Port Authority Tenant Construction Review Manual (“TCRM”) are satisfied with respect to the D&C Work. The Lessee’s responsibility for preparing design submittals and plans has been transferred to the Design-Builder through the Design-Build Agreement except for certain carve-outs for preparation and submission of plans, including the annual carbon emissions reports, aircraft de-icing management plan and waste reduction plans, which are defined in Exhibit 2.03 of the PDD.

#### 3.7.1 Design Review Working Committee

The DRWC consists of selected members of JFK Redevelopment and the Master Planning team, Port Authority Engineering Department, and the Lessee’s team, including the Lessee, the Lead Designer and the Operations and Maintenance Work liaison. This committee focuses on reviewing the Lessee’s Design Submittals in order to ensure the appropriate interior finishes and all other OneJFK elements are incorporated into the Lessee’s design per the requirements of the RPW. The DRWC determines which Design Submittals will be referred to the EDRC for further review (Section 1.3 of Section A of the RPW).

Similar to the EDRC, the DRWC meetings are an interactive workshop format. The Lessee schedules DRWC meetings with the Port Authority no less than 10 Business Days in advance of each meeting. The DRWC is responsible for providing written comments to the Lessee setting forth design changes suggested by the DRWC no later than 5 days after a meeting. The Lessee is responsible for incorporating into its Design Submittal:

- Design changes that, in the DRWC’s reasonable discretion, are necessary in order for the design to comply with the Project Documents’ requirements; and
- Any other suggested design changes that do not, individually or in the aggregate, negatively impact the Baseline Schedule or the direct cost to perform the Work.

A dedicated JFK Redevelopment Design Manager has been appointed by the Port Authority to act as a liaison, and ensure that the Lessee’s design progresses in accordance with requirements of the One JFK Vision, as well as Sections A and B of the RPWs (General Requirements and Technical Requirements, respectively). The JFK Redevelopment Design Manager shall act as the intermediary between the DRWC and the EDRC (Section 1.4 of Section A of the RPW).

If the DRWC requests any changes that are inconsistent with the Lessee’s approved Basis of Design, the changes will be addressed as either a Port Authority Change or a Qualifying D&C Change (Section 1.2.2 of Section A of the RPW).

#### 3.7.2 Executive Design Review Committee

The EDRC consists of selected members representing the Lessee, the Governor’s Office, Port Authority’s Executive Management, and the Aviation Director’s Office. The EDRC is a high-level executive management committee that reviews the Lessee’s Design Submittals referred to the EDRC by the DRWC during development to ensure that the design and architectural appearance of the Construction Project accommodates connected, architecturally-consistent character for the Airport to result in a One JFK environment in accordance with the Lease and the RPW (Section 1.2 of Section A of the RPW).

The EDRC meetings are conducted in an interactive workshop format. The EDRC meets monthly and any written comments will be provided to the Lessee within 5 Business Days after each meeting. The Lessee is responsible

for prioritizing agenda items for each EDRC meeting in order to obtain necessary Port Authority decisions and incorporate into upcoming Design Submittals.

If the EDRC requests any changes that are inconsistent with the Lessee’s approved Basis of Design, the changes will be addressed as either a Port Authority Change or a Qualifying D&C Change (Section 1.2.2 of Section A of the RPW).

**3.7.3 Submittals Review Process**

The Lessee may request to hold in-progress design workshops prior to any design submittal for the Port Authority to discuss and verify the progress of design submittals. The Lessee must provide a minimum of five Business Days’ notice to the Port Authority (Section 1.8 of Section A of the RPW).

Prior to submittal of any document or drawing to the Port Authority for its review and comment or approval, the Lessee’s Architect of Record and/or the Lessee’s Engineer of Record (“A/EOR”), must review each document and drawing for proper content, format, conformance to the project objectives, and compliance with the Project Documents and ensure the submittal is complete.

Lessee is required to deliver any submittal included in the Schedule of Submittals and Packaging Plan no later than one week from the date set forth in the Schedule of Submittals and Packaging Plan (the “Submittal Period”).

Upon receipt of any design submittal, the Port Authority will review the package and determine if the package meets the requirements of the Project Documents (including the TCAP manual) and Governmental Approvals required with respect to the scope of the D&C Work covered by the submittal, as well as to confirm whether Port Authority comments from previous submittals have been addressed and considered. The Port Authority reserves the right to deem the submittal incomplete and return to the Lessee within 3 Business Days of receipt of the submittal.

If a submittal is deemed incomplete, the Port Authority will return the submittal within the three Business Days period, together with information regarding the areas in which the Port Authority deems the submittal to be incomplete, and the review period will restart upon the Lessee’s resubmission.

If the Lessee fails to deliver a submittal within the applicable Submittal Period, the Port Authority will have an additional five Business Days to review once received by the Port Authority.

The periods available to the Port Authority to review a design submittal after the date they receive an accurate and complete submittal in conformance with the Project Documents are listed below. If a submittal does not fall into any of the categories in the table below and no review period is specified in the Lease, then the submittal will be subject to Port Authority review in accordance with the timeframes applicable to a Project Plan below.

Submittal	Comprehensive Basis of Design	Comprehensive Conceptual Design Submittal	Comprehensive Intermediate Design Submittal	Comprehensive Final Design Submittal	Advanced Final Design Submittal for a given element	Project Plan	Minor/Early Works Submittals
Review Times	15 Business Days	15 Business Days	20 Business Days	20 Business Days	10 Business Days	10 Business Days	5 Business Days

Submittal	Comprehensive Basis of Design	Comprehensive Conceptual Design Submittal	Comprehensive Intermediate Design Submittal	Comprehensive Final Design Submittal	Advanced Final Design Submittal for a given element	Project Plan	Minor/Early Works Submittals
Re-Submittal Review Times	10 Business Days	10 Business Days	10 Business Days	10 Business Days	10 Business Days	10 Business Days	2 Business Days

### 3.7.4 Design Status

The design of the Project is well advanced. The table below identifies the total number of design packages submitted and approved to-date.

Status	Number	%
Approved	64	50%
Conditionally Approved	30	24%
In Review	5	4%
Disapproved	9	7%
Total Submitted	108	85%
Pending or Future	19	15%
<b>Total</b>	<b>127</b>	<b>100%</b>

BTY understands that pending design submittals are not impacting the progress of work on site. Pending or future design packages include post-construction submittals, operational plans, and submissions that are anticipated to occur within the remaining months of 2024, such as the Terminal 7 demolition, TWA canopy replacement, Lufthansa fit out, and photovoltaic designs.

### 3.7.5 Conclusion

We note the following conclusions related to the design process:

- The design is well advanced, and the Project is largely de-risked from a design perspective;
- We understand that the Port Authority has generally complied with its required review times;
- The Lessee and Design-Builder have effectively managed the EDRC and DRWC process. There are only four packages remaining that are subject to the EDRC and DRWC reviews (advertising, wayfinding, branding and digital media displays); and
- We understand that there are currently no concerns with design progress affecting the Design-Builder’s ability to progress the work on site. The Design-Builder is able to progress work for packages that are disapproved by receiving conditional approval from the Port Authority for specific scopes of work. The Lessee and Design-Builder is proactively managing this process.

### 3.8 CONSTRUCTION STATUS

Phase 1 is currently under construction with progress ongoing across the terminal, airside and landside scopes of work. BTY visited the Project site with the Lessee and Design-Builder on August 27, 2024. The below list is a summary of the work completed to date.

Please refer to Appendix 1 of this report for progress photos taken during our site visit. Please refer to Section 7.4 for an overview of construction progress against the Project schedule.

#### Terminal:

The following work is ongoing:

- Pile installation;
- Pile testing;
- Foundation and anchor bolt installation;
- Slab-on-grade activities;
- Concrete testing;
- Pile deliveries;
- Pile fabrication (offsite);
- Steel deliveries;
- Steel fabrication (offsite);
- Curtainwall fabrication (offsite);
- Curtainwall installation;
- Structural Technologies fabrication (offsite);
- Structural steel erection;
- Steel decking;
- MEP sleeves/inserts/hangers;
- Front overhang and stair installation;
- Elevated deck concrete;
- CMU walls;
- Light gauge metal framing;
- Insulation;
- Drywall;
- Skylight/Oculus activities;
- TPO roofing;
- Sprayed fireproofing;
- Baggage handling equipment deliveries;

- Baggage handling equipment fabrication (offsite);
- Baggage handling equipment installation;
- Fire sprinkler installation;
- HVAC ductwork;
- Mechanical equipment installation;
- Overhead plumbing and electrical; and
- Underground plumbing and electrical are in progress.

Civil (Airside):

The following work is ongoing:

- Airside fence relocation;
- Concrete demolition; and
- Concrete recycling.

Civil (Landside):

The following work is ongoing:

- Utility Enabling Works;
- 5kV work;
- Underground electrical work;
- Fence and barrier work;
- Pile installation;
- Detour/MOT setup and relocation;
- Flushing utility lines;
- Abutment and pier activities;
- Steel erection; and
- Retaining wall construction.

**3.9 COMPENSATION AND DELAY EVENTS**

The Lessee is actively pursuing its rights to Compensation and Delay Events under the Lease, which are described in further detail in Sections 11.6 and 11.7 of this report. The table below summarizes the Compensation and Delay Event Notices submitted to the Port Authority.

Name	Description	Status
Application of 2022 New York City Building Code, dated January 31, 2023	The CDEN concerns the Port Authority’s requirement that the Lessee and Design-Builder abide by the 2022 New York City Building Code (“NYCBC”) instead of the 2012 NYCBC.	Resolved

Name	Description	Status
GTC Enabling and Fire Protection, dated February 3, 2023	The CDEN concerns the Port Authority’s requirement that the Design-Builder install a fire protection system in the existing Yellow Garage as part of its conversion to a Ground Transportation Center	Resolved
Painting Air Operations Area Concrete Barriers, dated February 10, 2023	The CDEN concerns the Air Operations Area fence installed for the capture of the terminal construction site, which the Port Authority required that the Design-Builder paint orange and white.	Resolved
Building 68 and 189 Regulated Building Materials, dated February 10, 2023	The CDEN concerns the additional abatement of Regulated Building Materials present in Buildings 68 and 189 which need to be performed prior to demolition	Resolved
Drainage and Stormwater Pollution Prevention Plan, dated February 19, 2023	The CDEN concerns the Design-Builder’s disapproval of the Design-Builder’s Stormwater Pollution Prevention Plan	Open
Taxiway A Potential Expansion of Work Scope, dated February 22, 2023	The CDEN concerns the duct bank system located underneath the proposed Taxiway A4 which the Port Authority is potentially requiring the Design-Builder to expand upon the work scope originally agreed in the Lease.	Resolved
Construction Worker Bussing, dated March 7, 2023	The CDEN concerns the Port Authority’s failure to comply with the terms of the Lease and timely provide the Lessee with a Port Authority preferred vendor for the Lessee to enter into a direct agreement with in connection with bussing construction workers to the construction site on a daily basis	Open
Delays in Approving Tenant Alteration Application YR-6006-11, dated March 8, 2023	The CDEN concerns the Port Authority’s disapproval of the Design-Builder’s initial roadways and utilities design package, which was submitted to the Port Authority on December 23, 2022.	Open
Yellow Garage Parking Capture, dated May 16, 2023	The CDEN concerns the capture of the Yellow Garage parking area and the costs associated with respect to additional signage and security guards requested to assist with vacating customers from the Yellow Garage.	Open
Life Safety Package Comments, dated March 24, 2023	The CDEN concerns the Port Authority’s review comments that may necessitate a redesign of certain terminal elements	Open
7460 Permanent Structure Line of Sight, dated May 22, 2023	The CDEN concerns the FAA’s non-approval of the 7460 submission for the permanent structure and the Port Authority’s direction to the Design-Builder to revise the design to obtain the FAA’s approval.	Open

Name	Description	Status
Additional Signage Roadway Utility #1 YR-6006-11 TA Submission, dated August 11, 2023	The CDEN concerns the Port Authority’s request for the Design-Builder to provide temporary signage during the different phases of construction and the Port Authority’s modification of standards.	Resolved
Roadway Work Order 113, dated August 31, 2023	The CDEN concerns material impacts to the D&C Work caused by the Port Authority prioritizing the work related to Work Order 113, which is being performed by the Port Authority’s contractor Grace Civil LLC, over the D&C Work being performed by the Design-Builder in the same area.	Open
Building 111 Tie-in to Existing HVAC Systems, dated July 3, 2023	The CDEN concerns work which was not completed by the Port Authority’s contractor at Building 111, which delayed the Design-Builder’s fitout work for the third floor leased premises.	Resolved
FAA 7460 Determination – Crane Operational Plan, dated July 25, 2023	The CDEN concerns the FAA’s 7460 determination with respect to the Crane Operational Plan and the Port Authority’s failure to provide timely notification and issue a Notice to Airmen in connection with the FAA’s determination.	Resolved
Terminal Signage, dated February 23, 2024	The CDEN Concerns the Port Authority’s direction to proceed with numbered Terminal Signage as opposed to lettered Terminal Signage as set forth in the Port Authority Master Signage Graphic Standards.	Resolved
Lot 55 Additional Soil Erosion Control, dated April 1, 2024	The CDEN concerns the Port Authority’s requirement for substantial environmental enhancements for the concrete stockpile area in Lot 55.	Resolved
Cellular DAS and Wi-Fi, dated June 17, 2024	The CDEN concerns the Port Authority’s delay in awarding a contract to a Vendor and potentially a recent change in direction with respect to responsibility of the scope of work, cost and schedule for the Wi-Fi and Cellular Distributed Antenna System at the Project.	Open
LSS Facility and Final Pricing, dated June 27, 2024	The CDEN concerns the Port Authority’s selection of the Logistics Vendor of the Modern Efficient Transport and Supply facility, the increased costs being charged and the decreased participation from Minority and Women Owned Business Enterprises.	Open
Changed AirTrain Work Rules, dated July 3, 2024	The CDEN concerns the changes in work rules and regulations of the D&C Work to be performed in the proximity of the AirTrain made by Alstom Transportation Inc.	Open

Name	Description	Status
LCP Tracker Non-Conformance for B Book Laborer Rates, dated July 22, 2024	The CDEN concerns the Port Authority’s requirement for the Design-Builder to use higher rates in LCP Tracker, which are not in accordance with the B Rates from the Project Labor Agreement.	Open
PANYNJ Suspension of Work, dated July 31, 2024	The CDEN concerns communication from the Port Authority regarding a damaged 5kv ductbank (damage is unrelated to the DB’s work) and instruction to cease any work in the vicinity of 5kv ductbanks.	Resolved
Manhole TE-11, dated August 16, 2024	The CDEN concerns direction from the Port Authority stating that changes be made to the previously approved design for Taxiway A and Manole TE-11, which will result in design and construction costs, and schedule impacts. This issue was previously considered resolved.	Open
Additional Flagger Costs, dated August 23, 2024	The CDEN concerns the Port Authority requiring flaggers upon the implementation of the traffic shift, part of Roadways Phase 1A, at the intersection of the T5 exit roads and the TWA Hotel exit road, that were not a part of the Maintenance and Protection of Traffic plan, and the costs to provide those flaggers.	Open

**3.10 WARRANTY PERIOD**

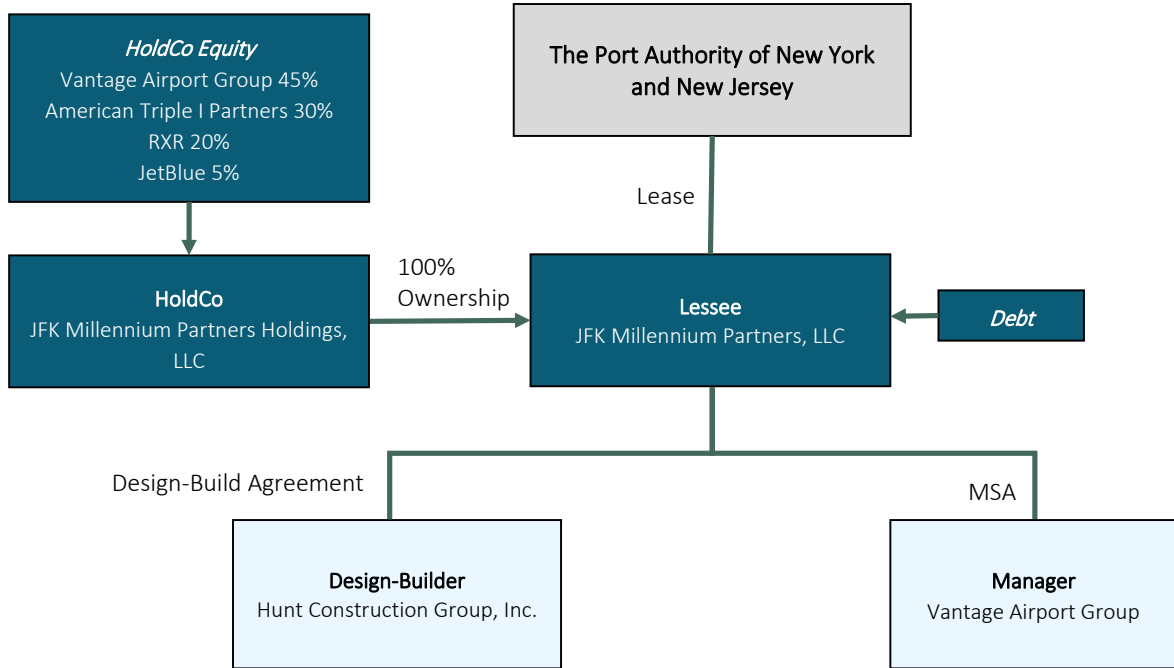

The Lessee will be responsible for correcting all Defects during the 2-year Warranty Period from the issuance of the Phase 1 Completion Certificate or the Completion Certificate, as applicable. If any repairs are required on an element of the D&C Work during the 2-year warranty period, the Warranty Period for that element will be extended for an additional 2 years. The Lessee will not have any warranty obligations for the Off-Premises Facilities once they have been turned over to the Port Authority and the related construction warranties have been assigned to the Port Authority (Section 2(i) of the Lease).

The material portion of the Lessee’s risk related to the Warranty Period has been transferred to the Design-Builder under the DBA for a period of two years, subject to extension for repair and replacement and certain other limited terms and conditions. Special extended warranties (e.g. roofing) are also specified in the scope documents and included within the GMP. The warranty provisions and 2-year Warranty Period are consistent with US P3 market precedent and provide appropriate protection to the Lessee.

## 4.0 Consortium

The general structure of the Project and the consortium is illustrated below:

The key members of the Project consortium are set out below:

Role	Company
Lessee	JFK Millennium Partners, LLC
HoldCo	JFK Millennium Partners Holdings, LLC comprised of JetBlue Airways and funds affiliated with Vantage Airport Group, RXR and American Triple I Partners
HoldCo Equity	45% Vantage Airport Group 30% American Triple I Partners 20% RXR 5% JetBlue Airways Corporation
Design-Builder	Hunt Construction Group, Inc. ("Hunt")

Role	Company
Manager	Vantage Airport Group (JFK) Ltd.
Debt	The Project was originally financed with bank loans and privately purchased municipal securities. JMP is currently planning to issue long term tax exempt bonds for the purpose of repaying a portion of the original financing.

The Lessee, JFK Millennium Partners, is comprised of funds affiliated with Vantage, RXR and ATI, and JetBlue, with JetBlue as the Anchor Tenant for the Project. Corgan is the lead design architect, who has engaged the following design subcontractors:

- Lilker Associates (Lead Mechanical Engineer & Lead Electrical Engineer);
- Arora Engineers (Lead Plumbing Engineer & Lead Fire Protection Engineer);
- Burns & McDonnell (Lead Special Systems and Low Voltage Designer);
- Severud Associates (Lead Structural Engineer);
- Brock Solutions (Baggage Handling Systems Controls);
- Stantec Architecture & Engineering Inc. (interior design);
- Foit-Albert Associates (associate architect);
- Studio 5 Architects, Inc. (associate architect);
- Architecture X Design (associate architect); and
- David Smotrich & Partners LLP (associate architect).

In addition, the Design-Builder has engaged AECOM USA Inc. for civil design, Langan Engineering for geotechnical engineering and NYCO Environmental and Dewatering Corp. for environmental engineering.

JFK Millennium Partners’ equity investors have a track record of successful projects including some of the most challenging airport, terminal and infrastructure projects around the world. The Consortium’s expertise generated through their collective P3 airport experience will be leveraged throughout all the Project phases.

**4.1 VANTAGE GROUP (CO-DEVELOPER, TERMINAL OPERATIONS AND LEAD EQUITY INVESTOR)**

Vantage is a leading investor, developer and manager of airports and terminals. Throughout their 30 year history, Vantage has provided Project Delivery, Terminal Operations and Investor services on more than 30 airports.

The group oversees airport projects globally, with their most notable experience being the redevelopment of the LaGuardia Airport Terminal B planned by the Port Authority, which has a capital value of \$5.1B (USD) and reached Final Acceptance in 2023. Vantage currently oversees all terminal operations and maintenance.

Vantage currently has:

- 30 years managing, developing and investing in airports;
- \$11B+ in Capital Development Projects completed and underway;
- \$8B in Assets Under Management;
- \$1B Network airports revenue;
- Over 1,000 employees across the network;
- 80 million passengers served by Vantage network locations (2023);
- Over 160 airline partners; and
- 265 global destinations served.

The following table provides a snapshot of some of Vantage’s relevant P3 work:

Project	Location	Status	Role	Capital Cost
LaGuardia Airport Terminal B	New York, USA	Operations	Terminal Operations, Equity Investor	\$5.1B
Sangster International Airport	Montego Bay, Jamaica	Operations	Terminal Operations, Equity Investor	\$132M
Arturo Merino Benitez International Airport	Santiago, Chile	Operations	Project Management, Airport Operations, Equity Investor	\$220M
Lynden Pindling International Airport	Nassau, Bahamas	Operations	Terminal Operations, Project Delivery, Equity Investor	\$410M
Larnaka and Paphos Airports	Larnaka, Cyprus	Operations	Terminal Operations, Project Delivery, Equity Investor	\$882M

Vantage is providing 45% of the equity requirement and provide 100% of the Operations and Maintenance responsibilities on the Project through their role as the Manager. As the Manager, Vantage will be the operator and manager of the Existing Terminal Facilities and New Terminal Facilities, performing and managing all Operations and Maintenance Work in accordance with the O&M Contract (Section 11 of the Lease).

#### 4.2 RXR (CO-DEVELOPER AND EQUITY INVESTOR)

RXR is a New York based vertically integrated private real estate company with expertise in investment management, property management, master development, design, construction, leasing and financing. It brings over 10 years of success working in complex public-private development projects throughout the New York region, and successfully delivering projects involving difficult regulatory and approval processes. RXR understands the nuances of the New York region and has a strong track record of overseeing construction activities. RXR will act as co-developer and equity investor for the Project.

RXR’s senior leadership team has extensive experience in delivering some of the largest and most complex public-use facilities in the New York/New Jersey region.

RXR’s Chairman and CEO Scott Rechler, working with David Garten (another member of RXR’s senior leadership team) held key leadership roles at the Port Authority, helping to shepherd high-profile projects, including:

- The construction and completion of the \$14.8 billion World Trade Center site;
- The vision plans for LaGuardia Airport and JFK International Airport;
- The \$1.5 billion replacement of the Goethals Bridge;
- The \$5.1 billion construction of the new Central Terminal B at LaGuardia Airport;
- Recovery and repairs post-Hurricane Sandy; and
- The development of the Port Authority’s 10-year, \$30 billion capital plan.

During his time with the Port Authority, Mr. Rechler served on the bi-state agency's Board of Commissioners as Vice Chairman, and as Chairman of the Port Authority's Capital Planning Committee with responsibility for its multi-billion capital budget.

RXR manages 93 commercial real estate properties and investments with an aggregate gross asset value of approximately \$22.3 billion, comprised of approximately 30.3 million square feet and a multi-family residential portfolio of approximately 7,600 units under operation or development, and control of development rights for an additional approximately 3,800 multi-family and for sale units.

RXR is providing 20% of the equity requirement on the Project.

#### **4.3 AMERICAN TRIPLE I PARTNERS (EQUITY INVESTOR)**

ATI is a New York based manager and developer of infrastructure assets. The firm is affiliated with their leading investment bank, Siebert Williams Shank & Co., thus creating a national asset sourcing platform. Siebert Williams Shank & Co. was founded in 1996 and currently has approximately 130 employees in 23 offices. They have managed more than \$2.0 trillion through over 6,000 municipal bond offerings. Siebert Williams Shank & Co. has also gained experience working with various state and local entities for financing their infrastructure projects.

ATI's equity investments contribute towards 80% of their portfolio. The firm's investment strategies are strengthened through Siebert William Shank & Co.'s national asset sourcing platform and relationships with government leaders and municipal experts. Additionally, the firm is minority-owned and minority-managed with a 100% ethnic minority ownership, enabling responses to public and/or private sector mandates or incentives.

The firm provides equity for a range of projects, including the following examples within the transportation, knowledge & information and environmental sectors:

- Airport facilities and services;
- Cargo and logistics facilities;
- Parking structures and systems;
- Data centers;
- Street lighting systems;
- Power grid modernization; and
- Traffic sensor systems.

ATI is providing 30% of the equity requirement on the Project.

#### **4.4 JETBLUE (EQUITY INVESTOR, ANCHOR TENANT)**

Recently recommitted to its headquarters in Long Island City, Queens, NY, JetBlue began service in 2000 and has grown to become the 6<sup>th</sup> largest passenger carrier in the United States based on revenue passenger miles. JetBlue carries more than 42 million customers a year to over 100 cities in the United States, Caribbean and Latin America with an average of 1,000 daily flights. JetBlue operates out of key airports in New York, Boston, Fort Lauderdale, Orlando, Los Angeles, and San Juan, Puerto Rico. As of 2021, JetBlue also operates out of London Heathrow Airport and London Gatwick Airport in the UK.

JetBlue is providing 5% of the equity requirement on the Project.

#### 4.5 HUNT CONSTRUCTION GROUP, INC. (DESIGN-BUILDER)

Hunt Construction Group, Inc. (“Hunt”) was founded in 1944 and is a leader in the construction of design-build projects, with over 100 projects, exceeding 37 million ft<sup>2</sup> and \$9 billion in contract value. The company has experience working across various market sectors and is a national leader in aviation. Hunt’s aviation project experience includes a wide range of project types, including new terminals, baggage handling systems and other interior modernizations. In total, Hunt has completed over 34 million ft<sup>2</sup> of aviation projects and \$8.5 billion worth of aviation projects nationwide.

In 2014, Hunt merged with AECOM, a fully integrated infrastructure and support services firm. Collectively, AECOM and Hunt leverages Hunt’s extensive experience working in and around airports and successfully planning and managing complex logistics, security challenges and multi-level coordination. Hunt comprises approximately 45% of AECOM’s Construction Management division, which generated \$6.6B of revenue in 2020 and has grown each year since Hunt was acquired in 2014. In addition to Hunt’s experience, Tishman, acquired by AECOM in 2010, has managed the construction of over 600M ft<sup>2</sup> of the world’s most iconic buildings and has extensive experience working in the New York area. In 2004, Tishman was selected to provide preconstruction and construction management services for the Port Authority for the 1 World Trade Center project.

The following table outlines Hunts’ relevant project experience:

Project	Location	Status	Capital Cost
JFK Terminal 1 CBIS Project	Jamaica, NY	Complete	\$44M
Louis Armstrong New Orleans International Airport – North Terminal	New Orleans, LA	Complete	\$878M
Maynard H. Jackson Jr. International Terminal	Atlanta, GA	Complete	\$1.2B
Luis Muñoz Marin International Airport Capacity Enhancement Program	Carolina, Puerto Rico	Complete	\$100M
Phoenix Sky Harbor International Airport Terminal 3 Modernization	Phoenix, AZ	Complete	\$480M
Fort Lauderdale Airport Terminal 1 Modernization Program	Fort Lauderdale, FL	Complete	\$269M
The Col. H. Weir Cook Terminal at Indianapolis International Airport	Indianapolis, IN	Complete	\$507M
Barclays Center	Brooklyn, NY	Complete	\$525M
SoFi Stadium	Inglewood, CA	Complete	\$3.36B
Houston Methodist Hospital Walter Tower	Houston, TX	Complete	\$505M
Mercedes-Benz Stadium	Atlanta, GA	Complete	\$1.49B
UBS Arena	Elmont, NY	Complete	\$697M
Pittsburgh International Airport Terminal Modernization	Pittsburgh, PA	In Progress	\$700M

#### 4.6 CORGAN (LEAD DESIGNER)

Corgan as the Lead Designer coordinates the design team, including the various associate architects and interior design firms. Corgan is an international leader in airport terminal design with completed work in over 200 airports worldwide. Over the past five years they have designed 10 million square feet of terminal projects.

Recent accolades include Top 10 appearances in BD+C’s ‘Top 10 Aviation Architects’ since 2013, with a #3 ranking for 2021.

Corgan has served the aviation market’s needs for over 70 years, including 30 years at JFK. This has provided Corgan a deep understanding of the logistical and operational challenges inherent in aviation projects. Corgan has over 135 professional airport-related staff which bring extensive global expertise to the Project.

Corgan has worked on the JetBlue Terminal 6 Development Project since 2017.

The table below demonstrates Corgan’s relevant project experience.

Project	Location	Status	Capital Cost
Dallas Fort Worth International Airport – Terminal D	Dallas, TX	Complete	\$753M
Dallas Fort Worth International Airport – Terminal Renewal and Improvement Program	Dallas, TX	Complete	\$2.7B
O’Hare International Airport – Concourse L Extension Project	Chicago, IL	Complete	\$76M
San Francisco International Airport – Terminal 1 Interim Boarding Area-B Remodel	San Francisco, CA	Complete	\$110M
William P. Hobby Airport – Southwest Airlines Terminal Expansion	Houston, TX	Complete	\$146M
Los Angeles International Airport – Midfield Satellite Concourse	Los Angeles, CA	Complete	\$1.4B
Hartsfield-Jackson Atlanta International Airport – AMOD Project	Atlanta, GA	Complete	\$153M
BNA Terminal and Landside Area Planning	Nashville, TN	Complete	\$1.36B
LaGuardia International Airport – Delta Airlines Terminal C	New York, NY	Complete	\$4.7B
O’Hare International Airport – Global Terminal and Concourse Design	Chicago, IL	In Design	\$4.5B

#### 4.7 CONCLUSION

Key conclusions are as follows:

- The major parties’ substantial experience in air transportation is testament of their abilities to successfully complete large and complex aviation projects;
- The experienced equity partners should have no issues collaboratively carrying out the responsibilities of the Lessee;
- The Design-Builder is well established in the aviation industry with over \$4.5B of aviation work completed nationwide. Hunt’s extensive experience planning and managing complex logistics, security challenges and multi-level coordination on large infrastructure projects across the United States will be leveraged on the Project;
- In Vantage, the consortium brings award winning airport management expertise to the table. Their experience not only in airport operations, but managing operations during complex construction phasing and transitioning to a private facility, only enhances the overall consortium’s strength;

- Vantage will leverage its experience working on airports within the New York area. In 2016, Vantage led the LaGuardia Gateway Partners consortium on the LaGuardia Airport Terminal B redevelopment project to financial close and lease commencement. The project achieved Final Acceptance in 2023 and all of the new facilities are now open and operational;
- RXR brings significant local New York experience in its role as co-developer and equity investor in the Lessee, including experience with the Port Authority where senior RXR executives have previously held leadership positions. The company manages 93 commercial real estate properties and investments with an aggregate gross asset value of approximately \$22.3 billion; and
- ATI has experience working with various state and local entities for financing their infrastructure projects and the firm is minority-owned and minority-managed with a 100% ethnic minority ownership, enabling responses to public and/or private sector mandates or incentives.

## 5.0 Regulatory Approvals

### 5.1 INTRODUCTION

This section provides a summary of the Lessee’s obligations related to the Premises and all permits and approvals, in addition to their approach to meeting these obligations.

The Port Authority commenced the letting of the Terminal 6 Parcel to the Lessee on the Effective Date (the “Terminal 6 Parcel Lease Commencement Date”), and the Terminal 7 Parcel on December 1, 2022 (the “Terminal 7 Parcel Lease Commencement Date”).

The Lessee’s risk related to regulatory approvals for the DB D&C Work, including its obligations related to obtaining the Governmental Approvals, is transferred to the Design-Builder subject to the terms of the Design-Build Agreement.

### 5.2 ZONING

No rezoning is required

### 5.3 LANDS (THE PREMISES)

The Terminal 6 Parcel and Terminal 7 are, collectively, the Premises. The Port Authority let to the Lessee the Premises in two stages, as summarized in the table below (Section 1 of the Lease):

Lease Commencement Date	Parcel Name	Parcel Summary
Effective Date (Terminal 6 Parcel Lease Commencement Date)	Terminal 6 Parcel	The land as indicated in the Lease Exhibits, and all structures, improvements, additions, buildings, installations, fixtures, facilities and other property located, constructed or installed in, on or under the Terminal 6 Parcel (collectively referred to as the “Initial Premises”).
December 1, 2022 (Terminal 7 Parcel Lease Commencement Date)	Terminal 7 Parcel	The land as indicated in the Lease Exhibits, and all structures, improvements, additions, buildings, installations, fixtures, facilities and other property located, constructed or installed in, on or under the Terminal 7 Parcel (collectively referred to as the “Terminal 7 Premises”).

The Premises are to be used and operated as an airline passenger terminal, including the use and occupancy by the Lessee, Scheduled Aircraft Operators (Airline Sublessees), Concession Sublessees and other Sublessees, Governmental Authorities and the Port Authority.

The Lessee is required to maintain and operate the Premises and charge, collect and retain revenues at the Premises derived from the operation of the Premises, in accordance with the Lease.

The Lessee accepts and assumes all responsibility for the Premises, the Rights of Access and the O&M Access Areas in an “as is” condition at the applicable Lease Commencement Date. The Lessee is subject to all

easements, restrictions, reservations and agreements to which the Premises are subject. Any additional work other than that defined in the Lease that the Lessee undertakes on the Premises is not reimbursable by the Port Authority (Section 1(f) of the Lease).

There are areas identified in the Lease for Temporary Rights of Access, which are off-Premises temporary areas that can be used by the Lessee. It is a Compensation Event if the Port Authority willfully fails to provide the Lessee with Temporary Rights of Access by the applicable specified date (except when such failure is due to an Emergency or Force Majeure or the negligence or misconduct of a Lessee Related Entity). It is a Delay Event to the extent that the Lessee was affected by a Force Majeure.

The areas outside of the Premises where access is required for works (temporary or otherwise) are shown in the Lease Exhibits (Temporary Rights of Access). The approach for enabling access to areas surrounding the TWA Hotel and KIAC are under discussion with applicable parties, including the respective operators and the Port Authority.

There are no encumbrances defined in the Lease.

#### **5.4 GOVERNMENTAL APPROVALS AND PORT AUTHORITY GOVERNMENTAL APPROVALS**

Governmental Approvals include all approvals, permits, permissions, consents, licenses, certificates (including sales tax exemption certificates), registrations, notices, exemptions, exceptions, waivers, filings and authorizations (whether statutory or otherwise) that are required to perform the D&C Work, the Operations & Maintenance Work or the lease and management of the Premises.

The Lessee is responsible for obtaining and maintaining (including any amendments or modifications required to be obtained by the Lessee) all Government Approvals (except Port Authority Governmental Approvals) necessary for the D&C Work and Operations & Maintenance Work. This responsibility includes ensuring that any Governmental Approvals held or required to be held by the previous owner or operator of transferred assets such as Tanks and Pipelines, within 30 days of the applicable Lease Commencement Date (Section 6(b) of the Lease).

The Port Authority Governmental Approvals, defined in the Lease Exhibits, are the responsibility of the Port Authority and include the State Pollutant Discharge Elimination System ("SPDES") Permit and the NEPA Approval Documents. The PA has received the FONSI / ROD, which is the key environmental permit required for the Project.

The Lessee submitted a Construction Application to the Port Authority for approval prior to the start of the Phase 1 D&C Work, as required under the Lease. This document details all the contracts that are proposed to be entered into for the performance of the D&C Work, as well as estimated cost and a phased occupancy and egress plan (Section 2(g) of the Lease).

The Lessee will be provided with Compensation Event protection for (Section 2(ee)(vii) of the Lease):

- Any willful failure or delay by the Port Authority to provide information required for Governmental Approvals in the possession of the Port Authority and not otherwise available to the Lessee within a time period specified by the Lessee (not less than 30 days);
- If the Port Authority willfully fails to provide a signature, in connection with the applications for Governmental Approvals that cannot otherwise be obtained by the Lessee within a reasonable period (not less than 10 days) after a signature is requested in writing by the Lessee.

No such willful failure or delay will be deemed to be a Compensation Event if it results from a Force Majeure Event with respect to the Port Authority.

## 5.5 DESIGN-BUILDER'S REGULATORY APPROVAL APPROACH

The Design-Builder has included durations for the following permits within its Detailed Baseline Schedule:

- Federal Aviation Administration ("FAA") 7460 Approval – Test Pile Program – Received;
- FAA 7406 Approval – Project Wide – Received;
- Long Island Well Permit (Dewatering) – Received;
- Air Train Work Permits – Terminal Piles – Received;
- Air Train Work Permits – Roadway Piles – Outstanding; and
- FAA 7460 Approval – Solar Panels – Outstanding.

The Detailed Baseline Schedule includes a detailed breakdown and sequencing of the TAAs required by the Port Authority under its TCAP Manual. The Port Authority's TAA process is their equivalent of the building permits that we would see on other projects.

Based on discussions with the Lessee, we understand that there are four outstanding TAA packages that have the potential to affect the schedule and create delays:

- Terminal Fitout Package – originally scheduled to be received in December 2023 in the Detailed Baseline Schedule;
- Life Safety Package – originally scheduled to be received in August 2022 in the Detailed Baseline Schedule;
- Airside Apron Package – originally scheduled to be received in August 2023 in the Detailed Baseline Schedule; and
- Roadway Package #2 – originally scheduled to be received in March 2023 in the Detailed Baseline Schedule.

We understand that the Life Safety Package has been in review for 1.5 years and the Airside Apron Package is waiting on environmental approval from the Port Authority. TAAs first get conditional approval from the Port Authority before they receive full approval, and hence disapproved packages have not affected construction. Therefore, in order to avoid delays and impacts to the construction schedule from the TAA process, the Design-Builder is working proactively with the Port Authority to get conditional approval on critical packages.

## 5.6 CONCLUSION

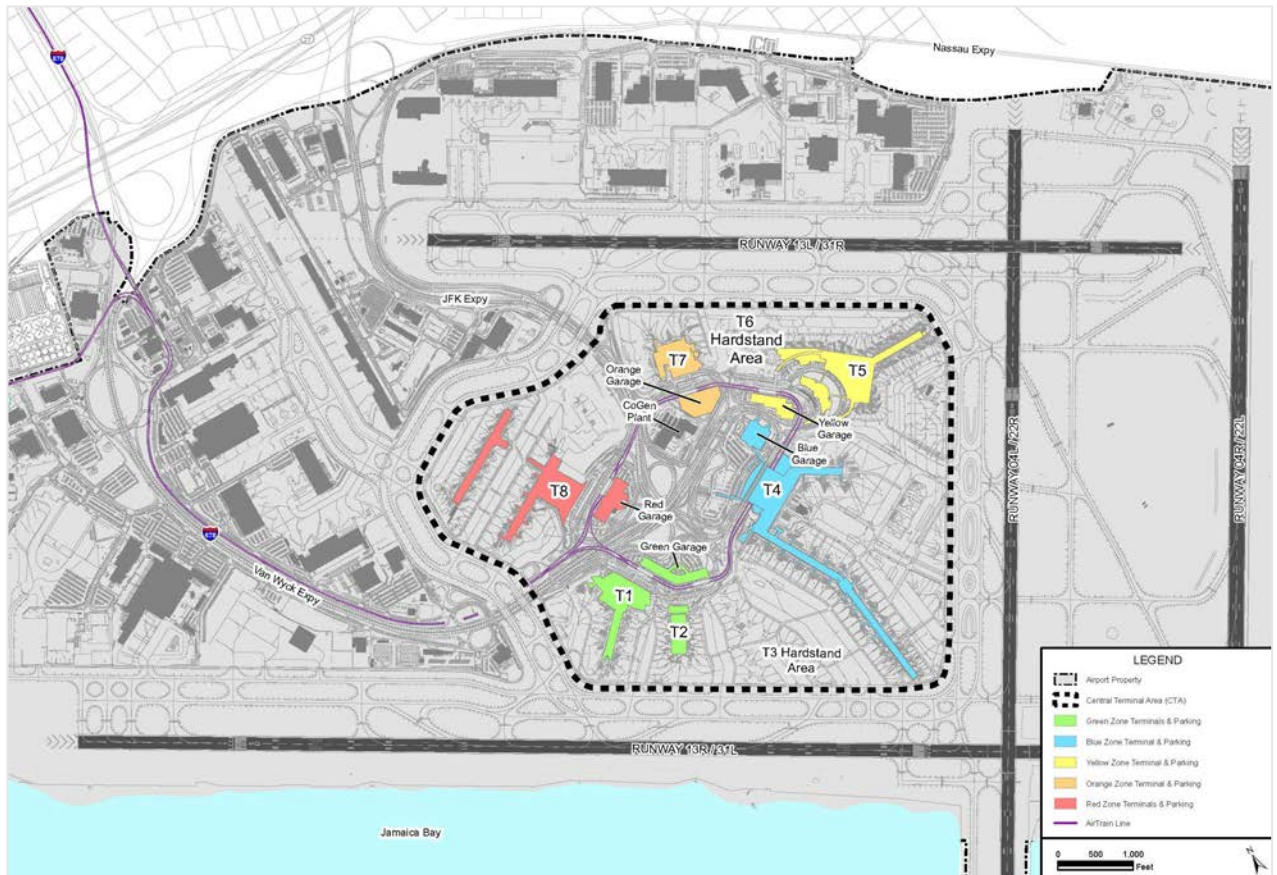

We note the following:

- The Lessee's risk related to regulatory approvals for the DB D&C Work, including its obligations related to obtaining the Governmental Approvals for the construction work, is transferred to the Design-Builder;
- There is no re-zoning required for the Project;
- The PA has received the FONSI / ROD under the NEPA process, which is the key environmental permit required for the Project;
- The Detailed Baseline Schedule includes a detailed breakdown and sequencing of the TAA's required by the Port Authority. These are the equivalent of the building permits that we would see on other projects; and
- The Design-Builder is getting TAA packages conditionally approved by the Port Authority in order to avoid delays in the construction schedule.

## 6.0 Site Conditions

### 6.1 INTRODUCTION

The existing JFK Airport CTA encompasses approximately 880 acres and serves passengers from six passenger terminals. The CTA also includes an interior roadway system, five parking garages, surface lots and an AirTrain light rail system servicing each passenger terminal. The image below demonstrates the location of the existing Terminal 6 Parcel and Terminal 7 building within the overall CTA area.

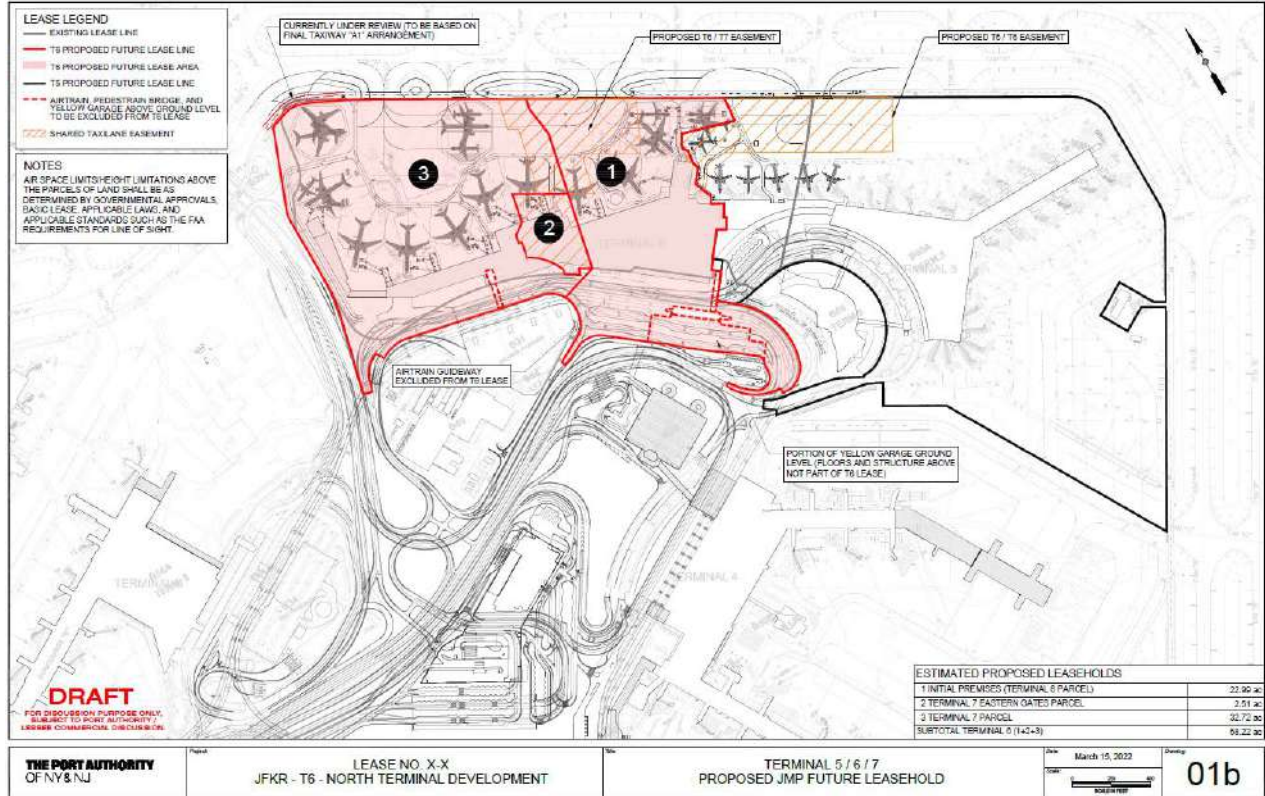

The Lessee hires and takes from the Port Authority the lands with all structures, buildings, installations, facilities and all other property located in, on or under (Section 1 of the Lease):

- The Terminal 6 Parcel; and
- The Terminal 7 Parcel of the Airport.

The following images outline the lease line for the Project:

The passenger terminal frontage roads are also part of the Premises.

The Lessee accepted the Initial Premises and the Terminal 7 Premises, the Rights of Access and the O&M Access areas 'as is' in the condition as of the applicable Commencement Date.

The Lessee will not take:

- The AirTrain, including the stations and bridges connecting to the existing Terminal 5 and existing Terminal 7;
- The Cogeneration Facility, also referred to as the Kennedy International Airport Cogeneration ("KIAC") Facility;
- The traffic systems; and
- The fuel storage system for aircraft hydrant fueling.

Although the Lessee will not take the fuel storage for aircraft hydrant fueling, we note that the Lessee retains the responsibility for designing, building and maintaining on-site fuel storage for the generators.

The Lease provides the Lessee with schedule relief via a Delay Event for the discovery of any Unknown Condition that adversely affects the D&C Work, including Unknown Archaeological Remains, Unknown Endangered Species, Unknown Facilities and Unknown Hazardous Substances, excluding any which the Lessee should have known about or is deemed to have known about prior to the Effective Date.

We note that the Project has been partially derisked with respect to geotechnical and environmental site conditions. The Design-Builder has completed the piling and contamination remediation for Phase 1. The remaining exposure to site conditions is limited to the Phase 2 work at the existing Terminal 7 site. The Lessee’s risk related to site conditions is being managed through a series of budgets and contingencies, as well as risk transfer to the Design-Builder.

**6.2 GEOTECHNICAL SITE CONDITIONS**

**6.2.1 Preliminary Geotechnical Data Report**

We have received and reviewed the Preliminary Geotechnical Data Report (Revision 2) for the Project prepared by Langan Engineering, Environmental, Surveying, Landscape Architecture, and Geology, D.P.C (“Langan”), dated April 2, 2020. The report was prepared to aid the Project’s design development, pricing and scheduling. The recommendations presented by Langan were developed in accordance with the relevant codes, standards and design references and are based on subsurface information provided by the Port Authority and Langan’s previous work in the site area for Terminal 6. The Langan team has extensive experience working alongside the Port Authority on past projects at JFK, specifically on Terminal 7. We note that Langan also has a strong working knowledge of Terminal 6 site area.

The site is located at Terminals 6 and 7 at JFK Airport in Jamaica, Queens, New York and is bound by the airside Runway Vehicle Service Road (to the north), Terminal 5 and TWA Hotel (to the east), Terminal 5 exit roadway and elevated AirTrain structures (Terminal 5 and Terminal 7) (to the south) and JFK Expressway (to the west). Currently, the Project site is occupied by the Terminal 7 building, airside roadways and other paved areas. The former Terminal 6 building was demolished in 2011.

The subsurface profile of the Project site consists of the following soil layers, listed in order of increasing depth:

- Fill (medium-fine sands with variable amounts of silt, clay and construction debris) – 7 to 18 feet below existing grades;
- Peat – ranging in thickness from 1-6 feet; and
- Granular soils (grey and brown medium-fine sands with varying amounts of silt and gravel).

There is groundwater located at 3 feet below ground, but this may vary seasonally. The subsurface profile extends to approximately 25 feet below ground and is not suitable to support the new roadway and structures on shallow foundations. Langan has recommended that all new structures are supported by deep foundations. Utilities will likely be supported by both shallow and deep foundations, dependent on their locations relative to the subsurface stratigraphy.

Langan’s preliminary recommendations for deep foundations are outlined in the following table.

Project Component	Geotechnical Engineer’s Recommendations
<i>Landside Foundations</i>	
Elevated Roadway Bridge Piers	Driven foundations consisting of tapertube piles (piles have a constant-diameter section in the shaft’s upper portion, and a tapered diameter in the lower portion).

Project Component	Geotechnical Engineer’s Recommendations
Concrete Bridge Abutment	Drilled foundations consisting of micropiles (small-diameter piles). The small pile diameters make the foundation adaptable to the presence of existing subsurface infrastructure.
<i>Terminal Buildings</i>	
Terminal Buildings	Driven foundations consisting of tapertube piles.
<i>Utilities</i>	
Various Utilities	<p>The Project Site’s different utilities will require different foundation support, dependent on the loads and utility type. For example, tanks and vaults are anticipated to bear on deep foundations. Dewatering will be necessary for the construction of utilities below the groundwater table.</p> <p>Utility construction must be coordinated with all other construction activities occurring on the Project Site to ensure the proposed construction has minimal impact on sensitive utilities and any utility installations has minimal impact on foundations.</p>

**6.2.2 Final Geotechnical Data Report**

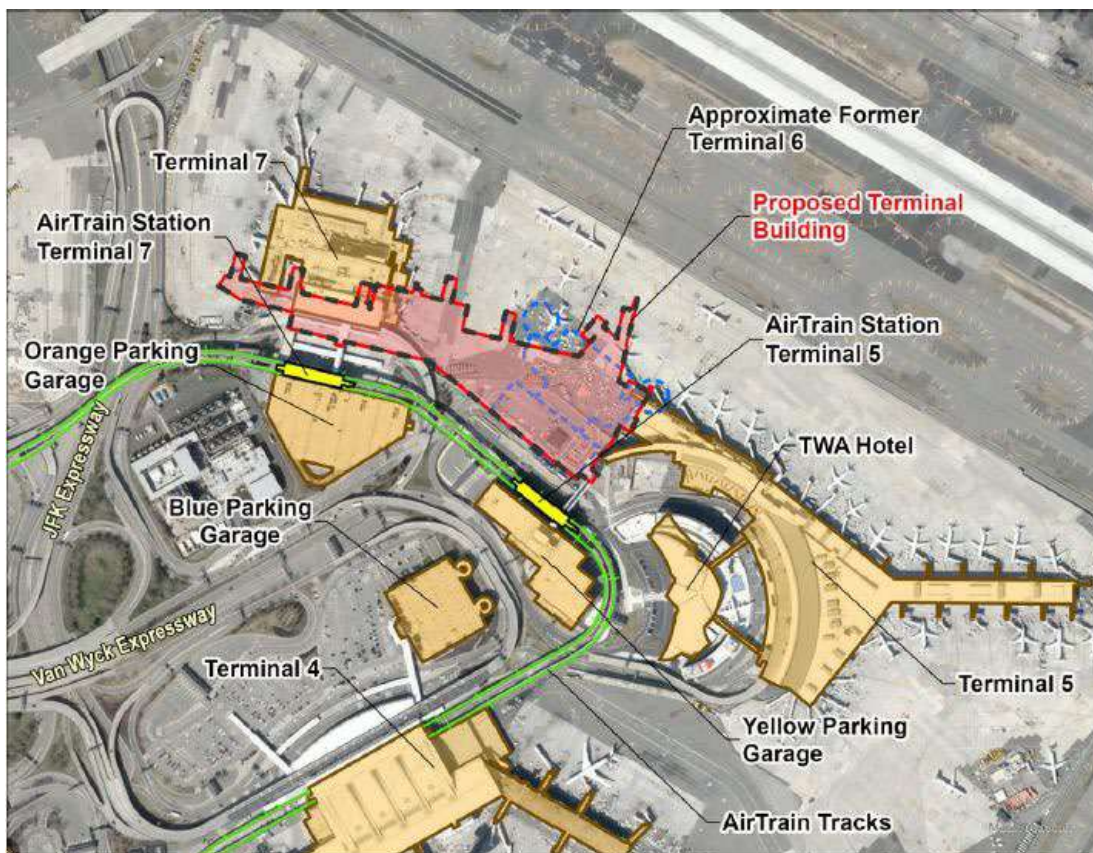

In addition to the preconstruction test pile program, the Design-Builder and Langan completed an additional geotechnical drilling program including geotechnical boring, CPTs and laboratory testing for the Terminal 6 building in April 2022. The results of the additional geotechnical drilling program, including the recommendations for the foundation design of the terminal are outlined in Langan’s Final Geotechnical Engineering Report dated May 27, 2022. We have received and reviewed this report and note the following salient points.

For the Terminal 6 building, we note Langan developed and oversaw the preconstruction test pile installation and testing program (between January – March 2022) for driven tapertube piles and drilled micropiles. Additionally, Langan has completed a geotechnical subsurface exploration program. As part of its final geotechnical evaluation for the T6 building, Langan reviewed the following documentation (with a focus on structural foundations):

- Comprehensive Conceptual Design Documents prepared by Corgan “JFKIA Terminal 6 Development”, dated February 17, 2022;
- Interim Geotechnical Support associated with the Development of Gate 30, Terminal 5, prepared by Langan, dated February 9, 2022;
- Deep Foundation Recommendations, JFK Passenger Arrivals Canopy Structure prepared by Langan, dated February 9, 2022;
- Summary of Test Pile Vibration Monitoring Program prepared by Langan, dated March 3, 2022;

- Test Pile Program – Micropile Installation & Load Test Summary Report, prepared by Langan, dated March 3, 2022;
- Test Pile Program – Tapertube Pile Installation & Load Test Summary Report (Revision 1), prepared by Langan, dated March 4, 2022;
- Geotechnical subsurface exploration program, performed by Langan;
- Site-Specific Seismic Study for JFK Airport Terminal 6 Development – Queens, New York, prepared by Langan, dated May 17, 2022; and
- Historic boring and CPT logs provided by the Port Authority – “JFK Redevelopment CTA Roadways, Utilities and GCT Boring Program”, dated March 26, 2021.

The future Terminal 6 building is shown in red in the following image of the general site layout:

As noted in the preliminary geotechnical exploration, the former Terminal 6 building was opened in 1969 and demolished in 2011, with the foundation walls, cellar slab and other foundation elements being largely abandoned in place. Piling through the remnant foundations was a potential risk item during Phase 1 foundation work; however, the piling for Phase 1 is now complete and Design-Builder did not encounter any significant challenges. Overall, there were very few obstructions encountered during the Phase 1 piling.

We note the following regarding the foundation recommendations for the terminal building, which are typical and do not present an unusual or onerous risk to the experienced Design-Builder:

- Most of the new Terminal 6 building will be supported on driven steel tapertube piles, except where driven piles cannot be installed due to driving-induced vibrations, or areas of reduced access (for example, in low-headroom conditions near the elevated AirTrain);
- In areas where there are vibration or clearance issues/concerns, drilled micropiles may be used;
- For drilled micropiles, once the design depth is reached, the steel reinforcement is placed and the pile is grouted. The casing is then extracted incrementally, and the grout is pressurized and topped off as required;
- Both driven and drilled piles are suitable for the support of the terminal buildings and large utilities/below-grade vaults;
- The pile foundation types are based on various factors including pile load testing conducted as part of the preconstruction test pile program, consideration of performance criteria, prior JFK experience and site constraints;
- The obstructions encountered during the subsurface investigation were most frequently within the footprint of the former Terminal 6 building, where remnant reinforced concrete foundation elements were encountered;
- The remnant Terminal 6 foundations generally consisted of a reinforced concrete slab, supported by reinforced concrete pile caps atop timer piles;
- Langan has noted similar foundation types are anticipated to be present at the existing Terminal 7 site; and
- All tapertube and micropile casing will be provided with corrosion protection.

Langan’s geotechnical recommendations for the following Project components based on the findings of the Final Geotechnical Engineering Report are outlined in the following table.

Project Component	Geotechnical Engineer’s Recommendations
<i>Foundation Recommendations for Lightly Loaded Structures</i>	
Shallow Foundations	Shallow foundations (spread footings) bearing in the upper fill layer may be suitable for lightly loaded site features (i.e., light poles, bollards) that can tolerate some long-term settlement
Utility Support	Through input from the MEP engineer, Langan has noted there are settlement-sensitive and gravity-fed storm and sanitary lines running below the T6 building slab, these sensitive and gravity-fed utilities cannot tolerate any appreciable settlement, and will therefore require supplemental support
<i>Recommendations for Applied Earth Pressures</i>	
Design Groundwater Level	The design of below grade structures include a temporary rise in groundwater levels up to the design flood event

Project Component	Geotechnical Engineer's Recommendations
Slab Design	Interior slab areas below the design flood elevation include a pile-supported structural slab designed to withstand the compressive slab loads in the typical service conditions and hydrostatic uplift pressures in the design flood event
Below-Grade Walls and Retaining Walls	Below-grade walls for mechanical pits and other structures are designed to resist earth/water pressures, and surcharge loadings consistent with the NYCBC
Waterproofing	Slabs and mechanical pits below the design flood elevation include a membrane waterproofing system  Langan has recommended a waterproofing membrane be installed below the typical ground floor slab and the depressed slab area
<b><i>Site Preparation and Construction Recommendations</i></b>	
General	Site preparation activities may include, but are not limited to: <ul style="list-style-type: none"> <li>• Stripping and removal of surface features (i.e., overlying concrete and asphalt)</li> <li>• Demolition of T7 during Phase 2</li> <li>• Compaction of on-site soils/placement of fills material</li> </ul>
Temporary Excavation Support	While the new terminal does not have a below-grade level, temporary support of excavation will be required so that pits and below-grade tanks can be built  Langan has noted the removal of remnant foundations may also require the use of support of excavation
Construction Dewatering	Install a temporary dewatering system to accommodate elevated groundwater levels, independent of flood events  All dewatering activities must be completed in accordance with the Environmental Management Plan ("EMP"), and the approved Long Island Well Permit

Project Component	Geotechnical Engineer’s Recommendations
Subgrade Protection during Construction and Stormwater Pollution Prevention	<p>Any foundation soils that become wet/soft before compaction shall be excavated and replaced with approved, compacted backfill before placing any fill, foundation units or other features</p> <p>All work on site must comply with the Stormwater Pollution Prevention Plan (“SWPPP”) approved by the Port Authority and New York State Department of Environmental Conservation</p>

The recommendations are typical and do not present an unusual or onerous risk to the experienced Design-Builder. The recommendations have been included in the design, delivery approach, schedule and pricing. The actual geotechnical conditions encountered to date during the Phase 1 D&C Work have aligned with the findings of the Final Geotechnical Engineering Report. The Phase 1 piling is complete, and the Design-Builder did not encounter any significant challenges.

**6.2.3 Seismic Studies**

BTY has received and reviewed the following seismic studies conducted by Langan:

- Site-Specific Seismic Study for JFK Terminal Six Development, dated May 6, 2022; and
- Site-Specific Seismic Study for JFK Terminal Six Development (Elevated Roadways) dated May 17, 2022.

The investigations forming the basis of the seismic analyses included the following:

- 79 test borings (between 10 – 100 feet below ground surface); and
- 38 cone penetration tests and 12 seismic cone penetration tests (advanced to 100 feet below ground surface).

Langan’s design recommendations satisfies the NYCBC and ASCE 7-10 requirements. The proposed development at Terminal 6 is classified as seismic Site Class of “D” (stiff soil), as per the 2016 SDGBDR.

In Langan’s opinion, there is sufficient margin of safety against soil liquefaction for the Terminal 6 site.

**6.3 ENVIRONMENTAL SITE CONDITIONS**

We have received and reviewed the Environmental Document Review Reports for Terminal 6 and 7 of the JFK International Airport, both of which were prepared by Langan and are dated May 8, 2020.

BTY notes that the activities completed as part of Langan’s document reviews do not constitute an Environmental Site Assessment and that no intrusive investigations/sampling were completed.

BTY met with Langan’s team to discuss their approach to environmental concerns including the 2 open LNAPL spills and the unknown locations of several USTs. To the extent any contaminated groundwater is encountered during construction, it will be treated and discharged in accordance with the applicable environmental requirements. The Design-Builder has obtained the Long Island Well Permit, which is a required Governmental

Langan has reviewed the following available environmental documentation/data to determine the existing environmental conditions at the site:

- Historical environmental reports provided by the Port Authority;
- The online New York State Department of Environmental Conservation (“NYSDEC”) spill database;
- The Petroleum Bulk Storage (“PBS”) and Chemical Bulk Storage (“CBS”) underground storage tank (“UST”) registration; and
- The Database Report (obtained from Environmental Risk Information Services).

#### ***Results and Recommendations***

The former fuel hydrant system (“FHS”) surrounding the old Terminal 6 (initially built in the late 1940s) was the primary source of historic soil and groundwater impacts on the Terminal 6 site. In 2012, the Terminal 6 FHS was closed in place and some associated structures were removed. Contamination included spills of jet fuel, diesel, light non-aqueous phase liquids (“LNAPL”) and other petroleum products. The Design-Builder has completed the soil and groundwater remediation work for Phase 1 and did not encounter any significant issues with unknown or unidentified contamination.

### **6.3.2 Terminal 7 Environmental Document Review**

The Project Site reviewed in the Terminal 7 Environmental Document Review includes:

- The existing Terminal 7 building; and
- Surrounding airside features (gates, taxis/runways, and the supporting airport operations area).

Langan has reviewed the following available environmental documentation/data to determine the existing environmental conditions at the site:

- Historical environmental reports provided by the Port Authority and British Airways;
- The online New York State Department of Environmental Conservation (“NYSDEC”) spill database;
- The PBS and CBS UST registration; and
- The Database Report (obtained from Environmental Risk Information Services).

#### ***Results and Recommendations***

Between 1988-2020, there were 53 documented spills of jet fuel, diesel, gasoline, and other petroleum products at Terminal 7, and 52 have been closed by NYSDEC. As of May 2020, there is one spill of LNAPL open at Terminal 7 and remediation is ongoing. Langan has noted there are higher levels of LNAPL detected when the water table is at lower elevations and that dewatering activities conducted during construction may release additional LNAPL. To the extent any contaminated groundwater is encountered during construction, it will be treated and discharged in accordance with the applicable environmental requirements.

### **6.3.3 Coordination with British Airways**

The Lessee and British Airways executed an Amendment to the Cooperation Agreement, which outlines the responsibility of both parties related to environmental remediation at the Terminal 7 site.

The Lessee has elected to use and operate three aboveground diesel generator storage tanks currently in place at Terminal 7 (the “Continued Terminal 7 Storage Tanks”). British Airways will be responsible for removing and disposing of all other above and underground storage tanks.

The Lessee engaged Langan to develop a Site Assessment Report in order to evaluate the nature and extent of any soil, groundwater or other contamination at the Terminal 7 site as a result of releases occurring prior to the BA Terminal 7 Lease Expiration Date. Langan provided a Remediation and Closure Cost Estimate to remediate contamination, close the Jet Fuel Hydrant System and remove the Continued Terminal 7 Storage Tanks. British Airways provided the Lessee with a \$14M settlement for the cost of this work.

The Lessee will be responsible for closing the Jet Fuel Hydrant System and Continuing Terminal 7 Storage Tanks and these costs will be funded from the British Airways settlement amount.

#### **6.4 FINAL ENVIRONMENTAL ASSESSMENT (FONSI/ROD)**

We have received and reviewed the Final EA for the JFK International Airport Redevelopment Program, dated April 20, 2020. The EA was sponsored by the Port Authority and prepared for the US Department of Transportation FAA as required under NEPA. The EA covers the full JFK International Airport Redevelopment Program, of which the Project is one component. The EA investigated the potential environmental effects of the Project Work, including how the Project would impact air quality, biological resources, coastal resources, hazardous materials and historical resources.

The JFK International Airport Redevelopment Program has received a Finding of No Significant Impact (“FONSI”) / Record of Decision (“ROD”), which is the key environmental permit required for the Project. The FONSI/ROD represents the FAA’s determination that the Project will have no significant environmental impacts. The FONSI/ROD was issued based on the results of the Final EA. The Final EA not only examined the impacts of activities associated with the redevelopment of JFK’s Terminal 6 and 7, but the entire JFK Redevelopment program. Since FONSI/ROD was based on the Final EA for the JFK Redevelopment program, BTY notes that it is a conservative disclosure of the Project’s anticipated environmental effects.

This section provides a summary of the salient points of the Lease related to the environmental site conditions and a summary of the EA findings.

##### **6.4.1 Compliance with Environmental Requirements**

The Lessee shall be obligated at its cost and expense to comply with all Environmental Requirements applicable to the Premises, operations, occupancy and use, O&M Access or any Environmental Damages, including all documentation preparation and submission to the Governmental Authorities related to Remediation works to comply with Environmental Requirements, including NEPA.

##### **6.4.2 Air Quality**

The Project’s emissions are not expected to exceed minimum thresholds of the US Environmental Protection Agency (“US EPA”) since there will not be an increase in the total number of motor vehicles travelling to and from JFK in addition to the forecasted growth. In the case that there are increased emissions from the Project, they will most likely derive from construction activities.

The emissions associated with the Project’s construction activities will occur primarily in engine exhaust from the operation of construction equipment and other vehicles on site. The EA recommends the following mitigation measures for the Project’s construction period (Section 5.2 of the Final EA):

- 70% of non-road diesel construction equipment less than 100 horsepower must meet the US EPA’s Tier 4 Emission Standards; and

- 100% of non-road diesel construction equipment equal to or more than 100 horsepower must meet the US EPA's Tier 4 emission standards.

Additional sustainability requirements relevant to air quality include:

- The implementation of all-electric ground support equipment (replace all existing baggage and cargo tugs, belt loaders and pushback tractors with electric models by 2025) (Section 19.3 of Section A of the RPW); and
- Ensuring at least 10% of the Lessee's fleet of on-road vehicles and the fleets of its Contractors and subcontractors accessing the airport are zero-emitting vehicles (Section 8.1.19 of Section A of the RPW).

Throughout the operations period, most emissions will be associated with motor vehicles and ground aircraft operations. It is highly unlikely that the Project will cause exceedances to the minimum thresholds of the US EPA due to the short-term nature of the construction activities, the Port Authority's existing emission reduction measures, the Port Authority's Sustainable Design Guidelines, and the construction period mitigation measures.

#### 6.4.3 Biological Resources

The Project Site consists of disturbed, fully developed land that is currently used for airport operations. There are no naturally vegetated areas within the Project Site to be impacted by Project Work, therefore there are no adverse impacts on the ecological communities or vegetation. The wildlife in the Project Site only includes species that are highly tolerant to human disturbance and the Project Work will not modify their habitat. The Project Site is already fully developed and does not provide habitat for any Federally-listed or state-listed species. There were 30 migratory birds protected under the Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act that may be present close to the Project Site. However, the Project Site is not a suitable habitat for the birds and the Project remains unlikely to adversely impact migratory birds. Given the Project Site's existing use and development, no mitigation is required to control the biological resources (Section 5.3 of the Final EA).

#### 6.4.4 Coastal Resources

The Project Work will occur within the developed upland areas of the designated coastal zone boundary established by the New York State Department of State ("NYS DOS") and the New York City Department of City Planning ("NYC DCP") and will not impact coastal resources such as coastal barriers, wetlands, floodplains or fish and wildlife habitat. The Project will not cause adverse impacts on coastal resources and no mitigation is required (Section 5.5 of the Final EA).

#### 6.4.5 Hazardous Substances

If required by an applicable Governmental Authority, the Lessee will perform at its own cost an investigation or environmental site assessment as per Environmental Requirements to determine the extent of any contamination, pollutants or Hazardous Substances within the Premises for events related to the occupancy of the Lessee (Section 57 (i) of the Lease).

The Lessee will perform all Remediation required by Environmental Requirements in connection with Releases of Hazardous Substances at, on, under or from Airport that are caused by the Lessee or Lessee-Related Entity. With regard to Hazardous Substances encountered outside of the Excavation Boundary (defined as the applicable Perimeter Dig Area: the perimeter of an area that will actually be excavated as part of the D&C Work, plus ten

feet from the edge of such area, with some exceptions) the Lessee shall only perform Remediation if required to do so by a Governmental Authority.

No liability will be taken by the Lessee for (Section 57 of the Lease):

- Violations of Environmental Laws or Releases of Hazardous Substances caused by the gross negligence or willful misconduct of the Port Authority or the migration of Hazardous Substances through soil or groundwater from other locations;
- Fines or penalties or third-party claims arising from violations of Environmental Requirements associated with the operation of the Terminal 7 Parcel by other persons that occurred prior to the Terminal 7 Parcel Lease Commencement Date;
- Pre-Existing Hazardous Substances disposed at locations approved by the Port Authority or migrations prior to the Terminal 7 Parcel prior to the Terminal 7 Parcel Lease Commencement Date; and
- Fines or penalties or third-party claims arising from violations of Environmental Requirements associated with operations on the Rights of Access occurring prior to taking occupancy.

The Lessee is responsible for the identification, abatement and removal off Site of all asbestos only interfering with the necessary D&C Work carried out by the Design-Builder to complete the Scope (Section 57(K) of the Lease).

Any costs, losses or other expenditures to be reimbursed by the Lessee in accordance with Section 57 of the Lease (Environmental Obligations) shall be additional rent, recoverable by the Port Authority in the same process as if it were originally a part of the Rental (Section 57 (A)(6) of the Lease).

The EA determined that historical soil and groundwater contamination is present within the Project Site, and this may continue to be a source of contaminants. After reviewing the US EPA's National Priorities List ("NPL"), it has been confirmed that there are no NPL sites within a one-mile radius of the Project Work. There have been historical accidental releases of hazardous substances through the handling, use and storage of various hazardous materials at the Project site and the Project Work may require the removal and/or relocation of existing fuel tanks and underground fuel lines.

Solid waste will be controlled through various requirements, including Port Authority's Sustainable Infrastructure Guidelines and a construction waste management program that will divert 75% of all construction debris from the landfills through recycling. Additionally, the Project is being designed to meet LEED Silver certification.

The demolition activities will generate solid waste and potentially hazardous materials requiring proper disposal. In the event that soil exhibiting evidence of contamination is encountered, the Lessee is required to test the soil and notify the Port Authority of the results to determine the sample's appropriateness for either offsite disposal or on-site soil reuse (Section 22.3.4.3 of Section A of the RPW). The demolition activities may also trigger the need for asbestos abatement in Terminal 7 (Section 22.3.5 of Section A of the RPW). Activities involving disturbing or excavating soils are required be completed in accordance with applicable Federal, state, tribal or local laws or regulations. The solid waste stream will be minimized through source reduction and recycling strategies, including the Port Authority's Sustainable Building Guidelines, reducing negative environmental impacts of the Project. Overall, there are no significant construction related impacts related to the release of hazardous materials, solid waste or pollution with the mitigation measures in place (Section 5.7 of the Final EA).

#### 6.4.6 Historical Resources

The Project Work does not include a change in runway use patterns or flight paths and will not cause an increase in aircraft operations other than forecasted growth. There is no expected impact to historic properties from construction activities, noise or increased traffic. On December 2, 2019, in their response to FAA, the New York

State Historic Preservation Office (“NY SHPO”) concluded that there are no identified Areas of Potential Effect and there was No Adverse Effect to archaeological resources. The Project will not impact archaeological and historical resources and no mitigation measures are required. (Section 5.8 of the Final EA).

#### **6.4.7 Water Resources**

There are no direct impacts on wetlands, floodplains, surface water or groundwater (collectively, the “water resources”) from the Project, and no mitigation is required. The Project may have indirect impacts on water resources due to the increased impervious surface areas. However, given the existing and planned stormwater management plans, adverse impacts to water resources are not anticipated (Section 5.14 of the Final EA).

### **6.5 UTILITIES**

The Parties acknowledge there are communications and utility lines and conduits located on or under the site on which D&C Work is to be performed, which do not, and may not in the future, serve the Premises. The Lessee, as part of the D&C Work, is responsible for the relocation and reinstallation of such communications and utility lines and conduits and for the restoration of all affected areas (“Relocation Work”) and shall be at the Lessee’s sole cost and expense (Section 2(s) of the Lease).

The Port Authority as reasonably requested by the Lessee, will provide its assistance in connection with the negotiation of any agreements for utility relocation, including Relocation Work, with third parties owning utilities and the resolution of any disputes with such third parties. All reasonable out-of-pocket costs, expenses and other charges paid or incurred by the Port Authority in cooperating with the Lessee will be payable to the Port Authority by the Lessee immediately upon demand.

If the Parties cannot agree on whether Relocation Work needs to be performed, or the scope of such Relocation Work, or a dispute arises in connection with the Port Authority’s cooperation, such dispute will be referred to the Chief Engineer.

The Lessee at its sole cost and expense is required to bring appropriate access stubs and service lines for the supply of cold water, electric power, telephone communications, thermal heating and cooling, and sanitary and storm sewers (“Utility Service Lines”) to locations at the perimeter of the Premises or to the nearest manhole or other location at the Airport as required by the Lease or determined by the Port Authority and the Lessee, and is responsible for (Section 2(t) of the Lease):

- Tying its utility lines and roadways into Utility Service Lines and roadway access stubs; and
- Coordinating and executing all agreements regarding the supply of Utilities and installation of Utility Services Lines with National Grid (with respect to Natural Gas), the FAA (with respect to NAVAIDS), telecommunication services providers and any other third-party utility companies owning Utilities that may be impacted by the Construction Work.

Regarding the Lessee’s coordination and execution of all utility agreements, the Lessee must keep the Port Authority informed at all times of the status of coordination and negotiation of such agreements.

The Lease includes an exhibit showing the location of the interface/tie-in points for Utility Service Lines, including water, sanitary, gas, fuel, electric, drainage and communications.

## 6.6 STORAGE TANKS

The Lessee takes full ownership of and responsibility for all ASTs, USTs and fuel lines or hydrants (except for Closed Tank Systems) located on the Terminal 6 and Terminal 7 Parcels as per their respective Lease Commencement Dates, including all associated pipes, lines, fixtures and equipment (Section 62 of the Lease).

The Lessee will perform at its own cost all necessary operations, maintenance and modifications to the Tanks to comply with all applicable Environmental Requirements and remove unused Tanks. The Port Authority will be held harmless from any risks arising from connections with the Tanks and Discharges from the Tanks whether or not known or unknown before or after the Terminal 6 Parcel and Terminal 7 Parcel Commencement Dates.

The Lessee will also assume ownership of and responsibility for any underground systems associated to petroleum products (except for Closed Pipelines), including jet fuel, aviation gasoline, and related hydrants, complying with all obligations of prior owner and operator of such Pipeline, ensuring compliance with any applicable Governmental Approvals.

## 6.7 CONCLUSION

We note the following conclusions related to site conditions:

- The Project has been partially derisked with respect to geotechnical and environmental site conditions. The remaining exposure is limited to the Phase 2 work at the existing Terminal 7 site. The Design-Builder did not encounter significant challenges related to geotechnical or environmental site conditions during the Phase 1 foundation work;
- The Lessee's risk related to site conditions is being managed through a series of budgets and contingencies, as well as certain risk transfer to the Design-Builder with respect to conditions that are known or should have been known based upon the standard of care;
- The Lease includes a Delay Event for the discovery of any Unknown Condition that adversely affects the D&C Work;
- The Lessee is responsible for the Remediation of all Hazardous Substances encountered within the Excavation Boundary, and of all Releases of Hazardous Substances on the Premises occurring after the Commencement Date. With regard to Hazardous Substances encountered outside of the Excavation Boundary, the Lessee is only required to remediate if required by a Governmental Authority;
- The Lessee is responsible for all necessary operations, maintenance and modifications related to the existing Tanks and Utilities;
- Overall, the Final EA has determined that the Project will not result in significant impacts to the environmental resources, and that mitigation measures in addition to those already included in the Project plan are not required;
- British Airways provided the Lessee with a \$14M settlement for the Remediation and Closure Costs for the Terminal 7 Jet Fuel Hydrant System; and
- The Lessee contemplates using three above ground storage tanks currently in place at Terminal 7 and will remediate any releases from those tanks upon shutdown of Terminal 7 operations. Any required remediation will be funded out of the British Airways settlement.

## 7.0 Project Schedule

### 7.1 INTRODUCTION

The Lessee is responsible for meeting the following Completion Milestones:

- Substantial Completion of Phase 1 by the Scheduled Phase 1 Completion Date, defined as December 4, 2025; and
- Substantial Completion of Phase 2 by the Scheduled Completion Date, defined as February 23, 2028.

The Lease includes an Event of Default for a failure to achieve Substantial Completion of Phase 2 by the Outside Completion Date, which is defined as 12 months following the Scheduled Completion Date.

The Lessee's risk related to the Project Schedule has been transferred to the Design-Builder under the DBA with the exception of delays due to Material Developer Changes and Unavoidable Delays, which are defined as (Section 10.8 of the DBA):

- Terrorism or war;
- Strikes not specific to the DB D&C Work that are beyond Design-Builder's or its Subcontractors' reasonable control;
- Fire or other casualty resulting in property damage to the DB D&C Work not caused by Design-Builder or any Subcontractor's negligence or willful misconduct;
- Other Force Majeure events, subject to terms and conditions of the DBA and the Lease;
- Compensation Events, subject to terms and conditions of the DBA and the Lease; and
- Acts or omissions or willful misconduct of Lessee-Related Entities.

We note that with the exception of the last event (e.g. acts or omissions or willful misconduct of Lessee-Related Entities), the Lessee is also provided with certain protection for these Unavoidable Delay events under the Delay Event and Compensation Event protections under the Lease. The Design-Builder's relief for Compensation Events is subject to equivalent project relief under the Lease.

### 7.2 PHASED D&C WORK APPROACH

The Lessee has planned the construction of the D&C Work to be performed in phases: Phase 1 D&C Work and Phase 2 D&C Work. The Phase 1 D&C Work includes the following responsibilities (Section 2(b)(2)(iii) of the Lease):

- Construction of the portion of the New Terminal Facilities on the Terminal 6 Parcel that has been expanded to the eastern building edge of the Existing Terminal Facilities on the Terminal 7 Parcel;
- Decommissioning of two Gates located on the eastern side of the existing Terminal 7;
- Construction of the Ground Transportation Center; and
- Construction of associated Off-Premises Facilities.

The Phase 2 D&C Work includes the following responsibilities:

- Demolition of the Existing Terminal Facilities on the Terminal 7 Parcel;
- Construction of the remaining New Terminal Facilities on the Terminal 7 Parcel; and
- Construction of associated Off-Premises Facilities.

### 7.3 DESIGN-BUILDER'S SCHEDULE APPROACH & METHODOLOGY

Key Dates from the Design-Builder's Detailed Baseline Schedule are summarised and compared to the Design-Builder's monthly schedule update dated September 6, 2024 in the table below. A negative number indicates a delay compared against the baseline schedule.

Activity	Detailed Baseline Schedule	Design-Builder's Current Schedule	Variance (calendar days)
Phase 1 Terminal			
Financial Close	17-Nov-22	17-Nov-22	0
Mobilization Complete	08-Aug-23	17-Dec-24	-497
Site Demolition Complete	04-May-23	07-Jun-24	-400
Foundations Complete	17-Oct-24	13-Aug-25	-300
Landside Utilities Complete	29-Jul-24	23-Jul-25	-359
Superstructure Complete	14-Apr-25	30-Oct-25	-199
Airside Civil & Utilities Complete	22-Feb-25	15-Oct-25	-235
Building Systems Complete	19-May-25	10-Jul-25	-52
Passenger Boarding Bridges Complete	15-Jul-25	17-Oct-25	-94
Passenger Conveying Complete	18-Jul-25	28-Oct-25	-102
Interior Construction Complete	22-Jul-25	31-Oct-25	-101
Enclosure Complete	01-Aug-25	15-Oct-25	-75
Baggage Handling System Complete	04-Aug-25	14-Aug-25	-10
Phase 1 Roadways			
Phase 1C Roadways Complete	18-Jun-24	29-Apr-25	-315
Phase 1A Roadways Complete	17-Sep-24	25-Nov-25	-434
Phase 1B Roadways Complete	02-Dec-24	22-Sep-25	-294
Phase 1E Roadways Complete	19-Feb-25	21-Oct-25	-244
Phase 1D Roadways Complete	15-Sep-25	01-Dec-25	-77
Phase 1F Roadways Complete	09-Dec-25	29-Sep-25	71
Phase 1 Substantial Completion	04-Dec-25	26-Dec-25	-22
Phase 1 DBO	10-Feb-26	04-Mar-26	-22
Phase 2 Terminal			
Terminal 7 Demolition Complete	14-Jul-26	30-Jul-26	-16
Foundations Complete	08-Feb-27	08-Apr-27	-59

#300 - 30 E 6th Avenue, Vancouver, BC Canada V5T 1J4 | 604 734 3126

Activity	Detailed Baseline Schedule	Design-Builder's Current Schedule	Variance (calendar days)
Superstructure Complete	19-Mar-27	26-May-27	68
Landside Utilities Complete	08-Apr-27	30-Jun-27	-83
Enclosure Complete	25-Jun-27	14-Oct-27	-111
Roadways Complete	21-Jun-27	10-Sep-27	-81
Airside Civil & Utilities Complete	12-Aug-27	30-Aug-27	-18
Passenger Boarding Bridges Complete	19-Jul-27	09-Sep-27	-52
Baggage Handling System Complete	23-Aug-27	26-Oct-27	-64
Building Systems Complete	19-Oct-27	20-Oct-27	-1
West Concourse Complete	10-Dec-27	29-Dec-27	-19
Passenger Conveying Complete	15-Nov-27	29-Jun-27	139
Interior Construction Complete	19-Oct-27	08-Dec-27	-50
Phase 2 Substantial Completion	23-Feb-28	13-Mar-28	-19
Phase 2 DBO	19-Apr-28	08-May-28	-19

The Design-Builder's Detailed Baseline Schedule was developed based on its experience with similar projects and input from local trade subcontractors. We note the following:

- The schedule includes a detailed sequence of preconstruction activities, including design, site investigations, procurement and permitting;
- The design activities and durations are based directly off the design team's schedule. The Design-Builder has incorporated the PA design review periods defined in the RPWs and has allowed for a resubmission to address PA comments for the majority of design submissions;
- The schedule has been informed by Vantage's experience at LaGuardia Airport;
- The schedule is based on a 5-day, 40-hour workweek with statutory holidays included;
- Opportunities to accelerate the schedule, if required, include longer shifts, weekends and additional labour;
- Labour is provided through a Project Labour Agreement with local unions;
- The Design-Builder has received schedule input from all critical subtrades. The prospective subcontractors for packages that are yet to be awarded will need to agree to the schedule logic and duration. The current schedule durations for remaining packages are based on the Design-Builder's historic experience;
- Weather days have been included in the schedule based on the National Oceanic and Atmospheric Administration's historic data for New York; and
- The Design-Builder has placed orders for long lead items early and, if needed, will use offsite storage to mitigate the risk of procurement delays.

#### 7.4 ASSESSMENT OF THE PROJECT SCHEDULE

Our review of the schedule is based on the Design-Builder's Detailed Baseline Schedule and the current monthly schedule update, dated September 6, 2024, reported by the Design-Builder.

The September 2024 Detailed Schedule forecasts a 22 day delay to the Phase 1 Substantial Completion and DBO milestones and a 19 day delay to the Phase 2 Substantial Completion and DBO milestones, which is reflective of delays experienced in several Phase 1 construction activities.

The delays to Phase 1 terminal construction activities were caused by delayed completion of the Gate T5-30 fixed link, which impacted the capture and demolition of the Gate T5-30G area and subsequent terminal foundation/structural work and the airside apron. Construction of the Gate T5-30 fixed link was completed in May 2024 and the Design-Builder implemented an acceleration program to recover delays to the remaining Phase 1 terminal piles, pile caps and foundation work in this area. The Design-Builder has mitigated these delays so far using the following methods:

- Resequencing of construction activities such that the Design-Builder can maintain the critical path duration;
- Revised logic throughout the schedule, considering more input from subtrades;
- Conservative use of float in the original baseline schedule; and
- Use of schedule acceleration methods as necessary.

The Design-Builder intends to further mitigate impacts to terminal construction by pouring larger areas of terminal slab on metal deck, utilizing overtime shifts for steel erection and decking, potentially resequencing curtainwall activities and installing baggage handling equipment in multiple areas at once. We have discussed the current Detailed Schedule with the Lessee. The Lessee considers the Design-Builder's schedule for Phase 1 to be realistic, and despite delays to the Phase 1 activities, considers the construction that has taken place on the terminal building to be advanced and progressing well.

The Phase 1 roadwork has been significantly delayed compared with the baseline schedule. The delays are due to coordination challenges with the Port Authority and the design-builder (the "Roadways DB") hired by the Port Authority to design and construct the Roadway Network in the CTA (the "Roadway DB Work"). The interface between the Design-Builder and the Roadway DB is governed by the Construction Coordination Agreement ("CCA") described in Section 7.7 below. The Design-Builder's phasing plan for the T6 roadway work was based on a defined handover plan and delineation of work zones with the Roadways DB, which has been subsequently revised, impacting the Design-Builder's phasing plan. The Lessee submitted a Compensation and Delay Event notice and is proactively managing the issue with the Port Authority. Despite the delays, the Design-Builder has worked collaboratively with the Port Authority and the Roadways DB to re-sequence the work and mitigate the impacts to the Substantial Completion and DBO milestone dates.

The Design-Builder is reporting additional delays due to egress modifications at Terminal 5, which are a part of the Gate T5-30 scope of work. The work did not progress as anticipated due to water penetration issues and remediation work is currently in progress. This impacts the Design-Builder's ability to capture a small area near Terminal 5, where piles are to be installed for the Terminal 5 connector. The Design-Builder plans to mitigate this by resequencing steel activities and implementing an overtime program for foundations and steel. This is currently on the critical path; however, it is anticipated that time can be recovered during the interior construction phase of the Terminal 5 connector.

BTY is of the opinion that the overall duration of the schedule is reasonable, but the roadway activities no longer contain as much float to recover future delays as the baseline schedule due to the resequencing and mitigation of delay that has already taken place. We note that with the exception of overtime work to complete the terminal structural steel, the remaining terminal schedule is based on standard working day and shift.

assumptions, which will allow for future acceleration if needed to recover potential delays, including the current forecasted delay to the contractual milestones.

## 7.5 PROJECT SCHEDULE REQUIREMENTS

The Project Schedule must be developed using a critical path methodology in sufficient detail to accurately depict the D&C Work. Specifically, the Project Schedule must include the following requirements (Section 3 of Section B of the RPW):

- No activities with a duration greater than 30 days, except for non-construction activities (procurement, fabrication, delivery of equipment, system software);
- Interdependencies between the D&C Work and all other activities required for the successful completion of the Project, including interface with Port Authority Enabling Projects that can affect the completion of the Project;
- Cost and resource loading;
- Appropriate activity ID's, description and codes;
- Clearly defined calendars that account for expected seasonal weather conditions, environmental permit requirements and statutory holidays;
- All activities must have clearly assigned predecessor and successor relationships to each activity and appropriate logic ties between activities;
- No use of negative float; and
- Identification of long lead items.

The Project Schedule requirements are in-line with previous similar P3 projects.

## 7.6 SCHEDULING REPORTING REQUIREMENTS

The following is a list of the Lessee's scheduling reporting requirements (Section 3.2 of RPW Section A):

- Submit a monthly Progress Schedule Update to the Port Authority showing all changes in the Progress Schedule versus the Detailed Baseline Schedule;
- The Lessee must provide a detailed two and six-week look ahead schedule regularly at Bi-Weekly D&C Work Progress Meetings;

The Detailed Baseline Schedule and the Progress Schedule Update reports must be submitted in Primavera and must include:

- A schedule narrative that provides a general description of the Lessee's approach to meeting the goals of the RPW, the Lease and the Critical Path;
- A narrative comparing the current dates to the respective intermediate key progress events and Completion Milestone dates, describing the physical progress during the current report period, explaining plans for continuing the D&C Work during the next report period and describing and explaining changes in crewing and construction equipment;
- The Lessee is required to also track critical interface/interdependency dates requested by the Port Authority;
- Analysis Report indicating Activities, intermediate key progress events or Completion Milestones that are behind schedule by at least thirty days;
- Critical Path and Near-Critical Path analysis;

- A Report that compares the current Progress Schedule Update with the then-effective Detailed Baseline Schedule and prior month's Progress Schedule Update and include explanations for all changes made;
- List of all added or deleted activities, activity/project constraints included in the Progress Schedule Update, and the rationale; and
- The major work elements, as defined in the work breakdown structure ("WBS"), to be accomplished during the next month and list any activities with potential challenges.

Following the D&C Work Commencement Date, the Lessee is required to issue to the Port Authority a Daily Progress Report. Daily Reports are submitted on a weekly basis for the previous week and include the following:

- The D&C Work performed;
- Any incidents or interference with traffic or passengers;
- Any incidents concerning public safety or personal injury; and
- A statement of any unusual happening that occurred.

No later than the last Business Day of the following month for each month following the Effective Date, the Lessee must deliver to the Port Authority a report that reflects the status of, and information related to the development and conduct of the D&C Work (the "Monthly Progress Report"). The Monthly Progress Report must include at least the following:

- A detailed description of the Design Work that was completed in the prior month, including an update on the status of the Design Work;
- A detailed description of the Construction Work that was completed in the prior month, including photographs showing the progress of the Construction Work;
- All changes in the Progress Schedule versus the Detailed Baseline Schedule;
- An updated Progress Schedule;
- The status of material and equipment deliveries;
- A Designated Debris Material Assessment Summary;
- A Health and Safety Report; and
- All other information reasonably requested by the Port Authority relating to the D&C Work, Applicable Laws and Applicable Standards.

The Baseline Schedule will identify (Section 2(c)(4) of the Lease):

- Each key interface activity between the D&C Work and any Other Redevelopment, so that altering such date on the Baseline Schedule will have, or would be expected to have an adverse impact on the critical path of any Other Redevelopment ("Other Redevelopment Interface Activities");
- Each activity requiring that physical components of the New Terminal Facilities or Off-Premises Facilities being performed by the Lessee be connected to physical components under control of the Port Authority ("Port Authority Interface Activities"); and
- Each activity requiring Port Authority personnel to perform Oversight activities ("Port Authority Oversight Resources").

The Lessee can alter the Baseline Schedule, subject to the review and comment of the Port Authority. Any alteration of the Baseline Schedule that affects any Other Redevelopment Interface Activity or Port Authority Interface Activity or adversely impacts the Port Authority Oversight Resources will be subject to the prior written approval of the Port Authority.

The Port Authority has agreed to coordinate with the Lessee in good faith to schedule the availability of Port Authority Oversight Resources to the next soonest possible date of availability, taking into account the resources already committed to the Other Redevelopments.

If the critical path of the D&C Work is more than 30 days behind the then-current Baseline Schedule, the Lessee will submit an Alternative Solutions Report, including a proposed schedule recovery strategy to mitigate any potential delay and will reasonably consider revisions to the Baseline Schedule proposed by the Port Authority to achieve completion within the required timeframes (Section 2(c)(5) of the Lease).

The schedule reporting requirements are more stringent than we typically see on similar P3 projects, which shows a high degree of attention being paid to schedule. While the delivery of monthly progress updates is standard, the requirement for Daily Progress Reports requires additional resources from the Design-Builder in order to meet the Port Authority's reporting requirements. We are not aware of any issues with the Design-Builder complying with the schedule reporting requirements.

## 7.7 CONSTRUCTION COORDINATION AGREEMENT

The Lessee and Port Authority entered into the CCA, which outlines the Lessee's responsibilities for coordinating the work with the Other Redevelopment Entities performing work in the CTA during the Construction Period, which consist of (Appendix A of the CCA):

- JFK NTO LLC – the developer for the Terminal 1 redevelopment;
- JFK International Air Terminal LLC – the operator of Terminal 4;
- The design-builder retained by the Port Authority to construct Central Substation 2; and
- The design-builder retained by the Port Authority to construct the roadway network.

The Lessee and the Other Redevelopment Entities use Shared Resources, defined as the roadways, laydown areas, parking, utilities, AirTrain Operator Services and the Vendor Operations at a purpose-built facility on or near airport property (the "LSS Facility") and other general logistical support. Each of the Other Redevelopment Entities also executed a construction coordination agreement substantially in the same form as the CCA.

The Lessee has transferred its responsibilities under the CCA to the Design-Builder via the DBA, provided that the Design-Builder may seek a change order under the DBA to the extent that the Design-Builder could not have known the costs of such compliance with the CCA at the time of the Lessee's acceptance of the GMP.

As part of the Draft Detailed Baseline Schedule submitted to the Port Authority, the Design-Builder provided an initial design and construction logistics schedule with a weekly projection of expected use of Shared Resources for the first three months of the Construction Period, including the use of (Section 1 of the CCA):

- CTA roadways;
- Interfaces between Roadway Network and non-CTA roadways;
- Parking lots;
- Off-Premises laydown areas;
- The number of delivery vehicles for equipment and materials;
- Buses to transport workers to the site;
- Vendor Operations at the LSS Facility;
- Utilities, including installations, removals or relocations; and
- On-site project support and coordination services to be provided by the AirTrain Operator.

The Design-Builder is responsible for providing the Port Authority with a rolling two-week and six-week look ahead forecast of the above information. The Port Authority will compile the Design-Builder's schedule with the schedules provided by the Other Redevelopment Entities and provide all parties with a Master Schedule.

The CCA requires the Design-Builder to participate in a Redevelopment Work Coordination Committee consisting of the Port Authority's JFK Program Director and representatives from the Other Redevelopment Entities. The committee holds meetings monthly and the determinations made at the meetings are binding on each party, subject to the dispute process defined in the CCA (Section 2 of the CCA).

The CCA includes a framework for resolving conflicts in the use of Shared Resources. The JFK Program Director has authority to make determinations which are not arbitrary, capricious or unjustly discriminatory to resolve conflicts in the use of Shared Resources between any of the Airport Redeveloping Entities (Section 3 of the CCA).

All Conflicts Determinations are intended to resolve the limited, technical issue of a Conflict arising from directly competing uses of a Shared Resource and are not intended to resolve any legal or commercial disputes. The JFK Program Director will make a Conflict Determination after considering the impacts of delay to the Lessee and Other Redevelopment Entities, the operational needs of the Airport, the stage or progression of the work and the legal requirements of the various Airport Redevelopment stakeholders.

If the Lessee raises a Conflict within seven days and could not have reasonably anticipated the Conflict, then the JFK Program Director will make a Conflict Determination within one Business Day after receiving written notice. If the Lessee or Other Redevelopment Parties view the Conflict Determination as arbitrary, capricious or unjustly discriminatory, they may refer the issue to the Port Authority's Chief Engineer, whose decision will be conclusive, final and binding.

The Port Authority has contracted with a Roadways DB to for the Roadway DB Work, which consists of the improvements and modifications to the Roadway Network in the CTA. The Design-Builder was provided with the opportunity to review and comment on the Roadways DB's Initial Design and Proposed Final Design and will work collaboratively with the Port Authority and the Roadways DB until all comments and modifications are reasonably addressed in the final design (Section 7 of the CCA).

In order to reduce trucking traffic and impacts on the surrounding community, the Port Authority has engaged Modern Efficient Transport and Supply LLC ("METS" or the "Logistics Vendor") to perform the following Vendor Operations at a purpose-built facility on Airport property (Section 8 of the CCA):

- Materials crushing and recycling operations;
- Operation of two high-capacity concrete batching facilities;
- On-Airport deliveries of bulk materials by barge to a barging facility at the Airport; and
- Bulk transportation of waste materials off-site using the barging facility.

The Port Authority is requiring the Design-Builder and Other Redevelopment Entities to use the Logistics Vendor for the Vendor Operations. The Design-Builder was responsible for providing the Port Authority with a Materials Barging Logistics Plan, a Concrete Crushing/Recycling Plan and a Concrete Batch Plant Utilization Plan, including the required quantities and specifications for concrete and the anticipated utilization of the barging and crushing facilities.

The Design-Builder is required to purchase the products and services offered through the Vendor Operations at the Final Pricing set by the Logistics Vendor pursuant to its procurement process, provided that the Final Pricing was not to exceed the Logistics Vendor's then-current listed base price for such products or services at its existing local base operations and will be a market price.

The Design-Builder will be allowed to bypass using the Logistics Vendor and source its own materials and services if any of the following occur:

#300 - 30 E 6th Avenue, Vancouver, BC Canada V5T 1J4 | 604 734 3126

*This Report has been prepared at the request of JFK Millennium Partners on behalf of the Project Lenders and is the exclusive property of BTY Group, which is the owner of the intellectual property rights relating to this Report. The Report must be treated as confidential and proprietary information of BTY Group and it may not be disclosed, reproduced or permitted to be disclosed to any party without the prior consent of BTY Group.*

- The Design-Builder will not be required to use the Vendor Operations until they are operational. The Design-Builder can enter into its own arrangements for goods and services for up to 90 days following the date that the Vendor Operations become operational;
- If there is a Conflict and the Port Authority provides priority to an Other Redevelopment Entity with respect to the use of the Vendor Operations;
- If the Logistics Vendor is unable to supply the required amount, quality or type of material at the times needed, unable to meet the need for customized services which differ from the offered Vendor Operations, delayed in supplying material or in material breach of a Purchase Order; or
- If the Port Authority acknowledges that the Design-Builder has a Critical Path Element that cannot be met by the Logistics Vendor or the need for customized services which differ from the offered Vendor Operations.

The Design-Builder will be responsible for independently testing, certifying, validating and accepting any products or services provided by the Logistics Vendor to the same extent that it would do for any other supplier or subcontractor.

Based on our review of the CCA, we consider the provisions related to coordination and scheduling to be reasonable requirements for the Port Authority to coordinate and manage the volume of work happening concurrently in the CTA. We have seen similar requirements on other airport development projects. However, in practice, there have been coordination and phasing conflicts between the Design-Builder and the Roadways DB that have led to delays to the Design-Builder's roadway scope. We understand that the Port Authority has been slow to resolve the issue and the Lessee submitted a Compensation and Delay Event notice to the Port Authority.

The requirements for the Logistics Vendor are a unique element of this Project. The Design-Builder communicated the Logistics Vendor requirements to all subtrades, so they were aware of the requirements prior to bidding. We understand that the Logistics Vendor is charging 10% more than market rate for concrete and the Lessee submitted a Compensation and Delay Event notice to the Port Authority.

Importantly, the CCA does provide the Design-Builder with the ability to bypass the Logistics Vendor if it is unable to supply the required quantity or quality of material. This ability was not provided in previous versions of the CCA, and we consider its inclusion to be an important risk mitigating factor.

## **7.8 SUBSTANTIAL COMPLETION PROCESS**

### **7.8.1 Substantial Completion of Phase 1**

Substantial Completion of the Phase 1 D&C Work ("Substantial Completion of Phase 1") will only occur if the Lessee has satisfied all of the applicable conditions set forth in the TCAP Manual with respect to the Phase 1 D&C Work and the Airport Security Guidelines Manual, and the following conditions (Section 2(v)(1) of the Lease):

- All certifications for mechanical, electrical, electronics and other systems that are essential to the operation, functionality and safety of the Phase 1 Improvements have been received and all inspection reports for such systems have been made;
- The Lessee has received, and paid all associated fees due and owing for, all applicable Governmental Approvals (other than Port Authority Governmental Approvals) required for performing O&M Work with respect to the Phase 1 Improvements, and has provided accurate and complete copies to the Port Authority;
- All plans and manuals for mechanical, electrical, electronics and other systems that are essential to the operation, functionality and safety of the Phase 1 Improvements, as identified by and agreed to by the

- Lessee and the Port Authority have been submitted and, if required, received the Port Authority's approval;
- All other submittals required by the Project Documents, Good Order Requirements, Applicable Law or Applicable Standards to have been provided by the Lessee prior to or on the Phase 1 Completion Date have been submitted and, if required, received Port Authority approval;
  - The Lessee has prepared, in consultation with the Port Authority, the punch list in respect of the Phase 1 D&C Work, and such punch list has received Port Authority approval; and
  - With respect to the individual tenant spaces in the New Terminal Facilities intended to be subleased to the Concession Subleases or Airline Subleases, the Lessee has installed the basic infrastructure and equipment for the supply of necessary Utilities to such tenant spaces as well as fire alarm, fire protection and space separation between the occupied and construction sites.

When all the Phase 1 D&C Work is substantially completed and ready for use, the Lessee is required to advise the Port Authority to such effect and deliver a certificate certifying that the requirements of Substantial Completion for Phase 1 have been met and that the Phase 1 D&C Work has been constructed in accordance with the Lease and the other Project Documents and in compliance with all Good Order Requirements, Applicable Laws and Applicable Standards.

Following (and subject to) delivery of the certificate to the Port Authority, the Phase 1 D&C Work will be inspected by the Port Authority to certify that the conditions for Substantial Completion of Phase 1 have (or have not) been met. If the same has been completed as certified by the Lessee, and the Lessee has complied in all respects, with the requirements of the Lease, the other Project Documents, Good Order Requirements, Applicable Standards and Applicable Law, a certificate to such effect will be issued to the Lessee by the Port Authority (the "Phase 1 Completion Certificate"). The Lessee will promptly transfer custody and control of the Off-Premises Facilities forming part of the Phase 1 Improvements to the Port Authority following receipt of the Phase 1 Completion Certificate and have no further obligations with respect to Off-Premises Facilities and the associated Temporary Rights of Access.

### **7.8.2 Substantial Completion of Phase 2**

Substantial Completion of the Phase 2 D&C Work ("Substantial Completion of Phase 2") will only occur if the Lessee has obtained a Phase 1 Completion Certificate, satisfied all of the applicable conditions set forth in the TCAP Manual and the Airport Security Guidelines Manual with respect to the Phase 2 D&C Work, and satisfied the following conditions (Section 2(v)(2) of the Lease):

- All certifications for mechanical, electrical, electronics and other systems that are essential to the operation, functionality and safety of the New Terminal Facilities have been received, and all inspection reports for such systems have been made;
- The Lessee has received, and paid all associated fees due and owing for, all applicable Governmental Approvals (other than Port Authority Governmental Approvals) required for performing O&M Work with respect to the New Terminal Facilities, and has provided accurate and complete copies to the Port Authority;
- All plans and manuals for mechanical, electrical, electronics and other systems that are essential to the operation, functionality and safety of the New Terminal Facilities, as identified by and agreed to by the Lessee and the Port Authority in the Project Documents, have been submitted and, if required, received Port Authority approval;
- All other submittals required by the Project Documents, Good Order Requirements, Applicable Law or Applicable Standards to have been provided by the Lessee prior to or on the Completion Date have been submitted and, if required, approved by the Port Authority;

- The Lessee has prepared, in consultation with the Port Authority, the punch list in respect of the Phase 2 D&C Work, and such punch list has received Port Authority approval; and
- With respect to the individual tenant spaces in the New Terminal Facilities intended to be subleased to the Concession Subleases or Airline Subleases, the Lessee has installed the basic infrastructure and equipment for the supply of necessary Utilities to such tenant spaces as well as fire alarm, fire protection and space separation between the occupied and construction sites.

When all of the D&C Work is substantially completed and ready for use, the Lessee is required to advise the Port Authority to such effect and deliver to the Port Authority a certificate certifying that the requirements for Substantial Completion of Phase 2 have been met and that the Phase 2 D&C Work has been constructed in accordance with the Project Documents, approved Construction Applications and the provisions of the Lease and in compliance with all Good Order Requirements, Applicable Laws and Applicable Standards.

Following (and subject to) delivery of the certificate to the Port Authority, the Phase 2 D&C Work will be inspected by the Port Authority to certify that the conditions for Substantial Completion of Phase 2 have (or have not) been met). If the same has been completed as certified by the Lessee, and the Lessee has complied, in all respects, with the requirements of the Lease, the other Project Documents, Good Order Requirements, Applicable Standards and Applicable Law, a certificate will be issued to the Lessee by the Port Authority (the "Completion Certificate"). The Lessee will promptly transfer, following receipt of the Completion Certificate, custody and control to the Port Authority of the Off-Premises Facilities not previously transferred, and the Lessee will have no further obligations with respect to such Off-Premises Facilities and the associated Temporary Rights of Access.

## **7.9 DATE OF BENEFICIAL OCCUPANCY PROCESS**

Following Substantial Completion of the Phase 1 D&C Work, the Lessee will be responsible for achieving DBO of the Phase 1 Improvements. The risk and responsibility for the work associated with achieving DBO is being retained at the Lessee level and partially transferred to the Design-Builder as it relates to coordination, cooperation and completion of enabling works in the terminal area. The work involves the installation of artwork, advertising and substantially completing the fit-out of concession spaces which are required to be opened upon DBO of the Phase 1 Improvements as set out in the Approved Pro Forma Concessions Plan or the then-effective Comprehensive Concessions Plan, as applicable (Section 2(v) and (2) of the Lease).

Similarly, the Lessee is responsible for achieving DBO following Substantial Completion of the Phase 2 D&C Work.

## **7.10 OUTSIDE COMPLETION DATE**

The Lessee must achieve Substantial Completion of the Phase 2 D&C Work no more than 12 months following the Scheduled Completion Date ("the Outside Completion Date") (Section 2(v)(2)(i) of the Lease).

Failure by the Lessee to complete the D&C Work (other than punch-list items approved by the PA) by the Outside Completion Date will constitute an Event of Default. The 12-month Outside Completion Date is in-line with similar North American P3 projects (Section 21(a)(18) of the Lease).

The DBA includes a Design-Builder Event of Default if the Design-Builder fails to achieve Substantial Completion of Phase 2 by 90 days prior to the Outside Completion Date. This provides the Lessee and Lenders with a 3-month buffer to replace the Design-Builder ahead of a subsequent Lessee Event of Default under the Lease, which is in-line with what we typically see on US P3 projects.

Under Schedule 10.7 of the DBA, if the Design-Builder fails to achieve either Milestone Event (i.e., Substantial Completion of Phase 1 and Substantial Completion of Phase 2) within 30 days of the scheduled date, then the

Design-Builder will be responsible for preparing a Remedial Plan to set out an accelerated work program to achieve the completion date defined in the Remedial Plan, which is subject to Lessee and Port Authority approval. The Design-Builder will not be in breach of the DBA so long as the Design-Builder is using all reasonable and diligent efforts to comply with the Remedial Plan (Section 10.7 of the DBA).

The Common Terms Agreement includes an Event of Default if the Lessee fails to achieve Substantial Completion of Phase 2 by 6 months prior to the Outside Completion Date. This provides the Lenders, under the Loan Facility, with a 6-month buffer to replace the Lessee ahead of a subsequent Lessee Event of Default under the Lease, which is in-line with what we typically see on US P3 projects. It will not be an Event of Default under the Common Terms Agreement if the LTA certifies that Substantial Completion of Phase 2 is reasonably expected to occur on or before the Outside Completion Date (Section 7.01(t) of the CTA). The Common Terms Agreement will no longer be in place following the repayment in full of the Loan Facility. The Loan Agreements include an Event of Default if the Lessee fails to achieve Substantial Completion of Phase 2 by the Outside Completion Date.

### **7.11 OPERATIONAL READINESS**

The Lessee will develop an Operational Readiness and Airport Transfer (“ORAT”) Plan to support the transition to active operations following Substantial Completion. The ORAT Plan will be submitted 4 months prior to activation of the New Terminal Facilities (Section 30.3 of Section B of the RPW).

The ORAT Plan will include an overall schedule, which will (Section 3.4 of Section B of the RPW):

- Be timed to align with completion of the D&C Work, testing and commissioning and handover schedules;
- Identify the ORAT critical path activities;
- Integrate stakeholders’ tenant fit-out programs;
- Include an interface matrix identifying external interfaces with Port Authority assets; and
- Include milestones for the availability and readiness of staff, relevant contracts that need to be in place for the start of operations, development and approval of the final Operations and Maintenance Plan, inspections by regulatory authorities.

The Lessee is responsible for successful opening by verifying that the integration of all airport systems is correctly working, that staff are familiar and experienced in standard operating procedures and that contingency procedures are tested by simulating real operations (Section 3.5 of Schedule B of the RPW).

The responsibility for development and implementation of the ORAT Plan is retained by the Lessee. Under the DBA, the Design-Builder will work with the Lessee and the Lessee’s ORAT Team to minimize inconveniences and interferences, and ensure the operational integrity of the operations at the Existing Terminal Facilities and New Terminal Facilities.

### **7.12 COMMISSIONING AND TESTING**

The Lessee is required to complete the Commissioning and Testing process in accordance with the ORAT schedule. The Commissioning and Testing stage of the Project includes the following tasks (Section 30.7.3(b) of the Technical Requirements):

- All facilities, equipment and systems have been tested and commissioned in line with approved procedures before the Lessee receives them from the Contractor. This stage is crucial for ensuring the adequate handover of assets;
- All Standard Operational Procedures (“SOPs”) and other relevant information applicable to the operation of the new facility has been developed and tested; and

- All staff are prepared to initiate operation. Preparation for staff includes recruiting, familiarization and training in line with Lessee Staff Plans.

The Design-Builder must coordinate with the ORAT Team, which includes the Lessee's third-party commissioning agent, and create required plans or schedules to carry out the commissioning and testing of D&C Work. The Lessee retains control of the commissioning program with its third-party commissioning agent. The Design-Builder will work with the ORAT Team to effectively schedule systems commissioning and to provide opportunities to advance other ORAT activities during the DB D&C Work, where those are possible (DBA Section 8.4.1).

### 7.13 CONCLUSION

We note the following conclusions related to the Project Schedule:

- The Lessee's risk related to the Project Schedule is transferred to the Design-Builder under the DBA with the exception of delays due to Material Developer Changes and certain Unavoidable Delays;
- The schedule reporting requirements are more stringent than we typically see on similar P3 projects, which shows a high degree of attention being paid to schedule. We are not aware of any issues with the Design-Builder complying with the schedule reporting requirements;
- There have been no adjustments to the contractual milestone dates since Financial Close;
- BTY is of the opinion that the overall duration of the schedule is reasonable, but the roadway activities no longer contain as much float to recover future delays as the baseline schedule due to the resequencing and mitigation of delay that has already taken place;
- The Lessee submitted a Compensation and Delay Event notice to the Port Authority for the delays to the roadway work caused by coordination challenges with the Roadways DB; and
- We note that with the exception of overtime work to complete the terminal structural steel, the remaining terminal schedule is based on standard working day and shift assumptions, which will allow for future acceleration if needed to recover potential delays, including the current forecasted delay to the contractual milestones.

## 8.0 Construction Price

### 8.1 INTRODUCTION

The overall Project costs consist of the Design-Builder’s Guaranteed Maximum Price (“GMP”), the Lessee’s budget for its retained scope, which are summarized in the table below and described further in this section. We note that these costs do not include financing costs, insurance or rent payments to the Port Authority which are carried in a separate budget.

Category	Budget as of August 31, 2024
Design-Builder Guaranteed Maximum Price (incl. Change Orders)	\$2,462,749,810
Lessee Costs	\$330,890,192
<b>Total</b>	<b>\$2,793,640,002</b>

Procurement has advanced significantly since Financial Close, which has derisked the Project from a cost perspective. As of August 31, 2024, the Lessee and Design-Builder have awarded 98% of Category 2 Work (design and engineering) and 85% of Category 3 Work (direct construction costs).

### 8.2 GMP TIMING AND COMPONENTS

The Design-Builder will conduct the D&C Work for Phase 1 and 2 in accordance with the DBA and at a single guaranteed maximum price (“GMP”).

The GMP consists of two distinct parts:

- The Core & Shell Scope GMP, which also includes work outside of the terminal building such as work on site, utilities, road work, demolition and landscaping. The Core & Shell Scope GMP accounts for approximately 75% of the direct costs.
- The Fit-Out Allowance, which accounts for approximately 22% of the direct costs. The original intent of the Fit-Out Allowance was to address potential design variations arising due to the fact that the final fit-out design required flexibility and input from stakeholders and tenants during the core and shell construction. The main elements of the fit-out design scope include concession and lounge areas, secondary distribution for MEP/FP systems, interior partitioning and finishes and low voltage systems. The Lessee is responsible for the risk of design development changes between Financial Close and the time the Fit-Out Allowance is fully procured and may elect to exceed the initial Fit-Out Allowance. When the fit-out design is complete, the Design-Builder will be responsible for procuring the Fit-Out Allowance Scope subject to the Lessee’s specific authorization for bid package awards. Once fully procured, the Fit-Out Allowance will be reconciled with the value carried in the GMP by adjusting that value to equal the actual value of the work to complete the Fit-Out Allowance Scope. Once the Fit-Out Allowance Scope is procured and reconciled, the Design-Builder takes responsibility for schedule and cost certainty. We note that the Fit-Out Allowance is therefore a temporary price risk exposure to the Lessee. Please refer to Section 8.3.1 for details on the current buyout status of the Fitout Allowance work and the remaining exposure.

The Design-Builder guarantees that the cost to design and construct the Project will not exceed the aggregate GMP, except where compensation is payable due to a Material Developer Change or where the Lessee is entitled to additional compensation under the Lease and the Equivalent Project Relief provisions apply. The Design-

Builder is not required to guarantee individual line items within the GMP, but must advise the Lessee of each transfer between line items within a GMP (Section 3.3.6 of the Interim Agreement).

The Lessee’s risk related to the GMP has been transferred to the Design-Builder with the exception of design changes and price escalation to the Fit-Out Allowance Scope during the period between Financial Close and the time when the Fit-Out Allowance Scope is fully procured. The Lessee is responsible for cost changes driven by design development during this period and is carrying a contingency to mitigate the risk as described in the contingency section below.

**8.3 DESIGN-BUILDER’S GUARANTEED MAXIMUM PRICE**

The Design-Builder’s GMP is summarized as follows.

Contract Price	Area (ft2)	Amount (August 31, 2024)	Cost/ft2
Direct Costs	1,200,000	\$1,853,307,198	\$1,544
Indirect Costs	1,200,000	\$609,442,612	\$508
<b>Total GMP Price</b>	<b>1,200,000</b>	<b>\$2,462,749,810</b>	<b>\$2,052</b>

The Design-Builder’s Construction Price is broken down as follows:

Category	Original DBA Schedule of Values	Adjustments	Change Orders	Adjusted DBA Schedule of Values	Cost to Date (August 31, 2024)		Cost to Complete (August 31, 2024)	
					\$	%	\$	%
Preconstruction	\$3,888,756	-\$25,839	\$0	\$3,862,917	\$3,852,422	100%	\$10,494	0%
TSA	\$40,083,550	-\$11,696,932	\$11,174,452	\$39,561,070	\$14,778,243	37%	\$24,782,827	63%
Phase 1 Terminal	\$826,700,397	-	\$1,476,420	\$617,889,575	\$351,181,196	57%	\$266,708,379	43%
Phase 1 Airside	\$73,449,700	\$3,754,605	\$1,074,659	\$78,278,964	\$13,457,352	17%	\$64,821,612	83%
Phase 1 Roadway and Utilities	\$252,891,639	\$12,272,551	\$1,526,776	\$266,690,966	\$86,456,239	32%	\$180,234,727	68%
Phase 1 Fitout	\$0	\$273,426,547	\$86,688,366	\$360,114,913	\$34,351,613	10%	\$325,763,300	90%
Phase 2 Terminal	\$364,302,473	-	-\$1,346,556	\$234,037,950	\$19,394,811	8%	\$214,643,139	92%
Phase 2 Airside	\$89,178,944	\$6,812,707	\$0	\$95,991,651	\$1,838,892	2%	\$94,152,759	98%
Phase 2 Roadway and Utilities	\$8,857,290	-\$5,928,100	\$0	\$2,929,190	\$64,260	2%	\$2,864,930	98%
Phase 2 Fitout	\$0	\$102,010,373	\$26,522,157	\$128,532,530	\$3,214,876	3%	\$125,317,654	97%
Enabling Work	\$22,760,936	\$3,362,446	-\$705,910	\$25,417,472	\$24,633,888	97%	\$783,584	3%
<b>Direct Costs</b>	<b>\$1,682,113,685</b>	<b>\$44,783,149</b>	<b>\$126,410,364</b>	<b>\$1,853,307,198</b>	<b>\$553,223,792</b>	<b>30%</b>	<b>\$1,300,083,405</b>	<b>70%</b>
GC's, GR's, Fee	\$346,764,707	\$54,867	\$371,104	\$347,190,678	\$164,970,132	48%	\$182,220,546	52%
Construction Contingency	\$87,567,376	-\$45,460,395	-\$15,523,573	\$26,583,408	\$35,733,635	134%	-\$9,150,227	34%
Design	\$89,281,060	\$622,379	\$6,384,388	\$96,287,827	\$60,175,875	62%	\$36,111,952	38%
Interim Agreement	\$115,171,741	\$0	\$24,208,958	\$139,380,700	\$115,171,741	100%	\$24,208,958	17%
<b>Indirect Costs</b>	<b>\$638,784,884</b>	<b>-\$44,783,149</b>	<b>\$15,440,877</b>	<b>\$609,442,612</b>	<b>\$376,051,383</b>	<b>64%</b>	<b>\$233,391,229</b>	<b>36%</b>
<b>Total GMP</b>	<b>\$2,320,898,569</b>	<b>\$0</b>	<b>\$141,851,241</b>	<b>\$2,462,749,810</b>	<b>\$929,275,176</b>	<b>38%</b>	<b>\$1,533,474,635</b>	<b>62%</b>

The direct construction costs (hard construction costs) breakdown by category is graphically depicted as follows:

### 8.3.1 Lessee Allowances

There are three Lessee allowances carried within the Design-Builder’s GMP, for which the Lessee retains the price risk. We note that the Lessee’s exposure for these allowances is only on the direct costs; that the Design-Builder is responsible for the risk on the indirect costs.

#### Fit-out Allowance Scope

The Fit-Out Allowance was originally equal to \$375M in direct costs as a part of the GMP, which included escalation and design development contingency. The Fit-Out Allowance consists of general terminal fit-outs including masonry walls, ornamental metals and railings, architectural woodworking, flooring, doors, drywall, ceilings, painting, specialties, equipment, furnishings, plumbing, HVAC, lighting fixtures and secondary electrical distribution, telecommunications, audio-visual and other low voltage systems and security systems. The Fit-Out Allowance does not include the fit-outs of retail, advertising and airline lounges, which will be performed by third party Separate Contractors at the cost of the tenants.

The Design-Builder originally priced the Fit-Out Allowance based on the design assumptions for the Fit-Out Allowance Scope, which were at 50-60% completion at the time of Financial Close. As described in Section 8.2 above, the Lessee retained the risk of price and scope changes in the Fit-Out Allowance Scope during the period between Financial Close and when procurement is complete and is carrying contingency to mitigate this risk, which is further described in Section 8.5 below.

In December 2023, the Lessee was forecasting a \$110M cost overrun to the initial Fit-Out Allowance budget. The Lessee has mitigated this overrun by savings in the construction and operations budgets outside of the GMP, as well as value engineering. A revised Fit-Out Allowance budget of \$135M, which includes a buffer of \$25M, was approved by the Lenders in January 2024. The savings realized by the Lessee are summarized in the table below.

Category	Amount
Project Budget Positive Variances	\$47.4M
Qualifying D&C Changes Savings	\$15M
Operating Outperformance Through 2023	\$50.5M
Forecast Operating Outperformance	\$25.7M
<b>Total Savings</b>	<b>\$138.6M</b>

As of August 31, 2024, the anticipated cost overrun has been reduced to \$93M. The procurement of the Fit-Out Allowance Scope is now significantly advanced with market pricing received for 93% of the Phase 1 and 2 work. The Design-Build Contractor has awarded \$485M of fitout packages with \$35.9M pending award. We consider the risk of further overruns to the Fit-Out Allowance budget to be significantly reduced by the advanced stage of procurement and the buffer in the revised Fit-Out Allowance budget. In addition, the Lessee has access to the remaining contingency in the Lessee budget as well as the \$100M Supplemental Liquidity Reserve Account.

West Concourse

The GMP includes a \$31M Lessee allowance for the West Concourse. The Lessee has elected to proceed with a smaller building to accommodate the 9<sup>th</sup> gate at the West Concourse and previously put the design of this area on hold to allow time to advance budgeting and commercial discussions with the airlines to determine the best option. Since the Design-Builder was not provided with as much time to progress design development and subtrade bidding as the rest of the terminal, the parties agreed to carry the direct costs for the West Concourse as a Lessee allowance. The allowance value was based on the Design-Builder’s budget, which has been developed using the same subcontractor unit rates as the rest of the terminal.

As of August 31, 2024, \$3.4M has been approved toward the West Concourse allowance for passenger boarding bridges and interior video board signage.

Terminal 7 Demolition

The GMP includes a \$12M Lessee allowance for the demolition of the existing Terminal 7 building. Delays in getting Rights of Entry permits for Terminal 7 meant that physical access to the terminal to perform surveys/investigations to allow the design team to prepare demolition TAAs and subtrade bids and did not occur during the Interim Period. As a result, the parties agreed to carry the direct costs for the demolition work as a Lessee allowance. Similar to above, we note that the Lessee is carrying the Design-Builder’s budget, which has been developed with input from VRH, a New York based aviation contractor with experience at T7.

As of August 31, 2024, \$177,000 has been approved toward the T7 demolition allowance for asbestos surveys.

### 8.3.2 Assessment of the GMP

BTY reviewed the Design-Builder’s GMP prior to Financial Close, including the Design-Builder’s approach to developing the Construction Price. We noted the following:

- The Design-Builder’s initially developed its estimate in-house. Quantities were prepared by the Design-Builder’s team and verified with trade partners. The Design-Builder validated its historic unit rates with unit rate input received from trade partners;
- The Design-Builder then received market pricing from multiple subcontractors for each trade package, which were incorporated in the final GMP.
- The majority of subcontracts are lump sum contracts with a mixture of lump sum, design-build lump sum and design assist lump sum;
- The Design-Builder is subcontracting all of the direct construction work; and
- The Design-Builder’s fee, contingencies and escalation assumptions included in the GMP are considered reasonable.

We consider the Design-Builder’s methodology in developing the GMP to be reasonable. We have reviewed the construction price and supporting details, including the unit rates used in its preparation, and consider the GMP, including the Lessee allowances described above, to be reasonable and appropriate for this Project. Procurement has advanced significantly since Financial Close, which has derisked the Project from a cost perspective, as described in Section 8.1.

### 8.4 LESSEE COSTS

We have received a breakdown of the Lessee’s budget for scope items retained at the Lessee level, which are summarized in the table below. We note that these costs do not include financing costs, insurance or rent payments to the Port Authority which are carried in a separate budget.

Category	Original Budget	Approved Budget Changes	Revised Budget	Cost to Date ([June 30, 2024])		Cost to Complete ([June 30, 2024])	
				\$	%	\$	%
Project Management	\$148,089,363	(\$17,231,482)	\$130,857,881	\$43,560,076	33%	\$87,297,805	67%
Construction	\$142,867,402	(\$54,640,801)	\$88,226,601	\$15,807,724	18%	\$72,418,876	82%
Fees, Contingencies, Incentives	\$146,805,710	(\$35,658,097)	\$111,805,710	\$23,996,447	21%	\$87,809,263	79%
<b>Total Lessee Budget</b>	<b>\$437,762,475</b>	<b>-\$107,530,380</b>	<b>\$330,890,192</b>	<b>\$83,364,248</b>	<b>25%</b>	<b>\$247,525,944</b>	<b>75%</b>

The Lessee developed its budget based on the Lease and RPW requirements and the Lessee members’ previous experience and local knowledge, which includes historic and ongoing costs from LaGuardia Airport Terminal B.

The Lessee budget includes a number of contingencies, including a general Lessee Contingency, an Environmental Remediation Allowance, a Port Authority Contingency and a contingency for Qualifying D&C Changes. In addition, the Lessee has a \$100M Supplemental Liquidity Reserve Account (“SLRA”) through

construction, which is reduced to 6 months of rent following DBO2. This reserve is intended to be used by the Lessee to account for stranded risk between the Lease and DBA, thus offering another source of funds to account for potential project costs. Overall, we consider the level of contingency held by the Lessee to be appropriate for the Project.

We have received a detailed breakdown of the Lessee's cost build up for each line item and we are satisfied that the budget reflects the scope of work to be performed by the Lessee and, based on Vantage's current experience, the Lessee costs are similar to those at LaGuardia Airport Terminal B (a project of similar scope and size).

## **8.5 PROJECT CASH FLOW / DRAWDOWN SCHEDULE**

The Design-Builder's monthly and cumulative cash flows, based on the projected works schedule and associated expenditure for each work element, are graphically depicted as follows:

Monthly draw amounts based on the GMP value

Cumulative Cash Flow based on the GMP value

**8.6 PAYMENTS FROM THE LESSEE TO DESIGN-BUILDER**

The Lessee will make progress payments to the Design-Builder for Direct DB D&C Work Costs based on the percentage of work complete each month against the agreed Schedule of Values (Section 15.13 of the DBA).

The Lessee will pay the Base Fee, general requirements and general conditions each month according to the Monthly Cost Projections in Exhibit 20 of the DBA (Section 14.1 of the DBA).

Construction Contingency will be paid at the greater of (1) 5% of the Cost of the DB D&C Work, or (2) the actual amount of the Construction Contingency used in the month.

The payment process can be summarized as follows (Section 15.14 of the DBA):

- The Design-Builder will submit a preliminary Application for Payment and supporting documentation by the 20<sup>th</sup> day of each month during the Construction Phase;
- The Design-Builder and Lessee will meet within five Business Days to review the application;
- The Design-Builder will submit a final Application for Payment by the 5<sup>th</sup> day of the following month, which will incorporate any changes from Lessee’s review; and
- The Lessee will issue a Certificate for Payment within 15 days of receiving the Design-Builder’s final Application for Payment.

**8.7 PROPOSED DESIGN-BUILDER’S SECURITY PACKAGE**

The Design-Builder’s security package is summarized as follows:

Security	Details
Parent Company Guarantee (“PCG”)	Provided by AECOM, a Delaware corporation, and equal to \$500M
Limitation of Liability	35% of the GMP
Performance and Payment Bond	\$500M
Letters of Credit	10% of the GMP
Cash Retention	10% retention from each monthly payment to the Design-Builder until the DB D&C Work is 50% complete, which will be released after Substantial Completion
Bonds, Subcontractor Default Insurance and Assignment of Subcontracts	The Design-Builder will require all subcontractors to post payment and performance bonds as permitted by the Port Authority, Lessee and the Lenders. As an alternative to payment and performance bonds, the Lessee may also implement the Design-Builder’s SDI program to cover certain subcontractors as approved by the Port Authority or Lenders. The Lessee also has the right to take assignment of subcontracts upon termination of the Design-Builder
Liquidated Damages (Design-Builder to Lessee and includes Liquidated Damages payable from the Lessee to the Port Authority)	<ul style="list-style-type: none"> <li>• \$375,000/day for a delay to Substantial Completion of Phase 1</li> <li>• \$330,000/day for a delay to Substantial Completion of Phase 2</li> </ul>

**8.7.1 Design-Builder Parent Company Guarantee**

The Design-Builder provided a Parent Company Guarantee in an amount equal to \$500M.

### **8.7.2 Performance and Payment Bond**

The Design-Builder provided a Performance Bond in an amount equal to \$500M.

### **8.7.3 Letters of Credit**

The Design-Builder provided letters of credit in forms and amounts deemed acceptable by the Lessee, Port Authority and Lenders in the aggregate amount equal to 10% of the GMP.

### **8.7.4 Cash Retention**

The Lessee will retain 10% of each monthly payment to the Design-Builder until the DB D&C Work is 50% complete. The cash retention will be released to the Design-Builder after Substantial Completion.

### **8.7.5 Bonds, Subcontractor Default Insurance and Assignment of Subcontracts**

The Design-Builder will require all subcontractors to post payment and performance bonds as permitted by the Port Authority, Lessee and the Lenders. As an alternative to payment and performance bonds, the Lessee may also implement the Design-Builder's SDI program to cover certain subcontractors as approved by the Port Authority or Lenders. The Lessee also has the right to take assignment of subcontracts upon termination of the DBA.

### **8.7.6 Liquidated Damages Payable by the Design-Builder To Lessee**

The Design-Builder will be responsible for paying the following Liquidated Damages to the Lessee for delays to the following Milestone Events (Section 10.10 of the DBA):

- \$375,000/day for a delay to Substantial Completion of Phase 1; and
- \$330,000/day for a delay to Substantial Completion of Phase 2.

The amounts above include the following D&C Work Delay Payments payable to the Port Authority for delays to the following Completion Milestones (Section 2(c)(6) of the Lease):

- \$40,000/day for a failure to achieve the Substantial Completion of Phase 1 within 30 days after the Scheduled Phase 1 Completion Date; and
- \$40,000/day for a failure to achieve the Substantial Completion of Phase 2 within 30 days after the Scheduled Completion Date.

The Liquidated Damages will be capped at \$232M, which equals to 10% of the original GMP value.

## **8.8 DESIGN-BUILDER REPLACEMENT ANALYSIS**

We have calculated the premium cost to replace the Design-Builder at various key points in the Project Schedule. We selected scenarios that would not be covered by Delay Events or Compensation Events, and thus not allowing relief under either the Lease or the DBA. We have analyzed the adequacy of the security from two perspectives: total and liquid. The total security adequacy evaluates the ability of the full security package to cover the premium cost to replace the Design-Builder. The liquid security analysis looks at the adequacy of the Design-Builder's liquid security to cover the immediate costs (i.e. those required to be paid in the first three months following insolvency).

For our analysis we have considered the following cost categories that would increase the eventual construction cost on the Project realized upon the delayed achievement of the Scheduled Phase 1 Completion Date and the

Scheduled Completion Date. We consider that these premium costs, over the original Contract Price of the DBA, are additional costs to the Project against which the available security package should be tested:

- The legal and technical advisory due diligence costs incurred during the run up period to Design-Builder default and eventual replacement;
- The design team will be required to review completed work-in-place on the Project and develop a new tender package for potential replacement contractors to bid on;
- The replacement Design-Builder will have to mobilize and establish a presence on the Project as well as establish appropriate bonding and insurances;
- We have considered the general economic conditions of the construction industry in New York and potential inflation of construction costs from the bid submission until re-engaging with a replacement Design-Builder;
- Over and above the cost of escalation, we have considered that there will be an expectation of increased fee (profit) by the replacement Design-Builder. Given the value of the Contract Price, we have considered that a range of 5% to 15% (depending on the scenario being considered) of the cost to complete would be an appropriate fee premium. We consider that as the cost to complete decreases over time, the premium charged by a replacement contractor as a percentage of revised contract price increases. We highlight that a profit margin is already included in the value of the Contract Price and so this fee premium would add to that already existing profit margin;
- We have considered that despite the event of default, all work prior to the event has been inspected and approved. However, we have allowed 10% of the previous month's progress payment to remedy any deficient work (less indirect costs); and
- We consider that the delays as a result of the replacement process are not recoverable by the replacement Design-Builder and result in the same delay to achieving the Scheduled Phase 1 Completion Date and the Scheduled Completion Date. We have therefore applied liquidated damages assessed by the Lessee and Port Authority over the full delay period.

The table below provide a description of the 4 different scenarios and the total premium replacement cost calculated compared against the total security package provided by the limit of liability on the parent company guarantee:

Replacement DB Contractor Premium Summary		Total Replacement Premium		Total Security Available (PCG Liability Cap)		Anticipated Delay (weeks)	Month of Construction
		Amount	% of Construction Price	Amount	% of Construction Price		
1	One Month After Peak Cashflow	\$347,046,248	14.4%	\$812,314,499	35.0%	20	25
2	Phase 1 Interior Fitouts Complete	\$275,876,584	11.5%	\$812,314,499	35.0%	24	35
3	Existing Terminal 7 Demolition Ongoing	\$196,615,223	8.2%	\$812,314,499	35.0%	24	42
4	Phase 2 Building Enclosure Complete	\$116,313,881	4.8%	\$812,314,499	35.0%	16	56

The table below provides a description of the 4 different scenarios and the short term replacement cost, which considers the costs required to replace the contractor during the first three months following default. These costs have been compared against the available liquid security, consisting of the letter of credit and cash retention at the time of default:

Replacement DB Contractor Premium Summary		Short Term Replacement Premium		Liquid Security Available (Letter of Credit + Cash Retention)		Anticipated Delay (weeks)	Month of Construction
		Amount	% of Construction Price	Amount	% of Construction Price		
1	One Month After Peak Cashflow	\$30,982,248	1.3%	\$318,194,138	13.7%	20	25
2	Phase 1 Interior Fitouts Complete	\$22,844,584	1.0%	\$324,807,157	14.0%	24	35
3	Existing Terminal 7 Demolition Ongoing	\$13,539,223	0.6%	\$324,807,157	14.0%	24	42
4	Phase 2 Building Enclosure Complete	\$13,504,881	0.6%	\$324,807,157	14.0%	16	56

We have analyzed the adequacy of the security from two perspectives: Total and Liquid. The Total security adequacy evaluates the ability of the full security package to cover the premium cost to replace the Design-Builder. The Liquid security analysis looks at the adequacy of the Design-Builder’s liquid security to cover the immediate costs (i.e. those required to be paid in the first three months following insolvency).

We note the total premiums identified in the scenarios above include delay liquidated damages to fund the Lessee’s obligations for approximately 16 to 24 weeks of delay, which equates to ±2.3% to 4.1% of the Contract Price.

The likelihood of both the Design-Builder and Parent Company becoming insolvent is in our opinion extremely low, and represents a worst-case scenario given their strength.

The Design-Builder’s 35% liability cap is adequate to cover the total replacement premium and the liquid security is adequate to cover the short-term replacement premiums calculated in each of our Design-Builder replacement scenarios noted above.

## 9.0 Operations and Maintenance

### 9.1 INTRODUCTION

The Lessee will be responsible the performance of all Operations and Maintenance Work during the Term as follows (Section 11 of the Lease):

- The Lessee’s obligation for the Operations and Maintenance Work for the Existing Terminal Facilities began on the Terminal 7 Parcel Lease Commencement Date until the Existing Terminal Facilities are decommissioned and demolished; and
- The Lessee’s obligation for the Operations and Maintenance Work for each Partial Occupancy Portion of the New Terminal Facilities will begin when a Temporary Certificate of Authorization to Occupy or Use is issued.

The Lessee will be responsible for operation and maintenance of all airside and landside areas within the Premises, except as expressly described otherwise in the Lease or Project Documents. The Lessee shall perform the operations and maintenance work in compliance with its obligations in the Performance Standards and Measurement Provisions.

The Lessee entered into a Management Services Agreement (“MSA”) with the Manager. The Manager will provide the day-to-day management of the Lessee’s business and operations, including project management, operational readiness and transfer services, terminal management and concession management (Section 11(g)(2) of the Lease).

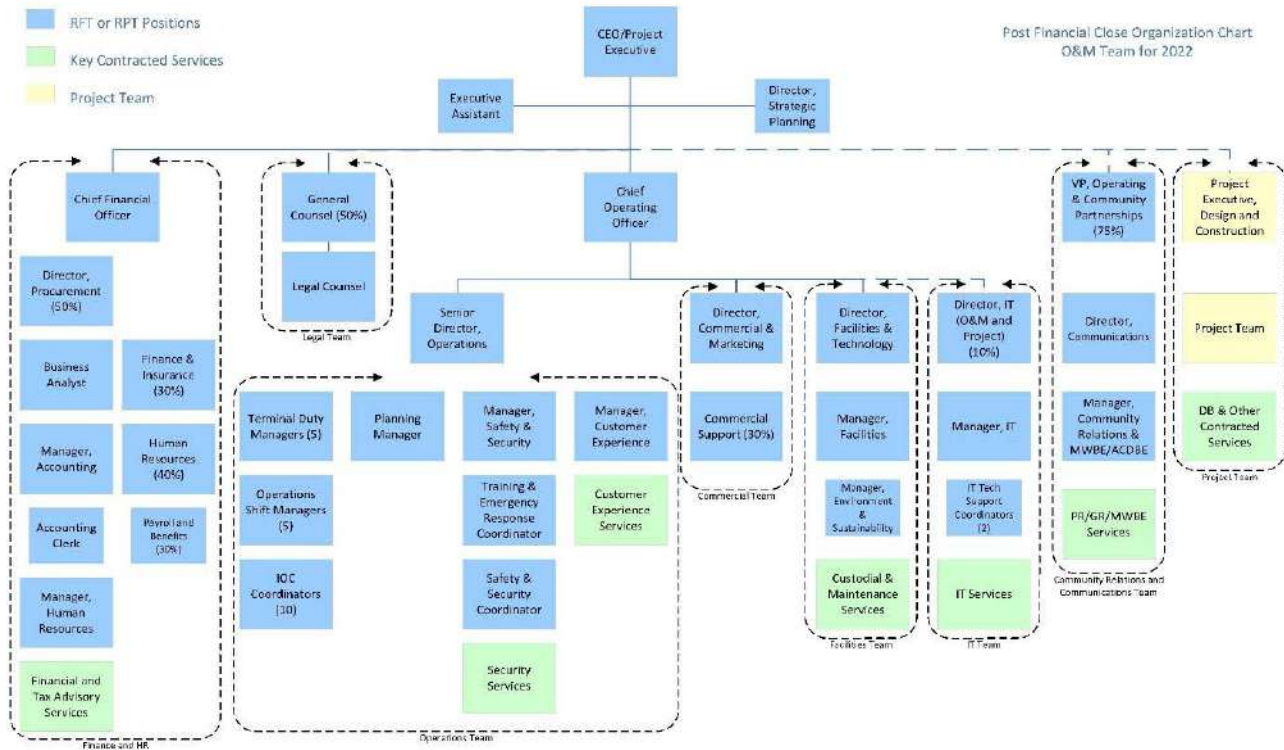

The Lessee transferred the responsibility for performance of the Operations and Maintenance Work to the Manager under the MSA but has retained the risk for the O&M costs. The Lessee will pay the Manager based on Annual Services Budgets prepared by the Manager each year. Once an Annual Service Budget is agreed, the Manager will not be permitted to make expenditures in excess of the budgeted amount, unless approved by the Lessee.

### 9.2 APPROACH TO O&M

The Manager will utilize their corporate offices in New York and Vancouver to facilitate and support their on-site services and programs, this includes the following:

- Training and development;
- Modelling;
- Quality assurance;
- Market analysis;
- Simulations;
- Innovation process improvements;
- Energy management and sustainability; and
- Capital and lifecycle planning.

The following O&M Organization Chart provides a detailed understanding of the roles and channels of communications within the Manager.

The Manager will integrate an O&M approach resulting from experience on its other airport operations, including LaGuardia Terminal B and the ongoing operation of the existing JFK Terminal 7. Key elements include:

- Safety and security;
- Communication;
- Strong stakeholder relationships; and
- Effective organizational structure.

The day-to-day operations include a continuous monitoring program utilizing a proprietary Safety Management System and Security Management System, which provide early warning indicators for safety-critical tasks. This will be utilized in conjunction with updated technology wherever applicable including CCTV, people tracking and curb management. All these elements are useful tools in managing terminal congestion and vehicle flows. Periodic congestion within the Project will be mitigated with the use of additional personnel as needed, while regularly testing their emergency readiness and response through internal tabletop exercises and live exercises.

A senior operations representative will be appointed and serve as the main point of contact for the Lessee and will have direct access and provide information and coordination. This will allow for accurate and timely communication and reduce the risk of delays in communication protocols.

The Manager will manage and execute some tasks through the use of third-party service providers who will be carefully selected based on their expertise in their respective fields. The Manager has depth of experience in New York in selecting qualified third-party service providers (e.g. based on its successful LaGuardia experience). They will be regularly monitored and audited to make sure proper protocols and processes are being carried out. Some of the third-party services include:

- Snow removal;
- Security (incl. goods screening, employee screening, curbside management);
- Janitorial/cleaning;
- Waste/recycling;
- Pest control;
- Septic systems; and
- Baggage system operation and maintenance.

The Manager will utilize KPI's in order to maintain an elevated performance level during the O&M term, this includes the use of internal audits for all functional areas in order to monitor trends and create value-add innovations. They will also integrate their "Whole Life Maintenance" strategy which helps balance costs with respect to operations and capital expenditures and maximize the net present value for the Project. The Whole Life Maintenance philosophy includes the following elements:

Design:

- Needs assessment
- Best practices
- Procurement stage selection process
- Use of a common platform

Construction:

- Work planning and scheduling
- Commissioning
- Testing, training and trials

Operation and Maintenance:

- Centralized maintenance
- Specialized third party experts
- Predictive budgeting through scheduled maintenance
- Optimized personnel

Renovation/Replacement:

- Condition performance
- Decommissioning
- Maximized asset service life

The Manager will use software to track the service life of all components in order to prevent system failures and extend asset lifecycles. They will do this by obtaining day-to-day maximum performance information from every airport within their portfolio, informing them on the reliability of various assets and systems. This will enable higher asset reliability and more performance predictability.

The Manager has a structured organization and performance plan that is consistent with anticipated operations procedures and is overall in a position to mitigate risks and unknown factors.

### 9.3 ANNUAL SERVICES BUDGET

The MSA includes an Initial Annual Services Budget which includes all costs, expenses and disbursements expected to be incurred by the Lessee with respect to the Services during the first Calendar Year of the Term. (Section 15 of the MSA).

The Manger will submit an Annual Services Budget by November 1 of each Calendar Year during the Term, which will be incorporated into the Lessee’s Annual Budget. The Lessee Board will review and comment on the Lessee Annual Budget and the Manager will be responsible for incorporating the reasonable comments of the Lessee Board and submitting a revised budget for approval. If a Lessee Annual Budget for a Calendar Year is not approved by December 1, then the Annual Services Budget for the prior Calendar Year will continue to apply until the revised budget is approved or settled under the dispute resolution procedure.

In no event will the Manager be permitted to make expenditures in excess of the amounts set forth in the Lessee Annual Budget.

### 9.4 O&M PRICING

The Manager’s Operations & Maintenance Cost Model, titled “OM Forecast – V17 – Final” can be summarized as follows:

Services	2026 Costs (Phase 1) (Nominal)	Phase 1 Cost/sf	2029 Costs (Phase 1 & 2) (Nominal)	Phase 1 & 2 Cost/sf
Area (sf)		877,969		1,200,000
Ground Transportation Centre*	\$614,336	<\$1	\$653,858	<\$1
Personnel or Staffing Costs	\$13,997,282	\$16	\$14,757,473	\$12
General & Admin	\$1,116,126	\$1	\$1,187,929	\$1
Contracted Services	\$31,552,474	\$36	\$41,951,922	\$35
Utilities	\$10,655,000	\$12	\$14,175,575	\$12
Repairs & Maintenance	\$315,469	<\$1	\$2,461,308	\$2
<b>Total</b>	<b>\$58,250,688</b>	<b>\$66</b>	<b>\$75,188,066</b>	<b>\$63</b>

\*The Ground Transportation Centre is not within the building footprint. As a result, the Cost/sf for Phase 1 and Phase 2 is not correlated to the total square footage of the terminal.

The O&M Costs presented in the table above are extracts of the annual O&M Costs of the corresponding year 2026 and 2029, which respectively represent the first full year in each of Phase 1 and Phase 2 (full operation) of Operation. The costs exclude insurance costs of \$35.6M in 2026 and \$11M in 2029. We have excluded insurance costs from our analysis to provide a more accurate benchmark with comparable projects in our database.

### 9.5 ASSESSMENT OF O&M PRICING

The Manager has developed the FM Cost Model using a combination of quotes from subcontractors, in-house historical data for similar projects, and its experience on Terminal 7 and LaGuardia Terminal B. The Manager’s

methodology in developing the FM Cost Model is consistent with the industry approach on US P3 projects and considered appropriate. We note the following:

- The Terminal Operations Center (“TOC”) will be located and operating on-site on a 24hr/day basis. It is ideal to have this response center located and consistently available on-site for these types of projects;
- Contingency for deductions is included;
- Subcontracted services equates to ±56% of the FM Model for Phases 1 and 2 combined, of which the Manager has sourced multiple quotes as well as leveraged existing contracts from Terminal 7 and the LaGuardia Terminal B project;
- Salaries and burdens included for Manager’s FTEs on-site, and equates to ±20% of the FM Model for Phases 1 and 2 combined (excludes subcontractor staff, and truck-based staff that the Manager may rely on for ad-hoc work, meaning all staff not working directly for the Project and whose costs are not included in the O&M Pricing);
- Utilities costs include electricity, natural gas, water & sewage, chilled water and heating hot water, phones, KIAC capital assessment and tenant reimbursement; and
- The Manager’s O&M model is reflective of experience gained during the operations and maintenance at the existing Terminal 7 as well as its ongoing experience at LaGuardia Airport.

The blended breakdown of costs for Phases 1 and 2 is summarized in the following chart.

Pricing ranges can be misleading as this is a unique project and comparable data points may include projects with different complexity factors, other historical precedents and are subject to inflationary impacts. Factors such as facility sizes, facility shapes, site areas, site locations and construction complexities are additional considerations.

that BTY accounts for when developing pricing benchmarks. Some considerations for this Project when comparing to a range of historical projects include:

- The Project size can greatly fluctuate the cost/sf as larger facilities can benefit from economies of scale for the FM team. As an example, regardless of the size of the Project, the FM team will require similar resources and skillsets on-site, which will be divided over a greater denominator resulting in a lower cost/sf;
- The quantity and characteristics related to subcontracted services, as bidders will bid more competitively for larger projects, resulting in a lower cost/sf for maintenance and services. The Project currently anticipates subcontracting approximately 56% of its FM Services;
- Labour costs in the New York area are on the higher range than those of other locations within the U.S.;
- Contingencies and profit vary across projects. More experienced Facility Managers can potentially reduce their contingency and profit to take into account the 'pool' of contingency across similar projects.

The annual FM Cost Model of \$70/sf for Phase 1 and \$65/sf (nominal dollars) for Phase 2 falls within the anticipated range that BTY has developed using recent North American Airport projects and adjusting for Project specific factors, competitiveness and current market conditions (some of which are noted above).

When reviewing and assessing the cost projections for the Project, the above factors were taken into consideration. We also conducted multiple discussions with the Manager to understand their approach to carrying out the Facilities Management services, and how they manage the overall development of the various responsibilities and costs. We also analyzed this FM Cost Model in conjunction with the Lifecycle cost model to ensure that the various tasks and costs were being managed and distributed as part of a holistic plan to carry out the FM services. Lastly, we accounted for the multi-Phase requirement to confirm appropriate management. Based on our review of the FM Cost Model, including the methodology used in its development and the factors noted above, it is our opinion that the FM Cost Model falls comfortably well within the anticipated competitive range for a project of this size and complexity, with this combination of services and consider it to be low risk.

**9.6 SUBCONTRACTED SERVICES**

A list of the services that the Manager intends to subcontract are identified in the table below.

Subcontracted Services
Snow Removal
Security
Janitorial/cleaning
Waste/recycling
Pest control
Grease waste removal
Baggage systems operation and maintenance
Passenger Boarding Bridges
Facility Maintenance

**9.7 PLANS AND REPORTS**

The Lessee is required to provide a number of plans for the provision of the Operations and Maintenance Work, including the following (Section 1.5 of Section C of the RPW):

- Concept of Operations Plan;
- Operations & Maintenance Plan (“O&M Plan”);
- Maintenance Manual;
- Airside Operations Manual;
- Comprehensive Security Plan;
- Terminal Emergency Response Plan;
- Terminal Management Manual;
- Safety Management System Manual; and
- Environmental Management Manual.

BTY considers these requirements of the Operations and Maintenance Term Requirements as appropriate and in-line with similar agreements in North America.

**9.8 SERVICES PROVIDED TO THE LESSEE**

The Port Authority will sell, furnish and supply the following services to the Lessee for use on the Premises (Section 39(b) of the Lease):

- Electricity;
- Sewerage;
- Domestic Cold Water; and
- Chilled Water and medium temperature hot water.

The Port Authority has entered into the Cogeneration Agreement with KIAC Partners (“KIAC”), dated April 28, 1993, for the construction, installation and operation of a Cogeneration Facility to produce electricity, Hot Water and Chilled Water and a thermal distribution system (“TDS”) at the Airport. Under the Cogeneration Agreement, the Port Authority will purchase all of the Lessee’s requirements for Hot Water and Chilled Water from KIAC and sell it to the Lessee (Section 40(a)(1) of the Lease).

The Port Authority will establish estimated unit rates each Calendar Year for the consumption of Hot Water and Chilled Water and will provide the Lessee with an estimated bill each month, which the Lessee will pay on a monthly basis. At the end of each Calendar Year, the Port Authority will determine the amounts payable by the Lessee and provide the Lessee with a final billing, which will be reconciled with the estimated monthly bills with a payment adjustment to reflect any over or under payments (Section 40(b)(1)(iv) of the Lease).

## 9.9 CONCLUSION

We note the following:

- The Lessee transferred the responsibility for performance of the Operations and Maintenance Work to the Manager under the MSA but has retained the risk for the O&M costs. The Lessee will pay the Manager based on Annual Services Budgets prepared by the Manager each year. Once an Annual Service Budget is agreed, the Manager will not be permitted to make expenditures in excess of the budgeted amount unless approved by the Lessee;
- The Manager has a structured organization and performance plan that is consistent with anticipated operations procedures and is overall in a position to mitigate risks and unknown factors;
- Vantage has a long track record of successfully managing airports, including its experience at LaGuardia Terminal B in the New York market;
- Facilities Management requirements are typical of the current social infrastructure P3 market. The requirements are reasonable and achievable for an experienced Facility Manager, such as the Manager;
- The Manager has developed the FM Cost Model using a combination of quotes from subcontractors, in-house historical data and existing contracts for Terminal 7 and the LaGuardia Terminal B project. The Manager’s methodology in developing the FM Cost Model is consistent with their approach on other US P3 projects and considered appropriate;
- The FM Cost Model has been developed using the Manager’s ongoing experience at Terminal 7. The Manager has hired key staff with extensive facilities management experience at Terminal 7 and JFK Airport more broadly; and
- Based on our review of the FM Cost Model, including the methodology used in its development, we consider the FM Cost Model to be reasonable for a project of this size and complexity, with this combination of services and to be low risk.

## 10.0 Lifecycle

### 10.1 INTRODUCTION

The Lessee will perform Major Maintenance to meet the Handback Requirements and to maintain compliance with the performance measures and standards in Section 11 of the Lease (Section 86(a) of the Lease).

The Lessee will prepare an Asset Preservation Schedule, which will be updated throughout the Term to reflect then-existing conditions of the Premises, changes in the estimated cost of Asset Preservation Work, changes in technology, changes in the means and methods of performing Asset Preservation Work and planned withdrawals from the Major Maintenance Reserve Fund for the next five Calendar Years (Section 86(b) of the Lease).

The Lessee will transfer the responsibility for ongoing capital and Lifecycle planning assistance and coordination to the Manager under the MSA but will retain the Lifecycle cost risk. The Lessee will pay the Manager based on Annual Services Budgets prepared by the Manager each year. Once an Annual Service Budget is agreed, the Manager will not be permitted to make expenditures in excess of the budgeted amount.

### 10.2 LIFECYCLE COST MODEL

The Lifecycle Cost Model for Phase 1 and Phase 2 can be summarized as follows:

Description	Amount
Life Cycle Amount	\$1,075,945,174
Area (sf)	1,200,000
Term – O&M Period (Years)	35
Life Cycle / sf / Year	\$25.62
Annual Lifecycle Amount as Percentage of Direct Construction Price	1.25%

The total lifecycle costs presented in the table above consist of \$796M of replacement costs and \$280M of repairs and maintenance costs over the Term. Please refer to Section 9.4 for additional detail on the repairs and maintenance costs. We have reviewed the lifecycle cost model in conjunction with the routine O&M cost model presented in Section 9.4.

The elemental split of the Lifecycle Cost Model is graphically depicted as follows:

The profile of the Lifecycle Cost Model is graphically depicted as follows:

The profile of the Lifecycle Asset Replacement Category is graphically depicted as follows:

### 10.3 ASSESSMENT OF LIFECYCLE COSTS

We received an appropriate level of detail to support the Lifecycle Cost Model, which we have reviewed and discussed with the Manager. The Manager has developed the Lifecycle Cost Model using the Design-Builder’s Construction Price, in-house historical data and experience within this market sector. The estimate was developed using a bottom-up approach accounting for individual assets in order to formulate the overall projected costs for each construction division. Lifecycle cost estimate divisions were then divided into three main categories comprising of the following:

- Asset Replacement – Represents full replacement of asset/system assuming an end of useful asset life scenario;
- Asset Repair – Represents those assets/systems where there remains some useful life, however, some partial replacements are required in order to ensure proper functionality; and
- Asset Maintenance – Represents general maintenance activities for assets/systems that are not part of the standard operational tasks which are typically performed on a regular basis.

These three above-mentioned categories are taken as combined costs when considering the full Lifecycle budget and planning. The Lifecycle plan also features multiple unique budget costs outside of the typical building assets and characteristics. These include the following:

- Baggage Handling;
- Jetbridges;
- Civil – Airside & Landside; and
- Fuel systems and infrastructure (including the aircraft hydrant fueling system and on-site diesel fuel storage tanks for emergency generators).

The Lifecycle Cost Model of \$25.62/sf/year is within the range that BTY has developed using recent airport terminal redevelopment projects and adjusting for Project specific factors and competitiveness.

The Lifecycle Cost Model has some peaks within the cost profile due to the Manager deliberately aligning certain asset replacements in order to complete larger refresh projects and systems overhauls across larger segments of the terminal in consolidated projects and achieve economies of scale and minimize operational disruptions. In reality, the Manager notes that these spikes will likely be smoothed out over 2 to 3 years to complete the projects, which we consider reasonable.

When reviewing and assessing the Project, all extraneous factors were considered including the specialty assets as listed above. We also reviewed the cost/sf of each major element and Division and had discussions with the Manager to understand their approach to carrying out the FM and Lifecycle services. Also included was an in-depth discussion into how each Divisional cost was formulated in order to gain perspective into how certain potential risks were mitigated or eliminated. Based on our review of the Lifecycle Cost Model, including the methodology used in its development and the factors noted above, we consider the Lifecycle Cost Model to fall within the anticipated competitive range for a project of this size and complexity, and if executed according to the specified plan to be low risk.

#### 10.4 HANDBACK REQUIREMENTS

On the Expiration Date, the Lessee will hand the Premises back to the Port Authority in a condition that meets the Handback Requirements (Section 87(a) of the Lease).

The Handback Requirements require the Lessee to hand back the assets fit for purpose, fully functional and in the following condition, as rated by the Port Authority Enterprise Condition Rating Protocol (Section 2.12 of Section C of the RPW):

- “Good” condition (rating condition grade 2) or better for Critical Assets; and
- “Fair” condition (rating condition grade 3.4) or better for all other assets.

The parties will perform a joint Pre-Handback Inspection of the Premises prior to the Expiration Date to determine the condition of the premises and the residual life of the assets and to revise the Capital Asset Management Plan. The Lessee will be responsible for correcting any Defects identified in the Pre-Handback Inspection by the Expiration Date.

Five years before the end of the Term, the parties will jointly appoint an independent consultant to provide an estimate of the costs to meet the Handback Requirements (the “Handback Amount”). The Lessee will establish a Handback Reserve Fund for the sole and exclusive benefit of the Port Authority, which will be funded to 115% of the Handback Amount. The independent consultant will provide an annual assessment of the Handback Amount. If there is an excess of funds in the Handback Reserve Fund, the excess funds will be released to the Lessee (Section 87(d) of the Lease).

The Port Authority will be entitled to withdraw funds from the Handback Reserve Fund during a two-year period beginning on the Expiration Date if any portion of the Premises does not satisfy the Handback Requirements. After the expiration of the two-year period, any remaining funds in the Handback Reserve Fund will be released to the Lessee.

#### 10.5 HANDBACK ASSESSMENT

We received a detailed Handback Cost Estimate to support the Lessee’s plan for achieving the Handback Requirements, which we have reviewed and discussed with the Manager. The Handback Cost Estimate for Phase 1 and Phase 2 can be summarized as follows:

Category	Phase 1		Phase 2				Total
	Expected Useful Life 40 Years	Expected Useful Life 12 Years	Expected Useful Life 40 Years	Expected Useful Life 35 Years	Expected Useful Life 12 Years	Expected Useful Life 7 Years	
Shell	\$29,656,575	\$41,996	\$13,093,009	\$0	\$44,715	\$0	\$42,836,295
Interiors	\$561,600	\$138,930	\$273,000	\$0	\$105,655	\$0	\$1,079,185
Conveying	\$0	\$0	\$0	\$0	\$0	\$47,300	\$47,300
Baggage Handling	\$0	\$19,342,500	\$0	\$0	\$189,700	\$0	\$19,532,200
Plumbing	\$0	\$124,306	\$0	\$0	\$23,964	\$0	\$148,270
HVAC	\$428,337	\$0	\$146,328	\$71,356	\$0	\$	\$646,021
Fire Protection	\$786,112	\$0	\$786,112	\$0	\$0	\$0	\$1,572,224
Electrical Power	\$20,478,853	\$5,695,888	\$7,953,696	\$74,268	\$636,240	\$0	\$34,838,945
Electrical, Communications & Security	\$927,701	\$7,513,870	\$0	\$0	\$679,633	\$0	\$9,121,204
FF&E	\$0	\$0	\$0	\$0	\$0	\$0	\$0
Jetbridges	\$0	\$768,900	\$0	\$0	\$179,520	\$0	\$948,420
Civil – Airside	\$10,695,122	\$36,266	\$16,340,600	\$0	\$0	\$0	\$27,071,988
Civil – Landside	\$9,196,027	\$0	\$0	\$0	\$0	\$0	\$9,196,027
Fuel	\$6,646,777	\$0	\$1,236,121	\$0	\$0	\$0	\$7,882,898
<b>Total</b>	<b>\$79,377,103</b>	<b>\$33,662,656</b>	<b>\$39,828,866</b>	<b>\$145,624</b>	<b>\$1,859,427</b>	<b>\$47,300</b>	<b>\$154,920,976</b>

The Replacement Cycles and Percentages of Useful Life is graphically depicted as follows:

The Manager has developed the Handback Cost Estimate using the Design-Builder’s Construction Price, in-house historical data and experience within this market sector. The approach in developing the estimate included the following parameters:

- Ensuring all critical assets would receive a “Good Condition Rating” rating or better while non-critical assets would receive a “Fair Condition Rating” or better as required by the Lease (based on IPWEA ratings approach);
- Assuring the Useful Life Remaining for the assets at the end of the term is at 10% or more;
- Placing assets into “categories” based on similarities rather than on an individual basis (while maintaining a bottom-up approach); and
- Consideration that for all assets requiring handback work at the end of Term, not all would require a full replacement.

Using the above criteria as a basis of the approach, the methodology (as shown in the table above) included separation of the equipment and systems into asset categories and then by percentage of “End of Useful Life” groupings. This was completed for both Phases 1 and 2 since they have differing completion dates. Once this was completed, the handback value was allocated based on the Manager’s assessment of the magnitude of work needed in order to bring the assets into the appropriate condition rating, at a minimum. This system of rating and estimation was applied utilizing a percentage of total replacement cost and the extent to which each was outside of the acceptable condition rating.

After a careful review of the Handback Cost Estimate and the methodologies utilized in its development, the following points are noted:

- Phases 1 and 2 have been separated in the calculation of the handback estimate to account for the staggered completion date and the respective impact on the End of Useful Life for the assets;
- The asset categories were divided into multiple End of Useful Life “buckets” to ensure they were assessed and estimated separately;

- An overall bottom-up approach was utilized for the various asset categories to ensure each one was considered separately and properly developed;
- The total handback cost reflects a reasonable percentage of the total Lifecycle Plan cost;
- The anticipated useful life remaining for each asset category are reflective of industry standards; and
- Despite there being a threshold requirement of 10% of Remaining Useful Life for all critical assets, the cost strategy includes a plan for inclusion of a minimum of 20%.

In addition to the above points, it is also noted that the use of a robust preventative maintenance plan and capital replacement plan are also key factors in ensuring the Handback Plan can be effectively implemented and reliable. As stated in Sections 9.0 and 10.0 of this Report, the Operations and Lifecycle Plans have been well developed and should help ensure the facility is in the anticipated condition at the expiration of the Term.

Given all these above mentioned points, it is our opinion that the Handback Plan is satisfactory and responds well to the Handback Requirements as stipulated within the Lease.

## 10.6 MAJOR MAINTENANCE RESERVE REQUIREMENTS

The Lessee will establish and fund the Major Maintenance Reserve Fund on Substantial Completion of Phase 1, which will be used to pay the cost of Major Maintenance at the New Terminal Facilities (Section 86(c) of the Lease).

If the Lessee fails to perform any Major Maintenance by the times identified in the Asset Preservation Schedule, the Port Authority will notify the Lessee, which will be considered a notice of default under the Lease. If the Lessee fails to complete the Major Maintenance within 30 days, then the Port Authority may either declare an Event of Default or perform the Major Maintenance at the sole cost of the Lessee, which will be paid for by drawing on the Major Maintenance Reserve Fund (Section 86(c)(6) of the Lease).

The Lessee is entitled to object to any notice delivered by the Port Authority if it has completed the Major Maintenance or if the Major Maintenance is not yet required. The parties will then have 30 days to meet and agree on the dispute, after which the matter will be referred to the Dispute Resolution Procedure (Section 86(c)(7) of the Lease).

The Major Maintenance Reserve funding requirements are outlined in the financing documents. The intent is to fund the reserve account on a rolling 3-year look forward calculation so that the balance equals:

- 100% of the lifecycle costs in year n+1;
- 67% of the lifecycle costs in year n+2; and
- 33% of the lifecycle costs in year n+3.

We consider the Major Maintenance Reserve funding requirements to be in-line with previous P3 projects.

## 10.7 JOINT PERIODIC CONDITION SURVEY

The Port Authority will perform a Condition Survey, not more often than every 5 years after Substantial Completion of Phase 1. The Port Authority will notify the Lessee of the proposed Condition Survey including the name of the proposed Condition Survey Contractor, scope and fee structure. The Lessee will have 30 days to object to the proposed Condition Survey Contract, in which case the parties will consult in good faith to resolve the dispute. If the dispute is not resolved in 30 days, then the Port Authority may make a decision, which will be final (Section 55(b) of the Lease).

The Lessee and Port Authority will equally share the Condition Survey Costs, except for the Exit Baseline Report, which will be fully paid for by the Lessee (Section 55(d) of the Lease).

#300 - 30 E 6th Avenue, Vancouver, BC Canada V5T 1J4 | 604 734 3126

*This Report has been prepared at the request of JFK Millennium Partners on behalf of the Project Lenders and is the exclusive property of BTY Group, which is the owner of the intellectual property rights relating to this Report. The Report must be treated as confidential and proprietary information of BTY Group and it may not be disclosed, reproduced or permitted to be disclosed to any party without the prior consent of BTY Group.*

Following the issuance of a Condition Survey Report, the Lessee and Port Authority will have 90 days to agree on all actions required to meet the Lessee's maintenance and repair obligations. If cannot agree on any action within 90 days, the Port Authority may make a determination, which will be final (Section 55(e) of the Lease).

The Condition Survey requirement is typical for P3 projects.

## 10.8 CONCLUSION

We note the following:

- The Lessee has transferred the responsibility for ongoing capital and Lifecycle planning assistance and coordination to the Manager under the MSA but retains the Lifecycle cost risk. The Lessee will pay the Manager based on Annual Services Budgets prepared by the Manager each year. Once an Annual Service Budget is agreed, the Manager will not be permitted to make expenditures in excess of the budgeted amount;
- Lifecycle requirements are reasonable and achievable for an experienced Manager, such as Vantage;
- Handback requirements are typical of social infrastructure P3 projects;
- There remain some peaks within the lifecycle profile due to the Manager deliberately aligning certain asset replacements to achieve economies of scale and minimize disruptions. The Manager will likely smooth these activities out over 2-3 years in reality, which we consider reasonable;
- Manager's extensive experience, client list and company resource on a local and global basis provides the LTA with the evidentiary detail to be reassured that the Manager will have no issue in meeting the designated requirements;
- We have reviewed the Lifecycle Cost Model and discussed the delivery strategy with the Manager to understand their approach to carrying out the FM and Lifecycle services. The Manager has developed the Lifecycle Cost Model using the Design-Builder's Construction Price, in-house historical data and experience;
- Based on our review of the Lifecycle Cost Model, including the methodology used in its development and the factors noted above, we consider the Lifecycle Cost Model to be reasonable for a project of this size and complexity, and to be low risk; and
- We consider that the Handback Plan is satisfactory and responds well to the Handback Requirements as stipulated within the Lease.

## 11.0 Payment Mechanism

### 11.1 INTRODUCTION

The Project is a revenue risk deal with the Lessee collecting rent from concession and airline tenants. The Lease includes an Excess Value Rent revenue sharing mechanism whereby the Lessee will share rental revenue with the Port Authority after it achieves certain predefined return thresholds.

The Lessee will be responsible for making a series of rental payments to the Port Authority during the Term.

### 11.2 MILESTONE PAYMENTS

The parties have agreed to the following Milestone Payments (Section 79 and 81 of the Lease):

Milestone Payment	Value	Payable By	Milestone Payment Date
Port Authority Payment for replacement of the KIAC back-up fuel supply line	\$900,000	Port Authority	12 months following the PA Roadways Commencement Date
Lessee Milestone Payment for Roadways	\$23M	Lessee	12 months following the PA Roadways Commencement Date
Lessee Milestone Payment for Backup Power Supply	\$9M	Lessee	12 months following the PA Roadways Commencement Date
Central Maintenance of Traffic	\$13.8M	Lessee	
<b>Total</b>	<b>\$44.9M</b>		

Completion of the Milestone Payments has not yet been required. The earliest of the Milestone Payments will be due in March 2025.

### 11.3 MARKET TESTING

The Lease does not require benchmarking and market testing.

### 11.4 RENT PAYMENTS

Throughout the Term, the Lessee is required to pay the following rent payments to the Port Authority (Section 4 of the Lease):

- Ground Rent, equal to \$148,300 (2018\$) per acre per year for the Premises (Section 97 of the Lease). The Ground Rent will be paid monthly through payments of 1/12<sup>th</sup> the full amount beginning on the

Effective Date. The Ground Rent will be escalated each year by the greater of (1) 4%, or (2) 50% of the percentage change in CPI for the New Year;

- The Lessee has entered into a Leasehold Mortgage and will pay the First Additional Rent equal to \$500,000 per year. Payments began at Substantial Completion of Phase 1 and will last until all amounts secured by the Leasehold Mortgage have been repaid in full;
- Beginning on the Terminal 7 Parcel Lease Commencement Date, the Lessee will pay Second Additional Rent in the amount set forth on a schedule attached to the Lease, which includes payments of between \$50M and \$60M each year from 2023 through 2027, no Second Additional Rent in 2028 and 2029, and escalating amounts in 2030 and thereafter. The Second Additional Rent will be paid monthly through payments of 1/12<sup>th</sup> of the full amount;
- Third Additional Rental as additional compensation to the Port Authority for letting the Premises, in the amount of \$33M to be paid on the Effective Date and an additional \$1M per year during each year of the Term in equal monthly installments; and
- Beginning on the Terminal 7 Parcel Lease Commencement Date, the Lessee will pay the Concession Revenue Rent to the Port Authority, based either on a share of concession revenues payable to the Lessee or a formula based on enplanements through the terminal facilities, a portion of which payment may be paid on a subordinate basis during certain periods during the Term.

## 11.5 PAYMENT ADJUSTMENTS

In order to incentivize performance in accordance with the performance standards, the Manager's performance of the O&M Work in the New Terminal Facilities will be measured against defined KPIs and may be subject to deductions up to the Maximum Deduction or receive incentive payments up to the Maximum Incentive in accordance with the provisions described in the Performance Standards and Measurement Provisions (Section 11 of the Lease).

The Manager's performance will be measured and guided based on Key Performance Indicators ("KPIs").

The Lessee's risk related to the incentive and deduction regime will be transferred to the Manager under the MSA, to the extent the failure to achieve such performance standards was caused by the failure of the Manager to perform the Services in accordance with Best Management Practice. Deductions and incentives will be applied to the Manager's annual Management Fee (Section 12 of the MSA).

### 11.5.1 Key Performance Indicators

There are three categories of KPIs included in the Performance Standards and Measurement Provisions, which is included as Exhibit 8 of the Lease:

- Incentive KPIs;
- Monitoring KPIs; and
- Reporting KPIs.

All KPIs will commence Monthly Performance Reporting at Lease commencement; however, payments and deductions associated with the Incentive KPIs will only take effect beginning on the Phase 1 Completion Date. All KPIs are to be reported in real time using the digital/networked systems integrated with the Port Authority or reported within 10 business days of the end of the month where no digital/networked system is available.

*Incentive KPIs*

Incentive KPIs refer to KPIs with financial incentives or deductions, including the Airport Council International-Airport Service Quality Overall Satisfaction Score KPI (“ACI-ASQ KPI”) and KPIs related to the availability of certain terminal systems (“Systems Availability KPIs”).

The maximum potential incentive payment or deduction payment for Incentive KPIs will be equal to 30% of the annual Management Fee (the “Incentive Pool Annual Cap”).

The Port Authority has selected the ACI-ASQ program as the industry benchmark to measure the Lessee’s performance. The program uses a quarterly survey process. 75% of the Incentive Pool will be awarded based on the New Terminal Facilities’ ACI-ASQ Overall Satisfaction Score. For the ACI-ASQ Overall Satisfaction Score, the maximum incentive and maximum deduction will equal 75% of the Incentive Pool Annual Cap (the “ASQ Annual Cap”).

Incentives and deductions will be applied as follows:

ACI-ASQ Overall Satisfaction Score	ACI-ASQ Incentive Threshold	Incentive Payment or Deduction
4.80 out of 5	Maximum Incentive Target	Incentive payment equal to the ASQ Annual Cap
4.65	50% Incentive Target	Incentive payment equal to 50% of the ASQ Annual Cap
4.50	Aspirational Target	No incentive payment or deduction
4.25	Deduction Baseline	No incentive payment or deduction
4.15	50% Deduction	Deduction equal to 50% of the ASQ Annual Cap
4.10	Maximum Deduction	Deduction equal to the ASQ Annual Cap

For scores between the threshold levels described above, the incentive payment or deduction will be calculated using linear interpolation between the score and the threshold level.

The Incentive Threshold will be revisited jointly by the Lessee and Port Authority every 5 years following the opening of the New Terminal Facility.

Systems Availability KPIs will represent the remaining 25% of the Incentive Pool Annual Cap. The maximum incentive payment or deduction for each System Availability KPI will be equal to 25% of the Incentive Pool Annual Cap divided by 4 representing the total number of Systems Availability KPIs (the “System Availability KPI Annual Cap”).

Systems Availability Threshold	Incentive Payment or Deduction
Maximum Incentive Target	Incentive payment equal to the Systems Availability KPI Annual Cap
50% Incentive Target	Incentive payment equal to 50% of the Systems Availability KPI Annual Cap
Baseline	No incentive payment or deduction
50% Deduction Level	Deduction equal to 50% of the Systems Availability KPI Annual Cap

Systems Availability Threshold	Incentive Payment or Deduction
Maximum Deduction Level	Deduction equal to the Systems Availability KPI Annual Cap

The systems and their target thresholds are described in the table below.

System	Scope	Maximum Incentive Target	50% Incentive Target	Baseline	50% Deduction Level	Maximum Deduction Level
Conveyance Systems	Elevators, escalators, moving sidewalks	99.9%	99.75%	99.5%	99.325%	99.25%
Baggage Systems	Inbound & outbound	99.9%	99.75%	99.5%	99.325%	99.1%
Passenger Loading Bridges & Associated Equipment	Passenger Loading Bridges pre-conditioned air, visual docking guidance system	99.9%	99.75%	99.7%	99.6%	99.5%
Asset Management	Critical Preventative Maintenance	100%	98%	97%	96%	95%
	Planned Preventative Maintenance	100%	95%	90%	85%	80%

For scores between the threshold levels described above, the incentive payment or deduction will be calculated using linear interpolation between the score and the threshold level.

The Incentive KPI thresholds have been determined by the Port Authority. Based on conversations with the Lessee and Manager, we understand that the deduction thresholds related to the ACI-ASQ Overall Satisfaction Score (which make up 75% of the potential maximum deduction or incentive) is considered reasonable and that the Manager does not anticipate incurring deductions or incentives based on the ACI-ASQ Overall Satisfaction Scores achieved on Vantage’s portfolio of airport projects.

The deduction thresholds related to the Systems Availability KPIs (which make up 25% of the potential maximum deduction or incentive) are considered challenging and above industry standard based on Vantage’s experience across its portfolio of airport projects and there is a likelihood that deductions will be incurred for conveyance systems, baggage systems and passenger loading bridges. We note that the risk exposure for these deductions is capped at \$490,000/year and the Manager has included a \$500,000/year contingency in its annual budget, which is indexed to inflation, to address this risk.

#### Monitoring KPIs

Monitoring KPIs are performance indicators with targeted performance benchmarks that are managed through Performance Management Plans. No direct incentive payments or deductions are applied to Monitoring KPIs.

The Lessee will be responsible for providing the Port Authority with a Performance Management Plan, which will focus on four elements: infrastructure design; technology implementation; compatible leasing plan structure; and operations plans. The Monitoring KPIs will be evaluated on a quarterly basis in a joint meeting with the Lessee and the Port Authority.

If the Lessee fails to implement the Performance Management Plan, the Port Authority may take actions to achieve the targets and recover its costs from the Lessee.

The Monitoring KPI categories include the following:

- Terminal Frontage Flow;
- Check-in Times;
- Security Wait Times;
- Bathroom Cleanliness;
- Bathroom Availability;
- Baggage Delivery;
- Gate Utilization; and
- Sustainability.

#### *Reporting KPIs*

The Lessee will provide the Port Authority additional KPIs to indicate the performance of the New Terminal Facility and expectations on future performance. These Reporting KPIs will be selected by the Lessee from the following major categories:

- Terminal Traffic;
- Landside Performance;
- Airside Performance;
- Safety;
- Security;
- Risk Management;
- Financial and Commercial;
- Talent Management/Productivity;
- Capacity Utilization / Capacity Management;
- Customer Experience;
- Asset Management; and
- Environmental / Sustainability.

## **11.6 DELAY EVENTS**

The Lease defines Delay Events as any of the following events or conditions that occurs during the D&C Work Period, each of which may be subject to certain conditions or limitations (Section 2(ff) of the Lease):

- The occurrence of any Force Majeure Event;
- The Lessee discovers an Unknown Condition that adversely impacts the D&C Work. Unknown Conditions include Unknown Archaeological Remains, Unknown Endangered Species, Unknown Facilities and Unknown Hazardous Substances, excluding any which the Lessee should have known or is deemed to have known about prior to the Effective Date;
- The existence of any agreement, easement, right of entry, covenant, condition, restriction or other instrument to which the New Terminal Facilities or Off-Premises Facilities are subject and which materially interferes with the performance of the D&C Work and was not known to the Lessee, or is not apparent upon inspection of public records, or cannot be reasonably inferred from, the Available Documents or publicly available information, and could not reasonably have been identified through review and analysis of Available Documents or publicly available information;

- The issuance of any injunction, restraining order or other similar legal order by a court of competent jurisdiction under Applicable Law based on a claim that challenges the Port Authority's authority to enter into the Lease which prohibits or enjoins prosecution of the D&C Work;
- Any Rules and Regulations Change or the RPW Change that materially and adversely impacts the Lessee's performance of the D&C Work;
- Certain D&C Work suspensions by the Port Authority longer than 24 hours;
- The occurrence of any Compensation Event or event that would have constituted a Compensation Event but for a Force Majeure event with respect to the Port Authority or an Emergency;
- Any breach of the material obligations outlined in the Lease or the Construction Coordination Agreement by the Port Authority; and
- Any failure by British Airways to comply with its surrender obligations in the British Airways Lease with respect to the Terminal 7 Parcel on or prior to the end of the Existing Terminal Facilities Stub Operating Period as a result of delayed completion of the Terminal 8 site.

The Lessee is required to give notice to the Port Authority within 20 Business Days following the date on which the Lessee first became aware that an event has occurred that the Lessee claims is or is likely to become a Delay Event.

A Delay Event that is agreed between the Parties affecting the performance of the D&C Work will:

- Excuse the Lessee from performance of its obligations to perform the D&C Work pursuant to the Lease but only to the extent that such D&C Work is directly affected;
- Extend the Scheduled Phase 1 Completion Date and/or the Scheduled Completion Date day-for-day for any delays in the performance of the D&C Work directly caused by such Delay Event using a Time Impact Analysis; and
- Permit the Lessee to implement a Value Engineering Lessee Change in order to achieve costs savings to minimize the impact of such Delay Event.

A Delay Event that is agreed between the Parties affecting performance of the O&M Work will excuse the Lessee from performance of its obligations to perform O&M Work pursuant to the Lease and with respect to the Lessee's obligations to satisfy and achieve certain KPIs will entitle the Lessee to adjustments (either temporary or permanently) as necessary to reflect the impact of such Delay Event upon the Lessee's ability to satisfy such obligations.

Please refer to Section 3.9 for an overview of Delay Event Notices submitted by the Lessee.

## 11.7 COMPENSATION EVENTS

Compensation Events are defined as any of the following events or conditions that occurs during the D&C Work Period, each of which may be subject to certain conditions or limitations (Section 2(ee)(1) of the Lease):

- Any Port Authority Change;
- The willful failure of the Port Authority to provide the Lessee with Temporary Rights of Access within specified timeframes;
- The willful failure of the Port Authority (i) to provide the Lessee with access to the applicable sites necessary for the Lessee to be able to construct the Off-Premises Facilities within specified timeframes, or (ii) to provide the Lessee with power required for the testing and commissioning of the New Terminal Facilities by certain specified dates, or (iii) to provide the Lessee with power required for operation of the New Terminal Facilities by certain specified dates;

- Certain suspensions of the D&C Work by the Port Authority for longer than 24 hours;
- The Port Authority's direction to remove, uncover and restore D&C Work, in certain circumstances;
- Any failure of the Port Authority to respond to any request from the Lessee for review and/or approval of specified schedules, plans, design documents or other submittals within the Submittal Review Period;
- With respect to Governmental Approvals the Lessee is required to obtain during the D&C Work Period, any willful failure or delay by the Port Authority to provide information required by Applicable Law for the Lessee to obtain or comply with such Governmental Approvals that is specifically requested in writing, is in the possession of the Port Authority and is not otherwise available to the Lessee within 30 days after a written request from the Lessee; and
- Willful failure by the Port Authority to provide their signature within a reasonable time period (not less than 10 business days) following the Lessee's request in order to obtain various Governmental Approvals.

If the events described above are not classified as Compensation Events due to the occurrence of a Force Majeure event, it is required that the Parties coordinate with each other to resume the performance regarding the event after the termination of such Force Majeure Event.

It is the Lessee's responsibility to prove the occurrence of a claimed Compensation Event and Lessee Damages. The Lessee is required to provide the Port Authority with written notice within 20 Business Days following the date on which the Lessee first becomes aware that an event has occurred that the Lessee is claiming to be a Compensation Event ("Compensation Event Notice"). The Compensation Event Notice must describe the following (Section 2(ee)(2) of the Lease):

- The claimed Compensation Event and its date of occurrence, described in reasonable detail;
- Any underlying disagreement or ambiguity of a technical nature contributing to or affecting the claimed Compensation Event;
- The amount claimed as Lessee Damages;
- Evidence demonstrating that the Lessee could not avoid the Compensation Event without incurring material cost or delays;
- Evidence demonstrating the Lessee's efforts to off-set Lessee Damages; and
- A written analysis and calculation for the Lessee Damages. If the required details for the written analysis and calculation are not available within this 20 business-day period, the Lessee may submit an estimate of the Lessee Damages and a written analysis no more than 30 days following the initial Compensation Event submission.

If the Port Authority rejects the Lessee's Compensation Event Notice, the Lessee will have the opportunity to correct the issues within three Business Days following the Port Authority's notification of rejection.

Following the submission of the Compensation Event Notice, the Port Authority may choose to hire a technical consultant, at their own cost and expense, to prepare a report regarding the Lessee Damages estimate and claimed Compensation Event. If the Port Authority concludes that the Lessee Damages are incorrect, the Lessee is responsible to reimburse the Port Authority for the costs of the technical consultant (Section 2(ee)(2)(iv) of the Lease).

The Lessee Damages with respect to any Compensation Event will be the sum of (Section 2(ee)(3) of the Lease):

- Any adverse Net Cost Impact; and
- Solely with respect to a Port Authority Change, any additional amount payable to the Lessee under the Lease with respect to a Port Authority Change.

If the Lessee Damages required to be paid by Port Authority are due to a Port Authority Change, the Port Authority will not be required to pay any Lessee Damages until such Lessee Damages exceed the sum of:

- The Port Authority Contingency Amount; and
- The Port Authority Additional Contingency Amount.

The Lessee Damages will be net of all applicable insurance proceeds payable to the Lessee and the Contractors associated with the Compensation Event and include the costs of asserting the claim for insurance proceeds and any increased insurance premiums (Section 2(ee)(3) of the Lease).

If a Compensation Event occurs, the Lessee will be entitled to Lessee Damages, which will be payable as follows (Section 2(ee)(4) of the Lease):

- If the Lessee Damages is for prior D&C Work Costs which have already been incurred by the Lessee or its Contractor, the Port Authority will pay a lump sum amount within 40 Business Days of the final determination of Lessee Damages, unless otherwise agreed to by the Lessee; and
- If the Lessee Damages is to pay for future D&C Work Costs, then the Port Authority will either pay the Lessee as the costs are incurred, or as a lump-sum payment equal to the net present value of the Lessee Damages.

Please refer to Section 3.9 for an overview of Compensation Event Notices submitted by the Lessee.

## 11.8 FORCE MAJEURE EVENTS

If the performance by the Port Authority or the Lessee (the “Affected Party”) is delayed or prevented by any of the following (subject to certain limitations) (Section 45 of the Lease):

- Unforeseeable law, rule, regulation, order, injunction or other action adopted or taken after the Effective Date by any Governmental Authority with jurisdiction over the airport or actions taken by Lessee-Related Entities in accordance with the Lease;
- Acts of God, floods, storms, war, civil disorder, terrorist act, public enemy, strike, labor dispute, shortages of materials, fuel, power; or
- Any other cause not within the control of the Affected Party to remedy, including a pandemic or epidemic health event officially declared by a federal or New York State Governmental Authority.

## 11.9 CONCLUSION

We note the following conclusions:

- The Lessee will be responsible for making Milestone Payments to the Port Authority at defined points during construction for specific scopes of work to be provided by the Port Authority. These costs are included in the Project Management category of Lessee costs, which are described in Section 8.4 of this report;
- The Lessee will be responsible for making rental payments to the Port Authority during the Term. These costs are held separately in the Financial Model outside of the Lessee costs described in Section 8.4 of this report;
- The Lease includes Incentive KPIs to incentivize the Manager’s performance of the O&M Work. The Lessee’s risk related to the incentive and deduction regime is transferred to the Manager under the MSA;
- The Manager does not anticipate incurring either deductions or incentives related to the ACI-ASQ Overall Satisfaction Score based on Vantage’s experience on its other airport projects; and

- The deduction thresholds related to the Systems Availability KPIs are considered challenging and above industry standard and there is a likelihood that deductions will be incurred for conveyance systems, baggage systems and passenger loading bridges. We note that the risk exposure for these deductions is capped at \$490,000/year and the Manager has included a \$500,000/year contingency in its annual budget (indexed to inflation) to address this risk. Therefore, we consider the risk to be adequately mitigated.

## 12.0 Equator Principles

### 12.1 INTRODUCTION

The Equator Principles were established by the project finance sector to document a benchmark for the consideration of environmental and social risk factors during the due diligence process of assessing requests for project finance.

The risk management considers business, credit, environmental and reputation risk. The Equator Principles allow financial institutions to assess, document, mitigate and report upon the project and its potential risks. Although the initial rationale for the Equator Principles was directed at finance for emerging markets and Lesser Developed Countries it has become best practice to consider the Principles for all projects.

There are ten basic Equator Principles that were documented in 2013; these are presented following.

- Review and Categorization
- Social and environmental Assessment
- Applicable Social and Environmental Standards
- Environmental and Social Management System and Equator Principles Action plan
- Stakeholder Engagement
- Grievance Mechanism
- Independent Review
- Covenants
- Independent Monitoring and Reporting
- Reporting and Transparency

The Equator Principles were developed with the active participation of the World Bank Group’s International Finance Corporation (“IFC”) and require projects to be categorized per three levels of impact on the social and environmental landscape:

Category	Description
A	Potential significant adverse social or environmental impacts that are diverse, irreversible or unprecedented
B	Projects that are defined by the IFC as having potential limited adverse social or environmental impacts that are few in number, generally site-specific, largely reversible and readily addressed through well proven mitigation measures
C	These are projects that are defined by the IFC as having minimal, or no, social or environmental impacts

We note that the IFC have typically categorized transportation infrastructure projects as Category C or, when delivered in non-OECD countries, potentially Category B. Since we believe the likely significant concern of the IFC for the Project will be environmental risk we believe for the Project, the mitigation of these concerns has been confirmed by the due diligence of the Environmental, Hazardous Materials and Geotechnical investigations that have already been completed.

Please refer to Section 6 of this Report where we have reviewed the site investigation reports carried out on behalf of the Port Authority.

The Port Authority received a FONSI/ROD for the wider JFK International Airport Redevelopment Program. The FONSI/ROD represents the FAA’s determination that the Project will have no significant environmental impacts based on the results of the Final EA, dated April 20, 2020.

#300 - 30 E 6th Avenue, Vancouver, BC Canada V5T 1J4 | 604 734 3126

*This Report has been prepared at the request of JFK Millennium Partners on behalf of the Project Lenders and is the exclusive property of BTY Group, which is the owner of the intellectual property rights relating to this Report. The Report must be treated as confidential and proprietary information of BTY Group and it may not be disclosed, reproduced or permitted to be disclosed to any party without the prior consent of BTY Group.*

## 12.2 APPLICATION OF EQUATOR PRINCIPLES

The environmental and project approval processes for new transportation infrastructure projects in the United States meet the requirements of the Equator Principles.

The Project has benefited from the public process that was mandated by the FAA via the NEPA process, which also satisfied the requirements of the City of New York and the Borough of Queens. We consider that the proposed development will have a very low negative social/environmental impact. Since the Project will improve the public's access to aviation services, it is considered that the overarching social impact is positive. We also report that because the Project will be delivered as a LEED Silver certified project, the environmental impacts are demonstrated as also positive.

We are of the opinion that the Project should be designated Category C rather than Category B for the following reasons:

- The planning has occurred in an OECD country with well-established regulations;
- No significant negative social impacts are perceived that warrant specific analysis;
- Construction activities will be appropriately controlled by means of conscientious and well-developed regulations;
- The project will be delivered by a team that is well experienced in meeting required regulatory process;
- The Project is being delivered under the auspices of a government regulated authority and meeting federal/state/city requirements will be high on their agenda;
- Following completion of the Project there will be minimal new emissions and the potential for sanitary and storm-water pollution will be remote.

## 12.3 CONCLUSION

The appropriate categorization for the Project is Category C where the project has "minimal or no social or environmental impacts" as defined by the IFC guidelines which categorizes the Project as having minimal, or no, social or environmental impacts.

## 13.0 Documentation

We have completed this review based on an examination of the following documents, amongst others:

- a) Lease, Execution Version, dated November 17, 2022 and Supplemental Agreement, dated June 15, 2023;
- b) Section A – Requirements & Provisions for Design and Construction Work – General Provisions;
- c) Section B – Requirements & Provisions for Design and Construction Work – Technical Requirements;
- d) Section C – Operations & Maintenance Term Requirements;
- e) Design-Build Agreement, Execution Version, dated November 17, 2022;
- f) Management Services Agreement, Execution Version, dated November 17, 2022;
- g) 2021-10-28\_Vantage BA Cooperation Agreement Executed, dated October 28, 2021;
- h) 2022-07-21\_JFK T7\_Amendment to BA Cooperation Agreement\_DRAFT, dated July 21, 2022;
- i) Preliminary Geotechnical Data Report (Revision 2), dated October 11, 2019;
- j) Environmental Document Review Report for Terminal 7, dated May 2020;
- k) Environmental Document Review Report for Terminal 6, dated May 2020;
- l) Finding of No Significant Impact Record of Decision, dated April 21, 2020;
- m) Terminal 6 Development Comprehensive Basis of Design (Revision 02), dated August 13, 2021;
- n) DESIGN\_2021-08-02\_JFK T6-T7\_15% Piles and Foundations, dated August 2, 2021;
- o) DESIGN\_2021-08-02\_JFK T6-T7\_15% Electrical, dated August 31, 2021;
- p) DESIGN\_2021-08-02\_JFK T6-T7\_15% Mechanical, dated August 31, 2021;
- q) DESIGN\_2021-08-02\_JFK T6-T7\_30% Structural, dated September 9, 2021;
- r) 2022-08-30\_JFK T6 Detailed Baseline Appendix B-Detailed Schedule\_DRAFT;

## 14.0 Reliance on Report

This report has been prepared by BTY US LLC at the request of JFK Millennium Partners, LLC (the “Sponsor”) for the reliance of the Lenders. “Lenders” means the financiers, which may comprise banks and/or bond investors, underwriters and/or monolines and/or related parties, such as rating agencies, providing financing for the Project, either directly or indirectly (through one or more intermediaries) to the Lessee. The Lenders are to provide debt finance to the Lessee in connection with the Project.

This report has been prepared in accordance with the scope of BTY’s engagement with the Sponsor and is subject to the terms of that appointment. This report is for the sole and confidential use and reliance of the Sponsor and the Lenders. BTY, its directors, staff or agents do not make any representation or warranty as to the factual accuracy of the information provided to us on behalf of the Lessee, its sub-contractors or agents, or the Port Authority, upon which this report is based.

This report shall not be reproduced or distributed to any party other than the recipients outlined above, without the express permission of BTY, provided that the report may be disclosed, on a non-reliance basis, to any third party to the extent such disclosure relates to the Project or the financing of the Project, or otherwise to the extent required pursuant to law, regulation, judicial or governmental order, or in a judicial or governmental proceeding.

Any advice, opinions, or recommendations within this document should be read and relied upon only in the context of this report as a whole. The contents of this report do not provide legal, insurance or tax advice or opinion.

This report is intended to provide a review of the fundamental technical features of the Project and provide an overview of the risks and mitigants of the Developer’s approach with regards to the construction and operation of the Project.

## 2.0 RELIANCE

INTECH Risk Management GmbH (“INTECH”) has prepared this Lenders’ Insurance Advisor Report (“Report”) at the request of the Project Co, in connection with the Project.

The following listed parties (collectively, the “Relevant Parties”):

- (a) Project Lenders, defined as:
  - (i) prospective and actual providers of financing to the Project, including, without limitation, underwriters, bondholders, bank lenders, and other financing providers for the Project, and any security trustee or agent;
  - (ii) insurers or other providers of credit enhancement in connection with the financing of the Project; and
  - (iii) rating agencies
- (b) the Project Co;
- (c) each member of the Project Co;
- (d) any person that directly or indirectly through one or more intermediaries controls, is controlled by or is under common control with Vantage or RXR;
- (e) JetBlue Airways Corporation and its affiliates;
- (f) American Triple I Partners, LLC and its affiliates and any funds controlled by such entity;
- (g) possible, prospective, or actual other equity investors in the Project;
- (h) and each of their respective advisors,

are irrevocably entitled to use, refer to, and rely on the Report in accordance with INTECH’s engagement with the Project Co.

INTECH irrevocably authorizes and gives consent to any Relevant Party to provide or otherwise disclose the Report to third parties, solely to the extent it relates to the Project or the financing of the Project, provided that this authorization and consent to disclose the Report to a third party shall not confer upon such third party (other than any Relevant Party) any right to rely on the Report and any reliance thereon shall be at the sole risk of such third party and without liability to INTECH and further provided that the Relevant Parties may provide or otherwise

disclose the Report to the extent required pursuant to law, regulation, judicial or governmental order, or in a judicial or governmental proceeding.

## 3.0 PROJECT DESCRIPTION

John F. Kennedy International Airport (“JFK”) is the largest international gateway airport in the United States and the largest airport serving the New York City region with approximately 62.5 million passengers served in 2019.

A new Terminal 6 was officially approved by the PA Board of Directors and the Port Authority has entered into a lease agreement with JFK Millennium Partners, LLC, the private consortium that is responsible for financing, developing, and operating the new terminal.

The full approximately \$5.0 billion expense of building the terminal will be privately financed by JFK Millennium Partners. It will be built on the sites of the former Terminal 6, which was demolished in 2011, and the aging Terminal 7, which will be demolished once the new Terminal 6 Phase 1 construction is complete.

For this project, Vantage has partnered with American Triple I (ATI), a 100% minority and woman owned investor and developer, RXR Realty, a leading New York commercial real estate development firm, and JetBlue Airlines, with AECOM Hunt as the design-build team.

Together with the Port Authority, JFK Millennium Partners has the exciting opportunity to bring yet another world-class airport terminal to life in the New York metro area, through intuitive, sustainable terminal design, best-in-class operations, and more than 100,000 square feet of exceptional, New York inspired customer amenities.

## 4.0 DOCUMENTS REVIEWED

As part of our review, we have reviewed the following documentation:

### 4.1 Agreements & Other Relevant Documents

- Lease Agreement dated November 17, 2022, between The Port Authority of New York (“Port Authority”) and New Jersey and JFK Millennium Partners, LLC (“Lessee”) Execution Version including the Supplemental Agreement dated June 15, 2023 (“Lease Agreement”);
- Design Build Agreement dated November 17, 2022 between JFK Millennium Partners, LLC, (“Developer”), and Hunt Construction Group, Inc., (“Design-Builder”);
- Management Services Agreement between JFK Millennium Partners, LLC (“Lessee”) and Vantage Airport Group (JFK) Ltd (“Manager”), dated November 17, 2022 (“Management Services Agreement”);
- Collateral Agency and Accounts Agreement among JFK Millennium Partners LLC (“Borrower”), The Bank of New York Mellon (“Senior Collateral Agent”), The Bank of New York Mellon (“Securities Intermediary”), The Bank of New York Mellon (“Intercreditor Agent”), The Bank of New York Mellon (“Trustee”), ING Capital LLC, (“Administrative Agent”), The Bank of New York Mellon (“Deposit Account Bank”) and New York Transportation Development Corporation (“Issuer”) dated November 1, 2022 (“Collateral Agency and Accounts Agreement”), and draft First Amendment to Collateral Agency and Accounts Agreement;

- Lender Technical Advisor Report V1.2, JFK Terminal 6 & 7 Redevelopment Project, prepared for JFK Millennium Partners on behalf of the Project Lenders, dated September 27, 2024 (“LTA Report”);

## 5.0 REQUIRED INSURANCE – LEASE AGREEMENT

The Lessee shall procure and maintain, or cause to be procured and maintained, the insurance policies set forth in Section 12 (Insurance) strictly in accordance with the minimum coverage requirements and terms of coverage as set forth in Section 12 (Insurance). Each insurance policy required to be procured and maintained in accordance with Section 12 (Insurance) shall be effective on the Effective Date (or such other date to the extent specified in this Agreement) and, except with respect to the insurance policies described in Section 12(a)(2) and Section 12(a)(3) (which shall be maintained throughout the D&C Work Period or as otherwise specified therein) and to the extent otherwise explicitly specified in this Agreement, maintained throughout the Term.

### 5.1 D&C Work Insurance

The Lessee shall procure, maintain and pay for, or cause its Contractors to procure, maintain and pay for, the following insurance policies until completion of the D&C Work and for such longer period of time as specified herein:

Type of Insurance	Details of Coverage	Sum Insured/Deductible
Commercial General Liability Insurance	<p>Written on an occurrence form, which shall include products/completed operations for a period of not less than six (6) years after the Completion Date, premises - operations, acts of Terrorism, NBCR, explosion, collapse and underground property damage, independent contractors coverage, blanket contractual liability, covering the obligations assumed by the Lessee, bodily injury, including death, and property damage liability, broadened to include (or equivalent separate policies covering) sprinkler leakage legal liability and water damage legal liability (including damage caused by water and any other substance discharged from any part of the fire protective equipment for the Premises covering operations at both Existing Terminal Facilities or any portion thereof prior to demolition thereof, and all or any portion of the New Terminal Facilities as they are completed, or the collapse or fall of tanks forming part thereof, or the component parts or supports of such tanks) none of the foregoing to contain exclusions pertaining to:</p> <p>(1) "action-over" claims,                      (2) damage to aircraft (including aircraft in the care, custody or control of the Lessee),                      (3) "insured vs. insured" suits, or                      (4) demolition.</p>	<p>\$300,000,000 – Combined single limit per occurrence and in the aggregate for death, personal injury, bodily injury and property damage liability</p> <p>\$300,000,000 – Products-Completed Operations aggregate</p> <p>Maximum limit then available in the market (subject to section 12(d)(13)) - NBCR</p>
Commercial Automobile Liability Insurance	<p>Covering owned, non-owned and hired vehicles and including automatic coverage for newly acquired vehicles.</p>	<p>\$25,000,000 – Combined single limit per occurrence and in the annual aggregate for death, bodily injury and property damage liability for vehicles on the airside</p>
Pollution Legal Liability Insurance	<p>Claims made policy with a six (6) year policy term (renewable annually thereafter) and OCIP Contractors Pollution Liability (occurrence) policy with a six (6) year policy term, which shall include completed operations for six (6) years after Substantial Completion of the Project providing</p>	<p>\$100,000,000 – Combined single limit per incident and in the aggregate with linked limits for each policy</p>

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	<p>coverage for bodily injury liability, property damage, environmental damage caused by pollution conditions on land, in air and on water, covering the Lessee, the D&amp;C Contractor and all tier sub-Contractors' pollution legal liability, including cleanup and Contractors Pollution Liability insurance covering the D&amp;C Work Period, which shall, as appropriate, include completed operations for a period of not less than six (6) years after the Completion Date, and exacerbation of known environmental conditions. Such coverage shall not contain a sunset provision, or any other provision, which would prohibit the reporting of a claim and the subsequent defense and indemnity that would normally be provided by the policy, shall "pay on behalf of" rather than "indemnify" the insured and shall include transportation coverage by or on the behalf of the Lessee for the loading and unloading and hauling of waste materials (including, without limitation, ACM and LCP) from the Premises to the final disposition location. Such coverage extensions shall be acceptable on a claims made basis.</p> <p>The pollution legal liability policy(ies) shall be expressly endorsed for this Agreement and transportation coverage for each transfer location and material disposition location.</p> <p>The pollution legal liability policy(ies) shall:</p> <p>(x) state that claim, disputes and coverage shall be litigated in United States courts having jurisdiction, and not be limited to arbitration and</p> <p>(y) subject to known conditions exclusions, acknowledge the Lessee's and its Contractors' disclosure to the insurance carrier of the presence on the Premises or activities or areas otherwise subject to the</p>	

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	insurance policies of hazardous or toxic wastes or substances under Applicable Law including, but not limited to, the Resource Conservation and Recovery Act (“RCRA”), 42 U.S.C. Section 6901 et. seq., the Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA”), 42 U.S.C. Section 9601 et. seq. and/or the Toxic Substances Control Act (“TSCA”), 15 U.S.C. Section 2601 et. seq.	
Professional Liability Insurance	On a claims-made basis with a ten (10)-year reporting/discovery period following the completion of each phase of the Construction Project, subject to a minimum policy term of ten (10) years, inclusive of D&C Work, which shall include a retroactive date that precedes the commencement of any Design Work and covering against liability, including acts, errors and omissions arising from professional services or work performed by or on behalf of the Lessee, the D&C Contractor, and any of its sub-Contractor, Lead Designer or any other Person employed by or on behalf of the Lessee, the D&C Contractor, sub-Contractor, or Lead Designer. All endorsements and exclusions shall be evidenced on the certificate of insurance, policy declaration page and schedule of endorsements (provided that premium amounts may be redacted therefrom)	\$75,000,000 – Combined single limit per claim and in the annual aggregate total limit in combination of policies carried by the Lessee, the D&C Contractor and/or the Lead Designer (provided that the policy carried by each of the Lessee, the D&C Contractor and the Lead Designer shall have a minimum limit of at least \$20,000,000)
Workers’ Compensation Insurance and Employer’s Liability Insurance	Each in accordance with the requirements of New York law. A waiver of subrogation, where legally permitted, shall be provided in favor of the Port Authority and the City Insureds	
Builder’s Risk Insurance	The Lessee shall procure, maintain, and pay premiums for, Builder’s Risk (all risk, including coverage for loss or damage by fire, collapse, lightning, windstorm, flood, earthquake, hail, acts of Terrorism, NBCR, explosion, underground property damage, riot, vandalism, malicious mischief, civil commotion, aircraft, vehicle impact, smoke, off premise service interruption, delay in	

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	<p>startup, delay in completion, debris removal, valuable papers, pollutant cleanup and removal, professional fees, extra/expediting expenses, mold (to the extent ensuing from a separately covered cause of loss) and such other risks) on a Completed Value basis (except, with respect to NBCR, subject to Section 12(d)(13) (NBCR)) (non-reporting basis) with LEG III covering the D&amp;C Work during the performance thereof, including off site material, property in transit and delivered to the Premises but not attached to the realty, or existing property, until the D&amp;C Work is completed. Notwithstanding the foregoing, it is agreed by the Parties that in order to accommodate the construction phasing and sequencing of the D&amp;C Work, the Lessee shall be permitted to procure and maintain Builder’s Risk coverage at any given time only with respect to those phases of the D&amp;C Work which is being performed by the Lessee, and upon the issuance of a “Temporary Certificate of Authorization to Occupy or Use” in accordance with the TCAP Process with respect to any Partial Occupancy Portion, the Lessee shall no longer be required to maintain such policy with respect thereto; provided, that such Partial Occupancy Portion is, as of the date of issuance of the applicable “Temporary Certificate of Authorization to Occupy or Use”, subject to insurance coverage satisfying the applicable requirements set forth in subclauses (i) and (iii) of Section 12(a) (4) (Required Insurance During the Entire Term), such that no element, phase or completed portion shall be uninsured or underinsured with a Builder’s Risk policy or an all-risk property policy, as applicable, at any time.</p>	

## 5.2 Required Insurance During the Entire Term

During the Term (including any and all extensions thereof), the Lessee shall procure, maintain, and pay premiums on, the following insurance policies:

Type of Insurance	Details of Coverage	Sum Insured/Deductible
All-Risk Property Damage Insurance	<p>All-risk property damage insurance against all risk of loss, including, without limitation, coverage for acts of Terrorism, NBCR, flood, windstorm, storm surge, collapse, lightning, hail, ice, explosion, riot, vandalism, malicious mischief, civil commotion, Aircraft, smoke, fire and earthquake, and any other improvement constructed by the Lessee pursuant to this Agreement and all buildings, structures, improvements, installations, facilities, fixtures and equipment, furnishings and physical property owned, leased or within the care, custody or control of the Lessee and now or in the future located on or constituting a part of the Premises, with no coinsurance penalty provision.</p> <p>A waiver of subrogation, where legally permitted, shall be provided in favor of the Port Authority and the City Insureds.</p>	Full replacement cost (including all or any portion of the Existing Terminal Facilities prior to demolition thereof) (except, with respect to NBCR, subject to Section 12(d)(13) (NBCR)),
Boiler and Machinery Insurance	Covering all boilers, pressure-vessels and air conditioning and any other related equipment operated by the Lessee in or on the Premises (including all or any portion of the Existing Terminal Facilities prior to demolition thereof), including expedited expense, the policy or policies to be effective throughout the Term and to be in such form as may now or in the future be prescribed as of the effective date of said insurance by the rating organization having jurisdiction and/or fully compliant with any standards applied by the Commissioner of Financial Services of the State of New York in approving boiler and machinery policies for use by admitted insurers in the State of New York	In such amounts as to sufficiently cover the full inspection and replacement cost of such boilers, pressure-vessels and air conditioning and other related equipment
Business Interruption Insurance	On an Actual Loss Sustained basis written on an "all risks of physical loss" basis.	In an amount equal to the greater of (i) the gross rents payable by Sublessees of the

Type of Insurance	Details of Coverage	Sum Insured/Deductible
		<p>Premises for a period of three (3) years and (ii) the aggregate amount of Ground Rent, Second Additional Rent, Third Additional Rent and Concessions Revenue Rent payable by the Lessee hereunder for a three (3) year period with a waiting period of not greater than five (5) days for an interruption to ongoing operations of the Premises (including all or any portion of the Existing Terminal Facilities prior to demolition thereof) or continuing operations of surrounding Airport facilities</p>
<p>Commercial General Liability Insurance</p>	<p>Written on an occurrence form, which shall include products/completed operations, acts of Terrorism, NBCR, explosion, collapse and underground property damage, independent contractors coverage, blanket contractual liability, covering the obligations assumed by the Lessee, bodily injury, including death, and property damage liability, broadened to include (or equivalent separate policies covering) sprinkler leakage legal liability and water damage legal liability (including damage caused by water and any other substance discharged from any part of the fire protective equipment for the Premises covering operations at both Existing Terminal Facilities or any portion thereof prior to demolition thereof, and all or any portion of the New Terminal Facilities as they are completed or the collapse or fall of tanks forming part thereof, or the component parts or supports of such tanks), none of the foregoing to contain exclusions pertaining to (1) care, custody or control, (2) "action-over" claims, (3) damage to aircraft (including aircraft in the care, custody or control of the Lessee), or (4) "insured vs. insured" suits. Such insurance shall be broadened to include, or</p>	<p>\$300,000,000 – Combined single limit per occurrence and in the aggregate for death, personal injury, bodily injury and property damage liability</p> <p>Maximum limit then available in the market (subject to 12(d)(13)) – NBCR</p> <p><u>Cargo and Baggage Liability</u></p> <p>\$10,000,000 – Combined single limit per occurrence and in the aggregate each annual period for property loss of others</p>

Type of Insurance	Details of Coverage	Sum Insured/Deductible
Commercial Insurance      Automobile	<p>equivalent separate policies shall provide, cargo and baggage liability insurance</p> <p>Covering owned, non-owned and hired vehicles and including automatic coverage for newly acquired vehicles.</p>	<p>\$25,000,000 – Combined single limit per occurrence and in the annual aggregate for death, bodily injury and property damage liability for vehicles on the airside</p>
Pollution Insurance      Legal      Liability	<p>On an occurrence form (or alternatively, on a claims made basis with a ten (10) year reporting/discovery period) providing coverage for bodily injury liability, property damage and environmental damage caused by pollution conditions on land, in air and on water, covering the Lessee, the D&amp;C Contractor and all tier sub-Contractors' pollution legal liability, including cleanup and Pollution Legal Liability insurance covering the Term, which shall, as appropriate, include an extended reporting for a period of not less than ten (10) years after the Completion Date. Such coverage shall not contain a sunset provision, or any other provision, which would prohibit the reporting of a claim and the subsequent defense and indemnity that would normally be provided by the policy, shall "pay on behalf of" rather than "indemnify" the insured and shall include transportation coverage by or on the behalf of the Lessee for the loading and unloading and hauling of waste materials (including, without limitation, ACM and LCP) from the Premises to the final disposition location.</p> <p>The pollution legal liability policy(ies) shall be expressly endorsed for this Agreement and transportation coverage for each transfer location and material disposition location.</p> <p>The pollution legal liability policy(ies) shall (x) state that claims, disputes and coverage shall be litigated in United States courts having jurisdiction, and not be limited to arbitration and (y) acknowledge the</p>	<p>\$100,000,000 – Combined single limit per incident and in the aggregate</p> <p>the Lessee shall cause each of its Contractors (and any such Contractor's subcontractors) that operate, maintain or service any fuel tanks or fuel distribution systems on the Premises to provide Contractors Pollution Liability insurance protecting itself, the Port Authority and the City Insureds in an amount no lower than \$100,000,000</p>

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	<p>Lessee's disclosure to the insurance carrier of the presence on the Premises or activities or areas otherwise subject to the insurance policies of materials that may be considered hazardous or toxic wastes or substances under Applicable Law, including, but not limited to, RCRA, CERCLA and/or TSCA.</p>	
<p>Liquor Liability Insurance</p>	<p>To the extent the same applies to the operations of the Lessee.</p>	<p>\$10,000,000 – Combined single limit per occurrence and in the aggregate each annual period for death, bodily injury and property damage liability</p>

	<p>\$75,000,000 in the aggregate with respect to the Lessee and each Applicable Contractor, with each Applicable Contractor named as an additional named insured under such policy of insurance.</p> <p>Such insurance shall include the following coverages: (1) liability arising from theft, dissemination and/or use of confidential information stored or transmitted in electronic form; (2) liability arising from the introduction of a computer virus into, or otherwise causing damage to, a customer's or third person's computer, computer system, network or similar computer-related property and the data, software and programs stored thereon; and (3) the interruption of services directly or ancillary to the operation of critical infrastructure systems of the Port Authority. Services insured by such policy shall include, at a minimum (to the extent applicable as determined by the Port Authority): (1) systems analysis, (2) systems programming, (3) data processing, (4) systems integration, (5) outsourcing including outsourcing development and design, (6) systems design, consulting, development and modification, (7) training services relating to computer software or hardware, (8) management, repair and maintenance of computer products, networks and systems, (9) marketing, selling, servicing, distributing, installing and maintaining computer hardware or software, and (10) data entry, modification, verification, maintenance, storage, retrieval or preparation of data output, and any other services provided by the Lessee and its Contractors.</p> <p>Such insurance shall also include: (1) coverage for loss, disclosure and theft of data in any form; media and content rights infringement and liability, including but not limited to, software copyright infringement;</p>	

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	<p>and network security failure or breach, including but not limited to, denial of service attacks and transmission of malicious code; (2) coverage for data breach regulatory fines and penalties, the cost of notifying individuals of a security or data breach, the cost of credit monitoring services and any other causally related crisis management expense for the duration of the claim; shall be primary and non-contributory, include contractual liability, severability for the insured organization for any intentional act exclusions in respect of data security liability, intentional or reckless or deliberate acts by any employee acting independently of any director, chief compliance officer, data protection officer or general counsel of the insured. Lessee's Cyber Liability, Network Security and Data Breach Insurance Policy shall cover consequential or vicarious liabilities (e.g., claims brought against the Port Authority or its directors, commissioners, officers, employees, agents, their affiliates, successors and/or assigns due to the wrongful acts and failures committed by Lessee and its Contractors) and direct losses (e.g., claims made by the Port Authority and its directors, commissioners, officers, employees, agents, their affiliates, successors and/or assigns against Lessee and its Contractors for financial loss due to wrongful acts or failures of the Lessee, and its Contractors).</p> <p>Such insurance, with the coverages specified by this clause (ix) (<i>Cyber Liability, Network Security and Data Breach Insurance</i>), shall be maintained by the Lessee and its Applicable Contractors for the duration of the Term and for a period of six (6) years thereafter; provided that during the D&amp;C Work Period, such insurance policy shall only be required to be maintained by the earlier of (1) Lessee's or Lessee's Applicable Contractors connection to any of the Port Authority's</p>	

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	infrastructure systems or (2) implementation by the Lessee or any of its Applicable Contractors of any computer system, network or similar computer-related property within the New Terminal Facilities and the data, software and programs stored thereon.	
Commercial Crime Insurance	The Lessee shall procure, maintain, and pay premiums for, commercial crime insurance covering both innkeeper's/bailee legal liability, including broad form money and securities, money orders, counterfeit paper, depositor's forgery, computer fraud, cybercrime and transfer fraud, credit card forgery, audit expenses and employee dishonesty.	\$10,000,000 – Combined single limit per Occurrence
Workers' Compensation Insurance and Employer's Liability Insurance	<p>Throughout the Term, the Lessee shall procure, maintain, and pay premiums for, and cause its Contractors, sub-Contractors, any Lead Designer, any Manager and/or any concession manager to procure, maintain, and pay premium for, workers' compensation insurance and employer's liability insurance in accordance with the requirements of New York law.</p> <p>A waiver of subrogation, where legally permitted, shall be provided in favor of the Port Authority and the City Insureds.</p>	

### 5.3 Contractor Insurance Requirements

The Lessee may provide the insurance required under Section 12 (Insurance) by requiring each Contractor engaged by it for the Project Work to procure and maintain such insurance in accordance with the requirements set forth herein, including all applicable insurance that may be required from time to time pursuant to the TCAP Manual. Should the Lessee choose to procure insurance through its Contractors, the Lessee shall demonstrate to the Port Authority's satisfaction the Lessee's ability in and competence with managing such insurance requirements.

The Lessee shall be responsible to maintain, enforce, and ensure that the type of coverages and all limits maintained by it and any Contractors and sub-Contractors are accurate, adequate, and in compliance with the Port Authority insurance requirements set forth herein.

The Lessee shall cause each such Contractor to include the additional insureds and loss payees, as applicable, specified in the applicable insurance policies as required under Section 12 (Insurance).

If requested by the Port Authority, the Lessee shall promptly provide certificates of insurance evidencing coverage for each Contractor. If the Lessee does procure insurance through its Contractors as aforesaid, certificates of insurance and any other documentation required of the Lessee by this Section 12 (Insurance) shall similarly be required to be provided to the Port Authority by the Contractor or by the Lessee on behalf of the Contractor.

#### 5.4 Dedicated Insurance

All insurance coverage required to be provided by the Lessee, any Contractor, the Manager and any concession manager, other than any business automobile liability or workers' compensation insurance, shall be purchased specifically and exclusively for the Project Work and the Premises, and extend throughout the Term (or as otherwise provided herein) to all aspects of the Project Work and the Lessee's operations at the Airport, with coverage limits devoted solely to the Project Work and the Premises (and the areas subject to the Temporary Rights of Access and O&M Access Areas).

All insurance coverage required to be provided by the Lead Designer and any D&C Contractor, other than any business automobile liability or workers' compensation insurance, shall be purchased specifically and exclusively for the D&C Work and the Premises, and extend throughout the D&C Work Period to all aspects of the D&C Work, with coverage limits devoted to the D&C Work and the Premises (and the areas subject to the Temporary Rights of Access and O&M Access Areas).

The Lessee shall ensure that the insurance under this Agreement shall be seamless throughout the Term, including, without limitation, among and between each phase of the D&C Work, and shall not contain lapses or gaps in coverage. Any insurance necessary to be obtained and maintained in order to avoid any lapses or gaps in coverage shall be paid for and be the sole responsibility of the Lessee. Insurance coverage with dedicated limits specific to the Project Work and the Premises and identified premiums is acceptable; provided that it otherwise meets all requirements described in this Section 12 (*Insurance*).

#### 5.5 Other Requirements as to Insurance Policies

There are a number of additional requirements required by the insurance policies as outlined in Section 12. We have highlighted the key requirements, as follows:

- Insureds under Property and Liability Policies
  - (i) All property damage insurance policies (including Builder's Risk Insurance) required under this Agreement shall name the Lessee, the D&C Contractor, the Port Authority Indemnified Parties and the City Insureds (with insurance clauses consistent with the provisions of this Agreement) as additional insureds and loss payees, as their respective interests may appear.
  - (ii) All liability policies (except for professional liability insurance (errors and omissions), employer's liability insurance and workers' compensation insurance, if any) required under this Agreement shall name the Lessee, the D&C Contractor, the Port Authority Indemnified Parties and the City Insureds as additional insureds, with respect to liability arising out of the D&C Work, the

Operations and Maintenance Work or any other work or operations performed by Lessee, the D&C Contractor and any sub-Contractor, including materials, parts or equipment furnished in connection with such work or operations, using policy form at least as broad as ISO Form CG 20 10 11 85 (or CG 2010 or its substantial equivalent for ongoing operations and ISO Form CG 20 37 10 01 or its substantial equivalent for completed operations work). The Lessee shall disclose to the Port Authority Indemnified Parties any endorsements that limit or exclude coverage customarily provided by ISO's CG 00 01.

- The policies will contain contractual liability coverage other than professional liability.
- The Lessee's and its Contractors' insurance will be primary and non-contributory.
- Self-insurance including self-insurance retention funds, fronting captives, etc. are not permitted.
- Policies will provide for 90 days' notice of cancellation to the Port Authority and Recognized Mortgagee
- All policies will contain a waiver of subrogation shall be given in favor of all additional named insureds and additional insureds.
- All policies will contain separation of insured and severability of interests clauses

## 6.0 REQUIRED INSURANCE – DESIGN BUILD AGREEMENT

Traditional Insurance Coverage Design-Builder shall be required at all times beginning on the date hereof, and until receipt of written notice from Developer pursuant to Section 12.1.2 (if any), to comply with the insurance requirements annexed hereto as **Exhibit 27** and the insurance requirements set forth in Section 12 of the Lease to the extent applicable to the Design-Builder. Design-Builder shall be entitled to reimbursement for costs of maintaining such insurance at the costs set forth in the GMP. Design-Builder shall compensate Developer for any costs assessed by the Port Authority in accordance with Section 12(m)(4) and/or Section 12(n) of the Lease as a result of Design-Builder's failure to comply with the insurance requirements to the extent applicable to Design-Builder.

OCIP. Developer shall obtain an OCIP for the Project to provide for builder's risk, contractor's pollution liability, excess liability, general liability, and workers' compensation insurance that includes those terms set forth in **Exhibit 27** annexed hereto. Copies of any such policies and manual have been provided to Design-Builder for its review prior to binding of the coverage. Developer shall notify Design-Builder in writing when the OCIP policy has been bound for this Project, and Design-Builder shall within seven (7) Days of such notice cancel any insurance coverages to the extent specially obtained for the Project pursuant to Section 12.1, and Design-Builder shall be reimbursed for any costs incurred through the date of the cancellation of the policies.

Professional Liability. In addition to the Architect's and Design Professionals' practice policies, Design-Builder

and Lead Designer shall, at a minimum, procure and maintain project specific professional liability policies in the aggregate amount of Fifty Million Dollars (\$50,000,000).

Builder's Risk Insurance and Pollution Legal Liability Insurance

(1) Builder's Risk.

- a) Unless otherwise provided, Developer shall purchase and maintain builder's risk insurance in accordance with the insurance requirements set forth in Exhibit 27.
- b) Developer shall pay costs not covered because of such deductibles, provided, however, Developer shall be entitled to backcharge Design-Builder up to One Hundred Thousand Dollars (\$100,000) in builder's risk deductibles for each claim made against Developer's builder's risk policy in any event that any actions of Design-Builder or any Subcontractor(s) results in a builder's risk claim. If Design-Builder fails to pay any such deductible or backcharge any responsible Subcontractor for the same, Developer shall be entitled to withhold the same against a progress payment.
- c) The builder's risk insurance shall cover portions of the DB D&C Work stored off the Project Site, and also portions of the DB D&C Work in transit, so long as storage and transit are within the contiguous United States.

(2) Pollution Legal Liability Insurance.

- a) Unless otherwise provided, Developer shall purchase and maintain the pollution legal liability insurance in accordance with the insurance requirements set forth in Exhibit 27.
- b) Developer shall pay costs not covered because of such deductibles, provided, however, Developer shall be entitled to backcharge Design-Builder up to One Hundred Thousand Dollars (\$100,000) in pollution legal liability deductibles for each claim made against Developer's pollution policy in any event that any actions of Design-Builder or any Subcontractor(s) results in a pollution policy claim. If Design-Builder fails to pay any such deductible or backcharge any responsible Subcontractor for the same, Developer shall be entitled to withhold the same against a progress payment.

**6.1 Developer Provided Coverage**

Type of Insurance	Details of Coverage	Sum Insured/Deductible
Commercial General Liability Insurance	The commercial general liability insurance policy written on an occurrence form, which shall include products/completed operations for a period of not less than six (6) years after the Completion Date, premises -	\$300,000,000 – Combined single limit per occurrence and in the aggregate for death, personal injury, bodily injury and property damage liability

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	operations, acts of Terrorism, NBCR, explosion, collapse and underground property damage, independent contractors coverage, blanket contractual liability, covering the obligations assumed by the Developer, bodily injury, including death, and property damage liability, broadened to include (or equivalent separate policies covering) sprinkler leakage legal liability and water damage legal liability (including damage caused by water and any other substance discharged from any part of the fire protective equipment for the Premises covering operations at both Existing Terminal Facilities or any portion thereof prior to demolition thereof, and all or any portion of the New Terminal Facilities as they are completed, or the collapse or fall of tanks forming part thereof, or the component parts or supports of such tanks) none of the foregoing to contain exclusions pertaining to (1) "action-over" claims, (2) damage to aircraft (including aircraft in the care, custody or control of Developer), (3) "insured vs. insured" suits, or (4) demolition	\$300,000,000 – Products Completed Operations aggregate
Workers' Compensation Insurance and Employer's Liability Insurance	Each in accordance with the requirements of New York law. A waiver of subrogation, where legally permitted, shall be provided in favor of the Indemnitees	

### 6.1.2 Developer Election Not to Proceed with OCIP

In the event that Developer elects not to secure and maintain insurance coverage under Section A(1) via an Owner Controlled Insurance Program (OCIP), Design-Builder shall provide the insurance set forth in Section A(1) and shall be compensated for all direct and indirect costs associated with providing the insurance set forth in Section A(1).. In the event that Design-Builder will provide the insurance described herein, Design-Builder shall provide a certificate of insurance as well as copies of all policies will be provided to Developer no less than ten (10) days prior to start of work. Design-Builder shall maintain the required coverage for a minimum of six (6) years beyond the completion of all DB D&C Work for the Project, or such longer period as specified in this Exhibit 27, the Agreement, or the Lease.

### 6.1.3 Builder's Risk Insurance

Type of Insurance	Details of Coverage	Sum Insured/Deductible
Builder's Risk Insurance	<p>During the D&amp;C Work Period (and any and all extensions thereof), Developer shall procure, maintain, and pay premiums for, Builder's Risk (all risk, including coverage for loss or damage by fire, collapse, lightning, windstorm, flood, earthquake, hail, acts of Terrorism, NBCR, explosion, underground property damage, riot, vandalism, malicious mischief, civil commotion, aircraft, vehicle impact, smoke, off premise service interruption, delay in startup, delay in completion, debris removal, valuable papers, pollutant cleanup and removal, professional fees, extra/expediting expenses, mold (to the extent ensuing from a separately covered cause of loss) and such other risks) with LEG III covering the D&amp;C Work during the performance thereof, including off site material, property in transit and delivered to the Premises but not attached to the realty, or existing property, until the D&amp;C Work is completed</p> <p>Notwithstanding the foregoing, it is agreed by the Parties that in order to accommodate the construction phasing and sequencing of the D&amp;C Work, Developer shall be permitted to procure and maintain Builder's Risk coverage at any given time only with respect to those phases of the D&amp;C Work which is being performed by Developer, and upon the issuance of a "Temporary Certificate of Authorization to Occupy or Use" in accordance with the TCAP Process with respect to any Partial Occupancy Portion, Developer shall no longer be required to maintain such policy with respect thereto; provided,</p>	<p>On a Completed Value basis (except, with respect to NBCR, subject to Section 12(d)(13) (NBCR) of the Lease) (non-reporting basis)</p> <p>Developer shall be entitled to backcharge Design-Builder up to One Hundred Thousand Dollars (\$100,000) in builder's risk deductibles for each claim made against Developer's builder's risk policy in any event that any actions of Design-Builder or any Subcontractor(s) results in a builder's risk claim. Developer will assess a deductible or self-insured retention contribution against Design-Builder, and that deductible or self-insured retention contribution shall be due and payable to Developer within thirty (30) days after Developer's written demand thereof. Subject to Section 13.2.4 of this Agreement, Developer may back charge the party, may withhold from monies otherwise owing to the party, or may collect by any other lawful means, the amount(s) owed by the party as its allocated portion of the deductible or self-insured retention. The contribution shall remain uninsured by the party against whom it is assessed and will not be covered by any insurance policy, nor shall it be included in the contract price</p>

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	<p>that such Partial Occupancy Portion is, as of the date of issuance of the applicable "Temporary Certificate of Authorization to Occupy or Use", subject to insurance coverage satisfying the applicable requirements set forth in subclauses (i) and (iii) of Section 12(a)(4) of the Lease (Required Insurance During the Entire Term), such that no element, phase or completed portion shall be uninsured or underinsured with a Builder's Risk policy or an all-risk property policy, as applicable, at any time.</p>	

#### 6.1.4 Pollution Legal Liability Insurance

Type of Insurance	Details of Coverage	Sum Insured/Deductible
<p>Pollution    Legal    Liability Insurance</p>	<p>Written on a claims made basis, policy with a six (6) year policy term and OCIP Contractors Pollution Liability (written on an occurrence basis) policy with a six (6) year policy term, which shall include completed operations for six (6) years after the completion of all DB D&amp;C Work for the Project, or such longer period as specified in this Exhibit 27, the Agreement, or the Lease, providing coverage for bodily injury liability, property damage and environmental damage caused by pollution conditions on land, in air and on water, covering the Developer, Design-Builder, and all Subcontractors of all tiers' pollution legal liability, including cleanup</p>	<p>\$100,000,000 – Combined single limit per incident and in the aggregate for each policy</p> <p>Developer shall be entitled to back charge Design-Builder up to One Hundred Thousand Dollars (\$100,000) in pollution legal liability deductibles for each claim made against Developer's pollution policy in any event that any actions of Design-Builder or any Subcontractor(s) results in a pollution policy claim. Developer will assess a deductible or self-insured retention contribution against Design-Builder, and that deductible or self-insured retention contribution shall be due and payable to Developer within thirty (30) days after Developer's written demand thereof. Subject to Article 12 of this Agreement, Developer</p>

Type of Insurance	Details of Coverage	Sum Insured/Deductible
		<p>may back charge the party, may withhold from monies otherwise owing to the party, or may collect by any other lawful means, the amount(s) owed by the party as its allocated portion of the deductible or self-insured retention. The contribution shall remain uninsured by the party against whom it is assessed and will not be covered by any insurance policy, nor shall it be included in the contract price.</p>

### 6.1.5 Design-Builder Insurance Requirements

The Design-Builder will provide and maintain the following insurance described below from a company or companies authorized to transact insurance business in the state of New York, to cover the following losses: (i) any DB D&C Work not covered by the OCIP, (ii) work performed not at the Project Site, or (iii) work performed by non-OCIP enrolled Subcontractors. All insurers will be rated at least A - X in the current A.M. Best ratings guide or must be otherwise acceptable to the Developer.

#### 6.1.5.1 General Requirements

Design-Builder shall secure, and keep in full force and effect, and shall cause its Subcontractors to secure, and keep in full force and effect as required by this Agreement, the following coverage at Design-Builder's sole cost and expense. A certificate of insurance as well as copies of all policies will be provided to Developer no less than ten (10) days prior to start of work. The required coverage shall be maintained by Design-Builder's for a minimum of six (6) years beyond the completion of all DB D&C Work for the Project, or such longer period as specified in this Exhibit 27, the Agreement, or the Lease.

1. All policies shall:
  - a) Except for Workers' Compensation, Employers' Liability, and Professional Liability, stipulate that such insurance is primary and is not excess of, or contributing with, any other insurance, including any deductible, maintained by, provided to, carried by or for the benefit of the "Additional Insureds" (which are also referred to in this Agreement as the "Indemnitees"), which shall mean the entities and individuals listed in Exhibit 29 of this Agreement;
  - b) Except for Workers' Compensation, Employers' Liability, and Professional Liability, provide coverage to the Additional Insureds for bodily injury or death of an employee of the Design-Builder or all Subcontractors of every tier, regardless of whether such bodily injury or death is caused or alleged to be caused, in whole or in part, by the negligence or fault of any Additional Insureds;
  - c) Except for Workers' Compensation, Employers' Liability, and Professional Liability, and except as to the circumstances provided in Section 1.3.2. provide coverage to the Additional Insureds for liability caused by negligence, fault, breach of contract, breach or violation of statute,

- ordinance, governmental regulation, standard or rule by the Design-Builder and its agents, all Subcontractors of every tier and their agents, or any third party under its control;
- d) Agree that the amount of insurance available to the Additional Insureds shall be for the full amount of the loss up to the policy limits of liability and shall not be limited to the minimum requirements;
  - e) Waive any and all right of subrogation against all additional named insureds and the Additional Insureds;
  - f) Contain a severability endorsement if the policy does not contain a separation of insureds clause; and
  - g) Contain a provision giving the Additional Insureds a ninety (90) day prior written notice of any termination or cancellation of the policy or material change in coverage, except thirty (30) days' notice shall apply to cancellation due to non-payment of premium.
  - h) In addition to the requirements set forth herein, comply with all insurance requirements, terms and provisions as set forth in the Lease for the applicable type of coverage.
  - i) Each policy of liability insurance (except for professional liability insurance) shall be required to provide contractual liability coverage which shall cover the obligations assumed by such party under any indemnification provisions set forth in its agreement related to the Project. Design-Builder acknowledges and agrees that the policies required hereunder shall not be limited by any limitations expressed in the indemnification provisions set forth in this Agreement, other than that of a typical policy insuring work of this nature.
  - j) Design-Builder shall use best efforts to ensure that the insurance it procures and maintains shall provide that the interest of the Port Authority Indemnified Parties (as defined in the Lease) and the City Insureds (as defined in the Lease) will not be prejudiced by Developer or Design-Builder's error, omission or misdescription of the risk insured under the policies, incorrect declaration of values, failure to advise insurers of any change of risk interest or property insured or failure to comply with a statutory requirement, nor by any other misrepresentation, act or omission by Developer or Design-Builder that would otherwise result in forfeiture or reduction of coverage.
  - k) Unless otherwise agreed to in writing by the Port Authority in its discretion, no defense costs shall be included within or erode the limits of coverage of any of the primary insurance policies, except that litigation and mediation defense costs may be included within the limits of coverage of professional liability, cyber liability, contractors pollution legal liability and pollution legal liability policies, to the extent such insurance coverage is required hereunder.
2. **Waiver Of Subrogation/Rights of Recovery:** The enrolled parties and their respective insurers will waive all rights of recovery against the Developer, Design-Builder, the Developer's agents, officials, and employees and against each other.
  3. **Primary and Non-Contributing:** Except for Workers' Compensation and Employers' Liability insurance, provide insurance coverage for work away from the Project Site required of the enrolled parties is primary and non-contributing.
  4. **Products and Completed Operations Coverage:** Shall be maintained for a minimum of six (6) years beyond the completion of all DB D&C Work for the Project, or such longer period as specified in this Exhibit 27, the Agreement, or the Lease.
  5. **Certificates of Insurance:** The enrolled parties and excluded parties will provide Certificates of Insurance to the Developer and/or the CIP administrator evidencing that policies specified in this Section

B, providing the required coverage, conditions and limits are in full force and effect. Certificates and endorsements are to be delivered prior to commencing any DB D&C Work or Services hereunder, and annually thereafter, and at least ten (10) days prior to any expiration of each insurance policy. In the event of cancellation, threatened cancellation, or material adverse change in coverage, the Developer and/or the CIP administrator shall be given at least thirty (30) days advance written notice thereof by registered mail, return receipt requested.

### 6.1.6 Required Limits and Coverages

Type of Insurance	Details of Coverage	Sum Insured/Deductible
Workers' Compensation and Employers' Liability	The Design-Builder will maintain Statutory Workers' Compensation insurance to cover obligations imposed by Federal and State statutes having jurisdiction over enrolled parties' employees while engaged in the performance of the work at locations other than the Project Site and approved sites incidental and/or adjacent to the work.	<p><b>Workers' Compensation coverage</b> will comply with the statutory limits of the State of New York</p> <p><b>Employers' Liability</b> insurance with limits as follows:</p> <ul style="list-style-type: none"> <li>(i) \$1,000,000 – Bodily Injury by accident for each person</li> <li>(ii) \$1,000,000 – Bodily Injury by disease for each person</li> <li>(iii) \$1,000,000 – Bodily Injury by Disease – Policy Limit</li> </ul>
Commercial General Liability	Insurance for premises and operations away from the Project Site and approved sites incidental and/or adjacent to the DB D&C Work of the enrolled parties (including products and completed operations covering products manufactured, assembled or otherwise worked upon away from the Project Site) providing coverage as broad as Commercial General Liability insurance ISO form CG 00 01. Such insurance shall provide coverage for all operations including the products-	<p>\$1,000,000 – Each Occurrence</p> <p>\$2,000,000 – Aggregate for products and completed operations</p> <p>\$2,000,000 – General aggregate limit, which shall apply separately and be reinstated annually</p>

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	<p>completed operations hazard, and shall be maintained for six (6) years beyond the completion of all DB D&amp;C Work for the Project, or such longer period as specified in this Exhibit 27, the Agreement, or the Lease.</p> <p>The policy shall not contain any exclusions directed toward any types of projects, materials or processes involved in the DB D&amp;C Work. Coverage shall conform to the following additional requirements:</p> <ul style="list-style-type: none"><li>• Contractual Liability for an “insured contract” as defined by the policy;</li><li>• Coverage for explosion, collapse and underground hazards, if such exposure exists;</li><li>• No pollution exclusion broader than form CG 21 55;</li><li>• No professional liability exclusion broader than form CG 22 79;</li><li>• No exclusion for claims related to NY Labor Law;</li><li>• The general aggregate limit shall be dedicated to the Project;</li><li>• Must not exclude losses arising out of DB D&amp;C Work occurring offsite ; and</li><li>• No exclusions related to “Action Over” claims</li></ul> <p>General Aggregate limits shall apply on a “per project” basis.</p> <p>Coverage shall include, but is not limited to, bodily injury, broad form property damage, personal injury, advertising injury, premises/operations, products/completed operations (minimum of 6 years), contractual liability</p>	

Type of Insurance	Details of Coverage	Sum Insured/Deductible
	<p>for “insured contract” as defined by the policy, blanket explosion, collapse and underground property damage, incidental malpractice, host liquor liability and independent contractors.</p> <p>In any Pollution exclusion, building heating equipment and hostile fire shall not be excluded.</p> <p>Earth Movement, Mold and Cross Suits shall not be excluded. If Coverage includes a Mold exclusion, subcontractors can provide Contractors Pollution Liability coverage with no Mold exclusion.</p> <p>With respect to Coverage for Damage to Your Work, “property damage” to that particular part of “your work,” that is defective or malfunctions, arising out of “your work” or any part of it shall be covered.</p> <p>Coverage shall include Contractual Liability for liability assumed under this Agreement and all other contracts, including, but not limited to, Subcontracts with Subcontractors of every tier, relative to this Project, to the extent such contracts are “insured contract” as defined by the policy or if the insured would have such liability in the absence of the contracts.</p> <p>Subcontractors may be able to provide such limits using a combination of GL and Excess policies.</p>	
<p>Commercial Liability          Automobile</p>	<p>Covering all owned, hired and non-owned vehicles including coverage during loading and unloading activities. 	<p>Builder and each of its Subcontractors and subconsultants) and direct losses (e.g., claims made by the Port Authority and its directors, commissioners, officers, employees, agents, their affiliates, successors and/or assigns against Design-Builder and each of its Subcontractors and subconsultants for financial loss due to wrongful acts or failures of the Design-Builder and each of its Subcontractors and subconsultants).</p> <p>Such insurance policy shall be maintained by the Design-Builder for the duration of the Term and for a period of six (6) years thereafter.</p>	

### 6.1.7 Additional Insureds

Each policy required (except Workers' Compensation, Employers' Liability, and Professional Liability) will name as additional insureds the parties and entities as set forth in Exhibit 29 of this Agreement, as may be adjusted or amended by Developer from time to time.

For commercial general liability, CG 20 10 11/85 (or substantial equivalent), and CG 20 37 10 01 (or substantial equivalent) should be utilized. Products and completed operations coverage shall be maintained for a minimum of six (6) years beyond the completion of all DB D&C Work for the Project, or such longer period as specified in this Exhibit 27, the Agreement, or the Lease. For a complete list of additional insureds, please see Exhibit 29.

Endorsements adding additional insureds to required policies shall contain no limitations, conditions, restrictions or exceptions to coverage beyond those that apply under the policy generally, and shall state that the interests and protections of each additional insured shall not be affected by any misrepresentation, act or omission of a named insured or any breach by a named insured of any provision in the policy which would otherwise result in forfeiture or reduction of coverage.

### 6.1.8 Restrictions on Insurance

Except as otherwise approved by Developer, self-funded, self-insurance, self-insured retention, policy fronting, or other non-risk transfer insurance mechanisms by the Design-Builder or its Subcontractors (or sub-Subcontractors, as applicable) other than self-funded collateral as required by the OCIP, are not permitted (except for such commercial standard deductibles that are self-funded, including retention under professional liability insurance and pollution liability insurance).

### 6.1.9 Certain Endorsements

**Governmental Immunity.** All policies required under this Agreement shall contain an endorsement containing the following language: "The insurance carrier shall not, without obtaining express written advance permission

from the General Counsel of the Port Authority, raise any defense involving in any way the jurisdiction of the tribunal over the person of the Port Authority, the immunity of the Port Authority, its Commissioners, officers, agents or employees, the governmental nature of the Port Authority or the provisions of any statutes respecting “suits” against the Port Authority.”

**No Limitations.** Endorsements adding additional insureds to required policies shall contain no limitations, conditions, restrictions or exceptions to coverage beyond those that apply under the policy generally, and shall state that the interests and protections of each additional insured shall not be affected by any misrepresentation, act or omission of a named insured or any breach by a named insured of any provision in the policy which would otherwise result in forfeiture or reduction of coverage.

#### 6.1.10 Review by the Developer

All insurance coverages and policies required under this Exhibit may be reviewed by the Developer for adequacy of terms, conditions, coverages and limits of coverage at any time during the term of this Agreement.

The Developer may, at any time during the term of this Agreement for any reason, upon written notice to the Design-Builder, require an increase in minimum limits, changes in deductibles, or other additions, deletions, amendments or modifications to the required coverage with respect to any insurance or any related term thereof (either in form or substance), or other or additional or replacement insurance, in any amounts or against any insurable risks, perils or hazards, or the replacement of carriers issuing such policies should any such carriers fall below the “Minimum Insurance Carrier Rating”.

#### 6.1.11 Notices

The Design-Builder shall provide the Developer with the following written notices:

As soon as practicable, but in no event later than five (5) days after the occurrence of any claim made by the Developer or any other party under any insurance obtained in connection with the Project or otherwise in connection with this Agreement, the Project, or the Premises, which claim involves any of the following:

- i. any incident involving the general public, a Subcontractor, Design-Builder, the Port Authority, any employees, or any separate developments at the Airport;
- ii. any fatality;
- iii. any incident that involves an amputation or potential loss of use of a limb or body part;
- iv. incidents that might result in the loss of bodily functions, senses, or abilities;
- v. head injuries resulting in unconsciousness;
- vi. falls from any height;
- vii. major property damage, including collapse, explosion, or fire;
- viii. any disruption, causing interruption to the operations of the Premises;
- ix. any impairment to any security/fire protection systems at the Premises;
- x. any incident resulting in injury to two (2) or more persons;
- xi. any incident where an ambulance is called;
- xii. incidents involving damage to Aircraft; and
- xiii. the expiration of any insurance policy (whether by its terms or due to non-payment of premium or otherwise) at least thirty (30) days prior to such expiration (ten (10) days for nonpayment), including

notification of the date of such expiration.

Without limiting the generality of this Section, the Design-Builder shall promptly notify the Developer of any incident(s) that could give rise to a claim against the Developer and/or the Port Authority.

#### **6.1.12 Compliance with Insurance Policies.**

The Design-Builder shall:

- i. comply with the terms, conditions and requirements of all insurance policies required pursuant to this Exhibit 27, this Agreement and the Lease;
- ii. not do or omit to do anything, or permit (insofar as it is within its power) any other person to do or omit to do anything, on or with respect to the Premises or the Project or with respect to the DB D&C Work that results in or could reasonably be expected to result in the cancellation of any insurance policies or that would entitle any insurer to refuse to pay any claim under any insurance policy (in whole or in part) or that would otherwise prejudice the interests of the Developer, the Port Authority, any Port Authority Indemnified Party or any of the City Insureds in an insurance policy or claim under any insurance policy;
- iii. promptly upon request furnish to the Developer such information and data as may be necessary to enable the Developer to adjust any loss, in the event the Premises or any part thereof or the Airport or any part thereof shall be damaged by any casualty against which insurance is carried pursuant to this Exhibit 27 and the Developer and the Port Authority is entitled to participate in the adjustment of such loss pursuant to the terms of this Agreement; and
- iv. to the extent the Developer pays (including if the Developer reimburses the Port Authority or City for) any premiums, costs, charges or fees with respect to any of the insurance policies required pursuant to this Exhibit 27, promptly (but in any event no later than thirty (30) days following notice by the Port Authority of such payment) reimburse Developer for any such premiums, costs, charges or fees.

#### **6.1.13 Developer's Right to Insure**

If the Design-Builder fails to obtain and maintain or cause to be obtained and maintained the insurance required by this Exhibit 27, the Developer shall have the right (without any obligation to do so), upon ten (10) Business Days' notice to the Design-Builder and any Recognized Mortgagee in a non-Emergency or forthwith in an Emergency and without assuming any obligation in connection therewith, to effect such insurance and one hundred fifteen percent (115%) of all costs and expenses of the Developer in connection therewith shall be payable by the Design-Builder to the Developer, on demand without any days of grace and without prejudice to any other rights and remedies of the Developer hereunder or under law or in equity. Such insurance taken out by the Developer shall not relieve the Design-Builder of its obligations to insure hereunder and the Developer shall not be liable for any loss or damage suffered by the Design-Builder in connection therewith.

## 7.0 REQUIRED INSURANCE – MANAGEMENT SERVICES AGREEMENT

### 7.1 Insurance Procured by the Manager

During the Term, the Manager will maintain, or cause to be maintained, at its own cost and expense (and without reimbursement by the Lessee), all insurance that it is obligated to maintain under Applicable Law and pursuant to the Section 12 (Insurance) of the Lease, including Sections 12(a)(4)(ix) (Cyber Liability, Network Security and Data Breach Insurance, including Technology Errors and Omissions) and 12(a)(4)(xi) (Workers' Compensation Insurance and Employer's Liability Insurance) of the Lease, and commercial crime insurance protecting against employee dishonesty, embezzlement, theft, and the like in amounts and otherwise in a form acceptable to the Port Authority, and naming the Port Authority and the Lessee as additional loss payees thereunder.

The Manager will cause the Lessee, the Lead Contractor, the Port Authority Indemnified Parties and the City Insureds to be named as additional insureds and loss payees on all liability policies the Manager is required to maintain pursuant to the Lease (except for any professional liability insurance (errors and omissions), employer's liability insurance and workers' compensation insurance, if any), and the Manager will provide certificates of insurance to the Lessee promptly upon request.

All insurance coverage required to be provided by the Manager under the Lease, other than any business automobile liability or workers' compensation insurance, shall be purchased specifically and exclusively for the Project Work and the Premises and extend throughout the Term, in accordance with Section 12(c)(1) (Dedicated Insurance) of the Lease and shall otherwise conform with all requirements set out in Section 12(d) (Other Requirements as to Insurance Policies) of the Lease.

The Lessee will cooperate with the Manager in the submission of any insurance claim arising out of the Manager's provision of the Services, provided that such claim is not contrary to the interests of the Lessee.

### 7.2 Lessee Insurance

The Manager will assist the Lessee in securing and maintaining (at the sole cost of the Lessee) all insurance policies and insurance coverage required to be secured and maintained by the Lessee under the Project Documents, the Key Contracts, the Financing Documents and Applicable Law (collectively, "Lessee's Required Insurance").

As part of the Services, the Manager will work directly with insurance brokers and/or insurance companies on the Lessee's behalf to obtain the Lessee's Required Insurance at commercially reasonable rates and in the time periods required under the applicable documents.

The Manager will make recommendations to the Lessee Board regarding the purchase and/or renewal and replacement of the Lessee's Required Insurance and will generally keep the Lessee Board informed of the status of the Lessee's Required Insurance.

The Lessee will cause the Manager be named as an additional insured and subrogation to be waived in favour of the Manager on all insurance policies that are Lessee's Required Insurance, and the Lessee will provide proof

of such insurance along with copies of each such applicable policy (or any renewals or replacements thereof) to the Manager promptly upon delivery by the insurers.

## 8.0 REQUIRED INSURANCE – COLLATERAL AGENCY AND ACCOUNTS AGREEMENT

INTECH has reviewed the Collateral Agency and Accounts Agreement, among JFK Millennium Partners, LLC, the Bank of New York Mellon, the Bank of New York Mellon, the Bank of New York Mellon, ING Capital LLC, the Bank of New York Mellon, and New York Transportation Development Corporation, dated November 1, 2022, including First Amendment, dated [•], 2024.

Section 10.3 of the agreement states:

At all times throughout the term of this Agreement, including without limitation during any period of reconstruction of the New Terminal Facilities, the Borrower shall maintain all insurance coverages required under the Lease Agreement, as such requirements may be waived or modified in accordance with the Lease Agreement. Without limiting the foregoing (i) the Borrower shall provide to the Collateral Agents the same notice and evidence of renewal as it provides to the Port Authority and (ii) such insurance policies shall, as applicable, afford to the Collateral Agents the same contractual liability coverage, notice of cancellation rights, waivers of subrogation and non-impairment of coverage rights as they afford to the Port Authority.

Within thirty (30) days following the end of each Fiscal Year, the Borrower shall submit to the Collateral Agents a certificate (i) listing all insurance being carried by, or on behalf of, the Borrower and the expiration date of each insurance policy, (ii) certifying that all insurance required to be maintained pursuant to the Project Documents and the Financing Documents is in full force and effect and that all premiums theretofore due have been fully paid or provided for and (iii) summarizing each event of loss with respect to the Project in such Fiscal Year for which loss proceeds exceed \$5,000,000 (per individual loss) in such Fiscal Year.

The Borrower shall provide to the Collateral Agents certificates stating that its insurance coverage and such insurance policies name the Secured Debt Representatives and the Issuer as additional insureds and loss payees as their interests appear.

In no event will the Collateral Agents have any obligation to determine the sufficiency of any such insurance information or to, in any manner, independently evaluate the Borrower's compliance with any insurance covenants in connection therewith.

## 9.0 REVIEW OF THE LTA REPORT

INTECH has reviewed the Draft Report issued by BTY Group dated September 27, 2024. We confirm there is nothing contained in the report which will not be sufficiently covered by the insurance program or will negatively impact the Lessee's ability to place and maintain insurance.

## 10.0 REQUIRED INSURANCE – BUILDING BOND LOAN AGREEMENT

INTECH has reviewed Building Bond Loan Agreement, between New York Transportation Development Corporation and JFK Millennium Partners, LLC, dated [•], 2022, including First Amendment, dated [•], 2024. There are no insurance provisions contained within the Building Bond Loan Agreement.

## 11.0 REQUIRED INSURANCE – PROJECT BOND LOAN AGREEMENT

INTECH has reviewed Project Bond Loan Agreement, between New York Transportation Development Corporation and JFK Millennium Partners, LLC, dated [•], 2022, including First Amendment, dated [•], 2024. There are no insurance provisions contained within the Project Bond Loan Agreement.

## 12.0 REQUIRED INSURANCE – COMMON TERMS AGREEMENT

The effectiveness of this Agreement and the obligation of each Bank Finance Party to make any Credit Extension under any Senior Bank Financing Document are subject to the receipt by the Administrative Agent of each of the following documents and the satisfaction of each other condition precedent in this Section 4.01, in each case in form and substance satisfactory to each Bank Finance Party, or the waiver of such receipt or satisfaction, as applicable, by each Bank Finance Party.

- (i) The Administrative Agent shall have received customary certificates of insurance evidencing the existence of all insurance required under Section 5.02 as of such date, including evidence that the Senior Collateral Agent is included as additional insured as its interests may appear under each such insurance and the Senior Collateral Agent is a loss payee under each such insurance related to property damage, and including such additional endorsement and terms identified in Section 27 of the Project Report prepared by the Insurance Consultant, other than the endorsements listed in Schedule 4.01(l)(i).
- (ii) The Lessee shall have delivered to the Administrative Agent a certificate of the Insurance Consultant, dated as of the Closing Date, certifying the existence of all insurance coverage and other terms required pursuant to Section 5.02 as of such date, that such insurance is in full force and effect and that all premiums then due and payable have been paid.
- (iii) The Lessee shall have delivered to the Administrative Agent a letter of confirmation and undertaking from the Lessee's insurance broker identifying the underwriters, types of insurance, applicable insurance limits and policy terms consistent with the Project Report prepared by the Insurance Consultant and delivered pursuant to Section 4.01(g)(iv) above, and the requirements of Section 5.02 as of such date.

- (iv) The Lessee shall have delivered to the Administrative Agent a “life of loan” Federal Emergency Management Agency Standard Flood Hazard Determination with respect to the real property subject to the Leasehold Mortgage.

Under Schedule 5.02, except to the extent expressly waived by the Required Bank Finance Parties in accordance with the terms hereof, the Lessee will maintain, with an Approved Insurer, insurance with respect to its properties and businesses against such casualties and contingencies, of such types, on such terms and in such amounts (including deductibles, co-insurance and self-insurance, if adequate reserves are maintained with respect thereto) required to be maintained under the Lease Agreement (as such requirements are in effect on the Closing Date without giving effect to any waiver or consent by the Port Authority, or if requiring higher or additional coverage, lower deductibles, less exceptions or terms that are otherwise more stringent, as modified by the Port Authority in accordance with the Lease Agreement), and except as set forth in Schedule 4.01(1)(i), naming the Senior Collateral Agent as an additional insured as its interests may appear under each such insurance and the Senior Collateral Agent as loss payee under each such insurance related to property damage, including such additional endorsement and terms identified in Section 27 of the Project Report prepared by the Insurance Consultant, and otherwise satisfying the requirements set forth in Section 10.03 of the Collateral Agency and Accounts Agreement. Without limiting the foregoing, (i) the Lessee shall provide the same notice and evidence of renewal to the Senior Collateral Agent as it is required to provide to the Port Authority and (ii) such insurance policies shall, as applicable, afford to the Senior Collateral Agent the same contractual liability coverage, notice of cancellation rights, waivers of subrogation and non-impairment of coverage rights to the Senior Collateral Agent as they are required to afford to the Port Authority.

For so long as each of the corresponding waivers or modifications granted pursuant to the Letter Agreement dated November 17, 2022, between the Port Authority and the Lessee, relating to the amendment of certain requirement set forth in the Lease Agreement with respect to D&C Work Period insurance remain in effect (capitalized terms used below have the meaning assigned thereto in the Lease Agreement):

1. Crime policy need not cover cybercrime, but only to the extent that cybercrime is covered under the cyber policy and the crime policy provides coverage for computer and transfer fund fraud and fraudulent impersonation (a/k/a social engineering).
2. The liability limit and replacement cost limit for NBCR coverage shall be \$100,000,000.
3. The requirement that the general aggregate limit be reinstated annually on the professional liability policies need not be satisfied, provided that the aggregate limit in place for the term of the D&C Work Period is at least \$75,000,000.
4. Professional liability policies need not utilize deductibles, provided that instead the Lessee may self-insure retention of not more than \$500,000.

## 13.0 REQUIRED INSURANCE – CREDIT AGREEMENT

There are no insurance provisions contained within the Credit Agreement.

## 14.0 REQUIRED INSURANCE – INTERCREDITOR AGREEMENT

INTECH has reviewed Intercreditor Agreement, by and among JFK Millennium Partners, LLC, the Bank of New York Mellon, ING Capital LLC, the Bank of New York Mellon, ING Capital LLC, The Bank of New York Mellon and ING Capital Markets LLC, JP Morgens Chase Bank, N.A, KeyBank National Association, Mizuho Capital markets LLC, MUFG Bank, LTD., Royal Bank of Canada, SMBC Capital Markets Inc., and the Bank of Nova Scotia, dated [●] 2024, including First Amendment, dated October [●], 2024.

Under Section 5.2, until the Discharge of Senior Obligations has occurred, subject to the terms of, and the rights of the Obligors under, the Senior Financing Documents and the rights of the Port Authority under the Lease Agreement, the Senior Collateral Agent on behalf of the Senior Secured Parties, subject to the last sentence of this Section 5.2, will have the right to

- (a) be named as an additional insured (other than for worker's compensation and employer's liability) and (in the case of policies covering real or personal property or business interruption) lender's loss payee under any insurance policies maintained from time to time by the Lessee,
- (b) to the extent provided in the Senior Financing Documents, (A) adjust or settle any insurance policy or claim covering the Collateral in the event of any loss thereunder and (B) approve any award granted in any condemnation or similar proceedings (including any deed in lieu thereof) affecting the Collateral and received by the Lessee in accordance with the Lease Agreement.

Following the Discharge of Senior Obligations and until the Discharge of Subordinate Obligations has occurred, the Subordinate Collateral Agent on behalf of the Subordinate Secured Parties will be named as an additional insured (other than for worker's compensation and employer's liability) and shall otherwise have the rights granted to the Senior Collateral Agent as described in the preceding sentence. Until the Discharge of Senior Obligations has occurred, if any Subordinate Secured Party shall, at any time, receive any proceeds of any such insurance policy or any such award or payment in contravention of this Agreement, it shall segregate and hold in trust and forthwith pay such proceeds over to the Senior Collateral Agent in accordance with Section 4.3.

Notwithstanding the foregoing, the Port Authority Indemnified Parties (as defined in the Lease Agreement) and the City Insureds (as defined in the Lease Agreement) will have the sole exclusive right to be named as (a) additional insureds and loss payee as their respective interests may appear in the Lease Agreement in all property damage insurance policies required under the Lease Agreement and (b) additional insured in all liability insurance policies required under the Lease Agreement (other than professional liability, employer's liability and workers' compensation).

## 15.0 REQUIRED INSURANCE – INSURANCE WAIVER LETTER

As per the insurance waiver letter dated November 17, 2022:

In connection with the Lease, the Port Authority and the Lessee hereby agree as follows:

1. Certain requirements set forth in the Lease with respect to D&C Work Period insurance shall be amended as follows:
  - a. Waive the requirement for the crime policy to cover Cybercrime. Cybercrime will be covered under the Cyber policy. This coverage is not available in the market under Crime policies, however the Cyber policy will provide coverage for Cybercrime and the Crime policy will provide coverage for Computer and Transfer Fund Fraud and Fraudulent Impersonation (a/k/a Social Engineering).
  - b. Amend the \$300,000,000 liability limit and replacement cost limit for NBCR coverage to be \$100,000,000. The largest limit currently available in the market for liability and property damage at this site is currently \$100,000,000, which will be in place.
  - c. Waive the requirement for the general aggregate limit to reinstate annually on the Professional Liability policies. The \$75,000,000 aggregate limit will be in place for the term of the D&C Work Period. Dedicated Professional Liability insurance that provides annually reinstating aggregate limits is not currently available for project coverage.
  - d. Waive the requirement for the Professional Liability policies to utilize deductibles and instead allow for self-insured retentions of \$500,000 as that is all that is available in the insurance market for this line of coverage.

### 16.1.3 Worker’s Compensation and Employer’s Liability

Insurance Carrier(s):	Starr Indemnity and Liability Company	
Rating(s):	<i>S&amp;P</i>	<i>A.M. Best</i>
	A+	A XV
Policy Term:	October 18, 2022 – February 23, 2028	
Policy Number:	900 0186000	
Named Insured:	<ul style="list-style-type: none"> <li>JFK Millennium Partners, LLC, C/O Vantage Airport Group</li> <li>Coverage afforded by this policy is automatically extended to contractors who are issued a Workers Compensation policy under this Controlled Insurance Program. All other contractors not issued a Workers Compensation policy under this Program must be endorsed onto the General Liability policy to be afforded coverage under this Program;</li> <li>Unless otherwise endorsed on this policy and subject to the above, no coverage will be provided to: Vendors; suppliers; truck carriers or haulers; material dealers; delivery persons; structural demolition operations; blasting operations; any security patrol or guard services; hazardous waste removal; abatement contractors; surveyors; any and all professional trades; manufacturers; fabricators,; any other organization performing activities outside of the “designated project(s)” that do not have on-site dedicated payroll associated with installation activities.</li> <li>All contractors, of any tier, for whom the First Named Insured has agreed, prior to the loss, in a written contract, to provide general liability coverage for the “designated project(s)” to which this insurance applies and the contractor performs construction activities at the “designated project(s),” pursuant to the written contract.</li> </ul>	
Additional Insured	N/A for Worker’s Compensation	
Perils Insured:	Worker’s Compensation and Employer’s Liability	
Sum Insured:	<p><u>Workers’ Compensation:</u> States Covered</p> <p><u>Employer’s Liability:</u>            \$1,000,000 – Bodily Injury by Accident – Each Accident            \$1,000,000 – Bodily Injury by Disease – Policy Limit            \$1,000,000 – Bodily Injury by Disease – Each Employee</p> <p><u>Other States Insurance:</u>            All states except North Dakota, Ohio, Washington, Wyoming, Puerto Rico and states designated in item 3.a of the policy.</p>	
Deductible:	\$2,000,000	

PROTECT. OPTIMIZE. EVOLVE.

Waiver of Subrogation:	In favor of: <ul style="list-style-type: none"> <li>• Bank of New York Mellon as Senior Collateral Agent</li> <li>• The Port Authority of New York and New Jersey</li> </ul>
Cancellation:	The insurers have refused to provide notice of cancellation to the Lenders. In our opinion this can be dealt with by confirming that the insurance premiums have been paid or are current which at the time of closing they are.  Furthermore, should there be a notice of cancellation provided the Borrower has the obligation under the Finance Documents to notify the Finance Parties.  Finally we note that this is not a main project policy, and therefore, feel that the risk is negligible to the Finance Parties.

INTECH hereby confirms that the insurance is in full force and effect and the Finance Parties have been appropriately protected as described above.
