

NEW ISSUE / BOOK-ENTRY ONLY

In the opinion of Bond Counsel, under existing law (i) assuming continuing compliance with certain covenants and the accuracy of certain representations, interest on the Series 2018A Bonds is excluded from gross income for federal income tax purposes, except interest on any Series 2018A Bond for any period during which that Series 2018A Bond is held by a "substantial user" of the facilities financed or a "related person," as those terms are used in Section 147(a) of the Internal Revenue Code of 1986, as amended (the "Code"), and interest on the Series 2018A Bonds is an item of tax preference under Section 57 of the Code and therefore may be subject to the alternative minimum tax imposed under the Code on individuals and, for taxable years beginning before January 1, 2018, corporations, and (ii) interest on the Series 2018A Bonds is exempt from income taxation by the Commonwealth of Virginia and is exempt from all taxation by the District of Columbia except estate, inheritance and gift taxes. See "TAX MATTERS" for a more detailed discussion.

METROPOLITAN WASHINGTON AIRPORTS AUTHORITY

\$558,430,000

Airport System Revenue and Refunding Bonds

Series 2018A

(AMT)

Dated: Date of Delivery

Due: October 1, in the years as shown herein

Interest on the Metropolitan Washington Airports Authority's (the "Airports Authority") Airport System Revenue and Refunding Bonds, Series 2018A, in the principal amount of \$558,430,000 (the "Series 2018A Bonds") will be payable on October 1, 2018, and semiannually thereafter on each April 1 and October 1. The Series 2018A Bonds are issuable only in fully registered form in denominations of \$5,000 or any integral multiple thereof. When issued, the Series 2018A Bonds will be registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York ("DTC"), to which payments of principal and interest will be made. Purchasers will acquire beneficial interests in the Series 2018A Bonds, in principal amounts shown on the inside cover page hereof, in book-entry form only. DTC will remit such payments to its participants who will be responsible for remittance to beneficial owners. See "THE SERIES 2018A BONDS – Book-Entry Only System."

Proceeds of the Series 2018A Bonds, along with other available funds, will be used to (i) pay a portion of the costs of certain capital projects at the Airports, and capitalized interest, (ii) refund a portion of the Airports Authority's outstanding Airport System Revenue Bonds, Series 2008A and Airport System Revenue Bonds, Series 2009C, (iii) fund a deposit to the Common Reserve Account in the Debt Service Reserve Fund to satisfy the debt service reserve requirement for the Series 2018A Bonds and any other Common Reserve Bonds, and (iv) pay costs of issuing the Series 2018A Bonds.

The Series 2018A Bonds will be issued under and secured by the Amended and Restated Master Indenture of Trust dated as of September 1, 2001, as amended (the "Master Indenture") and the Fiftieth Supplemental Indenture of Trust dated as of July 1, 2018 (the "Fiftieth Supplemental Indenture" and, together with the Master Indenture, the "Indenture"), each between the Airports Authority and Manufacturers and Traders Trust Company, as the trustee (the "Trustee"). Except to the extent payable from the proceeds of the Series 2018A Bonds and any other moneys available for such payment, the Series 2018A Bonds are payable from, and secured by a pledge of, Net Revenues of the Airports Authority, as described herein, which pledge is on a parity with the pledge of Net Revenues made to secure the Airports Authority's outstanding Bonds and other Bonds which may be issued in the future under the Indenture, as further supplemented. The Series 2018A Bonds will not be subject to acceleration upon an event of default or otherwise.

THE SERIES 2018A BONDS SHALL NOT CONSTITUTE A DEBT OF THE DISTRICT OF COLUMBIA OR OF THE COMMONWEALTH OF VIRGINIA OR OF ANY POLITICAL SUBDIVISION THEREOF, NOR A PLEDGE OF THE FAITH AND CREDIT OF THE DISTRICT OF COLUMBIA OR OF THE COMMONWEALTH OF VIRGINIA OR OF ANY POLITICAL SUBDIVISION THEREOF. THE ISSUANCE OF THE SERIES 2018A BONDS UNDER THE PROVISIONS OF THE DISTRICT ACT AND THE VIRGINIA ACT SHALL NOT DIRECTLY, INDIRECTLY, OR CONTINGENTLY OBLIGATE THE DISTRICT OF COLUMBIA OR THE COMMONWEALTH OF VIRGINIA OR ANY POLITICAL SUBDIVISION THEREOF TO ANY FORM OF TAXATION WHATSOEVER. THE AIRPORTS AUTHORITY HAS NO TAXING POWER.

The Series 2018A Bonds will mature on October 1 in the years and in the principal amounts, and will bear interest at the rates, as shown herein. The Series 2018A Bonds are subject to redemption prior to maturity, as more fully described herein.

The Series 2018A Bonds are offered when, as and if issued and received by the Underwriters. Legal matters with respect to the issuance of the Series 2018A Bonds are subject to the approval of Squire Patton Boggs (US) LLP, Bond Counsel to the Airports Authority. Certain legal matters will be passed upon for the Airports Authority by Philip G. Sunderland, Esquire, Senior Vice President and General Counsel to the Airports Authority, and by Squire Patton Boggs (US) LLP, as Disclosure Counsel. Certain legal matters will be passed upon for the Underwriters by their Counsel, Katten Muchin Rosenman LLP. It is expected that the Series 2018A Bonds will be available for delivery through the facilities of DTC in New York, New York, on or about July 3, 2018.

This Official Statement is provided in connection with the issuance of the Series 2018A Bonds referred to herein and may not be reproduced or be used, in whole or in part, for any other purpose. The information contained in this Official Statement has been derived from information provided by the Airports Authority and other sources which are believed to be reliable.

The Underwriters have provided the following sentence for inclusion in this Official Statement. The Underwriters have reviewed the information in this Official Statement in accordance with, and as part of, their respective responsibilities to investors under the federal securities law as applied to the facts and circumstances of this transaction, but the Underwriters do not guarantee the accuracy or completeness of such information.

No dealer, broker, salesman or other person has been authorized by the Airports Authority or the Underwriters to give any information or to make any representations other than those contained in this Official Statement, and, if given or made, such information or representations must not be relied upon as having been authorized by any of the foregoing. This Official Statement does not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of, the Series 2018A Bonds by any person in any jurisdiction in which it is unlawful for such person to make such offer, solicitation or sale. The information and expressions of opinion herein speak as of their date unless otherwise noted and are subject to change without notice. Neither the delivery of this Official Statement nor any sale made hereunder shall under any circumstances create any implication that there has been no change in the affairs of the Airports Authority since the date hereof.

Neither the United States Securities and Exchange Commission nor any state securities commission has approved or disapproved of the Series 2018A Bonds or passed upon the adequacy or accuracy of this Official Statement. Any representation to the contrary is a criminal offense.

The order and placement of information in this Official Statement, including the appendices, are not an indication of relevance, materiality or relative importance, and this Official Statement, including the appendices, must be read in its entirety. The captions and headings in this Official Statement are for convenience only and in no way define, limit or describe the scope or intent, or affect the meaning or construction, of any provision or section in this Official Statement.

IN CONNECTION WITH THIS OFFERING, THE UNDERWRITERS MAY OVER ALLOT OR EFFECT TRANSACTIONS WHICH STABILIZE OR MAINTAIN THE MARKET PRICE OF THE SERIES 2018A BONDS AT A LEVEL ABOVE THAT WHICH OTHERWISE MIGHT PREVAIL IN THE OPEN MARKET. SUCH STABILIZING, IF COMMENCED, MAY BE DISCONTINUED AT ANY TIME.

SUMMARY STATEMENT

This Summary Statement is qualified in its entirety by reference to the information appearing elsewhere in this Official Statement. Capitalized terms used in this Summary Statement and not defined herein or in the Official Statement shall have the meanings set forth in APPENDIX B – “Definitions and Summary of Certain Provisions of the Indenture.”

The Airports Authority

The Airports Authority is a public body politic and corporate, created with the consent of the Congress of the United States by the District of Columbia Regional Airports Authority Act of 1985, as amended, codified at D.C. Official Code §9-901 *et seq.* (2001) (the “District Act”), and Chapter 598 of the Acts of Virginia General Assembly of 1985, as amended, codified at Va. Code §5.1-152 *et seq.* (2001) (the “Virginia Act” and, together with the District Act, the “Acts”). Pursuant to an Agreement and Deed of Lease effective June 7, 1987, as amended (the “Federal Lease”), the Airports Authority assumed operating responsibility for Ronald Reagan Washington National Airport (“Reagan National Airport”) and Washington Dulles International Airport (“Dulles International Airport” and, together with Reagan National Airport, the “Airports”) upon the transfer of an initial 50-year leasehold interest in the Airports from the United States federal government to the Airports Authority in accordance with the Metropolitan Washington Airports Act of 1986 (Title VI, P.L. 99-500, as reenacted in P.L. 99-591, effective October 18, 1986, as amended, codified at 49 U.S.C. §49101 *et seq.*) (the “Federal Act”). The Federal Lease was amended in 2003 to extend its term to 2067. See “THE AIRPORTS AUTHORITY – Lease of the Airports to the Airports Authority.”

The Airports Authority operates two enterprises – the Aviation Enterprise, under which it operates and maintains the Airports, and the Dulles Corridor Enterprise, under which it operates and maintains the Dulles Toll Road and is constructing the Dulles Metrorail Project. See “THE AIRPORTS AUTHORITY – Operation of the Dulles Toll Road and Construction of the Dulles Metrorail Project.” The Airports Authority accounts for the two enterprises separately through the Aviation Enterprise Fund and the Dulles Corridor Enterprise Fund. Dulles Toll Road Revenues are treated as “Released Revenues” under the Indenture (as defined below) and therefore are not part of the Net Revenues that secure the Bonds (as defined below). In addition, Net Revenues of the Aviation Enterprise Fund do not secure Dulles Toll Road Revenue Bonds. The Series 2018A Bonds are being issued solely to finance and refinance capital projects at the Airports, and this Official Statement pertains to the Airports and the Airports Authority’s operation of the Aviation Enterprise.

The Airports

Reagan National Airport was opened for service in 1941. It is located on approximately 860 acres along the Potomac River in Arlington County, Virginia, approximately three miles from downtown Washington, D.C. In 2017, enplanements totaled approximately 11.9 million, nearly all on flights to domestic destinations, marking the seventh consecutive year of record enplanement growth at Reagan National Airport. For the 12-month period ending September 30, 2017, origin-destination (“O&D”) passengers accounted for an estimated 88.3% of enplanements at Reagan National Airport. The top two airlines at Reagan National Airport (American Airlines,

Inc., along with its code-sharing affiliate carriers, and Southwest Airlines) enplaned 64.2% of all commercial enplanements in 2017.

Dulles International Airport was opened for service in 1962. It is located on approximately 11,830 acres (exclusive of the Dulles International Airport Access Highway) in Fairfax and Loudoun Counties, Virginia, approximately 26 miles west of Washington, D.C. In 2017, enplanements totaled approximately 11.3 million, 34.0% on flights to international destinations, and marked the 14th consecutive year of growth in international travel at Dulles International Airport. For the 12-month period ending September 30, 2017, O&D passengers accounted for an estimated 68.9% of enplanements at Dulles International Airport. United Airlines, Inc., along with its code-sharing affiliate carriers, accounted for 75.7% of domestic enplanements and 39.0% of international enplanements at Dulles International Airport in 2017, while foreign-flag scheduled airlines accounted for virtually all of the remaining 61.0% of international enplanements.

See “THE AIRPORTS AUTHORITY – The Airports,” “THE AIRPORTS AUTHORITY’S FACILITIES AND MASTER PLANS – Facilities at Reagan National Airport and Dulles International Airport,” “THE AIRPORTS SERVICE REGION AND AIRPORTS ACTIVITY,” “FINANCIAL CONDITION OF CERTAIN AIRLINES SERVING THE AIRPORTS,” and “CERTAIN INVESTMENT CONSIDERATIONS – Airline Consolidations.”

The Airline Agreement

The Airports Authority and certain airlines entered into an Airport Use Agreement and Premises Lease (the “Airline Agreement”), which became effective on January 1, 2015, replacing the previously existing agreement. The airlines that have executed the Airline Agreement are the “Signatory Airlines.” For airlines operating at Reagan National Airport, the term of the Airline Agreement is 10 years, starting on January 1, 2015, and expiring on December 31, 2024. The Airports Authority and airlines operating at Dulles International Airport signed a First Universal Amendment to the Airline Agreement on July 27, 2016 (the “First Universal Amendment”), extending the term of the Airline Agreement from December 31, 2017 to December 31, 2024.

The Airline Agreement provides for the use and occupancy of facilities at the Airports and establishes the rentals, fees and charges, including landing fees and terminal rents, to be paid by the Signatory Airlines. The Airline Agreement also provides for the allocation of Net Remaining Revenue between the Airports Authority and the Signatory Airlines and for the Airports Authority to utilize its share of Net Remaining Revenue derived from Reagan National Airport at Dulles International Airport, up to certain specified maximum annual amounts.

The Airline Agreement approves the funding of capital construction programs (collectively, the “Capital Construction Programs” or the “CCP”) for Reagan National Airport and Dulles International Airport, as described below.

For a description of the Airline Agreement and the First Universal Amendment, see “CERTAIN AGREEMENTS FOR USE OF THE AIRPORTS” and APPENDIX B – “Summary of Certain Provisions of the Airport Use Agreement and Premises Lease.”

Capital Construction Programs

The Airports Authority's CCP is comprised of the 2001-2016 CCP, which is nearly complete, and the 2015-2024 CCP, which was approved as part of the current Airline Agreement. Under the CCP, the Airports Authority is constructing and will continue to construct many of the principal elements of the Reagan National Airport and Dulles International Airport Master Plans, as defined herein, which are necessary for the operation and development of the Airports, and has renovated and will renovate certain existing facilities. See "THE AIRPORTS AUTHORITY'S FACILITIES AND MASTER PLANS."

2001-2016 CCP

The projects included in the 2001-2016 CCP are collectively referred to as the "2001-2016 CCP." The 2001-2016 CCP was an approximately \$5.0 billion program. The only remaining project that is still under construction is the Dulles International Airport Metrorail station, which is expected to be finished and operational in 2020. See "CAPITAL CONSTRUCTION PROGRAMS (CCP) – The 2001-2016 CCP."

2015-2024 CCP

The most recent CCP for the period from 2015 to 2024 was approved by the Signatory Airlines as part of the Airline Agreement and the First Universal Amendment and is collectively referred to as the "2015-2024 CCP." The 2015-2024 CCP at Reagan National Airport includes a new regional airline concourse; moving security areas outside of the main National Hall; preliminary planning and design work on the redevelopment of Terminal A; a new parking garage; and various airfield, roadway, utility and other improvements. Portions of the 2015-2024 CCP at Reagan National Airport are referred to by the Airports Authority as "Project Journey." The 2015-2024 CCP at Dulles International Airport includes the renewal and replacement of the existing infrastructure of buildings, airfields, roadways and utilities. The 2015-2024 CCP currently is estimated to cost approximately \$1.9 billion (including allowances for inflation but excluding Deferred Projects, as defined below). See "CAPITAL CONSTRUCTION PROGRAMS (CCP) – The 2015-2024 CCP," "CAPITAL CONSTRUCTION PROGRAMS (CCP) – 2015-2024 CCP DEFERRED PROJECTS" and "PLAN OF FUNDING FOR THE CCP."

Funding of the Capital Construction Programs for the Airports

The Airports Authority has financed and plans to complete the financing of the CCP for the Airports with a combination of Bonds (as defined below), including the possible issuance of approximately \$32.7 million of additional bonds for the 2001-2016 CCP (\$7.4 million of which will be issued as part of the Series 2018A Bonds) and approximately \$1.3 billion of additional bonds for the 2015-2024 CCP (\$192.1 million of which will be issued as part of the Series 2018A Bonds), CP Notes, Passenger Facility Charges ("PFCs") revenues, federal and state grants and other available Airports Authority funds. See "PLAN OF FUNDING FOR THE CCP."

The Series 2018A Bonds

The Airports Authority expects to issue its Airport System Revenue and Refunding Bonds, Series 2018A, in the principal amount of \$558,430,000 (the “Series 2018A Bonds”). The Series 2018A Bonds will be issued under and secured by the Amended and Restated Master Indenture of Trust dated as of September 1, 2001, as previously supplemented and amended (the “Master Indenture”), and the Fiftieth Supplemental Indenture of Trust dated as of July 1, 2018 (the “Fiftieth Supplemental Indenture” and, together with the Master Indenture, the “Indenture”), each between the Airports Authority and Manufacturers and Traders Trust Company, as the trustee (the “Trustee”). The Series 2018A Bonds, the Airports Authority’s outstanding bonds previously issued under the Master Indenture, and any additional bonds and commercial paper to be issued under the Indenture, as may be further supplemented, are referred to collectively in this Official Statement as the “Bonds.” See “THE SERIES 2018A BONDS.” See also APPENDIX B – “Definitions and Summary of Certain Provisions of the Indenture” for the full definition of “Bonds.”

Use of the Series 2018A Bond Proceeds

Proceeds of the Series 2018A Bonds, along with other available funds, will be used to (i) pay a portion of the costs of certain capital projects at the Airports, and capitalized interest, (ii) refund a portion of the Airports Authority’s outstanding Airport System Revenue Bonds, Series 2008A (the “Series 2008A Refunded Bonds”) and Airport System Revenue Bonds, Series 2009C (the “Series 2009C Refunded Bonds”), (iii) fund a deposit to the Common Reserve Account in the Debt Service Reserve Fund to satisfy the debt service reserve requirement for the Series 2018A Bonds and any other Common Reserve Bonds, and (iv) pay costs of issuing the Series 2018A Bonds.

All of the Bonds to be refunded with the proceeds of the Series 2018A Bonds are collectively referred to as the “Refunded Bonds” and will be legally defeased upon issuance of the Series 2018A Bonds.

Security and Source of Payment

The Series 2018A Bonds are secured on a parity with other Bonds issued under the Indenture by a pledge of the Net Revenues derived by the Airports Authority from the operation of the Airports, all as described in the Indenture. The principal sources of Net Revenues are the rentals, fees and charges received from the Signatory Airlines under the Airline Agreement, fees received from non-signatory airlines using the Airports and payments under concession contracts at the Airports. Upon the issuance of the Series 2018A Bonds and the defeasance of the Refunded Bonds, approximately \$4.6 billion aggregate principal amount of Bonds will be outstanding. In addition, the Airports Authority at any time can draw up to \$200 million of the Airport System Revenue Commercial Paper Notes, Series Two (“CP Notes”), under the credit facility it currently has in place. See “AIRPORTS AUTHORITY INDEBTEDNESS FOR THE AVIATION ENTERPRISE FUND – Outstanding Bonds of the Airports Authority for the Aviation Enterprise Fund” and “– Commercial Paper Program for the Aviation Enterprise Fund.” For a description of the Airline Agreement and the First Universal Amendment, see “CERTAIN

AGREEMENTS FOR USE OF THE AIRPORTS – Airport Use Agreement and Premises Lease.”

The Bonds shall not constitute a debt of the District of Columbia or of the Commonwealth of Virginia or of any political subdivision thereof, nor a pledge of the faith and credit of the District of Columbia or of the Commonwealth of Virginia or of any political subdivision thereof. The issuance of the Series 2018A Bonds under the provisions of the District Act and the Virginia Act shall not directly, indirectly, or contingently obligate the District of Columbia or the Commonwealth of Virginia or any political subdivision thereof to any form of taxation whatsoever. The Airports Authority has no taxing power. See “SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – General,” and APPENDIX B – “Definitions and Summary of Certain Provisions of the Indenture” hereto.

Debt Service Reserve Fund

Under the Indenture, the Airports Authority has covenanted to deposit, or cause to be deposited at closing, amounts sufficient to maintain the Common Reserve Account (the “Common Reserve Account”) in the Debt Service Reserve Fund in an amount equal to the Common Debt Service Reserve Requirement for the Series 2018A Bonds and any other Common Reserve Bonds Outstanding (the “Common Debt Service Reserve Requirement”). “Common Reserve Bonds” means any other Series of Bonds issued under the Indenture and designated in writing to the Trustee by an Authority Representative as being secured by amounts on deposit in the Common Reserve Account on a parity with the Series 2018A Bonds, and any other Common Reserve Bonds. The Common Debt Service Reserve Requirement means an amount equal to the lesser of (i) 10% of the stated principal amount of the Series 2018A Bonds and any other Common Reserve Bonds; (ii) the Maximum Annual Debt Service on the Series 2018A Bonds and any other Common Reserve Bonds in any Fiscal Year; or (iii) 125% of the average Annual Debt Service for the Series 2018A Bonds and any other Common Reserve Bonds. On the closing date, a portion of the amount from the series-specific reserve account pertaining to the Series 2009C Refunded Bonds will be transferred to the Common Reserve Account and will be used to satisfy a portion of the Common Debt Service Reserve Requirement allocable to the Series 2018A Bonds. See “SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – Debt Service Reserve Fund.”

Rate Covenant

In the Indenture, the Airports Authority has covenanted that it will take all lawful measures to fix and adjust from time to time the fees and other charges for the use of the Airports, including services rendered by the Airports Authority, pursuant to the Airline Agreement or otherwise, calculated to be at least sufficient to produce Net Revenues to provide for the larger of either:

(a) The amounts needed for making the required deposits in each fiscal year to the Principal Accounts, the Interest Accounts, and the Redemption Accounts, the Debt Service Reserve Fund, the Subordinated Bond Funds, the Subordinated Reserve Funds, the Junior Lien Obligations Fund, the Federal Lease Fund and the Emergency Repair and Rehabilitation Fund; or

(b) An amount not less than 125% of the Annual Debt Service with respect to Bonds for such fiscal year.

See “SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – Rate Covenant.”

Grants from Commonwealth of Virginia

On May 20, 2016, the Governor of the Commonwealth of Virginia signed House Bill 30, which provides for the Commonwealth of Virginia to extend \$50 million in grants to the Airports Authority over a two-year period, beginning in calendar year 2017. In March 2017 the Airports Authority received the first \$25 million installment, and the second \$25 million installment was received in January 2018. These grant funds are to be used by the Airports Authority to reduce the cost per enplanement at Dulles International Airport by reducing debt service requirements and operating costs payable by airlines operating at Dulles International Airport. The execution of the First Universal Amendment ensures the retention of domestic hub service at Dulles International Airport through at least 2024, which is required for receipt of the funds. In addition, the Airports Authority has entered into an agreement with the Virginia Department of Transportation that presents a plan for long-term cost reductions at Dulles International Airport, also required to receive the funds. See “CERTAIN AGREEMENTS FOR USE OF THE AIRPORTS – Grants from Commonwealth of Virginia.”

Redemption of the Series 2018A Bonds

The Series 2018A Bonds are subject to redemption prior to maturity as described under “THE SERIES 2018A BONDS – Redemption of the Series 2018A Bonds.”

Certain Investment Considerations

The Series 2018A Bonds may not be suitable for all investors. Prospective purchasers of the Series 2018A Bonds should read this entire Official Statement and give careful consideration to certain factors affecting the air transportation industry and the Airports, including national and global economic conditions, geopolitical risks, financial condition of airlines serving the Airports, cost of aviation fuel, air transportation security concerns, regulations and restrictions affecting the Airports, cost and schedule of the CCP, provisions of the Airline Agreement, limitations on Bondholders’ remedies, competition and other key factors impacting the Airports. See “FINANCIAL CONDITION OF CERTAIN AIRLINES SERVING THE AIRPORTS” and “CERTAIN INVESTMENT CONSIDERATIONS.”

Report of the Airport Consultant

The Airports Authority retained LeighFisher to serve as the Airport Consultant in connection with the issuance of the Series 2018A Bonds. The Airport Consultant, together with its subconsultant, DKMG Consulting LLC, prepared the Report of the Airport Consultant dated May 16, 2018 (the “Report of the Airport Consultant”). The Report of the Airport Consultant has not been updated to reflect the final pricing terms of the Series 2018A Bonds or other changes that may have occurred since May 16, 2018. The Airport Consultant has provided its consent to include the Report of the Airport Consultant as APPENDIX A hereto. See “REPORT OF THE AIRPORT CONSULTANT” and APPENDIX A – “Report of the Airport Consultant.”

Debt Service Coverage Forecast

The following table sets forth forecasts of the Airports Authority's Net Revenues and debt service coverage for the period from 2018 through 2023. The minimum debt service coverage required by the rate covenant set forth in the Indenture is 1.25x. Debt service coverage is calculated as the ratio of Net Revenues available annually to pay debt service to the Annual Debt Service requirement for the Bonds. See "SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – Rate Covenant." The forecasts are based on assumptions regarding debt service on: the Series 2018A Bonds; other Bonds to be outstanding following the issuance of the Series 2018A Bonds; and Additional Bonds that the Airports Authority plans to issue to complete the funding of the 2001-2016 CCP and the 2015-2024 CCP. The Net Revenues of the Airports Authority are forecast to exceed the rate covenant requirement in each year of the forecast period. For information regarding the Airports Authority's actual Annual Debt Service requirements on outstanding debt, see "DEBT SERVICE SCHEDULE." See also "SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – Application of Designated Passenger Facility Charges" and "PLAN OF FUNDING FOR THE CCP – Funding Source: PFCs."

Forecast Debt Service Coverage (\$000's)

Year	Net Revenues	Series 2018A Bonds Debt Service*	Planned Additional Bonds Debt Service ¹	Outstanding Bonds Debt Service ²	CP Notes Debt Service	LESS:				Net Bonds Debt Service	Debt Service Coverage Ratio ⁷
						Irrevocable PFC ³	Intended PFCs				
							Currently Approved IAD ⁴	Currently Approved DCA ⁵	Pending Future Approval DCA ⁶		
2018	\$ 554,281	\$ 4,740	\$ -	\$ 380,404	\$ -	\$ -	\$ (43,600)	\$ (5,002)	\$ -	\$ 336,542	1.65x
2019	\$ 562,829	\$ 28,531	\$ 6,316	\$ 336,254	\$ -	\$ -	\$ (47,400)	\$ (5,847)	\$ (4,714)	\$ 313,140	1.80x
2020	\$ 579,120	\$ 46,900	\$ 37,445	\$ 335,911	\$ -	\$ -	\$ (46,400)	\$ (28,965)	\$ (4,710)	\$ 340,182	1.70x
2021	\$ 601,362	\$ 41,116	\$ 55,195	\$ 347,691	\$ -	\$ -	\$ (47,400)	\$ (28,962)	\$ (4,852)	\$ 362,788	1.66x

2023	\$ 619,730	\$ 52,575	\$ 70,050	\$ 328,220	\$ -	\$ -	\$ (49,300)	\$ (28,961)	\$ (5,628)	\$ 366,956	1.69x

* Series 2018A Bonds Debt Service has not been updated to reflect final pricing terms of the Series 2018A Bonds.

1 Additional Bonds that the Airports Authority plans to issue to complete the funding for the 2015-2024 CCP.

2 Excludes the Series 2008A Refunded Bonds and Series 2009C Refunded Bonds to be defeased by a portion of the Series 2018A Bonds.

3 Pursuant to the Thirty-fifth Supplemental Trust Indenture, the Airports Authority may irrevocably commit Designated Passenger Facility Charges (as such term is defined herein) in future years. The Airports Authority currently has not irrevocably committed Designated Passenger Facility Charges for future years during the forecast period but may do so in the future. See "SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – Application of Designated Passenger Facility Charges."

4 PFC revenues generated at Dulles International Airport approved under existing PFC applications that the Airports Authority intends to use to pay Bond debt service.

5 PFC revenues generated at Reagan National Airport approved under existing PFC applications that the Airports Authority intends to use to pay Bond debt service.

6 Bond debt service for future Additional Bonds that will need to be approved in a future PFC application for projects at Reagan National Airport.

7 The Report of the Airport Consultant assumes that PFC revenues will be used to pay a portion of the debt service on Outstanding Bonds as well as debt service on planned additional Bonds. Consequently, such portion of the debt service on those Bonds is excluded from the calculation of the Rate Covenant in the Report of the Airport Consultant.

Totals may not add due to rounding.

Source: Report of the Airport Consultant.

The forecasts set forth in the Report of the Airport Consultant are based on assumptions as discussed in APPENDIX A – “Report of the Airport Consultant.” The Report of the Airport Consultant should be read in its entirety for an understanding of the forecasts and the underlying assumptions. The Report of the Airport Consultant has been included herein in reliance upon the knowledge and experience of LeighFisher as the Airport Consultant and DKMG Consulting LLC, its subconsultant. As stated in the Report of the Airport Consultant, any forecast is subject to uncertainties and therefore there will be differences between the forecast and actual results, which differences may be material. See “INTRODUCTION – Prospective Financial Information,” “CERTAIN INVESTMENT CONSIDERATIONS,” “REPORT OF THE AIRPORT CONSULTANT” and APPENDIX A – “Report of the Airport Consultant” for a discussion of factors, data and information that may affect the forecasts.

Ratings

Fitch Ratings, Moody’s Investors Service, Inc. and S&P Global Ratings have assigned the Series 2018A Bonds the ratings of “AA-” (Stable Outlook), “Aa3” (Stable Outlook) and “AA-” (Stable Outlook), respectively.

OFFICIAL STATEMENT

relating to

METROPOLITAN WASHINGTON AIRPORTS AUTHORITY

\$558,430,000

Airport System Revenue and Refunding Bonds

Series 2018A

(AMT)

INTRODUCTION

This Official Statement is furnished in connection with the issuance of the Metropolitan Washington Airports Authority's (the "Airports Authority") Airport System Revenue and Refunding Bonds, Series 2018A, to be issued in the principal amount of \$558,430,000 (the "Series 2018A Bonds").

The Series 2018A Bonds

The Series 2018A Bonds will be issued under and secured by the Amended and Restated Master Indenture of Trust dated as of September 1, 2001, as previously supplemented and amended (the "Master Indenture"), and the Fiftieth Supplemental Indenture of Trust dated as of July 1, 2018 (the "Fiftieth Supplemental Indenture" and, together with the Master Indenture, the "Indenture"), each between the Airports Authority and Manufacturers and Traders Trust Company, as the trustee (the "Trustee"). The Series 2018A Bonds, the Airports Authority's outstanding bonds previously issued under the Master Indenture, and any additional bonds to be issued under the Indenture, as may be further supplemented, are referred to collectively in this Official Statement as the "Bonds."

Proceeds of the Series 2018A Bonds, along with other available funds, will be used to (i) pay a portion of the costs of certain capital projects at the Airports, and capitalized interest, (ii) refund a portion of the Airports Authority's outstanding Airport System Revenue Bonds, Series 2008A and Airport System Revenue Bonds, Series 2009C, (iii) fund a deposit to the Common Reserve Account in the Debt Service Reserve Fund to satisfy the debt service reserve requirement for the Series 2018A Bonds and any other Common Reserve Bonds, and (iv) pay costs of issuing the Series 2018A Bonds.

All of the Bonds to be refunded from the proceeds of the Series 2018A Bonds are collectively referred to as the "Refunded Bonds" and will be legally defeased upon issuance of the Series 2018A Bonds.

Prospective Financial Information

Airports Authority management believes that the prospective financial information from its 2018 Budget (see "AIRPORTS AUTHORITY FINANCIAL INFORMATION – Aviation Enterprise Fiscal Year 2018 Budget") and the Report of the Airport Consultant (see APPENDIX

A) have been prepared on a reasonable basis, reflecting best estimates and judgments, and represent, to the best of management's knowledge and opinion, the Airports Authority's expected course of action and future financial performance. However, any prospective financial information is subject to uncertainties. Inevitably, some assumptions underlying the prospective financial information will not be realized and unanticipated events and circumstances will occur. Therefore, there will be differences between the prospective financial information and actual results and those differences may be material.

Miscellaneous

This Official Statement consists of the cover page, the inside cover pages, the table of contents, the Summary Statement, the body of this Official Statement and the appendices, all of which should be read in their entirety. This Official Statement contains, among other things, descriptions of the Series 2018A Bonds, the Airports Authority, including certain financial information, the Airport Use Agreement and Premises Lease (the "Airline Agreement"), the Airport Service Region and the Airports' activity, certain factors affecting the air transportation industry, the financial condition of certain airlines serving the Airports, the Airports Authority's capital construction programs (collectively, the "Capital Construction Programs" or "CCP") for Ronald Reagan Washington National Airport ("Reagan National Airport") and Washington Dulles International Airport ("Dulles International Airport" and, together with Reagan National Airport, the "Airports"), the plan of funding for the CCP and certain investment considerations. Such descriptions do not purport to be comprehensive or definitive.

Unless otherwise defined herein, all terms used in this Official Statement shall have the meanings set forth in APPENDIX B – "Definitions and Summary of Certain Provisions of the Indenture."

All references in this Official Statement to documents are qualified in their entirety by reference to such actual documents, and references to the Series 2018A Bonds are qualified in their entirety by reference to the forms of the Series 2018A Bonds included in the Fiftieth Supplemental Indenture.

The audited financial statements of the Airports Authority for the year ended December 31, 2017, which include financial statements and management's discussion and analysis thereof and footnotes thereto, are contained in the Airports Authority's Comprehensive Annual Financial Report of 2017 ("2017 CAFR"), which was filed with the Municipal Securities Rulemaking Board under its Electronic Municipal Market Access System ("EMMA") and can also be found at www.mwaa.com and www.dacbond.com and are hereby incorporated into this Official Statement by reference. The financial statements as of December 31, 2017 set forth in the 2017 CAFR have been audited by Cherry Bekaert LLP, independent auditor, as stated in their report appearing therein. Cherry Bekaert LLP has not been engaged to perform and has not performed, since the date of its report included therein, any procedures on the financial statements addressed in that report. Additionally, the Cherry Bekaert LLP report does not cover any other information in this Official Statement and should not be read to do so.

Definitions and a summary of certain provisions of the Indenture are included in APPENDIX B. A summary of certain provisions of the Airline Agreement between the Airports

Authority and the Signatory Airlines is included in APPENDIX C. A description of the book-entry system maintained by The Depository Trust Company, New York, New York (“DTC”) is included in APPENDIX D. The proposed form of the opinion to be delivered to the Airports Authority by Bond Counsel, Squire Patton Boggs (US) LLP, in connection with the issuance of the Series 2018A Bonds is included in APPENDIX E. A schedule of the Refunded Bonds is included in APPENDIX G.

The Airports Authority has executed a Continuing Disclosure Agreement (the “Disclosure Agreement”) with Digital Assurance Certification L.L.C. (“DAC”), the form of which is included in APPENDIX F, to assist the Underwriters in complying with the provisions of Rule 15c2-12 (“Rule 15c2-12”), promulgated by the SEC under the Securities Exchange Act of 1934, as amended, and as in effect as of the date hereof, by providing annual financial and operating data and material event notices required by Rule 15c2-12. See “CONTINUING DISCLOSURE” and APPENDIX F – “Form of Continuing Disclosure Agreement.”

The information in this Official Statement is subject to change without notice, and neither the delivery of this Official Statement nor any sale made hereunder shall under any circumstances create any implication that there has been no change in the affairs of the Airports Authority or the Airports since the date hereof. This Official Statement is not to be construed as a contract or agreement between the Airports Authority or the Underwriters and purchasers or owners of any of the Series 2018A Bonds.

Inquiries regarding information about the Airports Authority and its financial matters contained in this Official Statement may be directed to Andrew T. Rountree, Senior Vice President for Finance and Chief Financial Officer, at (703) 417-8700, or submitted by email at bondholders.information@mwa.com. Certain financial information with respect to the Airports Authority, including the Master Indenture, also may be obtained through the Airports Authority’s website at www.mwa.com and through the website of DAC at www.dacb.com. DAC serves as Disclosure Dissemination Agent for the Airports Authority. See “CONTINUING DISCLOSURE.”

THE AIRPORTS AUTHORITY

General

The Airports Authority is a public body politic and corporate, created with the consent of the Congress of the United States by the District of Columbia Regional Airports Authority Act of 1985, as amended, codified at D.C. Official Code §9-901 *et seq.* (2001) (the “District Act”), and Chapter 598 of the Acts of Virginia General Assembly of 1985, as amended, codified at Va. Code §5.1-152 *et seq.* (2001) (the “Virginia Act” and, together with the District Act, the “Acts”), for the purpose of operating, maintaining and improving the Airports. In the Federal Act, Congress authorized the Secretary of Transportation (the “Secretary”) to lease the Airports to the Airports Authority. Pursuant to an Agreement and Deed of Lease effective June 7, 1987 (the “Lease Effective Date”), as amended (the “Federal Lease”), the Airports Authority assumed operating responsibility for Reagan National Airport and Dulles International Airport upon the transfer of an initial 50-year leasehold interest in the Airports from the United States to the Airports Authority in accordance with the Metropolitan Washington Airports Act of 1986 (Title

VI, P.L. 99-500, as reenacted in P.L. 99-591, effective October 18, 1986, as amended, codified at 49 U.S.C. §49101 *et seq.* (the “Federal Act”). The Federal Lease was amended in 2003 to extend its term to 2067. See “THE AIRPORTS AUTHORITY – Lease of the Airports to the Airports Authority.”

The Airports Authority is independent of the District of Columbia, the Commonwealth of Virginia and the federal government. The Airports Authority has the powers set forth in the Acts, including the authority: (a) to plan, establish, operate, develop, construct, enlarge, maintain, equip and protect the Airports; (b) to issue revenue bonds for any of the Airports Authority’s purposes payable solely from the rentals, fees and charges from the Airports pledged for their payment; (c) to fix, revise, charge and collect rates, fees, rentals and other charges for the use of the Airports; (d) to make covenants and to do such things as may be necessary, convenient or desirable in order to secure its bonds; and (e) to do all things necessary or convenient to carry out its express powers. The Airports Authority has no taxing power.

The Airports Authority operates two enterprises – the Aviation Enterprise, under which it operates and maintains the Airports, and the Dulles Corridor Enterprise, under which it operates and maintains the Dulles Toll Road and is constructing the Dulles Metrorail Project. The Dulles Toll Road is an eight-lane limited access highway 13.4 miles in length that begins just inside Interstate 495 (the Capital Beltway) and terminates near Dulles International Airport. The Dulles Metrorail Project is a 23.1 mile extension of the existing Metrorail system from the West Falls Church station to Dulles International Airport and beyond into Loudoun County, Virginia. The Dulles Metrorail Project is being constructed in two phases and, upon completion, each phase is to be conveyed to and operated by the Washington Metropolitan Area Transit Authority (“WMATA”). Phase 1 of the Dulles Metrorail Project was completed in 2014, is operational and has been transferred to WMATA. Construction of Phase 2 has commenced and is expected to be operational in 2020. The Airports Authority accounts for the two enterprises separately through the Aviation Enterprise Fund and the Dulles Corridor Enterprise Fund. Dulles Toll Road Revenues are treated as “Released Revenues” under the Indenture and therefore are not part of the Net Revenues of the Aviation Enterprise Fund that secure the Bonds. In addition, such Net Revenues do not secure Dulles Toll Road Revenue Bonds. See “THE AIRPORTS AUTHORITY – Operation of the Dulles Toll Road and Construction of the Dulles Metrorail Project.” The Series 2018A Bonds are being issued solely to finance and refinance projects at the Airports, and this Official Statement pertains to the Airports and the Airports Authority’s operation of the Aviation Enterprise.

The Airports Authority also is empowered to adopt rules and regulations governing the use, maintenance and operation of its facilities. Regulations adopted by the Airports Authority governing aircraft operations and maintenance, motor vehicle traffic and access to Airports Authority facilities have the force and effect of law. The Airports Authority also is empowered to acquire real property or interests therein for construction and operation of the Airports. It has the power of condemnation, in accordance with Title 25 of the Code of Virginia, for the acquisition of property interests for airport and landing field purposes.

The Airports

Reagan National Airport was opened for service in 1941. It is located on approximately 860 acres along the Potomac River in Arlington County, Virginia, approximately three miles from downtown Washington, D.C. It has three interconnected terminal buildings, three runways, 44 loading bridge-equipped aircraft gates, and 12 parking positions for regional airline aircraft. As of December 31, 2017, Reagan National Airport was served by eight mainline U.S. airlines, nine affiliated regional airlines, and two foreign flag airlines. In 2017, enplanements totaled approximately 11.9 million, nearly all flights to domestic destinations, marking the seventh consecutive year of record enplanements at Reagan National Airport.

Dulles International Airport was opened for service in 1962. It is located on approximately 11,830 acres (exclusive of the Dulles International Airport Access Highway) in Fairfax and Loudoun Counties, Virginia, approximately 26 miles west of Washington, D.C. In addition to a main terminal, it has four midfield concourses (A, B, C and D), four runways, 82 loading bridge-equipped aircraft gates, and 29 parking positions for regional airline aircraft. As of December 31, 2017, Dulles International Airport was served by eight mainline U.S. airlines, eight regional airlines (most operating as affiliates of mainline airlines), 29 foreign flag airlines, and five all-cargo carriers. In 2017, enplanements totaled approximately 11.3 million, 34.0% on flights to international destinations, and marked the 14th consecutive year of growth in international travel at the Airport.

See “THE AIRPORTS AUTHORITY’S FACILITIES AND MASTER PLANS – Facilities at Reagan National Airport and Dulles International Airport,” “THE AIRPORTS SERVICE REGION AND AIRPORTS ACTIVITY,” “FINANCIAL CONDITION OF CERTAIN AIRLINES SERVING THE AIRPORTS,” and “CERTAIN INVESTMENT CONSIDERATIONS – Airline Consolidations.”

Board of Directors

The Acts provide that the Airports Authority shall consist of a 17-member Board of Directors (the “Board”). Seven members of the Board are appointed by the Governor of Virginia subject to confirmation by the Virginia General Assembly, four are appointed by the Mayor of the District of Columbia subject to confirmation by the Council of the District of Columbia, three are appointed by the Governor of Maryland, and three are appointed by the President of the United States with the advice and consent of the Senate. Presently, three seats appointed by the President of the United States are vacant. Directors serve staggered six-year terms without compensation and may be reappointed to one additional term.

The members of the Airports Authority’s Board of Directors are:

<u>Name</u>	<u>Appointing Authority</u>	<u>Term Expires</u>
Warner H. Session, <i>Chairman</i>	Mayor of the District of Columbia	January 5, 2023*
Earl Adams, Jr., Vice Chairman	Governor of Maryland	October 10, 2018
Anthony H. Griffin	Governor of Virginia	November 23, 2018
Honorable Katherine K. Hanley	Governor of Virginia	November 23, 2020
Barbara Lang	Mayor of the District of Columbia	October 2, 2018
Honorable Robert W. Lazaro, Jr.	Governor of Virginia	November 23, 2022
Caren D. Merrick	Governor of Virginia	October 11, 2018
A. Bradley Mims	Governor of Maryland	November 30, 2020
Thorn Pozen	Mayor of the District of Columbia	January 5, 2021
Honorable David G. Speck	Governor of Virginia	November 23, 2020
William E. Sudow	Governor of Virginia	October 11, 2018
Honorable J. Walter Tejada	Governor of Virginia	November 23, 2018
Mark Uncapher	Governor of Maryland	November 30, 2022
Joslyn N. Williams	Mayor of the District of Columbia	January 5, 2019
Vacant	President of the United States	May 30, 2022
Vacant	President of the United States	**
Vacant	President of the United States	**

The Board operates through several committees that include the Standing Committees of Business Administration, Dulles Corridor, Finance and Strategic Development, and the committees of Ethics Review, Executive and Governance, Human Resources, Nominations and Risk Management. Primary oversight over financing activities is provided by the Finance and the Risk Management Committees.

Senior Management

Airports Authority operations are conducted under the supervision of the Airports Authority management. The current senior management of the Airports Authority are listed below.

JOHN E. POTTER. Mr. Potter is President and Chief Executive Officer of the Airports Authority. Prior to assuming this position in July 2011, Mr. Potter served as the Postmaster General of the United States for 10 years where he worked to modernize management of the over 500,000 employee organization. Prior to serving as Postmaster General, Mr. Potter served in a number of positions at the United States Postal Service, including Manager of Washington–Baltimore–Northern Virginia Field Operations, Senior Vice President of Labor Relations, Senior Vice President of Operations Support, and Executive Vice President and Chief Operating Officer. Mr. Potter is a graduate of Fordham University (B.A., Economics, 1977) and Massachusetts Institute of Technology (M.S.M., Sloan Fellow, 1995).

MARGARET E. MCKEOUGH. Ms. McKeough is Executive Vice President and Chief Operating Officer of the Airports Authority. Ms. McKeough previously served for more

* Second term.

** Term will expire six years after the date that this vacancy is filled.

than five years as the Vice President for Business Administration of the Airports Authority. Prior to joining the Airports Authority in August 1998, Ms. McKeough was the Deputy Aviation Director for Business and Properties at Phoenix Sky Harbor International Airport and managed various business programs in the Phoenix Economic Development Department. She currently serves as Vice Chair of the U.S. Secretary of Commerce Travel and Tourism Advisory Board; President of the Aero Club of Washington; and as a member of the U.S. Department of Transportation Oversight Committee for the Airport Cooperative Research Program. Ms. McKeough is a graduate of Providence College (B.A., Political Science, 1983) and the University of Connecticut (M.P.A., 1985).

JEROME L. DAVIS. Mr. Davis is Executive Vice President and Chief Revenue Officer for the Airports Authority. Mr. Davis joined the Airports Authority in September 2014. Mr. Davis previously served as executive vice president for Food & Retail for Waste Management; global vice president of service excellence, chief client executive officer and president of the Americas for Electronic Data Systems; president of Maytag's Commercial Solutions Division and senior vice president of sales at Maytag Appliance Company; and vice president of national accounts and area vice president for Frito Lay. He started his business career with Procter & Gamble where he worked in a variety of sales leadership positions. Mr. Davis is a graduate of Florida State University (B.S. Communications, 1977). He serves on the board of directors of GameStop Corporation and Apogee Enterprises, Inc.

PHILIP G. SUNDERLAND. Mr. Sunderland is Senior Vice President and General Counsel to the Airports Authority. Prior to assuming this position in April 2008, Mr. Sunderland served as the Secretary and Counsel to the Airports Authority beginning in June 2007. Before joining the Airports Authority, Mr. Sunderland was the chief of staff for Congressman James Moran (VA, 8th). Prior to his work on Capitol Hill, he had been the City Manager for five years and the City Attorney for 14 years for the City of Alexandria, Virginia. Mr. Sunderland has served on the boards of numerous non-profit organizations in Northern Virginia, was a member of a Virginia General Assembly task force that prepared a re-codification of the Local Government chapter of the Virginia Code, and has served as a teaching fellow at the Stanford Law School and the Chinese University of Hong Kong. He is a graduate of Dartmouth College (B.A., Economics, 1967) and the Stanford University Law School (J.D., 1972).

ANDREW T. ROUNTREE. Mr. Rountree is Senior Vice President for Finance and Chief Financial Officer. Prior to assuming this position in December, 2010, Mr. Rountree served as the Acting Vice President for Finance and Chief Financial Officer and was the Deputy Chief Financial Officer beginning in 2005. Prior to joining the Airports Authority, Mr. Rountree was appointed as the Director of Finance for the City of Richmond, Virginia in September 2000. While with the City of Richmond, he also served as Deputy Director of Finance from 1998 to 2000, and as the Chief of the License, Assessment, and Tax Audit beginning in 1996. Mr. Rountree served in a number of positions with the Commonwealth of Virginia, including Assistant Controller with the Department of Information Technology from 1990 to 1996 and Audit Director with the Auditor of Public Accounts, the legislatively appointed auditor for the Commonwealth,

until 1990. Mr. Rountree currently serves on the Board Finance Committee for Airports Council International-North America (ACI-NA), and is Immediate Past-Chair of the ACI-NA Finance Steering Committee. He was recognized in 2017 as ACI-NA Finance Professional of the Year for Large Hub Airports. Mr. Rountree is a graduate of Virginia Commonwealth University (B.S., Economics, 1982) and is a Certified Public Accountant in the Commonwealth of Virginia.

ROGER NATSUHARA. Mr. Natsuhara is Senior Vice President for Engineering and is responsible for the Airports Authority's Capital Construction Programs and Capital Improvements Program for the Airports. He joined the Airports Authority in October 2014. Mr. Natsuhara has managed large capital programs since 1989 when he was assigned as an Assistant Resident Officer in Charge of Construction at Marine Corps Air Station El Toro. Prior to joining the Airports Authority, he was the Acting Assistant and Principal Deputy Assistant Secretary of the Navy for Energy, Installations and Environment. His responsibilities included overseeing all world-wide construction policies for the Navy and the Marine Corps. He is a graduate of the University of California, Berkeley (B.S., Civil Engineering, 1980) and Naval Postgraduate School (M.S., Financial Management, 1989).

ANTHONY VEGLIANTE. Mr. Vegliante is Senior Vice President for Human Resources and Administrative Services. He joined the Airports Authority in May 2013. Prior to joining the Airports Authority, Mr. Vegliante was the Chief Human Resources Officer for the United States Postal Service, where he managed the human resources function for more than 500,000 employees nationwide. Prior to that assignment Mr. Vegliante was the Vice President for Labor Relations and participated in 20 national labor negotiations at the United States Postal Service. In 2010, Mr. Vegliante was elected a fellow of the National Academy of Human Resources, the first public sector executive to receive the honor. He is a graduate of the University of Rhode Island (B.S., Economics, 1974), the University of Southern California Executive Management Program, the University of Bridgeport (M.S., Business Education, 1979), and the University of New Haven (M.S., Industrial Relations, 1997).

GOUTAM KUNDU. Mr. Kundu is Senior Vice President for Technology and Chief Information Officer. He joined the Airports Authority in June 2013. Prior to joining the Airports Authority, Mr. Kundu held the executive positions of Chief Information Officer at the United States Mint; Vice President at NIIT Technologies, a global IT Service and software company; Chief Information Officer at the Washington Suburban Sanitary Commission; and Chief Technology Officer at Farm Bureau Insurance. He is a graduate of the University of Calcutta (B.S., Computer Engineering, 1993) and the Indiana University Kelley School of Business (M.B.A., 1998).

CHARLES STARK. Mr. Stark is Senior Vice President for the Dulles Corridor Metrorail Project. Prior to assuming this position in September 2014, Mr. Stark was Vice President and Project Executive for AECOM. He was also responsible for the management of the Los Angeles County Metropolitan Transportation Authority (MTA) underground projects including the \$4.5 billion Metro Red Line Subway. Previously, Mr. Stark was the Chief Operating Officer for the Miami Access Tunnel, responsible for

engineering and construction management of the \$969 million project for a design-build-operate-maintain contractor. Mr. Stark is a graduate of City College of New York (B.S., Mechanical Engineering, 1970) and Manhattan College (M.S., Civil Engineering, 1978). He is a registered Professional Engineer in Virginia and California.

MONICA R. HARGROVE. Ms. Hargrove is Vice President and Secretary of the Airports Authority. Prior to assuming this position in March 2016, Ms. Hargrove served as Deputy General Counsel of the Airports Authority since November 2013. Before joining the Airports Authority, Ms. Hargrove served as General Counsel of Airports Council International-North America and as a corporate attorney with US Airways for more than 19 years, serving in the positions of Senior Attorney, Assistant General Counsel and Associate General Counsel. Ms. Hargrove began her legal career as a trial attorney in the Antitrust Division of the United States Department of Justice in 1979. She currently serves as the Immediate Past-Chair of the American Bar Association's Forum on Air & Space Law, and she served as the 2013 Chair of the Federal Bar Association's Transportation & Transportation Security Law Section. She is a member of the District of Columbia and Virginia State Bars. Ms. Hargrove is a graduate of Dartmouth College (B.A., Government, 1976) and the University of Michigan Law School (J.D., 1979).

LEE WYCKOFF. Mr. Wyckoff is Vice President for Audit. He joined the Airports Authority in 2015. Prior to joining the Airports Authority, Mr. Wyckoff served as the first Inspector General for the State of Utah. He has also worked as an auditor with progressive levels of responsibility within KPMG, LLP, Genworth Financial, Inc. and Wellpoint, Inc. (a BlueCross BlueShield licensee). Mr. Wyckoff, a Certified Public Accountant in Maryland and a Certified Information Systems Auditor, is a graduate of Johns Hopkins University (M.S., Engineering – Information Systems, 2003) and Towson University (B.S., Accounting, 1998).

JULIA T. HODGE. Ms. Hodge is Vice President for Supply Chain Management, responsible for the Airports Authority's Procurement and Contracts, Supplier Diversity, and Property Management functions. She joined the Airports Authority in September 2009 and held leadership positions in the Office of Finance, Office of Audit and Office of Corporate Risk and Strategy, where she served as the Deputy Vice President responsible for organization-wide governance, compliance, and strategic planning. Ms. Hodge was an auditor and management consultant with PricewaterhouseCoopers, LLP for ten years prior to joining the Airports Authority. A Certified Public Accountant in the Commonwealth of Virginia, she is a graduate of Boston College (B.S., Accounting, 2000) and Georgetown University (E.M.L., 2012).

J. PAUL MALANDRINO, JR. Mr. Malandrino is Vice President and Airport Manager at Reagan National. Mr. Malandrino was the Federal Security Director at Thurgood Marshall Baltimore/Washington International Airport for almost four years before assuming his current position in July 2006. Prior to that time, he served as Manager of the Operations Department at Dulles International Airport for more than six years. Mr. Malandrino retired from the United States Air Force in 1996, after spending 30 years on active duty. Mr. Malandrino is a graduate of the Citadel (B.A. History, 1965) and Golden Gate University (M.P.A., 1976).

MIKE STEWART. Mr. Stewart is Vice President and Airport Manager at Dulles International, which includes the Airport, Dulles Toll Road and Dulles International Airport Access Highway. Prior to assuming this position in December 2017 he served as the Vice President for Airline Business Development. He joined the Airports Authority in April 2007 and previously held management positions as Airline Affairs Manager, Airport Administration Department Manager at Dulles and Acting Manager of Business Development. Prior to joining the Airports Authority, Mr. Stewart began his aviation career in 1983 as a Station Agent for Piedmont Airlines and over 15 years held several supervisory and management positions, including Station Manager, for Piedmont and its successor US Airways. He also served as Regional Director for United Express Station Operations at Atlantic Coast Airlines and as Director of Airport Affairs for Independence Air. Mr. Stewart is a graduate of Middle Tennessee State University (B.S., Aerospace, 1983).

BRYAN NORWOOD. Mr. Norwood is Vice President for Public Safety. He joined the Airports Authority in April 2014. He began his law enforcement career in 1989 as a police officer in New Haven, Connecticut. After rising through the ranks to Assistant Chief in 2002, he was appointed Chief of Police in Bridgeport, Connecticut, in 2006, and Chief of Police in Richmond, Virginia, in 2008. Mr. Norwood also was a special agent for the United States Drug Enforcement Administration from 1998 to 1999. He was chairman of the Central Virginia Law Enforcement Chief Executive Association and is a member of the International Association of Chiefs of Police, the Virginia Association of Chiefs of Police, and the National Organization of Black Law Enforcement Executives. He is a graduate of Hampton University (B.A. in Psychology, 1988) and New Haven Police Academy (1989).

DAVID R. MOULD. Mr. Mould is Vice President for Communications and Government Affairs, which includes corporate communications, media relations, employee communications, government relations, corporate relations and noise information programs. He joined the Airports Authority in June 2012 after serving as chief of communications for government agencies, including NASA and the Tennessee Valley Authority, and energy corporations, including Southern Company and PG&E National Energy Group. He has also served as senior policy advisor to the United States Secretary of Energy and as a public affairs consultant and lobbyist in the energy and aerospace industries. He was a journalist for three newspapers and the United Press International news agency. He is a graduate of Emory University (M.B.A., 1998) and the University of Tennessee (B.S. Communications, 1980).

YIL SUREHAN. Mr. Surehan is Vice President for Airline Business Development. He joined the Airports Authority in March 2018. Prior to joining the Airports Authority, Mr. Surehan was Director, Airline Route Development, at the Massachusetts Port Authority (“Massport”) for 12 years, responsible for the development and expansion of air service at Boston Logan International Airport. Prior to joining Massport, Mr. Surehan had a 15-year career in the airline industry in the areas of planning/scheduling/market development, as Manager, International Schedules Planning at United Airlines, as Director, Capacity Planning at Alaska Airlines, and as Senior Planning Analyst at American Airlines. Mr. Surehan is a graduate of New York University (B.S., Finance

and International Business, dual major, 1987) and the University of Texas (M.B.A., Economics, 1999).

CHRYSSA WESTERLUND. Ms. Westerlund is Vice President of Marketing and Consumer Strategy, which includes marketing, digital strategy, revenue strategy and airport concessions. Prior to assuming this position, Ms. Westerlund served as Deputy Vice President of Planning and Revenue Development. Before joining the Airports Authority in January of 2015, Ms. Westerlund served as a Global Alliance Director for Hewlett-Packard's IT services division and focused on growing revenue through the development of new partners and services. She also spent a number of years as a management consultant providing strategic advisory services to Fortune 500 companies. Ms. Westerlund is a graduate of the University of Texas in Austin (B.B.A., Accounting, 1992) and the University of Pennsylvania's Wharton School of Business (M.B.A., Marketing, 1997) and is a Certified Public Accountant in Texas.

Employees and Labor Relations

As of March 2018, the Airports Authority employed approximately 1,713 full and part-time employees, 1,648 of whom were employed in aviation functions and 65 of which were employed in Dulles Corridor (toll and rail), and, of that total, 338 of whom were employed in consolidated functions. Of the total employees of the Airports Authority, 851 are represented by labor unions in five bargaining units. The Airports Authority is not subject to the National Labor Relations Act and also is outside the jurisdiction of the Federal Labor Relations Authority. As required by the Federal Lease, the Board has adopted a Labor Code which establishes an Employee Relations Council (the "ERC"). The ERC consists of nine members who are named to two-year terms by mutual agreement between the President and Chief Executive Officer of the Airports Authority and the labor organizations representing Airports Authority employees. The ERC is composed of three panels: the Impasse Disputes Panel, the Representation Matters Panel and the Unfair Labor Practices Panel. Through these panels, the ERC acts on petitions for exclusive representation, resolves negotiation disputes and investigates unfair labor practice allegations. Pursuant to the Airports Authority's Labor Code, Airports Authority employees are prohibited from striking.

Lease of the Airports to the Airports Authority

The Airports were transferred by the federal government to the Airports Authority on June 7, 1987, for an initial term of 50 years ending June 6, 2037. The term of the Federal Lease may be extended by mutual agreement and execution of a written extension by the Secretary of Transportation and the Airports Authority, and this was done in 2003 to extend the term to June 6, 2067. The Federal Lease transferred a leasehold interest in all of the Airports' then existing real property, including access highways and related facilities, and transferred title to all equipment, materials, furnishings and other personal property appurtenant to or located on the Airports' real property (other than particular property required for federal air traffic control responsibilities). Since the transfer, the Airports Authority has acquired title to approximately 1,585 acres of land, as well as aviation easements over approximately 158 acres of land adjacent to Dulles International Airport. Included in the land acquired are approximately 1,163 acres to accommodate new runways and related improvements at Dulles International Airport and

approximately 422 acres for other future development. All land acquired after the transfer is not subject to the Federal Lease, except that any such land in the Airports Authority's possession upon expiration of the Federal Lease will revert to the federal government. The Federal Lease has been amended over the years to reflect changes in federal law.

The FAA Modernization and Reform Act of 2012 (the "2012 FAA Reauthorization Act") expanded the purposes for which the real property subject to the Federal Lease may be used to include any business activity that is consistent with the needs of aviation and has been approved by the United States Secretary of Transportation. Prior to that amendment, the real property subject to the Federal Lease could be used only for aviation business or activities, activities necessary or appropriate to serve passengers or cargo in air commerce and nonprofit, and public use facilities consistent with the needs of aviation. The Federal Lease has been amended to incorporate this provision of the 2012 FAA Reauthorization Act. In addition, the Federal Lease has been amended to provide that the Airports Authority will adopt, maintain and adhere to policies and procedures in the areas of "procurement and contracting, human resources (including hiring and adverse action), budget (as relates to federal funds), travel, ethics, governance, and transparency (including open meetings and executive sessions)" that are "substantially similar to those of similar public entities and strive to reflect a standard of 'best practices'." The amendment also provides that the Airports Authority will develop these policies and procedures in consultation with the United States Secretary of Transportation, or the Secretary's designee, and will obtain the concurrence of the same prior to adopting such policies and procedures.

Under the Federal Lease, the Airports Authority has full power and dominion over, and complete discretion in the operation and development of, the Airports. Pursuant to the Federal Lease, the Airports Authority adopted all existing labor agreements in effect on the Lease Effective Date, and provided for the transfer to the Airports Authority of employees who were employees of the FAA and the continuation of various employment benefits, including coverage of certain United States Civil Service retirement benefits. The Airports Authority has satisfied its legal requirement to fund these pension and other benefit obligations. For a detailed discussion of the Airports Authority pension plans and the funding status of those pension plans, deferred compensation plan and other post-employment benefits, see Notes 6 and 7 to the 2017 CAFR which was filed with EMMA and can also be found at www.mwaa.com and www.dacbond.com.

The Federal Lease provides for an annual base rental payable to the United States Treasury, which was initially \$3.0 million for the one-year period that commenced June 7, 1987. This amount is subject to annual adjustment for inflation and interest. The adjusted lease payment for the year ended June 6, 2017 was \$5.519 million, and the adjusted lease payment for the year ending June 6, 2018 is estimated to be \$5.628 million. The Airports Authority has made all rental payments on a timely basis.

The Airports Authority is required by the Master Indenture to deposit funds into a reserve for rental payments on a monthly basis and to make rental payments in semiannual installments. Any interest earned on the deposited funds also is required to be paid to the United States. Payments under the Federal Lease are to be made by the Airports Authority from funds legally available for such purpose, after the Airports Authority has satisfied its contractual obligations in

respect of debt service on its bonds and other indebtedness, and paid or set aside the amounts required for payment of the operating and maintenance expenses of the Airports. The Airports Authority has made all rental deposits and payments on a timely basis.

Under the Federal Lease, the Airports Authority may not use certain revenues from one Airport for payment of operation and maintenance expenses at the other Airport. However, this restriction does not extend to debt service, amortization or depreciation expenses. The Federal Lease requires the Airports Authority to use the same basis in calculating general aviation landing fees at the Airports as is used in setting air carrier landing fees.

The Federal Lease imposes certain restrictions on the Airports Authority in the operation of the Airports. For example, the Airports Authority may not (a) increase or decrease the number of Instrument Flight Rule takeoffs and landings permitted at Reagan National Airport by the FAA's High Density Rule as in effect on October 18, 1986, which rule limits, with certain exceptions, the number of air carrier flight arrivals and departures that can be scheduled to 37 per hour, and 11 regional air carrier flights and 12 general aviation flights scheduled per hour, (b) impose any limitation on the number of passengers taking off or landing at Reagan National Airport, or (c) change the hours of operation or the types of aircraft serving either of the Airports, except by regulation adopted after a public hearing. See "Regulations and Restrictions Affecting the Airports" below.

The Federal Lease requires the Airports Authority to maintain a risk financing plan for its casualty and property losses, covering such items as are customarily insured by enterprises of a similar nature. The Airports Authority's risk financing plan includes risk retention, risk transfer to commercial insurers or participation in group risk financing plans. The Airports Authority is required to consult with qualified actuaries and risk management consultants in developing its risk management plan. The Airports Authority has adopted a risk financing plan in accordance with the requirements of the Federal Lease. See "Insurance" below.

The following constitute "events of default" under the Federal Lease: (a) the failure of the Airports Authority to make rental payments for 30 days after their due date; (b) the continuation of the use of any of the leased property or any portion thereof for purposes other than airport purposes (for 30 days after notice of such noncompliant use from the Secretary, unless good faith efforts to remedy the default have been commenced and are being diligently pursued); and (c) the continuation of a breach of any other provision of the Federal Lease (for 30 days after notice of the breach from the Secretary, unless good faith efforts to remedy such default have been commenced and are being diligently pursued). In the case of an event of default described in (a) or (c) above, the Secretary may request the United States Attorney General to bring an appropriate action to compel compliance with the Federal Lease by the Airports Authority. In the case of an event of default relating to a rental payment under the Federal Lease, the Secretary may assess penalties and interest at specified rates. In the case of an event of default described in (b) above, the Secretary is required to direct the Airports Authority to bring the use of Airport property into conformity with the Federal Lease and to retake that property if the Airports Authority does not comply within a reasonable period. It is only in this "event of default," where Airport property is used for non-airport purposes, that the Federal Lease, as to the property so used, may be terminated.

Although the Airports Authority is not required to follow federal contracting statutes and regulations, the Airports Authority is obligated under the terms of the Federal Lease to implement contracting procedures to achieve, to the maximum extent practicable, full and open competition. The Airports Authority has published a contracting manual that sets forth its procedures for full and open competition.

Regulations and Restrictions Affecting the Airports

The operations of the Airports Authority and its ability to generate revenues are affected by a variety of legislative, legal, contractual and practical restrictions. These include, without limitation, restrictions in the Federal Act, limitations imposed by the Federal Lease and provisions of the Airline Agreement. Both Airports are subject to the extensive federal regulations applicable to all airports and, following the September 11, 2001 attacks, the FAA instituted additional special operating restrictions at Reagan National Airport. The following summarizes some of the regulations and restrictions applicable to the Airports.

Operating Restrictions at Reagan National Airport

Reagan National Airport is subject to the following federal statutory and regulatory restrictions that do not apply to most other airports in the United States:

(i) The High Density Rule. The FAA regulation known as the High Density Rule limits the number of air carrier, regional air carrier and general aviation flights that can be scheduled at Reagan National Airport. The High Density Rule has been in effect since 1969, and is intended to promote air traffic efficiency and relieve congestion. The maximum number of air carrier flight arrivals and departures authorized by the High Density Rule is 37 per hour, with some exceptions. In addition to the air carrier flights, the rule allows 11 regional air carrier flights and 12 general aviation operations per hour.

(ii) The Perimeter Rule. Under the Federal Act, nonstop flights to and from Reagan National Airport generally are limited to destinations no more than 1,250 miles away (the “Perimeter Rule”).

Since 2000, Congress has authorized increases in flight activity at Reagan National Airport exceeding the number of flights authorized by the High Density Rule and the distance of flights under the Perimeter Rule. For example, the 2012 FAA Reauthorization Act increased the number of slot pairs (i.e., daily round trip flights) to points beyond the perimeter from 12 to 20. Of these eight additional slot pairs, four were awarded to existing air carriers serving Reagan National Airport. The remaining pairs were offered to four new entrant air carriers or limited incumbent airlines. The Airports Authority cannot predict the impact of future changes to the High Density Rule or the Perimeter Rule on the Airports, but such changes would likely increase flight activity at Reagan National Airport and could cause some reduction in flight activity at Dulles International Airport.

Additional Security Restrictions at Reagan National Airport

Although general aviation is authorized at Reagan National Airport, it is subject to compliance with strict security requirements, including arrival from one of 134 “gateway”

airports*, advanced screening and background checks of crews and passengers, Transportation Security Administration (“TSA”) inspection of crews, passengers and property and the presence of armed officers on each flight. General aviation activities at Reagan National Airport have no material effect on traffic and revenues at Reagan National Airport.

Possible Future Restrictions at Reagan National Airport

For security reasons, the federal government could restrict future flights at, or close, Reagan National Airport for extended periods or permanently. If closure of the Airport or such restrictions were to occur, they would have a negative impact on enplanements at the Airport and, as a result, on Revenues. If this were to occur, the Airports Authority would expect to seek compensation from the federal government for the losses and damages incurred, as it did successfully when Reagan National Airport was temporarily closed as a result of the events of September 11, 2001. No assurances can be given, however, that any compensation would be forthcoming from the federal government in these circumstances.

Federal Funding Regulations at the Airports

The FAA has the power to terminate the Airports Authority’s authority to impose PFCs if PFC revenues are not used for approved projects, if project implementation does not commence within the time periods specified in the FAA’s regulations or if the Airports Authority otherwise violates FAA regulations. The Airports Authority’s plan of funding for the CCP is premised on certain assumptions with respect to the approval by the FAA of the Airports Authority’s PFC applications and the availability of PFC revenues to fund PFC-eligible portions of certain projects in the CCP. In the event that PFC revenues are lower than those expected, the Airports Authority may elect to delay certain projects or seek alternative sources of funding, including the possible issuance of additional Bonds. See “PLAN OF FUNDING FOR THE CCP – Funding Source: PFCs” and “CERTAIN INVESTMENT CONSIDERATIONS – Federal Funding; Impact of Federal Sequestration.”

Noise Abatement Programs

Since 1993, the Airports Authority has had an aircraft noise compatibility program at Reagan National Airport that was approved by the FAA under 14 C.F.R. Part 150, the FAA program for addressing noise issues involving airports and neighboring communities (“Part 150”). The Airports Authority’s program includes noise abatement flight corridors, nighttime noise limits and nighttime engine run-up limitations. In accordance with FAA requirements, in December 2004, the Airports Authority completed and delivered to the FAA a Part 150 review of its noise compatibility program for Reagan National Airport which, in light of changes in the type and number of aircraft operating at Reagan National Airport, proposed certain modifications to the program. The Airports Authority received FAA approval of the Part 150 review in January 2008.

The Airports Authority also has an aircraft noise compatibility program for Dulles International Airport. All runways at Dulles International Airport have buffers between the

* The FAA uses the term “gateway” airport to refer to certain airports from which all flights to Reagan National Airport must complete TSA screening prior to landing at Reagan National Airport.

runway ends and the airport boundary. The Airports Authority worked in conjunction with the planning departments in Fairfax County and Loudoun County to provide for compatible land uses in the vicinity of Dulles International Airport, specifically in those areas projected to be adversely affected by significant aircraft noise in the future. The original Part 150 program for Dulles International Airport was completed by the FAA in 1985. In 1993, the noise exposure analysis was updated to reflect the phase-out of older, noisier aircraft as mandated by Congress. Both counties have adopted land-use plans that provide for development compatible with the predicted noise exposure from the planned five runways at Dulles International Airport.

Risk Based Auditing

The functions of the Airports Authority's Office of Audit include coordination of the annual financial statement audit performed by independent external auditors, as well as the provision of internal audits of internal controls. The Office of Audit conducts internal audits to provide the Airports Authority's management and Board with reasonable assurance that: (1) risks are being identified and managed; (2) management and delivery capacity are being maintained; (3) adequate control is being exercised; and (4) appropriate results are being achieved. The Office of Audit is to assess organization-wide risk to evaluate the allocation of internal audit resources and to develop annual audit plans in a manner that gives appropriate consideration to risks affecting the Airports Authority.

Insurance

The Airports Authority was required under the Federal Lease to have certain insurance in force on the Lease Effective Date and over the years has maintained property and casualty policies, including airport liability insurance to protect its operations. Additionally, the Airports Authority created an Owner Controlled Wrap-Up Insurance Program ("OCWIP") for CCP-related work performed at the Airports to provide builders' risk, workers' compensation, environmental, and general liability insurance to protect all enrolled contractors and their subcontractors of all tiers. The OCWIP is designed to reduce conflict among contractors and insurance providers, increase the liability protection for all participants, and reduce the total cost of the insurance for and during construction. The Airports Authority has acquired commercial insurance coverage for war risks, including terrorism, on selected liability insurance and property insurance policies. Each policy has specified limits and exclusions. Under the Airline Agreement, Signatory Airlines also are required to maintain certain amounts of comprehensive liability insurance.

Operation of the Dulles Toll Road and Construction of the Dulles Metrorail Project

Under its Dulles Corridor Enterprise Fund, the Airports Authority operates and maintains the Dulles Toll Road ("DTR") and is constructing the Dulles Metrorail Project. The Airports Authority accounts for these activities through the Dulles Corridor Enterprise Fund. Dulles Toll Road Revenues are treated as "Released Revenues" under the Indenture and therefore are not part of the Net Revenues of the Aviation Enterprise Fund that secure the Bonds. In addition, such Net Revenues do not secure Dulles Toll Road Revenue Bonds. See "SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – General."

On November 1, 2008, the Virginia Department of Transportation (“VDOT”) transferred operational and financial control of the DTR from VDOT to the Airports Authority for a term of 50 years, upon the terms and conditions set forth by the Master Transfer Agreement dated December 29, 2006, and the Permit and Operating Agreement dated December 29, 2006 (collectively, the “VDOT Agreements”), each entered into by and between VDOT and the Airports Authority. In exchange for the rights to the revenues from operation of the DTR and certain other revenues described in the VDOT Agreements (collectively, the “DTR Revenues”), the Airports Authority agreed to (i) operate and maintain the DTR, (ii) cause the design and construction of the Dulles Metrorail Project and (iii) make other improvements in the Dulles Corridor consistent with VDOT and regional plans.

The Dulles Toll Road is an eight-lane limited access highway 13.4 miles in length that begins just inside Interstate 495 (the Capital Beltway) and terminates near Dulles International Airport. The Dulles Metrorail Project is a 23.1 mile extension of the existing Metrorail system from the West Falls Church station to Dulles International Airport and beyond into Loudoun County, Virginia. The Dulles Metrorail Project is being constructed in two phases and, upon completion, each phase is to be conveyed to and operated by WMATA. Phase 1 of the Dulles Metrorail Project was completed in 2014, is operational and has been transferred to WMATA. The cost of Phase 1 was \$2.982 billion. Construction of Phase 2 has commenced and Phase 2 is expected to be operational in 2020. The cost of Phase 2 is currently estimated at \$2.778 billion.

The Dulles Metrorail Project is being funded with a combination of Dulles Toll Road Revenue Bonds issued by the Airports Authority and secured by a pledge of DTR Revenues, federal grants and loans, grants from the Commonwealth of Virginia, contributions from local jurisdictions in the Commonwealth of Virginia, and a contribution from the Airports Authority totaling 4.1% of the total project cost. The Airports Authority’s contribution will be funded by the Aviation Enterprise Fund over the period of June 2015 to August 2019 mainly from PFCs. The Airports Authority has issued approximately \$1.7 billion of Dulles Toll Road Revenue Bonds and \$1.278 billion of Dulles Toll Road Junior Lien Revenue Bonds, TIFIA Series 2014, pursuant to a loan agreement with the Transportation Infrastructure Financing Innovative Act’s (“TIFIA”) Credit Program Office. No additional Dulles Toll Road Revenue Bonds currently are expected to be necessary to fund the Dulles Metrorail Project.

THE SERIES 2018A BONDS

General

The Series 2018A Bonds are being issued under the Indenture. The Series 2018A Bonds will be dated as of their date of delivery, which will be on or about July 3, 2018, will bear interest from that date, payable beginning on October 1, 2018, and semiannually thereafter on each April 1 and October 1 at the interest rates, and will mature on October 1 in the years, set forth on the inside cover pages of this Official Statement. The Series 2018A Bonds will be issued in denominations of \$5,000 or integral multiples thereof and will be subject to redemption prior to maturity as described below under “Redemption of the Series 2018A Bonds.”

Book-Entry Only System

The Series 2018A Bonds will be issued as fully registered bonds without coupons and are initially to be registered in the name of Cede & Co., as nominee for DTC as securities depository for the Series 2018A Bonds. Purchases by beneficial owners are to be made in book-entry form. If at any time the book-entry only system is discontinued for the Series 2018A Bonds, the Series 2018A Bonds will be exchangeable for other fully registered certificated Series 2018A Bonds in any authorized denominations, maturity and interest rate. Interest will be payable by check or draft mailed to the Holder as of the Record Date. The Trustee may impose a charge sufficient to reimburse the Airports Authority or the Trustee for any tax, fee or other governmental charge required to be paid with respect to such exchange or any transfer of a Series 2018A Bond. The cost, if any, of preparing each new Series 2018A Bond issued upon such exchange or transfer, and any other expenses of the Airports Authority or the Trustee incurred in connection therewith, will be paid by the person requesting such exchange or transfer. At the request of any Holder of at least \$1,000,000 principal amount of the Series 2018A Bonds, payment of interest will be made by wire transfer as directed by such Holder. Payment of principal of the Series 2018A Bonds will be made upon presentation and surrender of such Bonds at the principal corporate trust office of the Trustee. For more information regarding the Book-Entry Only System, see APPENDIX D – “Book-Entry Only System.”

NONE OF THE AIRPORTS AUTHORITY, THE UNDERWRITERS, OR THE TRUSTEE WILL HAVE ANY RESPONSIBILITY OR OBLIGATION TO DTC PARTICIPANTS, TO INDIRECT PARTICIPANTS, OR TO ANY BENEFICIAL OWNER WITH RESPECT TO: (i) THE ACCURACY OF ANY RECORDS MAINTAINED BY DTC, CEDE & CO., ANY DTC PARTICIPANT, OR ANY INDIRECT PARTICIPANT; (ii) ANY NOTICE THAT IS PERMITTED OR REQUIRED TO BE GIVEN TO THE OWNERS OF THE SERIES 2018A BONDS; (iii) THE SELECTION BY DTC OR ANY DTC PARTICIPANT OR INDIRECT PARTICIPANT OF ANY PERSON TO RECEIVE PAYMENT IN THE EVENT OF A PARTIAL REDEMPTION OF ANY SERIES 2018A BONDS; (iv) THE PAYMENT BY DTC OR ANY DTC PARTICIPANT OR INDIRECT PARTICIPANT OF ANY AMOUNT WITH RESPECT TO THE PRINCIPAL OR REDEMPTION PREMIUM, IF ANY, OR INTEREST DUE WITH RESPECT TO ANY SERIES 2018A BONDS; (v) ANY CONSENT GIVEN OR OTHER ACTION TAKEN BY DTC AS THE OWNER OF THE SERIES 2018A BONDS; OR (vi) ANY OTHER MATTER RELATING TO DTC OR THE BOOK-ENTRY ONLY SYSTEM.

Redemption of the Series 2018A Bonds

Optional Redemption at Par

The Series 2018A Bonds maturing on and after October 1, 2029 are subject to optional redemption prior to maturity by the Airports Authority, on and after October 1, 2028, in whole or in part, by lot, at any time, at 100% of the principal amount of the Series 2018A Bonds to be redeemed plus interest accrued to the date fixed for redemption.

Mandatory Sinking Fund Redemption

The \$65,590,000 Series 2018A Bonds term bond maturing October 1, 2043, is subject to mandatory sinking fund redemption in part, by lot, prior to maturity on October 1, in the years set forth below (each a “Sinking Fund Redemption Date”), at a redemption price equal to the principal amount of such term bond called for redemption:

Year (October 1)	Principal Amount
2039	\$ 28,115,000
2040	8,695,000
2041	9,130,000
2042	9,585,000
2043*	10,065,000

* Final Maturity

The \$58,410,000 Series 2018A Bonds term bond maturing October 1, 2048, is subject to mandatory sinking fund redemption in part, by lot, prior to maturity on October 1, in the years set forth below (each a “Sinking Fund Redemption Date”), at a redemption price equal to the principal amount of such term bond called for redemption:

Year (October 1)	Principal Amount
2044	\$10,570,000
2045	11,100,000
2046	11,655,000
2047	12,235,000
2048*	12,850,000

* Final Maturity

Credits on Sinking Fund Redemption Dates

At its option, to be exercised on or before the 45th day next preceding any such applicable Sinking Fund Redemption Date, the Airports Authority may: (i) cause to be paid to the Trustee for deposit in the Series 2018A Bonds Redemption Account such amount, or direct the Trustee to use moneys in the applicable Principal Account and Interest Account allocable to payments due on the applicable Series 2018A Bonds on such Sinking Fund Redemption Date in such amount, as the Airports Authority may determine, accompanied by a certificate directing the Trustee to apply such amount to the purchase of the applicable Series 2018A Bonds, and the Trustee will use all reasonable efforts to expend such funds as nearly as may be practicable in the purchase of such Series 2018A Bonds, at a price not exceeding the principal amount thereof plus accrued interest to such Sinking Fund Redemption Date; or (ii) receive a credit against its sinking fund redemption obligation for the applicable Series 2018A Bonds which prior to such date have been purchased by the Airports Authority and presented to the Trustee for cancellation or redeemed (other than through the operation of the sinking fund) and canceled by the Trustee and, in either

case, not theretofore applied as a credit against any sinking fund redemption obligation. Any such purchase in lieu of redemption (as described above) will occur no later than forty-five (45) days prior to the applicable Sinking Fund Redemption Date.

Each Series 2018A Bond so purchased, delivered or previously redeemed will be credited by the Trustee as provided above at 100% of the principal amount thereof against the obligation of the Airports Authority on such Sinking Fund Redemption Date. Any excess over such obligation will be credited, as directed in writing to the Trustee by an Authority Representative, against applicable future sinking fund redemption obligations, or deposits with respect thereto, and the principal amount of such Series 2018A Bonds to be redeemed by operation of the sinking fund will be accordingly reduced. Any funds received by the Trustee pursuant to clause (i) of the preceding paragraph, but not expended as provided therein for the purchase of Series 2018A Bonds on or before said 45th day will be retained in the applicable Redemption Account and will thereafter be used only for the purchase of the applicable Series 2018A Bonds, as a credit, as directed in writing to the Trustee by an Authority Representative, against future sinking fund obligations, or deposits with respect thereto.

Method of Selecting the Bonds for Redemption

In the event that less than all of the outstanding Series 2018A Bonds of a Series are to be redeemed, the maturities to be redeemed and the method of their selection will be determined by the Airports Authority. In the event that less than all of any Series 2018A Bonds of a maturity are to be redeemed, the Series 2018A Bonds of such maturity to be redeemed will be selected by lot in such manner as the Trustee determines.

Upon the selection and call for redemption of, and the surrender of, any Series 2018A Bonds for redemption in part only, the Airports Authority will cause to be executed, authenticated and delivered to or upon the written order of the Holder thereof, at the expense of the Airports Authority, a new bond or bonds in fully registered form, of authorized denominations and like tenor, in an aggregate face amount equal to the unredeemed portion of the Series 2018A Bonds of the applicable Series.

Notice of Redemption

Any notice of redemption of any Series 2018A Bonds must specify (a) the date fixed for redemption, (b) the principal amount of the Series 2018A Bonds or portions thereof to be redeemed, (c) the applicable redemption price, (d) the place or places of payment, (e) that payment of the principal amount and premium, if any, will be made upon presentation and surrender to the Trustee or Paying Agent, as applicable, of the Series 2018A Bonds to be redeemed, (f) that interest accrued to the date fixed for redemption will be paid as specified in such notice, (g) that on and after the redemption date, interest on the Series 2018A Bonds which have been redeemed will cease to accrue, and (h) the designation, including Series, and the CUSIP and serial numbers of any Series 2018A Bonds to be redeemed and, if less than the face amount of any Series 2018A Bond is to be redeemed, the principal amount to be redeemed.

Any notice of redemption will be sent by the Trustee not less than 30 nor more than 60 days prior to the date set for redemption by first class mail (a) at the address shown on the

Register, to the Holder of each Series 2018A Bond to be redeemed in whole or in part, (b) to all organizations registered with the SEC as securities depositories, (c) to the Municipal Securities Rulemaking Board, and (d) to at least two information services of national recognition which disseminate redemption information with respect to tax-exempt securities. Failure to give any notice specified in clause (a) of this paragraph, or any defect therein, will not affect the validity of any proceedings for the redemption of any Series 2018A Bonds with respect to which no such failure has occurred, and failure to give any notice specified in clause (b), (c) or (d) of this paragraph or any defect therein, will not affect the validity of any proceedings for the redemption of any Series 2018A Bonds with respect to which the notice specified in (a) is correctly given. Notwithstanding the foregoing, during any period that the securities depository or its nominee is the registered owner of the Series 2018A Bonds, notices will be sent to such securities depository or its nominee. During such period, the Trustee shall not be responsible for mailing notices of redemption to anyone other than such securities depository or its nominee.

If at the time of notice of any optional redemption of the Series 2018A Bonds there has not been deposited with the Trustee moneys available for payment pursuant to the Indenture and sufficient to redeem all of the Series 2018A Bonds called for redemption, the notice may state that it is conditional in that it is subject to the deposit of sufficient moneys by not later than the redemption date, and if the deposit is not timely made the notice shall be of no effect.

SECURITY AND SOURCE OF PAYMENT FOR THE BONDS

General

The Series 2018A Bonds are secured (i) on a parity with other Bonds issued by the Airports Authority under the Indenture by a pledge of Net Revenues derived by the Airports Authority from the operation of the Airports and (ii) by the Series 2018A Bond proceeds deposited in certain segregated funds held by the Trustee. Upon the issuance of the Series 2018A Bonds and the defeasance of the Refunded Bonds, approximately \$4.6 billion aggregate principal amount of Bonds will be Outstanding. In addition, the Airports Authority at any time can draw up to \$200 million of the Airport System Revenue Commercial Paper Notes, Series Two (“CP Notes”) under the credit facility it currently has in place. Credit facility repayments are on parity with payment of debt service on Bonds. See “AIRPORTS AUTHORITY INDEBTEDNESS FOR THE AVIATION ENTERPRISE FUND – Outstanding Bonds of the Airports Authority for the Aviation Enterprise Fund” and “– Commercial Paper Program for the Aviation Enterprise Fund.” The principal sources of Net Revenues are the rentals, fees and charges generated under the Airline Agreement between the Airports Authority and airlines that have executed the Airline Agreement (the “Signatory Airlines”), fees received from non-signatory airlines using the Airports and payments under concession contracts at the Airports.

No property of the Airports Authority is subject to any mortgage for the benefit of the owners of the Series 2018A Bonds. Under the Indenture, Net Revenues means Revenues, plus transfers, if any, from the General Purpose Fund to the Revenue Fund, after provision is made for the payment of Operation and Maintenance Expenses. See APPENDIX B – “Definitions and Summary of Certain Provisions of the Indenture.”

Revenues are generally defined in the Indenture as all revenues of the Airports Authority received or accrued except (a) interest income on, and any profit realized from, the investment of moneys in any fund or account to the extent that such income or profit is not transferred to, or retained in, the Revenue Fund or the Bond Fund; (b) interest income on, and any profit realized from, the investment of moneys in any fund or account funded from the proceeds of Special Facility Bonds; (c) amounts received by the Airports Authority from, or in connection with, Special Facilities unless such funds are treated as Revenues by the Airports Authority; (d) the proceeds of any passenger facility charge or similar charge levied by, or on behalf of, the Airports Authority, including PFCs, unless such funds are treated as Revenues by the Airports Authority; (e) grants-in-aid, donations, and/or bequests; (f) insurance proceeds which are not deemed to be revenues in accordance with generally accepted accounting principles; (g) the proceeds of any condemnation awards; (h) the proceeds of any sale of land, buildings or equipment; and (i) any other amounts which are not deemed to be revenues in accordance with generally accepted accounting principles or which are restricted as to their use. Unless otherwise provided in a supplemental indenture, there also shall be excluded from the term “Revenues” (a) any Hedge Termination Payments received by the Airports Authority and (b) any Released Revenues in respect of which the Airports Authority has filed with the Trustee the request of an Authority Representative, an Airport Consultant’s or an Authority Representative’s certificate, an Opinion of Bond Counsel and the other documents contemplated in the definition of the term “Released Revenues” set forth in the Indenture. The Airports Authority has completed the procedures necessary to treat the DTR Revenues as “Released Revenues” under the Indenture, thereby excluding DTR Revenues from Revenues and from the pledge and lien on the Net Revenues securing the Bonds. See “THE AIRPORTS AUTHORITY – Operation of the Dulles Toll Road and Construction of the Dulles Metrorail Project.”

Under the Indenture, Operation and Maintenance Expenses generally means all expenses of the Airports Authority paid or accrued for the operation, maintenance, administration and ordinary current repairs of the Airports. Operation and Maintenance Expenses do not include (a) the principal of, premium, if any, or interest payable on any Bonds, Subordinated Bonds and Junior Lien Obligations; (b) any allowance for amortization or depreciation of the Airports; (c) any other expense for which (or to the extent to which) the Airports Authority is or will be paid or reimbursed from or through any source that is not included or includable as Revenues; (d) any extraordinary items arising from the early extinguishment of debt; (e) rentals payable under the Federal Lease; and (f) any expense paid with amounts from the Emergency Repair and Rehabilitation Fund.

The Airports Authority is obligated to deposit all moneys from the Revenue Fund into the various funds and accounts created under the Indenture on a monthly basis. Amounts held by the Airports Authority in the Revenue Fund are not pledged to secure the Bonds. See “Flow of Funds” below.

The Series 2018A Bonds are secured by a pledge of and lien on certain proceeds of the sale of the Series 2018A Bonds and the earnings thereon, held in certain funds and accounts created under the Indenture. These funds and accounts include the Bond Fund and the applicable account in the Debt Service Reserve Fund, held by the Trustee, and the applicable account in the Construction Fund, if any, held by a custodian on behalf of the Trustee.

The Series 2018A Bonds shall not constitute a debt of the District of Columbia or of the Commonwealth of Virginia or any political subdivision thereof, nor a pledge of the faith and credit of the District of Columbia or of the Commonwealth of Virginia or any political subdivision thereof. Except to the extent payable from proceeds of the Series 2018A Bonds and investment earnings thereon, the Series 2018A Bonds shall be payable from Net Revenues of the Airports Authority pledged for such payment and certain funds established under the Indenture. The issuance of Bonds under the provisions of the Acts shall not directly, indirectly or contingently obligate the District of Columbia or the Commonwealth of Virginia or any political subdivision thereof to any form of taxation whatsoever. The Airports Authority has no taxing power.

Debt Service Reserve Fund

Under the Indenture, the Airports Authority has covenanted to deposit, or cause to be deposited at closing, amounts sufficient to maintain the Common Reserve Account (herein referred to as the “Common Reserve Account”) in the Debt Service Reserve Fund in an amount equal to the Common Debt Service Reserve Requirement for the Series 2018A Bonds and any other Common Reserve Bonds outstanding (the “Common Debt Service Reserve Requirement”). “Common Reserve Bonds” means any other Series of Bonds issued under the Indenture and designated in writing to the Trustee by an Authority Representative as being secured by amounts on deposit in the Common Reserve Account on a parity with the Series 2018A Bonds and any other Common Reserve Bonds. The Common Debt Service Reserve Requirement will be recalculated and funded in connection with such written designations. The Common Debt Service Reserve Requirement means an amount equal to the lesser of (i) 10% of the stated principal amount of the Series 2018A Bonds and any other Common Reserve Bonds; (ii) the Maximum Annual Debt Service on the Series 2018A Bonds and any other Common Reserve Bonds in any Fiscal Year; or (iii) 125% of the average Annual Debt Service for the Series 2018A Bonds and any other Common Reserve Bonds. After the issuance of the Series 2018A Bonds, the Common Debt Service Reserve Requirement will be \$212,291,849, and the term Common Reserve Bonds will include the following Series of outstanding Bonds of the Airports Authority: Series 2008A, Series 2009B, Series 2010A, Series 2010B, Series 2010F-1, Series 2011C, Series 2011D, Series 2012A, Series 2012B, Series 2013A, Series 2013B, Series 2013C, Series 2014A, Series 2016A, Series 2016B, Series 2017A and Series 2018A. The Series 2009C Refunded Bonds are currently secured by a series-specific reserve account. A portion of the amount in that series-specific reserve account pertaining to the Series 2009C Refunded Bonds will be transferred to the Common Reserve Account and will be used to satisfy a portion of the Common Debt Service Reserve Requirement allocable to the Series 2018A Bonds. See “Estimated Sources and Uses of Funds.”

Under conditions specified in the Indenture, the Airports Authority may fund the Debt Service Reserve Requirement for any Series of Bonds, including the Series 2018A Bonds, by delivering a letter of credit or other credit facility to the Trustee in substitution for, or in lieu of, moneys to be held in the Debt Service Reserve Fund for such Series. The Indenture requires that the provider of any such credit facility have a credit rating in one of the two highest rating categories by two Rating Agencies (as defined therein). In the event the Debt Service Reserve Requirement is satisfied with a letter of credit or other credit facility (rather than satisfying the requirement by a cash deposit), there will be no interest earnings on the account in the Debt

Service Reserve Fund for such Series of Bonds. See the description under the heading “Debt Service Reserve Fund Deposit” in APPENDIX B – “Definitions and Summary of Certain Provisions of the Indenture.” Currently, no portion of the Common Debt Service Reserve Requirement is funded with a credit facility.

The Trustee is required to draw on the Common Reserve Account in the Debt Service Reserve Fund whenever the amount held in the Interest Account or the Principal Account for Common Reserve Bonds is insufficient to pay interest on or principal of the Common Reserve Bonds on the date such payments are due. To the extent not needed to maintain the balance therein equal to the Common Debt Service Reserve Requirement, earnings on investments of the Common Reserve Account in the Debt Service Reserve Fund shall be transferred after each Bond Payment Date to the Revenue Fund.

If the amount on deposit in the Common Reserve Account in the Debt Service Reserve Fund at any time is less than the Common Debt Service Reserve Requirement, such deficiency is required to be made up as set forth in “SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – Flow of Funds.”

Rate Covenant

Pursuant to the Indenture, the Airports Authority has covenanted that it will take all lawful measures to fix and adjust from time to time the fees and other charges for the use of the Airports, including services rendered by the Airports Authority, pursuant to the Airline Agreement or otherwise, calculated to be at least sufficient to produce Net Revenues to provide for the larger of either:

(a) The amounts needed for making the required deposits in each fiscal year to the Principal Accounts, the Interest Accounts, and the Redemption Accounts, the Debt Service Reserve Fund, the Subordinated Bond Funds, the Subordinated Reserve Funds, the Junior Lien Obligations Fund, the Federal Lease Fund and the Emergency Repair and Rehabilitation Fund; or

(b) An amount not less than 125% of the Annual Debt Service with respect to Bonds for such fiscal year.

The Airports Authority has covenanted that if, upon the receipt of the audit report for a fiscal year, the Net Revenues in such fiscal year are less than the amount specified above, the Airports Authority will require the Airport Consultant to make recommendations as to the revision of the Airports Authority’s schedule of rentals, rates, fees and charges, and upon receiving such recommendations or giving reasonable opportunity for such recommendations to be made, the Airports Authority, on the basis of such recommendations and other available information, will take all lawful measures to revise the schedule of rentals, rates, fees and charges for the use of the Airports as may be necessary to produce the specified amount of Net Revenues in the fiscal year following the fiscal year covered by such audit report.

In the event that Net Revenues for any fiscal year are less than the amount specified, but the Airports Authority has promptly complied with these remedial requirements, there will be no Event of Default under the Indenture; provided, however, that if, after the Airports Authority has complied with these remedial requirements, Net Revenues remain insufficient to provide for the

specified amount in the fiscal year in which such adjustments are required to be made (as evidenced by the audit report for such fiscal year), such failure will be an Event of Default under the Indenture. See APPENDIX B – “Definitions and Summary of Certain Provisions of the Indenture – Rate Covenant and Defaults and Remedies.”

The Airline Agreement provides a mechanism for setting rentals, fees and charges for use by airlines of the Airports that is designed to ensure that the Airports Authority’s debt service and related obligations under the Indenture are met. Under the Airline Agreement, the Airports Authority sets its airline rentals, fees and charges at each Airport to recover its costs in the airline-supported cost centers. These costs include 100% of the debt service assigned to these cost centers, plus debt service coverage on such debt service in order to satisfy, with respect to that debt service, at least the 125% debt service coverage covenant included in the Indenture. In addition, under the Airline Agreement, if Net Revenues at an Airport in any Fiscal Year are projected to be less than 125% of the Annual Debt Service allocated to the Airport, then the Airports Authority can immediately adjust the rates on which airline rentals, fees and charges at the Airport are based in order to meet the 125% debt service coverage requirement at the Airport. These adjustments are referred to as “Extraordinary Coverage Protection Payments” under the Airline Agreement. The Airline Agreement will not be assigned or pledged to the Trustee as security for the Bonds. If for any reason the Airline Agreement is amended, expires or is terminated, the Airports Authority will set airline rentals, fees and charges in accordance with a successor agreement or regulations of the Board that are consistent with the Department of Transportation (“DOT”) requirements (including that such rentals, fees and charges be reasonable and non-discriminatory), and in an amount sufficient to meet the rate covenant under the Indenture. See APPENDIX C – “Summary of Certain Provisions of the Airport Use Agreement and Premises Lease” and “CERTAIN AGREEMENTS FOR USE OF THE AIRPORTS.”

Application of Designated Passenger Facility Charges

The Airports Authority has paid Annual Debt Service in certain fiscal years with Designated Passenger Facility Charges (as described below). Pursuant to its 2018 Budget, the Airports Authority intends to deposit \$43.6 million of Designated Passenger Facility Charges in 2018 into the PFC Project Account and then to transfer such charges into the PFC Debt Service Account to pay debt service on certain PFC Eligible Bonds (as defined below). For purposes of calculating compliance with the rate covenant for those prior fiscal years and for 2018, in accordance with the provisions described in the following paragraphs, Annual Debt Service has been, and for 2018 will be, reduced by the amount of such debt service paid from Designated Passenger Facility Charges. See APPENDIX B for detailed information regarding certain covenants and agreements that the Airports Authority has made with respect to the use of PFCs.

The definition of Revenues does not include, among other things, PFCs, except to the extent PFCs are designated as Revenues by the Airports Authority, which has not occurred to date. However, the definition of Annual Debt Service provides that in any computation relating to the issuance of additional Bonds under Section 213 of the Master Indenture or in any computation required by the rate covenant under Section 604 of the Master Indenture, there will be excluded from the computation of Annual Debt Service the principal of, and interest on, Bonds for which funds have been irrevocably committed to make such payments. Pursuant to

the Thirty-fifth Supplemental Indenture of Trust, dated as of July 1, 2009 (the “Thirty-fifth Supplemental Indenture”), the Airports Authority has in the past caused, and may in the future cause, certain amounts of Designated Passenger Facility Charges to be irrevocably committed for specified years to pay principal and/or interest on certain Bonds (“PFC Eligible Bonds”) issued to finance or refinance the Cost of certain Authority Facilities authorized to be financed with PFCs. By causing such irrevocable commitments of Designated Passenger Facility Charges in specified years, the Airports Authority is able to reduce the amount of Annual Debt Service payable in such years for purposes of the additional bonds test and the rate covenant.

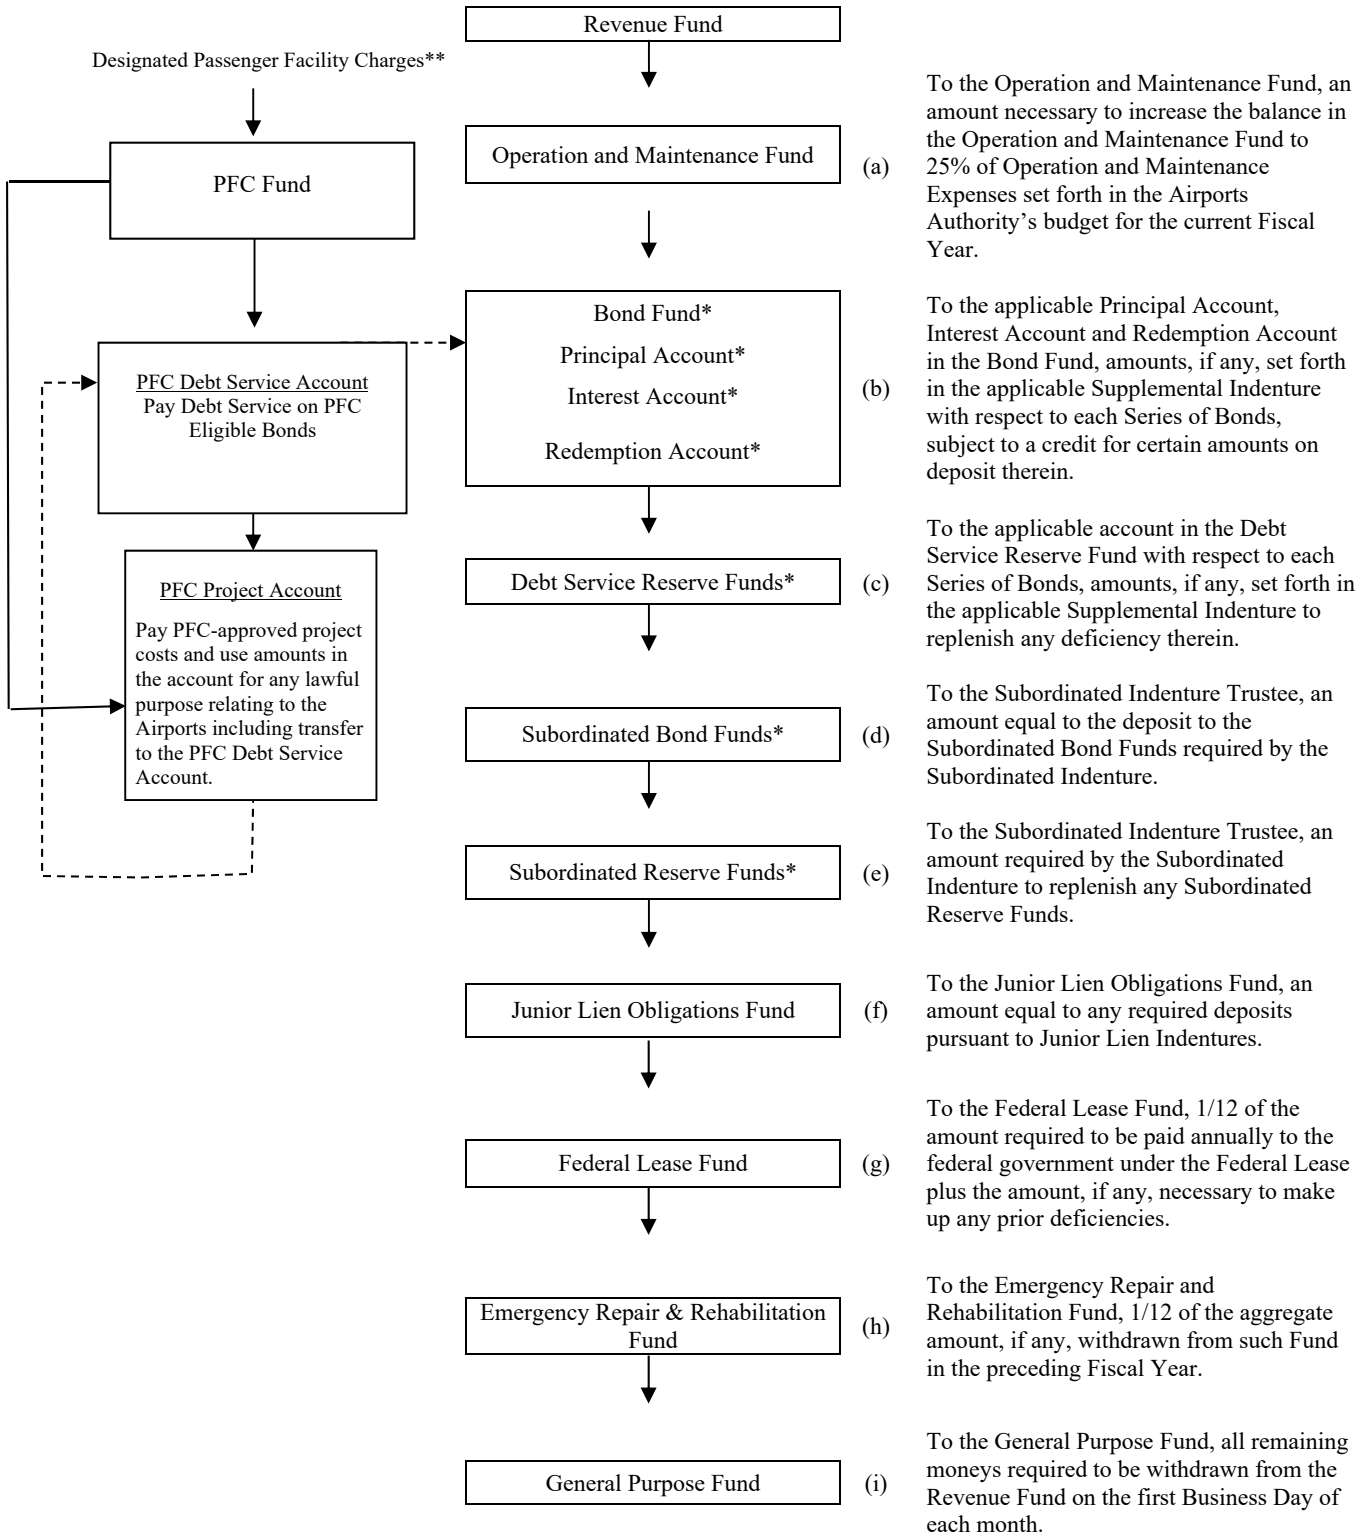

The term “Designated Passenger Facility Charges” is defined in the Thirty-fifth Supplemental Indenture to mean revenues received by the Airports Authority from the \$4.50 passenger facility charge imposed by the Airports Authority at Dulles International Airport under certain PFC applications, net of amounts that collecting air carriers are entitled to retain for collecting, handling and remitting PFC revenues. Currently, the Designated Passenger Facility Charges include all PFCs collected at Dulles International Airport. The Thirty-fifth Supplemental Indenture provides that it may be amended, without the consent of the Holders of the Outstanding Bonds, for purposes of making changes relating to the definition of Designated Passenger Facility Charges or the amounts of or Fiscal Years in which Designated Passenger Facility Charges are irrevocably committed to pay debt service on PFC Eligible Bonds, including a reduction of the amount of Designated Passenger Facility Charges, so long as such amendment is not reasonably expected to prevent the Airports Authority from complying with the rate covenant in the Master Indenture.

Under the Thirty-fifth Supplemental Indenture, any Designated Passenger Facility Charges received by the Airports Authority after 2016 are to be deposited in the PFC Project Account of the PFC Fund. Amounts on deposit in the PFC Project Account may be applied by the Airports Authority to any lawful purpose including (i) providing for the payment of the Cost of certain Authority Facilities authorized to be financed with PFCs, and/or (ii) transferring funds to the PFC Debt Service Account to pay principal and/or interest on PFC Eligible Bonds not otherwise paid, at which time they are irrevocably committed for such purpose. In 2018 and continuing through 2023, the Airports Authority intends to transfer Designated Passenger Facility Charges to the PFC Debt Service Account to pay principal and/or interest on such Bonds. See the column entitled “Currently Approved IAD” in the Forecast Debt Service Coverage table in the Summary Statement.

Flow of Funds

The Airports Authority is required to deposit all Revenues upon receipt, and may deposit amounts from any available source, in the Revenue Fund. On the first Business Day of each month, (1) amounts in the Revenue Fund, excluding any transfers from the General Purpose Fund during the current fiscal year, and (2) 1/12 of the amount of any transfers from the General Purpose Fund during the current fiscal year, are to be withdrawn from the Revenue Fund and deposited or transferred in the following amounts and order of priority:

FLOW OF FUNDS UNDER THE INDENTURE

* Funds or Accounts held by the Trustee.

** See "Application of Designated Passenger Facility Charges" above.

Amounts in the Revenue Fund are not pledged to secure the Bonds. Amounts in the Operation and Maintenance Fund are required to be used by the Airports Authority to pay Operation and Maintenance Expenses and are not pledged to secure the Bonds. Amounts transferred to the Subordinated Indenture Trustee, if any, will be pledged to secure the Subordinated Bonds, if any, and will not be subject to the pledge securing the Bonds. Amounts in the Junior Lien Obligations Fund secure the Junior Lien Obligations and are not pledged to secure the Bonds. Amounts deposited in the Federal Lease Fund are not and will not be pledged to secure the Bonds. Amounts in the Emergency Repair and Rehabilitation Fund may be used by the Airports Authority to pay the costs of emergency repairs and replacements to the Airports and are not pledged to secure the Bonds. Amounts in the General Purpose Fund will be available for use by the Airports Authority for any lawful purpose and are not pledged to secure the Bonds.

Additional Bonds

The Airports Authority has issued, and expects to issue in the future, additional Bonds. See “PLAN OF FUNDING FOR THE CCP” and APPENDIX B – “Definitions and Summary of Certain Provisions of the Indenture.”

Under the Indenture, the Airports Authority is permitted to issue one or more Series of additional Bonds on a parity with the outstanding Bonds, if:

The Airports Authority has provided to the Trustee the following evidence indicating that, as of the date of issuance of such additional Bonds, the Airports Authority is in compliance with the rate covenant as evidenced by: (a) the Airports Authority’s most recent audited financial statements, and the Airports Authority’s unaudited statements for the period, if any, from the date of such audited statements through the most recently completed fiscal quarter, and (b) if applicable, evidence of compliance with the Indenture’s requirement of remedial action (discussed under “Rate Covenant” above); and (c) either:

(i) an Airport Consultant has provided to the Trustee a certificate stating that, based upon reasonable assumptions, projected Net Revenues will be sufficient to satisfy the rate covenant (disregarding any Bonds that have been or will be paid or discharged immediately after the issuance of the additional Bonds proposed to be issued) for each of the next three full fiscal years following issuance of the additional Bonds, or each full fiscal year from issuance of the additional Bonds through two full fiscal years following completion of the Projects financed by the additional Bonds proposed to be issued, whichever is later; provided that, if Maximum Annual Debt Service with respect to all Bonds to be outstanding following the issuance of the proposed Bonds in any fiscal year is greater than 110% of Annual Debt Service for such Bonds in any of the test years, then the last fiscal year of the test must use such Maximum Annual Debt Service; provided further, that if capitalized interest on any Bonds and proposed additional Bonds is to be applied in the last fiscal year of the period described in this sentence, the Airport Consultant must extend the test through the first full fiscal year for which there is no longer capitalized interest, or

(ii) an Authority Representative has provided to the Trustee a certificate stating that Net Revenues in the most recently completed fiscal year were not less than the larger

of (1) the amounts needed for making the required deposits to the Principal Accounts, the Interest Accounts, and the Redemption Accounts in the Bond Fund, the Debt Service Reserve Fund, the Subordinated Bond Fund, the Subordinated Reserve Fund, the Junior Lien Obligations Fund, the Federal Lease Fund, and the Emergency Repair and Rehabilitation Fund or (2) 125% of (a) Annual Debt Service on Bonds Outstanding in such fiscal year (disregarding any Bonds that have been paid or discharged, or will be paid or discharged immediately after the issuance of such additional Bonds proposed to be issued), plus (b) Maximum Annual Debt Service with respect to such additional Bonds proposed to be issued.

With respect to additional Bonds proposed to be issued to refund outstanding Bonds, the Airports Authority may issue such refunding Bonds if either the test described in clause (c) above is met, or if the Airports Authority has provided to the Trustee evidence that (a) the aggregate Annual Debt Service in each fiscal year with respect to all Bonds to be outstanding after issuance of such refunding Bonds will be less than the aggregate Annual Debt Service in each such fiscal year through the last fiscal year in which Bonds are outstanding prior to the issuance of such refunding Bonds, and (b) the Maximum Annual Debt Service with respect to all Bonds to be outstanding after issuance of such refunding Bonds will not exceed the Maximum Annual Debt Service with respect to all Bonds outstanding immediately prior to such issuance.

Other Indebtedness

In addition to financing the CCP with the proceeds of Bonds, the Airports Authority is authorized under the Indenture to issue other debt to finance its capital needs. The Indenture permits the Airports Authority at any time to issue (a) bonds, notes or other obligations payable from and secured by revenues other than Revenues and Net Revenues, including, but not limited to, Special Facility Bonds, and (b) bonds, notes or other obligations payable from Net Revenues, including revenue anticipation notes, on a basis subordinate to the Bonds, including Subordinated Bonds. For a more detailed discussion on the Airports Authority's Subordinated Bonds, the commercial paper program, interest rate swaps, and Special Facility Bonds, see "AIRPORTS AUTHORITY INDEBTEDNESS FOR THE AVIATION ENTERPRISE FUND."

Events of Default and Remedies; No Acceleration or Cross Defaults

"Events of Default" and related remedies under the Indenture are described in the summary of certain provisions of the Indenture attached as APPENDIX B, in particular in the section "Defaults and Remedies." The occurrence of an Event of Default does not grant any right to accelerate payment of the Series 2018A Bonds to either the Trustee or the Holders of any Bonds. An Event of Default with respect to one Series of Bonds will not be an Event of Default with respect to any other Series unless such event or condition on its own constitutes an Event of Default with respect to such other Series. The Trustee is authorized to take certain actions upon the occurrence of an Event of Default, including initiating proceedings to enforce the obligations of the Airports Authority under the Indenture. Since (a) Net Revenues are Revenues net of all amounts needed to pay Operation and Maintenance Expenses, and (b) the Airports Authority is not subject to involuntary bankruptcy proceedings, the Airports Authority may continue collecting Revenues and applying them to the operation of the Airports, even if an Event of Default has occurred and no payments are being made on the Series 2018A Bonds.

ESTIMATED SOURCES AND USES OF FUNDS

The following table sets forth the estimated sources and uses of the proceeds of the Series 2018A Bonds and other available funds of the Airports Authority.

SOURCES:	
Par Amount of Bonds	\$558,430,000
Original Issue Premium	85,873,864
Airports Authority Funds ¹	<u>24,662,987</u>
Total Sources ²	<u>\$668,966,851</u>
 USES:	
Deposit to Construction Fund	\$199,518,849
Capitalized Interest ³	21,451,000
Deposits to Redeem the Refunded Bonds	422,799,524
Deposit to Common Reserve Account	22,153,270
Underwriters' Discount and Costs of Issuance	<u>3,044,208</u>
Total Uses ²	<u>\$668,966,851</u>

¹ Amounts released from the debt service accounts for the Refunded Bonds and the series-specific reserve fund for the Series 2009C Refunded Bonds.

² Totals may not add due to rounding.

³ Includes capitalized interest payable on other Bonds of the Airports Authority allocable to facilities not yet placed in service.

On the closing date, \$11,426,348 will be transferred from the series-specific reserve account for the Series 2009C Refunded Bonds to the Common Debt Service Reserve Account to satisfy a portion of the Common Debt Service Reserve Requirement allocable to the Series 2018A Bonds.

Refinancing Plan

A portion of the proceeds of the Series 2018A Bonds will be deposited into separate Redemption Accounts held by the Trustee to redeem the Refunded Bonds on the applicable redemption dates. Pursuant to separate Refunding Agreements, each dated as of July 1, 2018 (the "Refunding Agreements"), relating to each Series of the Refunded Bonds, the Trustee will use the amounts deposited in the applicable Redemption Account, together with other funds of the Airports Authority, to pay the redemption price and accrued interest on each Series of the Refunded Bonds on the redemption date. The sufficiency of such amounts will be verified by Robert Thomas CPA, LLC, as verification agent. A schedule of the Refunded Bonds is included in APPENDIX G.

DEBT SERVICE SCHEDULE

The following table sets forth (i) the debt service on the Series 2018A Bonds, (ii) the debt service on approximately \$3.8 billion of fixed rate Bonds to be outstanding immediately following the issuance of the Series 2018A Bonds and the defeasance of the Refunded Bonds, and (iii) the assumed debt service on outstanding variable rate debt consisting of approximately \$53.8 million of the outstanding Series 2003D Bonds, approximately \$116.8 million of the outstanding Series 2009D Bonds, approximately \$145.5 million of the outstanding Series 2010C

Bonds, approximately \$148.8 million of the outstanding Series 2010D Bonds, approximately \$180.0 million of the outstanding Series 2011A Bonds, approximately \$133.7 million of the outstanding Series 2011B Bonds, and \$200 million of the CP Notes, which is the maximum amount of the CP Notes available to be drawn by the Airports Authority under the credit facility it currently has in place.

Bond Year ending October 1	Series 2018A		Outstanding Bonds Debt Service*	Debt Service on Maximum Available CP Notes**	Total Debt Service
	Principal	Interest			
2018	-	\$ 6,825,256	\$ 397,956,306	\$ 1,955,556	\$ 406,737,117
2019	\$ 5,520,000	27,921,500	348,583,301	11,566,020	393,590,821

THE AIRPORTS AUTHORITY'S FACILITIES AND MASTER PLAN

Facilities at Reagan National Airport and Dulles International Airport

Reagan National Airport

Reagan National Airport's ability to accommodate increased aviation activity is constrained to a significant extent by the High Density Rule and its physical location. Its proximity to Washington, D.C. also makes operations at Reagan National Airport subject to particularly restrictive federal legislation and regulation. See "THE AIRPORTS AUTHORITY – Regulations and Restrictions Affecting the Airports" and "CERTAIN INVESTMENT CONSIDERATIONS."

Reagan National Airport has two terminals that are interconnected through the National Hall. National Hall is currently located pre-security screening. Terminal A is listed on the National Register of Historic Places and has nine aircraft gates. Terminal B/C has 35 aircraft gates on three concourses and approximately one million square feet of floor space spread over three levels. There are three runways at Reagan National Airport: 1/19 – 7,169 feet; 15/33 - 5,204 feet; and 4/22 – 5,000 feet. Runway 1/19 and associated taxiways are capable of handling aircraft up to FAA Airplane Design Group IV, such as a B-767 aircraft. Runways 4/22 and 15/33 and associated taxiways are capable of handling aircraft up to Group III, such as the A-320 or B-737 aircraft.

Ground transportation to Reagan National Airport is provided via Metrorail service, taxi, transportation network companies (such as Uber and Lyft), shared van services, which are provided by concessionaires and limousines, and on-campus bus transportation provided by the Airports Authority. Metrorail service to Reagan National Airport connects directly to Terminal B/C.

There are 9,094 public parking spaces at Reagan National Airport, with 6,408 garage spaces (including eight electric car charging stations), 2,653 surface spaces and 33 cell phone waiting area spaces. Terminal B/C is connected to the public parking garages through two enclosed pedestrian bridges. In addition, there are approximately 3,200 employee surface parking spaces.

Dulles International Airport

Dulles International Airport has a main terminal (the "Main Terminal") and four midfield concourses (Concourses A, B, C and D) that may be reached via an Automated People Mover ("AeroTrain") system or mobile lounges that transport passengers to and from the Main Terminal. The Main Terminal is eligible for listing on the National Register of Historic Places. There are four runways at Dulles International Airport: 1C/19C - 11,500 feet; 1R/19L - 11,500 feet; 12/30 - 10,500 feet; and 1L/19R - 9,400 feet. The runways and associated taxiways are capable of handling aircraft up to Group VI, such as an A-380 aircraft.

The Main Terminal at Dulles International Airport has a total of 1.3 million square feet of floor space, four loading bridge-equipped aircraft gates, referred to as the Z Gates, and the International Arrivals Building with a total floor space of nearly 268,000 square feet that

provides customs, agriculture and immigration service facilities and can serve up to 2,400 passengers an hour. Concourses A and B are connected and together provide approximately 1.1 million square feet of floor space, and accommodate parking positions for 29 regional airline aircraft and 32 loading bridge-equipped aircraft gates for international and domestic airlines.

Concourses C and D were constructed as separate buildings, but as passenger demand increased, more gates were constructed at both concourses and the two concourses eventually were joined. They now have a combined total of 900,000 square feet of floor space and 46 loading bridge-equipped aircraft gates for both international and domestic airlines.

Dulles International Airport has two gates that support the boarding and unloading of passengers from the upper and lower decks of the A-380 aircraft. The current runway/taxiway system operates under several FAA-approved Modification of Standards for Group VI aircraft. Group VI aircraft have specific operational requirements and routes that are approved by the FAA. As pavement along these routes is rehabilitated it is required to be brought up to Group VI standards.

Ground transportation to Dulles International Airport is provided via taxi, transportation network companies (such as Uber and Lyft), shared van services, which are provided by concessionaires and limousines, and bus transportation provided by the Airports Authority and WMATA. Metrorail service to Dulles International Airport from the Washington, D.C. metropolitan area is anticipated to become operational in 2020 following completion of Phase 2 of the Dulles Metrorail Project. See “THE AIRPORTS AUTHORITY – Operation of the Dulles Toll Road and Construction of the Dulles Metrorail Project.”

There are 23,673 public parking spaces at Dulles International Airport, with 15,151 surface spaces (including 173 for-hire vehicle spaces), 8,325 garage spaces (including eight electric car charging stations), and 197 cell phone waiting area spaces. In addition, there are approximately 6,800 employee surface parking spaces.

There are six cargo buildings at Dulles International Airport, with a total of 555,000 square feet of cargo space.

United Airlines maintains an aircraft maintenance hangar of sufficient size to accommodate two B-767 aircraft or a single B-787 or A-350 aircraft on land it leases from the Airports Authority.

The Smithsonian operates the National Air and Space Museum Dulles Steven F. Udvar-Hazy Center (the “Center”) at the Airport. The Airports Authority has title to, and is required to maintain, two roadways that were built by the Smithsonian and must allow Center patrons and invitees ingress to and egress from the Center.

The Airports Authority’s Master Plans

The Master Plan for each Airport establishes the framework for the CCP and may be amended from time to time by the Airports Authority. The Master Plans adopted by the Airports Authority’s Board include the Airports’ Land Use Plans and the Airport Layout Plans (the “ALPs”). The ALPs have been approved by the FAA, and any future amendments to the ALPs

also must be approved by the FAA. The ALPs are required by the FAA to show all existing and proposed improvements. All major improvements to the Airports are developed in accordance with the Master Plan for each Airport and the approved ALPs.

Reagan National Airport

The Master Plan for Reagan National Airport became effective on April 15, 1988, and has been amended from time to time. Major improvements included in the 2015-2024 CCP will accommodate changes in airline operations and enhance the level of service for passengers. These improvements include: a new North Concourse; moving security checkpoints to make National Hall a secure area; utility and infrastructure improvements including boiler/chiller plant upgrades, sanitary sewer system upgrades and airfield electric vault improvements and relocation; R/W 1 hold apron expansion; Pad B hold apron expansion; and additional economy parking.

Dulles International Airport

The Master Plan for Dulles International Airport was adopted and approved by the FAA prior to the Lease Effective Date and includes, by reference, the ALPs. The Master Plan for Dulles International Airport includes: the future construction of a fifth runway, permanent midfield concourses and an expansion of the AeroTrain system; future Metrorail along a right-of-way in the Dulles International Airport Access Highway corridor; expansion of automobile parking facilities; construction of additional roads on Airport land; and expansion of the capacity of the existing roads. The Master Plan for Dulles International Airport also includes potential future development of areas on the western side of Dulles International Airport called the Western Lands Area and Airport Support Zone. Improvements to these areas would include cargo, general aviation, airport support facilities and commercial/industrial non-aeronautical improvements. The Airports Authority is actively searching for opportunities to develop the Western Lands Area. Additionally, the north Terminal Area has been evaluated for potential commercial development including hotel and retail uses.

CAPITAL CONSTRUCTION PROGRAMS (CCP)

The Airports Authority's 2015-2024 CCP was approved as part of the current Airline Agreement as amended by the First Universal Amendment. Under the CCP, the Airports Authority is constructing and will continue to construct many of the principal elements of the Reagan National Airport and Dulles International Airport Master Plans, which are necessary for the operation and development of the Airports, and has renovated and will renovate certain existing facilities. See "THE AIRPORTS AUTHORITY'S FACILITIES AND MASTER PLANS."

The 2001-2016 CCP

The 2001-2016 CCP was an approximately \$5.0 billion program which included approximately \$544.3 million of projects at Reagan National Airport and approximately \$4.5 billion of projects at Dulles International Airport. The only remaining project from the 2001-2016 CCP that is still under construction is the Dulles International Airport Metrorail station, which is expected to be finished and operational in 2020. The Dulles International Airport

Metrorail station project is expected to cost approximately \$233.0 million upon final completion. The remaining cost of the project will be paid from PFC revenues.

The 2015-2024 CCP

Overview

The 2015-2024 CCP provides for planning, design, and construction of certain facilities at Reagan National Airport and Dulles International Airport that are included in the Master Plan.

The 2015-2024 CCP includes the following project categories:

Summary of the 2015-2024 CCP¹

Description	Reagan National Airport Project Costs	Dulles International Airport Project Costs	Total Project Costs ²
Airfield	\$ 125,466,844	\$198,790,528	\$ 324,257,371
Airport Buildings	854,624,898	222,146,162	1,076,771,061
Systems & Services	50,611,738	55,995,546	106,607,284
Ground Transportation	114,933,365	39,064,308	153,997,674
Non-aviation	0	9,409,948	9,409,948
Passenger Conveyance	0	76,823,125	76,823,125
Maintenance	0	1,803,084	1,803,084
Public Safety	9,182,125	5,847,399	15,029,525
Administration	69,835,448	42,370,684	112,206,131
TOTAL³	\$1,224,654,418	\$652,250,785	\$1,876,905,202

¹ The costs presented in this table represent expenditures to date and inflation of future expenditures at 3.0% per annum.

² Totals may not add due to rounding.

³ Totals do not include costs of Deferred Projects.

Source: Airports Authority records.

2015-2024 CCP Projects at Reagan National Airport

The 2015-2024 CCP includes projects at Reagan National Airport estimated to cost approximately \$1.2 billion. The major work focuses on terminal/concourse development along with airfield, parking and utilities infrastructure. Projects include the design and construction of a new North Concourse and various related enabling projects; Terminal B/C redevelopment to secure National Hall as a post-security area, together with enabling projects; and preliminary planning and design to potentially rehabilitate, expand or replace Terminal A. The authorization also includes various airfield, roadway, utility and other ancillary support projects and construction of a multi-level parking garage. Portions of the 2015-2024 CCP at Reagan National Airport are referred to by the Airports Authority as “Project Journey.” The 2015-2024 CCP also includes \$10 million for the costs associated with a Live Fire Training Facility at Dulles International Airport, the costs of which are allocated equally to each Airport.

The following is a brief summary of 2015-2024 CCP projects estimated to cost \$50 million or more:

Secure National Hall. Terminal B/C will be improved to convert National Hall into a post-security area. Security screening check points are currently being constructed in the north

and south areas of the Terminal. This project will allow connecting passengers to flow freely between the Terminal's three concourses. Additionally, more food/beverage and other concessions will be available to post-security passengers.

New North Concourse. A new concourse is currently being constructed north of existing Terminal C to replace the hardstand parking positions used by regional airline aircraft adjacent to Hangars 11 & 12. The pier-concourse, similar in architecture to existing concourses, will accommodate no more than 14 gates. Additionally, certain enabling projects are required such as demolition of the Corporate Office Building, Hangar 11 and Hangar 12, tenant relocations, utility plant upgrades and special systems infrastructure.

Terminal A - Planning/Programming/Schematic Design, Enabling Projects. Planning and programming efforts are required in advance of Terminal A redevelopment. This includes design efforts for enabling projects including additional restrooms, terminal interim general rehabilitation, baggage improvements, ticket counter relocation, improved gates and boarding bridges, banjo modifications, utility/HVAC modifications, and asbestos abatement.

Parking Garage. A new multi-level economy parking garage with approximately 1,600 spaces will be constructed. The project also includes major utility relocations, soil remediation and stormwater management.

Hold Apron 1 Expansion/Hold Apron Pad B Expansion/Airfield Electric Vault Relocation/Airfield Pavement Rehabilitation. The hold aprons will be expanded to accommodate additional aircraft for departure holds and sequencing, parking, circulation and winter deicing operations. The electric vault will be relocated to accommodate the apron expansion. Additionally, various portions of the airfield-wide pavements need to be reconstructed due to deterioration from traffic and weathering effects.

2015-2024 CCP Projects at Dulles International Airport

The 2015-2024 CCP authorizes projects at Dulles International Airport estimated to cost approximately \$652.3 million. The Airline Agreement initially approved \$142 million for 2015-2017 to provide for maintenance investment in existing infrastructure. The First Universal Amendment added \$445.6 million for terminal improvements including utility upgrades to Concourse C/D, capacity enhancements to the International Arrivals Building, baggage handling improvements, existing aircraft gates to accommodate additional international service, construction of additional domestic gates, airfield pavement, passenger conveyance systems, airport-wide utility systems, roads and other support projects. Each approved amount is escalated annually in accordance with the terms of the Airline Agreement and the First Universal Amendment.

The following is a brief summary of significant 2015-2024 CCP projects at Dulles International Airport:

Access Highway Improvements. Significant portions of the access highway will be overlaid and/or reconstructed due to deterioration from weather and traffic.

Concourse C/D Rehabilitation. The concourse will be improved to maintain and/or increase operational efficiencies, including electrical and utility upgrades, apron rehabilitation and equipment replacement.

Aircraft Gate Expansion. Up to six additional gates will be constructed to accommodate additional aircraft.

Airfield Pavement Panel Replacement. Various parts of the airfield pavements will be reconstructed due to deterioration caused by traffic and weather.

AeroTrain Maintenance Cycle. Periodic major overall maintenance of the cars (brakes, tires, drive systems, etc.) will be performed, as required by the original equipment manufacturer.

2015-2024 CCP Deferred Projects

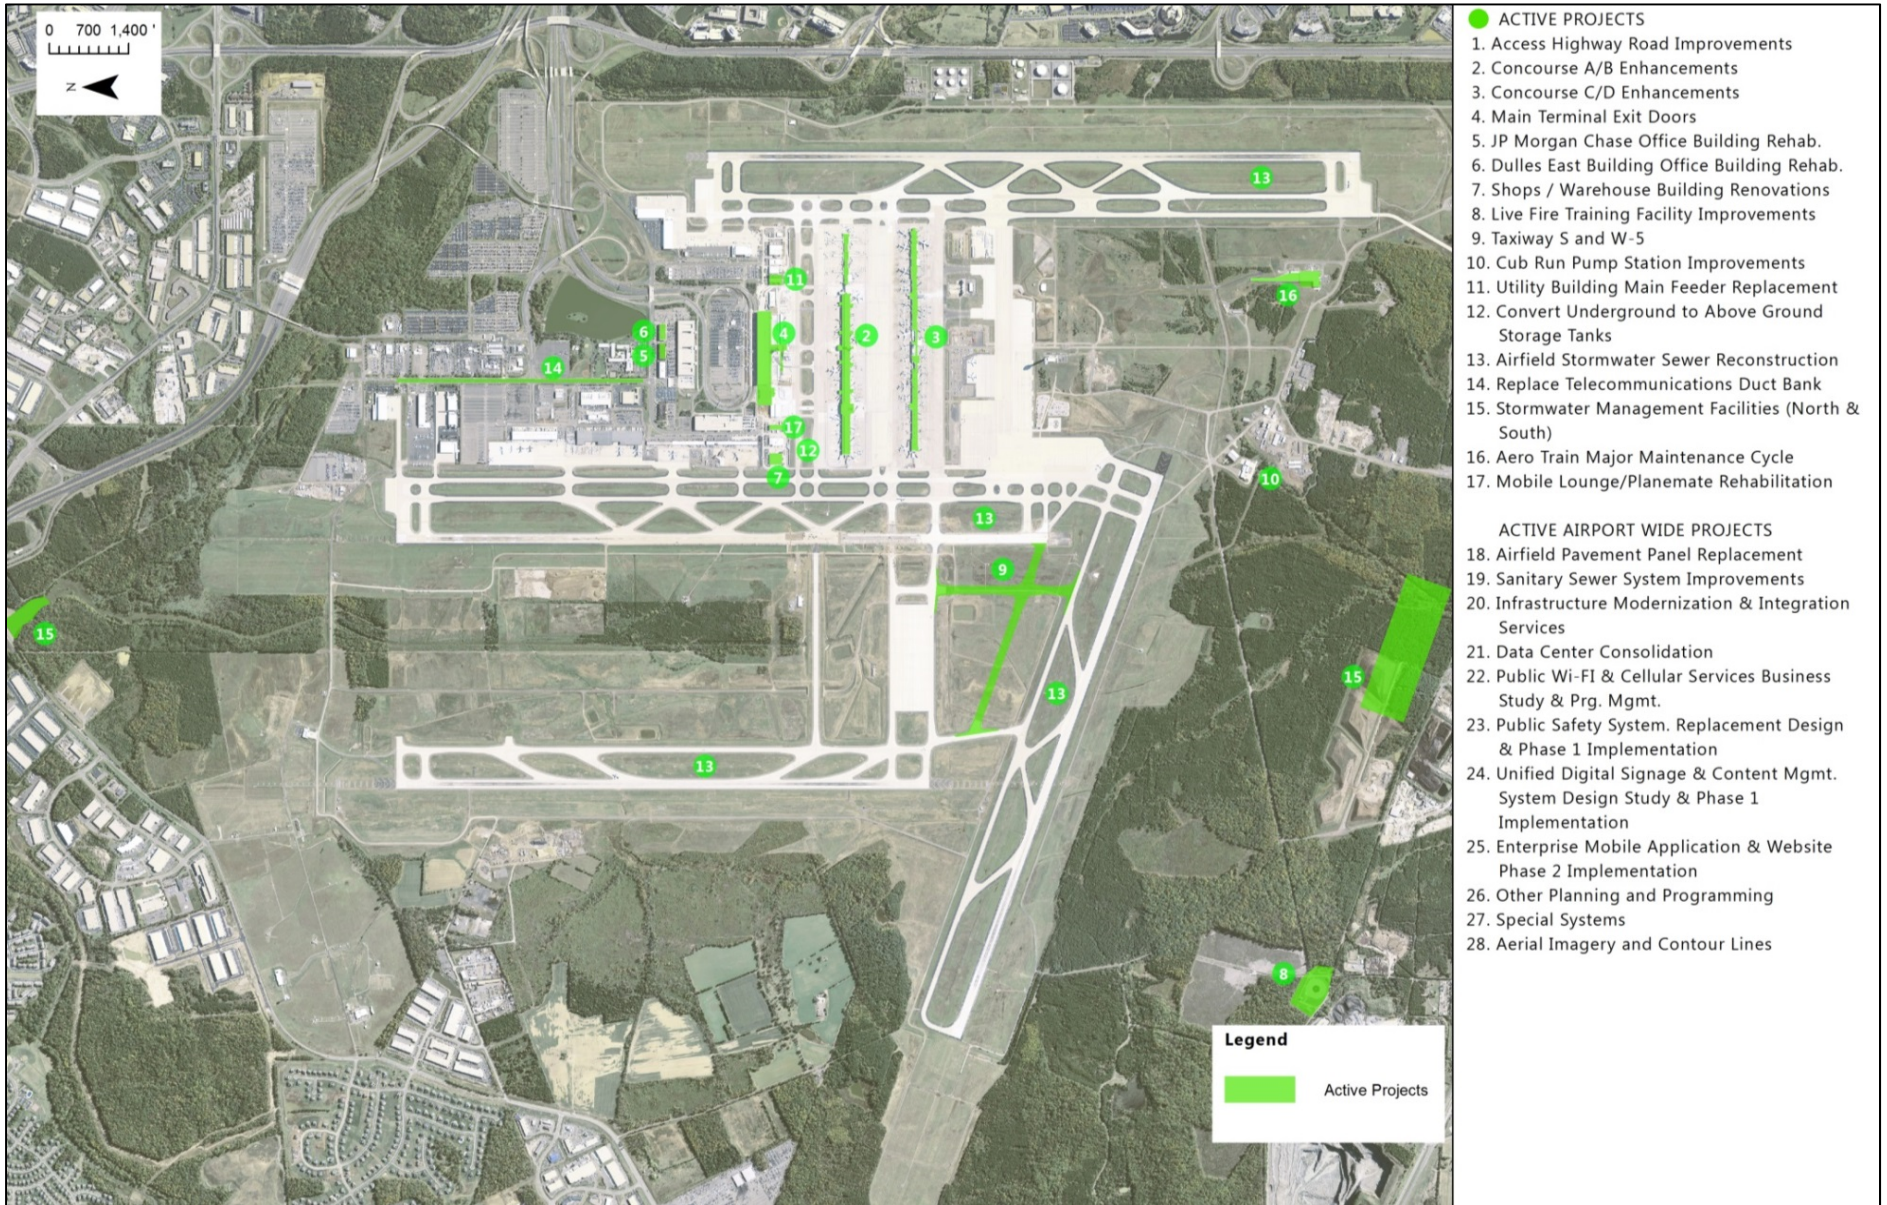

Due to a number of factors, including economic conditions, increases in the cost of aviation fuel and their impact on the financial condition of airlines, in September 2008, the Airports Authority deferred certain projects then part of the 2001-2016 CCP (the “Deferred Projects”). The Deferred Projects were incorporated as part of the 2015-2024 CCP that was approved by the Signatory Airlines as part of the current Airline Agreement; however, the cost of the Deferred Projects is not included in the cost of the 2015-2024 CCP. While the Airports Authority does not currently have plans to move forward with the Deferred Projects, design work may continue to ensure compatibility with ongoing CCP projects and to permit construction of the Deferred Projects to proceed as soon as the Airports Authority determines that activity levels warrant their activation. The Deferred Projects include planned new concourses south of the existing concourses, referred to as the Tier 2 and Tier 3 Concourses, an expanded AeroTrain system, a pedestrian tunnel extension, a southern utility service expansion, a consolidated rental car facility, and a new taxiway, all at Dulles International Airport.

[Remainder of page intentionally left blank.]

Capital Construction Projects at Reagan National Airport 2015-2024 CCP

Capital Construction Projects at Dulles International Airport 2015-2024 CCP

Environmental Approvals for the CCP

Portions of the 2015-2024 CCP will require approval by the FAA in order to update the ALPs or use federal grant funds, and are subject to environmental review and approval as required by the National Environmental Policy Act (“NEPA”). The nature of the review depends on the potential for a project or a group of interrelated projects to produce a significant impact on the natural or human environment. The three levels of NEPA review are categorical exclusions, environmental assessments and environmental impact statements (“EIS”).

A categorical exclusion is a determination by the FAA that the action or project falls into a category of actions that the FAA has identified, based on its experience, as having minimal likelihood of causing a significant environmental impact. Examples include replacement of airfield paving and extension of a taxiway. No additional environmental consideration is required for a project that falls within this category unless there are extraordinary circumstances that would cause the project to be reviewed further.

An environmental assessment is a formal, detailed evaluation of environmental conditions to determine whether a proposed action is likely to have a significant environmental impact. It involves a consideration of alternative actions and the process includes an opportunity for public review and comment. The two outcomes of an environmental assessment are a Finding of No Significant Impact (“FONSI”) or a decision that an EIS is required.

An EIS is prepared by the FAA when there is a federal action with a potentially significant impact on the environment. Public involvement is required to determine the scope of the environmental review and the issues and alternatives to be addressed. A draft EIS is published for public review and comment, including a public hearing. The FAA then prepares a final EIS and eventually makes a decision on the project.

NEPA documentation was completed for the New North Concourse and Secure National Hall projects at Reagan National Airport, with the FAA issuing a FONSI on November 9, 2016. Other planned improvements at Reagan National Airport, such as roadway improvements and a parking garage, also will require an environmental assessment and FONSI prior to approval by the FAA. Other smaller projects in the 2015-2024 CCP at Reagan National Airport likely will qualify for categorical exclusions.

None of the 2015-2024 CCP projects at Dulles International Airport (excluding any Deferred Projects) is expected to result in any significant environmental impact and therefore all are expected to qualify for categorical exclusions. However, it is possible that the FAA will determine that some of the terminal improvement or gate expansion projects would require an environmental assessment and FONSI prior to being approved.

PLAN OF FUNDING FOR THE CCP

The cost of the projects in the 2015-2024 CCP (excluding any Deferred Projects) is expected to be approximately \$1.9 billion when adjusted for inflation. The Airports Authority plans to finance the 2015-2024 CCP projects with the proceeds of Bonds (including a portion of the proceeds of the Series 2018A Bonds, as set forth below), CP Notes, federal and state grants,

PFCs and other available Airports Authority funds. The following table sets forth estimated funding sources for the 2015-2024 CCP.

2015-2024 CCP Estimated Sources of Funding	
Proceeds from Prior Bonds ¹	\$ 422,219,651
Proceeds from Series 2018A Bonds	192,128,508
Future Bonds ¹	<u>1,095,327,850</u>
Subtotal from Bonds	\$ 1,709,676,009
Federal and State Grants	<u>\$ 167,229,193</u>
Total	<u>\$ 1,876,905,202</u>

¹ Includes assumed interest earnings on construction fund deposits.
Source: Airports Authority records.

Funding Source: Bond Proceeds

The Series 2018A Bonds are expected to be issued to pay approximately \$192.1 million of 2015-2024 CCP project costs (adjusted for inflation). The Airports Authority previously issued Bonds to fund approximately \$422.2 million of the 2015-2024 CCP, along with funding capitalized interest, reserve requirements and financing costs. After the issuance of the Series 2018A Bonds, additional Bonds of approximately \$1.4 billion are expected to be issued to fund approximately \$1.1 billion of project costs to complete the 2015-2024 CCP (adjusted for inflation), excluding reserve requirements, capitalized interest and financing costs.

Funding Source: Federal and State Grants

The FAA’s Airport Improvement Program (“AIP”) consists of entitlement funds and discretionary funds. Entitlement funds are distributed through grants by a formula currently based on the number of enplanements and the amount of landed weight of arriving cargo at individual airports. Discretionary funds are distributed based on the FAA’s assessment of national priorities. A letter of intent (“LOI”) represents the FAA’s intention to obligate funds from future federal appropriations for the program. The AIP has been authorized through September 30, 2017. Between January 2001 and September 2017, the Airports Authority received approximately \$531.9 million in entitlement and discretionary grant funds.

The Commonwealth of Virginia, through the aviation portion of its Transportation Trust Fund, provides grants to Virginia airport operators on an annual basis. As of December 2017, the Airports Authority received approximately \$37.5 million in state grants since 1998. The Airports Authority expects to receive \$2 million in 2018.

Amounts received by the Airports Authority pursuant to these federal and state grants are expressly excluded from the definition of “Revenues” under the Indenture and are not pledged to secure the Bonds.

Funding Source: PFCs

The Airports Authority uses certain PFC revenues to pay debt service on PFC eligible Bonds that are issued to pay costs of the CCP. The Airports Authority began collecting a \$3.00 PFC at each Airport in 1994 and increased the PFC to \$4.50 (the maximum amount authorized by the FAA) in May 2001. An airport operator must apply to the FAA for the authority to impose a PFC and to use the PFC revenue collected for specific FAA-approved projects. Since Reagan National Airport and Dulles International Airport collect a \$4.50 PFC, federal entitlement grant moneys that otherwise would have been received under the AIP have been reduced by 75%.

The Airports Authority has five active PFC applications, with associated amendments, at Reagan National Airport and two at Dulles International Airport, which, in total, provide collection authority of approximately \$3.47 billion (\$1.03 billion at Reagan National Airport and \$2.44 billion at Dulles International Airport). As of March 31, 2018, the Airports Authority had collected \$837.1 million (including interest earned) under the applications at Reagan National Airport (including active and closed applications) and \$771.6 million (including interest earned) under the applications at Dulles International Airport (including active and closed applications). Authority for the collection of PFCs under the approved PFC applications at Reagan National Airport will expire on February 1, 2023, and at Dulles International Airport on December 31, 2038. If the amounts authorized to be collected have not been collected by the expiration dates, it is expected that the authorization to collect the PFCs will be extended.

The FAA is authorized to terminate the authority to impose PFCs if the Airports Authority's PFC revenues are not being used for FAA-approved projects, if project implementation does not commence within the time periods specified in the FAA's regulations, or if the Airports Authority otherwise violates FAA regulations. The authority to impose a PFC also may be terminated if the Airports Authority violates certain informal and formal procedural safeguards that must be followed. The Secretary of Transportation may authorize an airport operator, including the Airports Authority, to use PFC revenues to finance non-approved projects if such use is necessary due to the financial need of an airport. See also "FINANCIAL CONDITION OF CERTAIN AIRLINES SERVING THE AIRPORTS – Effect of Airline Bankruptcies – PFCs."

The calculation of Net Revenues pledged under the Indenture expressly excludes the proceeds of any PFC or similar charge levied by or on behalf of the Airports Authority unless the Airports Authority takes action to treat these funds as Revenues under the Indenture. The Airports Authority has not taken any such actions and, therefore, any PFC or similar charge collected by the Airports Authority currently is not included in the Net Revenues and is not pledged to secure the Bonds, including the Series 2018A Bonds.

The following table provides the annual collections of PFC revenue, plus interest income, from 2013 through 2017.

PFC Revenue

Calendar Year	Reagan National Airport	Dulles International Airport	Total ¹
2013	\$40,299,744	\$40,370,183	\$80,669,927
2014	41,692,591	40,402,223	82,094,814
2015	45,093,237	41,504,519	86,597,756

2018A	558,430,000	558,430,000
Total	<u>\$5,777,120,000</u>	<u>\$4,616,630,000</u>

Subordinated Bonds for the Aviation Enterprise Fund

Currently, there are no outstanding Subordinated Bonds. The Airports Authority, however, has the ability to issue additional debt on a subordinated basis to the Bonds. Under the Indenture, Subordinated Bonds are to be secured by a pledge of the Airports Authority's Net Revenues, which pledge is to be subordinated to the pledge of Net Revenues securing the Bonds.

Commercial Paper Program for the Aviation Enterprise Fund

The Airports Authority has authorized a commercial paper program in an aggregate principal amount not to exceed \$500 million outstanding at any time. The Airports Authority currently has in place one credit facility allowing the Airports Authority to support the issuance of up to \$200 million in CP Notes at any given time.

The issuance of up to \$250 million of the Series One CP Notes is authorized pursuant to the Amended and Restated Eleventh Supplemental Indenture dated as of November 1, 2004, as amended, by and between the Airports Authority and the Trustee. The letter of credit securing the Series One CP Notes has expired; the Series One CP Notes Program has been suspended and there are no plans at this time to procure a replacement letter of credit provider.

The issuance of up to \$200 million of the Series Two CP Notes was authorized pursuant to the Twenty-second Supplemental Indenture dated as of January 1, 2005, as amended on March 1, 2007, October 1, 2009, March 6, 2014, and February 27, 2017 by and between the Airports Authority and the Trustee. The Series Two CP Notes are structured as Short Term/Demand Obligations under the Indenture and are secured by certain pledged funds including Net Revenues on a parity with the Bonds. They are further secured by an irrevocable direct pay letter of credit issued by Industrial and Commercial Bank of China Limited, New York Branch (“ICBC”), which expires on February 25, 2022. The Airports Authority’s obligation to repay amounts drawn under such letter of credit is secured by and payable from Net Revenues and other pledged funds on a parity with any Series One CP Notes that are issued, and Bonds, including the Series 2018A Bonds.

Credit Facilities Relating to Bonds

In addition to the letter of credit securing the Series Two CP Notes, the Airports Authority has approximately \$442.3 million principal amount of variable rate Bonds outstanding that are secured by letters of credit. The chart below provides summary information with respect to the credit facilities relating to the Airports Authority’s Series Two CP Notes and certain of its variable rate Bonds.

Direct Purchase Bonds

The Airports Authority has \$336.4 million principal amount of index floater variable rate Bonds outstanding that were purchased by banks. The chart below provides summary information with respect to those direct purchase Bonds. Unless extended in the current index floater variable rate, the direct purchase Bonds will be subject to mandatory tender on the purchase date and will then be refunded or converted to a different interest rate mode or another index floater variable rate.

Interest Rate Swaps for the Aviation Enterprise Fund

The Airports Authority has entered into a number of interest rate swap agreements (collectively, the "Swap Agreements") to hedge against potential future increases in interest rates. All of the Airports Authority's Swap Agreements (i) were entered into in connection with the planned issuance of variable rate debt and represent floating-to-fixed rate agreements and (ii) were written on a forward-starting basis to either hedge future new money Bonds or to synthetically advance refund Bonds that could not be advance refunded on a tax-exempt basis.

The chart below provides summary information with respect to the Airports Authority’s current Swap Agreements.

Airports Authority’s Swap Agreements

Trade Date	Swap Provider	Ratings ⁵ Moody’s/ S&P/Fitch	Hedged Series	Original Notional Amount	Outstanding Notional Amount as of April 2018	Fair Value as of April 2018	Rate Paid by Counterparty	Rate Paid by Airports Authority	Termination Date

¹ On June 9, 2011, Merrill Lynch Capital Services, Inc. transferred its role by novation as the swap provider under this swap agreement to Bank of America, N.A.

² On March 4, 2009, Bear Stearns Financial Products assigned its role as the swap provider under this swap agreement to JP Morgan Chase Bank, N.A.

³ On November 22, 2011, as successor of Wachovia Bank, Wells Fargo Bank, National Association, assumed the role as swap provider under this swap agreement.

⁴ On September 12, 2007, the Airports Authority (a) realized the market value of this swap and received \$1,255,000 from the swap provider, and (b) extended the start date of the swap from October 1, 2007, to October 1, 2011, with a new fixed swap rate of 3.86%.

⁵ Ratings as of May 2018.

Source: Airports Authority records.

The Board has adopted a policy governing the use of derivative products by the Airports Authority. A copy of the Board policy is available at www.mwaa.com. To manage its exposure to counterparty risk, the Airports Authority has entered into Swap Agreements only with counterparties having a rating of at least “A.” Upon the issuance of the Series 2018A Bonds and the defeasance of the Refunded Bonds, approximately 17% of the Airports Authority’s outstanding Bonds will be in a variable rate mode (approximately 12% will be synthetic fixed rate and approximately 5% will be unhedged variable rate) and 83% of the Airports Authority’s debt will be conventional fixed rate.

The Airports Authority’s regular hedge payments under the Swap Agreements constitute Junior Lien Obligations of the Airports Authority secured by a pledge of the Airports Authority’s Net Revenues that is subordinate to the pledge of Net Revenues securing the Bonds, including the Series 2018A Bonds, and any Subordinated Bonds issued in the future. If any Swap Agreement is terminated prior to its scheduled termination date, depending on market conditions at the time of the termination, the Airports Authority may be required to make a termination payment to the counterparty or may receive a termination payment from a counterparty. Termination payments owed by the Airports Authority under the Swap Agreements, if any, would be payable solely from legally available funds that would be subordinate to the payment

of Bonds, including the Series 2018A Bonds, CP Notes, Subordinated Bonds and Junior Lien Obligations.

Special Facility Bonds

Special Facility Bonds are generally defined as any revenue bonds, notes or other obligations of the Airports Authority other than Bonds, Subordinated Bonds or Junior Lien Obligations, issued to finance any Special Facility, as defined in the Indenture, that are payable from and secured solely by the proceeds of such obligations and by rentals, payments and other charges payable by the obligor under the applicable Special Facility Agreement, as defined in the Indenture. As of the date of this Official Statement, no Special Facility Bonds of the Airports Authority are outstanding.

AIRPORTS AUTHORITY HISTORICAL FINANCIAL INFORMATION

General

The Airports Authority's financial report as of, and for, the years ended December 31, 2017 and December 31, 2016, is contained in the Airports Authority's 2017 CAFR, which was filed with EMMA and can also be found at www.mwaa.com and www.dacbond.com, and includes three financial statements: the Statements of Net Position; the Statements of Revenues, Expenses and Changes in Net Position; and the Statements of Cash Flows. The financial statements are prepared in accordance with accounting principles generally accepted in the United States of America as promulgated by GASB principles.

The Airports Authority's financial statements for the years ended December 31, 2017 and December 31, 2016 include two Enterprise Funds. The Aviation Enterprise Fund encompasses the two Airports, Reagan National Airport and Dulles International Airport. The Dulles Corridor Enterprise Fund, which commenced November 1, 2008, encompasses the Dulles Toll Road and the Dulles Metrorail Project. The Management's Discussion of Financial Information provided in this Official Statement concerns only the Aviation Enterprise Fund.

Aviation Enterprise Fund Fiscal Years Ended December 31, 2013 Through 2017

Historical Statements of Revenues, Expenses and Changes in Net Position for the Aviation Enterprise Fund for the five Fiscal Years ended December 31, 2013 through 2017, are set forth on the following table. The amounts set forth in the table were derived from the Airports Authority's audited historical financial statements.

¹ As discussed in the Airports Authority's Comprehensive Annual Financial Report of 2015 ("2015 CAFR"), the Airports Authority implemented GASB 68 and revised its 2014 and prior years' statements to reflect the change in its method of accounting for pension costs. The opening net assets for 2014 were adjusted to reflect the cumulative effect of the change impacting periods prior to 2014.

Management's Discussion of Financial Information

The Aviation Enterprise Fund has activity-based revenues which include revenues derived from non-airline fees, such as parking and rental car concession fees, and cost recovery-based revenues derived from airline rentals, fees and charges, such as landing fees, international arrival fees and passenger conveyance fees. The Airports Authority's 2017 Budget reflected a 0.5% decrease in revenues and a 2.6% increase in expenses, as compared to the 2016 Budget.

In 2017, operating revenue, which consists largely of concessions, rents, landing fees, passenger conveyance charges and international arrivals fees, totaled \$761.6 million, which was a decrease of \$12.5 million, or 1.6% from the prior year. In 2017, concession revenues totaled \$332.0 million, which was an increase of \$15.6 million, or 4.9%, from 2016. In 2017, airline revenue, which consists of landing fees, terminal rents from airlines, and other airline fees, totaled \$360.0 million, a decrease of \$31.9 million, or 8.1% from prior year. The airline terminal rent revenues totaled \$239.2 million, a decrease of \$27.7 million, or 10.4%, from 2016. The key driver of decreased terminal rents in 2017 was the decrease in rent rates at the Airports. Landing fee revenues totaled \$93.8 million in 2017, an increase of \$0.3 million from 2016. Signatory landing fee rates paid per 1,000 pounds at Reagan National Airport increased to \$4.13 in 2017 from \$3.95 in 2016. In 2017, signatory airline landing fee rates paid per 1,000 pounds at Dulles International Airport decreased to \$1.44 from \$2.60 in 2016. Passenger fees, including passenger conveyance and international arrivals fees for the Transportation Security Administration ("TSA"), totaled \$27.0 million in 2017 and decreased \$4.6 million, or 14.5%, from 2016.

As of December 31, 2017, the Aviation Enterprise Fund had \$1.64 billion of total cash and investments of which \$873.4 million was unrestricted. Total unrestricted net position at December 31, 2017 for the Aviation Enterprise Fund was \$655.1 million, an increase of \$69.3 million from December 31, 2016. As of December 31, 2017, the Aviation Enterprise Fund unrestricted cash and investments were equivalent to 895 days of operation and maintenance expenses, compared to 809 days as of December 31, 2016. As of March 2018, unrestricted cash and investments increased to \$900.7 million and total unrestricted net position for the Aviation Enterprise Fund was \$727.9 million, an increase of \$72.8 million from December 31, 2017. These net unrestricted assets may be used to meet any of the on-going operational needs of the Aviation Enterprise, including debt service, should the reserves restricted for debt service prove inadequate, subject to approval by the Airports Authority's Board of Directors.

The following table provides details of concession revenues by major category for the five Fiscal Years 2013 through 2017.

Source: Airports Authority records.

In 2017, concession revenues accounted for 43.6% of total operating revenues compared to 41.0% in 2016. The increase in concession revenue was attributable to increases primarily in ground transportation, food and beverage, inflight caterers, and display advertising. Parking revenues continued to rank as the Airports Authority's largest concession in 2017, providing \$124.6 million in total revenues for the year, a decrease of \$3.1 million, or 2.4% from \$127.7 million in 2016 due to an increase in shared rider service providers primarily at Reagan National. Rental car revenues of \$43.6 million were higher by \$4.3 million compared to 2016.

The Airports Authority is implementing new food, beverage, and retail programs at both Airports. Food and beverage revenue totaled \$32.9 million in 2017, which represented an increase of \$2.5 million from 2016. Fixed base operator revenues of \$24.4 million in 2017 increased by \$4.2 million from 2016. Inflight catering revenues increased by \$1.5 million compared to 2016 due to a new contract that provides for a higher minimum annual guarantee ("MAG") payment. Ground transportation revenues increased \$6.7 million in 2017, due to the increase of shared ride service providers at both Airports. All other areas of concession revenues accounted for a combined net decrease of \$0.6 million over 2016.

Concession revenues at Reagan National Airport increased by \$6.2 million, or 4.5%, in 2017. Parking revenue at Reagan National Airport decreased \$5.0 million, or 7.9%, from 2016. Overall activity for public parking decreased 6.8% in 2017 compared to 2016. Total exits for 2017 were 1.25 million compared to 1.34 million in 2016. Ground transportation revenue at Reagan National Airport was \$23.2 million in 2017, an increase of \$4.1 million or 21.7% from 2016.

Concession revenues at Dulles International Airport increased by \$9.4 million, or 5.3%, from 2016. In 2017, parking revenue was \$67.2 million, an increase of \$1.9 million, or 2.9%, from 2016. Overall activity for public parking decreased 0.76% in 2017 compared to 2016. Total exits for 2017 were 2.56 million compared to 2.58 million in 2016. Ground transportation

revenue at Dulles International Airport was \$14.0 million in 2017, an increase of \$2.6 million or 22.8% from 2016.

Operating expenses for the Aviation Enterprise Fund for the fiscal year ended December 31, 2017 totaled \$636.7 million, an increase of \$11.0 million or 1.8% from 2016. Materials, equipment, supplies, contract services and other expenses increased \$22.7 million or 12.2%, to \$209.0 million in 2017. The increase was the result of expenses associated with the moving of the corporate offices and the associated lease expenses and the disposal of the previous corporate office building.

Salaries and related benefits expenses increased \$0.5 million, or 0.3%, from 2016 to \$172.5 million in 2017. Regular full time pay for Airports Authority employees increased \$4.5 million, or 4.0%, over 2016. The Airports Authority continued funding its Other Post-Employment Benefits (OPEB) program and recorded \$0.3 million in expenses in 2017 and \$1.1 million in expenses in 2016. The contribution percentages to the Airports Authority's pension plans increased to 6.85% in 2017 from 5.5% of eligible earnings in 2016 for the General Employee Plan and increased to 10.16% in 2017 from 8.6% of eligible earnings in 2016 for the Police and Firefighters' plan. The funded ratio as of the actuarial valuation date of December 31, 2017 was 105.1% for the General Employee Plan and 98.9% for the Police and Firefighters' plan.

The Airports Authority's utility expenses for 2017 were \$25.1 million, down slightly from 2016. Depreciation and amortization expenses totaled \$224.2 million in 2017, a decrease of \$10.0 million or 4.3% from 2016.

In 2017, the Airports capitalized \$63.0 million in projects, principally for the Corporate Office Building Relocation, the public Wi-Fi infrastructure at both airports and the Airfield Pavement Panel Replacement and new Police Training facility at Dulles International Airport. Operating income was \$124.9 million in 2017, a decrease in revenue of \$23.5 million compared to 2016. The change is a combination of decreased airline revenues as a result of the impact of a \$25.0 million Commonwealth grant received in 2017 which lowered the rates for the airlines, increased concession revenue of \$15.6 million and increased expenses of \$11.0 million.

When compared to 2016, total non-operating revenues increased \$28.6 million and non-operating expenses decreased by \$0.9 million. Non-operating revenue in 2017 included \$24.7 million in investment income or interest earned on debt service reserve funds, \$25.8 million of federal, state, and local grants in support of operations and a \$13.2 million increase from fair value gain on swaps. Non-operating expenses, which included interest expense on the Aviation Enterprise Fund's \$4.8 billion bond debt, totaled \$227.8 million. Contributions to the Dulles Corridor Enterprise totaled \$48.9 million which reflected the Aviation Enterprise's share of Phase 2 of the Dulles Metrorail Project.

Capital contributions include PFC revenues, federal, state, and local grants, and other capital property acquired. PFC revenues for 2017 were \$90.9 million, which was an increase of \$1.1 million from 2016. Federal, state, and local grants in support of capital programs were \$21.2 million in 2017 and \$21.5 million in 2016. In 2017, the Airports Authority received \$19.2 million in Airport Improvement Programs (AIP) grants primarily to reimburse for runway

construction and rehabilitation, taxiway reconstruction, and runway safety area improvements. In 2016, the Airports Authority received \$14.8 million in AIP grants to reimburse for the capital costs of constructing the fourth runway, reconstructing a portion of Taxiway Y, reconstructing Taxiway Z and Taxiway C Reconstruction, reconstructing and widening of Taxiway B East section, all at Dulles International Airport, and improving the safety areas for runways 15/33 and 4/22 at Reagan National Airport. Net position increased in 2017 by \$72.9 million. This increase reflects the continued strength and growth of the airports and the sound management of the Airports Authority debt and investment programs. Net position increased in 2016 by \$67.9 million due to increases in operating income and offset by the decrease in Federal, state and local grants and the increase in contributions to other governments.

Net Remaining Revenue

Set forth in the table below is the calculation of Net Remaining Revenue (“NRR”) and debt service coverage for the five Fiscal Years ended December 31, 2013 through December 31, 2017.

The Aviation Enterprise Fund Budget

The Aviation Enterprise Fund's annual budget is a financial planning tool outlining the estimated revenues and expenses for the Airports. The budget is not prepared according to GAAP. The President and Chief Executive Officer submits the Aviation Enterprise Fund's annual budget to the Board for approval. Budgetary controls and evaluations are managed by comparing actual interim and annual results with the budget, noting the actual level of passenger activity. The Airports Authority conducts quarterly reviews to ensure compliance with the provisions of the annual operating budget approved by the Board. The budget may be amended at any time during the year upon recommendation by the President and Chief Executive Officer and adoption by the Board.

Operating revenues were slightly lower than budgeted amounts by 0.1% in 2017 compared to 1.8% over budget expectations in 2016. Operating expenses were held to 91.3% of budget authorization in 2017, while in 2016 expenses were held to 93.8% of budget authorization. The Airports Authority's 2017 Budget reflected a 0.5% decrease in revenues and a 2.6% increase in expenses, as compared to the 2016 Budget.

	Budget	Actual ¹	As a percentage of Budget
2017 Revenues	\$713,646,495	\$713,071,294	99.9%
2017 Expenses ²	\$353,033,093	\$322,493,388	91.3%
2016 Revenues	\$717,081,000	\$730,274,339	101.8%
2016 Expenses ²	\$343,968,000	\$322,590,554	93.8%

¹ Actual results are stated on a budgetary basis for comparative purposes, which are not consistent with GAAP.

² Does not include depreciation expense or debt service.

Aviation Enterprise Fund Fiscal Year 2018 Budget

The prospective financial information in the section below has been prepared by, and is the responsibility of the Airports Authority's management. The Airports Authority and its management believe that the budget information below has been prepared on a reasonable basis, reflecting the best estimates and judgments, and represents, to the best of management's knowledge and opinion, the Airports Authority's expected course of action. However, because this information is highly subjective, it should not be relied on as necessarily indicative of future results.

The Aviation Enterprise Fund's Budget, which includes the 2018 Operation and Maintenance Budget ("2018 O&M Budget") (funded from airline rentals, fees and charges and non-airline revenue, including concessions and other revenues), the 2018 Capital, Operating and Maintenance Investment Program Budget (funded with the Airports Authority's share of net remaining revenues from the prior year), and the 2018 Capital Construction Program Budget (funded from Bond proceeds, PFCs and grants), was approved by the Board in December 2017 (the "2018 Budget"). The Airports Authority is committed to ensuring that adequate resources are available to efficiently and safely operate and maintain the Airports and believes that the 2018 Budget provides those resources.

The 2018 O&M Budget includes a 0.8% decrease in operating revenues (excluding transfers) and a 1.8% increase in operating expenses (excluding debt service) over the 2017 O&M Budget. Budgeted revenues of \$707.7 million for 2018 reflect a \$5.9 million decrease from 2017 budgeted revenues. Operating revenues received from the airlines are on a cost recovery basis.

Budgeted operating expenses for 2018 are \$359.4 million, a \$6.4 million or 1.8% increase over 2017 budgeted expenses of \$353.0 million (excluding debt service and O&M Reserve Requirement). The total budgeted expenses for 2018, including debt service but excluding O&M Reserve Requirement are \$702.2 million, a \$22.1 million or 3.2% increase over 2017 budgeted expenses of \$680.1 million.

In the 2018 Budget, the amount of total NRR is estimated at \$229.3 million, a 6.8% increase from the 2017 Budget. Under the Airline Agreement, NRR is allocated between the Aviation Enterprise Fund and the Signatory Airlines according to an established formula. The Signatory Airlines' estimated share of NRR in 2017 (transfers included in the budgeted 2018 operating revenues) was \$144.2 million and the Airports Authority's estimated share of NRR in 2017 was \$89.3 million.

Totals may not add due to rounding.

The Aviation Enterprise Fund’s financial results for the first three months of Fiscal Year 2018 reflect a \$2.3 million, or 9.0%, decrease in operating income, primarily due to lower rent revenue offset by higher concession revenues and higher costs. Operating revenue for the three months ended March 31, 2018 was \$182.6 million, an increase of \$1.6 million or 0.9% compared to the same period in 2017. The Airports Authority recognized \$6.3 million in operating grant revenues received from the Commonwealth of Virginia. These funds are being used to offset airline costs at Dulles International Airport.

Capital contributions include PFCs and federal and state grants by the Aviation Enterprise Fund. For the three months ended March 31, 2018, PFC revenue was \$25.3 million, an increase of \$1.2 million, or 4.8%, compared to the same period in 2017. Contributions to the Dulles Corridor Enterprise for Phase 2 of the Dulles Metrorail Project were \$7.7 million, a decrease of \$6.9 million, or 47.1% compared to the same period in 2017.

Through March 31, 2018, the Aviation Enterprise Fund’s net position increased \$31.9 million, reflecting operating income of \$23.7 million, non-operating expenses of \$9.3 million and capital contributions of \$17.5 million.

Operating expenses through March 2018 were \$158.9 million, an increase of \$4.0 million or 2.6%, compared to the same period in 2017. Materials, equipment, supplies, and other contract services increased \$1.5 million, or 3.2%. Salaries and related benefits increased \$2.9 million compared to the same period in 2017, as a result of an increase in total salaries of \$1.6 million and an increase in benefits of \$1.3 million.

For the three months ended March 31, 2018, non-operating expenses, including interest expense, before capital contributions were \$39.6 million, a decrease of \$3.3 million compared to the same period in 2017. For the three months ended March 31, 2018, non-operating revenue was \$30.3 million, a \$13.9 million increase compared to the same period in 2017, as a result of the change in the fair value of the swaps.

The following table provides details of unaudited concession revenues by major category for the three months ended March 31, 2017 and March 31, 2018.

**TOTAL CONCESSION REVENUES BY MAJOR CATEGORY
AVIATION ENTERPRISE FUND
(Unaudited)**

	Three Months Ended March 2017	Three Months Ended March 2018	Net Change
Parking	\$28,801,214	\$27,945,884	\$ (855,330)
Rental Cars	9,089,116	10,196,457	1,107,341

Ground Transportation	7,705,951	8,079,204	373,253
Fixed base operator	5,746,812	7,837,831	2,091,019
All other	2,499,250	2,554,383	55,133
Total ¹	<u>\$74,720,731</u>	<u>\$77,698,176</u>	<u>\$ 2,977,445</u>

¹ Totals may not add due to rounding.
Source: Airports Authority records.

The Aviation Enterprise Fund's concession revenues for the three months ended March 31, 2018 increased \$3.0 million, or 4.0%, compared to the same period in 2017. As a percentage of operating revenues, concession revenue increased to 42.5% compared to 41.3% for the same period in 2017. In the first three months of 2018, parking revenues were the Aviation Enterprise Fund's largest source of concession revenue, representing 36.0% of total concession revenues and 15.3% of operating revenues. For the three months ended March 31, 2018, parking revenue was \$27.9 million, a decrease of 3.0% compared to the same period in 2017. Rental car revenues of \$10.2 million increased by \$1.1 million or 12.2% compared to the same period in 2017. Ground Transportation increased \$0.4 million, or 4.8% as compared to 2017. For the three months ended March 31, 2018, food and beverage revenue at the Airports of \$7.2 million remained level and newsstand and retail concession revenue decreased \$0.2 million compared to the same period in 2017. Display advertising decreased \$0.3 million or 9.7% compared to the same period in 2017.

CERTAIN AGREEMENTS FOR USE OF THE AIRPORTS

Airport Use Agreement and Premises Lease

On January 1, 2015, a new Airline Agreement, replacing the previously existing agreement, became effective with nearly all of the airlines providing service at Reagan National Airport and Dulles International Airport. For airlines operating at Reagan National Airport, the term of the agreement is 10 years, starting from the effective date of the agreement to December 31, 2024. For airlines operating at Dulles International Airport, the term of the agreement was originally three years, starting from the effective date of the agreement to December 31, 2017; however, the Airports Authority and the airlines signed a First Universal Amendment to the Airline Agreement on July 27, 2016, extending the term of the agreement for Dulles International Airport to December 31, 2024 to be coterminous with the agreement at Reagan National Airport. The prior agreement, which became effective in February 1990, terminated on December 31, 2014.

The Airline Agreement provides for the use and occupancy of facilities at the Airports and establishes the rentals, fees and charges, including landing fees and terminal rents, to be paid by the Signatory Airlines. Airline rentals, fees and charges are calculated using a methodology where the Airports Authority costs, including debt service and debt service coverage, are allocated to separate cost centers at each Airport. Each Signatory Airline's rentals, fees and charges are based on its pro rata use of the facilities within the cost centers that cover Airport facilities utilized by the airlines. Each Signatory Airline's payment includes its pro rata share of the Airports Authority's total requirements in such airline-supported cost centers (including a component representing debt service plus debt service coverage), less transfers from the prior year. Airline payments of rents, fees and other charges pay for the costs assigned to the airline-supported cost centers. The Airports Authority's other revenues, principally concession revenue, pay for the costs assigned to other cost centers at the Airports, such as roadways, parking areas and non-airline revenue generating portions of the terminal. See APPENDIX C – "Summary of Certain Provisions of the Airport Use Agreement and Premises Lease."

The new Airline Agreement (as was the prior agreement) is a hybrid agreement, which includes elements of both compensatory and residual rate-making methodologies. The Airline Agreement is compensatory to the extent that the costs are allocated to specified cost centers, and the users of those cost centers are responsible for paying the costs. Signatory Airlines agree to pay fees that allow the Airports Authority to recover the total cost requirement of the airline-supported cost centers, which include: airfield, terminal, equipment (e.g., loading bridges, baggage conveyors and devices), passenger conveyance, and the International Arrivals Building at Dulles International Airport. The Airports Authority is responsible for paying the costs for all non-airline cost centers, such as general aviation, ground transportation, and Dulles International cargo.

Airline rentals, fees and charges are established annually during the budget process and are based on projected activity and costs. The Airline Agreement provides for a mid-year adjustment to these rentals, fees and charges. In addition, at any time during the year if revenues fall 5% or more below projections, airline rentals, fees and charges may be adjusted to provide for full cost recovery plus debt service coverage.

The Airline Agreement has rate making features that are designed to ensure that the Airports Authority's debt service and related coverage obligations under the Indenture are met. The Indenture requires that there be a minimum 125% coverage on the debt service on the Bonds. Under the Airline Agreement, the Airports Authority sets its airline rentals, fees and charges at each Airport to recover its costs in the airline-supported cost centers. These costs include 100% of the debt service assigned to these cost centers, plus debt service coverage on that debt service at varying amounts, depending on the Airport and the year (as described in following paragraph). In addition, the Airline Agreement authorizes the Airports Authority to make immediate rate adjustments at an Airport in the event that Net Revenues in any Fiscal Year at the Airport are projected to be less than 125% of the Annual Debt Service allocated to the Airport. These adjustments, which are referred to as "Extraordinary Coverage Protection Payments" under the Airline Agreement, are designed to increase the projected Net Revenues at the Airport to an amount equal to 125% of the Annual Debt Service that is allocated to the Airport.

Under the prior agreement in effect through December 31, 2014, airline-funded debt service coverage at both Reagan National Airport and Dulles International Airport was 25% of debt service. In the first three years of the new Airline Agreement, from 2015 through 2017, airline-funded debt service coverage at both Reagan National Airport and Dulles International Airport was 35% of debt service. In the fourth through ninth years of the Airline Agreement, from 2018-2023, airline-funded debt service coverage will be 30% of debt service at both Airports. In 2024, the final year of the Airline Agreement, airline-funded debt service coverage will be 25% of debt service at both Airports. Under the Airline Agreement, in the event that the 125% debt service coverage is not met at an Airport, an adjustment in the airlines rentals, fees and charges will occur at that Airport to produce compliance with the rate covenant. In the event that the Airports Authority is unable to adjust airline rates sufficiently at the Airport that failed to generate the required 125% debt service coverage, under the Airline Agreement, the Airports Authority shall adjust the rates at the other Airport as necessary to fulfill the Airports Authority's obligation to meet the debt service coverage covenant required by the Indenture. See

APPENDIX C – “Summary of Certain Provisions of the Airport Use Agreement and Premises Lease.”

The Airline Agreement provides for a new capital construction program at each of the Airports. The approved CCP at Reagan National Airport is comprised of an approximately \$1.2 billion construction program, and the CCP at Dulles International Airport is an approximately \$588 million construction program. Approximately \$445.6 million of the \$588 million CCP at Dulles International Airport was added as part of the First Universal Amendment. Each approved program amount is escalated annually in accordance with the terms of the Airline Agreement and the First Universal Amendment. The CCP at Reagan National Airport and the CCP at Dulles International Airport together comprise the 2015-2024 CCP. See “THE 2015-2024 CCP.”

An airline that files for bankruptcy has the right to reject its Airline Agreement with the Airports Authority. In the event the Airports Authority does not recover all of its costs pursuant to the Airline Agreement with a bankrupt carrier, the Airports Authority may adjust the rentals, fees and charges for all Signatory Airlines in a subsequent rate period to recover the rentals, fees and charges due from the bankrupt carrier. As a result, if a Signatory Airline were to reject its lease of space at either Airport, the unrecovered rental costs could be allocated among the remaining airline tenants.

If an airline is not a Signatory Airline, it is required to pay rentals, fees and charges set by the Airports Authority in accordance with regulations adopted by the Board and DOT requirements. While the Airports Authority believes that its rate-making methodologies, including its allocation of costs for purposes of establishing rentals, fees and charges, are reasonable, no assurance can be given that challenges by an airline will not be made to the rentals, fees and charges established by the Airports Authority or its methods of allocating particular costs. See “FINANCIAL CONDITION OF CERTAIN AIRLINES SERVING THE AIRPORTS – Effect of Airline Bankruptcies.”

The Airline Agreement is not assigned or pledged to the Trustee as security for the Bonds. The Airline Agreement may be amended at any time without the consent of the Holders of the Bonds. If for any reason the Airline Agreement is amended, expires or is terminated, the Airports Authority will set airline rentals, fees and charges in accordance with a successor agreement or regulations of the Board, consistent with DOT requirements (including that such rentals, fees and charges be reasonable and non-discriminatory) and in an amount sufficient to satisfy the rate covenant in the Indenture. Such amendments, successor agreements or regulations could affect the calculation of future airline revenues. Forecast Net Revenues are presented in the Report of the Airport Consultant, which are based on the assumed continuation of the provisions of the Airline Agreement. See APPENDIX A – “Report of the Airport Consultant” and APPENDIX C – “Summary of Certain Provisions of the Airport Use Agreement and Premises Lease.” The definition of “Toll Revenues” in the indenture securing the Dulles Toll Road Revenue Bonds excludes Revenues to ensure that no Revenues from the operation of the Airports will be used to support the operation of the Dulles Toll Road or finance Dulles Toll Road improvements or the Dulles Metrorail Project. See “THE AIRPORTS AUTHORITY - Operation of the Dulles Toll Road and Construction of the Dulles Metrorail Project.”

The Airline Agreement also provides that, in accordance with a formula, the Airports Authority will share its revenue, after certain expenses, referred to as Net Remaining Revenues or NRR, with the Signatory Airlines. To calculate the Airports Authority's and the Signatory Airlines' respective shares of NRR, the total amount of NRR is first segregated by Airport. NRR at each Airport is then reduced by debt service coverage on Subordinated Bonds and coverage in the tenant equipment cost centers allocable to each Airport, if any, with the Signatory Airlines receiving 100% of an amount equal to the debt service coverage on any Subordinated Bonds and coverage in the tenant equipment cost centers and the Airports Authority receiving 100% of an amount equal to depreciation. The remaining NRR of each Airport is then shared between the Signatory Airlines and the Airports Authority in accordance with the Airline Agreement.

NRR at Reagan National Airport is shared under the Airline Agreement as shown in the table below:

<u>Year in Which NRR is Generated</u>	<u>NRR Sharing at Reagan National Airport</u>	<u>Maximum Amount of Airports Authority Share Usable at Dulles International Airport in Year Following Year of Generation</u>
2014, 2015, 2016	100% Airports Authority/ 0% Airlines	\$40 million
2017	55% Airports Authority/ 45% Airlines	\$35 million
2018	55% Airports Authority/ 45% Airlines	\$30 million
2019 through 2023	45% Airports Authority/ 55% Airlines	\$25 million
2024	NRR allocation between the Airports Authority and the Airlines, as well as any limitation on the use of the Airports Authority's share at Dulles International Airport, to be described in a new airport use and lease agreement, which would be effective in 2025, or, if none, in accordance with the allocation for NRR generated in 2023, as described above.	

NRR at Dulles International Airport is shared in the same manner as it had been shared under the prior agreement. At Dulles International Airport, NRR is divided equally between the Airports Authority and the Signatory Airlines up to a plateau of \$15.6 million (in 2014 dollars) escalated by the U.S. Implicit Price Deflator Index from the base date of January 1, 2016 to the current year. The remainder is then to be split with 25% allocated to the Airports Authority and 75% allocated to the Signatory Airlines.

The Signatory Airlines' share of NRR is used to reduce airline rentals, fees and charges in the year following the year that the NRR is earned. The Airports Authority uses its share of NRR to finance its Capital, Operating and Maintenance Investment Program or for any other lawful purpose. Under the formula set forth in the Airline Agreement, through 2018 the Airports Authority retains a higher share of NRR from Reagan National Airport than under the prior agreement and has the ability to use its share to reduce the requirement for airline rentals, fees and charges at Dulles International Airport, including up to a maximum of \$30 million in 2018 and \$25 million in years 2019 through 2023.

Under the Airline Agreement, the Airports Authority may increase its share of NRR from Reagan National Airport in the event any new legislation is enacted which expands the Perimeter Rule by allowing additional flights in excess of the 1,250 mile perimeter. For each new pair of beyond-perimeter flights, the Airports Authority would be entitled to \$1.5 million from Reagan National Airport NRR, before any sharing of NRR occurs with the airlines. For additional information about the effect of an expansion or reduction of the Perimeter Rule on NRR, see “THE AIRPORTS SERVICE REGION AND AIRPORTS ACTIVITY – Airports Activity,” “THE AIRPORTS AUTHORITY – Regulations and Restrictions Affecting the Airports” and APPENDIX C – “Summary of Certain Provisions of the Airport Use Agreement and Premises Lease.”

Terminal Concession Agreements

The Airports Authority has agreements to lease space to certain concessionaires who provide food, beverages, specialty retail, news, gift and other products and services to users of the Airports. The Airports Authority has a management contract with MarketPlace Washington, LLC (“MarketPlace”) for the food and beverage and retail operations at Reagan National Airport and Dulles International Airport that commenced on January 1, 2013 and expires on December 31, 2019. Under this contract, MarketPlace sub-leases all food and beverage and retail facilities at the Airports. MarketPlace receives a fee from the Airports Authority for leasing and managing these facilities.

Concession contracts generally obligate the concessionaire to pay the higher of a percentage of gross revenues or a MAG payment to the Airports Authority. Typically these contracts extend for a period of seven to 10 years. The concession contracts are awarded in most cases on the basis of competitive procedures. Terminal concession revenue represented 22.9% of total concession revenue and 10.0% of total operating revenue in 2017. See table entitled “TOTAL CONCESSION REVENUES BY MAJOR CATEGORY” herein.

Parking Facility Agreements

The parking facilities at both Airports are operated for the Airports Authority by Five Star U-Street Parking under a management agreement with a base period that commenced in October 2015 and extends through September 2018 with two additional one-year options that may be exercised by the Airports Authority to extend the contract through September 2020. Under the management agreement, all parking operating costs are reimbursed to the operator, who receives a fixed management fee (adjusted annually for inflation).

There are 9,094 public parking spaces at Reagan National Airport and 23,673 public parking spaces at Dulles International Airport. Parking revenue represented 37.5% of concession revenue in 2017 and 16.4% of total operating revenue in 2017. See table entitled “TOTAL CONCESSION REVENUES BY MAJOR CATEGORY” herein.

Rental Car Facility Agreements

There currently are four groups of on-airport rental car operators at Reagan National Airport: Advantage, Avis/Budget Group (operating Avis and Budget brands), Enterprise Holdings (operating Alamo, Enterprise and National brands) and Hertz Holdings (operating

Hertz, Dollar and Thrifty brands). The Airports Authority receives the greater of a MAG payment or 10% of the gross receipts of each on-airport rental car operator as a concession fee. Each on-airport rental car operator at Reagan National Airport also currently assesses its customers and remits to the Airports Authority a daily customer contract fee of \$3.50 established by the Airports Authority to recover the debt service and other costs associated with the rental car facilities. The off-airport rental car company is Advantage/EZ Rent a Car. Advantage/EZ operates buses to transport customers to Garage A where they board an airport shuttle bus to the terminals. Advantage/EZ pays the Airports Authority 8% of the gross receipts generated from airport business. Contracts with rental car operators at Reagan National Airport were awarded on February 1, 2017, and expire on January 31, 2022.

The same four groups of on-airport rental car operators serve Dulles International Airport. These companies operate under contracts that run from July 1, 2013 through June 30, 2018 and that will be extended on a month-to-month basis beyond June 30, 2019. The Airports Authority receives the greater of a MAG payment or 10% of the gross receipts from each on-airport rental car operator as a concession fee. Under the contracts, the cumulative MAG for the five years of the contracts are approximately \$82 million.

Rental car revenue represented 13.1% of concession revenue in 2017 and 5.7% of total operating revenue in 2017. See table entitled “TOTAL CONCESSION REVENUES BY MAJOR CATEGORY” herein.

Agreements with Transportation Network Companies

The Airports Authority has issued permits to transportation network companies (“TNCs”), such as Uber Technologies Inc. and Lyft, Inc., which require the TNCs to pay an access fee for operating on airport property. TNCs are app-based transportation companies that connect paying passengers with drivers using their own vehicles to provide transportation. In accordance with the permits, TNC vehicles pay a \$4.00 trip fee for each pick-up and drop-off at the Airports.

Ground transportation revenue represented 11.2% of total concession revenue and 4.9% of total operating revenue in 2017. Of the total ground transportation revenue for 2017, approximately \$22.6 million is attributable to trip fee revenue from TNCs.

Grants from Commonwealth of Virginia

On May 20, 2016, the Governor of the Commonwealth of Virginia signed House Bill 30 (the “2016 Appropriation Act”), which provided for the Commonwealth of Virginia to extend \$50 million in grant funds to the Airports Authority over a two-year period, beginning in calendar year 2017. The Airports Authority received the first \$25 million installment in March 2017 and received the second \$25 million installment in January 2018. These grant funds are to be used by the Airports Authority to reduce the cost per enplanement at Dulles International Airport by reducing debt service requirements and operating costs payable by airlines operating at Dulles International Airport in order to retain existing air carriers and attract new carriers to the Airport.

Receipt of the grant funds was conditioned on (i) ensuring the retention of a domestic airline hub service at the Airport for at least seven years beyond 2017 and (ii) entering into an agreement with the Virginia Department of Transportation (VDOT) that identifies a long range plan to lower the cost per enplanement at Dulles International Airport beyond 2018 without additional state support beyond the \$50 million grant funds provided pursuant to the 2016 Appropriation Act. The execution of the First Universal Amendment satisfied the first requirement by ensuring the retention of United’s domestic hub service at Dulles International Airport through 2024. The Airports Authority entered into an agreement with VDOT on March 6, 2017 (the “VDOT Agreement”) that sets forth the Airports Authority’s long range plan to satisfy the second requirement. That plan includes projections of financial savings through refundings of Bonds, contributions of unrestricted cash funds, increases in non-airline revenues, decreases in operating expenses and increases in passenger traffic. As part of the VDOT Agreement, the Airports Authority is required to demonstrate that it has created at least \$50 million in debt service and other cost decreases and revenue increases at Dulles International Airport since January 1, 2016. In 2017, the Airports Authority made this demonstration to VDOT.

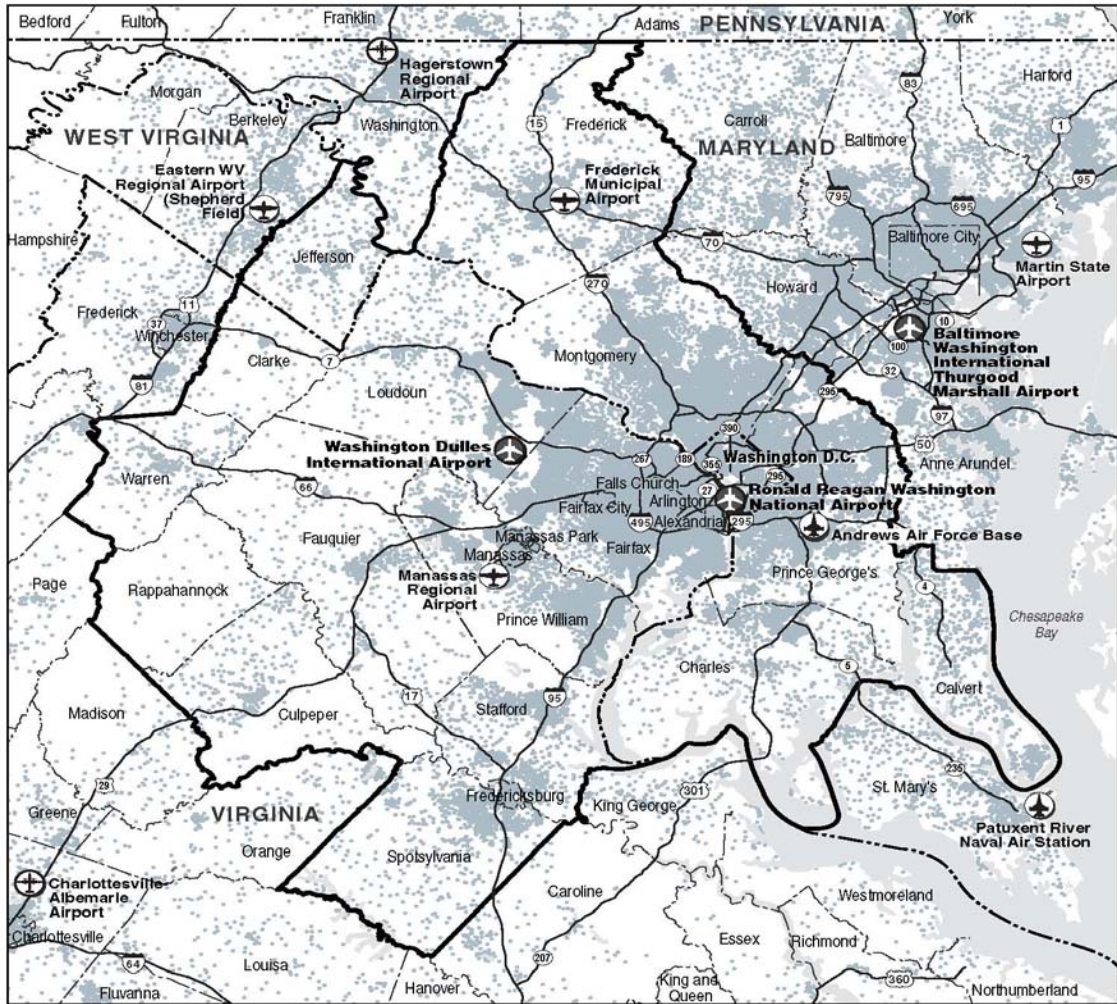

THE AIRPORTS SERVICE REGION AND AIRPORTS ACTIVITY

The Airports Service Region

The Airports service region includes the District of Columbia; the Maryland counties of Calvert, Charles, Frederick, Montgomery and Prince George’s; the Virginia counties of Arlington, Clarke, Culpeper, Fairfax, Fauquier, Loudoun, Prince William, Rappahannock, Spotsylvania, Stafford and Warren; the independent Virginia cities of Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas and Manassas Park; and the West Virginia county of Jefferson.

According to the U.S. Department of Commerce, Bureau of Census, between 2010 and 2017, population growth in the Airports service region increased an average of 1.3% annually, compared with a 0.7% average annual increase for the nation (between 2010 and 2017). The Airports service region’s per capita personal income in 2016 (the most recent data available) was 35.5% higher than the average for the United States as reported by the U.S. Bureau of Economic Analysis. Since 2010, the rate of unemployment in the Airports service region has been lower than the average for the United States, and in 2017, unemployment in the Airports service region was 3.7% compared with 4.4% for the nation according to the U.S. Bureau of Labor Statistics. The Airports service region’s economy is typically insulated from downturns by the economic activity generated by the federal government, although in 2013, implementation of the sequestration provisions of the Budget Control Act of 2011 (Pub. L. 112-25) (the “Budget Control Act”) led to reductions in federal employment and spending.

Airlines Serving the Airports

Listed below are scheduled airlines which served the Airports as of March 2018:

REAGAN NATIONAL AIRPORT

U. S. MAINLINE AIRLINES

Alaska Airlines
American Airlines
Delta Air Lines
Frontier Airlines
JetBlue Airways
Southwest Airlines
United Airlines
Virgin America⁵

FOREIGN FLAG AIRLINES

Air Canada
Air Canada Jazz (Regional)

REGIONAL AIRLINES

Endeavor Air³
Envoy¹
ExpressJet²
GoJet Airlines³
Mesa Airlines²
PSA Airlines¹
Republic Airlines^{1,2,3}
SkyWest Airlines^{2,4}
Trans States Airlines¹

DULLES INTERNATIONAL AIRPORT

U. S. MAINLINE AIRLINES

Alaska Airlines
American Airlines
Delta Air Lines
Frontier Airlines
JetBlue Airways
Southwest Airlines
United Airlines
Virgin America⁵

FOREIGN FLAG AIRLINES

Aer Lingus
Aeroflot
Aeromexico
Air Canada Jazz (Regional)
Air China
Air France
Air Georgian (Regional)
Air India
All Nippon Airways
Austrian Airlines
Avianca Airlines
British Airways
Brussels Airlines
Copa Airlines
Emirates
Ethiopian Airlines
Etihad Airways
Icelandair
KLM-Royal Dutch Airlines
Korean Air
Lufthansa German Airlines
Porter Airlines (Regional)
Qatar Airways
Royal Air Maroc
Saudi Arabian Airlines
Scandinavian Airlines System
South African Airways
Turkish Airlines
Virgin Atlantic Airways

REGIONAL AIRLINES

Air Wisconsin²
Commutair²
Endeavor Air³
GoJet Airlines³
Mesa Airlines²
PSA Airlines¹
SkyWest Airlines^{2,3}
Trans States²

ALL-CARGO CARRIERS

FedEx
Mountain Air Cargo
United Parcel Service
Volga
Kalitta Air

¹ Operates under a code sharing agreement with American.

² Operates under a code sharing agreement with United.

³ Operates under a code sharing agreement with Delta.

⁴ Operates under a code sharing agreement with Alaska Airlines.

⁵ Alaska Airlines purchased Virgin America in December 2016 and received a single operating certificate in January 2018.

Airports Activity

Largely as a result of the Perimeter Rule, Reagan National Airport offers primarily short and medium haul passenger flights to destinations within 1,250 miles of Washington, D.C. See “THE AIRPORTS AUTHORITY – Regulations and Restrictions Affecting the Airports.” As scheduled for June 2018, nonstop airline service is provided from Reagan National Airport to 81 U.S. destinations and five international destinations in Canada and the Bahamas. See “THE AIRPORTS AUTHORITY – Regulations and Restrictions Affecting the Airports.”

Dulles International Airport serves primarily medium to long-haul markets, which is partly a function of the Perimeter Rule at Reagan National Airport. Since 1986, Dulles International Airport has served as a hub for United. As scheduled for June 2018, nonstop airline service was provided from Dulles International Airport to 71 U.S. destinations and 53 international destinations.

Historical Enplanement Activity

The following table summarizes total commercial enplanements at Reagan National Airport and Dulles International Airport from 2008 through 2017. See “CERTAIN INVESTMENT CONSIDERATIONS.”

	Reagan National Airport ^{1,2,3}		Dulles International Airport ^{1,2,3}					
	Total Enplanements	Annual Growth	Domestic Enplanements	Annual Growth	International Enplanements	Annual Growth	Total Enplanements	Annual Growth
2008	8,978	(3.4%)	8,743	(6.1%)	3,115	5.2%	11,858	(3.4%)
2009	8,767	(2.3%)	8,430	(3.6%)	3,117	0.1%	11,547	(2.6%)
2010	9,036	3.1%	8,565	1.6%	3,177	1.9%	11,742	1.7%
2011	9,363	3.6%	8,261	(3.5%)	3,257	2.5%	11,518	(1.9%)
2012	9,788	4.5%	7,855	(4.9%)	3,318	1.9%	11,173	(3.0%)
2013	10,198	4.2%	7,397	(5.8%)	3,464	4.4%	10,861	(2.8%)
2014	10,458	2.6%	7,112	(3.8%)	3,567	3.0%	10,679	(1.7%)
2015	11,496	9.9%	7,139	0.4%	3,575	0.2%	10,714	0.3%
2016	11,767	2.4%	7,145	0.1%	3,719	4.0%	10,864	1.4%
2017	11,946	1.5%	7,466	4.5%	3,858	3.7%	11,324	4.2%
Annual Compounded Growth								
2008-2017		3.2%		(1.7%)		2.4%		(0.5%)

¹ Passenger enplanements in thousands.

² Excludes passengers enplaned on general aviation and military flights.

³ Enplanement figures have been reconciled to the Airports Authority’s records and may not match figures released in previous issues.

Reagan National Airport

Except for a decrease during the economic recession in 2008 and 2009, enplanements have increased in each of the subsequent six years. Enplanements at Reagan National Airport were approximately 11.9 million in 2017, which represents an increase of 24.8% since 2008.

For the 12-month period ending September 30, 2017, O&D passengers accounted for an estimated 88.3% of enplanements at Reagan National Airport. The top two airlines at Reagan National Airport (American, along with its code-sharing affiliate carriers, and Southwest) enplaned 64.2% of all passengers in 2017. Overall seat capacity at Reagan National Airport has increased nearly 13.0% since 2012 (as measured from June 2012 to June 2018), largely as a result of the airlines at Reagan National Airport operating larger aircraft primarily due to the slot transfers that occurred in 2014. See “INVESTMENT CONSIDERATIONS - Airline Consolidations.”

Dulles International Airport

Largely as a result of the reduction in demand during the national economic recession, domestic enplanements decreased 8.0% between 2007 and 2010. Between 2010 and 2015, domestic enplanements decreased a further 16.6% as a result of capacity reductions by United and a transfer of air service by JetBlue, Southwest-AirTran, and Virgin America to Reagan National Airport following the enactment of the 2012 FAA Reauthorization Act, which expanded the number of flights at Reagan National Airport that could go beyond the 1,250 mile limit established by the Perimeter Rule.

The decrease in domestic enplanements at Dulles International Airport has been partially offset by an increase in international enplanements, which have increased every year since 2008 for a cumulative 10-year increase of 19.2%. Foreign flag airlines that have started service from Dulles International Airport since 2010 are Aer Lingus, Aeromexico, Air China, Brussels Airlines, Emirates Airline, Etihad Airways, Icelandair, Lan Airlines, Porter Airlines, Royal Air Maroc and Turkish Airlines.

Total enplanements at Dulles International Airport for 2017 were approximately 11.3 million. For the 12-month period ending September 30, 2017, O&D passengers accounted for an estimated 68.9% of enplanements at Dulles International Airport. United, along with its code-sharing affiliate carriers, accounted for 75.7% of domestic enplanements and 39.0% of international enplanements at Dulles International Airport in 2017 while foreign-flag scheduled airlines accounted for virtually all of the remaining 61.0% of international enplanements. See “FINANCIAL CONDITION OF CERTAIN AIRLINES SERVING THE AIRPORTS - General - United.”

The following tables show passenger enplanements at Reagan National Airport and Dulles International Airport by airline between 2013 and 2017.

Baltimore/Washington International Thurgood Marshall Airport

Portions of the Airports service region also are served by Baltimore/Washington International Thurgood Marshall Airport (“BWI”), which is located northeast of Washington, D.C., approximately 30 miles from Reagan National Airport and 46 miles from Dulles International Airport. BWI is operated by the State of Maryland Department of Transportation. The Federal Lease and the Federal Act provide for the voluntary inclusion of BWI among the airports operated by the Airports Authority. At the time the Airports Authority was created, the State of Maryland declined to have BWI included in the Airports Authority.

According to information on BWI’s website (which has not been independently verified by the Airports Authority or the Underwriters), enplaned passengers at BWI in 2017 numbered approximately 13.1 million. This represented a 5.3% increase in passenger traffic compared with 2016. The five airlines with the largest number of enplaned passengers at BWI as of December 2017 were Southwest Airlines (69.25%), Spirit (7.48%), Delta (7.10%), American (6.84%), and United (4.15%).

The following table details the shares of enplaned passengers at Reagan National Airport, Dulles International Airport and BWI from 2013 through 2017:

<u>Airport</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017¹</u>
Reagan National Airport	31.3%	32.1%	33.7%	33.4%	32.6%
Dulles International Airport	33.6%	33.1%	31.2%	30.9%	31.1%
BWI	<u>35.1%</u>	<u>34.8%</u>	<u>35.1%</u>	<u>35.8%</u>	<u>36.3%</u>
	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

¹ Data are for the 12 months ended September 30, 2017, the most recent available.

Totals may not add due to rounding.

FINANCIAL CONDITION OF CERTAIN AIRLINES SERVING THE AIRPORTS

General

The Airports Authority derives a substantial portion of its operating revenues from airline landing and facility rental fees. The financial strength and stability of the airlines using the Airports, together with numerous other factors, influence the level of aviation activity at the Airports and revenues of the Airports Authority. Individual airline decisions regarding level of service, particularly hubbing activity at the Airports also affect enplanements. Between 2001 and 2006, most domestic airlines were downgraded by the rating agencies, declared bankruptcy under Chapter 11 of the U.S. Bankruptcy Code (“Chapter 11”), including United, US Airways, Delta, Northwest, ATA, Air Canada, Midway, American Airlines and Independence Air, and implemented service reductions and layoffs of employees in response to reduced passenger demand and increased fuel and other operating costs. In addition, since 2009, several domestic airlines have merged, such as United and Continental, Delta and Northwest, American and US Airways, and several ceased operations, such as Independence Air and ATA.

Information Concerning the Airlines

Certain of the airlines (or their respective parent corporations) are subject to the information reporting requirements of the Securities Exchange Act of 1934, as amended, and in accordance therewith file reports and other information with the SEC. Certain information, including financial information, concerning such airlines (or their respective parent corporations) is disclosed in reports and statements filed with the SEC. Such reports and statements can be inspected and copies obtained at prescribed rates at the public reference facilities maintained by the SEC, which can be located by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. Some of the airlines are required to file periodic reports of financial and operating statistics with the DOT. Such reports can be inspected at the DOT's Office of Airline Information Bureau of Transportation Statistics, 1200 New Jersey Avenue, S.E., Washington, D.C. 20590, and copies of such reports can be obtained from the DOT at prescribed rates.

Airlines owned by foreign governments or foreign corporations operating airlines (unless such foreign airlines have American Depository Receipts registered on a national exchange) are not required to file information with the SEC. Airlines owned by foreign governments or foreign corporations file limited information only with the DOT.

The Airports Authority has no responsibility for the completeness or accuracy of information available from the DOT or SEC, including, but not limited to, updates of information on the SEC's Internet site or links to other Internet sites accessed through the SEC's site.

American

For the year ended December 31, 2017, American Airlines and its regional affiliates represented approximately 46.9% of the revenues earned from airlines at Reagan National Airport. No other airline represented over 16.4% of such revenues at Reagan National Airport. Enplanements of US Airways, American Airlines and their regional affiliates at the Airports in 2017 represented 27.6% of the combined enplanements at both Airports. According to information obtained from its filings with the SEC, American Airlines reported net income of \$1.9 billion in 2017, compared to net income of \$2.7 billion in 2016.

United

For the year ended December 31, 2017, United and its regional affiliates represented approximately 10.3% of the revenues earned from airlines at Reagan National Airport, and approximately 54.6% of the revenues earned from airlines at Dulles International Airport. Enplanements by United and its regional affiliates at the Airports in 2017 represented 34.8% of the combined enplanements at both Airports. According to information obtained from its filings with the SEC, United reported a net income of \$2.1 billion in 2017, compared to net income of \$2.3 billion in 2016.

Southwest

For the year ended December 31, 2017, Southwest represented approximately 11.2% of the revenues earned from airlines at Reagan National Airport. Enplanements by Southwest represented approximately 8.7% of the combined enplanements at both Airports in 2017. According to information obtained from its filings with the SEC, Southwest reported a net income of \$3.5 billion in 2017, compared to a net income of approximately \$2.2 billion in 2016.

CERTAIN INVESTMENT CONSIDERATIONS

The Series 2018A Bonds may not be suitable for all investors. Prospective purchasers of the Series 2018A Bonds should give careful consideration to the information set forth in this Official Statement, including, in particular, the matters referred to in the following summary.

General

The Revenues of the Airports Authority are affected substantially by the economic health of the air transportation industry and the airlines serving the Airports. Certain factors that may materially affect the Airport Service Region, the Airports and the airlines include, but are not limited to, (i) national and international economic conditions and currency fluctuations, (ii) the population growth and the economic health of the region and the nation, (iii) the financial health and viability of the airline industry, (iv) air carrier service and route networks, (v) the availability and cost of aviation fuel and other necessary supplies, (vi) changes in demand for air travel (vii) service and cost competition, (viii) levels of air fares, (ix) fixed costs and capital requirements, (x) the cost and availability of financing, including federal funding, (xi) the capacity of the national air traffic control system, (xii) the capacity of the Airports and of competing airports, (xiii) alternative modes of travel and transportation substitutes, (xiv) national and international disasters and hostilities, (xv) the cost and availability of employees, (xvi) labor relations within the airline industry, (xvii) regulation by the federal government including the effect of the High Density and Perimeter rules on Reagan National Airport, (xviii) evolving federal restrictions on travel to the United States from certain countries, (xix) environmental risks and regulations, noise abatement concerns and regulations, (xx) bankruptcy and insolvency laws, and (xxi) safety concerns arising from international conflicts, the possibility of terrorist or other attacks and other risks (including the impact of such attacks on other airports that have flights to or from the Airports, as well as the possibility of the closure of those airports for a period of time).

National and Global Economic Conditions

Historically, the financial performance of the air transportation industry has correlated with the state of the national and global economy. Following significant and dramatic changes which occurred in the financial markets in September 2008, the U.S. economy experienced a recession followed by weak growth. As a result of concerns about the U.S. government's ability to resolve long-term deficits, S&P in August 2011 downgraded the credit rating of the U.S. sovereign debt from "AAA" to "AA+". While the global economy generally has rebounded, there can be no assurances that any such rebound will continue, or that other national and

international fiscal or political concerns will not have an adverse effect on the air transportation industry.

Airlines Serving the Airports

The Airports Authority derives a substantial portion of its operating revenues from landing, facility rental and concession fees. The financial strength and stability of the airlines using the Airports, together with numerous other factors, influence the level of aviation activity and revenues at the Airports. In addition, individual airline decisions regarding level of service, particularly hubbing activity at the Airports and aircraft size such as use of regional jets, can affect total enplanements.

United accounted for approximately 75.7% of domestic enplanements and 39.0% of international enplanements at Dulles International Airport in 2017 and maintains a hub at that Airport. In Fiscal Year 2017 approximately 24.9% of the Airports Authority's operating revenue from Dulles International Airport was received from rentals and fees derived from United's operation at the Airport. Pursuant to the First Universal Amendment, United extended its lease at Dulles International Airport through December 31, 2024; however, if United were to discontinue or reduce its hubbing operations at Dulles International Airport after that date, the Airports Authority cannot predict if United's current level of activity at the Airport would be replaced by other carriers.

The Airports Authority cannot predict the duration or extent of reductions and disruptions in air travel or the extent of any adverse impact on Revenues, PFC collections, passenger enplanements, operations or the financial condition of the Airports Authority that disruptions and reductions related to airline bankruptcies may cause, or whether these and other factors will result in more airline bankruptcies. All airlines that have filed for reorganization under the United States bankruptcy laws in the past have remitted all material payments due to the Airports Authority under the Airline Agreements. Bankruptcies, liquidations or major restructurings of airlines could occur in the future. The Airports Authority is not able to predict how long any airline in bankruptcy protection would continue operating at the Airports or whether any such airline would liquidate or substantially restructure its operations. Further, the Airports Authority cannot predict or give any assurance that the airlines serving the Airports will continue to pay or to make timely payment of their obligations under the Airline Agreement.

See "Effect of Signatory Airline Bankruptcy on the Airline Agreement" under this caption for additional discussion of airline bankruptcy on the Airline Agreement.

Airline Consolidations

In response to competitive pressures, the U.S. airline industry has continued to consolidate. Delta and Northwest merged in 2008; United and Continental merged in 2010; Southwest Airlines acquired AirTran Airways in 2011; and US Airways and American Airlines merged in 2013. More recently Alaska Air Group acquired Virgin America in December 2016 and received a single operating certificate in January 2018.

Airline consolidation has affected airline service patterns at Reagan National Airport and Dulles International Airport, including in 2014, the required divestiture of 104 carrier slots, or 52 round trip flights, at Reagan National Airport resulting from the merger of US Airways and American Airlines. Further airline consolidation is possible and could continue to change airline service patterns, particularly at the connecting hub airports of the merged airlines. The Airports Authority cannot predict what impact, if any, such consolidations will have on airline traffic at the Airports. See “Competition” under this caption for additional discussion on the effect of airline consolidation on the Airports.

Cost of Aviation Fuel

Airline profitability is significantly affected by the price of aviation fuel. According to Airlines for America, fuel is the largest single cost component for most airline operations, and therefore an important and uncertain determinant of an air carrier’s operating economics. Any increase in fuel prices causes an increase in airline operating costs. Fuel prices continue to be susceptible to, among other factors, political unrest in various parts of the world, Organization of Petroleum Exporting Countries’ policy, increased demand for fuel caused by rapid growth of economies such as China and India, the levels of fuel inventory maintained by certain industries, the amounts of reserves maintained by governments, currency fluctuations, disruptions to production and refining facilities and weather. The cost of aviation fuel has fluctuated in the past in response to changes in demand for and supply of oil worldwide. Significant fluctuations and prolonged increases in the cost of aviation fuel historically have had an adverse impact on air transportation industry profitability, causing airlines to reduce capacity, fleet and personnel as well as to increase airfares and institute fuel, checked baggage and other extra surcharges, all of which may decrease demand for air travel.

Public Health Risks

Public health concerns affect air travel demand from time to time. In 2003, concerns about the spread of severe acute respiratory syndrome (“SARS”) led public health agencies to issue advisories against nonessential travel to certain regions of the world. In 2009, concerns about the spread of influenza caused by the H1N1 virus reduced certain international travel, particularly to and from Mexico and Asia. Following an outbreak of the Ebola virus in West Africa in 2014, concerns about the spread of the virus adversely affected travel to and from certain regions of Africa. More recently, in January 2016, the Centers for Disease Control and Prevention issued a travel alert warning pregnant women to avoid travel to areas where the Zika virus has spread, a list that included more than 50 countries and territories.

Aviation Safety and Security Concerns

Concerns about the safety of air travel and the effectiveness of security precautions, particularly in the context of international hostilities and domestic and foreign terrorist attacks and threats and other airline incidents may influence passenger travel behavior and air travel demand. Travel behavior may be affected by anxieties about the safety of flying and by the inconveniences and delays associated with more stringent security screening procedures, which may give rise to the avoidance of air travel generally and the switching from air to surface travel modes.

Safety concerns in the aftermath of the terrorist attacks on September 11, 2001, were largely responsible for the steep decline in airline travel nationwide in 2002. Since 2001, government agencies, airlines, and airport operators have enhanced security measures to guard against possible terrorist incidents and maintain confidence in the safety of airline travel. These measures include strengthened aircraft cockpit doors, changed flight crew procedures, increased presence of armed federal air marshals, federalization of airport security functions under the TSA, more effective dissemination of information about threats, more intensive screening of passengers, baggage, and cargo, and deployment of new screening technologies.

Computer networks and data transmission and collection are vital to the safe and efficient operation of the Airports, the airlines that serve the Airports and other tenants of the Airports. Notwithstanding security measures, information technology and infrastructure of the Airports, any of the airlines serving the Airports or any other tenants at the Airports may be vulnerable to attacks by outside or internal hackers, or breached by employee error, negligence or malfeasance. Any such breach or attack could compromise systems and the information stored thereon. Any such disruption or other loss of information could result in a disruption in the efficiency of the operations of the Airports and/or the airlines serving the Airports and the services provided at the Airports, thereby adversely affecting the ability of the Airports to generate revenue.

Aviation Security Requirements and Related Costs and Restrictions

The airlines and the federal government were primarily responsible for, and bore most of the capital costs associated with, implementing security measures after September 11, 2001. The Airports are currently in compliance with all federally mandated security requirements. If additional financial assistance becomes available from TSA, the Airports Authority may perform certain modifications to better accommodate additional requirements.

The Airports Authority cannot predict the effect of any future government-required security measures on passenger activity at the Airports. Nor can the Airports Authority predict how the government will staff security screening functions or the effect on passenger activity of government decisions regarding its staffing levels.

Enplanements at the Airports, collections of PFCs and the receipt of Revenues were negatively affected by security restrictions on the Airports and the financial condition of the air transportation industry following the terrorist attacks of September 11, 2001. The Airports Authority, like many airport operators, experienced increased operating costs due to compliance with federally mandated and other security and operating changes. Given the proximity of the Airports to Washington, D.C., the FAA or the Department of Homeland Security may require further enhanced security measures and impose additional restrictions on the Airports, which may negatively affect future Airports Authority performance. The Airports Authority cannot predict the likelihood of future incidents similar to the terrorist attacks of September 11, 2001, the possibility of increased security restrictions, the likelihood of future air transportation disruptions or the impact on the Airports or the airlines from such incidents or disruptions. See “THE AIRPORTS AUTHORITY – Regulations and Restrictions Affecting the Airports – Possible Future Restrictions on Reagan National Airport,” “THE AIR TRADE AND AIRPORTS ACTIVITY – Airlines Serving the Airports,” and “FINANCIAL CONDITION OF CERTAIN AIRLINES SERVING THE AIRPORTS.”

Regulations and Other Restrictions Affecting the Airports

The operations of the Airports Authority and its ability to generate revenues are affected by a variety of legislative, legal, contractual, statutory, regulatory and practical restrictions, including restrictions in the Federal Act, limitations imposed by the Federal Lease, provisions of the Airline Agreement, the PFC Acts, regulations such as the High Density and Perimeter Rules that affect Reagan National Airport and extensive federal legislation and regulations applicable to all airports. It is not possible to predict whether future restrictions or limitations on the Airports' operation will be imposed, whether future legislation or regulation will affect anticipated federal funding or PFC collection, whether additional requirements will be funded by the federal government or require funding by the Airports Authority, or whether such restrictions, legislation or regulations would adversely affect Net Revenues. However, prior changes to the Perimeter Rule as part of the 2012 FAA Reauthorization Act resulted in increases in flight activity at Reagan National Airport and some reductions in flight activity at Dulles International Airport, and further changes to the Perimeter Rule could have similar impacts. For a description of these restrictions and regulations, see "THE AIRPORTS AUTHORITY – Regulations and Restrictions Affecting the Airports."

Climate change concerns have led, and may continue to lead to new laws and regulations at the federal and state levels that could have a material adverse effect on the operations of the Airports and on the airlines operating at the Airports. The United States Environmental Protection Agency ("EPA") has taken steps towards regulation of greenhouse gas ("GHG") emissions under existing federal law. Those steps may in turn lead to further regulation of aircraft GHG emissions. On July 5, 2011, the United States District Court for the District of Columbia issued an order concluding that EPA has a mandatory obligation under the Clean Air Act to consider whether the GHG and black carbon emissions of aircraft engines endanger public health and welfare. On August 15, 2016, EPA found that GHG emissions from certain aircraft cause and contribute to pollution that endangers public health and welfare. In that endangerment finding, EPA stated that it intends to propose GHG emission standards for covered aircraft that will be at least as stringent as emission standards under development by the International Civil Aviation Organization ("ICAO"). The ICAO's standards were approved on October 6, 2016 and adopted on March 6, 2017. The ICAO standards apply to new aircraft type designs from 2020 forward, and in-production aircraft must meet the standards by 2028. EPA has publicly indicated as recently as January 2018 its intent to adopt the ICAO emission standards for the United States, but the agency has not initiated rulemaking or set a timeline for such actions. Consequently, the Airports Authority cannot predict when EPA's emission standards will be proposed, when the Federal Aviation Administration will adopt regulations to implement those standards, or what effect the standards may have on the Airports Authority or on air traffic at the Airports.

Federal Funding; Impact of Federal Sequestration

The Airports Authority depends upon federal funding for the Airports not only in connection with grants and PFC authorizations but also because federal funding provides for TSA, Federal Inspection Services, air traffic control and other FAA staffing and facilities. The FAA currently operates under the 2012 FAA Reauthorization Act, which, after several extensions, is scheduled to expire on September 30, 2018. That statute was the first long-term FAA authorization since the last such authorization expired in 2007. Between 2007 and the 2012

reauthorization, there were 23 short-term extensions of the FAA’s authority and a two-week partial shutdown of the FAA in the summer of 2011. The 2012 FAA Reauthorization Act (i) retained the federal cap on PFCs at \$4.50, (ii) removed the restriction contained in the Federal Act that provided that after September 16, 2011, the Secretary of Transportation may not approve an application of the Airports Authority (A) for an airport development grant under the AIP program or (B) to impose a PFC, and (iii) authorized \$3.35 billion per year for the AIP through Fiscal Year 2015. The AIP provides federal capital grants to support airport infrastructure, including entitlement grants (determined by formulas based on passenger, cargo, and general aviation activity levels) and discretionary grants (allocated on the basis of specific set-asides and the national priority ranking system). FAA AIP expenditures are subject to congressional appropriation and no assurance can be given that the FAA will receive spending authority. In addition, the AIP could be affected by the automatic across-the-board spending cuts, known as sequestration, described below. The Airports Authority is unable to predict the level of available AIP funding it may receive. If there is a reduction in the amount of AIP grants awarded to the Airports Authority, such reduction could (i) increase by a corresponding amount the capital expenditures that the Airports Authority would need to fund from other sources (including operating revenues and additional Bonds), (ii) result in adjustments to the CCP or (iii) extend the timing for completion of certain projects. See “PLAN OF FUNDING FOR THE CCP – Funding Source: Federal and State Grants.”

While Congress has held hearings on a long-term FAA reauthorization act to replace the 2012 FAA Reauthorization Act expiring on September 30, 2018, no long-term reauthorization legislation has been approved by either house of Congress as of the date of this Official Statement. There can be no assurance that Congress will enact and the President will sign an FAA reauthorization act before the current authorization terminates. Failure to adopt such legislation could have a material, adverse impact on United States aeronautical operations as well as the AIP program.

Federal funding received by the Airports Authority and aviation operations at the Airports could be adversely affected by the implementation of sequestration, a budgetary feature first introduced in the Budget Control Act of 2011. Sequestration could adversely affect FAA and TSA budgets and operations and the availability of certain federal grant funds typically received annually by the Airports Authority, which may cause the FAA or TSA to implement furloughs of its employees and freeze hiring, and may result in flight delays and cancellations.

White House Infrastructure Proposal

On February 12, 2018, the Trump Administration released its infrastructure proposal entitled “Legislative Outline for Rebuilding Infrastructure in America.” The proposal, among other things, included the divestiture of infrastructure assets currently owned by the federal government and, as an example of such assets, identified Reagan National Airport and Dulles International Airport. While no legislation has been introduced to implement the infrastructure proposal or, in particular, the divestiture of the Airports, such legislation could be introduced in the future. Any transfer by the federal government of the Airports to a new owner-operator likely would require termination of the Federal Lease and, if transferred to a private entity, under current law would require the payment or defeasance of all outstanding Airports Authority Bonds.

Effect of Signatory Airline Bankruptcy on the Airline Agreement

In the event of bankruptcy proceedings involving one or more of the Signatory Airlines, the debtor airline or its bankruptcy trustee must determine within a time period determined by the court whether to assume or reject the applicable Airline Agreement. In the event of assumption, the debtor airline is required to cure any prior defaults and to provide adequate assurance of future performance under the relevant document. Rejection of the Airline Agreement by any Signatory Airline gives rise to an unsecured claim of the Airports Authority for damages, the amount of which may be limited by the U.S. Bankruptcy Code. The amounts unpaid as a result of a rejection of the Airline Agreement by a Signatory Airline in bankruptcy can be passed on to the remaining Signatory Airlines under the Airline Agreement. If the bankruptcy of one or more Signatory Airlines were to occur, however, there can be no assurance that the remaining Signatory Airlines would be able, individually or collectively, to meet their obligations under the Airline Agreement. See “CERTAIN AGREEMENTS FOR USE OF THE AIRPORTS – Airport Use Agreement and Premises Lease,” and APPENDIX C – “Summary of Certain Provisions of the Airport Use Agreement and Premises Lease.”

Pursuant to the Aviation Safety and Capacity Expansion Act of 1990 (P.L. 101-508), the Wendel H. Ford Aviation Investment and Reform Act for the 21st Century (P.L. 106-181), the VISION 100-Century of Aviation Reauthorization Act, P.L. 108-176, the Federal Aviation Administration Extension Act of 2008, P.L. 110-330 and the FAA Modernization and Reform Act of 2012, P.L. 112-95 (collectively, the “PFC Acts”), the FAA has approved the Airports Authority’s applications to require airlines to collect and remit to the Airports Authority a \$4.50 PFC for each enplaning revenue passenger at the Airports.

The PFC Acts provide that PFCs collected by the airlines constitute a trust fund held for the beneficial interest of the eligible agency (i.e., the Airports Authority) imposing the PFCs, except for any handling fee or retention of interest collected on unremitted proceeds. In addition, federal regulations require airlines to account for PFC collections separately and to disclose the existence and amount of funds regarded as trust funds on financial statements. Airlines are permitted to commingle PFC collections with other revenues. Airlines that have filed for Chapter 7 or 11 bankruptcy protection, however, are required to segregate PFC revenue in a separate account for the benefit of the airport and cannot grant a third party any security or other interest in PFC revenue. The airlines are entitled to retain interest earned on PFC collections until such PFC collections are remitted. PFCs collected by those airlines are required by the bankruptcy court to be placed in accounts separate from other airline revenue accounts and be paid to airports monthly in accordance with the PFC regulations. However, the Airports Authority cannot predict whether an airline that files for bankruptcy protection will properly account for the PFCs or whether the bankruptcy estate will have sufficient moneys to pay the Airports Authority in full for the PFCs owed by such airline. The Airports Authority has recovered all of its PFC revenues from each of the airlines that filed for Chapter 11 bankruptcy protection in the past. PFC revenues are not pledged to the repayment of the Bonds.

Availability of PFC Revenues

The Airports Authority has included in its 2018 budget its intent to use PFC revenues to pay Annual Debt Service on PFC Eligible Bonds in 2018. See “SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – Application of Designated Passenger Facility Charges” above.

The amount of available PFC revenues received by the Airports Authority in future years will vary based upon the actual number of PFC-eligible passenger enplanements at the Airports. No assurance can be given that any level of enplanements will be realized. Additionally, the FAA may terminate the Airports Authority’s authority to impose PFCs, subject to informal and formal procedural safeguards, if (a) PFC revenues are not being used for approved projects in accordance with the FAA’s approval, the PFC Act or the PFC Regulations, or (b) the Airports Authority otherwise violates the PFC Act or the PFC Regulations. The Airports Authority’s authority to impose a PFC also may be terminated if the Airports Authority violates certain provisions of the Airport Noise and Capacity Act of 1990 (the “ANCA”) and its regulations relating to the implementation of noise and access restrictions for certain types of aircraft. The regulations under ANCA also contain procedural safeguards to ensure that the Airports Authority’s authority to impose a PFC would not be summarily terminated. No assurance can be given that the Airports Authority’s authority to impose a PFC will not be terminated by Congress or the FAA, that the PFC program will not be modified or restricted by Congress or the FAA so as to reduce PFC revenues available to the Airports Authority or that the Airports Authority will not seek to decrease the amount of PFCs to be collected, provided such decrease does not violate the Airports Authority’s covenant in the Indenture. A shortfall in PFC revenues may cause the Airports Authority to increase rentals, fees and charges at the Airports to meet the debt service requirements on the Bonds that the Airports Authority plans to pay from available PFC revenues, and/or require the Airports Authority to identify other sources of funding for its capital program, including issuing additional Bonds.

Airports Authority Insolvency

The Series 2018A Bonds are not secured by or payable from the revenues derived from the Dulles Toll Road or other assets of the Airports Authority accounted for under the Dulles Corridor Enterprise Fund. Nevertheless, the Airports Authority could become insolvent in connection with activities related to the Dulles Toll Road and the Dulles Metrorail Project, even though the Airports are meeting all financial obligations. If this were to occur, an Event of Default under the Indenture could occur even though the Revenues of the Airports may be adequate to meet the rate covenant under the Indenture. A creditor who has a judgment against the Airports Authority as a result of activities related to the Dulles Toll Road or the Dulles Metrorail Project may not be restricted to claims against the revenues of, or other assets accounted for by, the Dulles Corridor Enterprise Fund. Any attempt to levy against Airports Authority facilities used in operation of the Airports or Revenues derived from such operations may cause an Event of Default under the Indenture. Similarly, the Airports Authority could become insolvent in connection with its operations and maintenance of the Airports.

As described under “LITIGATION,” two lawsuits are pending against the Airports Authority contesting its power to charge and collect tolls from users of the Dulles Toll Road. One such lawsuit has been resolved by a federal district court in favor of the Airports Authority,

but that decision has been appealed by the plaintiffs. The other is pending in the same federal district court.

Counterparty and Liquidity Provider Exposure

In connection with certain variable rate Bonds and the Series Two CP Notes program, the Airports Authority has entered into credit facility agreements and Swap Agreements with various financial institutions. Any adverse rating developments with respect to such credit or liquidity providers or swap counterparties could have an adverse effect on the Airports Authority, including, without limitation, an increase in debt service-related costs, a termination event or other negative effects under the related agreements. Payments required under these agreements in the event of any termination or a default by any of the financial institutions under its liquidity or interest rate swap obligations could have an adverse impact on the finances of the Airports Authority.

Limitations on Bondholders' Remedies

The occurrence of an Event of Default under the Indenture does not grant a right to either the Trustee or the Bondholders to accelerate payment of the Bonds. As a result, the Airports Authority may be able to continue collecting Revenues and applying them to the operation of the Airports even if an Event of Default has occurred and no payments are being made on the Bonds. See "SECURITY AND SOURCE OF PAYMENT FOR THE BONDS – Events of Default and Remedies; No Acceleration or Cross Default."

The rights and remedies available to the owners of the Series 2018A Bonds upon an Event of Default under the Indenture are in many respects dependent upon judicial enforcement actions which are often subject to discretion and delay. Currently, the Airports Authority is not authorized by either of the Acts to file for bankruptcy. See "– Airports Authority Insolvency" above.

Expiration and Possible Termination of Airline Agreement

Under certain limited conditions, a Signatory Airline may terminate the Airline Agreement. See "CERTAIN AGREEMENTS FOR USE OF THE AIRPORTS – Airport Use Agreement and Premises Lease." If the Airports Authority and the Signatory Airlines are unable to reach a successor agreement to replace the current agreement at its respective expiration date, then the Airports Authority will set airline rentals, fees and charges at that Airport in accordance with a regulation of the Board that will be consistent with DOT requirements.

Cost and Schedule of Capital Construction Programs

The costs and the schedule of the projects included in the CCP depend on various sources of funding, including additional Bonds, CP Notes, PFCs, and federal grants, and are subject to a number of uncertainties. The ability of the Airports Authority to complete the CCP may be adversely affected by various factors including: (i) estimating errors, (ii) design and engineering errors, (iii) changes to the scope of the projects, (iv) delays in contract awards, (v) material, and/or labor shortages, (vi) unforeseen site conditions, (vii) adverse weather conditions, (viii) contractor defaults, (ix) labor disputes, (x) unanticipated levels of inflation, (xi) environmental

issues, and (xii) additional security improvements and associated costs mandated by the federal government. A delay in the completion of certain projects under the CCP could delay the collection of revenues in respect of such projects, increase costs for such projects, and cause the rescheduling of other projects. In addition, any of the deferred projects could be implemented at any time, adding to the cost of the CCP. There can be no assurance that the cost of construction of the CCP projects will not exceed the currently estimated dollar amount or that the completion of the projects will not be delayed beyond the currently projected completion dates. Any schedule delays or cost increases could result in the need to issue additional Bonds and could result in increased costs per enplaned passenger to the airlines, which could place the Airports at a competitive disadvantage relative to lower-cost airports. See “CAPITAL CONSTRUCTION PROGRAMS (CCP).”

Competition

The Airports compete with other U.S. airports for both domestic and international passengers. Portions of the Airports service region are served by BWI, which experienced significant growth in the past decade, mostly due to low-cost carriers using the airport. Between 2013 and 2017, BWI had the largest share of enplaned passengers in the Airports’ service region, remaining stable at approximately 35%. While the Airports Authority cannot predict whether this trend will continue long-term, BWI is expected to continue to be a competitor for the region’s domestic and international traffic. See “THE AIRPORTS SERVICE REGION AND AIRPORTS ACTIVITY – Baltimore/Washington International Thurgood Marshall Airport.”

In 2017, Dulles International Airport had the largest share of international passengers in the Airports service region, at approximately 83.7%. International passengers made up approximately 34.1% of all commercial enplanements at Dulles International Airport in 2017. Among east coast airports, only the New York area airports offer more service across the Atlantic. International traffic may be more susceptible to fluctuation and disruption based on cost, political instability, terrorist activities, currency fluctuations, and other factors that cannot be predicted or controlled by the airlines or the Airports Authority. The Airports Authority cannot predict whether the level of international traffic will continue at its current level or continue to grow at Dulles International Airport, nor can it predict what events, occurring domestically or internationally, might adversely affect such traffic in the future. See APPENDIX A – “Report of the Airport Consultant – Competing Airports Serving the Region.”

The Airports Authority also may continue to experience increases in its operating costs due to compliance with federally mandated and other security and operating changes that are unique to the Airports. Such increased costs may increase the cost per enplaned passenger to the airlines, which could result in the Airports being put at a competitive disadvantage relative to other airports and transportation modes. See “THE AIRPORTS SERVICE REGION AND AIRPORTS ACTIVITY.”

Alternative Travel Modes and Travel Substitutes

Competition from surface modes of transportation, primarily Amtrak rail service, has resulted in decreased passenger numbers in certain markets, particularly the New York City market. Between 2007 and 2017, average airfares in the New York City market from Reagan

National Airport increased 19.2% while the number of originating passengers decreased 41.0%. See APPENDIX A – “Report of the Airport Consultant – Historical Airline Service and Traffic at Reagan.”

Teleconference, video-conference and web-based meetings continue to improve in quality and price and are considered a satisfactory alternative to some face-to-face business meetings.

In addition, consumers have become more price-sensitive. Efforts of airlines to stimulate traffic by discounting fares have changed consumer expectations regarding airfares and the availability of transparent price information on the internet, which allows easier comparison shopping, has changed consumer purchasing habits. As a result, pricing and marketing have become more competitive in the United States airline industry.

Changes in Federal Tax Law

See “TAX MATTERS – Risk of Future Legislative Changes and/or Court Decisions.”

Other Key Factors

Capacity limitations of the national air traffic control system, the Airports and at competing airports could be factors that might affect future activity at the Airports. In the past, demands on the air traffic control system have caused operational restrictions that have affected airline schedules and passenger traffic and caused significant delays. The FAA has made certain improvements to the computer, radar and communications equipment of the air traffic control system in recent years, but no assurances can be given that future increases in airline and passenger activity would not again adversely affect airline operations. The 2012 FAA Reauthorization Act contains numerous provisions aimed at accelerating the implementation of Next Generation Air Transport System (“NextGen”). NextGen is designed to modernize the National Airspace System from a ground-based system of air traffic control to a satellite-based system of air traffic management in order to enhance the use of airspace and runways.

Future growth of air traffic at Reagan National Airport will be constrained to a significant extent by the High Density Rule and its constrained airfield facilities. Existing terminal and airfield capacity at Dulles International Airport are believed to be sufficient to accommodate near term future growth in airline traffic.

BWI is the primary airport in the Airport Service Region that competes with the Airports. BWI has no airfield, landside or access constraints that would inhibit growth in either domestic or international markets. In recent years, certain low cost carriers, particularly Southwest Airlines, have developed hubs and expanded service at BWI. No assurances can be given that other airlines will not commence or expand activities at BWI to the detriment of airline activity at either or both of the Airports.

For more details on these and other key factors that could impact results of Airports Authority operations, see APPENDIX A – “Report of the Airport Consultant.”

Forward Looking Statements

This Official Statement, and particularly the information contained under the captions “SUMMARY STATEMENT,” “INTRODUCTION,” “THE AIRPORTS AUTHORITY,” “THE SERIES 2018A BONDS,” “THE AIRPORTS AUTHORITY’S FACILITIES AND MASTER PLANS,” “THE 2001-2016 CCP,” “THE 2015-2024 CCP,” “PLAN OF FUNDING FOR THE CCP,” “REPORT OF THE AIRPORT CONSULTANT” and the Report of the Airport Consultant included as APPENDIX A to this Official Statement, contains statements relating to future results that are “forward looking statements” as defined in the Private Securities Litigation Reform Act of 1995. When used in this Official Statement, the words “estimate,” “forecast,” “project,” “intend,” “expect,” and similar expressions identify forward looking statements. Such statements are subject to risks and uncertainties that could cause actual results to differ materially from those contemplated in such forward looking statements. Among the factors that may cause forecast revenues and expenditures to be materially different from those anticipated are an inability to incur debt at assumed rates, construction delays, increases in construction costs, general economic downturns, factors affecting the airline industry in general, federal legislation and/or regulations, and regulatory and other restrictions, including but not limited to those that may affect the ability to undertake the timing or the costs of certain projects. Any forecast is subject to such uncertainties. Therefore, there will be differences between forecast and actual results, and those differences may be material.

REPORT OF THE AIRPORT CONSULTANT

The Report of the Airport Consultant dated May 16, 2018 is attached as APPENDIX A. The Report of the Airport Consultant was prepared by LeighFisher, in conjunction with its subconsultant, DKMG Consulting LLC. The Report of the Airport Consultant evaluates the ability of the Airports Authority to produce Net Revenues sufficient to meet the requirements of the rate covenant during the forecast period taking into account estimated Annual Debt Service requirements using assumptions as documented in the Report of the Airport Consultant. The Airport Consultant has provided its consent to include the Report of the Airport Consultant as APPENDIX A hereto. The Report of the Airport Consultant has been included herein in reliance upon the knowledge and experience of LeighFisher as the Airport Consultant and its subconsultant. As stated in the Report of the Airport Consultant, any forecast is subject to uncertainties. Therefore, there will be differences between forecast and actual results, and those differences may be material. The Report of the Airport Consultant has not been updated to reflect the final pricing terms of the Series 2018A Bonds or other changes that may have occurred after the date of the Report. The forecasts presented in the Report of the Airport Consultant are based on various assumptions that reflect the best information available to the Airports Authority and the knowledge and experience of the Airport Consultant as of the date of the Report. The Airports Authority’s future operating and financial performance, however, will vary from the forecasts and such variances may be material. The Report of the Airport Consultant should be read in its entirety for an understanding of the forecasts and the underlying assumptions.

FINANCIAL ADVISOR

Frasca & Associates, LLC (the “Financial Advisor”) serves as the financial advisor to the Airports Authority in connection with the issuance of the Series 2018A Bonds. The Financial Advisor has prepared the debt issuance plan for funding portions of the CCP based on information provided by the Airports Authority. In addition, it has assisted in the preparation of this Official Statement. The Financial Advisor has not undertaken to make an independent verification of, or to assume responsibility for, the accuracy, completeness or fairness of the information contained in this Official Statement.

INDEPENDENT ACCOUNTANTS

The financial statements as of December 31, 2017 contained in the Airports Authority’s 2017 CAFR, which was filed with EMMA and can also be found at www.mwaa.com and www.dacbond.com, have been audited by Cherry Bekaert LLP, independent auditor, as stated in their report included therein. Cherry Bekaert LLP has not been engaged to perform and has not performed, since the date of its report included therein, any procedures on the financial statements addressed in that report. Additionally, the Cherry Bekaert LLP report does not cover any other information in this Official Statement and should not be read to do so.

TAX MATTERS

General

In the opinion of Squire Patton Boggs (US) LLP, Bond Counsel, under existing law (i) interest on the Series 2018A Bonds is excluded from gross income for federal income tax purposes under Section 103 of the Internal Revenue Code of 1986, as amended (the “Code”), except interest on any Series 2018A Bond for any period during which that Series 2018A Bond is held by a “substantial user” of the facilities financed or a “related person,” as those terms are used in Section 147(a) of the Code, and interest on the Series 2018A Bonds is an item of tax preference under Section 57 of the Code and therefore may be subject to the alternative minimum tax imposed under the Code on individuals and, for taxable years beginning before January 1, 2018, corporations, and (ii) interest on the Series 2018A Bonds is exempt from income taxation by the Commonwealth of Virginia and is exempt from all taxation by the District of Columbia except estate, inheritance and gift taxes. Bond Counsel expresses no opinion as to any other tax consequences regarding the Series 2018A Bonds.

The opinion on tax matters will be based on and will assume the accuracy of certain representations and certifications, and continuing compliance with certain covenants, of the Airports Authority contained in the transcript of proceedings and that are intended to evidence and assure the foregoing, including that the Series 2018A Bonds are and will remain obligations the interest on which is excluded from gross income for federal income tax purposes. Bond Counsel will not independently verify the accuracy of the Airports Authority’s certifications and representations or the continuing compliance with the Airports Authority’s covenants.

The opinion of Bond Counsel is based on current legal authority and covers certain matters not directly addressed by such authority. It represents Bond Counsel’s legal judgment as to exclusion of interest on the Series 2018A Bonds from gross income for federal income tax

purposes but is not a guaranty of that conclusion. The opinion is not binding on the Internal Revenue Service (“IRS”) or any court. Bond Counsel expresses no opinion about (i) the effect of future changes in the Code and the applicable regulations under the Code or (ii) the interpretation and the enforcement of the Code or those regulations by the IRS.

The Code prescribes a number of qualifications and conditions for the interest on state and local government obligations to be and to remain excluded from gross income for federal income tax purposes, some of which require future or continued compliance after issuance of the obligations. Noncompliance with these requirements by the Airports Authority may cause loss of such status and result in the interest on the Series 2018A Bonds being included in gross income for federal income tax purposes retroactively to the date of issuance of the Series 2018A Bonds. The Airports Authority has covenanted to take the actions required of it for the interest on the Series 2018A Bonds to be and to remain excluded from gross income for federal income tax purposes, and not to take any actions that would adversely affect that exclusion. After the date of issuance of the Series 2018A Bonds, Bond Counsel will not undertake to determine (or to so inform any person) whether any actions taken or not taken, or any events occurring or not occurring, or any other matters coming to Bond Counsel’s attention, may adversely affect the exclusion from gross income for federal income tax purposes of interest on the Series 2018A Bonds or the market value of the Series 2018A Bonds.

Interest on the Series 2018A Bonds may be subject to a federal branch profits tax imposed on certain foreign corporations doing business in the United States and to a federal tax imposed on excess net passive income of certain S corporations. Under the Code, the exclusion of interest from gross income for federal income tax purposes may have certain adverse federal income tax consequences on items of income, deduction or credit for certain taxpayers, including financial institutions, certain insurance companies, recipients of Social Security and Railroad Retirement benefits, those that are deemed to incur or continue indebtedness to acquire or carry tax-exempt obligations, and individuals otherwise eligible for the earned income tax credit. The applicability and extent of these and other tax consequences will depend upon the particular tax status or other tax items of the owner of the Series 2018A Bonds. Bond Counsel will express no opinion regarding those consequences.

Payments of interest on tax-exempt obligations, including the Series 2018A Bonds, are generally subject to IRS Form 1099-INT information reporting requirements. If a Series 2018A Bond owner is subject to backup withholding under those requirements, then payments of interest will also be subject to backup withholding. Those requirements do not affect the exclusion of such interest from gross income for federal income tax purposes.

Bond Counsel’s engagement with respect to the Series 2018A Bonds ends with the issuance of the Series 2018A Bonds, and, unless separately engaged, Bond Counsel is not obligated to defend the Airports Authority or the owners of the Series 2018A Bonds regarding the tax status of interest thereon in the event of an audit examination by the IRS. The IRS has a program to audit tax-exempt obligations to determine whether the interest thereon is includible in gross income for federal income tax purposes. If the IRS does audit the Series 2018A Bonds, under current IRS procedures, the IRS will treat the Airports Authority as the taxpayer and the beneficial owners of the Series 2018A Bonds will have only limited rights, if any, to obtain and participate in judicial review of such audit. Any action of the IRS, including but not limited to

selection of the Series 2018A Bonds for audit, or the course or result of such audit, or an audit of other obligations presenting similar tax issues, may affect the market value of the Series 2018A Bonds.

Prospective purchasers of the Series 2018A Bonds upon their original issuance at prices or yields other than the respective prices or yields indicated on the inside cover page of this Official Statement, and prospective purchasers of the Series 2018A Bonds at other than their original issuance, should consult their own tax advisers regarding other tax considerations such as the consequences of market discount, as to all of which Bond Counsel expresses no opinion.

Risk of Future Legislative Changes and/or Court Decisions

Legislation affecting tax-exempt obligations is regularly considered by the United States Congress and may also be considered by the State legislature. Court proceedings may also be filed, the outcome of which could modify the tax treatment of obligations such as the Bonds. There can be no assurance that legislation enacted or proposed, or actions by a court, after the date of issuance of the Bonds will not have an adverse effect on the tax status of interest or other income on the Bonds or the market value or marketability of the Bonds. These adverse effects could result, for example, from changes to federal or state income tax rates, changes in the structure of federal or state income taxes (including replacement with another type of tax), or repeal (or reduction in the benefit) of the exclusion of interest on the Bonds from gross income for federal or state income tax purposes for all or certain taxpayers.

For example, the recent federal tax legislation that was enacted on December 22, 2017 reduces corporate tax rates, modifies individual tax rates, eliminates many deductions, repeals the corporate alternative minimum tax (for taxable years beginning after December 31, 2017) and eliminates tax-exempt advance refunding bonds, among other things. Additionally, investors in the Bonds should be aware that future legislative actions may increase, reduce or otherwise change (including retroactively) the financial benefits and the treatment of all or a portion of the interest on the Bonds for federal income tax purposes for all or certain taxpayers. In all such events, the market value of the Bonds may be affected and the ability of holders to sell their Bonds in the secondary market may be reduced. The Bonds are not subject to special mandatory redemption, and the interest rates on the Bonds are not subject to adjustment, in the event of any such change in the tax treatment of interest on the Bonds.

Investors should consult their own financial and tax advisors to analyze the importance of these risks.

Original Issue Premium

The Series 2018A Bonds (“Premium 2018A Bonds”) as indicated on the inside cover page of this Official Statement were offered and sold to the public at a price in excess of their stated redemption price at maturity (the principal amount). That excess constitutes bond premium. For federal income tax purposes, bond premium is amortized over the period to maturity of a Premium 2018A Bond, based on the yield to maturity of that Premium 2018A Bond (or, in the case of a Premium 2018A Bond callable prior to its stated maturity, the amortization period and yield may be required to be determined on the basis of an earlier call

date that results in the lowest yield on that Premium 2018A Bond), compounded semiannually. No portion of that bond premium is deductible by the owner of a Premium 2018A Bond. For purposes of determining the owner's gain or loss on the sale, redemption (including redemption at maturity) or other disposition of a Premium 2018A Bond, the owner's tax basis in the Premium 2018A Bond is reduced by the amount of bond premium that is amortized during the period of ownership. As a result, an owner may realize taxable gain for federal income tax purposes from the sale or other disposition of a Premium 2018A Bond for an amount equal to or less than the amount paid by the owner for that Premium 2018A Bond. A purchaser of a Premium 2018A Bond in the initial public offering at the price or yield for that Premium 2018A Bond stated on the inside cover pages of this Official Statement who holds that Premium 2018A Bond to maturity (or, in the case of a callable Premium 2018A Bond, to its earlier call date that results in the lowest yield on that Premium 2018A Bond) will realize no gain or loss upon the retirement of that Premium 2018A Bond.

Owners of Premium 2018A Bonds should consult their own tax advisors as to the determination for federal income tax purposes of the amount of bond premium properly accruable or amortizable in any period with respect to the Premium 2018A Bonds and as to other federal tax consequences and the treatment of bond premium for purposes of state and local taxes on, or based on, income.

LEGAL MATTERS

Certain legal matters relating to the issuance of the Series 2018A Bonds are subject to the approving opinion of Bond Counsel to the Airports Authority, Squire Patton Boggs (US) LLP, which will be furnished upon the issuance of the Series 2018A Bonds. The form of such opinion is set forth in APPENDIX E of this Official Statement (the "Bond Opinion"). The Bond Opinion is limited to matters relating to the issuance of the Series 2018A Bonds and to the status of interest on the Series 2018A Bonds as described in "TAX MATTERS."

Certain legal matters will be passed upon for the Airports Authority by Philip G. Sunderland, Esquire, Senior Vice President and General Counsel of the Airports Authority, and by Squire Patton Boggs (US) LLP, as Disclosure Counsel. Certain legal matters will be passed upon for the Underwriters by their counsel, Katten Muchin Rosenman LLP.

LITIGATION

The Airports Authority is involved in various claims and lawsuits arising in the ordinary course of business that are covered by insurance or that the Airports Authority does not believe to be material. Although the outcome of these lawsuits is not presently determinable, in the opinion of the Airports Authority's general counsel, the likely outcome in these matters that are not covered by insurance will not have a material adverse effect on the financial condition of the Airports Authority. Except as described below, no litigation is pending or, to the knowledge of the Airports Authority, threatened against the Airports Authority (a) seeking to restrain or enjoin the issuance of the Series 2018A Bonds or the collection of Net Revenues pledged under the Indenture, or (b) in any way contesting or affecting any authority for the issuance of the Series 2018A Bonds, the validity or binding effect of the Series 2018A Bonds, the resolution of the Airports Authority authorizing and implementing the Series 2018A Bonds or the Indenture,

or (c) in any way contesting the creation, existence, powers or jurisdiction of the Airports Authority, the validity or effect of the Federal Act, the Federal Lease, the Virginia Act or the District Act, or any provision thereof, or the application of the proceeds of the Series 2018A Bonds.

On July 5, 2016, six users of the Dulles Toll Road, individually and on behalf of all others similarly situated, filed a class action complaint against the Airports Authority, the United States Department of Transportation and the Secretary of Transportation in the federal district court for the District of Columbia. In the lawsuit as originally filed, among other claims, the plaintiffs claimed that the payment of tolls on the Dulles Toll Road may not be used to subsidize the construction of the Dulles Metrorail Project and questioned the constitutionality of the Airports Authority and certain of its activities as operator of the Dulles Toll Road that are related to the Dulles Metrorail Project and to the Airports Authority's Dulles Corridor Enterprise. The lawsuit was transferred to the federal district court for the Eastern District of Virginia in November 2016. Soon thereafter, the plaintiffs amended their complaint to add certain allegations and claims regarding the operation of the Aviation Enterprise by the Airports Authority and requesting, among other things, that the Secretary of Transportation retake possession of the Airports from the Airports Authority. Many of the claims raised in the amended complaint are substantially similar to claims made in previous litigation challenging the tolls the Airports Authority has set for the Dulles Toll Road and/or the constitutionality of the Airports Authority, all of which have been concluded in favor of the Airports Authority. On May 30, 2017, the federal district court in Virginia granted the motions to dismiss filed by Airports Authority and the federal defendants, rejected all claims asserted by plaintiffs in the amended complaint, and dismissed the amended complaint with prejudice. Plaintiffs thereafter filed an appeal of the district court's ruling in the U.S. Court of Appeals for the Fourth Circuit. Briefing has been completed and a decision from the court of appeals is anticipated in the third or fourth quarter of 2018. While the Airports Authority intends to continue to vigorously defend against the claims raised in this litigation, it cannot predict what action the court of appeals might take, or whether a decision by that court which is adverse to the Airports Authority will directly affect the Aviation Enterprise.

A new lawsuit was filed on April 10, 2018, in the federal district court for the Eastern District of Virginia, also challenging the toll rates established for the Dulles Toll Road. The suit, filed by a single plaintiff as a class action on behalf of all users of the Dulles Toll Road since 2008, seeks damages in an amount no less than the toll revenues the Authority has collected for the Dulles Metrorail Project. The plaintiff's sole claim is that the Airports Authority has established excessive toll rates, which unfairly and impermissibly burden the plaintiff's use of the Dulles Toll Road and, as a result, violate his federal constitutional "right to travel intrastate." This claim is similar to claims made in previous litigation challenging the tolls that the Airports Authority has set for the Dulles Toll Road, all of which have been concluded in favor of the Airports Authority. The Airports Authority intends to vigorously defend against the claim raised in this litigation.

RATINGS

Fitch Ratings (“Fitch”), Moody’s Investors Service, Inc. (“Moody’s”) and S&P Global Ratings (“S&P”) have assigned the Series 2018A Bonds the ratings of “AA-”, “Aa3” and “AA-”, respectively. Fitch assigned the Series 2018A Bonds the rating of “AA-” with a “Stable Outlook” on May 18, 2018. Moody’s assigned the Series 2018A Bonds the rating of “Aa3” with a “Stable Outlook” on May 15, 2018. S&P assigned the Series 2018A Bonds the rating of “AA-” with a “Stable Outlook” on May 21, 2018. The Airports Authority furnished to such rating agencies the information contained in this Official Statement and certain other materials and information about the Airports Authority. Generally, rating agencies base their ratings on such materials and information, as well as investigations, studies and assumptions by the rating agencies.

A rating, including any related outlook with respect to potential changes in such ratings, reflects only the view of the agency giving such rating and is not a recommendation to buy, sell or hold the Series 2018A Bonds. An explanation of the procedure and methodology used by each rating agency and the significance of such ratings may be obtained from the rating agency furnishing the same. Such ratings may be changed at any time, and no assurance can be given that they will not be revised downward or withdrawn entirely by any of such rating agencies if, in the judgment of any of them, circumstances so warrant. Any such downward revision or withdrawal of any of such ratings is likely to have an adverse effect on the market price of the Series 2018A Bonds.

UNDERWRITING

The underwriters of the Series 2018A Bonds listed on the cover of this Official Statement, for whom Barclays Capital Inc. acts as representative (the “Underwriters”), have agreed to purchase the Series 2018A Bonds, at a price of \$642,675,895.60 (consisting of \$558,430,000.00 aggregate par amount of the Series 2018A Bonds, plus original issue premium of \$85,873,863.85, less an underwriting discount of \$1,627,968.25) pursuant to the Bond Purchase Agreement, entered into by and between the Airports Authority and the Underwriters (the “Bond Purchase Agreement”). The Underwriters will be obligated to purchase all of the Series 2018A Bonds if any Series 2018A Bonds are purchased. The Underwriters reserve the right to join with other underwriters in the offering of the Series 2018A Bonds. The obligations of the Underwriters to accept the delivery of the Series 2018A Bonds are subject to various conditions set forth in the Bond Purchase Agreement.

The Underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage services. Certain of the Underwriters and their respective affiliates have, from time to time, performed, and may in the future perform, various financial advisory and investment banking services for the Airports Authority, for which they received or will receive customary fees and expenses.

In the ordinary course of their various business activities, the Underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and

equity securities (or related derivative securities, which may include credit default swaps) and financial instruments (including bank loans) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve securities and instruments of the Airports Authority.

The Underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

Jefferies LLC, one of the Underwriters of the Series 2018A Bonds, has entered into an agreement (the “Agreement”) with E*TRADE Securities LLC (“E*TRADE”) for the retail distribution of municipal securities. Pursuant to the Agreement, Jefferies will sell Series 2018A Bonds to E*TRADE and will share a portion of its selling concession compensation with E*TRADE.

Morgan Stanley & Co. LLC, one of the Underwriters of the Series 2018A Bonds, has entered into a retail distribution arrangement with its affiliate Morgan Stanley Smith Barney LLC. As part of this arrangement, Morgan Stanley & Co. LLC may distribute municipal securities to retail investors through the financial advisor network of Morgan Stanley Smith Barney LLC. As part of this arrangement, Morgan Stanley & Co. LLC may compensate Morgan Stanley Smith Barney LLC for its selling efforts with respect to the Series 2018A Bonds.

VERIFICATION AGENT

Robert Thomas CPA, LLC will verify from the information provided to them the mathematical accuracy of the computations contained in the provided schedules as of the delivery date of the Series 2018A Bonds to determine that the proceeds of the Series 2018A Bonds and other funds of the Airports Authority to be held in escrow under the Refunding Agreements will be sufficient to pay the principal or redemption price, as applicable, and accrued interest with respect to the Refunded Bonds. Robert Thomas CPA, LLC will express no opinion on the assumptions provided to them.

RELATIONSHIP OF PARTIES

Manufacturers and Traders Trust Company serves as the Trustee for the Bonds, the CP Notes and the Airports Authority’s Dulles Toll Road Revenue Bonds, as trustee for the Airports Authority’s pension plan and safe keeper of certain operating funds of the Airports Authority.

CONTINUING DISCLOSURE

The Airports Authority has entered into a Continuing Disclosure Agreement (the “Disclosure Agreement”) with Digital Assurance Certification, L.L.C. (“DAC”) to assist the Underwriters in complying with the requirements of Rule 15c2-12 (the “Rule”) promulgated by the SEC pursuant to the Securities Exchange Act of 1934, as amended. The Disclosure Agreement requires the Airports Authority to file with DAC (i) certain annual financial

information and operating data and (ii) certain event notices. Under the Disclosure Agreement, DAC will serve as the Airports Authority's Disclosure Dissemination Agent for purposes of filing annual disclosure and any event notices required by the Rule with the MSRB for posting on EMMA. DAC also will provide certain Airports Authority financial information through DAC's web site at www.dacbond.com. The form of the Disclosure Agreement is attached as APPENDIX F. The Airports Authority may amend the Disclosure Agreement in the future so long as such amendments are consistent with the Rule as then in effect.

The Disclosure Agreement requires the Airports Authority to provide limited information at specified times. While the Airports Authority expects to provide substantial additional information, as it has in the past, it is not legally obligated to do so. A default by the Airports Authority under the Disclosure Agreement is not an Event of Default with respect to the Series 2018A Bonds. The Disclosure Agreement permits any Bondholder to seek specific performance of the Airports Authority's obligations thereunder after providing a 30-day prior written qualifying notice to the Airports Authority and 30 days to cure, but no assurance can be given as to the outcome of any such proceeding.

The Airports Authority believes that it has complied in all material respects with its previous continuing disclosure undertakings during the last five years.

CONCLUDING STATEMENT

To the extent that any statements made in this Official Statement involve matters of opinion, forecasts or estimates, whether or not expressly stated to be such, they are made as such and not as representations of fact or certainty, and no representation is made that any of those statements have been or will be realized. Historical data is presented for informational purposes only and is not intended to be a projection of future results. Information in this Official Statement has been derived by the Airports Authority from official and other sources and is believed by the Airports Authority to be accurate and reliable. Information other than that obtained from official records of the Airports Authority has not been independently confirmed or verified by the Airports Authority and its accuracy is not guaranteed. The Trustee has not participated in the preparation of this Official Statement and takes no responsibility for its content.

Neither this Official Statement nor any statement that may have been or that may be made orally or in writing is to be construed as or as part of a contract with the original purchasers or subsequent holders or beneficial owners of the Series 2018A Bonds.

All of the appendices are integral parts of this Official Statement and should be read together with the other parts of this Official Statement. The description of the Indenture does not purport to be comprehensive or definitive, and prospective purchasers of the Series 2018A Bonds are referred to the Indenture for the complete terms thereof. Copies of the Fiftieth Supplemental Indenture may be obtained from the Airports Authority. The text of the Master Indenture may be obtained from the Airports Authority's website at www.mwaa.com and at www.dacbond.com.

This Official Statement has been prepared and delivered by the Airports Authority and executed for and on behalf of the Airports Authority by its official identified below.

Mr. Warner H. Session
Chairman of the Board of Directors

Mr. John E. Potter
President and Chief Executive Officer

Metropolitan Washington Airports Authority
1 Aviation Circle
Washington, D.C. 20001-6000

Re: **Report of the Airport Consultant
Metropolitan Washington Airports Authority
Airport System Revenue and Refunding Bonds
Series 2018A (AMT)**

Dear Mr. Session and Mr. Potter:

LeighFisher, in conjunction with DKMG Consulting, LLC, is pleased to submit this Report of the Airport Consultant in connection with the proposed issuance by the Metropolitan Washington Airports Authority (the Airports Authority) of its Airport System Revenue and Refunding Bonds Series 2018A (AMT) (the 2018A Bonds). This letter and the accompanying attachment and financial exhibits constitute our report.

The Airports Authority operates Ronald Reagan National Airport (Reagan National Airport or Reagan) and Washington Dulles International Airport (Dulles International Airport or Dulles) (collectively, the Airports) under the terms of an agreement and deed of lease with the federal government (the Federal Lease) that, as amended, extends to 2067.

The Airports Authority proposes to issue the 2018A Bonds to fund certain of the costs of capital improvements at the Airports and to refund certain outstanding Airport System Revenue Bonds, as follows:

- Approximately \$223 million principal amount to fund the costs of capital improvements (the 2018A New Money Bonds)
- Approximately \$389 million principal amount to refund approximately \$160 million principal amount of outstanding Series 2008A Bonds and \$254 million principal amount of outstanding Series 2009C Bonds (the 2018A Refunding Bonds)

Mr. Warner H. Session
Mr. John E. Potter
May 16, 2018

The report takes into account Bonds that the Airports Authority plans to issue in 2019 through 2022 in the assumed principal amount of approximately \$1.381 billion to fund certain of the costs of capital improvements to the Airports (the 2019-2022 Bonds).

Indenture

The proposed 2018A Bonds and planned 2019-2022 Bonds are to be issued under the 2001 Amended and Restated Master Indenture of Trust securing Airport System Revenue Bonds, as supplemented and amended (the Indenture). Except as otherwise defined, capitalized terms in this report are used as defined in the Indenture.

Aviation Enterprise Fund

The Airports Authority operates and develops the Airports through the Aviation Enterprise Fund. The Airports Authority also oversees the operation and development of the Dulles Toll Road and the Dulles Corridor Metrorail Project through the Dulles Corridor Enterprise Fund. The Aviation Enterprise Fund and the Dulles Corridor Enterprise Fund are segregated. Under the Indenture, the Airports Authority may not use Net Revenues pledged for the payment of Airport System Revenue Bonds to pay the operating or debt service costs of the Dulles Toll Road or the Dulles Corridor Metrorail Project. Revenues from the operation of the Dulles Toll Road are Released Revenues under the Indenture and are excluded from the pledge of Net Revenues securing the Bonds. Only the financial operations of the Aviation Enterprise Fund are considered in this report.

Capital Construction Programs

The Airports Authority is implementing capital improvements (collectively the Capital Construction Programs or CCP) to expand, redevelop, and modernize the Airports consistent with their master plans.

Estimated project costs for the elements of the CCP that were substantially completed through 2016 (the 2001-2016 CCP) totaled \$5.011 billion, comprising \$0.544 billion for projects at Reagan and \$4.466 billion for projects at Dulles. Included in the costs of the 2001-2016 CCP is the Airports Authority's contribution of \$233 million to the construction of a Metrorail station serving Dulles, expected to be operational in 2020.

Estimated project costs for the elements of the CCP that are scheduled for completion in 2015 through 2024 (the 2015-2024 CCP), including allowances for inflation, total \$1.877 billion, comprising \$1.225 billion for projects at Reagan and \$0.652 billion for projects at Dulles.

Mr. Warner H. Session
Mr. John E. Potter
May 16, 2018

Projects in the 2015-2024 CCP for Reagan are (1) construction of a new north concourse to replace the hardstands currently used for regional airline operations; (2) construction of space above the arrivals curbside roadway at Terminal B/C to accommodate new passenger security screening checkpoints to replace the separate checkpoints at the entrance to each concourse and allow passengers to move between the concourses post-security screening (referred to as the secure National Hall); (3) planning, programming and design for the eventual redevelopment of Terminal A; (4) construction of a new parking garage; and (5) various airfield improvement projects and upgrades to roadways, utility systems, and other infrastructure.

Projects in the 2015-2024 CCP for Dulles include (1) replacement of deteriorated airfield pavement; (2) construction of additional domestic gates; (3) improvements to increase the capacity of the main terminal and International Arrivals Building; (4) upgrades to utilities and systems at Concourses A, B, C and D; (5) major maintenance of the AeroTrain system; (6) rehabilitation of the mobile lounge fleet; (7) reconstruction of sections of the Dulles International Airport Access Highway; and (8) upgrades to utility systems and other infrastructure.

The Airports Authority has funded or is funding the CCP with a combination of grants from the Federal Aviation Administration (FAA), the Commonwealth of Virginia, and the Transportation Security Administration (TSA); revenues derived from a \$4.50 passenger facility charge imposed at the Airports (PFC Revenues); and Bond proceeds. The Airports Authority expects that the proceeds of the proposed 2018A New Money Bonds and planned 2019-2022 Bonds, together with other available sources of capital funds, will provide all funds needed to complete the CCP.

Security for the Bonds

Under the Indenture, Bonds are secured by a pledge of Net Revenues defined as all Revenues of the Aviation Enterprise Fund plus transfers, if any, from the General Purpose Fund to the Revenue Fund, after provision is made for the payment of Operation and Maintenance (O&M) Expenses. PFC Revenues are excluded from Revenues under the Indenture, unless specifically so designated, and are not pledged to secure Bonds. The Airports Authority has not designated any PFC Revenues as Revenues, although, as discussed in the following section, it intends to use PFC Revenues to pay certain PFC-eligible Bond debt service.

Mr. Warner H. Session
Mr. John E. Potter
May 16, 2018

Rate Covenant

In Section 604(a) (the Rate Covenant) of the Indenture, the Airports Authority covenants that it will fix and adjust from time to time the fees and other charges for the use of the Airports, including services rendered by the Airports Authority, so as to produce Net Revenues at least sufficient to provide for the larger of either:

- (i) The amounts needed for making the required deposits in the Fiscal Year to the Principal Accounts, the Interest Accounts, the Redemption Accounts, the Debt Service Reserve Fund, the Subordinated Bond Funds, the Subordinated Reserve Funds, the Junior Lien Obligations Fund, the Federal Lease Fund, and the Emergency Repair and Rehabilitation Fund; or
- (ii) 125% of Annual Debt Service with respect to Bonds for such Fiscal Year.

The Airports Authority's Fiscal Year is the calendar year ending December 31.

For purposes of demonstrating compliance with the Rate Covenant, Annual Debt Service is defined in the Indenture to exclude the payment of principal of and interest on indebtedness for which funds are, or are reasonably expected to be, available for and which are irrevocably committed to make such payments, including any such funds in an escrow account or any such funds constituting capitalized interest.

Pursuant to the Thirty-fifth Supplemental Indenture, certain Designated Passenger Facility Charges received from the imposition of the \$4.50 PFC at Dulles were irrevocably committed to the payment of PFC-eligible Bond debt service through 2016. The Airports Authority intends to use PFC Revenues to pay certain future PFC-eligible debt service. For purposes of demonstrating compliance with the Rate Covenant, for the forecasts in this report, Annual Debt Service is reduced by such PFC Revenues.

Airline Agreement

Effective January 2015, the Airports Authority and airlines accounting for substantially all passengers at the Airports (the Signatory Airlines) entered into a new Airport Use Agreement and Premises Lease (the Airline Agreement) that succeeded an agreement that was in effect from 1990 through 2014. The Airline Agreement provides for the use and occupancy of the Airports and establishes the methodologies for calculating the terminal rentals, landing fees, and other fees and charges payable by the Signatory Airlines. Certain capitalized terms in this report are used as defined in the Airline Agreement.

Under an "extraordinary coverage protection" provision of the Airline Agreement, the Airports Authority may adjust rentals, fees, and charges payable by the Signatory

Mr. Warner H. Session
Mr. John E. Potter
May 16, 2018

Airlines to ensure that projected Net Revenues at the Airports are not less than required to meet the 125% debt service coverage requirement of the Rate Covenant.

The term of the Airline Agreement is 10 years, through 2024, for both Reagan and (under an amendment that was executed in October 2016) Dulles. For purposes of this report, it was assumed that the Signatory Airlines will pay all rentals, fees, and charges as calculated under the provisions of the Airline Agreement. No payments under the extraordinary coverage protection provision are forecast to be required.

Under the provisions of the Airline Agreement, the Signatory Airlines have consented to the funding plan for the CCP, thereby allowing debt service requirements and O&M Expenses allocable to airline cost centers to be recovered through Signatory Airline rentals, fees, and charges as provided for in the Airline Agreement.

Scope of Report

The purpose of this report is to evaluate the ability of the Airports Authority to produce Net Revenues sufficient to meet the requirements of the Rate Covenant taking into account the estimated debt service requirements of outstanding Bonds, the proposed 2018A Bonds and the planned 2019-2022 Bonds. The report covers a five-year forecast period through 2023.

In preparing the report, we analyzed:

- Future airline traffic demand at the Airports, giving consideration to the demographic and economic characteristics of the Airports service region, historical trends in airline service and traffic, the roles of the Airports in airline route systems, constraints on aircraft operations at Reagan, and other key factors that may affect future traffic.
- Estimated sources and uses of funds for the CCP and associated Bond debt service requirements.
- Historical and forecast PFC Revenues and the use of such PFC Revenues to pay project costs and PFC-eligible Bond debt service.
- Historical relationships among revenues, expenses, and airline traffic at the Airports.
- Budgeted and year-to-date revenues and expenses for 2018, expected staffing requirements, the facilities being constructed under the CCP, and other factors that may affect future revenues and expenses.

Mr. Warner H. Session
 Mr. John E. Potter
 May 16, 2018

- The Airports Authority’s policies and agreements relating to airline use and occupancy of the Airports, including the calculation of airline rentals, fees, and charges under the Airline Agreement.
- The Airports Authority’s policies and contractual agreements relating to the operation of other services and concessions, including public parking, rental car concessions, terminal concessions, and the leasing of buildings and grounds.

We also identified key factors upon which the future financial results of the Airports Authority depend, formulated assumptions about those factors, and on the basis of those assumptions, assembled the financial forecasts presented in the exhibits at the end of the report. Historical financial data and estimates of project costs, project financing, and annual debt service requirements were provided by the sources noted in the report.

Forecast Airline Payments per Passenger

Exhibits E-4 and E-5 present the forecast financial requirements that determine terminal rentals, landing fees, and other fees and charges payable by the Signatory Airlines under the Airline Agreement. The exhibits also present forecast Signatory Airline payments expressed per enplaned passenger.

Forecast Debt Service Coverage

As shown in the following tabulation and Exhibit G-1, the Net Revenues of the Airports Authority are forecast to be sufficient to meet the requirements of the Rate Covenant and to exceed the required 125% debt service coverage in each year of the forecast period.

FORECAST DEBT SERVICE COVERAGE			
in thousands			
Year	Net Revenues [A]	Annual Debt Service (a) [B]	Debt service coverage [A/B]
2018	\$554,281	\$336,542	1.65x
2019	562,829	313,140	1.80x
2020	579,120	340,182	1.70x
2021	601,362	362,788	1.66x
2022	613,392	369,972	1.66x
2023	619,730	366,956	1.69x

(a) Net of PFC Revenues that the Airports Authority intends to use to pay PFC-eligible Bond debt service.

Mr. Warner H. Session
Mr. John E. Potter
May 16, 2018

Assumptions Underlying the Financial Forecasts

The financial forecasts presented in this report are based on information and assumptions that were provided by or reviewed with and agreed to by Airports Authority management as being appropriate for the report’s purpose. The forecasts reflect management’s expected course of action during the forecast period and in management’s judgment, present fairly the expected financial results of the Airports Authority. Those key factors and assumptions that are significant to the forecasts are set forth in the report, which should be read in its entirety for an understanding of the forecasts and the underlying assumptions.

In our opinion, the underlying assumptions provide a reasonable basis for the forecasts. However, any financial forecast is subject to uncertainties. Inevitably, some assumptions will not be realized, and unanticipated events and circumstances may occur. Therefore, there will be differences between the forecast and actual results, and those differences may be material. Accordingly, neither LeighFisher nor DKMG Consulting, LLC, makes any warranty with respect to the information, assumptions, forecasts, opinions, or conclusions disclosed in the report. We have no responsibility to update the report for events and circumstances occurring after the date of the report.

* * * * *

We appreciate the opportunity to serve as Airport Consultant for the Airports Authority’s proposed financing.

Respectfully submitted,

Leigh Fisher

AIRPORT FACILITIES

REAGAN NATIONAL AIRPORT

Reagan National Airport, opened in 1941, is located on approximately 860 acres along the Potomac River in Arlington County, Virginia, approximately 3 miles south of central Washington, D.C. Roadway access is provided via the George Washington Memorial Parkway and Route 1 through the Crystal City area of Arlington, Virginia. Access is also provided by the Metrorail rapid transit system via a station adjacent to the airport's passenger terminals.

Reagan has three runways. Runway 1-19 (7,169 feet long) is the primary air carrier runway, capable of accommodating up to Airplane Design Group (ADG) IV aircraft (B-767 and similar). Runway 15-33 (5,204 feet long) and Runway 4-22 (5,000 feet long) are used primarily by smaller aircraft.

Passenger Terminals at Reagan

The passenger terminals at Reagan provide 44 loading bridge-equipped aircraft gates and associated passenger check-in, security screening, baggage claim, and other functions in approximately 1.2 million square feet of space. Terminal A, which dates from the opening of the airport, is listed on the National Register of Historic Places and provides approximately 250,000 square feet of space and nine aircraft gates. Terminal B/C, opened in 1997, provides approximately 990,000 square feet of space and 35 aircraft gates on three concourses, with security screening areas at the entrance to each concourse. In addition, 12 hardstand positions are provided for regional airline aircraft. Table 1 shows the distribution and use of gates by airline.

The Airports Authority provides 9,061 revenue-producing public automobile parking spaces at Reagan. Approximately 3,000 additional spaces are provided for employee parking. Direct connections from Terminal B/C to the Metrorail station and the public parking garages are provided through two enclosed pedestrian bridges. Connections from Terminal A to the Metrorail station and the public parking garages are provided via shuttle buses and an underground walkway.

Table 1
GATE DISTRIBUTION AND USE BY AIRLINE
 Reagan Washington National Airport
 As scheduled for June 2018

	Terminal		Average daily departures		Average daily departing seats		
	A	B/C	Total	Departures	Per gate	Seats	Per departure
	Total

United		<u>4</u>	<u>4</u>	<u>33.9</u>	8.5	<u>3,017</u>	89
Subtotal	<u>9</u>	<u>16</u>	<u>25</u>	<u>175.8</u>	7.0	<u>20,683</u>	118
Total gates	9	47	56	413.6	7.4	41,176	100

Notes: Departures and departing seats include those by regional affiliate airlines. Numbers may not add to totals shown because of rounding.

- (a) American Eagle flights operated by Republic Airlines with Embraer 175 aircraft are included.
- (b) Hardstand positions for small regional airline aircraft, not equipped with loading bridges.
- (c) United operates 2 daily departures on a gate shared with Alaska. These departures are included with Alaska's.
- (d) Alaska operates 3 daily departures on a gate shared with Delta. These departures are included with Delta's.

Sources: Airports Authority records as of March 2018 and OAG Aviation Worldwide Ltd., OAG Analyser database, accessed March 2018.

Capital Construction Programs at Reagan

Exhibit A shows the sources and uses of funds for the Capital Construction Programs at Reagan. Substantially all projects in the 2001-2016 CCP are complete. The principal projects in the 2015-2024 CCP are:

North Concourse. A new north concourse, connected to the three existing Terminal B/C concourses, is being constructed to accommodate 14 loading-bridge-equipped gates for large regional airline aircraft. The concourse will replace the hardstands currently used for regional airline operations. Enabling projects include

the demolition of an office building and hangars and modifications to the central utility plant.

Secure National Hall. Space is being constructed above the arrivals curbside roadway at the north and south ends of Terminal B/C to accommodate new passenger security screening checkpoints. The two new checkpoints will replace the three separate checkpoints at the entrances to each concourse and allow passengers to move between the Terminal B/C concourses through the National Hall without having to be rescreened. Screened passengers will have access to the concession outlets in the National Hall and the space now used for screening will become available for redevelopment for concessions and other facilities.

Terminal A Rehabilitation. Planning, programming and design is being undertaken for the eventual redevelopment of Terminal A. Near-term terminal improvements include upgrades and rehabilitation of restrooms, baggage systems, passenger loading bridges, utility systems and other facilities.

Parking Garage. A new parking garage, providing approximately 1,600 spaces on three levels, will be constructed at a site at the southwest corner of the airport. Shuttle bus service will be provided between the garage and the terminals.

Other 2015-2024 CCP projects at Reagan include airfield pavement replacement, other airfield improvement projects, upgrades to roadways and utility systems, and other infrastructure improvements.

DULLES INTERNATIONAL AIRPORT

Dulles International Airport, opened in 1962, is located on approximately 11,830 acres of land in Fairfax and Loudoun counties, Virginia, approximately 26 miles west of central Washington, D.C.

The Dulles International Airport Access Highway, a limited-access highway under the jurisdiction of the Airports Authority, is the primary access route to the airport. The Airports Authority provides Silver Line Express Bus service between Dulles and the Wiehle-Reston East Metrorail station, the current western terminus of the Metrorail Silver Line. Direct Silver Line service to a future Metrorail station at Dulles is scheduled to begin in 2020. The Washington Metropolitan Area Transit Authority (WMATA) also provides bus service between Dulles and the Rosslyn (Arlington, Virginia) and L'Enfant Plaza (Washington, D.C.) Metrorail stations.

Dulles has four runways: Runway 1L-19R (9,400 feet long), Runway 1C-19C (11,500 feet long), Runway 1R-19L (11,500 feet long), and Runway 12-30 (10,500 feet long). All runways are capable of accommodating operations by ADG VI aircraft (such as the A380). Most aircraft operations at the airport are conducted in parallel flow on the three north-south Runways 1-19. Crosswind Runway 12-30 is used primarily for departures to the west and arrivals from the east during periods of high winds.

Passenger Terminals at Dulles

The passenger terminal complex at Dulles consists of the Eero Saarinen-designed main terminal and four midfield concourses. All passenger check-in, security screening, and baggage claim functions are accommodated at the main terminal. Processing of international arrivals is accommodated at both the main terminal and the Concourse C federal inspection services (FIS) facility. The main terminal also provides four loading bridge-equipped aircraft gates, referred to as the Z Gates. The main terminal, including the International Arrivals Building (IAB), and midfield Concourses A, B, C, and D collectively encompass approximately 3.7 million square feet of floor space. The main terminal and four concourses provide 111 aircraft gates, 82 of which are equipped with loading bridges and 29 provide ground loading for regional airline aircraft. Two gates are configured for use by ADG VI aircraft.

The security mezzanine adjoins the main terminal station for the underground automated people-mover system, known as the AeroTrain. The AeroTrain system has four stations, one located at the main terminal (integrated with the security mezzanine), two serving Concourses A and B, and one serving Concourse C. The Concourse C station is located at the site of a future midfield concourse (not included in the 2015-2024 CCP), which will eventually replace Concourses C and D. Passengers access Concourse C from the AeroTrain station via an underground walkway. During peak periods, the AeroTrain system operates with headways of approximately 2.5 minutes and achieves travel times of approximately 2.0 minutes between stations.

Mobile lounges provide shuttle service to and from Concourse D and the IAB at the main terminal. An underground moving walkway also provides access between the main terminal and Concourses A and B.

The IAB accommodates the FIS (customs, immigration, and agriculture inspection) conducted by U.S. Customs and Border Protection (CBP) for most international arriving passengers. The IAB, which is connected to the main terminal, was expanded and upgraded as part of the 2001-2016 CCP and has a processing capacity of approximately 2,400 passengers per hour.

Concourses A and B, which are connected, together provide approximately 1.1 million square feet of floor space. Concourse A is used by United and provides 29 parking positions for regional airline aircraft. Concourse B (also referred to as the Tier 1 Concourse) accommodates all airlines other than United and provides 32 gates with loading bridges, up to 17 of which are served by a sterile corridor to accommodate arriving international passengers.

Concourses C and D, which are connected, together provide 900,000 square feet of floor space and 46 loading bridge-equipped gates, all of which are used by United. Of the 46 gates, 12 are served by a sterile corridor to a CBP facility, referred to as the

midfield FIS, that provides federal inspection services for passengers arriving on United and other Star Alliance airlines who are connecting to domestic flights. The midfield FIS has a processing capacity of approximately 1,200 passengers per hour.

Table 2 shows the distribution and use of the gates at Dulles by airline.

United leases, on a preferential basis, all 29 regional airline gates at Concourse A and 42 of the 46 gates at Concourses C and D. The Airports Authority has the right under the Airline Agreement to reallocate preferential-use gates and associated holdrooms periodically if needed to provide adequate facilities for all airlines operating or desiring to operate at the airport. The Airports Authority also may require a Signatory Airline to accommodate another airline at its preferential-use gates.

The Airports Authority manages and assigns four gates on Concourse D (now assigned to United), all 32 gates on Concourse B, and the four Z Gates under an application and permit process whereby the gates are operated on a common-use basis in accordance with established policies and procedures. The Airports Authority may cancel a permit with a 30-day written notice. A Signatory Airline may cancel a permit with a 60-day written notice.

The Airports Authority provides 22,607 revenue-producing public automobile parking spaces at Dulles. An additional 6,522 spaces are provided for employee parking. The two garages at Dulles are connected to the main terminal, one with an underground walkway with moving sidewalks (which is currently closed due to rail station construction) and the other with a covered walkway. The garages and remote surface parking lots are served via shuttle buses.

Capital Construction Programs at Dulles

Exhibit A shows the sources and uses of funds for the Capital Construction Programs at Dulles. Substantially all projects in the 2001-2016 CCP are complete, with the exception of the Dulles Metrorail station, scheduled to open in 2020. Projects in the 2015-2024 CCP include:

Airfield Pavement Replacement. Various sections of deteriorated airfield pavement will be reconstructed.

Additional Aircraft Gates. Up to six additional gates will be constructed when required for increased domestic airline operations.

Upgrades to Main Terminal and IAB. Upgrades to the terminal will include improvements to baggage handling systems and enhancement of the capacity of the International Arrivals Building.

Upgrades to Concourses A, B, C and D. Upgrades to the concourses will include replacement of electrical equipment and other utility systems.

Other 2015-2024 CCP projects at Dulles include major maintenance of the AeroTrain system, rehabilitation of the mobile lounge fleet, reconstruction of access highway pavement, upgrades to stormwater and sanitary sewer systems, and other utility and infrastructure upgrades.

Gates not in use	—	<u>2</u>	—	—	<u>2</u>	<u>4</u>	—		—	
Total gates	29	32	22	24	4	111	351.4	3.2	43,846	125

Note: Departures and departing seats include those by regional affiliate airlines.

- (a) Hardstand positions for regional airline aircraft, not equipped with loading bridges. The configuration of these positions is changed from time to time as the types of aircraft operated at the positions change. As a result, the number of positions may not match the number shown in other Airports Authority records.
- (b) All Tier 1 Concourse gates are shown as B gates, although 11 gates at the east end of the concourse are designated as A gates on airport signage. The gate count is the number of marked aircraft parking positions, some of which are equipped with two loading bridges to accommodate large widebody aircraft.
- (c) All gates are leased on a preferential-use basis except for four common-use gates on Concourse D, which are assigned to United.
- (d) All gates are operated on a common-use basis under a permit process.
- (e) Departures and departing seats include some by Star Alliance airlines operating at Concourses C and D.

Source: Airports Authority records as of March 2018 and OAG Aviation Worldwide Ltd., OAG Analyser database, accessed March 2018.

BASIS FOR AIRLINE PASSENGER DEMAND

AIRPORTS SERVICE REGION

Reagan National Airport and Dulles International Airport serve the greater Washington, D.C. area, home of the nation's capital. The Airports service region, as defined for purposes of this report, is the Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Statistical Area (MSA) encompassing the District of Columbia; the Maryland counties of Calvert, Charles, Frederick, Montgomery, and Prince George's; the Virginia counties of Arlington, Clarke, Culpeper, Fairfax, Fauquier, Loudoun, Prince William, Rappahannock, Spotsylvania, Stafford, and Warren; the independent Virginia cities of Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park; and the West Virginia county of Jefferson. Figure 1 shows a map of the Airports service region.

Portions of the Airports service region also are served by Baltimore/Washington International Thurgood Marshall Airport (Baltimore/Washington Airport or BWI), located approximately 30 miles northeast of Washington, D.C. and operated by the Maryland Aviation Administration. Information on competing airline service at Reagan, Dulles, and BWI is discussed in the later section "Competing Airports Serving the Region."

DEMOGRAPHIC AND ECONOMIC PROFILE

The demographic and economic factors that most strongly influence airline passenger demand at the Airports are the population, per capita income, and employment of the Airports service region, one of the nation's largest metropolitan areas. Its residents are on average wealthier than those of the nation as a whole, resulting in high rates of air travel to and from the Airports. In addition, tourism, government, and business-related travel have a strong role in generating visitors to the region.

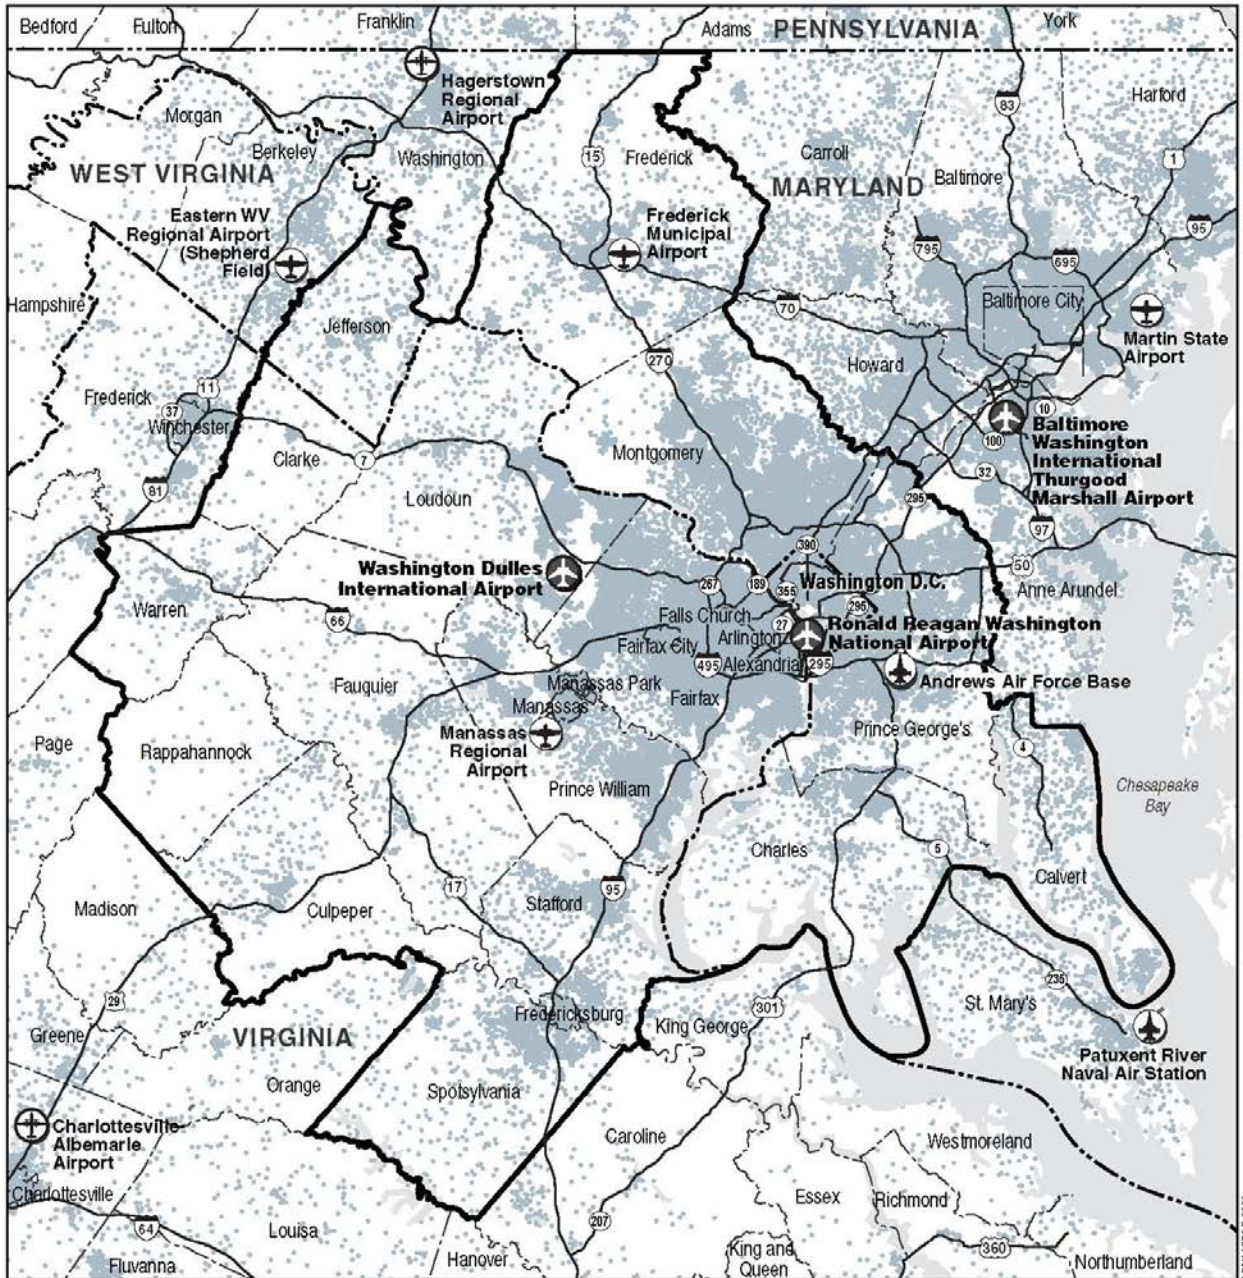

Historical Socioeconomic Data

Table 3 shows data on historical population, per capita income, nonagricultural employment, and unemployment rates for the Airports service region and the nation.

Population. Between 2010 and 2017 (the most recent data available), the population of the Airports service region increased an average of 1.3% annually, compared with a 0.7% average annual increase for the nation as a whole. As shown in Table 4, in 2017, the Airports service region was the sixth most populous metropolitan area in the nation. Between 2007 and 2017, the region was the fifth fastest growing MSA among the nation's 20 most populous MSAs.

Per Capita Income. Between 2010 and 2016 (the most recent data available), per capita personal income in the Airports service region increased an average of 0.7% annually, compared with an average annual increase of 1.8% for the nation as a whole. Even so, the Airports service region's per capita personal income in 2016 (\$66,733) was 35.5% higher than the national average (\$49,246). More than one

million households in the Airports service region have annual incomes of \$100,000 or more. This number represents 47.0% of the region's households, a proportion almost double that of the nation as a whole (24.6%), and the highest among the nation's 20 most populous MSAs.

2015	6,092	321,040	67,382	50,085	3,174	141,843	4.4	5.3
2016	6,151	323,406	68,155	50,252	3,229	144,352	3.8	4.9
2017	6,217	325,719	n.a.	50,392	3,286	146,627	3.7	4.4
Average annual percent increase								
2000-2010	1.5%	0.9%	0.8%	0.4%	1.0%	(0.1%)		
2010-2017	1.3	0.7	0.7(a)	1.5	1.4	1.7		

Airports service region = The 23 counties and independent cities (plus the District of Columbia) in the Washington-Arlington-Alexandria MSA as currently defined (see Figure 1).

Notes: Population numbers are estimated as of July 1 each year. Calculated percentages may not match those shown because of rounding. Employment and unemployment data for the Airports service region for 2017 are preliminary.

n.a. = not available.

(a) Average annual percent increase 2010-2016.

Sources: Population: U.S. Department of Commerce, Bureau of the Census website, www.census.gov, accessed March 2018.

Income: U.S. Department of Commerce, Bureau of Economic Analysis website, www.bea.gov, accessed April 2018.

Employment: U.S. Department of Labor, Bureau of Labor Statistics website, www.bls.gov, accessed February 2018.

Nonagricultural Employment. Between 2010 and 2017, nonagricultural employment in the Airports service region increased an average of 1.4% annually, compared with a 1.7% average annual increase for the nation as a whole.

Unemployment Rates. Since 2010, the rate of unemployment has been lower for the Airports service region than for the nation. In 2017, unemployment in the region was 3.7% compared with 4.4% for the nation.

Airports service region = The 23 counties and independent cities (plus the District of Columbia) in the Washington-Arlington-Alexandria MSA as currently defined (see Figure 1).

Notes: MSAs ranked in descending order by percent change in population. Population numbers are estimates as of July 1 of each year. Calculated percentages may not match those shown because of rounding.

Source: U.S. Department of Commerce, Bureau of the Census website, www.census.gov, accessed March 2018.

As shown in Table 5, between January 2007 and January 2018, nonagricultural employment in the Airports service region increased 10.1%, the 11th largest increase among the nation's 20 most populous MSAs.

Source: U.S. Department of Labor, Bureau of Labor Statistics website, www.bls.gov, accessed March 2018.

The Airports service region is home to much of the federal government and many of its employees and contractors. According to the Center for Regional Analysis at George Mason University, the economic activity generated by the federal government reduced the effects of the 2008-2009 national economic recession on the region's economy.* In late 2011, implementation of the spending reduction provisions of the Budget Control Act of 2011 (popularly known as sequestration) reduced federal employment and spending. Between 2010 and 2016, federal procurement spending in the Airports service region decreased 10.4%, from \$82.4 billion to \$73.8 billion.** Federal employment in the Airports service region also decreased between 2010 and 2014, before returning to modest growth in 2015. Even so, employment growth in other economic sectors has more than compensated for these decreases, as evidenced by the overall employment gains since 2010 shown in Table 3.

The workforce in the Airports service region is well-educated, with 30.7% holding an associate's or bachelor's degree and an additional 25.0% holding a graduate or professional degree, compared with the national averages of 27.7% and 11.9%, respectively.*** This well-educated resident population is a key strength of the region's economy and is reflected in its high per capita income. The region has a high ratio of workers in professional services, information technology, education, and research, many of whom provide services to the federal government, either directly or through contracted services.

In recent years, companies such as Computer Sciences Corporation (now DXC Technology), Hilton Worldwide, Northrop Grumman, Science Applications International Corporation, and Volkswagen Group of America have located their U.S. headquarters in the region. According to the 2017 *Fortune* 500 list, 17 of the top 500 U.S. companies by revenue were headquartered in the Airports service region and accounted for combined revenues of approximately \$414 billion.

Approximately 1,000 institutions in the region engage in international business, including the World Bank, the International Monetary Fund, the Inter-American Development Bank, and the Export-Import Bank. The region is also home to approximately 400 international associations, approximately 350 law firms with international practices, and approximately 180 embassies and international cultural centers.

Employment by Industry Sector

Table 6 shows employment by industry sector in the Airports service region and the United States. Relative to the national average, employment in the Airports service region is disproportionately concentrated in the government and professional and business services sectors. Between 2007 and 2017, employment in these two sectors combined increased at higher rates in the Airports service region than in the nation such that, by 2017, they together accounted for 44.3% of employment in the region, compared with 29.2% in the nation. Employment growth in the education, health services, leisure, and hospitality sectors also outpaced national rates of growth. According to Bureau of Labor Statistics data, in 2017, the federal government accounted for approximately 367,000 employees in the Airports service region, 11.2% of the Airports service region's total nonagricultural workforce.

Table 6
NONAGRICULTURAL EMPLOYMENT BY INDUSTRY SECTOR

Industry sector	Share of total 2017		Average annual percent Increase (decrease) 2007-2017	
	Airports service region	United States	Airports service region	United States

Table 7 shows the top 25 private-sector employers in the region. Of these 25 employers, 11 are on the *Fortune* 500 list of largest U.S. companies, 10 of which are also headquartered in the Airports service region, and 11 are providers of professional, business, or technical services, largely to the federal government.

Notes: The Washington, D.C. Metro area as defined by the Washington Business Journal is the same as the Airports service region except Culpeper and Rappahannock counties in Virginia are excluded.

Data are self-reported by companies to the Greater Washington Business Journal. Such self-reporting, or lack thereof, affects companies' inclusion in the list from year to year.

(a) Fortune 500 company (based on 2016 revenue) headquartered in the Airports service region.

(b) Formed by merger of government services division of Computer Sciences Corporation and SRA International.

(c) Fortune 500 company (based on 2016 revenue) not headquartered in the Airports service region.

(d) Employee count as of June 2016.

Sources: Greater Washington Business Journal, 2018 Book of Lists; Fortune 500 website, www.fortune.com.

Visitors and Conventions

The national monuments, institutions, museums, and other attractions of the Airports service region make it one of the most visited in the nation. Washington, D.C. attracted 20.0 million domestic visitors and 2.0 million international visitors in 2016 (the most recent data available), according to Destination DC, a nonprofit organization that promotes tourism. In 2016, visitors to Washington, D.C. spent \$7.3 billion, of which \$2.0 billion was accounted for by international visitors. According to the U.S. Department of Commerce, National Travel & Tourism Office, among U.S. metropolitan areas in 2016, the Airports service region ranked eighth by numbers of overseas visitors.

The Walter E. Washington Convention Center, located in downtown Washington, D.C., contains approximately 700,000 square feet of meeting and exhibit space. There are more than 4,600 hotel rooms within one mile of the convention center. The Washington, D.C. Marriott Marquis, adjacent to the Convention Center, opened in May 2014 with 1,175 rooms, 49 suites, and 105,000 square feet of meeting space. The Airports service region is also home to the Gaylord National Resort & Convention Center. Located on the Potomac River in Prince George's County, Maryland, the Gaylord features approximately 2,000 guest rooms and more than 500,000 square feet of meeting and convention space.

ECONOMIC OUTLOOK

Outlook for the U.S. Economy

Real (inflation-adjusted) gross domestic product (GDP) grew 2.4% in 2014, 2.6% in 2015, 1.6% in 2016, and 2.3% in 2017. The Congressional Budget Office forecasts real GDP growth of 3.0% in 2018, 2.9% in 2019, and an average of 1.7% per year thereafter.

Continued U.S. economic growth will depend on, among other factors, stable financial and credit markets, a stable value of the U.S. dollar versus other currencies, stable energy and other commodity prices, the ability of the federal government to reduce historically high fiscal deficits, inflation remaining within the range targeted by the Federal Reserve, growth in the economies of foreign trading partners, and stable trading relationships.

Outlook for the Economy of the Airports Service Region

The economic outlook for the Airports service region generally depends on the same factors as those for the nation, although changes in federal spending will have a greater effect on economic growth and employment. The Center for Regional Analysis at George Mason University projects annual growth in Gross Regional Product averaging 2.0% in the years 2017 through 2020, generally in line with the nationwide rates of economic growth forecast by the Congressional Budget Office and described above.

Table 8 shows socioeconomic forecasts for the Airports service region and the nation developed by the Metropolitan Washington Council of Governments (MWCOCG), an independent, nonprofit regional planning organization, in November 2016 (the most recent forecasts available). Growth in population and employment in the region is forecast to exceed national rates.

Table 8
SOCIOECONOMIC FORECASTS

	Average annual percent increase	
	Historical 2000-2017	Forecast 2017-2025
Airports service region (a)		
Population	1.5%	1.1%
Nonagricultural employment	1.2	1.2
United States		
Population	0.8%	0.8%
Nonagricultural employment	0.6	0.7

(a) Percentages shown are for Metropolitan Washington Council of Governments member jurisdictions, which collectively are similar to the Airports service region, but exclude the counties of Culpeper, Rappahannock, and Warren in Virginia.

AIRLINE TRAFFIC ANALYSIS

HISTORICAL PASSENGER TRAFFIC AT THE AIRPORTS

From 2000 to 2007, Dulles accommodated most of the net increase in passenger numbers for the two-Airports system but, since 2007, all the net increase has been at Reagan, more than offsetting a decrease at Dulles. Reagan’s share of the total passengers enplaned at both Airports increased from 43.1% in 2007 to 51.3% in 2017.

Figure 2 and Table 9 provide historical data on numbers of enplaned passengers at the Airports.*

*Throughout this report, enplaned passenger numbers obtained from Airports Authority reports include nonrevenue passengers, while enplaned passenger numbers obtained from U.S. DOT reports exclude such passengers. In 2017, nonrevenue passengers represented approximately 3.0% of enplaned passengers at each of Reagan and Dulles. Throughout this report, passengers on general aviation and military flights, which in 2017 accounted for less than 0.8% of enplaned passengers at each of Reagan and Dulles, are excluded.

Table 9
ENPLANED PASSENGER TRENDS
 Reagan National and Dulles International Airports
 (enplaned passengers in thousands)

Year	Reagan			Dulles			Airports total		
	Domestic	International	Total	Domestic	International	Total	Domestic	International	Total

Airline Shares of Passengers at the Airports

Figure 3 shows airline shares of enplaned passengers at the Airports.* American, the airline enplaning the most passengers at Reagan (49.6%), and United, the airline enplaning the most passengers at Dulles (63.2%), together enplaned 62.4% of passengers at the two Airports in 2017. (The later Tables 23, 31, and 32 provide detail on historical airline shares of enplaned passengers at the Airports.)

Ranking Among Other Airports

Table 10 shows the 30 largest U.S. airports ranked by enplaned passengers. By this measure, in 2017, Reagan ranked 23rd and Dulles ranked 25th.

Table 11 shows the 30 largest U.S. airports ranked by enplaned originating passengers. By this measure, in 2017, Reagan ranked 18th and Dulles ranked 27th.

Table 12 shows the 30 largest U.S. airports ranked by connecting passengers. By this measure, in 2017, Dulles ranked 20th and Reagan ranked 27th.

Table 13 shows the 30 largest U.S. gateway airports ranked by international enplaned passengers. In 2017, Dulles ranked 10th among U.S. gateway airports, up from 12th in 2000.

COMPETING AIRPORTS SERVING THE REGION

Reagan and Dulles face regional competition for domestic traffic from Baltimore/Washington Airport (BWI) and competition for international traffic from other major eastern U.S. gateway airports, such as Boston Logan, Philadelphia, New York Kennedy, Newark Liberty, and Hartsfield-Jackson Atlanta international airports. Table 14 provides data on airline service at the three airports serving the greater Washington-Baltimore region. Table 15 and Figure 4 provide historical data on numbers of average daily enplaned passengers at the three airports.

*In all discussions of historical airline service and passenger traffic by airline in this report, unless otherwise noted, data for merged airlines are accounted for with the surviving airline (i.e., America West Airlines, Trans World Airlines, and US Airways with American Airlines; Northwest Airlines with Delta Air Lines; Continental Airlines with United Airlines; Midwest Airlines with Frontier Airlines; AirTran Airways with Southwest Airlines; and Virgin America with Alaska Airlines).

Figure 3
AIRLINE SHARES OF ENPLANED PASSENGERS
 Reagan National and Dulles International Airports
 2017

Notes: Percentages may not add to 100% because of rounding.
 The area of each of the circles is proportional to the number of enplaned passengers.

Figure 4
HISTORICAL TRENDS IN ENPLANED PASSENGERS AT REGIONAL AIRPORTS
 Reagan National, Dulles International, Baltimore/Washington Airports,
 and all U.S. Airports
 (for calendar years)

(a) Data are for the 12 months ended September 30, 2017, the most recent available.
 Source: U.S. DOT, Schedule T100.

Competition from Baltimore/Washington Airport

BWI, operated by the Maryland Aviation Administration, is located about 30 miles northeast of downtown Washington, D.C., and is accessible from Washington, D.C., by interstate highway, rail, and bus service. Of the domestic originating passengers served by the three airports during 2017, BWI accounted for about 37.4% (down from 39.6% in 2007), Reagan for 43.1% (up from 34.1% in 2007), and Dulles for 19.4% (down from 26.4% in 2007).

Dulles accounted for about 83.7% of the international passengers served by the three airports in 2017, compared with 12.2% for BWI and 4.1% for Reagan. BWI accommodates only limited international airline service, ranking 24th among U.S. gateway airports by international enplaned passengers, as shown in Table 13. Reagan does not provide CBP facilities for the inspection of arriving international flights, so international service is offered only to and from those locations where

inbound passengers are precleared at their point of departure (Canada, the Bahamas, and Bermuda).

As shown on Figure 4, between 2007 and 2017, enplaned passengers increased 22.3% at BWI and 27.6% at Reagan, compared with an 11.6% increase nationwide and a 6.9% decrease at Dulles.

As shown in Table 14, as scheduled for June 2018, airlines provide nonstop domestic service from BWI to 67 airports, 56 of them with service by low-cost carriers (LCCs)*, mainly Southwest, and 57 of them with large jets.** Airlines provide nonstop domestic service from Reagan to 81 airports, 24 of them with service by LCCs and 32 with large jets. Airlines provide nonstop domestic service from Dulles to 71 airports, 8 of them with service by LCCs and 34 with large jets. Between 2007 and 2018, the numbers of flights and seats offered by LCCs at BWI and Reagan increased, while at Dulles they decreased. (As discussed in the later section “US Airways-American Merger and Slot Transfers,” the transfer of landing and takeoff slots in 2014 resulted in increased LCC service at Reagan.)

Due to the large LCC presence, airfares at BWI historically have been lower than airfares at either Reagan or Dulles. Since 2007, fares have increased more at BWI than at Reagan, leading to a narrowing of the fare gap between those airports. On the other hand, fares have increased less at BWI than at Dulles leading to a widening of the fare gap between those airports. Based on fare data for the 12 months ended September 2017, domestic originating passengers at BWI paid an average fare of \$147 for a one-way trip averaging 1,115 miles, compared with \$174 at Reagan for a trip averaging 979 miles, and \$211 at Dulles for a trip averaging 1,422 miles. The average airfares exclude charges for optional services. (See the discussion in the later sections “Domestic Airfares.”) Airfares tend to correlate with trip distance (longer average distances generally equate to higher average airfares) and trip purpose (higher proportions of business travelers generally equate to higher average airfares). Airport surveys indicate that Reagan and Dulles accommodate higher proportions of business travelers than BWI.***

As scheduled for June 2018, BWI is the second-ranked airport in the Southwest system as measured by departing seats (after Chicago Midway). As scheduled, Southwest’s departing seats at BWI are 1.8% lower in June 2018 than in June 2017,

*For purposes of this report, the following airlines are considered to be low-cost carriers: Allegiant Air, Frontier Airlines, JetBlue Airways, Southwest Airlines, Spirit Airlines, and Sun Country Airlines, as well as the defunct AirTran Airways, ATA, Independence Air, Midway Airlines, National Airlines, and Virgin America.

**For purposes of this report, jet aircraft are categorized as either large jets (100 or more seats) or regional jets (fewer than 100 seats).

****Washington-Baltimore Regional Air Passenger Survey – 2015*, January 2017, National Capital Region Transportation Planning Board.

compared to a 1.4% increase systemwide. Southwest began service at Dulles in 2006 and at Reagan in 2011 following its merger with AirTran.

Competition from Other International Gateway Airports

The large number of international flights provided by United and foreign flag airlines at Dulles makes it the preferred airport for international travel to and from the region served by the three airports as well as for connections between domestic and international flights. As shown in Table 16, as scheduled for June 2018, Dulles ranks fifth in service to Europe and second in service to the Middle East and Africa among U.S. international gateway airports.

HISTORICAL AIRLINE SERVICE AND TRAFFIC AT REAGAN

Trends in airline service, passenger traffic, and airfares at Reagan are discussed in the following sections.

Perimeter and High Density Rules

The “Perimeter Rule,” a federal regulation in effect since 1966, generally limits nonstop flights from Reagan to destinations not more than 1,250 statute miles away. Originally introduced to encourage airlines to operate long-haul flights from newly opened Dulles, the Perimeter Rule was amended in 2000, and again in 2003, to allow a total of 12 daily round-trip nonstop flights between Reagan and points beyond the 1,250-mile perimeter. Pursuant to the FAA Modernization and Reform Act of 2012, eight additional “beyond-perimeter” daily nonstop roundtrip flights were authorized, four for new entrant or limited incumbent airlines and four for incumbent airlines.

The “High Density Rule,” a federal regulation in effect since 1969 and intended to allow the FAA to manage airspace congestion and delays, limits the number of airline, regional airline, and general aviation flights that may be scheduled each hour at Reagan. Federal legislation enacted in 2000 (the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century, commonly referred to as AIR-21) phased out the High Density Rule at New York Kennedy, New York LaGuardia, and Chicago O’Hare, but not at Reagan.

Authorizations from the FAA for aircraft landings and takeoffs are referred to as “slots.” A pair of slots is required for an airline to operate the arrival and subsequent departure of a flight. Essentially all authorized slots are held by incumbent airlines, and, although the U.S. DOT has favored LCCs in awarding newly authorized slots in the past, the opportunities for LCCs to increase service have, until recently, been limited. The constraints of the High Density Rule have dissuaded incumbent airlines from reducing their flights at Reagan because any such reductions would place them at risk of losing slots. As discussed in the following section, additional slots were made available to LCCs in connection with the approval of the merger of American and US Airways.

American-US Airways Merger and Slot Transfers

In February 2013, American, which had been operating under Chapter 11 bankruptcy protection, and US Airways announced an agreement under which the two airlines would combine. Under the terms of an agreement with the U.S. Department of Justice (DOJ), the combined airline was required to divest 52 pairs of slots and five gates at Reagan. Of the 52 slot pairs, Southwest purchased rights to 28, one of which (for Sunday-only service) it relinquished; JetBlue purchased 20, eight of which it had already been leasing from American; and Virgin America purchased four.

To accommodate increased service by these three airlines, the Airports Authority leased three of the five divested gates to Southwest, one to JetBlue, and one to Virgin America. The additional service made possible by the slot and gate transfers largely accounted for an increase in enplaned passenger numbers at Reagan between 2014 and 2015.

American emerged from bankruptcy and completed the merger with US Airways in December 2013, and the airline began operating as American under a single operating certificate in April 2015. The combined airline is a member of the Oneworld alliance. (US Airways was formerly a member of the Star Alliance.)

In April 2018, Alaska announced that, effective October 2018, it will lease four within-perimeter slot-pairs at Reagan to Southwest for a 10-year period. As scheduled for June 2018, Alaska operates three daily departures from Reagan to Dallas Love Field with 76-seat E-175 aircraft. Southwest has not announced what additional service it will provide from Reagan, but the service will be with B-737 aircraft with between 143 and 175 seats.

As shown in Table 17, as scheduled for June 2018, Reagan ranks eighth by departing seats among airports in the American route network. Between 2012 and 2018, American decreased its number of scheduled seats at Reagan by 2.8%, compared with an increase of 7.5% systemwide.

Figure 5 shows the destinations with daily nonstop service from Reagan as scheduled for June 2018. The 1,250-mile perimeter is shown for reference.

Figure 5
DESTINATIONS WITH DAILY SCHEDULED NONSTOP PASSENGER AIRLINE SERVICE
 Reagan National Airport
 June 2018

Airline Service

Table 18 presents data on nonstop airline service from Reagan to the top 20 domestic passenger destinations. Between 2007 and 2018, the number of aircraft departures from the airport increased 8.2%, while the number of seats increased 13.9%. (The later Table 22 provides data on fares.)

As scheduled for June 2018, nonstop service is provided from Reagan to all of the top 20 domestic destinations; 17 of these are served nonstop by more than one airline (or affiliated regional airline).*

Table 19 provides detail on airline service by aircraft type and shows the increased use of regional jet aircraft. The average seating capacity of both large jet and regional jet aircraft at Reagan has increased since 2007, resulting in an increase in the overall average number of seats per departure from 96 in June 2007 to 101 in June 2018.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

*Regional airlines operating at Reagan as code-sharing affiliates of mainline airlines as of March 2018 were Endeavor Air (Delta Connection), Envoy Air (American Eagle), ExpressJet (United Express), GoJet Airlines (Delta Connection), Jazz Aviation (Air Canada Express), Mesa Airlines (United Express), PSA Airlines (American Eagle), Republic Airlines (American Eagle, Delta Connection, and United Express), SkyWest Airlines (Alaska Airlines and United Express) and Tran States Airlines (American Eagle).

Enplaned Passengers

After the 2001 economic recession and the September 2001 terrorist attacks, which resulted in decreased passenger traffic in 2001 and 2002, the number of enplaned passengers at Reagan increased for five consecutive years and then decreased during the economic recession in 2008 and 2009. Passenger numbers then increased between 2009 and 2017, in part because of the 2014 slot and gate transfers, reaching a record high of 11.9 million enplaned passengers in 2017.

Table 20 shows historical passenger enplanements at Reagan by domestic and international subtotals and originating and connecting components. Originating passengers accounted for 88.6% of enplaned passengers at the airport in 2017, with the remaining 11.4% connecting between flights. The originating passenger percentage has increased from 82.8% in 2012 as American has competed more aggressively for originating passengers and reduced its reliance on connecting activity.

According to a passenger survey conducted by the Authority, 40% of originating passengers at Reagan in 2017 were traveling for business-related purposes (down from 48% in 2010) and 60% were traveling for non-business purposes. Of business travelers, 26% were traveling for business related to the federal government or military.

As shown in Table 21, for the 12 months ended September 30, 2017, American accounted for 44.5% of originating passengers and 85.4% of connecting passengers at Reagan. Connecting passengers on American accounted for 20.3% of the airline's enplaned passengers.

Domestic Airfares

Table 22 presents data on domestic originating passengers and average airfares for the top 20 domestic destinations from Reagan. For Reagan's top 20 domestic destinations taken together, between 2007 and 2012, average airfares increased 12.0% while passenger numbers increased 3.1%; between 2012 and 2017, average airfares decreased 7.6% while passenger numbers increased 34.3%.

Competition has led to different results for individual destinations. For example, passenger numbers for Boston, Dallas/Fort Worth, and Tampa have increased, largely because of increased fare competition from LCCs. In contrast, increased airfares and decreased passenger numbers to and from New York have resulted from competition from surface modes of transportation, primarily Amtrak's Acela Express high-speed passenger rail service, and LCC service from BWI. Between 2007 and 2017, average airfares between Reagan and New York increased 19.2% while the number of originating passengers decreased 41.0%.

The average airfares shown in Table 22, as reported by the airlines to the U.S. DOT, exclude charges for optional services, such as checked baggage, preferred seating, in-flight meals, entertainment, and ticket changes. Such charges have become widespread in the airline industry since 2006. As a result, the average airfares shown understate the amount actually paid by airline passengers for their travel, particularly for 2017. Optional service charges that were previously included in the ticket price are not all separately reported to the U.S. DOT. They have been estimated by industry analysts to amount to an effective average surcharge on domestic airfares of approximately 5% of ticket fare revenues, although the percentage varies widely by airline.

Airline Shares of Enplaned Passengers

Table 23 shows that American enplaned 49.6% of Reagan's passengers in 2017. Second-ranked Southwest enplaned 14.6%.

Between 2007 and 2017, the share of passengers enplaned at Reagan by the mainline airlines decreased from 66.3% to 41.6%, the share of the regional airlines (essentially all of which are now affiliated with the mainline airlines) increased from 22.5% to 30.9%, and the LCC share (Southwest, JetBlue, Frontier, and Sun Country) increased from 8.5% to 24.0%.

These changes in airline shares of passengers resulted largely from slot and gate transfers. In 2011, American (then US Airways) acquired 42 slot pairs from Delta at Reagan and in return relinquished slots to Delta at New York LaGuardia. As discussed in the earlier section "American-US Airways Merger and Slot Transfers," as a condition of the merger, in 2013, American relinquished 52 slot pairs at Reagan to JetBlue, Southwest, and Virgin America (now Alaska).

Table 23
AIRLINE SHARES OF ENPLANED PASSENGERS
Reagan National Airport

Airline (a)	Average daily enplaned passengers			Airline share of total		
	2007	2012	2017	2007	2012	2017
American	14,564	15,216	16,224	57.2%	56.9%	49.6%

Cargo

Because Reagan is land-constrained and lacks the space necessary to accommodate all-cargo aircraft operations, all-cargo airlines serving the Airports Authority's two airports now operate only at Dulles. (FedEx served Reagan between 2008 and 2012.) All cargo at Reagan is carried in the belly compartments of passenger aircraft. The shift from large jets to regional jets that has occurred among the passenger airlines has resulted in reduced belly cargo capacity.

In 2017, approximately 3,000 tons of air cargo were handled at Reagan versus 328,000 tons at Dulles. American accounted for 66.1% of air cargo tonnage handled at Reagan, followed by Southwest with 16.0%, and Delta with 9.4%.

Aircraft Operations

Historical aircraft departures, enplaned passenger load factor, and average seats per aircraft departure at Reagan are shown in Table 36. The number of operations (landings and takeoffs) by commercial passenger aircraft at Reagan increased an average of 0.8% per year between 2000 and 2017, less than the average increase in the number of enplaned passengers (2.5% per year) over the same period. The average passenger load factor (percentage of seats occupied) increased from 59% in 2000 to 83% in 2017 as the airlines implemented more sophisticated scheduling, reservations, and yield management systems to align capacity and demand. The average number of seats per aircraft decreased from 107 in 2000 to 101 in 2017.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

HISTORICAL AIRLINE SERVICE AND TRAFFIC AT DULLES

Unlike Reagan, Dulles is not subject to the High Density Rule or the Perimeter Rule, and the expansion of airline service is not constrained by the capacity of its airside or landside facilities.

Airline Service

United operates a connecting hub at Dulles, along with other connecting hubs in Chicago, Denver, Guam, Houston, Los Angeles, Newark, and San Francisco. As shown in Table 24, Dulles ranks sixth in United's U.S. airport system by departing seats as scheduled for June 2018. Between 2012 and 2018, United increased its number of scheduled seats at Dulles by 2.6%, compared with an 11.1% increase systemwide.

Domestic Airline Service. Figure 6 shows the domestic destinations with daily nonstop service from Dulles as scheduled for June 2018.

Table 25 presents data on nonstop airline service from Dulles to the top 20 domestic passenger destinations. Between 2007 and 2018, the number of aircraft departures from the airport decreased 27.5%, while the number of seats decreased 14.4%. (The later Table 30 provides data on fares in the air service markets.)

As scheduled for June 2018, United (including affiliated United Express regional airlines) provides nonstop service to 19 of the top 20 destinations at Dulles; 14 of the top 20 destinations are served nonstop by two or three airlines (or their affiliated regional airlines); and 8 destinations are served nonstop by LCCs (Frontier, JetBlue, or Southwest).*

Table 26 provides detail on airline service at Dulles by aircraft type. As scheduled for June 2018, large jets account for 42.1% of aircraft departures and 65.0% of departing seats. Regional jets account for 57.9% of aircraft departures and 35.0% of departing seats. Turboprop service is no longer provided. Changes in the mix of aircraft types serving Dulles resulted in an increase in the average number of seats per domestic departure from 88 in June 2007 to 104 in June 2018.

*Regional airlines operating at Dulles as code-sharing affiliates of mainline airlines as of March 2018 were Air Georgian (Air Canada Express), Air Wisconsin (United Express), CommutAir (United Express), Endeavor Air (Delta Connection), GoJet (Delta Connection), Jazz Aviation (Air Canada Express), Mesa Airlines (United Express), PSA Airlines (American Eagle), Republic Airlines (United Express), SkyWest Airlines (Delta Connection and United Express), and Trans States Airlines (United Express).

International Airline Service. Table 27 shows that the average number of international departing seats at Dulles, as scheduled for June, increased 30.0% between 2007 and 2018. The largest increases were to the Middle East and Africa and Latin America and Caribbean. Capacity to Latin America increased as Copa Airlines, Avianca, and AeroMexico began service and United increased service. Capacity to the Middle East and Africa increased between 2007 and 2018 as Emirates, Ethiopian Airlines, Etihad Airways, Qatar Airways, Royal Air Maroc, Saudi Arabian Airlines, and Turkish Airlines began service.

Figure 7 shows the international destinations with daily nonstop (or direct, single-plane) service from Dulles as scheduled for June 2018. United, Delta, and 30 foreign-flag airlines operate international service to 49 destinations on five continents.

Enplaned Passengers

Numbers of passengers using Dulles fluctuated between 2000 and 2007, particularly during the 2004-2006 period when Independence Air operated a connecting hub at the airport. Between 2007 and 2014, the number of enplaned passengers decreased an average of 2.0% per year. Since 2014, the number of enplaned passengers has increased each year, reaching 11.3 million in 2017, a level last experienced in 2011.

Table 28 shows historical passenger enplanements at Dulles by domestic and international subtotals and originating and connecting components. Originating passengers accounted for 69.5% of enplaned passengers at the airport in 2017, with the remaining 30.5% connecting between flights. The originating passenger percentage has increased from 60.0% in 2012 as United has competed more aggressively for originating passengers and reduced its reliance on connecting activity.

Notes: Rows may not add to totals shown because of rounding. Percentages were calculated using unrounded numbers. The distribution of originating and connecting passengers for 2017 was estimated using actual data for the first three quarters and estimated data for the fourth quarter.

(a) Includes domestic originating passengers, international originating passengers who boarded domestic flights at Dulles bound for international destinations via other gateway airports, passengers on nonscheduled (charter) flights, and nonrevenue passengers.

(b) Includes international originating passengers on scheduled flights, along with small numbers of passengers on nonscheduled flights, nonrevenue passengers, and international-to-international connections.

Sources: Metropolitan Washington Airports Authority; U.S. DOT, *Air Passenger Origin-Destination Survey*, reconciled to Schedules T100 and 298C T1.

According to a passenger survey conducted by the Authority, 31% of originating passengers at Dulles in 2017 were traveling for business-related purposes (down from 44% in 2010) and 69% were traveling for non-business purposes. Of business travelers, 19% were traveling for business related to the federal government or military.

As shown in Table 29, for the 12 months ended September 30, 2017, United accounted for 51.7% of originating passengers and 89.6% of connecting passengers at Dulles. Connecting passengers on United accounted for 43.9% of the airline's enplaned passengers.

Total	63.4	36.6	100.0			

Notes: Rows and columns may not add to totals shown because of rounding.
 Percentages were calculated using unrounded numbers.

(a) Originating-resident passengers are defined as those passengers whose flight itineraries began at Dulles.

(b) Originating-visitor passengers are defined as those passengers whose flight itineraries began at airports other than Dulles.

Sources: Metropolitan Washington Airports Authority records; U.S. DOT, *Air Passenger Origin-Destination Survey*, reconciled to Schedule T100.

Domestic Airfares

Table 30 presents data on domestic originating passengers and average airfares for the top 20 domestic destinations from Dulles. For Dulles's top 20 domestic destinations taken together, between 2007 and 2012, average airfares increased 28.1% while passenger numbers decreased 26.7%; between 2012 and 2017, average airfares decreased 6.0% while passenger numbers increased 8.4%. West Coast destinations rank higher at Dulles than at Reagan (as shown in the earlier Table 22) because of the Perimeter Rule's effect of restricting long-haul flights from Reagan.

The influence of airfares on passenger numbers is apparent for particular destinations, such as Denver, Orlando, and Atlanta, where airfares have decreased since 2012, largely as a result of airline competition, and passenger numbers have increased. As noted in the earlier discussion of Table 22, the reported airfare data presented in Table 30 do not include charges for optional services such as for checked baggage and preferred seating.

Airline Shares of Domestic Enplaned Passengers

As shown in Table 31, United and United Express together enplaned 75.7% of domestic passengers at Dulles in 2017. Between 2007 and 2017, the LCCs' share of domestic enplaned passengers decreased from 14.8% to 7.8%, as Southwest and JetBlue reduced service at Dulles and increased service at Reagan and BWI.

Airline Shares of International Enplaned Passengers

Between 2000 and 2017, the number of international enplaned passengers at Dulles increased an average of 3.7% per year. Passengers enplaning on international flights accounted for 20.9% of all enplaned passengers at the airport in 2000 and 34.1% in 2017.

As shown in Table 32, United and United Express together accounted for 39.0% of international enplaned passengers at Dulles in 2017, down from 50.5% in 2007. Foreign-flag airlines accounted for virtually all of the remaining 61.0% in 2017. Among foreign-flag airlines, those from Europe accounted for 27.0%, those from Africa and the Middle East for 16.5%, followed by airlines from the Caribbean and Latin America (8.4%), Asia (6.0%), and Canada (2.8%).

Dulles is one of two main international gateway airports on the East Coast for United and other members of the Star Alliance; the other is Newark Liberty. The Star Alliance has 27 member airlines, 14 of which serve Dulles, compared with 12 serving Newark. Dulles serves as a connecting gateway for Star Alliance flights to

and from Europe (operated by United, Austrian Airlines, Brussels Airlines, Lufthansa, and SAS); Canada (United and Air Canada); Asia (United, Air China, Air India, and ANA); Latin America (United, Avianca, and Copa Airlines); and the Middle East and Africa (Ethiopian Airlines, South African Airways, and Turkish Airlines).

International Passengers by World Region

Table 33 presents trends in the number of passengers departing on international flights from Dulles to five major world regions. Passengers to Europe accounted for 50.8% of international enplaned passengers in 2017, a decrease from 64.5% in 2007. Over those 10 years, the number of passengers to Europe increased at an average rate of 0.2% per year, while the number of passengers bound for other world areas increased at an average of 6.0% per year.

Cargo

Dulles is an important cargo airport, ranking 13th among U.S. airports in terms of international cargo weight for the 12 months ended September 30, 2017, according to data filed by the airlines with the U.S. DOT.

As shown in Table 34, between 2000 and 2017, domestic cargo weight at Dulles decreased 4.7% per year, on average, while international cargo weight (virtually all carried by the passenger airlines) increased 1.9% per year, for a combined decrease of 1.5% per year. The decrease in domestic cargo weight, both at Dulles and nationwide, is attributable to a number of factors including post-September 2001 security restrictions on the carriage of freight and mail on passenger aircraft and the increased use of time-definite ground transportation modes as the relative operating economics of air and truck modes have changed.

Cargo activity at Dulles is dominated by United and FedEx, which together handled 52.9% of the cargo weight in 2017. Third-ranking UPS accounted for 5.3%.

Aircraft Operations

Historical aircraft departures, enplaned passenger load factor, and average seats per aircraft departure at Dulles are shown in Table 38. The number of commercial operations (landings and takeoffs by passenger and all-cargo aircraft) at Dulles decreased an average of 3.2% per year between 2000 and 2017, compared with an average increase of 0.8% per year in the number of enplaned passengers over the same period. This difference reflects the average number of seats per aircraft departure increasing from 85 to 125 and the average enplaned passenger load factor increasing from 61.7% to 82.8%.

The number of all-cargo aircraft operations at Dulles in 2017 was less than half the number in 2000. The average landed weight per aircraft for all-cargo aircraft operating at Dulles increased 21.3% over the same period, with the net result that all-cargo aircraft landed weight in 2017 was 41.8% lower than in 2000.

KEY FACTORS AFFECTING FUTURE AIRLINE TRAFFIC

In addition to the demographics and economy of the Airports service region, as discussed earlier, key factors that will affect future airline traffic at the Airports include:

- Economic, political, and security conditions
- Financial health of the airline industry
- Airline service and routes
- Airline competition and airfares
- Availability and price of aviation fuel
- Aviation safety and security concerns
- Capacity of the national air traffic control system
- Capacity of the Airports

Economic, Political, and Security Conditions

Historically, airline passenger traffic nationwide has correlated closely with the state of the U.S. economy and levels of real disposable income. As illustrated on Figure 8, recessions in the U.S. economy in 2001 and 2008-2009 and associated high unemployment reduced discretionary income and resulted in reduced airline travel. Sustained future increases in passenger traffic at the Airports will depend on national economic growth.

With the globalization of business and the increased importance of international trade and tourism, international economics, trade balances, currency exchange rates, government policies, and political relationships all influence passenger traffic at major U.S. airports.

Concerns about hostilities, terrorist attacks, and other perceived security and public health risks and associated travel restrictions also affect travel demand to and from particular international destinations. Beginning in March 2017, the Trump administration has issued various orders and proclamations seeking to restrict travel to the United States from certain countries, mainly in the Middle East and Africa, that are deemed by the administration not to meet standards for screening visa applicants. Such proposed travel restrictions are being challenged in court and have to date not been fully implemented. Depending on the form of restrictions eventually adopted, increased scrutiny by U.S. Customs and Border Protection could prevent or discourage some travel.

Sustained future increases in international passenger traffic at the Airports will depend on global economic growth, stable and secure international conditions, and government policies that do not unreasonably restrict or deter travel.

Financial Health of the Airline Industry

The number of passengers at the Airports will depend partly on the profitability of the U.S. airline industry and the associated ability of the industry and individual airlines, particularly United and American, to make the necessary investments to provide service. Figure 9 shows historical net income for U.S. airlines.

As a result of the 2001 economic recession, the disruption of the airline industry that followed the September 2001 attacks, increased fuel and other operating costs, and price competition, the industry experienced huge financial losses. In 2001 through 2006, the major U.S. passenger airlines collectively recorded net losses of approximately \$46 billion. To mitigate those losses, all of the major network airlines restructured their route networks and flight schedules and reached agreements with their employees, lessors, vendors, and creditors to cut costs, either under Chapter 11 bankruptcy protection or the possibility of such. Between 2002 and 2005, Delta, Northwest, United, and US Airways all filed for bankruptcy protection and restructured their operations.

In 2007, the U.S. passenger airline industry as a whole was profitable, recording net income of approximately \$7 billion, but in 2008, as oil and aviation fuel prices increased to unprecedented levels, the industry experienced a profitability crisis. In 2008 and 2009, the U.S. passenger airline industry recorded net losses of approximately \$26 billion. The industry responded by, among other actions, grounding less fuel-efficient aircraft, eliminating unprofitable routes and hubs, reducing seat capacity, and increasing airfares. Between 2007 and 2009, the U.S. passenger airlines collectively reduced domestic capacity (as measured by available seat-miles) by approximately 10%.

Figure 9
NET INCOME FOR U.S. AIRLINES

Notes: Includes scheduled service on U.S. carriers only. Shaded areas indicate quarters of economic recession. Data for the fourth quarter of 2005 and the first quarter of 2006 were adjusted to account for United bankruptcy claims which were settled for less than had been originally reported.
Source: U.S. DOT, Bureau of Transportation Statistics, Net Income, F41 Schedule P12, www.transtats.gov, accessed March 2018.

From 2010 to 2013, the U.S. passenger airline industry as a whole recorded net income of approximately \$18 billion, notwithstanding sustained high fuel prices, by controlling capacity and nonfuel expenses, increasing airfares, recording high load factors, and increasing ancillary revenues. Between 2009 and 2013, the airlines collectively increased domestic seat-mile capacity by an average of 1.0% per year. American filed for bankruptcy protection in 2011.

In 2014, the U.S. passenger airline industry reported net income of \$9 billion, assisted by reduced fuel prices in the second half of the year (as discussed in the later section, “Availability and Price of Aviation Fuel”). In 2015, the industry achieved record net income of \$26 billion as fuel prices decreased further, demand remained strong, and capacity control allowed average fares and ancillary charges to remain high. Strong industry profitability continued in 2016 and 2017. Sustained industry profitability will depend on, among other factors, economic growth to support airline travel demand, continued capacity control to enable increased airfares, and stable fuel prices.

Consolidation of the U.S. airline industry has resulted from the acquisition of Trans World by American (2001), the merger of US Airways and America West (2005), the merger of Delta and Northwest (2009), the merger of United and Continental (2010), the acquisition of AirTran by Southwest (2011), the merger of American and US Airways (2013), and the acquisition of Virgin America by Alaska (2016).

Such consolidation has resulted in four airlines (American, Delta, Southwest, and United) and their regional affiliates now accounting for approximately 80% of domestic seat-mile capacity. The consolidation is expected by airline industry analysts to contribute to continued industry profitability. However, any resumption of financial losses could cause one or more U.S. airlines to seek bankruptcy protection or liquidate. The liquidation of any of the large network airlines would drastically affect airline service at certain connecting hub airports, present business opportunities for the remaining airlines, and change airline travel patterns nationwide.

Airline Service and Routes

The Airports accommodate travel demand to and from the Airports service region and serve as connecting hubs. The number of origin and destination passengers at the Airports depends on the intrinsic attractiveness of the region as a business and leisure destination, the propensity of its residents to travel, and the airline fares and service provided at the Airports and at other competing airports. The number of connecting passengers, on the other hand, depends entirely on the airline fares and service provided at the Airports.

The large airlines have developed hub-and-spoke systems that allow them to offer high-frequency service to many destinations. Because most connecting passengers have a choice of airlines and intermediate airports, connecting traffic at an airport depends on the route networks and flight schedules of the airlines serving that airport and competing hub airports. Since 2003, as the U.S. airline industry has consolidated, airline service has been drastically reduced at many former connecting hub airports, including those serving St. Louis (American, 2003-2005), Dallas-Fort Worth (Delta, 2005), Pittsburgh (US Airways, 2006-2008), Las Vegas (US Airways, 2007-2010), Cincinnati (Delta, 2009-2011), Memphis (Delta, 2011-2013), and Cleveland (United, 2014).

As discussed in earlier sections, Dulles serves as a primary connecting hub and international gateway for United, while Reagan serves as a secondary connecting airport for American. As a result, much of the connecting passenger traffic at the Airports results from the route networks and flight schedules of United and, to a lesser extent, American, rather than the economy of the Airports service region. If United were to reduce connecting service at Dulles, such service would not necessarily be replaced by other airlines, although reductions in service by any airline would create business opportunities for others. Given the slot constraints at Reagan, any reduction in seat capacity devoted by American to connecting passengers would likely be offset by increased use of such capacity for originating passengers. Hypothetical reductions in passenger traffic as a result of reduced connecting airline service at the Airports are discussed in the later section "Stress Test Forecasts."

Airline Competition and Airfares

Airline fares have an important effect on passenger demand, particularly for relatively short trips for which automobile and other surface travel modes are potential alternatives, and for price-sensitive “discretionary” travel. The price elasticity of demand for airline travel increases in weak economic conditions when the disposable income of potential airline travelers is reduced. Airfares are influenced by airline capacity and yield management; passenger demand; airline market presence; labor, fuel, and other airline operating costs; taxes, fees, and other charges assessed by governmental and airport agencies; and competitive factors. Future passenger numbers, both nationwide and at the Airports, will depend, in part, on the level of airfares.

Overcapacity in the industry, the ability of consumers to compare airfares and book flights easily via the Internet, and other competitive factors combined to reduce airfares between 2000 and 2005. During that period, the average domestic yield for U.S.-flag airlines decreased from 16.1 cents to 13.8 cents per passenger-mile. In 2006 through 2008, as airlines reduced capacity and were able to sustain fare increases, the average domestic yield increased to 15.9 cents per passenger-mile. In 2009, yields again decreased, but, beginning in 2010, as airline travel demand increased and seat capacity was restricted, yields increased to 16.7 cents per passenger-mile by 2016.

Beginning in 2006, charges have been introduced by most airlines for optional services such as checked baggage, preferred seating, in-flight meals, and entertainment, thereby increasing the effective price of airline travel more than these yield figures indicate.

Availability and Price of Aviation Fuel

The price of aviation fuel is a critical and uncertain factor affecting airline operating economics. Figure 10 shows the historical fluctuation in aviation fuel prices since 2000. Beginning in 2003, aviation fuel prices increased as a result of the invasion and occupation of Iraq; political unrest in other oil-producing countries; the growing economies of China, India, and other developing countries; and other factors influencing the demand for and supply of oil. By mid-2008, average fuel prices were three times higher than they were in mid-2004 and represented the largest airline operating expense, accounting for between 30% and 40% of expenses for most airlines. Fuel prices decreased sharply in the second half of 2008 as demand for oil declined worldwide, but then increased beginning in early 2009 as demand increased.

Between 2011 and 2014, aviation fuel prices were relatively stable, partly as a result of increased oil supply from U.S. domestic production made possible by the hydraulic fracturing of oil-bearing shale deposits and other advances in extraction technologies. As of mid-2014, average fuel prices were approximately three times those prevailing at the end of 2003.

Figure 10
HISTORICAL AVIATION FUEL PRICES

Notes: Data shown are monthly averages and were converted from gallons to barrels. Shaded areas indicate months of economic recession.
Source: U.S. DOT, Bureau of Transportation Statistics, Airline Fuel Cost and Consumption, F41 Schedule P12A, www.transtats.gov, accessed March 2018.

Beginning in mid-2014, an imbalance between worldwide supply and demand resulted in a precipitous decline in the price of oil and aviation fuel. Decreased demand from China and other developing countries, combined with the lifting of trade sanctions on Iran and a continued surplus in the worldwide supply resulted in reductions in fuel prices through early 2016. Fuel prices have since increased, but the average price of aviation fuel at mid-2017 was still approximately 60% of the price at mid-2014. Lower fuel prices are having a positive effect on airline profitability as well as far-reaching implications for the global economy.

Airline industry analysts hold differing views on how oil and aviation fuel prices may change in the near term, although, absent unforeseen disruptions, prices are expected to remain low for some time. There is widespread agreement that fuel prices are likely to increase over the long term as global energy demand increases in the face of finite oil supplies that are becoming more expensive to extract, although some economists predict that the development of renewable sources of energy, pressures to combat global climate change, the widespread use of electric cars, and other trends will eventually result in a decline in the demand for oil and associated downward pressure on fuel prices.

Aviation fuel prices will continue to affect airfares, passenger numbers, airline profitability, and the ability of airlines to provide service. Airline operating economics will also be affected as regulatory costs are imposed on the airline industry as part of efforts to reduce aircraft emissions contributing to climate change.

Aviation Safety and Security Concerns

Concerns about the safety of airline travel and the effectiveness of security precautions influence passenger travel behavior and airline travel demand. Anxieties about the safety of flying and the inconveniences and delays associated with security screening procedures lead to both the avoidance of travel and the switching from air to surface modes of transportation for short trips.

Safety concerns in the aftermath of the September 2001 attacks were largely responsible for the steep decline in airline travel nationwide in 2002. Since 2001, government agencies, airlines, and airport operators have upgraded security measures to guard against changing threats and maintain confidence in the safety of airline travel. These measures include strengthened aircraft cockpit doors, changed flight crew procedures, increased presence of armed federal air marshals, federalization of airport security functions under the Transportation Security Administration (TSA), more effective dissemination of information about threats, more intensive screening of passengers and baggage, and deployment of new screening technologies. The TSA has introduced “pre-check” service to expedite the screening of passengers who have submitted to background checks. Concerns about the safety of air travel security were heightened in 2016 by gun and bomb attacks at Brussels Airport (in March) and Istanbul Ataturk Airport (in June).

Historically, airline travel demand has recovered after temporary decreases stemming from terrorist attacks or threats, hijackings, aircraft crashes, and other aviation safety concerns. Provided that precautions by government agencies, airlines, and airport operators serve to maintain confidence in the safety of commercial aviation without imposing unacceptable inconveniences for airline travelers, it can be expected that future demand for airline travel at the Airports will depend primarily on economic, not safety or security, factors.

Capacity of the National Air Traffic Control System

Demands on the national air traffic control system have, in the past, caused delays and operational restrictions affecting airline schedules and passenger traffic. The FAA is gradually implementing its Next Generation Air Transportation System (NextGen) air traffic management programs to modernize and automate the guidance and communications equipment of the air traffic control system and enhance the use of airspace and runways through improved air navigation aids and procedures. Since 2007, airline traffic delays have decreased as a result of reduced numbers of aircraft operations (down approximately 20% between 2007 and 2016)

but, as airline travel increases in the future, flight delays and restrictions can be expected.

Capacity of the Airports

In addition to any future constraints that may be imposed by the capacity of the national air traffic control and national airport systems, future growth in airline traffic at the Airports will depend on the capacity of the Airports themselves. At Reagan, flights and passenger numbers will be constrained by the availability of airport facilities and the restrictions imposed by the High Density Rule and the Perimeter Rule. At Dulles, existing terminal and airfield facilities have the capacity to accommodate growth in airline traffic well beyond the forecast period covered in this report.

AIRLINE TRAFFIC FORECASTS

Forecasts of airline traffic at the Airports through 2023 were developed on the basis of the economic outlook for the Airports service region, trends in historical airline traffic, and key factors likely to affect future traffic, all as discussed earlier in this report. Forecasts for the Airports included in the FAA's *Terminal Area Forecast* (TAF), issued in January 2018, were also reviewed.

In developing the forecasts in this report, it was assumed that, over the long term, airline traffic at the Airports will increase as a function of growth in the economy of the Airports service region and continued airline service. It was assumed that airline service at the Airports will not be constrained by the availability of aviation fuel, the capacity of the air traffic control system or the Airports, charges for the use of aviation facilities, or, except for the Perimeter and High Density Rules at Reagan as now in effect, government policies or actions that restrict growth.

The traffic forecasts for both Airports were developed on the basis of the assumptions that:

1. The U.S. economy will experience sustained growth in GDP averaging between 2.0% and 2.5% per year, an average rate of GDP growth generally consistent with that projected by the Congressional Budget Office, as described in the earlier section "Economic Outlook."
2. The economy of the Airports service region will grow at approximately the same rate as the U.S. economy as a whole.
3. Airlines will add service to meet travel demand at the Airports and competition among airlines will ensure competitive airfares for flights from the Airports.
4. A generally stable international political environment and safety and security precautions will ensure airline traveler confidence in aviation without imposing unreasonable inconveniences.

5. There will be no major disruption of airline service or airline travel behavior as a result of international hostilities, terrorist acts or threats, or government policies restricting or deterring travel.
6. The respective historical roles of Reagan, Dulles, and BWI in accommodating domestic and international airline service will be generally unchanged.

Forecast Passengers for Reagan

In 2017, the number of enplaned passengers increased 1.5% at Reagan, compared with a nationwide increase of 3.0%. Year-to-date and advance schedule filings by the airlines indicate a 0.3% increase in the number of departing seats at Reagan between the first half of 2017 and the first half of 2018 (compared with an estimated nationwide increase of 4.2%).

On the basis of year-to-date passenger traffic reports, advance airline schedules, and assumptions regarding passenger load factor, the number of enplaned passengers at Reagan for 2018 as a whole is forecast to be 12.05 million, up 0.9% from the number enplaned in 2017.

In forecasting enplaned passengers at Reagan between 2018 and 2023, it was assumed that:

- American will continue to operate the airport as a secondary connecting point in its route network.
- Any future changes to the High Density and Perimeter rules will result in no material increase or decrease in the number of landing and takeoff slots or the average size of aircraft accommodated.
- There will be no further exchanges of slots among airlines leading to a material increase or decrease in the average size of aircraft accommodated. Passenger load factors and aircraft seating capacity will increase modestly.

Between 2018 and 2023, the number of enplaned passengers at Reagan is forecast to increase an average of 0.8% per year, substantially lower than the average rate for the airport forecast by the FAA in the TAF (3.2% per year).^{*} A higher rate of growth is not unusual in passenger forecasts prepared for purposes of facility and operational planning, such as the TAF, compared with forecasts such as those presented herein, prepared for purposes of financial planning.

^{*}The average increase in the January 2018 TAF results largely from an estimated increase of 11.5% between 2018 and 2021. This increase is driven by the FAA's assumption of an increase in average passengers per flight from 80 in 2018 to 87 in 2021 to result from higher load factors and the use of larger aircraft.

The number of enplaned passengers at Reagan is forecast to be 12.55 million in 2023, an increase of 5.1% over the 2017 number. Connecting passengers are forecast to account for essentially the same share of enplaned passengers in 2023 (11.2%) than they did in 2017 (11.4%). Table 35 presents historical and forecast enplaned passengers at Reagan by domestic and international subtotals, and provides originating and connecting components.

Forecast Aircraft Departures and Landed Weight for Reagan

Table 36 shows forecasts of aircraft departures and landed weight at Reagan, which were derived from the passenger forecasts using assumed trends in average seat occupancy, aircraft seat capacity, and aircraft size.

Between 2017 and 2023, average aircraft seating capacity at Reagan was assumed to increase. The number of aircraft departures is forecast to increase an average of 0.3% per year and landed weight is forecast to increase an average of 0.4% per year.

Forecast Passengers for Dulles

In 2017, the number of enplaned passengers increased 4.2% at Dulles, compared with a nationwide increase of 3.0%. Year-to-date and advance schedule filings by the airlines indicate a 3.6% increase in the number of departing seats at Dulles between the first half of 2017 and the first half of 2018 (compared with an estimated nationwide increase of 4.2%). The number of departing seats on United shows a 6.1% increase.

On the basis of year-to-date passenger traffic reports, advance airline schedules, and assumptions regarding passenger load factor, the number of enplaned passengers at Dulles in 2018 is forecast to be 11.6 million, up 2.4% from the number enplaned in 2017.

In forecasting enplaned passengers at Dulles between 2018 and 2023, it was assumed that:

- United will continue to operate a connecting hub and international gateway at the airport.
- The role of Dulles as the primary provider of domestic long-haul and international airline service for the region served by the Airports and BWI will be unchanged.
- No change will occur to the competitive position of the airport relative to competing U.S. airports as a gateway for international passengers.

In the long term, it is expected that most of the increase in domestic passenger demand generated by economic growth in the Airports service region will be accommodated at Dulles. This increase in demand is expected partly because capacity constraints and operating restrictions at Reagan will limit future increases in passenger numbers at that airport and partly because much of the increase in the population of the region is forecast to occur in the outer Virginia suburbs for which Dulles is more easily accessible.* Extension of the Metrorail Silver Line to Dulles, expected to be operational in 2020, will further improve ground access. Between 2018 and 2023, the number of enplaned passengers is forecast to increase an average of 2.1% per year, slightly lower than the average rate for Dulles forecast by the FAA in the TAF (2.4% per year).

The number of enplaned passengers at Dulles is forecast to be 12.85 million in 2023, an increase of 13.5% from 2017. Connecting passengers are forecast to account for a slightly lower share of enplaned passengers in 2023 (29.5%) than in 2017 (30.5%). Table 37 presents historical and forecast enplaned passengers at Dulles by domestic and international subtotals and provides originating and connecting components. Table 38 presents historical and forecast aircraft departures and landed weight.

*Metropolitan Washington Council of Governments, Growth Trends to 2045: Cooperative Forecasting in Metropolitan Washington, November 2016.

Forecast Aircraft Departures and Landed Weight for Dulles

The forecasts of aircraft departures and landed weight at Dulles shown in Table 38 were derived from the passenger forecasts using assumed trends in average seat occupancy, aircraft seat capacity, and aircraft size.

Between 2017 and 2023, average aircraft seating capacity and passenger load factors at Dulles were assumed to increase. The number of aircraft departures is forecast to increase an average of 1.7% per year and landed weight is forecast to increase an average of 1.9% per year.

Forecast Passengers for Both Airports

Table 39 shows that the combined number of enplaned passengers at Reagan and Dulles is forecast to increase an average of 1.5% per year between 2017 and 2023, with most passenger growth for the two-Airports system occurring at Dulles.

Stress Test Forecasts

Stress test forecasts of enplaned passengers were developed to provide the basis for conducting a test of the Airports Authority's financial results to hypothetical reductions in passenger numbers, such as could occur under conditions of weak economic growth or recession, restricted seat capacity, high airfares, and reduced connecting airline service that could result from changes in airline network strategies. For both Airports, relative to the base forecast for 2023, originating passenger numbers are forecast to be 10% lower and connecting passenger numbers are forecast to be 30% lower.

For Reagan, the number of enplaned passengers for the stress test in 2023 is forecast to be 11.00 million, compared with 12.55 million for the base forecast. Connecting passengers account for approximately 9% of the 2023 total for the stress test forecast, compared with 11% for the base forecast.

For Dulles, the number of enplaned passengers for the stress test for 2023 is forecast to be 10.80 million, compared with 12.85 million for the base forecast. Connecting passengers account for approximately 25% of the 2023 total for the stress test forecast, compared with 29% for the base forecast.

Table 40 presents the stress test forecasts relative to the base forecasts. Figure 11 and Figure 12 depict the stress test forecasts graphically for Reagan and Dulles, respectively. As shown in Figure 11, for Reagan, stress test passenger numbers forecast for 2023 are close to the numbers in 2015. As shown in Figure 12, for Dulles, stress test passenger numbers forecast for 2023 are close to the numbers in 2013.

MWAA539 F-0019

FINANCIAL ANALYSIS

FRAMEWORK FOR AIRPORTS AUTHORITY'S FINANCIAL OPERATIONS

In 2017, the Airports Authority operated Reagan and Dulles through the Aviation Enterprise Fund with a staff of approximately 1,570 employees (260 at Reagan, 510 at Dulles, 450 in public safety, and 350 in consolidated functions). The Airports Authority operated the Dulles Corridor Enterprise with approximately 60 additional employees. The financial operations of the Aviation Enterprise are accounted for separately for each of the two Airports.

Indenture

The financial operations of the Aviation Enterprise are governed in large part by the Indenture authorizing the issuance of Airport System Revenue Bonds (Bonds). As described in the letter at the beginning of this report, the Airports Authority covenants in the Rate Covenant of the Indenture that it will fix and adjust fees and charges for the use of the Airports so as to ensure that all funding requirements of the Indenture are met and that Net Revenues are at least 125% of Annual Debt Service.

The Indenture also prescribes the application of Revenues and Designated Passenger Facility Charges to the funds and accounts established under the Indenture, as described in the later sections "Application of Revenues" and "Application of Designated Passenger Facility Charges."

Airline Agreement

Effective January 2015, the Airports Authority and airlines accounting for substantially all of the passengers at the Airports entered into a new Airline Agreement that succeeded an agreement that was in effect from 1990 through 2014. The Airline Agreement provides, among other things, for the use and occupancy of the Airports; the methodologies for calculating Signatory Airline rentals, fees, and charges according to cost-recovery principles; and the majority-in-interest (MII) rights of the Signatory Airlines to approve certain capital expenditures.*

The Airline Agreement provides that the Airports Authority may adjust airline rates to include Extraordinary Coverage Protection Payments to ensure that Net Revenues at each of the Airports are projected to be not less than 125% of the sum of Debt Service on Bonds and Subordinated Bonds, so ensuring that the 125% debt service coverage requirement of the Rate Covenant is met. Under the Airline

*MII is defined in the Airline Agreement to mean, for each of the two Airports, for the Airfield Cost Center, 50% in number of Signatory Airlines and Signatory Cargo Carriers accounting for 60% of the landed weight of such airlines, and for other Signatory Airline Supported Areas, 50% of Signatory Airlines accounting for 60% of terminal rentals, fees, and charges.

Agreement, revenues from the Dulles Toll Road are excluded from the definition of Revenues.

The Airports Authority shares Net Remaining Revenues (NRR) each year with the Signatory Airlines. In 2014 through 2017, the annual amount of NRR averaged approximately \$212 million, shared approximately 31% to the Airports Authority and 69% to the Signatory Airlines. The forecast amounts of NRR and its sharing in accordance with allocation methodology set out in the Airline Agreement is shown in Exhibit F-1 and discussed in the later section “Sharing of Net Remaining Revenues.”

The Airports Authority’s share of NRR is deposited into the General Purpose Fund and, at the beginning of the next year, transferred into the Capital Fund. Amounts in the Capital Fund may be used at the discretion of the Airports Authority to pay the costs of the Capital Construction Program, other capital improvements, major maintenance and repair projects, equipment acquisitions, and other improvements and operating initiatives. Under the Airline Agreement, the Airports Authority may use its share of NRR generated at Reagan, as available up to agreed-upon maximum amounts, to reduce required rentals, fees, and charges at Dulles in the following year. During the forecast period, such maximum amounts are, as generated in 2018, \$30 million, and as generated in 2019 through 2023, \$25 million.

The Signatory Airlines’ share of NRR is deposited into the General Purpose Fund and, at the beginning of the next year, deposited into the Airline Transfer Account and used to reduce rentals, fees, and charges in such year.

The term of the Airline Agreement extends through 2024 at both Reagan and Dulles. For purposes of this report, it was assumed that the Signatory Airlines will pay all rentals, fees, and charges as calculated under the provisions of the Airline Agreement.

Capital, Operating and Maintenance Investment Program

The Airports Authority’s Capital, Operating and Maintenance Investment Program (COMIP) provides for various maintenance projects, repairs, equipment acquisitions, improvements, and planning studies as well as the cost of the snow removal program and certain operating initiatives. For 2018, the Airports Authority has budgeted \$54.1 million for new COMIP authorization to be funded from the Capital Fund. In the financial forecasts, it was assumed that the Airports Authority’s share of NRR transferred to the Capital Fund will be adequate to fund all required COMIP costs.

CAPITAL CONSTRUCTION PROGRAMS

The major projects in the CCP that are to be funded in part from the proceeds of the planned 2018A Bonds and 2019-2022 Bonds are listed in Exhibit A. Descriptions of the CCP projects are provided in the earlier sections “Capital Construction Programs

at Reagan” and “Capital Construction Programs at Dulles.” Exhibit A also presents estimated project costs and sources of funding. Each of the sources of funding is discussed in the following sections.

Commercial Paper Notes

Exhibit A shows the estimated permanent sources of funding for the CCP. Certain of these amounts will require interim funding pending the receipt of permanent funding. The Airports Authority is authorized to issue Commercial Paper Notes to provide such interim funding and has in place a credit facility allowing draws of up to \$200 million of such Notes. The payment of principal and interest on any Commercial Paper Notes is secured by Net Revenues and any other pledged funds on a parity with outstanding Bonds.

As of May 1, 2018, no Commercial Paper Notes were outstanding. For the purposes of this report, no further issuance of Commercial Paper Notes is assumed during the forecast period.

Federal Grants

The Airports Authority is eligible to receive grants-in-aid from the FAA under the Airport Improvement Program (AIP) for up to 75% of the costs of eligible projects. Certain of these grants are awarded as “entitlement” grants, the annual amount of which is calculated on the basis of the number of enplaned passengers and the amount of landed weight of all-cargo aircraft at the Airports. Other, “discretionary” grants are awarded on the basis of the FAA’s determination of the priorities for projects at the Airports and at other airports nationwide. In 2008 through 2017, the Airports Authority was awarded an average of approximately \$26.3 million annually in AIP entitlement and discretionary grants. The AIP grant program is subject to periodic reauthorization and appropriation by Congress.

The Airports Authority was awarded \$306.8 million of AIP grant funding for the 2001-2016 CCP, including \$191.8 million at Dulles for the design and construction of Runway 1L-19R and other airfield projects. In addition, the TSA contributed \$203.7 million to the costs of in-line baggage screening equipment and systems at Dulles. The Airports Authority expects to receive \$167.2 million in AIP grant funding for projects in the 2015-2024 CCP.

State Grants

The Commonwealth of Virginia provides grants to Virginia airport operators. In 2008 through 2017, the Airports Authority was awarded \$2.0 million per year in such state grants. No additional state grants were assumed for the CCP funding plan shown in Exhibit A.

In March 2017, the Airports Authority and the Commonwealth entered into a funding agreement under which the Commonwealth has provided grants of \$25 million in each of 2017 and 2018 to reduce required airline payments at Dulles

and thereby help to attract and retain airline service. The grants are conditioned on, among other things, the Airports Authority adopting and implementing an attainable plan for long-term cost reductions. The grants have not been used to fund capital projects, but rather have been applied to reduce the debt service requirements and operating costs included in the calculation of airline rentals, fees, and charges as shown in Exhibit E-5.

Passenger Facility Charge (PFC) Revenues

The Airports Authority has received approval from the FAA to impose and use a PFC per eligible enplaned passenger at both Airports. Beginning November 1993 at Reagan, and January 1994 at Dulles, the PFC was \$3.00. Effective May 2001, the PFC was increased to \$4.50 at both Airports. Under approvals received from the FAA, the Airports Authority is authorized to impose a PFC and to use up to approximately \$3.5 billion of PFC Revenues on approved projects. At Reagan, approved projects include upgrades to the runway safety areas and pavement overlays for all three runways and a new aircraft rescue and firefighting facility. At Dulles, approved projects include Runway 1L-19R, the expansion of the IAB, the extension of Concourse B, the construction of the AeroTrain system, and the Dulles Metrorail station.

Under PFC Application 4,* the FAA approved the use of PFC Revenues to pay certain PFC-eligible debt service on Bonds used to fund the AeroTrain and related projects at Dulles. Under PFC Application 6, the FAA approved the use of PFC Revenues to pay certain PFC-eligible debt service on Bonds used to fund airside projects at Reagan (as well as \$233.0 million of pay-as-you-go funding for the Dulles Metrorail station). The approved PFC collection periods extend to February 2023 for Reagan and December 2038 for Dulles. Table 42 shows the Airport's approved PFC collection and use authority and PFC collections through March 2018.

*The PFC Application numbers referenced in this report are as used internally by the Airports Authority. See the notes to Table 42 for the corresponding PFC application identifiers used by the FAA.

Table 42
PFC COLLECTION AND USE AUTHORITY
 Metropolitan Washington Airports Authority
 (dollars in thousands)

PFC Application	Reagan National Airport	Dulles International Airport	Total
1	\$166,410	\$ 221,917	\$ 388,327
2	131,397	72,508	203,905
3	30,728	58,903	89,631
4	146,604	2,089,326	2,235,929
5	124,914	--	124,914
6	425,429	--	<u>425,429</u>
Total PFC collection and use authority			\$3,467,785
Less: PFC collections through March 31, 2018			<u>1,608,659</u>
Remaining collection authority as of March 31, 2018			\$1,859,126

Notes: Rows and columns may not add to totals shown because of rounding.

Source: Metropolitan Washington Airports Authority.

The PFC Application numbers are as used internally by the Airports Authority.

Corresponding PFC application identifiers used by the FAA are as follows:

- Application 1: 93-01-C-04-DCA and 93-01-C-05-IAD
- Application 2: 98-03-C-04-DCA, 98-04-C-03-DCA, and 98-02-C-03-IAD
- Application 3: 02-05-C-01-DCA and 02-04-C-00-IAD
- Application 4: 05-06-C-00-DCA and 05-05-C-02-IAD
- Application 5: 07-08-C-01-DCA
- Application 6: 14-09-C-00-DCA

Exhibits F-2 and F-3 present historical and forecast sources of PFC Revenues at the Airports assuming no change in the PFC from \$4.50. PFC Revenues derived from the imposition of the \$4.50 PFC at Dulles (but not at Reagan) are defined as Designated Passenger Facility Charges. As shown on the exhibits and discussed in the later section "Application of PFC Revenues," the Airports Authority has in the past committed certain of such Designated Passenger Facility Charges to pay PFC-eligible Bond debt service and intends to continue to use PFC Revenues to pay such debt service.

Airport System Revenue Bonds

Exhibit B presents the estimated sources and uses of the proposed 2018A New Money Bonds, the 2018A Refunding Bonds, and the planned 2019-2022 Bonds as provided by Frasca & Associates, LLC, the Airports Authority's independent registered municipal advisor.

The 2018A New Money Bonds are being issued as fixed-rate AMT Bonds to (1) fund \$199.5 million of the costs of the CCP, (2) fund capitalized interest, (3) fund a deposit to the Common Reserve Account of the Debt Service Reserve Fund, and (4) pay costs of issuance.

The 2018A Refunding Bonds are being issued as fixed-rate AMT Bonds to, along with other available funds, (1) refund \$159.6 million principal amount of outstanding 2008A Bonds and \$254.2 million principal amount of 2009C Bonds, (2) fund a deposit to the Common Reserve Account of the Debt Service Reserve Fund, and (3) pay costs of issuance.

The planned 2019-2022 Bonds are assumed to be issued as fixed-rate AMT bonds to (1) pay the costs of completing the CCP in the amounts shown in Exhibit A, (2) fund capitalized interest, (3) fund a deposit to the Debt Service Reserve Fund, and (4) pay costs of issuance.

As shown in Exhibit B, planned 2019-2022 Bonds in the principal amount of \$982.0 million are expected to be paid from general Airport System Revenues. Additional Bonds planned to be issued in 2019 in the principal amount of \$398.7 million are expected to be paid from PFC Revenues and are referred to as the 2019 PFC Bonds.

The amounts and dates of future Bond issues are subject to change, and, although the future Bonds to be paid from PFC Revenues are assumed to be issued in one tranche in 2019, such Bonds may be issued in more than one tranche in 2019 and later years.

The Airports Authority may issue additional Refunding Bonds during the forecast period to achieve debt service savings. However, no such issuance of Refunding Bonds after the 2018A Refunding Bonds was assumed for this report.

ANNUAL DEBT SERVICE

Exhibit C-1 presents historical and forecast Annual Debt Service. Forecast amounts were estimated using the following assumptions as provided by Frasca & Associates, LLC:

Outstanding Variable-Rate Bonds Subject to Floating-to-Fixed Interest Rate Swaps:

Principal amount of \$23.8 million of 2011A Bonds subject to the 2002 Swap Agreement, interest rate of 4.445% plus the costs associated with the underlying variable-rate debt

Principal amounts of \$116.8 million of 2009D Bonds, \$91.7 million of 2010C Bonds, and \$47.6 million of 2011A Bonds subject to the 2009 Swap Agreements, interest rate of 4.099% plus the costs associated with the underlying variable-rate debt

Principal amount of \$148.8 million of 2010D Bonds subject to the 2010 Swap Agreements, interest rate of 4.112% plus the costs associated with the underlying variable-rate debt

Principal amount of \$108.6 million of 2011A Bonds subject to the 2011 Swap Agreements, interest rate of 3.862% plus the costs associated with the underlying variable-rate debt

Outstanding Unhedged Variable-Rate Bonds:

Principal amounts of \$53.8 million of 2003D Bonds, \$53.9 million of 2010C Bonds, and \$133.7 million of 2011B Bonds, interest rates of 2.00% for 2018, 3.00% for 2019, and 4.00% thereafter plus the costs associated with the variable-rate debt

Proposed 2018A Fixed-Rate Bonds:

Principal amount of \$611.8 million of 2018A AMT Bonds, amortization 2019 through 2048, interest rate of 4.29%

Planned 2019-2022 Fixed-Rate Bonds:

Principal amount of \$398.7 million of 2019 PFC Bonds, amortization 2020 through 2049, interest rate of 6.09%

Principal amount of \$982.0 million of other 2019-2022 Bonds (to be issued over several years), amortization 2020 through 2052, interest rate of 6.09%

OPERATION AND MAINTENANCE EXPENSES

Exhibit D-1 presents historical and forecast Operation and Maintenance (O&M) Expenses for the Aviation Enterprise. Under the Indenture, O&M Expenses include all expenses of the Airports Authority paid or accrued for the operation, maintenance, administration, and ordinary current repairs of the Airports. Such expenses include those directly attributable to the Airports and an allocable portion of expenses for consolidated functions. O&M Expenses do not include, among other things, rentals payable under the Federal Lease or operating expenses of the Dulles Corridor Enterprise. Exhibits D-2 and D-3 present the O&M Expenses for Reagan and Dulles, respectively.

O&M Expenses for 2018 are budgeted amounts, which were used as the base for the forecasts. O&M Expenses were forecast taking into account assumed increases in costs as a result of inflation and planned facility development. In particular, it was assumed that:

1. The unit cost of salaries, wages, and employee fringe benefits for life and health insurance and retirement benefits will increase 3.0% per year and there will be no overall increase in staffing.
2. The cost of utilities, services, materials, and supplies will also increase at 3.0% per year.
3. Expenses to operate and maintain the AeroTrain system will also increase at 3.0% per year under the terms of a contract that expires in 2025.
4. Additional expenses will be incurred beginning in 2021 at the scheduled opening of the new north concourse and secure National Hall.

REVENUES

Exhibit E-1 presents historical and forecast Revenues of the Aviation Enterprise. Revenues of the Airports Authority are derived primarily from rentals, fees, and charges paid for the use and occupancy of the Airports, including landing fees, terminal rents, passenger conveyance fees (for the AeroTrain and mobile lounges), and other charges payable by Signatory Airlines under the Airline Agreement, public parking revenues, rental car revenues, and fees paid by concessionaires. Table 43 summarizes 2017 Revenues according to major category. Further detail for each of Reagan and Dulles is shown in Exhibits E-2 and E-3, respectively.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

Table 43
REVENUE SUMMARY FOR 2017
 Metropolitan Washington Airports Authority
 (dollars in thousands)

	Reagan National Airport		Dulles International Airport		Aviation Enterprise Total	
	Amount	Percent of total	Amount	Percent of total	Amount	Percent of total
Airline revenues						
Terminal rents and user fees	\$103,516	33.2%	\$134,977	31.1%	\$238,493	32.0%

	\$160,835	52.4%	\$198,731	45.8%	\$359,567	48.2%
Concessions						
Landside concession revenues (a)	\$ 92,163	29.5%	\$ 84,565	19.5%	\$176,728	23.7%
In-terminal concession revenues	33,856	10.8	51,631	11.9	85,487	11.5
Airside concession revenues	<u>3,817</u>	<u>1.2</u>	<u>37,236</u>	<u>8.6</u>	<u>41,053</u>	<u>5.5</u>
	\$129,836	40.9%	\$173,432	39.9%	\$303,268	40.6%
Other operating revenues	15,844	5.1	43,784	10.1	59,628	8.0
Investment earnings	<u>5,677</u>	<u>1.8</u>	<u>18,221</u>	<u>4.2</u>	<u>23,898</u>	<u>3.2</u>
Total	\$312,192	100.0%	\$434,168	100.0%	\$746,361	100.0%

Note: Columns and rows may not add to totals shown because of rounding.

(a) Includes public automobile parking stated net of expenses and management fees.

Source: Metropolitan Washington Airports Authority.

Individual components of Revenues, shown for Reagan in Exhibit E-2 and for Dulles in Exhibit E-3, were forecast taking into account historical results through 2017, budgeted amounts for 2018, allowances for unit price inflation at 2.0% per year, planned facility development, and the provisions of the Airline Agreement and other leases and agreements with tenants and users of the Airports. Amounts shown for 2018 for nonairline revenues are as budgeted. Amounts shown for 2018 for airline revenues are as calculated per the provisions of the Airline Agreement using budgeted O&M Expenses and current estimates of debt service and other rate base requirements.

Revenues from sources related to passengers, such as parking and terminal concessions, and from sources related to aircraft activity, such as landing fees, were forecast to change in part as a function of the traffic forecasts shown in Tables 35 through 38 in the earlier section "Airline Traffic Forecasts."

AIRLINE REVENUES

Signatory Airline Rentals, Fees, and Charges

Exhibits E-4 and E-5 show, for Reagan and Dulles respectively, the historical and forecast financial requirements that determine rentals, fees, and charges payable by the Signatory Airlines under the provisions of the Airline Agreement. The Airports Authority calculates and adjusts such rentals, fees, and charges annually, but may adjust them at mid-year or at any other time in the event the Indenture requires such an adjustment. Exhibits E-4 and E-5 also show aggregate Signatory Airline payments per enplaned passenger. The differences between the airline payments shown in Exhibits E-4 and E-5 and the airline revenues shown in Exhibits E-1 and E-2, respectively, are accounted for by payments made by nonsignatory airlines.

Signatory Airline rentals, fees, and charges are calculated for each of the Airports from the Total Requirement as allocable to the Cost Centers and Sub-Centers within the Airline Supported Areas listed on Exhibits E-4 and E-5.* The Total Requirement of each such Cost Center and Sub-Center is the sum of allocable O&M Expenses, deposits into funds and accounts required under the Indenture, Capital Charges (including Debt Service), Debt Service Coverage, Federal Lease payments, and the requirements of the Indirect Cost Centers (Maintenance, Public Safety, Systems and Services, and Administration). The Airline Agreement defines Debt Service Coverage as an amount equal to the applicable annual coverage percentages specified in the Airline Agreement of the portion of Debt Service attributable to Senior Bonds and Subordinated Bonds that is not funded with PFC Revenues or federal grants plus such other amounts as may be established by any financing agreement or arrangement with respect to other indebtedness. The applicable coverage percentage during the forecast period is 30%.

As noted in the earlier section "State Grants," grants of \$25 million from the Commonwealth of Virginia have been applied to reduce required airline payments in each of 2017 and 2018.

In total, the rentals, fees, and charges paid by the Signatory Airlines recover their pro rata share of the Total Requirements of the Airline Supported Areas for each year net of the Signatory Airline share of NRR from the prior year. Revenues of the Airports Authority from other (nonairline) sources cover the Total Requirements of the Non-Aviation Cost Centers including the allocable portion of the requirements of the Indirect Cost Centers and the unrecovered portion of the Total Requirements of the Airline Supported Areas.

Under the Airline Agreement, if Revenues are not projected to be sufficient at either or both of the Airports to produce Net Revenues of at least 125% of the sum of Debt Service on Bonds and Subordinated Bonds, then the Airports Authority may adjust

*Certain capitalized terms in this section of the report are as defined in the Airline Agreement.

the Total Requirements in Airline Supported Areas, at either or both Airports, by requiring Extraordinary Coverage Protection Payments to ensure that the 125% coverage requirement of the Rate Covenant is met. No such Extraordinary Coverage Protection Payments are forecast to be required.

CONCESSION REVENUES

Public Parking

Table 44 shows the number of revenue-producing public parking spaces and parking rates at the Airports. At Reagan, parking rates were last changed effective September 1, 2015, when the daily rate for the Economy lot was increased from \$15 per day to \$17 per day. Before the September 2015 increase, parking rates were last changed effective November 1, 2014, when the separate Hourly parking areas in the Terminal A and Terminal B/C garages were eliminated and all garage parking was renamed Terminal parking. The hourly parking rate for Terminal garage parking was increased from \$5 per hour to \$6 per hour and the maximum rate per day was increased from \$22 per day to \$25 per day. The hourly rate for Economy parking was eliminated and the daily rate was increased from \$14 per day to \$15 per day. In 2015, a 100-space short-term lot at Terminal A was converted to use as a vehicle holding lot for Uber and Lyft ride-hailing services (also referred to as transportation network companies or TNCs).

Table 44
AIRPORT PUBLIC PARKING FACILITIES
Metropolitan Washington Airports Authority
(as of April 2018)

	Number of spaces	Parking rates
Reagan National Airport		
Garage A	1,102	\$6 per hour, \$25 per day
Garage B/C	5,306	\$6 per hour, \$25 per day
Economy	<u>2,653</u>	\$17 per day
Total	9,061	
Dulles International Airport		
Terminal Hourly Lot	1,134	\$6 per hour, \$30 per day
Terminal Daily Lot	1,189	\$6 per hour, \$22 per day
Garage 1	4,680	\$6 per hour, \$17 per day
Garage 2	3,645	\$6 per hour, \$17 per day
Economy	11,643	\$10 per day
Valet and administration	<u>316</u>	\$35 first day, \$30 additional days
Total	22,607	

Source: Metropolitan Washington Airports Authority.

At Dulles, parking rates were last changed effective August 1, 2016, when the daily rate for the Terminal Daily Lot was increased from \$20 to \$22. Before the August 2016 increase, parking products and rates were last changed effective July 31, 2015, when the Terminal Lot was divided into Hourly and Daily parking sections. Rates for the Hourly section were set at \$6 per hour and \$30 per day, and rates for the Daily section were set at \$6 per hour and \$20 per day. (Previously, rates for the undivided Terminal Lot were \$5 per hour and \$35 per day.) Also effective July 31, 2015, Garage rates were adjusted, with the \$4 per half-hour rate replaced with a \$6 per hour rate. Before the July 2015 changes, parking rates were last changed effective January 14, 2013, when the rate for Terminal Lot parking was increased from \$4 per hour to \$5 per hour, and effective July 21, 2014, when the maximum rate per day for Terminal Lot parking was decreased from \$36 to \$35. In 2016, 703 spaces were displaced from Economy parking to allow construction of a gas station.

The parking facilities at both Airports are operated for the Airports Authority by Five Star U-Street Parking under a management agreement that commenced in October 2015 and extends through September 2018 (with two one-year option periods, which, if exercised, would extend the agreement through 2020.). Under the management agreement, which covers public parking and shuttle bus services, all parking operating costs are reimbursed to the operator, who receives a fixed management fee (adjusted annually for inflation). The parking revenues shown in Exhibits E-1, E-2, and E-3 are the net revenues received by the Airports Authority (gross receipts less operating expenses and management fees).

Public parking represents the largest single source of nonairline revenues to the Airports Authority. At Reagan, in 2017, gross parking revenues were \$57.4 million, \$5.42 per originating passenger, operating expenses and management fees were \$13.9 million, and net parking revenues were \$43.5 million. At Dulles, in 2017, gross parking revenues were \$67.2 million, \$8.54 per originating passenger, operating expenses and management fees were \$14.8 million, and net parking revenues were \$52.4 million. There is little competition from off-airport operators at either Reagan or Dulles.

Since 2015, numbers of airport parking transactions have decreased relative to numbers of originating passengers at both Reagan and Dulles. At Reagan, between 2015 and 2017, the number of parking transactions decreased 7.9%, while the number of originating passengers increased 9.5%, resulting in a 15.8% decrease in the propensity to park as measured by parking transactions per originating passenger. At Dulles, between 2015 and 2017, the number of parking transactions decreased 2.9%, while the number of originating passengers increased 9.5%, resulting in an 11.3% decrease in parking transactions per originating passenger.

The decreased propensity to park is the result of changing airport access travel choices attributable to changes in the relative cost and convenience of competing travel modes. Short-stay parking transactions have also been reduced as mobile phones make arranging curbside pick-up easier. The decrease in the propensity to

park has coincided with the increase in the number of airport trips made by Uber and Lyft, as discussed in the later section “Ground Transportation Fees.”

Parking revenues were forecast assuming that:

1. Parking rates will not be increased.
2. Increases in parking demand with increased numbers of originating passengers will be offset by further decreases in the propensity to park as changes in technology and economics make travel modes other than driving more convenient and attractive. As a result, there will be only a small net increase in numbers of parking transactions.
3. Parking facilities will continue to be operated under management agreements having financial terms that are substantially the same as the current agreement.

Rental Cars

In 2017, on-airport rental car companies providing service at the Airports and their shares of revenues paid to the Airports Authority were as shown in Table 45.

Company	Reagan National		Dulles International		Airports Authority	
	Revenues	Share	Revenues	Share	Revenues	Share
Enterprise-Alamo-National (a)	\$ 9,518,672	37.3%	\$ 5,729,223	31.6%	\$15,247,895	34.9%
Hertz-Dollar-Thrifty (b)	7,784,446	30.5	5,768,684	31.8	13,553,129	31.1
Avis-Budget (c)	7,842,949	30.8	5,538,168	30.5	13,381,116	30.7
Advantage (d)	<u>357,090</u>	<u>1.4</u>	<u>1,100,000</u>	<u>6.1</u>	<u>1,457,090</u>	<u>3.3</u>
	\$25,503,156	100.0%	\$18,136,0754	100.0%	\$43,639,231	100.0%

Note: Columns and rows may not add to totals shown because of rounding.

(a) Subsidiaries of Enterprise Holdings, Inc.
 (b) Subsidiaries of Hertz Global Holdings, Inc.
 (c) Subsidiaries of Avis Budget Group.
 (d) Operates off-airport at Reagan.

The on-airport rental car companies operate at the Airports under the terms of competitively bid concession agreements. At Reagan, the rental car concession agreements became effective in February 2017 and expire in January 2022. At Dulles, the concession agreements became effective in July 2013 and expire in June

2018 (to be extended month-to-month to no later than June 2019). Under the concession agreements for both Airports, the rental car companies pay the greater of a minimum annual guarantee or 10% of their gross receipts. Rental car revenues also include the proceeds of a customer contract fee (CCF) collected on behalf of the Airports Authority by the on-airport rental car companies for all rental car contracts at Reagan at a rate of \$3.50 per vehicle transaction-day (increased from \$2.50 effective February 2017). The CCF revenues are used to pay certain of the costs of financing, maintaining, and operating the rental car facilities at Reagan.

Advantage operates off-airport at Reagan and pays a privilege fee of 8% of gross receipts over \$300,000.

In 2017, revenues received by the Airports Authority from rental car operations at Reagan totaled \$25.5 million, \$2.41 per originating passenger. At Dulles, rental car revenues in 2017 were \$18.1 million, \$2.30 per originating passenger.

As with parking, since 2015, at both Reagan and Dulles, numbers of rental car transactions have decreased relative to numbers of originating passengers as airport access travel choices have changed. Between 2015 and 2017, the number of rental car transactions per originating passenger decreased 12.1% at Reagan and 15.6% at Dulles. At both Airports, the decreased propensity to rent was more than offset by increased revenues per transaction, with the result that total rental car revenues increased. Rental car revenues were forecast to increase in proportion to forecast increases in originating passenger numbers, assuming some further decreases in the propensity to rent, and with price inflation, but with no increase in the CCF rate.

Ground Transportation

The Airports Authority collects permit and activity fees from taxicabs, limousines, shared van services, and other providers of commercial ground transportation. Effective November, 2015, the Airports Authority began collecting a \$4.00 per trip fee from the transportation network companies that pick up and drop off passengers at the terminals.

At Reagan, commercial ground transportation revenues in 2017 totaled \$23.2 million, of which \$15.5 million was paid by TNCs. At Dulles, commercial ground transportation revenues in 2017 totaled \$14.0 million, of which \$6.8 million was paid by TNCs.

Numbers of trips by TNCs have increased rapidly since such trips were required to be reported beginning in November 2015. In 2017, TNCs accounted for 3.9 million trips at Reagan (32% of all trips made by TNCs, taxis, limousines, and shared-ride van services) and 1.7 million trips at Dulles (60% of all trips made by TNCs, taxis, limousines, and shared-ride van services). The increased use of TNCs has contributed to the decreased use of all other airport access modes.

Ground transportation revenues were forecast with numbers of originating passengers, assuming some further increase in the share of trips accounted for by TNCs, but with no increase in per trip fees.

Food and Beverage

At Reagan, approximately 40 food and beverage outlets occupy 44,000 square feet of terminal space. In 2017, gross revenues from food and beverage concessions totaled \$94.4 million, \$7.90 per enplaned passenger. Net revenues received by the Airports Authority were \$17.8 million, equivalent to 18.9% of gross revenues.

At Dulles, approximately 40 food and beverage outlets occupy 58,000 square feet of terminal space. In 2017, gross revenues from food and beverage concessions were \$80.2 million, \$7.08 per enplaned passenger. Net revenues received by the Airports Authority were \$15.05 million, equivalent to 18.8% of gross revenues.

MarketPlace Washington, LLC, manages the food and beverage programs (as well as newsstand and retail programs) at both Airports under a master developer agreement that expires in December 2019 (and may be extended at the Airport Authority's option to December 2021). Under the agreement, MarketPlace develops and manages the food and beverage programs at the Airports, but does not operate any concession facilities. MarketPlace negotiates contracts with each concessionaire using a standard lease that has been approved by the Airports Authority. These contracts generally obligate each concessionaire to pay the greater of a percentage of gross revenues or a minimum annual guarantee. MarketPlace collects all rents and fees from the concessionaires and retains 9.75% of such gross rental payments as its management fee.

MarketPlace oversaw the redevelopment of food, beverage, newsstand, and retail concessions at both Airports between 2014 and 2016, and revenues have generally increased with the completion of redevelopment and improved concession offerings. Beginning in 2018, food and beverage revenues per enplaned passenger were forecast to increase with price inflation. At Reagan, food and beverage revenues were also assumed to increase beginning in 2021 as concession space is added as part of the new north concourse and secure National Hall projects and concession outlets that are now located before passenger security screening will become available to passengers after they have been screened.

Newsstand and Retail

At Reagan, approximately 30 newsstand and retail outlets occupy 17,000 square feet of terminal space. In 2017, gross revenues for newsstand and retail concessions were \$36.0 million, \$3.01 per enplaned passenger. Net revenues received by the Airports Authority were \$5.5 million, equivalent to 15.3% of gross revenues.

At Dulles, approximately 40 newsstand and retail outlets occupy 33,000 square feet of terminal space. In 2017, gross revenues for newsstand and retail concessions were

\$40.5 million, \$3.57 per enplaned passenger. Net revenues received by the Airports Authority were \$9.0 million, equivalent to 22.20% of gross revenues.

As with food and beverage, newsstand and retail revenues per enplaned passenger were forecast to increase with price inflation. At Reagan, revenues were also assumed to increase beginning in 2021 as concession space is added and security screening is relocated.

Duty Free

Duty free concessions at Reagan and Dulles are managed and operated by Dulles Duty Free under an agreement that became effective in August 2014 and expires in December 2021. At Dulles, duty free outlets occupy 11,000 square feet and are located in Concourses B, C, and D. At Reagan, a small (200-square-foot) duty free outlet is located in Terminal A. In 2017, gross duty free revenues for the two Airports combined were \$23.1 million, \$5.70 per enplaned international passenger (97% attributable to Dulles). Payments to the Airports Authority are the greater of 22% of gross revenues or a minimum annual guarantee calculated per international enplaned passenger.

In 2017, duty free revenues received by the Airports Authority were \$13.7 million (the minimum annual guarantee), equivalent to 59.3% of gross revenues. Duty free revenues were forecast to be the minimum annual guarantee as increased in proportion to forecast increases in numbers of international enplaned passengers.

Display Advertising

In 2017, the Airports Authority received revenues from display advertising of \$8.6 million at Reagan and \$6.4 million at Dulles. Effective March 2016, the Airports Authority entered into a new eight-year concession agreement with Clear Channel Airports for display advertising at the Airports. The agreement extends to February 2024 (with an option to extend to February 2026) and provides for the payment of the greater of a percentage of gross revenues (between 60% and 70%) or a minimum annual guarantee (\$12.3 million in the first year of the agreement increasing to \$17.0 million in the eighth year). Under the agreement, Clear Channel initially invested \$10.7 million to replace existing advertising fixtures with high-definition digital screens at the Reagan and Dulles terminals. Display advertising revenues were forecast assuming that the minimum guaranteed amounts will be exceeded and that revenues per enplaned passenger will increase from actual 2017 amounts with inflation.

Fixed Base Operations

At Reagan, Signature Flight Support provides fixed base operator services to business and general aviation under an agreement that expires in November 2023. Signature pays the greater of a minimum annual guarantee (\$1.5 million in 2018) or a percentage of gross revenues for various categories of goods and services.

At Dulles, two fixed base operators, Jet Aviation and Signature Flight Support, serve business and general aviation. Both agreements expire in October 2022. Jet Aviation and Signature each pay the greater of a minimum annual guarantee (\$11.5 million and \$17.2 million, respectively, in 2018) or a percentage of gross revenues from various categories of goods and services. The operators pay annual facility rents in addition.

Revenues from fixed base operations were forecast as the minimum annual guarantees plus the annual facility rents.

In-Flight Kitchen

The in-flight kitchen concession at Reagan is operated by LSG Sky Chefs under a lease that expires in April 2019 (with a two-year option to extend to April 2021). Sky Chefs pays the Airports Authority 12% of gross receipts for on-airport sales and 5% of gross receipts for off-airport sales plus premises rent to cover the cost of utilities that are provided by the Airports Authority.

Two in-flight kitchen concessions at Dulles are operated by Gate Gourmet International and LSG Sky Chefs under leases that also expire in April 2021 (with options for five-year extensions to April 2026). The Dulles leases are similar to those at Reagan, with the operators paying the Airports Authority the same percentages of gross receipts. In addition, Flying Food Groups operates an in-flight kitchen off-airport at Dulles under the terms of a commercial permit that provides for the payment to the Airports Authority of 12% of all gross receipts.

In-flight kitchen revenues were forecast to increase from budgeted 2018 amounts in proportion to the increase in enplaned passenger numbers and with price inflation.

OTHER OPERATING REVENUES

Other operating revenues are derived from rentals paid by the TSA and other tenants, utility reimbursements, and miscellaneous other sources. Some building rentals are based on market rates and some, including certain hangars and cargo buildings, are based on cost-recovery rates. Revenues from TSA security fees include the reimbursement of the costs of police coverage of passenger screening activities. Revenues from utilities include reimbursements for metered and billed utility services. At some time in the future, the Airports Authority expects to generate additional revenues from the commercial development of land and buildings at Dulles, but such additional revenues were not taken into account in the forecasts.

INVESTMENT EARNINGS

Investment earnings included in Revenues are derived from amounts in funds and accounts other than the Construction Fund and the PFC Fund. Investment earnings were forecast assuming increased fund balances associated with the planned issuance of future Bonds and investment rates consistent with historical rates.

APPLICATION OF REVENUES

Exhibit F-1 shows the forecast application of Revenues. Under the Indenture, all Revenues (together with any other available funds, including transfers from the General Purpose Fund) are applied in the following priority:

1. Pay Operation and Maintenance Expenses
2. Deposit to the Operation and Maintenance Fund any amounts necessary to maintain a reserve balance of 25% of budgeted O&M Expenses.
3. Deposit to the Bond Fund Principal and Interest Accounts amounts required to pay Bond principal and interest.
4. Deposit to the Bond Fund Redemption Account amounts required to redeem Bonds. (No such payments are forecast to be required.)
5. Deposit to the Debt Service Reserve Fund any amounts necessary to maintain required debt service reserves. (No such payments are forecast to be required.)
6. Pay any required debt service on Subordinated Bonds. (No Subordinated Bonds are outstanding or expected to be issued and no such debt service payments are forecast to be required.)
7. Replenish any required Subordinated Bond Reserve Funds. (No such payments are forecast to be required.)
8. Pay any required debt service on Junior Lien Obligations. (No such payments are forecast to be required.)
9. Make annual payments required under the Federal Lease.
10. Replenish any amounts withdrawn from the Emergency Repair and Rehabilitation Fund in the preceding year. (No such payments are forecast to be required.)
11. Deposit all remaining amounts into the General Purpose Fund.

Amounts in the General Purpose Fund are not pledged to Bondholders and are available for use by the Airports Authority for any legal purpose, provided that any moneys required to be transferred to the Revenue Fund, including those to be transferred under the provisions of the Airline Agreement, are not to be applied for any other purpose.

Any termination payments under Swap Agreements are payable from funds subordinated to Bonds, Commercial Paper Notes, Subordinated Bonds, and Junior Lien Obligations. (No such payments are forecast to be required.)

SHARING OF NET REMAINING REVENUES

Exhibit F-1 shows the forecast calculation of Net Remaining Revenues (NRR) and its allocation between the Airports Authority (transfer to the Capital Fund) and the Signatory Airlines (transfer to the Airline Transfer Account) as provided for under the Airline Agreement.

At Reagan, NRR is to be split as follows: for amounts generated in 2017 and 2018, 55% Authority, 45% Airlines; and for amounts generated in 2019 through 2023, 45% Authority, 55% Airlines. The Authority may use its share of NRR generated at Reagan to reduce required Signatory Airline rentals, fees, and charges at Dulles in the amounts discussed in the earlier section, "Airline Agreement."

At Dulles, NRR is to be split 50%-50% up to a "plateau" amount, which is to be increased annually with an inflation index. The plateau amount for 2017 was \$16.4 million. Remaining NRR above the plateau amount is to be split 25% to the Airports Authority and 75% to the Signatory Airlines.

APPLICATION OF PFC REVENUES

Exhibits F-2 and F-3 show historical and forecast PFC Revenues (not taking into account investment earnings) and the use of such PFC Revenues to pay PFC-eligible Bond debt service and project costs pay-as-you-go. Pursuant to the Thirty-fifth Supplemental Indenture, Designated Passenger Facility Charges derived from the \$4.50 PFC at Dulles (and not designated as Revenues) were or are to be deposited into the PFC Fund for use in the following priority:

- To the PFC Debt Service Account in each year 2009 through 2016, an amount equal to the greater of \$35.0 million or 50% of the total amount of Designated Passenger Facility Charges received by the Airports Authority in each year. Such amounts were irrevocably committed to the payment of PFC-eligible Bond debt service.
- To the PFC Project Account, all remaining amounts. Such amounts may be applied to any approved PFC-eligible purpose, including transfer to the PFC Debt Service Account to pay PFC-eligible Bond debt service or to pay approved PFC-eligible costs pay-as-you-go. The Airports Authority used \$45.0 million of Designated Passenger Facility Charges to pay Bond debt service in 2017 and intends to use the amounts of PFC Revenues, including Designated Passenger Facility Charges, shown in Exhibit F-3 in 2018 through 2023.

As shown in Exhibit F-2, the Airports Authority intends to use PFC Revenues generated at Reagan to pay approved project costs, either pay-as-you-go or for PFC-eligible Bond debt service. As shown, amounts approved under Reagan Application 6 are forecast to be used for the Metrorail station at Dulles (pay-as-you-go) and for airside projects at Reagan (payment of debt service).

DEBT SERVICE COVERAGE

Exhibit G-1 shows historical and forecast coverage of Bond debt service by Net Revenues for the Aviation Enterprise. Exhibits G-2 and G-3 present historical and forecast debt service coverage for Reagan and Dulles, respectively. The amount of transfers from the General Purpose Fund is assumed to be the entire amount of the Signatory Airlines' share of NRR at each Airport per the Airline Agreement.

Exhibit G-1 also shows the calculation of the sufficiency of forecast Net Revenue to meet the requirements of the Rate Covenant, which requires that Net Revenues be sufficient to provide for the larger of the Indenture Section 6.04(a)(i) requirement or the Indenture Section 6.04(a)(ii) requirement. Net Revenues are forecast to be sufficient to meet the requirements of the Rate Covenant each year of the forecast period.

STRESS TEST FINANCIAL PROJECTIONS

Exhibits H-1 through H-3 summarize the forecast financial results as shown in earlier exhibits and discussed in the preceding sections. Revenues and expenses were forecast assuming the base forecasts of enplaned passengers shown in Tables 35 and 37 in the earlier section "Airline Traffic Forecasts."

As discussed in the earlier section, "Stress Test Forecasts," and presented in Table 40 and Figures 11 and 12, passenger forecasts were prepared to reflect hypothetical future reductions in numbers of both originating and connecting passengers. Exhibits H-1 through H-3 summarize projected financial results assuming the stress test passenger forecasts.

For the stress test financial projections, the CCP was assumed to be implemented to the same schedule as for the base case financial forecasts, notwithstanding the reduced passenger traffic, and to be funded with the same amounts of Bond proceeds and other funds.

Other assumptions underlying the stress test projections are the same as those for the base case forecasts, except revenues related to passenger numbers, such as PFC Revenues, concession revenues, parking revenues, and rental car revenues, were projected to be lower. O&M Expenses were assumed to be the same for the stress test as for the base case.

Under the stress test, Bond debt service coverage ratios are projected to exceed the 125% requirement of the Rate Covenant and Extraordinary Coverage Protection Payments from the Signatory Airlines are not projected to be required at either Reagan or Dulles. Annual PFC Revenues and balances in the PFC Fund would be reduced, but would be sufficient to provide pay-as-you-go funding for the future projects as shown in Exhibits F-2 and F-3. As shown in Exhibits H-2 and H-3, required airline payments per passenger at the Airports would increase relative to those for the base forecasts.

REVENUES
 Metropolitan Washington Airports Authority
 For Fiscal Years ending December 31
 (dollars and passengers in thousands)

This exhibit is based on information from the sources indicated and assumptions provided by, or reviewed with and approved by, Airports Authority management, as described in the accompanying text. Inevitably, some of the assumptions used to develop the forecasts will not be realized and unanticipated events and circumstances could occur. Therefore, the actual results will vary from those forecast, and the variations could be material.

SUMMARY OF BASE CASE AND STRESS TEST FINANCIAL PROJECTIONS

Metropolitan Washington Airports Authority

For Fiscal Years ending December 31

(dollars and passengers in thousands)

This exhibit is based on information from the sources indicated and assumptions provided by, or reviewed with and approved by, Airports Authority management, as described in the accompanying text. Inevitably, some of the assumptions used to develop the forecasts will not be realized and unanticipated events and circumstances could occur. Therefore, the actual results will vary from those forecast, and the variations could be material.

SUMMARY OF BASE CASE AND STRESS TEST FINANCIAL PROJECTIONS

Metropolitan Washington Airports Authority

For Fiscal Years ending December 31

(dollars and passengers in thousands)

This exhibit is based on information from the sources indicated and assumptions provided by, or reviewed with and approved by, Airports Authority management, as described in the accompanying text. Inevitably, some of the assumptions used to develop the forecasts will not be realized and unanticipated events and circumstances could occur. Therefore, the actual results will vary from those forecast, and the variations could be material.

APPENDIX B
DEFINITIONS
AND
SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE

	<u>Page</u>
DEFINITIONS	B-1
SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE	B-19

(THIS PAGE IS INTENTIONALLY LEFT BLANK)

DEFINITIONS

The following are definitions of certain terms used in the Official Statement (except as otherwise set forth therein) and a summary of certain provisions of the Indenture.

“Account” shall mean any account or subaccount created in any Fund created under the Master Indenture or under a Supplemental Indenture.

“Accreted Value” shall mean (a) with respect to any Capital Appreciation Bonds, as of any date of calculation, the sum of the amount set forth in a Supplemental Indenture as the amount representing the initial principal amount of such Capital Appreciation Bonds plus the interest accumulated, compounded and unpaid thereon as of the most recent compounding date, or (b) with respect to Original Issue Discount Bonds, as of the date of calculation, the amount representing the initial public offering price of such Original Issue Discount Bonds plus the amount of the discounted principal which has accreted since the date of issue; in each case the Accreted Value shall be determined in accordance with the provisions of the Supplemental Indenture authorizing the issuance of such Capital Appreciation Bonds or Original Issue Discount Bonds.

“Acts” shall mean, collectively, Chapter 598 of the Acts of Virginia General Assembly of 1985, as amended, and the District of Columbia Regional Airports Authority Act of 1985 (D.C. Law 6-67), as amended.

“Airport Consultant” shall mean a firm or firms of national recognition experienced in the field of planning the development, operation and management of airports and aviation facilities, selected and employed by the Airports Authority from time to time.

“Airports” shall mean Ronald Reagan Washington National Airport, located in Arlington County, Virginia, Washington Dulles International Airport, located in Fairfax County and Loudoun County, Virginia, and any other airport over which the Airports Authority assumes ownership or operating responsibility and that the Airports Authority designates as a part of the Airports under the Master Indenture; provided, however, that the requirements set forth in the Master Indenture for the issuance of additional Bonds shall be satisfied on the date designated by the Airports Authority for inclusion of such designated airport, assuming the issuance of additional Bonds in an amount equal to the aggregate principal of any indebtedness then outstanding, issued or incurred or otherwise payable from the revenues of such airport if such indebtedness is intended to be secured on a parity basis with the Bonds by the pledge of Net Revenues under the Master Indenture (including revenues of such designated airport).

“Airports Authority” shall mean the Metropolitan Washington Airports Authority, a public body politic and corporate created by the Commonwealth of Virginia and the District of Columbia with the consent of the Congress of the United States of America.

“Annual Debt Service” shall mean the amount of payments required to be made for principal of and interest on all Bonds, including mandatory sinking fund redemptions and

Regularly Scheduled Hedge Payments to be made by the Airports Authority, and Airports Authority payments pursuant to Reimbursement Agreements with Credit Providers to reimburse such Credit Providers for debt service payments made, and to pay credit enhancement or liquidity support fees, in each case to the extent secured by the Indenture, scheduled to come due within a specified Fiscal Year, computed as follows:

(a) In determining the amount of principal to be funded in each year, payment shall (unless a different subsection of this definition applies for purposes of determining principal maturities or amortization) be assumed to be made on Outstanding Bonds (other than Short-Term/Demand Obligations) in accordance with any amortization schedule established by the governing documents setting forth the terms of such Bonds, including, as a principal payment, the Accreted Value of any Capital Appreciation Bonds or Original Issue Discount Bonds maturing or scheduled for redemption in such year; and in determining the amount of interest to be funded in each year, interest payable at a fixed rate shall (except to the extent any other subsection of this definition applies) be assumed to be made at such fixed rate and on the required funding dates.

(b) Except for any historical period for which the actual rate or rates are determinable and except as otherwise provided in the Master Indenture, Bonds that bear interest at a variable rate shall be deemed to bear interest at a fixed annual rate equal to (i) the average of the daily rates of such indebtedness during the 365 consecutive days (or any lesser period such indebtedness has been Outstanding) next preceding the date of computation; or (ii) with respect to any Bonds bearing interest at a variable rate which are being issued on the date of computation, the initial rate of such indebtedness upon such issuance.

(c) Any Bonds that bear interest at a variable rate and with respect to which there exists a Hedge Facility that obligates the Airports Authority to pay a fixed interest rate or a different variable interest rate shall (for the period during which such Hedge Facility is reasonably expected to remain in effect) be deemed to bear interest at the effective fixed annual rate or different variable rate thereon as a result of such Hedge Facility. In the case of any Bonds that bear interest at a fixed rate and with respect to which there exists a Hedge Facility that obligates the Airports Authority to pay a floating rate, Annual Debt Service shall (for the period during which such Hedge Facility is reasonably expected to remain in effect) be deemed to include the interest payable on such Bonds, less the fixed amounts received by the Airports Authority under the Hedge Facility, plus the amount of the floating payments (using the convention described in (b) above) to be made by the Airports Authority under the Hedge Facility.

(d) If all or any portion of an Outstanding Series of Bonds constitute Balloon Maturities, unissued Program Bonds or Short-Term/Demand Obligations, then, for purposes of determining Annual Debt Service, each maturity that constitutes a Balloon Maturity, unissued Program Bonds or Short-Term/Demand Obligations shall, unless otherwise provided in the Supplemental Indenture pursuant to which such Bonds are authorized or unless provision (e) of this definition then applies to such maturity, be treated as if it were to be amortized over a term of not more than 30 years and with substantially level annual debt service funding payments commencing not later than the year following the year in which such Balloon Maturity, unissued

Program Bonds or Short-Term/Demand Obligations were issued, and extending not later than 30 years from the date such Balloon Maturity, unissued Program Bonds or Short-Term/Demand Obligations were originally issued; the interest rate used for such computation shall be that rate quoted in The Bond Buyer 25 Revenue Bond Index for the last week of the month preceding the date of calculation as published by *The Bond Buyer*, or if that index is no longer published, another similar index designated by an Authority Representative, taking into consideration whether such Bonds bear interest which is or is not excluded from gross income for federal income tax purposes; with respect to any Series of Bonds only a portion of which constitutes Balloon Maturities, unissued Program Bonds or Short-Term/Demand Obligations, the remaining portion shall be treated as described in (a) above or such other provision of this definition as shall be applicable, and with respect to that portion of a Series that constitutes Balloon Maturities, all funding requirements of principal and interest becoming due in any year other than the stated maturity of the balloon indebtedness shall be treated as described in (a) above or such other provision of this definition as shall be applicable.

(e) Any maturity of Bonds that constitutes a Balloon Maturity as described in provision (d) of this definition and for which the stated maturity date occurs within 12 months from the date such calculation of Annual Debt Service is made, shall be assumed to become due and payable on the stated maturity date, and provision (d) above shall not apply thereto, unless there is delivered to the entity making the calculation of Annual Debt Service a certificate of an Authority Representative stating (i) that the Airports Authority intends to refinance such maturity, (ii) the probable terms of such refinancing and (iii) that the debt capacity of the Airports Authority is sufficient to successfully complete such refinancing; upon the receipt of such certificate, such Balloon Maturity shall be assumed to be refinanced in accordance with the probable terms set out in such certificate and such terms shall be used for purposes of calculating Annual Debt Service; provided that such assumption shall not result in an interest rate lower than that which would be assumed under provision (d) above and shall be amortized over a term of not more than 30 years from the expected date of refinancing.

(f) In any computation relating to the issuance of additional Bonds or the rate covenant required by the Master Indenture, there shall be excluded from the computation of Annual Debt Service principal of and interest on indebtedness for which funds are, or are reasonably expected to be, available for and which are irrevocably committed to make such payments, including without limitation any such funds in an escrow account or any such funds constituting capitalized interest held in any fund or account created by the Indenture.

“Authenticating Agent” shall mean the Trustee.

“Authority Facilities” shall have the same definition as such term has from time to time in the Acts.

“Authority Representative” shall mean the Chairman or the Vice Chairman of the Board of Directors, any Co-Chair of the Finance Committee of the Board of Directors, the President and Chief Executive Officer, the Executive Vice President and Chief Operating Officer, the Vice President and General Counsel, the Vice President for Finance and Chief Financial Officer, or the Manager of Treasury of the Airports Authority, or other representative of the Airports

Authority designated as authorized to give directions to the Trustee under the Fiftieth Supplemental Indenture.

“Balloon Maturities” shall mean, with respect to any Series of Bonds 50% or more of the principal of which matures on the same date or within a Fiscal Year, that portion of such Series, which matures on such date or within such Fiscal Year. For purposes of this definition, the principal amount maturing on any date shall be reduced by the amount of such Bonds scheduled to be amortized by prepayment or redemption prior to their stated maturity date. Commercial paper, bond anticipation notes or other Short-Term/Demand Obligations shall not be Balloon Maturities.

“Bond” or “Bonds” shall mean, for purposes of this summary, any bonds or any other evidences of indebtedness for borrowed money issued from time to time pursuant to the Master Indenture and the Supplemental Indentures. The term “Bond” or “Bonds” shall include notes, bond anticipation notes, commercial paper and other Short-Term/Demand Obligations, Regularly Scheduled Hedge Payments, and other securities, contracts or obligations incurred through lease, installment purchase or other agreements or certificates of participation therein, in each case to the extent secured by the Indenture; provided that Hedge Termination Payments to be made by the Airports Authority shall not be secured by the Indenture on a parity with the Bonds. The terms “Bond” and “Bonds” shall not include Subordinated Bonds or Junior Lien Obligations.

“Bond Authorizing Resolution” shall mean the resolution adopted by the Airports Authority on May 16, 2018, authorizing the issuance of the Series 2018A Bonds under the Indenture, authorizing the execution and delivery on behalf of the Airports Authority of the Fiftieth Supplemental Indenture and other related agreements and approving, or duly delegating the authority to approve on behalf of the Airports Authority, the terms and details of the Series 2018A Bonds.

“Bond Counsel” shall mean an attorney or firm or firms of attorneys of national recognition, selected or employed by the Airports Authority and acceptable to the Trustee, experienced in the field of municipal bonds whose opinions are generally accepted by purchasers of municipal bonds.

“Bond Fund” shall mean the Metropolitan Washington Airports Authority Bond Fund created pursuant to the Master Indenture.

“Bond Payment Date” shall mean each April 1 and October 1, commencing October 1, 2018, and each redemption date.

“Book-Entry System” shall mean the system maintained by the Securities Depository as described in the Fiftieth Supplemental Indenture.

“Business Day” shall mean any day of the week other than Saturday, Sunday or a day which shall be, in the Commonwealth of Virginia, the State of New York or in the jurisdiction in which the Corporate Trust Office of the Trustee or the principal office of the Series 2018A

Registrar is located, a legal holiday or a day on which banking corporations are authorized or obligated by law or executive order to close.

“Capital Appreciation Bonds” shall mean Bonds all or a portion of the interest on which is compounded and accumulated at the rates and on the dates set forth in a Supplemental Indenture and is payable only upon redemption or on the maturity date of such Bonds. Bonds which are issued as Capital Appreciation Bonds, but later convert to Bonds on which interest is paid periodically shall be Capital Appreciation Bonds until the conversion date and from and after such conversion date shall no longer be Capital Appreciation Bonds, but shall be treated as having a principal amount equal to their Accreted Value on the conversion date.

“Code” shall mean the Internal Revenue Code of 1986, as amended, including applicable Treasury Regulations, rulings and procedures promulgated thereunder or under the Internal Revenue Code of 1954, as amended.

“Common Debt Service Reserve Requirement” shall mean an amount to be on deposit in the Common Reserve Account equal to the lesser of (i) 10% of the original par amount of the Series 2018A Bonds and any other Common Reserve Bonds; (ii) the Maximum Annual Debt Service on the Series 2018A Bonds and any other Common Reserve Bonds in any Fiscal Year; or (iii) 125% of the average Annual Debt Service for the Series 2018A Bonds and any other Common Reserve Bonds; provided that such amount may be recalculated at any time and that such amount shall be recalculated (a) upon the designation by the Airports Authority of any Common Reserve Bonds and (b) in connection with the redemption or purchase and cancellation of any Series 2018A Bonds or Common Reserve Bonds.

“Common Reserve Account” shall mean the account established for the Series 2018A Bonds and any other Common Reserve Bonds in the Debt Service Reserve Fund, as set forth in the Fiftieth Supplemental Indenture.

“Common Reserve Bonds” shall mean the Bonds of any other Series issued under the Master Indenture and designated in writing to the Trustee by an Authority Representative as being secured on a parity with the Series 2018A Bonds by amounts on deposit in the Common Reserve Account. As of the date of the issuance of the Series 2018A Bonds, the term Common Reserve Bonds shall include the (i) Airport System Revenue Bonds, Series 2008A, (ii) Airport System Revenue Bonds, Series 2009B, (iii) Airport System Revenue Bonds, Series 2010A, (iv) Airport System Revenue Refunding Bonds, Series 2010B, (v) Airport System Revenue Refunding Bonds, Series 2010F-1, (vi) Airport System Revenue Refunding Bonds, Series 2011C, (vii) Airport System Revenue Refunding Bonds, Series 2011D, (viii) Airport System Revenue Refunding Bonds, Series 2012A, (ix) Airport System Revenue Refunding Bonds, Series 2012B, (x) Airport System Revenue and Refunding Bonds, Series 2013A, (xi) Taxable Airport System Revenue Refunding Bonds, Series 2013B, (xii) Airport System Revenue Refunding Bonds, Series 2013C, (xiii) Airport System Revenue and Refunding Bonds, Series 2014A, (xiv) Airport System Revenue Refunding Bonds, Series 2016A, (xv) Airport System Revenue Refunding Bonds, Series 2016B, (xvi) Airport System Revenue and Refunding Bonds, Series 2017A Bonds, (xvii) Series 2018A Bonds and (xviii) any future Series of Bonds designated by the Airports Authority as “Common Reserve Bonds”.

“Construction Fund” shall mean the Metropolitan Washington Airports Authority Construction Fund created pursuant to the Master Indenture.

“Corporate Trust Office” shall mean the office of the Trustee at which its principal corporate trust business is conducted, which at the date hereof is located in Baltimore, Maryland.

“Cost” when used with respect to Authority Facilities, shall have the same definition as such term has in the Acts.

“Credit Facility” or **“Credit Facilities”** shall mean, with respect to a Series of Bonds, the letter of credit, line of credit, municipal bond insurance, surety policy, or other form of credit enhancement and/or liquidity support, if any, for such Series of Bonds, provided for in the applicable Supplemental Indenture, including any alternate Credit Facility with respect to such Series of Bonds delivered in accordance with provisions of the Supplemental Indenture providing for the issuance of such Series of Bonds.

“Credit Provider” shall mean, with respect to a Series of Bonds, the provider of a Credit Facility, including municipal bond insurance, letter of credit, or liquidity support, if any, for such Series of Bonds specified in the applicable Supplemental Indenture.

“Debt Service Reserve Fund” shall mean the Metropolitan Washington Airports Authority Debt Service Reserve Fund created pursuant to the Master Indenture.

“DTC” shall mean The Depository Trust Company, New York, New York.

“Emergency Repair and Rehabilitation Fund” shall mean the Metropolitan Washington Airports Authority Emergency Repair and Rehabilitation Fund created pursuant to the Master Indenture.

“Event of Default” shall mean any one or more of the events set forth in the Master Indenture.

“Exempt Facilities” shall mean airports and functionally related and subordinate facilities within the meaning of and qualifying under Section 142 of the Code.

“Federal Lease” shall mean the Agreement and Deed of Lease, dated March 2, 1987, between the United States of America, acting through the Secretary of Transportation, and the Airports Authority, as the same may be amended or supplemented.

“Federal Lease Fund” shall mean the Metropolitan Washington Airports Authority Federal Lease Fund created pursuant to the Master Indenture.

“Fiscal Year” shall mean the fiscal year of the Airports Authority ending as of December 31 of each year or such other date as may be designated from time to time in writing by the Airports Authority to the Trustee.

“Fitch” shall mean Fitch Ratings, Inc. and its successors, if any, and if such corporation shall no longer perform the functions of a securities rating agency, “Fitch” shall mean any other nationally recognized Rating Agency designated by an Authority Representative.

“Fiftieth Supplemental Indenture” shall mean the Fiftieth Supplemental Indenture of Trust dated as of July 1, 2018, between the Airports Authority and the Trustee relating to the Series 2018A Bonds, which supplements the Master Indenture.

“Fund” shall mean any fund created under the Master Indenture or under a Supplemental Indenture.

“General Purpose Fund” shall mean the Metropolitan Washington Airports Authority General Purpose Fund created pursuant to the Master Indenture.

“Government Certificates” shall mean (in the case of governmental obligations) evidences of ownership of proportionate interest in future interest or principal payments of Government Obligations, including depository receipts thereof. Investments in such proportionate interest must be limited to circumstances wherein (a) a bank or trust company acts as custodian and holds the underlying Government Obligations; (b) the owner of the investment is the real party in interest and has the right to proceed directly and individually against the obligor of the underlying Government Obligations; and (c) the underlying Government Obligations are held in a special account, segregated from the custodian’s general assets, and are not available to satisfy any claim of the custodian, any person claiming through the custodian, or any person to whom the custodian may be obligated. “Government Certificates” shall also mean any other type of security or obligation that the Rating Agencies then maintaining ratings on any Bonds to be defeased have determined are permitted defeasance securities and qualify the Bonds to be defeased thereby for a rating in the highest category, or are otherwise acceptable to, each of the Rating Agencies.

“Government Obligations” shall mean direct and general obligations of, or obligations the timely payment of principal and interest on which are unconditionally guaranteed by, the United States of America.

“Hedge Facility” shall mean any rate swap transaction, basis swap transaction, cap transaction, floor transaction, collar transaction, or similar transaction, which is intended to convert or limit the interest rate payable with respect to any Bonds, and which (a) is designated in writing to the Trustee by an Authority Representative as a Hedge Facility to relate to all or part of one or more Series of Bonds; (b) is with a Qualified Hedge Provider or an entity that has been a Qualified Hedge Provider within the 60 day period preceding the date on which the calculation of Annual Debt Service or Maximum Annual Debt Service is being made; and (c) has a term not greater than the term of the designated Bonds or a specified date for mandatory tender or redemption of such designated Bonds.

“Hedge Termination Payment” shall mean an amount payable by the Airports Authority or a Qualified Hedge Provider, in accordance with a Hedge Facility, to compensate the other party to the Hedge Facility for any losses and costs that such other party may incur as a

result of an event of default or the early termination of the obligations, in whole or in part, of the parties under such Hedge Facility.

“Holder” or “Bondholder” shall mean the registered owner of any Bond; provided that with respect to any Series of Bonds which is insured by a bond insurance policy, the term “Holder” or “Bondholder” for purposes of all consents, directions, and notices provided for in the Indenture and any applicable Supplemental Indenture, shall mean the issuer of such bond insurance policy as long as such policy issuer has not defaulted under its policy; provided further that unless it is actually the beneficial owner of the Bonds in respect of which consent is requested, the policy issuer shall not have the power to act on behalf of the registered owners of any Bonds to consent to changes that (a) extend the stated maturity of or time for paying the interest on such Bonds, (b) reduce the principal amount of, purchase price for, or redemption premium or rate of interest payable on such Bonds, or (c) result in a privilege or priority of any Bond over any other Bond. A Qualified Hedge Provider shall only be considered a Bondholder to the extent specified in a Supplemental Indenture.

“Indenture” shall mean the Master Indenture as amended, supplemented, and restated from time to time in accordance with its terms.

“Interest Account” shall mean the Account of that name in the Bond Fund created pursuant to the Master Indenture.

“Junior Lien Indenture” shall mean the indenture or other documents of the Airports Authority providing for the issuance of and securing Junior Lien Obligations.

“Junior Lien Obligations” shall mean the Airports Authority’s bonds, or other indebtedness or obligations subordinate to the Bonds and the Subordinated Bonds, but such term shall not include the Federal Lease or Special Facility Bonds. The term “Junior Lien Obligations” shall include notes, bond anticipation notes, commercial paper and other Short-Term/Demand Obligations, Regularly Scheduled Hedge Payments, Hedge Termination Payments, and other securities, contracts or obligations incurred through lease, installment purchase or other agreements or certificates of participation therein, in each case to the extent secured by a Junior Lien Indenture.

“Junior Lien Obligations Fund” shall mean the Metropolitan Washington Airports Authority Junior Lien Obligations Fund created pursuant to the Master Indenture for the purpose of providing all deposits and payments required by any Junior Lien Indenture, including reserves for debt service on Junior Lien Obligations.

“Master Indenture” shall mean the Master Indenture of Trust dated as of February 1, 1990, as amended and restated by the Amended and Restated Master Indenture of Trust dated as of September 1, 2001, as amended, between the Airports Authority and the Trustee.

“Maximum Annual Debt Service” shall mean the maximum Annual Debt Service with respect to any specified indebtedness for any Fiscal Year during the term of such indebtedness.

“Moody’s” shall mean Moody’s Investors Service, Inc., a corporation existing under the laws of the State of Delaware, its successors and assigns, and, if such corporation shall no longer perform the functions of a securities rating agency, “Moody’s” shall mean any other nationally recognized rating agency designated by an Authority Representative.

“Net Revenues” shall mean Revenues, plus transfers, if any, from the General Purpose Fund to the Revenue Fund, after provision is made for the payment of Operation and Maintenance Expenses.

“Operation and Maintenance Expenses” shall mean for any period, all expenses of the Airports Authority paid or accrued for the operation, maintenance, administration, and ordinary current repairs of the Airports. Operation and Maintenance Expenses shall not include: (a) the principal of, premium, if any, or interest payable on any Bonds, Subordinated Bonds and Junior Lien Obligations; (b) any allowance for amortization or depreciation of the Airports; (c) any other expense for which (or to the extent to which) the Airports Authority is or will be paid or reimbursed from or through any source that is not included or includable as Revenues; (d) any extraordinary items arising from the early extinguishment of debt; (e) rentals payable under the Federal Lease; and (f) any expense paid with amounts from the Emergency Repair and Rehabilitation Fund.

“Operation and Maintenance Fund” shall mean the Metropolitan Washington Airports Authority Operation and Maintenance Fund created pursuant to the Master Indenture.

“Opinion of Bond Counsel” shall mean a written opinion of Bond Counsel.

“Original Issue Discount Bonds” shall mean Bonds which are sold at an initial public offering price of less than face value and which are specifically designated as Original Issue Discount Bonds by the Supplemental Indenture under which such Bonds are issued.

“Outstanding” when used with reference to a Series of Bonds, shall mean, as of any date of determination, all Bonds of such Series theretofore authenticated and delivered except: (a) Bonds of such Series theretofore cancelled by the Trustee or delivered to the Trustee for cancellation; (b) Bonds of such Series which are deemed paid and no longer Outstanding as provided in the Master Indenture; (c) Bonds of such Series in lieu of which other Bonds of such Series have been issued pursuant to the provisions of the Master Indenture relating to Bonds destroyed, stolen or lost, unless evidence satisfactory to the Trustee has been received that any such Bond is held by a bona fide purchaser; (d) after any tender date as may be provided for in the applicable Supplemental Indenture, any Bond of such Series held by a Bondholder who has given a tender notice or was required to tender such Bond in accordance with the provisions of the applicable Supplemental Indenture and which was not so tendered and for which sufficient funds for the payment of the purchase price of which have been deposited with the Trustee or the Paying Agent, if any, or any tender agent appointed under such Supplemental Indenture; and (e) for purposes of any consent or other action to be taken under the Indenture by the Holders of a specified percentage of principal amount of Bonds of a Series or all Series, Bonds held by or for the account of the Airports Authority.

“Participant” shall mean one of the entities which deposit securities, directly or indirectly, in the Book-Entry System of the Securities Depository.

“Payment of a Series of Bonds” shall mean payment in full of all principal of, premium, if any, and interest on a Series of Bonds.

“Permitted Investments” shall mean and include any of the following, if and to the extent the same are at the time legal for the investment of the Airports Authority’s money:

- (a) Government Obligations and Government Certificates.
- (b) Obligations issued or guaranteed by any of the following:
 - (i) Federal Home Loan Bank System;
 - (ii) Export-Import Bank of the United States;
 - (iii) Federal Financing Bank;
 - (iv) Government National Mortgage Association;
 - (v) Farmers Home Administration;
 - (vi) Federal Home Loan Mortgage Corporation;
 - (vii) Federal Housing Administration;
 - (viii) Private Export Funding Corp;
 - (ix) Federal National Mortgage Association; and
 - (x) Federal Farm Credit Bank;

or any indebtedness issued or guaranteed by any instrumentality or agency of the United States of America.

(c) Pre-refunded municipal obligations rated at the time of purchase in the highest rating category by, or otherwise acceptable to, the Rating Agencies and meeting the following conditions:

(i) such obligations are (A) not to be redeemed prior to maturity or the Trustee has been given irrevocable instructions concerning their calling and redemption and (B) the issuer of such obligations has covenanted not to redeem such obligations other than as set forth in such instructions;

(ii) such obligations are secured by Government Obligations or Government Certificates that may be applied only to interest, principal, and premium payments of such obligations;

(iii) the principal of and interest on such Government Obligations or Government Certificates (plus any cash in the escrow fund with respect to such pre-refunded obligations) are sufficient to meet the liabilities of the obligations;

(iv) the Government Obligations or Government Certificates serving as security for the obligations are held by an escrow agent or trustee; and

(v) such Government Obligations or Government Certificates are not available to satisfy any other claims, including those against the trustee or escrow agent.

(d) Direct and general long-term obligations of any state of the United States of America or the District of Columbia (a “State”), to the payment of which the full faith and credit of such State is pledged and that at the time of purchase are rated in either of the two highest rating categories by, or are otherwise acceptable to, the Rating Agencies.

(e) Direct and general short-term obligations of any State, to the payment of which the full faith and credit of such State is pledged and that at the time of purchase are rated in the highest rating category by, or are otherwise acceptable to, the Rating Agencies.

(f) Interest-bearing demand or time deposits with, or interests in money market portfolios rated AAA-m by Standard & Poor’s issued by, state banks or trust companies or national banking associations that are members of the Federal Deposit Insurance Corporation (“FDIC”). Such deposits or interests must be (i) continuously and fully insured by FDIC, (ii) if they have a maturity of one year or less, with or issued by banks that at the time of purchase are rated in one of the two highest short term rating categories by, or are otherwise acceptable to, the Rating Agencies, (iii) if they have a maturity longer than one year, with or issued by banks that at the time of purchase are rated in one of the two highest rating categories by, or are otherwise acceptable to, the Rating Agencies, or (iv) fully secured by Government Obligations and Government Certificates. Such Government Obligations and Government Certificates must have a market value at all times at least equal to the principal amount of the deposits or interests. The Government Obligations and Government Certificates must be held by a third party (who shall not be the provider of the collateral), or by any Federal Reserve Bank or depository, as custodian for the institution issuing the deposits or interests. Such third party should have a perfected first lien in the Government Obligations and Government Certificates serving as collateral, and such collateral is to be free from all other third party liens.

(g) Eurodollar time deposits issued by a bank with a deposit rating at the time of purchase in one of the top two short-term deposit rating categories by, or otherwise acceptable to, the Rating Agencies.

(h) Long-term or medium-term corporate debt guaranteed by any corporation that is rated in one of the two highest rating categories by, or is otherwise acceptable to, the Rating Agencies.

(i) Repurchase agreements, (i) the maturities of which are 30 days or less or (ii) the maturities of which are longer than 30 days and not longer than one year provided the collateral subject to such agreements are marked to market daily, entered into with financial institutions such as banks or trust companies organized under State law or national banking associations, insurance companies, or government bond dealers reporting to, trading with, and recognized as a primary dealer by, the Federal Reserve Bank of New York and a member of the Security Investors Protection Corporation, or with a dealer or parent holding company that is rated at the time of purchase investment grade by, or otherwise acceptable to, the Rating Agencies. The repurchase

agreement should be in respect of Government Obligations and Government Certificates or obligations described in paragraph (b) of this definition. The repurchase agreement securities and, to the extent necessary, Government Obligations and Government Certificates or obligations described in paragraph (b), exclusive of accrued interest, shall be maintained in an amount at least equal to the amount invested in the repurchase agreements. In addition, the provisions of the repurchase agreement shall meet the following additional criteria:

(A) the third party (who shall not be the provider of the collateral) has possession of the repurchase agreement securities and the Government Obligations and Government Certificates;

(B) failure to maintain the requisite collateral levels will require the third party having possession of the securities to liquidate the securities immediately; and

(C) the third party having possession of the securities has a perfected, first priority security interest in the securities.

(j) Prime commercial paper of a corporation, finance company or banking institution at the time of purchase rated in the highest short-term rating category by, or otherwise acceptable to, the Rating Agencies.

(k) Public housing bonds issued by public agencies. Such bonds must be: fully secured by a pledge of annual contributions under a contract with the United States of America; temporary notes, preliminary loan notes or project notes secured by a requisition or payment agreement with the United States of America; or state or public agency or municipality obligations at the time of purchase rated in the highest credit rating category by, or otherwise acceptable to, the Rating Agencies.

(l) Shares of a diversified open-end management investment company, as defined in the Investment Company Act of 1940, or shares in a regulated investment company, as defined in Section 851(a) of the Code, that is a money market fund that at the time of purchase has been rated in the highest rating category by, or is otherwise acceptable to, the Rating Agencies.

(m) Money market accounts of any state or federal bank, or bank whose holding parent company is rated at the time of purchase in one of the top two short-term or long-term rating categories by, or is otherwise acceptable to, the Rating Agencies.

(n) Investment agreements, the issuer of which is at the time of purchase rated in one of the two highest rating categories by, or is otherwise acceptable to, the Rating Agencies.

(o) Any debt or fixed income security, the issuer of which is rated at the time of purchase in the highest rating category by, or is otherwise acceptable to, the Rating Agencies.

(p) Investment agreements or guaranteed investment contracts that are fully secured by obligations described in items (a) or (b) of the definition of Permitted Investments which are (i) valued not less frequently than monthly and have a fair market value, exclusive of

accrued interest, at all times at least equal to 103% of the principal amount of the investment, together with the interest accrued and unpaid thereon, (ii) held by the Trustee (who shall not be the provider of the collateral) or by any Federal Reserve Bank or a depository acceptable to the Trustee, (iii) subject to a perfected first lien on behalf of the Trustee, and (iv) free and clear from all third-party liens.

(q) Any other type of investment consistent with Airports Authority policy in which an Authority Representative directs the Trustee to invest and there is delivered to the Trustee a certificate of an Authority Representative stating that each of the Rating Agencies has been informed of the proposal to invest in such investment and each Rating Agency has confirmed that such investment will not adversely affect the rating then assigned by such Rating Agency to any of the Bonds.

“Principal Account” shall mean the Account of that name in the Bond Fund created pursuant to the Master Indenture.

“Program” shall mean a financing program identified in a Supplemental Indenture, including but not limited to a bond anticipation note or commercial paper program, (a) which is authorized and the terms thereof approved by a resolution adopted by the Airports Authority and the items required under the Master Indenture have been filed with the Trustee, (b) wherein the Airports Authority has authorized the issuance, from time to time, of notes, commercial paper or other indebtedness in an authorized amount, and (c) the authorized amount of which has met the additional bonds test set forth in the Master Indenture and the Outstanding amount of which may vary from time to time, but not exceed the authorized amount.

“Qualified Costs of Facilities” shall mean the Costs of Exempt Facilities which (a) will be charged to the Airports’ capital account for federal income tax purposes, or which would be so chargeable either with a proper election under the Code or but for a proper election to deduct such amount, and (b) were incurred and paid, or are to be incurred and paid, after the date on which the Airports Authority adopted a resolution or took some other official action toward the issuance of obligations to finance such Costs.

“Qualified Hedge Provider” shall mean a financial institution whose senior long-term debt obligations, or whose obligations under any Hedge Facility are (a) guaranteed by a financial institution, or subsidiary of a financial institution, whose senior long-term debt obligations, are rated at least “A1,” in the case of Moody’s and “A+,” in the case of S&P, or the equivalent thereto in the case of any successor thereto, or (b) fully secured by obligations described in items (a) or (b) of the definition of Permitted Investments which are (i) valued not less frequently than monthly and have a fair market value, exclusive of accrued interest, at all times at least equal to 105% (or such lower percentage as shall be acceptable to the Rating Agencies) of the “notional amount” as defined in the Hedge Facility, together with the interest accrued and unpaid thereon, (ii) held by the Trustee (who shall not be the provider of the collateral) or by any Federal Reserve Bank or a depository acceptable to the Trustee, (iii) subject to a perfected first lien on behalf of the Trustee, and (iv) free and clear from all third-party liens.

“Rating Agency” or **“Rating Agencies”** shall mean Moody’s or Standard & Poor’s or Fitch or all of them and, if any such credit rating agency is no longer issuing applicable credit ratings, any other nationally recognized successor rating agency designated by the Airports Authority with the approval of the Trustee; provided that any such rating agency shall, at the time in question, be maintaining a rating on such Series of Bonds at the request of the Airports Authority.

“Rebate Amount” shall mean the amount, if any, determined pursuant to Section 148(f) of the Code to be paid to the United States of America with respect to the Series 2018A Bonds, as described in the Fiftieth Supplemental Indenture.

“Record Date” shall mean shall mean the fifteenth (15th) day (regardless of whether a Business Day) of the calendar month immediately preceding a Bond Payment Date.

“Redemption Account” shall mean the Account of that name in the Bond Fund created pursuant to the Master Indenture.

“Register” shall mean, with respect to the Series 2018A Bonds, the registration books of the Airports Authority kept to evidence the registration and registration of transfer of the Series 2018A Bonds.

“Regularly Scheduled Hedge Payments” shall mean the regularly scheduled payments under the terms of a Hedge Facility which are due absent any termination, default or dispute in connection with such Hedge Facility.

“Reimbursement Agreement” shall mean, with respect to a Series of Bonds, any agreement or agreements in each case between a Credit Provider or Credit Providers and the Airports Authority under or pursuant to which a Credit Facility for such Series of Bonds is issued, and any agreement that replaces such original agreement that sets forth the obligations of the Airports Authority to such Credit Provider or Credit Providers and the obligations of such Credit Provider or Credit Providers to the Airports Authority.

“Released Revenues” shall mean Revenues of the Airports Authority in respect of which the Trustee has received the following:

(a) a request of an Authority Representative describing such Revenues and requesting that such Revenues be excluded from the pledge and lien of the Master Indenture on Net Revenues;

(b) either (i) an Airport Consultant’s certificate to the effect that, based upon reasonable assumptions, projected Net Revenues after the Revenues covered by the Authority Representative’s request are excluded, calculated in accordance with the additional Bonds test set forth in the Master Indenture for each of the three full Fiscal Years following the Fiscal Year in which such certificate is delivered, will not be less than the larger of (A) the amounts needed for making the required deposits to the Principal Accounts, the Interest Accounts, and the Redemption Accounts, the Debt Service Reserve Fund, the Subordinated Bond Funds, the

Subordinated Reserve Funds, the Junior Lien Obligations Fund, the Federal Lease Fund, and the Emergency Repair and Rehabilitation Fund or (B) an amount not less than 150% of the average Annual Debt Service for each Fiscal Year during the remaining term of all Bonds that will remain Outstanding after the exclusion of such Revenues (disregarding any Bonds that have been or will be paid or discharged); or

(ii) an Authority Representative's certificate to the effect that Net Revenues in the two most recently completed Fiscal Years, after the Revenues covered by the Authority Representative's request are excluded, were not less than the larger of (A) the amounts needed for making the required deposits to the Principal Accounts, the Interest Accounts, and the Redemption Accounts, the Debt Service Reserve Fund, the Subordinated Bond Funds, the Subordinated Reserve Funds, the Junior Lien Obligations Fund, the Federal Lease Fund, and the Emergency Repair and Rehabilitation Fund or (B) 135% of (1) average Annual Debt Service on all Bonds Outstanding in each such Fiscal Year (disregarding any Bonds that have been paid or discharged), plus (2) average Annual Debt Service with respect to any additional Bonds issued since the completion of such Fiscal Year or proposed to be issued at the time such certificate is delivered;

(c) an Opinion of Bond Counsel to the effect that (i) the conditions set forth in the Master Indenture to the release of such Revenues have been met and (ii) the exclusion of such Revenues from the pledge and lien of the Master Indenture will not, in and of itself, cause the interest on any Outstanding Bonds to be included in gross income for purposes of federal income tax;

(d) written confirmation from each of the Rating Agencies to the effect that the exclusion of such Revenues from the pledge and lien of the Master Indenture will not cause a withdrawal of or reduction in any unenhanced rating then assigned to the Bonds; and

(e) evidence that notice of the proposed Released Revenues was given to all current Credit Providers in respect of any Bonds at least 15 days prior to the proposed effective date of the release of such Revenues.

Upon the Trustee's receipt of such documents, the Revenues described in the Authority Representative's request shall be excluded from the pledge and lien of the Indenture, and the Trustee shall take all reasonable steps requested by the Authority Representative to evidence or confirm the release of such pledge and lien on the Released Revenues.

"Revenue Fund" shall mean the Metropolitan Washington Airports Authority Revenue Fund created pursuant to the Master Indenture.

"Revenues" shall mean all revenues of the Airports Authority received or accrued except (a) interest income on, and any profit realized from, the investment of moneys in any fund or account to the extent that such income or profit is not transferred to, or retained in, the Revenue Fund or the Bond Fund; (b) interest income on, and any profit realized from, the investment of moneys in any fund or account funded from the proceeds of Special Facility Bonds; (c) amounts received by the Airports Authority from, or in connection with, Special Facilities, unless such

funds are treated as Revenues by the Airports Authority; (d) the proceeds of any passenger facility charge or similar charge levied by, or on behalf of, the Airports Authority, unless such funds are treated as Revenues by the Airports Authority; (e) grants-in-aid, donations, and/or bequests; (f) insurance proceeds which are not deemed to be revenues in accordance with generally accepted accounting principles; (g) the proceeds of any condemnation awards; (h) the proceeds of any sale of land, buildings or equipment; and (i) any other amounts which are not deemed to be revenues in accordance with generally accepted accounting principles or which are restricted as to their use. Unless otherwise provided in a Supplemental Indenture, there shall also be excluded from the term “Revenues” (a) any Hedge Termination Payments received by the Airports Authority and (b) any Released Revenues in respect of which the Airports Authority has filed with the Trustee the request of Authority Representative, Airport Consultant’s or Authority Representative’s certificate, Opinion of Bond Counsel and the other documents contemplated in the definition of the term “Released Revenues.”

“**Securities Depository**” shall mean DTC, or its nominees and the successors and assigns of such nominee, or any successor appointed under the Fiftieth Supplemental Indenture.

“**Series 2008A Bonds**” shall mean all of the Airports Authority’s \$159,630,000 Outstanding Airport System Revenue Bonds, Series 2008A that mature on October 1 in the years 2019 through 2029.

“**Series 2008A Refunding Agreement**” shall mean the refunding agreement dated as of July 1, 2018, between the Airports Authority and the Trustee relating to the refunding of the Series 2008A Bonds.

“**Series 2009C Bonds**” shall mean all of the Airports Authority’s \$254,245,000 Outstanding Airport System Revenue Bonds, Series 2009C that mature on October 1 in the years 2020 through 2031, 2034 and 2039.

“**Series 2009C Refunding Agreement**” shall mean the refunding agreement dated as of July 1, 2018, between the Airports Authority and the Trustee relating to the refunding of the Series 2009C Bonds.

“**Series 2018A Bonds**” shall mean the Airport System Revenue and Refunding Bonds, Series 2018A, authorized to be issued pursuant to the Master Indenture and the Fiftieth Supplemental Indenture.

“**Series 2018A Cost of Issuance Subaccount**” shall mean the subaccount established for the Series 2018A Bonds in the Construction Fund, as set forth in the Fiftieth Supplemental Indenture.

“**Series 2018A Custodian**” shall mean Manufacturers and Traders Trust Company or its successor as custodian and bailee for the Trustee holding the Series 2018A Cost of Issuance Subaccount and the Series 2018A Project Account, pursuant to provisions of the Master Indenture.

“Series 2018A Interest Account” shall mean the account established for the Series 2018A Bonds in the Bond Fund, as set forth in the Fiftieth Supplemental Indenture.

“Series 2018A Paying Agent” shall mean, for all purposes of the Indenture with respect to the Series 2018A Bonds, the Trustee or such other paying agent appointed by the Trustee.

“Series 2018A Principal Account” shall mean the account established for the Series 2018A Bonds in the Bond Fund, as set forth in the Fiftieth Supplemental Indenture.

“Series 2018A Project Account” shall mean the account established for the Series 2018A Bonds in the Construction Fund, as set forth in the Fiftieth Supplemental Indenture.

“Series 2018A Projects” shall mean the acquisition, construction or improvement of the Authority Facilities described in the Fiftieth Supplemental Indenture, to be financed with the proceeds of the Series 2018A Bonds, as the same may be amended as provided in the Fiftieth Supplemental Indenture.

“Series 2018A Redemption Account” shall mean the account established for the Series 2018A Bonds in the Bond Fund, as set forth in the Fiftieth Supplemental Indenture.

“Series 2018A Registrar” shall mean, with respect to the Series 2018A Bonds, the keeper of the Register, which shall be the Trustee.

“Series of Bonds” or **“Bonds of a Series”** or **“Series”** shall mean a series of Bonds issued pursuant to the Master Indenture and a Supplemental Indenture.

“Short-Term/Demand Obligations” shall mean each Series of Bonds issued pursuant to the Master Indenture, the payment of principal of which is either (a) payable on demand by or at the option of the Holder at a time sooner than a date on which such principal is deemed to be payable for purposes of computing Annual Debt Service, or (b) scheduled to be payable within one year from the date of issuance and is contemplated to be refinanced for a specified period or term either (i) through the issuance of additional Short-Term/Demand Obligations pursuant to a commercial paper, auction Bond or other similar Program, or (ii) through the issuance of long-term Bonds pursuant to a bond anticipation note or similar Program.

“Special Facility” shall mean any facility, improvement, structure, equipment or assets acquired or constructed on any land or in or on any structure or building at the Airports, the cost of construction and acquisition of which are paid for (a) by the obligor under a Special Facility Agreement, or (b) from the proceeds of Special Facility Bonds, or (c) both.

“Special Facility Agreement” shall mean an agreement entered into by the Airports Authority and one or more other parties, relating to the design, construction, and/or financing of any facility, improvement, structure, equipment, or assets acquired or constructed on any land or in or on any structure or building at the Airports, all or a portion of the payments under which (a) are intended to be excluded from Revenues and (b) may be pledged to the payment of revenue bonds,

notes, or other obligations of the Airports Authority other than Bonds, Subordinated Bonds, or Junior Lien Obligations.

“Special Facility Bonds” shall mean any revenue bonds, notes, or other obligations of the Airports Authority other than Bonds, Subordinated Bonds or Junior Lien Obligations, issued to finance any facility, improvement, structure, equipment or assets acquired or constructed on any land or in or on any structure or building at the Airports, the payment of principal of, premium, if any, and interest on which are payable from and secured by the proceeds thereof and rentals, payments, and other charges payable by the obligor under a Special Facility Agreement.

“Standard & Poor’s” or **“S&P”** shall mean S&P Global Ratings, a corporation organized and existing under the laws of the State of New York, and its successors and assigns and, if such corporation shall no longer perform the functions of a securities rating agency, Standard & Poor’s shall mean any other nationally recognized securities rating agency designated by an Authority Representative.

“Subordinated Bond Funds” shall mean the bond funds created pursuant to the Subordinated Indenture with respect to each series of Subordinated Bonds, held by the Subordinated Indenture Trustee, in which amounts are held to pay debt service on such series of Subordinated Bonds.

“Subordinated Bond” or **“Subordinated Bonds”** shall mean the Airports Authority’s general airport subordinated revenue bonds or other obligations secured by the Subordinated Indenture. The term **“Subordinated Bond”** or **“Subordinated Bonds”** shall include notes, bond anticipation notes, commercial paper and other Short-Term/Demand Obligations, Regularly Scheduled Hedge Payments, Hedge Termination Payments, and other securities, contracts or obligations incurred through lease, installment purchase or other agreements or certificates of participation therein, in each case to the extent secured by the Subordinated Indenture.

“Subordinated Indenture” shall mean the Master Indenture of Trust relating to the Subordinated Bonds, dated as of March 1, 1988, between the Airports Authority and the Subordinated Indenture Trustee, as supplemented and amended.

“Subordinated Indenture Trustee” shall mean The National Bank of Washington, or its successor as trustee, under the Subordinated Indenture.

“Subordinated Reserve Funds” shall mean the debt service reserve funds created pursuant to the Subordinated Indenture with respect to certain series of Subordinated Bonds, held by the trustee under the Subordinated Indenture.

“Supplemental Indenture” shall mean an indenture supplementing or modifying the provisions of the Master Indenture entered into by the Airports Authority and the Trustee in accordance with the Master Indenture.

“Trustee” shall mean Manufacturers and Traders Trust Company, and any successor to its duties under the Master Indenture.

SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE

The following, in addition to certain information provided under the heading “INTRODUCTION” and “THE SERIES 2018A BONDS” in the forepart of this Official Statement, is a summary of certain provisions of the Master Indenture and the Fiftieth Supplemental Indenture. This summary does not purport to be complete or definitive and reference is made to the Master Indenture and the Fiftieth Supplemental Indenture for a complete recital of the terms of such documents. During the offering period for the Series 2018A Bonds, copies of the Master Indenture and the Fiftieth Supplemental Indenture may be obtained from the Airports Authority.

General

The Master Indenture and the Fiftieth Supplemental Indenture constitute an assignment by the Airports Authority to the Trustee, in trust, to secure payment of the Bonds, of the Airports Authority’s interest in Net Revenues and sets forth the conditions of such assignments. The Master Indenture and the Fiftieth Supplemental Indenture also provide for the issuance of the Series 2018A Bonds, define the terms thereof and determine the duties of the Trustee and the rights of the Bondholders.

Security for Bonds, Including Series 2018A Bonds

The Series 2018A Bonds are issued pursuant to and secured by the Master Indenture and the Fiftieth Supplemental Indenture. All Bonds, including the Series 2018A Bonds, issued under the Master Indenture and at any time Outstanding shall be equally and ratably secured with all other Outstanding Bonds with the same right, lien and preference with respect to Net Revenues, without preference, priority or distinction on account of the date or dates or the actual time or times of the issuance or maturity of the Bonds. All Bonds of a particular Series shall in all respects be equally and ratably secured and shall have the same right, lien and preference established for the benefit of such Series of Bonds under the Master Indenture, including, without limitation, rights in any related Series Account in the Construction Fund, the Bond Fund or the Debt Service Reserve Fund. No mortgage, lien or security interest in the Airports or operating property of the Airports Authority has been pledged to secure the Bonds.

No Pledge of Certain Revenues

In addition to certain other revenues of the Airports Authority not pledged under the Master Indenture, revenues of the Dulles Corridor Enterprise Fund established by Resolution No. 07-16 of the Airports Authority are not pledged to the payment of the Airports Authority’s obligations under the Master Indenture or the Fiftieth Supplemental Indenture.

Revenues and Funds

Creation of Funds and Accounts. Pursuant to the Master Indenture and the Fiftieth Supplemental Indenture, the following Funds, Accounts, and Subaccounts are established:

(a) With respect to the Series 2018A Bonds, there are established the following accounts and subaccounts:

(i) Within the Bond Fund, to be held by the Trustee:

- (1) Series 2018A Interest Account;
- (2) Series 2018A Principal Account; and
- (3) Series 2018A Redemption Account.

(ii) Within the Construction Fund, to be held by the Series 2018A Custodian;

- (1) Series 2018A Cost of Issuance Subaccount; and
- (2) Series 2018A Project Account.

(iii) Within the Debt Service Reserve Fund, to be held by the Trustee:

- (1) Common Reserve Account.

(b) Revenue Fund, to be held by the Airports Authority.

(c) Operation and Maintenance Fund, to be held by the Airports Authority.

(d) Junior Lien Obligation Fund, to be held by the Airports Authority.

(e) Emergency Repair and Rehabilitation Fund, to be held by the Airports Authority.

(f) Federal Lease Fund, to be held by the Airports Authority.

(g) General Purpose Fund, to be held by the Airports Authority.

Amounts in the Revenue Fund are not pledged to secure Holders of the Bonds. Amounts in the Operation and Maintenance Fund are required to be used by the Airports Authority to pay Operation and Maintenance Expenses and are not pledged to secure Holders of the Bonds. Amounts in the Emergency Repair and Rehabilitation Fund may be used by the Airports Authority to pay the costs of emergency repairs and replacements to the Airports and are not pledged to secure Holders of the Bonds. Amounts in the General Purpose Fund will be available for use by the Airports Authority for any lawful purpose and are not pledged to secure Holders of the Bonds.

Application of Series 2018A Bond Proceeds. There will be deposited, paid or transferred to (a) the Trustee, amounts, as set forth in the Series 2008A Refunding Agreement, to refund the Series 2008A Bonds, (b) the Trustee, amounts, as set forth in the Series 2009C Refunding Agreement, to refund the Series 2009C Bonds, (c) the Series 2018A Custodian, to be deposited in the Series 2018A Cost of Issuance Subaccount, amounts to pay costs associated with the issuance of

the Series 2018A Bonds and (d) the Series 2018A Custodian, to be deposited in the Series 2018A Project Account, the balance of the proceeds of the Series 2018A Bonds to pay capitalized interest on the Series 2018A Bonds and certain Outstanding Bonds and the Costs of the Series 2018A Projects.

Flow of Funds

The Indenture provides that on the first Business Day of each month (a) amounts in the Revenue Fund, excluding any transfers from the General Purpose Fund during the current Fiscal Year, and (b) 1/12 of the amount of any transfers from the General Purpose Fund for the current Fiscal Year, shall be withdrawn from the Revenue Fund and deposited or transferred as set forth under the heading, “SECURITY AND SOURCE OF PAYMENT FOR THE BONDS--Flow of Funds” in the forepart of this Official Statement.

Required Deposits

Moneys are required to be deposited with respect to the Series 2018A Bonds as described below. The Supplemental Indenture setting forth the terms of any additional Series of Bonds may require deposits to the applicable debt service and debt service reserve accounts and subaccounts with respect to such Series of Bonds, and, if such Series of Bonds is subject to mandatory purchase at the option of the Bondholder, will require deposits to a purchase fund for such Series of Bonds.

Required Deposits for Series 2018A Bonds

Debt Service Deposits for Series 2018A Bonds. So long as any Series 2018A Bonds are Outstanding, the Fiftieth Supplemental Indenture requires that payments be made to the Trustee for the purposes of debt service payments on Series 2018A Bonds in the following manner:

Interest Account. On August 1, 2018 and on September 3, 2018, after taking into account any transfers from the interest accounts of the Refunded Bonds, an amount equal to one-half (1/2) of the interest payment due on October 1, 2018, and thereafter beginning on October 1, 2018, and on the first (1st) Business Day of each month thereafter, an amount equal to one-sixth (1/6) of the next interest payment due after such date with respect to the Series 2018A Bonds shall be deposited to the Series 2018A Interest Account, provided the Airports Authority shall be entitled to a credit immediately before each Bond Payment Date for interest earned on the monthly deposits made by the Airports Authority.

Principal Account. On October 1, 2018 and on the first (1st) Business Day of each month thereafter, an amount equal to one-twelfth (1/12) of the next principal payment due after such date with respect to the Series 2018A Bonds shall be deposited to the Series 2018A Principal Account.

Debt Service Reserve Fund Deposit.

Beginning on the first (1st) Business Day of each month after a withdrawal from the Common Reserve Account in the Debt Service Reserve Fund to pay interest on the immediately

preceding Bond Payment Date, and on the first (1st) Business Day of each month thereafter except April and October, an amount equal to one-fifth (1/5) of any deficiency resulting from such payment shall be deposited to the Common Reserve Account, (A) beginning on the first (1st) Business Day of each month after a withdrawal from the Common Reserve Account to pay principal on the immediately preceding Bond Payment Date, and the first (1st) Business Day of each month thereafter except each October, an amount equal to one-eleventh (1/11) of any deficiency resulting from a payment on the immediately preceding Bond Payment Date shall be deposited in the Common Reserve Account, and (B) beginning on the first (1st) Business Day of each month except each January, an amount equal to one-eleventh (1/11) of the amount necessary to cure any deficiency in the Common Reserve Account determined by the valuation pursuant to Section 514(b) of the Master Indenture, as of the beginning of the current Fiscal Year resulting from a change in market valuation of assets shall be deposited to the Common Reserve Account. See “SECURITY AND SOURCE OF PAYMENT FOR THE BONDS--Debt Service Reserve Fund” in the forepart of this Official Statement.

Subject to the requirements of Section 506 of the Master Indenture and upon instructions from the Authority Representative, the Trustee may substitute a Credit Facility in lieu of cash or investments, or cash and investments in lieu of Credit Facility in order to satisfy the Common Debt Service Reserve Requirement.

The Fiftieth Supplemental Indenture provides that, as provided in Section 514 of the Master Indenture, to the extent not needed to maintain the balance therein equal to the Common Debt Service Reserve Requirement, earnings on a portion of the investments of the Common Reserve Account will be transferred after each Bond Payment Date to the Revenue Fund.

Computation and Payment of Rebate Amount

Except as otherwise expressly provided in the Code, the Airports Authority will compute and pay any Rebate Amount required by the Code with respect to the Series 2018A Bonds. Rebate Amounts will be paid from the Net Revenues of the Airports or from such other legally available sources. Net Revenues used to pay a Rebate Amount will be subordinate in priority to the application of Net Revenues required to make the monthly payment to the Federal Lease Fund.

No payment shall be made if the Airports Authority obtains an Opinion of Bond Counsel to the effect that such payment is no longer required or that some further action is required to maintain the exclusion from federal income tax of interest on the Series 2018A Bonds.

Investment of Moneys

Moneys in all Funds and Accounts shall be invested as soon as practicable upon receipt in Permitted Investments, as directed by the Airports Authority or as selected by the Trustee in the absence of direction by the Airports Authority; provided that the maturity date on which such Permitted Investments may be redeemed at the option of the holder thereof shall coincide as nearly as practicable with (but in no event later than) dates on which moneys in the Funds and Accounts for which the investments were made will be required for the purposes thereof and provided further

that in the absence of direction from the Airports Authority the Trustee shall select Permitted Investments in accordance with prudent investment standards.

Additional Bonds

The Airports Authority has issued, and expects to issue in the future, additional Bonds. Under the Indenture, the Airports Authority is permitted to issue one or more Series of additional Bonds on a parity with the outstanding Bonds, if:

The Airports Authority has provided to the Trustee the following evidence indicating that, as of the date of issuance of such additional Bonds, the Airports Authority is in compliance with the rate covenant established by the Indenture (the “Rate Covenant”) (discussed under “Rate Covenant” below) as evidenced by: (a) the Airports Authority’s most recent audited financial statements, and the Airports Authority’s unaudited statements for the period, if any, from the date of such audited statements through the most recently completed Fiscal Year quarter, and (b) if applicable, evidence of compliance with the Indenture’s requirement of remedial action (discussed under “Rate Covenant” below); and either

(i) an Airport Consultant has provided to the Trustee a certificate stating that, based upon reasonable assumptions, projected Net Revenues will be sufficient to satisfy the Rate Covenant (disregarding any Bonds that have been or will be paid or discharged immediately after the issuance of the additional Bonds proposed to be issued) for each of the next three full Fiscal Years following issuance of the additional Bonds, or each full Fiscal Year from issuance of the additional Bonds through two full Fiscal Years following completion of the Projects financed by the additional Bonds proposed to be issued, whichever is later; provided that, if Maximum Annual Debt Service with respect to all Bonds to be Outstanding following the issuance of the proposed additional Bonds in any Fiscal Year is greater than 110% of Annual Debt Service for such Bonds in any of the test years, then the last Fiscal Year of the test must use such Maximum Annual Debt Service; provided further, that if capitalized interest on any Bonds and proposed additional Bonds is to be applied in the last Fiscal Year of the period described in this sentence, the Airport Consultant shall extend the test through the first full Fiscal Year for which there is no longer capitalized interest, or

(ii) an Authority Representative has provided to the Trustee a certificate stating that Net Revenues in the most recently completed Fiscal Year were not less than the larger of (1) the amounts needed for making the required deposits to the Principal Accounts, the Interest Accounts, and the Redemption Accounts, the Debt Service Reserve Fund, the Subordinated Bond Funds, the Subordinated Reserve Funds, the Junior Lien Obligations Fund, the Federal Lease Fund, and the Emergency Repair and Rehabilitation Fund or (2) 125% of (a) Annual Debt Service on Bonds Outstanding in such Fiscal Year (disregarding any Bonds that have been paid or discharged or will be paid or discharged immediately after the issuance of such additional Bonds proposed to be issued), plus (b) Maximum Annual Debt Service with respect to such additional Bonds proposed to be issued.

With respect to additional Bonds proposed to be issued to refund Outstanding Bonds, the Airports Authority may issue such refunding Bonds if the test described above is met, or if the

Airports Authority has provided to the Trustee evidence that (a) the aggregate Annual Debt Service in each Fiscal Year with respect to all Bonds to be Outstanding after issuance of such refunding Bonds will be less than the aggregate Annual Debt Service in each such Fiscal Year through the last Fiscal Year in which Bonds are Outstanding prior to the issuance of such refunding Bonds, and (b) the Maximum Annual Debt Service with respect to all Bonds to be Outstanding after issuance of such refunding Bonds will not exceed the Maximum Annual Debt Service with respect to all Bonds outstanding immediately prior to such issuance.

The issuance of the Series 2018A Bonds will be in compliance with paragraph (i) above.

General Covenants of the Airports Authority

The covenants set forth below apply to the Series 2018A Bonds and to any other Series of Bonds issued under the Master Indenture.

Payment of Principal and Interest. The Airports Authority covenants to promptly pay or cause to be paid from Net Revenues (except to the extent payable from bond proceeds or other limited sources of payment specified in the Master Indenture) the principal of, premium, if any, and interest on each Bond, as and when due.

Pledge of Net Revenues. As security for the payment of the principal of, and interest and any premium on, the Bonds, the Airports Authority has granted to the Trustee a pledge of and lien on Net Revenues, as and when received by the Airports Authority, from and after the date of the Master Indenture without any physical delivery thereof or further act.

The Airports Authority has covenanted and agreed that it will not create any pledge, lien or encumbrance upon, or permit any pledge, lien or encumbrance to be created on, Revenues or Net Revenues except for a pledge, lien or encumbrance subordinate to the pledge and lien granted by the Master Indenture for the benefit of the Bonds and the pledge and lien granted by the Subordinated Indenture for the benefit of the Subordinated Bonds. The Airports Authority has previously issued Subordinated Bonds secured by a pledge of Net Revenues that is subordinated to the pledge of Net Revenues securing the Bonds as to moneys that have not been transferred by the Trustee to the Subordinated Indenture Trustee. See “AIRPORTS AUTHORITY INDEBTEDNESS FOR THE AVIATION ENTERPRISE FUND -- Subordinated Bonds for the Aviation Enterprise Fund” in the forepart of this Official Statement.

In addition to Bonds issued under the Master Indenture, the Airports Authority may issue, at any time and from time to time, in one or more series (a) Special Facility Bonds, (b) other bonds, notes or other obligations payable solely from and secured solely by revenues other than Revenues and Net Revenues, and (c) bonds, notes or other obligations payable from Net Revenues on a basis subordinate to the Bonds (including the Series 2018A Bonds) and the Subordinated Bonds.

Management of Airports. The Airports Authority has covenanted not to take, or allow any person to take, any action which would cause the Federal Aviation Administration (the “FAA”), or any successor to the powers and authority of the FAA to suspend or revoke the Airports’ operating certificates. The Airports Authority will comply with all valid acts, including the Acts, rules,

regulations, orders and directives of any governmental, legislative, executive, administrative or judicial body applicable to the Airports and with the Federal Lease, unless the same shall be contested in good faith, all to the end that the Airports will remain in operation at all times.

Operation and Maintenance of Airports. The Airports Authority has covenanted that it will operate and maintain the Airports as a revenue producing enterprise in accordance with the Federal Lease and the Acts. The Airports Authority will make such repairs to the Airports as shall be necessary or appropriate in the prudent management thereof. The Airports Authority has covenanted that it will operate and maintain the Airports in a manner which will entitle it at all times to charge and collect fees, charges and rentals in accordance with airport use agreements, if any, or as otherwise permitted by law, and shall take all reasonable measures permitted by law to enforce prompt payment to it of such fees, charges and rentals when and as due.

Insurance. The Airports Authority has covenanted that it will at all times (a) carry insurance, or cause insurance to be carried, with a responsible insurance company or companies authorized and qualified under the laws of any state of the United States of America to assume the risk thereof, covering such properties of the Airports as are customarily insured, and against loss or damage from such causes as are customarily insured against, by enterprises engaged in a similar type of business, or (b) have adopted and maintain a risk financing plan for property and casualty losses in accordance with the Federal Lease.

Financial Records and Statements. The Airports Authority has covenanted to have an annual audit made by independent certified public accountants of recognized standing and shall within 120 days after the end of each of its Fiscal Years furnish to the Trustee copies of the balance sheet of the Airports Authority as of the end of such Fiscal Year and complete audited financial statements of the Airports Authority for such Fiscal Year, all in reasonable detail.

Rate Covenant

Pursuant to the Indenture, the Airports Authority has covenanted that it will take all lawful measures to fix and adjust from time to time the fees and other charges for the use of the Airports, including services rendered by the Airports Authority, pursuant to airport use agreements or otherwise, calculated to be at least sufficient to produce Net Revenues to provide for the larger of either:

(a) The amounts needed for making the required deposits in each Fiscal Year to the Principal Accounts, the Interest Accounts, and the Redemption Accounts, the Debt Service Reserve Fund, the Subordinated Bond Funds, the Subordinated Reserve Funds, the Junior Lien Obligations Fund, the Federal Lease Fund and the Emergency Repair and Rehabilitation Fund; or

(b) An amount not less than 125% of the Annual Debt Service with respect to Bonds for such Fiscal Year.

Provided that any computation required above shall exclude from Net Revenues any capital gain resulting from any sales or revaluation of Permitted Investments.

The Airports Authority has covenanted that if, upon the receipt of the audit report for a Fiscal Year, the Net Revenues in such Fiscal Year are less than the amount specified above, the Airports Authority will require the Airport Consultant to make recommendations as to the revision of the Airports Authority's schedule of rentals, rates, fees and charges, and upon receiving such recommendations or giving reasonable opportunity for such recommendations to be made, the Airports Authority, on the basis of such recommendations and other available information, will take all lawful measures to revise the schedule of rentals, rates, fees and charges for the use of the Airports as may be necessary to produce the specified amount of Net Revenues in the Fiscal Year following the Fiscal Year covered by such audit report.

In the event that Net Revenues for any Fiscal Year are less than the amount specified above, but the Airports Authority has promptly taken in the next Fiscal Year all available lawful measures to review the schedule of rentals, rates, fees and charges for the use of the Airports to comply with these remedial requirements, there will be no Event of Default under the Indenture; provided, however, that if, after the Airports Authority has complied with these remedial requirements, Net Revenues are not sufficient to provide for the specified amount in the Fiscal Year in which such adjustments are required to be made (as evidenced by the audit report for such Fiscal Year), such failure will be an Event of Default under the Indenture.

Tax Covenants

The Airports Authority has covenanted to comply with certain tax covenants with respect to the tax exemption of the Series 2018A Bonds, including, among other matters, the use, expenditure and investment of proceeds and the rebate of certain "arbitrage profit" to the United States Treasury. See "TAX MATTERS" in the forepart of this Official Statement.

The Airports Authority has covenanted not to (1) make any use of the proceeds of the Series 2018A Bonds, any funds reasonably expected to be used to pay the principal of or interest on the Series 2018A Bonds, or any other funds of the Airports Authority; (2) make or permit any use of Authority Facilities refinanced with proceeds of the Series 2018A Bonds; or (3) take (or omit to take) any other action with respect to the Series 2018A Bonds, the proceeds thereof, or otherwise, if such use, action or omission would, under the Code, cause the interest on the Series 2018A Bonds to be included in gross income for federal income tax purposes.

In particular, without limitation, the Airports Authority has covenanted to cause an amount not less than ninety-five percent (95%) of the proceeds of the Series 2018A Bonds and investment income therefrom to be allocated for federal income tax purposes to Qualified Costs of Facilities, taking into account Qualified Costs of Facilities refinanced with proceeds of the Series 2018A Bonds, and agreed to make or to direct the Trustee to make any transfers necessary to satisfy such covenant.

The Airports Authority has covenanted not to take (or omit to take) or permit or suffer any action to be taken, if the result of the same causes the Series 2018A Bonds to be "arbitrage bonds" within the meaning of Section 148 of the Code.

Default and Remedies

Events of Default. The Master Indenture provides that an Event of Default with respect to one Series of Bonds shall not cause an Event of Default with respect to any other Series of Bonds unless such event or condition on its own constitutes an Event of Default with respect to such other Series of Bonds. Each of the following is defined as an “Event of Default” with respect to each Series of Bonds under the Master Indenture:

(a) If payment by the Airports Authority in respect of any installment of interest on any Bond of such Series shall not be made in full when the same becomes due and payable;

(b) If payment by the Airports Authority in respect of the principal of any Bond of such Series shall not be made in full when the same becomes due and payable, whether at maturity or by proceedings for redemption or otherwise;

(c) If payment of the purchase price of any Bond of such Series tendered for optional or mandatory tender for purchase, if provided for in the Supplemental Indenture providing for the issuance of such Series, shall not be paid in full as and when due in accordance therewith;

(d) If the Airports Authority shall fail to observe or perform any covenant or agreement on its part under the Master Indenture (other than the Rate Covenant) for a period of 60 days after the date on which written notice of such failure, requiring the same to be remedied, shall have been given to the Airports Authority by the Trustee, or to the Airports Authority and the Trustee by the Holders of at least 25% in aggregate principal amount of Bonds of a Series then Outstanding. If the breach of covenant or agreement is one which cannot be completely remedied within 60 days after written notice has been given, it shall not be an Event of Default with respect to such Series as long as the Airports Authority has taken active steps within the 60 days after written notice has been given to remedy the failure and is diligently pursuing such remedy;

(e) If the Airports Authority is required under the Rate Covenant to take measures to revise the schedule of rentals, rates, fees and charges for the use of the Airports and Net Revenues in the Fiscal Year in which such adjustments are made are less than the amount specified in the Rate Covenant contained in the Master Indenture (See “SECURITY AND SOURCE OF PAYMENT FOR THE BONDS--Rate Covenant”) in the forepart of this Official Statement; and

(f) If the Airports Authority shall institute proceedings to be adjudicated a bankrupt or insolvent, or shall consent to the institution of bankruptcy or insolvency proceedings against it, or shall file a petition, answer or consent seeking reorganization or relief under the federal Bankruptcy Code or any other similar applicable federal or state law, or shall consent to the filing of any such petition or to the appointment of a receiver, liquidator, assignee, trustee or sequestrator (or other similar official) of the Airports Authority or of any substantial part of its property, or shall make an assignment for the benefit of creditors, or shall admit in writing its inability to pay its debts generally as they become due.

No Acceleration or Cross Default. There shall be no rights of acceleration with respect to any Bonds, including the Series 2018A Bonds. An Event of Default with respect to one Series of

Bonds shall not cause an Event of Default with respect to any other Series of Bonds unless such event or condition on its own constitutes an Event of Default with respect to such other Series of Bonds.

Remedies and Enforcement of Remedies. The Master Indenture provides that upon the occurrence and continuance of any Event of Default with respect to a Series of Bonds, the Trustee may, or, upon the written request of the Holders of not less than 25% in an aggregate principal amount of such Series of Bonds, together with indemnification of the Trustee to its satisfaction therefor shall, proceed forthwith to protect and enforce its rights and the rights of the Bondholders under the Master Indenture and under the Acts and such Bonds by such suits, actions, injunction, mandamus or other proceedings, as the Trustee, being advised by counsel, shall deem expedient.

Regardless of the happening of an Event of Default, the Trustee, if requested in writing by the Holders of not less than 25% in aggregate principal amount of a Series of Bonds, shall, upon being indemnified to its satisfaction therefor, institute and maintain such suits and proceedings as it may be advised shall be necessary or expedient (a) to prevent any impairment of the security under the Master Indenture by any acts or omissions to act which may be unlawful or in violation thereof, or (b) to preserve or protect the interests of the Holders of such Series of Bonds, provided that such request is in accordance with law and the provisions of the Master Indenture, and, in the sole judgment of the Trustee, is not unduly prejudicial to the interest of the Holders of Bonds of each Series not making such request.

The remedies provided for in the Master Indenture with respect to reaching Funds or Accounts thereunder shall be limited to the Funds or Accounts thereunder pledged to the applicable Series of Bonds with respect to which an Event of Default exists.

Application of Revenues and Other Moneys After Default. The Master Indenture provides that during the continuance of an Event of Default with respect to any Series of Bonds, all moneys received by the Trustee with respect to such Series of Bonds pursuant to any right given or action taken under the provisions of the Master Indenture shall, after payment of the costs and expenses of the proceedings which resulted in the collection of such moneys and of the fees, expenses and advances incurred or made by the Trustee with respect thereto, be applied according to the accrued debt service deposits or payments with respect to each such Series as follows:

(a) Unless the principal amounts of all such Outstanding Bonds shall have become due and payable:

First: To the payment to the persons entitled thereto of all installments of interest then due on such Bonds in the order of maturity of such installments, and, if the amount available shall not be sufficient to pay in full any installment or installments maturing on the same date, then to the payment thereof ratably, according to the amounts due thereon to the persons entitled thereto, without any discrimination or preference; and

Second: To the payment to the persons entitled thereto of the unpaid principal amounts of any Bonds which shall have become due (other than Bonds of such Series previously called for redemption for the payment of which moneys are held pursuant to the

provisions of the Master Indenture), whether at maturity or by proceedings for redemption or otherwise or upon the tender of any Bond pursuant to the terms of the Supplemental Indenture providing for the issuance of such Bonds, in the order of their due dates, and if the amounts available shall not be sufficient to pay in full all the Bonds of such Series due on any date, then to the payment thereof ratably, according to the principal amounts due on such date, to the persons entitled thereto, without any discrimination or preference.

(b) If the principal amounts of all Outstanding Bonds shall have become due and payable, to the payment of the principal amounts and interest then due and unpaid upon such Bonds without preference or priority of principal over interest or of interest over principal, or of any installment of interest over any other installment of interest, or of any Bond over any other such Bond, ratably, according to the amounts due respectively for principal and interest, to the persons entitled thereto without any discrimination or preference.

Whenever moneys are to be applied by the Trustee as described in (a) and (b) above, such moneys shall be applied on the date fixed by the Trustee and, upon such date, interest on the principal amounts to be paid on such dates shall cease to accrue if so paid.

Remedies Not Exclusive. No remedy conferred upon or reserved to the Trustee or the Bondholders or any Credit Provider under the Master Indenture is intended to be exclusive of any other remedy, but each and every such remedy shall be cumulative and shall be in addition to every other remedy given under the Master Indenture or existing at law or in equity or by statute (including the Acts) on or after the date of the Master Indenture.

Remedies Vested in the Trustee. All rights of action (including the right to file proof of claims) under the Master Indenture or under any of the Bonds of any Series may be enforced by the Trustee without the possession of any of the Bonds of such Series or the production thereof in any trial or other proceedings relating thereto. Any such suit or proceeding instituted by the Trustee may be brought in its name as the Trustee without the necessity of joining as plaintiffs or defendants any Holders of the applicable Series of Bonds. Subject to the provisions of the Master Indenture, any recovery or judgment shall be for the equal benefit of the Holders of the Outstanding Bonds of such Series.

Control of Proceedings. If an Event of Default with respect to a Series of Bonds shall have occurred and be continuing, the Master Indenture provides that the Holders of a majority in aggregate principal amount of Bonds of such Series then Outstanding shall have the right, at any time, by any instrument in writing executed and delivered to the Trustee, to direct the method and place of conducting any proceeding to be taken with respect to funds or assets solely securing such Series of Bonds in connection with the enforcement of the terms and conditions thereof, provided that such direction is in accordance with law and the provisions of the Master Indenture (including indemnity to the Trustee as provided in the Master Indenture) and, in the sole judgment of the Trustee, is not unduly prejudicial to the interest of the Bondholders of each Series of Bonds not joining in such direction, and provided further, that nothing in this section shall impair the right of the Trustee in its discretion to take any other action under the Master Indenture which it may deem proper and which is not inconsistent with such direction by Bondholders.

If an Event of Default with respect to all Series of Bonds shall have occurred and be continuing, the Holders of a majority in aggregate principal amount of all Bonds then Outstanding shall have the right, at any time, by any instrument in writing executed and delivered to the Trustee, to direct the method and place of conducting any proceeding to be taken with respect to Net Revenues or other assets securing all Bonds in connection with the enforcement of the terms and conditions of the Master Indenture, provided that such direction is in accordance with law and the provisions of the Master Indenture (including indemnity to the Trustee as provided in the Master Indenture) and, in the sole judgment of the Trustee, is not unduly prejudicial to the interest of Bondholders not joining in such direction and provided further that nothing shall impair the right of the Trustee in its discretion to take any other action under the Master Indenture which it may deem proper and which is not inconsistent with such direction by Bondholders.

Individual Bondholder Action Restricted. No Holder of any Bond of a Series shall have any right to institute any suit, action or proceeding in equity or at law for the enforcement of the Master Indenture or for the execution of any trust thereunder or for any remedy thereunder unless:

(i) an Event of Default has occurred with respect to such Series (A) under paragraph (a), (b) or (c) of “Events of Default” of which the Trustee is deemed to have notice, or (B) under paragraph (d), (e) or (f) of “Events of Default” of which the Trustee has actual knowledge or as to which the Trustee has been notified in writing;

(ii) the Holders of at least 25% in aggregate principal amount of the applicable Series of Bonds of such Series then Outstanding shall have made written request to the Trustee to proceed to exercise the powers granted in the Master Indenture or to institute such action, suit or proceeding in its own name;

(iii) such Bondholders shall have offered the Trustee indemnity as provided in the Master Indenture;

(iv) the Trustee shall have failed or refused to exercise the powers granted under the Master Indenture or to institute such action, suit or proceeding in its own name for a period of 60 days after receipt by it of such request and offer of indemnity; and

(v) during such 60-day period, no direction inconsistent with such written request has been delivered to the Trustee by the Holders of a majority in aggregate principal amount of Bonds of such Series then Outstanding as provided in the Master Indenture.

No one or more Holders of Bonds shall have any right in any manner whatsoever to affect, disturb or prejudice the security of the Master Indenture or to enforce any right thereunder except in the manner provided therein and for the equal benefit of the Holders of all Bonds of such Series then Outstanding.

Nothing contained in the Master Indenture shall affect or impair, or be construed to affect or impair, the right of the Holder of any Bond (i) to receive payment of the principal of or interest on such Bond on or after the due date thereof, or (ii) to institute suit for the enforcement of any such payment on or after such due date; provided, however, no Holder of any Bond may institute or

prosecute any such suit or enter judgment therein if, and to the extent that, the institution or prosecution of such suit or the entry of judgment therein would, under applicable law, result in the surrender, impairment, waiver or loss of the lien of the Master Indenture on the moneys, funds and properties pledged under the Master Indenture for the equal and ratable benefit of all Holders of Bonds of such Series.

Waiver of Event of Default. No delay or omission of the Trustee, of any Holder of Bonds or, if provided by Supplemental Indenture, any Credit Provider to exercise any right or power accruing upon any Event of Default shall impair any such right or power or shall be construed to be a waiver of any such Event of Default or an acquiescence therein. Every power and remedy given by the Master Indenture to the Trustee, the Holders of Bonds and, if provided by Supplemental Indenture, any Credit Provider may be exercised from time to time and as often as may be deemed expedient by them.

The Trustee with the consent of the Credit Provider, if provided by Supplemental Indenture (provided, however, that such Credit Provider's consent may be required only in connection with an Event of Default on a Series of Bonds with respect to which such Credit Provider is providing a Credit Facility) may waive any Event of Default with respect to the Bonds, which, in the Trustee's opinion, shall have been remedied at any time, regardless of whether any suit, action or proceeding has been instituted before the entry of final judgment or decree in any suit, action or proceeding instituted by the Trustee under the provisions of the Master Indenture, or before the completion of the enforcement of any other remedy under the Master Indenture.

Notwithstanding anything contained in the Master Indenture to the contrary, the Trustee, upon the written request of the applicable Credit Provider, if any, or Holders of at least a majority of the aggregate principal amount of Bonds of a Series then Outstanding, with respect to an Event of Default affecting only such Series (or a majority of the aggregate principal amount of all Bonds then Outstanding, with respect to an Event of Default affecting all Series of Bonds) shall waive any Event of Default under the Master Indenture and its consequences, provided, however, that, a default in the payment of the principal amount of, premium, if any, or interest on any Bond, when the same shall become due and payable by the terms thereof or upon call for redemption, may not be waived without the written consent of the Holders of all the Bonds of such Series at the time Outstanding to which an Event of Default applies and the consent of the Credit Provider, if any.

In case of any waiver by the Trustee of an Event of Default under the Master Indenture, the Airports Authority, the Trustee, the Credit Provider, if any, and the Bondholders shall be restored to their former positions and rights under the Master Indenture, but no such waiver shall extend to any subsequent or other Event of Default or impair any right consequent thereon. The Trustee shall not be responsible to any one for waiving or refraining any Event of Default in accordance with the Master Indenture.

The Trustee

Trustee Not Required to Take Action Unless Indemnified. Except as expressly required in the Master Indenture, the Trustee shall not be required to institute any proceeding in which it may be a defendant or to take any action to enforce its rights and expose it to liability, or be deemed

liable for failure to take such action, unless and until the Trustee shall have been indemnified against all reasonable costs, liability and damages.

Right to Deal in Bonds and Take Other Actions. The Trustee may in good faith buy, sell or hold and deal in any Bonds of any Series, including the Series 2018A Bonds, as if it were not such Trustee and may commence or join any action which a Holder is entitled to take with like effect as if the Trustee were not the Trustee.

Trustee's Fees and Expenses. If the Airports Authority fails to properly pay any reasonable fees, costs or expenses of the Trustee incurred in the performance of its duties, the Trustee may reimburse itself from any surplus moneys on hand in any Fund or Account held by it except any amounts in the Bond Fund.

Removal and Resignation of Trustee. The Trustee may resign at any time. Written notice of such resignation shall be given to the Airports Authority and such resignation shall take effect upon the appointment and qualification of a successor Trustee. In addition, the Trustee may be removed at any time by the Airports Authority but only for cause by Supplemental Indenture so long as (a) no Event of Default shall have occurred and be continuing, and (b) the Airports Authority determines, in such Supplemental Indenture, that the removal of the Trustee shall not have an adverse effect upon the rights or interests of the Bondholders. In the event of the resignation or removal of the Trustee or in the event of the Trustee is dissolved or otherwise becomes incapable to act as the Trustee, the Airports Authority shall be entitled to appoint a successor Trustee.

Supplemental Indentures

Supplemental Indentures Not Requiring Consent of Bondholders. The Airports Authority and the Trustee may, without the consent of or notice to any of the Holders, enter into one or more Supplemental Indentures for one or more of the following purposes:

- (a) To cure any ambiguity or formal defect or omission in the Indenture;
- (b) To correct or supplement any provision in the Indenture which may be inconsistent with any other provision therein, or to make any other provision with respect to matters or questions arising thereunder which shall not materially adversely affect the interests of the Holders;
- (c) To grant or confer upon the Holders any additional rights, remedies, powers or authority that may lawfully be granted to or conferred upon them;
- (d) To secure additional revenues or provide additional security or reserves for payment of the Bonds;
- (e) To preserve the excludability of interest on the Bonds from gross income for purposes of federal income taxes or to change the tax covenants set forth in the Master Indenture or

any Supplemental Indenture pursuant to an Opinion of Bond Counsel that such action will not adversely affect such excludability;

(f) To provide for the issuance of a Series of Bonds under the Master Indenture;

(g) To remove the Trustee in accordance with the Master Indenture; and

(h) To add requirements the compliance with which is required by a Rating Agency in connection with issuing a rating with respect to a Series of Bonds.

(i) To accommodate the technical, operational and structural features of Bonds which are issued or are proposed to be issued or of a Program which has been authorized or is proposed to be authorized, including, but not limited to, changes needed to accommodate bond anticipation notes, commercial paper, auction Bonds, Hedge Facilities, Short-Term/Demand Obligations and other variable rate or adjustable rate Bonds, Capital Appreciation Bonds, Original Issue Discount Bonds and other discounted or compound interest Bonds or other forms of indebtedness which the Airports Authority from time to time deems appropriate to incur;

(j) To accommodate the use of a Credit Facility for specific Bonds or a specific Series of Bonds; and

(k) To comply with the requirements of the Code as are necessary, in the Opinion of Bond Counsel, to prevent the federal income taxation of the interest on any of the Bonds, including, without limitation, the segregation of Revenues into different funds.

Supplemental Indentures Requiring Consent of Bondholders. The Holders of not less than a majority in aggregate principal amount of the Bonds Outstanding may consent to or approve, from time to time, which consent to or approval shall be in writing and shall not be withheld unreasonably, the execution by the Airports Authority and the Trustee of such Supplemental Indentures as shall be deemed necessary and desirable by the Airports Authority for the purpose of modifying, altering, amending, adding to or rescinding any of the terms or provisions contained in the Indenture; provided, that if any Supplemental Indenture modifying, altering, amending, adding to or rescinding any of the terms and provisions of the Indenture contains provisions which affect the rights and interests of less than all Series of Bonds and the section of the Master Indenture relating to Supplemental Indentures not requiring consent of Holders is inapplicable, then such Supplemental Indenture shall require the consent only of the Holders of a majority in Outstanding principal amount of the Series of Bonds so affected; and provided further, that nothing shall permit or be construed as permitting a Supplemental Indenture that would:

(a) extend the stated maturity of or time for paying interest on any Bond or reduce the principal amount of or the redemption premium or rate of interest payable on any Bond, without the consent of the Holder of such Bond;

(b) prefer or give a priority to any Bond over any other Bond, without the consent of the Holder of each Bond then Outstanding not receiving such preference or priority; or

(c) reduce the aggregate principal amount of Bonds then Outstanding the consent of the Holders of which is required to authorize such Supplemental Indenture, without the consent of the Holders of all Bonds then Outstanding.

If the Holders of the required principal amount or number of the Bonds Outstanding shall have consented to and approved the execution of a Supplemental Indenture as provided in the Master Indenture, no Holder of any Bond shall have any right to object to the execution thereof, or to object to any of the terms and provisions contained therein or to the operation thereof, or in any manner to question the propriety of the execution thereof, or to enjoin or restrain the Trustee or the Airports Authority from executing the same or from taking any action pursuant to the provisions thereof.

Satisfaction and Discharge

If payment of all principal of, premium, if any, and interest on a Series of Bonds in accordance with the terms of such Bonds is made, or is provided for as described below, and if all other sums payable by the Airports Authority under the Master Indenture with respect to such Series of Bonds shall be paid or provided for then the liens, estates and security interests granted thereby shall cease with respect to such Series of Bonds, provided that the rebate provisions, if any, of the related Supplemental Indenture shall survive so long as there is any amount due to the federal government pursuant to such Supplemental Indenture.

Payment of a Series of Bonds, including the Series 2018A Bonds, may be provided for by the deposit with the Trustee of moneys, noncallable Government Obligations, noncallable Government Certificates or pre-refunded municipal obligations (as described in paragraph (c) of the definition of Permitted Investments in the Master Indenture) or any combination thereof. The moneys and the maturing principal and interest income on such Government Obligations, noncallable Government Certificates, or pre-refunded municipal obligations, if any, shall be sufficient and available to pay, when due, the principal of, whether at maturity or upon fixed redemption dates, premium, if any, and interest on such Bonds. The moneys, Government Obligations, noncallable Government Certificates and pre-refunded municipal obligations shall be held by the Trustee irrevocably in trust for the Holders of such Bonds solely for the purpose of paying the principal or redemption price of, including premium, if any, and interest on such Bonds as the same shall mature or become payable upon prior redemption, and, if applicable, upon simultaneous direction, expressed to be irrevocable, to the Trustee as to the dates upon which any such bonds are to be redeemed prior to their respective maturities.

If payment of any of the Series 2018A Bonds is so provided for, the Trustee shall mail a notice so stating to each Holder of such Series 2018A Bonds.

Bonds, the payment of which has been provided for, shall no longer be deemed Outstanding under the Master Indenture. The obligation of the Airports Authority in respect of such Bonds shall nevertheless continue but the Holders thereof shall thereafter be entitled to payment only from the moneys, Government Obligations, Government Certificates, and pre-refunded municipal obligations deposited with the Trustee to provide for the payment of such a series of Bonds.

No Bond may be so provided for if, as a result thereof or of any other action in connection with which the provision for payment of such Bond is made, the interest payable on any Bond with respect to which an Opinion of Bond Counsel has been rendered that such interest is excluded from gross income for federal income tax purpose is made subject to federal income taxes. The Trustee shall receive and may rely upon an Opinion of Bond Counsel (which may be based upon a ruling or rulings of the Internal Revenue Service) to the effect that the provisions of this paragraph will not be breached by so providing for the payment of any Bonds.

Non-Presentation of Series 2018A Bonds

If any Series 2018A Bond is not presented for payment of principal of, premium, if any, and interest on the Series 2018A Bond within two (2) years after delivery of such funds to the Trustee and absent knowledge by the Trustee of any continuing Event of Default, the moneys shall, upon request by the Airports Authority, be paid to the Airports Authority free of any trust or lien and thereafter the Holder of such Series 2018A Bond shall look only to the General Purpose Fund of the Airports Authority and then only to the extent of the amounts so received by the Airports Authority without interest thereon. Prior to the transfer of any moneys, the Trustee shall give notice of such transfer to each affected Holder and publish such notice in a newspaper of general circulation in the Washington, D.C. metropolitan area. The Trustee shall have no further responsibility with respect to such moneys or payment of principal of, premium, if any, and interest on the Series 2018A Bonds.

Governing Law

The Master Indenture, the Fiftieth Supplemental Indenture and the Series 2018A Bonds shall be governed and construed in accordance with the laws of the Commonwealth of Virginia.

(THIS PAGE IS INTENTIONALLY LEFT BLANK)

APPENDIX C

SUMMARY OF CERTAIN PROVISIONS OF THE AIRPORT USE AGREEMENT AND PREMISES LEASE

The following is a summary of certain provisions of the Airport Use Agreement and Premises Lease (the "Airline Agreement"), to which reference is made for a complete statement of its provisions and contents. The Airline Agreement signed by each of the Signatory Airlines is substantially identical except for provisions relating to the Premises leased by, and the Aircraft Parking Positions assigned to, each Signatory Airline. The Airline Agreement governs both Airports. An airline may become a Signatory Airline at one or both of the Airports.

DEFINITIONS

Certain words and terms used in this summary are defined in the Airline Agreement and have the same meanings in this summary, except as defined otherwise in the Official Statement. Some, but not all, of the definitions in the Airline Agreement are set forth below. Certain of these definitions have been abbreviated or modified for purposes of this summary.

"Additional Projects" shall mean capital expenditures for construction, acquisitions, and improvements related to the Airports, other than small capital items includable as O&M Expenses in accordance with Airports Authority policy and other than those Projects included in the Capital Construction Program.

"Airfield Net Requirement" shall mean at each Airport the Total Requirement attributable to the Airfield Cost Center, less (i) Ramp Area Charges, if any; (ii) direct utility or other reimbursements attributable or allocable to the Airfield Cost Center; and (iii) Transfers, if any, allocable to the Airfield Cost Center.

"Airline" shall mean the Scheduled Air Carrier executing the Airline Agreement.

"Airline Supported Areas" shall mean for each Airport the Airfield, Terminal and Equipment Cost Centers at that Airport and at Dulles International Airport shall also include the International Arrivals Building Federal Inspectional Services Facility ("IAB FIS"), Midfield C FIS and the Passenger Conveyance System Cost Centers.

"Bonds" shall mean Senior Bonds, Subordinated Bonds, and Other Indebtedness.

"Capital Charges" shall mean (i) Debt Service and (ii) Amortization Requirements.

"Capital Construction Program" shall mean the planning, design, construction, acquisitions and improvements to the Airports, as more particularly described in Exhibits N-H, N-I, D-H, D-H Supplement, D-I and D-I Supplement attached to the Airline Agreements.

"Common Use Charges" shall mean those charges, in any Rate Period, payable by the Airline to the Airports Authority for the use of Common Use Premises at each Airport, determined in accordance with Paragraph 8.03.4 of the Airline Agreement.

“Common Use Premises” shall mean those areas at the Airport which two or more Scheduled Air Carriers are authorized to use, as shown on Exhibits N-B-1 and D-B-1 attached to the Airline Agreement. For purposes of calculating rentals, fees, and charges under the Airline Agreement, such Common Use Premises shall be deemed Rentable Space; provided, however, no leasehold interests shall accrue to or be acquired by any authorized user thereof.

“Cost Centers” shall mean those areas of functional activities established by the Airports Authority at each Airport, as set forth in Exhibits N-E and D-E attached to the Airline Agreement, and as may be amended by the Airports Authority.

“Debt Service” shall mean, as of any date of calculation for any Rate Period, the amounts required pursuant to the terms of any Indenture to be collected during said period for the payment of Bonds, plus fees and amounts payable to providers of any form of credit enhancement used in connection with Bonds.

“Debt Service Coverage” shall mean at both Airports, for Fiscal Years 2015 through 2017, an amount equal to thirty-five percent (35%) of the portion of Debt Service attributable to Senior Bonds and Subordinated Bonds which is not funded with PFC revenue or federal grant assistance; at Reagan National Airport, for Fiscal Years 2018 through 2023, an amount equal to thirty percent (30%) of the portion of Debt Service attributable to Senior Bonds and Subordinated Bonds which is not funded with PFC revenue or federal grant assistance; at Reagan National Airport, for Fiscal Year 2024, an amount equal to twenty-five percent (25%) of the portion of Debt Service attributable to Senior Bonds and Subordinated Bonds which is not funded with PFC revenue or federal grant assistance; at Dulles International Airport for Fiscal Years 2018 through 2023, an amount equal to thirty percent (30%) of the portion of Debt Service attributable to Senior Bonds and Subordinated Bonds which is not funded with PFC revenue or federal grant assistance; and, at Dulles International Airport for Fiscal Year 2024, an amount equal to twenty-five percent (25%) of the portion of Debt Service attributable to Senior Bonds and Subordinated Bonds which is not funded with PFC revenue or federal grant assistance; plus, in each of the Fiscal Years 2015 through 2024, such other amounts as may be established by any financing agreement or arrangement with respect to Other Indebtedness.

“Dulles Toll Road” shall mean the toll roadway between Virginia Route 28 on the west and Virginia Route 123 on the east that was constructed by the State of Virginia under the 1983 Deed of Easement and additional easements and is located immediately adjacent to the Dulles Airport Access Highway on land leased to the Airports Authority by the United States Department of Transportation.

“Equipment” shall mean the equipment and devices owned by the Airports Authority and leased to the Airline, which may include but shall not be limited to, Common Use Terminal Equipment (“CUTE”), baggage make-up and baggage claim conveyors and devices, loading bridges, 400 Hz, and preconditioned air units.

“Equipment Charges” shall mean those amounts payable by the Airline, if applicable, for the use of Equipment in accordance with Section 8.05 of the Airline Agreement.

“Equipment Sub-Centers” shall mean those individual facilities at each Airport that are included in the Equipment Cost Center at that Airport, as described in Exhibits N-E and D-E to the Airline Agreement.

“Extraordinary Coverage Protection Payments” shall mean those payments, if any, required to be paid by the Signatory Airlines at an Airport in any Fiscal Year in which the amount of Revenues plus Transfers less Operating and Maintenance Expenses at that Airport is projected to be less than one hundred twenty-five percent (125%) of the sum of Debt Service on Senior Bonds and Debt Service on Subordinated Bonds at the Airport.

“Federal Lease” shall mean the Agreement and Deed of Lease, dated March 2, 1987, between the United States of America, acting through the Secretary of Transportation, and the Airports Authority, as the same may be amended or supplemented.

“Fiscal Year” shall mean the annual accounting period for the Airports Authority for its general accounting purposes which, at the time of entering into the Airline Agreement, is the period of twelve consecutive months beginning with the first day of January of any year.

“Five CCP Projects” shall mean the Commuter Concourse and its Enabling Projects, the Secure National Hall and its Enabling Projects, and the Terminal A Preliminary Planning and Design Projects, all at Reagan National Airport and as summarized in Exhibit N-H and described in Exhibit N-I to the Airline Agreement.

“Ground Transportation Cost Center” shall mean the Cost Center described in Exhibits N-E and D-E to the Airline Agreement.

“Indenture” shall mean the Senior Indenture, Subordinated Indenture, or Other Indenture, including amendments, supplements, and successors thereto.

“International Arrivals Building Federal Inspectional Services Facility (or “IAB FIS”) shall mean the building adjacent to the Dulles Main Terminal containing facilities provided by the Airports Authority for the processing by U.S. Customs and Border Patrol of arriving international passengers requiring such processing.

“Landing Fees” shall mean those fees, calculated in accordance with Section 8.02 of the Airline Agreement, payable by the Airline for the use of the Airfield.

“Majority-in-Interest” shall mean, at each Airport, (i) for the Airfield Cost Center, fifty percent (50%) in number of all Signatory Airlines and Signatory Cargo Carriers at such Airport which together landed more than sixty percent (60%) of Signatory Airlines’ and Signatory Cargo Carriers’ landed weight at that Airport during the most recent six (6) full month period for which the statistics are available, and (ii) for the Airline Supported Areas (excluding the Airfield Cost Center), fifty percent (50%) in number of Signatory Airlines at such Airport which together were obligated to pay more than sixty percent (60%) of the sum of Terminal Rentals, Common Use Charges, FIS Charges, Passenger Conveyance Charges, and Equipment Charges at such Airport during the most recent six (6) full month period for which statistics are available.

“Midfield C Federal Inspection Services Facility” or “Midfield C FIS” shall mean those facilities provided by the Airports Authority at Concourse C at Dulles International Airport for the processing by U.S. Customs and Border Patrol of arriving international passengers requiring such processing.

“Operation and Maintenance Expenses” or “O&M Expenses” shall mean for any period all expenses of the Airports Authority paid or accrued for the operation, maintenance, administration, and ordinary current repairs of the Airports. Operations and Maintenance Expenses shall not include (i) the principal of, premium, if any, or interest payable on any Bonds; (ii) any allowance for amortization or depreciation of the Airports; (iii) any other expense for which (or to the extent to which) the Airports Authority is or will be paid or reimbursed from or through any source that is not included or includable as Revenues; (iv) any extraordinary items arising from the early extinguishment of debt; (v) rentals payable under the Federal Lease; and (vi) any expense paid with amounts from the Emergency R&R Fund.

“Original Cost Estimate” shall mean for one or more or all of the Projects in the Capital Construction Program (as the context shall determine) the amount specified for such Project in Exhibits N-I and D-I to the Airline Agreement.

“Other Indebtedness” shall mean any financing instrument or obligation of the Airports Authority, except the Federal Lease, payable from Revenues on a basis subordinate to the Airports Authority’s obligation to pay Subordinated Bonds.

“Passenger Conveyances” shall mean the Dulles International Airport mobile lounges, buses, Aerotrains or other airside ground transportation devices provided by the Airports Authority at Dulles International Airport for the movement of passengers and other persons.

“Passenger Conveyance Charges” shall mean those charges payable by the Airline pursuant to Section 8.07 of the Airline Agreement.

“Premises” shall mean areas at the Airports leased by the Airline pursuant to Article 6 of the Airline Agreement. Premises shall include Exclusive, Preferential, and Joint Use Premises.

“Project” shall mean any discrete, functionally complete portion of the Capital Construction Program identified as a separate project in Exhibits N-I and D-I to the Airline Agreement, as revised from time to time.

“Ramp Area” shall mean the aircraft parking and maneuvering areas adjacent to the Terminals and any other areas at an Airport designated by the Airports Authority for aircraft parking and maneuvering, and shall include within its boundaries all Aircraft Parking Positions. At Dulles International Airport, the Ramp Area shall also include the Dulles Jet Apron, but it shall not include the Dulles Cargo Apron.

“Ramp Area Charges” shall mean Aircraft Parking Position Charges and Dulles Jet Apron Fees, as set forth in Section 8.04 of the Airline Agreement.

“Revenues” shall mean all revenues of the Airports Authority received or accrued except (i) interest income on, and any profit realized from, the investment of moneys in any fund or account to the extent that such income or profit is not transferred to, or retained in, the Revenue Fund or the Bond Fund created by the Senior Indenture or the Bond Funds created by the Subordinated Indenture; (ii) interest income on, and any profit realized from, the investment of moneys in any fund or account funded from the proceeds of Special Facility Bonds; (iii) amounts received by the Airports Authority from, or in connection with, Special Facilities, unless such funds are treated as Revenues by the Airports Authority; (iv) amounts received by the Airports Authority from, or in connection

with, the Dulles Toll Road, unless such funds are treated as Revenues by the Airports Authority; (v) the proceeds of any passenger facility charge or similar charge levied by, or on behalf of, the Airports Authority, unless such funds are treated as Revenues by the Airports Authority; (vi) grants-in-aid, donations, and/or bequests; (vii) insurance proceeds which are not deemed to be revenues in accordance with generally accepted accounting principles; (viii) the proceeds of any condemnation awards; and (ix) any other amounts which are not deemed to be revenues in accordance with generally accepted accounting principles or which are restricted as to their use.

“Rentable Space” shall mean, for each Terminal Sub-Center at each Airport, the total of all areas in that Terminal Sub-Center which constitute Premises, Common Use Premises, Dulles Permit Space, or areas otherwise available for lease to airlines or non-airline tenants.

“Scheduled Air Carrier” shall mean any company performing, pursuant to published schedules, commercial air transportation of persons, property, and/or mail over specified routes to and from an Airport and holding the necessary authority from the appropriate Federal or state agencies to provide such air transportation services.

“Senior Bonds” shall mean any bonds or other financing instrument or obligation issued pursuant to the Senior Indenture.

“Senior Indenture” shall mean the Amended and Restated Master Indenture of Trust dated as of September 1, 2001, securing the Airports Authority’s Airport System Revenue Bonds, as such has been and may be amended or supplemented.

“Signatory Airline” shall mean a Scheduled Air Carrier which has an agreement with the Airports Authority substantially similar to the Airline Agreement.

“Special Facility” shall mean any facility, improvement, structure, equipment, or assets acquired or constructed on any land or in or on any structure or building at the Airports, the cost of construction and acquisition of which are paid for (i) by the obligor under the special facility agreement, or (ii) from the proceeds of Special Facility Bonds, or (iii) both.

“Special Facility Bonds” shall mean revenue bonds, notes, or other obligations of the Airports Authority, issued to finance any Special Facility, the payment of principal of, premium, if any, and interest on which are payable from and secured by the proceeds thereof and rentals, payments, and other charges payable by the obligor under the Special Facility Agreements.

“Sub-Center” shall mean either a Terminal or Equipment Sub-Center.

“Subordinated Bonds” shall mean any bonds or other financing instrument or obligation issued pursuant to the Subordinated Indenture.

“Subordinated Indenture” shall mean the Master Indenture of Trust dated March 1, 1988, securing the Airports Authority’s General Airport Subordinated Revenue Bonds, as such may be supplemented or amended.

“Terminal Rentals” shall mean those amounts payable by the Airline, calculated in accordance with Section 8.03 of the Airline Agreement, for the lease of its Exclusive, Preferential, and Joint Use Premises.

“Terminal Sub-Centers” shall mean those individual facilities at each Airport that are included in the Terminal Cost Center at that Airport, and described in Exhibits N-E and D-E of the Airline Agreement. At Reagan National Airport, Terminal Sub-Centers shall mean Terminal A and Terminal B/C and, after it is established, Terminal B/C/D. At Dulles International Airport, Terminal Sub-Centers shall mean Dulles Main Terminal, Concourse A, Concourse B, Concourse C, Concourse D and Z Gates.

“Terminal Sub-Center Net Requirement” shall mean, for each Terminal Sub-Center at each Airport, the Total Requirement attributable or allocable to each such Terminal Sub-Center, less direct utility or other reimbursements attributable or allocable to said Terminal Sub-Center.

“Total Requirement” shall mean, with respect to any Direct Cost Center or Terminal or Equipment Sub-Center, that portion of the sum of (i) O&M Expenses; (ii) required deposits under the Senior Indenture to maintain the O&M Reserve; (iii) Capital Charges; (iv) Debt Service Coverage; (v) required deposits to any Debt Service Reserve Fund; (vi) Federal Lease payments; (vii) required deposits to the Emergency R&R Fund; and (viii) Extraordinary Coverage Protection Payments, if any, properly attributable or allocable to each said Direct Cost Center or Sub-Center.

“Transfers” shall mean the amounts to be transferred by the Airports Authority to reduce Signatory Airline rentals, fees, and charges as set forth in Section 9.05 of the Airline Agreement.

TERM

On January 1, 2015, the Airline Agreement replaced the previously existing agreement (which became effective in February 1990 and terminated on December 31, 2014), and became effective with nearly all of the airlines providing service at Reagan National Airport and Dulles International Airport. For airlines operating at Reagan National Airport, the term of the Airline Agreement is 10 years, from the effective date (January 1, 2015) to December 31, 2024. For airlines operating at Dulles International Airport, the term of the Airline Agreement was originally three years, starting from the effective date (January 1, 2015) to December 31, 2017; however, the Airports Authority and the airlines signed the First Universal Amendment to the 2015 Metropolitan Washington Airports Authority Airport Use Agreement and Premises Lease, as it Applies to Washington Dulles International Airport, on July 27, 2016 (the “First Universal Amendment”), extending the term of the agreement for Dulles International Airport to December 31, 2024 to be coterminous with the agreement at Reagan National Airport.

COST CENTERS

The Airline Agreement divides each of the Airports into areas (the “Cost Centers”) which are described both in terms of geographic location and function. The Airline Agreement establishes separate Cost Centers for Reagan National Airport and Dulles International Airport. The Cost Centers at each Airport are divided into two groups: the Direct Cost Centers (Airfield, Terminal, Equipment, Ground Transportation, Aviation and Non-Aviation, and, at Dulles International Airport only, IAB FIS, Midfield C FIS, Cargo, and Passenger Conveyance System) and the Indirect Cost Centers (Maintenance, Public Safety, Systems and Services, and Administrative). In addition, there are Sub-Centers created with the Terminal and Equipment Cost Centers. The Direct Cost Centers and Sub-Centers are used to account for both costs and revenues. The Indirect Cost Centers primarily serve to accumulate certain costs which are in turn allocated to the Direct Cost Centers and Sub-Centers.

The Signatory Airlines pay rentals, fees and charges based on their lease of Premises in, and usage of, those Direct Cost Centers and Sub-Centers which are within the Airline Supported Areas. The Airline Supported Areas at Reagan National Airport are the Airfield, Terminal and Equipment Cost Centers and at Dulles International Airport, they are the Airfield, Terminal, Equipment, IAB FIS, Midfield C FIS and Passenger Conveyance System Cost Centers.

REVENUE-SHARING; CALCULATION OF TRANSFERS

The Airports Authority and the Signatory Airlines at each Airport have agreed to share in the Net Remaining Revenue (“NRR”) of the Airport each Fiscal Year. The Airports Authority’s share of the Airport’s NRR is deposited into the Airports Authority’s Capital Fund. The Signatory Airlines’ share of NRR is deposited into an Airline Transfer Account in the Revenue Fund and used as a credit to reduce rentals, fees and charges in the following Fiscal Year (“Transfers”). This reduction is accomplished by allocating Transfers to the various Cost Centers and Sub-Centers in the Airline Supported Areas.

To calculate the Airports Authority’s and the Signatory Airlines’ respective shares of NRR, at the end of each Fiscal Year, the total amount of NRR at each Airport is calculated. This calculation takes the total Revenues at the Airport (plus Transfers, if any, from the previous Fiscal Year) and subtracts from that amount various costs and expenses, including O&M Expenses, Debt Service, Federal Lease payments, various reserve and fund deposit requirements, but excluding Debt Service Coverage.

Under the formula set forth in the Airline Agreement, the Airports Authority will retain an increased share of NRR from Reagan National Airport (compared with its share under the prior agreement) and have the ability to use such NRR at Dulles International Airport, including to reduce the requirement for airline rentals, fees and charges at that Airport, up to a maximum of \$40 million in years 2014 through 2016 and lower amounts in subsequent years. The amount of NRR so calculated for Reagan National Airport is allocated between the Airports Authority and the Signatory Airlines as follows:

<u>Year in Which NRR is Generated</u>	<u>NRR Sharing at Reagan National Airport</u>	<u>Maximum Amount of Airports Authority Share Usable at Dulles International Airport in Year Following Year of Generation</u>
2014, 2015, 2016	100% Airports Authority/ 0% Airlines	\$40 million
2017	55% Airports Authority/ 45% Airlines	\$35 million
2018	55% Airports Authority/ 45% Airlines	\$30 million
2019 through 2023	45% Airports Authority/ 55% Airlines	\$25 million
2024	NRR allocation between the Airports Authority and the Airlines, as well as any limitation on the use of the Airports Authority’s share at Dulles International Airport, to be described in a new airport use and lease agreement, which would be effective in 2025, or, if none, in accordance with the allocation for NRR generated in 2023, as described above.	

The amount of NRR for Dulles International Airport is divided equally between the Airports Authority and the Signatory Airlines up to a plateau amount of \$15.6 million (in 2014 dollars), which amount is subject to annual escalation in accordance with the index set forth in the Airline Agreement. The remainder is then split with 25% allocated to the Airports Authority and 75% allocated to the Signatory Airlines. NRR generated in the final year of the Airline Agreement at each Airport will be allocated between the Airports Authority and the Signatory Airlines either in accordance with a new airport use and lease agreement applicable to the Airport or if no agreement, substantially in accordance with the methodology set forth in the Airline Agreement for the immediately preceding Fiscal Year.

In addition, the Airports Authority's share of NRR from Reagan National Airport is to be increased in the event any new legislation is enacted which allows additional non-stop flights to and from Reagan National Airport in excess of the 1,250 mile perimeter. For each new pair of beyond-perimeter flights, the Airports Authority will be entitled to \$1.5 million from NRR at Reagan National Airport, before any sharing of NRR occurs with the Signatory Airlines.

AIRLINE RENTALS, FEES AND CHARGES

Terminal Rentals for Premises are charged to each of the Signatory Airlines on a square footage basis. These rentals are calculated by first determining the Terminal Sub-Center Net Requirement for the Signatory Airlines' share of each Terminal Sub-Center. This amount is then reduced by Transfers allocable to such Sub-Center to determine the adjusted requirement. An average rental rate per square foot is determined for each Terminal Sub-Center by dividing this adjusted requirement by the total square footage of rentable area in that Sub-Center. This average rental rate is then weighted for the various types of Signatory Airline space within each Terminal Sub-Center, and these weighted rates are applied to the Signatory Airlines' rented space to determine the amount of Terminal Rentals.

Landing Fees are charged to the Signatory Airlines on the basis of landed weight of aircraft. The Airfield Net Requirement for each Airport is determined by subtracting Transfers and certain other Revenues allocable to the Airfield from the Total Requirement of the Airfield. The Landing Fee rate is calculated by dividing each Airport's Airfield Net Requirement by the total estimated landed weight of aircraft of all air transportation companies and general aviation operating at that Airport. Each Signatory Airline pays Landing Fees which are determined as the product of the appropriate Airport's Landing Fee rate and such Signatory Airline's total landed weight. Each Signatory Airline also pays Common Use Charges (or, if the Signatory Airline is a commuter airline and its number of Enplaning Passengers is below a certain threshold, Low Volume Common Use Fees), Equipment Charges and, at Dulles International Airport, Passenger Conveyance Charges, Ramp Area Charges and FIS charges.

COMMITMENT TO PAY AIRPORT FEES AND CHARGES

The Airports Authority shall include in the calculation of rentals, fees and charges at an Airport Extraordinary Coverage Protection Payments if and to the extent necessary to ensure that total Revenues of that Airport, plus Transfers from the previous year, less Operation and Maintenance Expenses at the Airport, are at least equal to 125% of the Debt Service on Senior Bonds and Subordinated Bonds at the Airport.

MAJORITY-IN-INTEREST APPROVAL PROCEDURES

The Airports Authority shall initiate the Majority-in-Interest approval process in connection with certain Additional Projects that are to be debt-financed by delivering the request for approval to the Signatory Airlines at the appropriate Airport for the appropriate Cost Center. The request will be deemed to have been approved unless the Airports Authority receives, within thirty (30) days, written notice of disapproval from the Signatory Airlines representing a Majority-in-Interest at such Airport for such cost center. (See the section below entitled “Additional Projects” for further discussion of Majority-in-Interest procedures.)

BILLING OF AIRPORT FEES AND CHARGES

Approximately sixty days prior to the end of each Fiscal Year, the Airports Authority is required to notify the Signatory Airlines of the estimated rates for rentals, fees and charges for the next ensuing Fiscal Year. Such rates are based on estimates of the activity at each Airport during that Fiscal Year, O&M Expenses budgeted for the Fiscal Year, and estimates of Transfers, Capital Charges, Debt Service Coverage, Federal Lease payments, and other costs in the Fiscal Year. Rentals for Exclusive, Preferential, and Joint Use Premises, Common Use Charges, Passenger Conveyance Charges, Equipment Charges, and Aircraft Parking Position Charges are due and payable in advance, without demand or invoice, on the first calendar day of each month. Payment for Landing Fees, Low Volume Common Use Fees, Dulles International Airport Jet Apron Fees, and FIS Charges for each month are due and payable on the tenth calendar day of the next month without demand or invoice.

Payment for all other fees and charges under the Airline Agreement are due within twenty days of the date of the Airports Authority’s invoice for such fees and charges. The Airports Authority is required to make an annual adjustment to Signatory Airlines’ rentals, fees and charges, effective on the first day of each Fiscal Year. The Airports Authority is authorized, but not required, to make a mid-year adjustment to the Signatory Airlines’ rentals, fees and charges if warranted by revised estimates of activity and costs, and the impact of the prior Fiscal Year audits, at the Airports. The Airports Authority may also adjust Signatory Airlines’ rentals, fees, and charges at any time under certain circumstances, including when it is projected that total rentals, fees and charges at their current rates would vary by more than five percent from the total rentals, fees and charges that would be payable if rates were based on more current financial and activity data then available. The rental, fees and charges payable by the Signatory Airlines may also be recalculated and increased as appropriate as Projects in the Capital Construction Program are completed and as their costs become allocable to the Airline Supported Areas.

GRANT OF RIGHTS; OBLIGATIONS OF AIRPORTS AUTHORITY AND SIGNATORY AIRLINES

Each Signatory Airline is granted the right to operate its air transportation business at each Airport at which it is Signatory Airline and to perform all operations and functions incidental, necessary or proper thereto. The Airports Authority has agreed not to grant to any airline any rates or terms and conditions at the Airports more favorable to such airline than those granted or available to a Signatory Airline, unless the more favorable rates and conditions are offered to the Signatory Airlines. This grant includes the right to use, subject to certain restrictions, the Signatory Airline’s leased Premises and Equipment, the Common Use Premises and certain other support facilities at the Airports. Each of the Signatory Airlines and the Airports Authority have certain specified obligations with respect to the maintenance and operation of the Airports. The Airports Authority has certain

specified insurance obligations with respect to the Airports, and each Signatory Airline has certain public liability and property insurance obligations.

LEASE OF PREMISES; ACCOMMODATION PROVISIONS

Premises at each Airport are leased to the Signatory Airlines on an exclusive, preferential or joint use basis, although some space at Dulles International Airport is provided to Signatory Airlines by permit. The Airports Authority will have the right to periodically reallocate leased space as follows: 1) once every twenty-four months beginning on January 1, 2017 at Reagan National Airport; 2) once during calendar year 2017 and, thereafter, once every twenty-four months beginning on or after January 1, 2020 at Dulles International Airport; and 3) in accordance with a utilization study conducted by the Airports Authority. In addition, the Airports Authority has the right to require accommodation by a Signatory Airline of another airline on the Signatory Airline's leased Premises in order to meet the needs of expanding airlines and new entrants.

SUBLEASE AND ASSIGNMENT

All subleases and assignments of leased Premises, and handling agreements, must be approved by the Airports Authority. No sublease, voluntary assignment or handling agreement relieves a Signatory Airline from primary liability for the payment of rentals, fees and charges.

NO ABATEMENT OR SUSPENSION OF PAYMENTS

The Airline Agreement provides that the Signatory Airlines shall not abate, suspend, postpone, set-off or discontinue any payments of Airport rentals, fees and charges which they are obligated to pay thereunder if such abatement would interfere with the Airports Authority's ability to meet the rate covenant or any additional bonds test under the Indenture.

CAPITAL CONSTRUCTION PROGRAM

The Airline Agreement contains as exhibits thereto a list of Projects which were approved by the Signatory Airlines under the prior Airline Agreement and new Projects approved by the Signatory Airlines under the new Airline Agreement, as amended by the First Universal Amendment, including the Five CCP Projects at Reagan National Airport. The Airports Authority may issue Bonds to fund the Capital Construction Program and, to the extent Bond proceeds are available, has covenanted to build the Projects of the Capital Construction Program. So long as the cost of the Capital Construction Program does not exceed the Original Cost Estimate, adjusted for inflation and airline approved scope changes, plus an agreed upon contingency (25% at Reagan National Airport; 25% at Dulles International Airport), no further Signatory Airline approvals are required. If the cost exceeds that amount, certain cost control measures apply, and, under certain circumstances, Signatory Airline approvals may be required.

ADDITIONAL PROJECTS

The Airports Authority may build projects at the Airports in addition to those in the Capital Construction Program ("Additional Projects") from funds in the Airports Authority Capital Fund or from the proceeds of Bonds. Except as described in the following sentence, Additional Projects are not subject to Signatory Airline approval. An Additional Project which is in Airline Supported Areas

and which is to be funded from the proceeds of Bonds may be undertaken by the Airports Authority without any Majority-in-Interest or other approval of the Airlines in such Airline Supported Areas if (i) the project falls within certain specified types of projects (e.g., safety projects, replacement of airport capacity projects, government required projects, fully Federal funded Airfield projects) or (ii) the estimated cost of the project is less than \$40,000,000.

If an Additional Project is not within one of the two specified categories above, then the Airports Authority may issue Bonds to fund the project if Majority-in-Interest approval is obtained for the project. In the event such an Additional Project receives a Majority-in-Interest disapproval, the Airports Authority may only issue Bonds to fund the project if it defers the issuance of such Bonds for one year from the date of Majority-in-Interest disapproval; thereafter, the Airports Authority may issue such Bonds and proceed with the project (i) after obtaining Majority-in-Interest approval, or (ii) after requesting but not obtaining Majority-in-Interest approval, the Airports Authority gives each Signatory Airline affected by the Bond issuance a sixty-day option to terminate the Airline Agreement upon 180 days written notice to the Airports Authority.

DULLES TOLL ROAD AND RAIL SYSTEM TO DULLES INTERNATIONAL AIRPORT

The Airline Agreement provides, that unless and until additional costs are agreed upon in writing by the Majority-in-Interest of the Signatory Airlines at Dulles International Airport for the Airfield Cost Center, the aggregate of all capital costs of any Rail System to Dulles which the Airports Authority may pay from Revenues is \$10,000,000, and that all such costs are to be allocated to the Ground Transportation Cost Center at Dulles International Airport. Further, the agreement provides that no operation and maintenance costs associated with any Rail System to Dulles may be paid from Revenues (other than from the Airports Authority's share of NRR in the Airports Authority's Capital Fund), unless otherwise agreed to in writing by the Majority-in-Interest of Signatory Airlines at Dulles International Airport for the Airfield Cost Center.

The Airline Agreement also provides (i) that each Airline disclaims any right to share in the revenue of the Dulles Toll Road, (ii) that any expenditure by the Airports Authority of Dulles Toll Road revenue, or other funds not constituting Revenues, to acquire, operate, maintain and improve the Dulles Toll Road and to plan, design, construct and operate and maintain the Rail System to Dulles will not be a Project or an Additional Project within the Airline Supported Areas, will not require any approval by the Airline, and may not be recovered through rentals, fees and charges of an Airline, and (iii) that no Airline will be responsible to the Airports Authority or to any holder of Dulles Toll Road Revenue Bonds for the payment of principal and interest on any such bonds.

DEFAULT BY SIGNATORY AIRLINES

The following, among others, are defined as Events of Default: (1) the failure of a Signatory Airline to pay any rentals, fees or charges when due or after the expiration of any applicable grace period; (2) the dissolution, receivership, insolvency or bankruptcy of a Signatory Airline; (3) the discontinuance by a Signatory Airline of its air transportation business at the Airports; (4) the failure by a Signatory Airline to cure its default in the performance of any material covenant or provision in the Airline Agreement upon thirty days of receipt of notice of such failure or, if impossible to cure within such time, the failure to diligently pursue steps to cure within a reasonable period of time; (5) the failure of a Signatory Airline to cease any unauthorized business, practice, or act within thirty days of receipt of notice from the Airports Authority to do so; or (6) the taking of any appropriate

judicial or governmental action which substantially limits or prohibits a Signatory Airline's operations at the Airports for a period of thirty days.

SUBORDINATION TO INDENTURE

The Airline Agreement and all rights granted to the Signatory Airlines under it are expressly subordinated and subject to the lien and provisions of the pledges made by the Airports Authority in any prior Indenture, or any Indenture executed by the Airports Authority after the Airline Agreement, to issue Bonds.

TERMINATION

The Airports Authority may terminate a Signatory Airline's Agreement upon the happening of certain Events of Default, and the expiration of any cure period as described in the Airline Agreement. So long as Bonds are outstanding, a Signatory Airline has no right to terminate its Airline Agreement other than as described under "Term" and "Additional Projects" above.

APPENDIX D

BOOK-ENTRY ONLY SYSTEM

INFORMATION REGARDING DTC AND THE BOOK-ENTRY ONLY SYSTEM

The description that follows of the procedures and record keeping with respect to beneficial ownership interests in the Series 2018A Bonds, payments of principal, premium, if any, and interest on the Series 2018A Bonds to DTC, its nominee, Participants, defined below, or Beneficial Owners, defined below, confirmation and transfer of beneficial ownership interests in the Series 2018A Bonds and other bond-related transactions by and between DTC, Participants and Beneficial Owners is based solely on information furnished by DTC, and neither the Airports Authority, the Trustee, nor the Underwriters make any representation as to the accuracy of such information.

General. The Depository Trust Company, New York, New York (“DTC”) will act as securities depository for the Series 2018A Bonds. The Series 2018A Bonds will be issued as fully-registered securities registered in the name of Cede & Co. (DTC’s partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully-registered Series 2018A Bond will be issued for each maturity of the Series 2018A Bonds in the aggregate principal amount of such maturity, and will be deposited with DTC.

DTC, the world’s largest securities depository, is a limited-purpose trust company organized under the New York Banking Law, a “banking organization” within the meaning of the New York Banking Law, a member of the Federal Reserve System, a “clearing corporation” within the meaning of the New York Uniform Commercial Code, and a “clearing agency” registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC’s participants (“Direct Participants”) deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions through electronic computerized book-entry transfers and pledges between Direct Participants’ accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation (“DTCC”). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly (“Indirect Participants”). DTC has Standard & Poor’s rating of “AA+”. The DTC Rules applicable to DTC and its Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www.dtcc.com.

Purchases of Series 2018A Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for such Series 2018A Bonds on DTC’s records. The ownership interest of each actual purchaser of each Series 2018A Bond (“Beneficial Owner”) is in turn to be recorded on the Direct and Indirect Participants’ records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of

their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Series 2018A Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Series 2018A Bonds, except in the event that use of the book-entry system for the Series 2018A Bonds is discontinued.

To facilitate subsequent transfers, all Series 2018A Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co, or such other name as may be requested by an authorized representative of DTC. The deposit of Series 2018A Bonds with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not affect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Series 2018A Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such Series 2018A Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Redemption notices will be sent to DTC. If less than all of the Series 2018A Bonds within an issue are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the Series 2018A Bonds unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the Airports Authority as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the Series 2018A Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Redemption proceeds, distributions and dividend payments on the Series 2018A Bonds will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the Airports Authority or the Trustee, on payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, the Trustee, or the Airports Authority, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, distributions, and dividend payments to Cede & Co. (or such other nominee as may be requested by the authorized representative of DTC) is the responsibility of the Airports Authority or the Trustee, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

DTC may discontinue providing its services as depository with respect to the Series 2018A Bonds at any time by giving reasonable notice to the Airports Authority or the Trustee. Under such circumstances, in the event that a successor securities depository is not obtained, Series 2018A Bond certificates are required to be printed and delivered. The Airports Authority may decide to discontinue use of the system of book-entry-only transfers through DTC (or a successor securities depository). In that event, Series 2018A Bond certificates will be printed and delivered.

So long as Cede & Co. is the registered owner of the Series 2018A Bonds, as nominee for DTC, references herein to Bondholders or registered owners of the Series 2018A Bonds shall mean Cede & Co., as aforesaid, and shall not mean the Beneficial Owners of the Series 2018A Bonds.

NEITHER THE AIRPORTS AUTHORITY NOR THE TRUSTEE WILL HAVE ANY RESPONSIBILITY OR OBLIGATION TO DTC PARTICIPANTS, TO INDIRECT PARTICIPANTS, OR TO ANY BENEFICIAL OWNER WITH RESPECT TO (i) THE ACCURACY OF ANY RECORDS MAINTAINED BY DTC, ANY DTC PARTICIPANT, OR ANY INDIRECT PARTICIPANT; (ii) ANY NOTICE THAT IS PERMITTED OR REQUIRED TO BE GIVEN TO THE OWNERS OF THE SERIES 2018A BONDS UNDER THE INDENTURE; (iii) THE PAYMENT BY DTC OR ANY DTC PARTICIPANT OR INDIRECT PARTICIPANT OF ANY AMOUNT WITH RESPECT TO THE PRINCIPAL OR INTEREST DUE WITH RESPECT TO THE SERIES 2018A BONDS; (iv) ANY CONSENT GIVEN OR OTHER ACTION TAKEN BY DTC AS THE OWNER OF SERIES 2018A BONDS; OR (v) ANY OTHER MATTER.

(THIS PAGE IS INTENTIONALLY LEFT BLANK)

APPENDIX E

FORM OF OPINION OF BOND COUNSEL

July 3, 2018

To: Metropolitan Washington Airports Authority
Washington, D.C.

We have served as bond counsel to our client the Metropolitan Washington Airports Authority (the “Airports Authority”) in connection with the issuance by the Airports Authority of its \$558,430,000 Airport System Revenue and Refunding Bonds, Series 2018A (AMT) (the “Series 2018A Bonds”), dated the date of this letter.

The Series 2018A Bonds are issued pursuant to the authority of Va. Code Ann. § 5.1-152 et. seq. (2001) (codifying Chapter 598 of the Acts of Virginia General Assembly of 1985, as amended) and the District of Columbia Regional Airports Authority Act of 1985, as amended, codified at D.C. Official Code Ann. § 9-901 et. seq. (2001) (together, the “Acts”), the Metropolitan Washington Airports Act of 1986 (Title VI of Public Law 99-500 as re-enacted in Public Law 99-591, effective October 18, 1986, as amended) codified at 49 U.S.C. § 49101 et. seq. (the “Federal Act”), and Resolution No. 18-7, adopted by the Board of Directors of the Airports Authority (the “Board of Directors”) on May 16, 2018 (the “Resolution”), as supplemented by a Pricing Certificate dated May 31, 2018 (the “Pricing Certificate”), executed by the Chairman of the Board of Directors and one of the Co-Chairs of the Finance Committee of the Board of Directors (the Resolution and the Pricing Certificate together, the “Authorizing Resolution”). The Series 2018A Bonds are issued and secured under the Amended and Restated Master Indenture of Trust dated as of September 1, 2001, as amended (the “Master Indenture”), between the Airports Authority and Manufacturers and Traders Trust Company, as trustee (the “Trustee”), as supplemented by the Fiftieth Supplemental Indenture of Trust dated as of July 1, 2018 (the “Fiftieth Supplemental Indenture” and, together with the Master Indenture, the “Indenture”), between the Airports Authority and the Trustee. Capitalized terms not otherwise defined in this letter are used as defined in the Indenture.

In our capacity as bond counsel, we have examined the transcript of proceedings relating to the issuance of the Series 2018A Bonds, the signed and authenticated Bond of the first maturity of the Series 2018A Bonds, the Authorizing Resolution, an executed counterpart of the Master Indenture, an executed counterpart of the Fiftieth Supplemental Indenture, and such other documents, matters and law as we deem necessary to render the opinions set forth in this letter.

Based on that examination and subject to the limitations stated below, we are of the opinion that under existing law:

1. The Series 2018A Bonds and the Indenture are valid and binding obligations of the Airports Authority, enforceable in accordance with their respective terms.

2. The Series 2018A Bonds constitute limited obligations of the Airports Authority, and the principal of and interest on (collectively, “debt service”) the Series 2018A Bonds, together with debt service on any other Bonds issued and outstanding on a parity with the Series 2018A Bonds as provided in the Master Indenture, are payable from and secured solely by the Net Revenues and other sources provided therefor in the Indenture. The payment of debt service on the Series 2018A Bonds is not secured by an obligation or pledge of any money raised by taxation, and the Series 2018A Bonds do not represent or constitute a general obligation or a pledge of the faith and credit of the Airports Authority, the Commonwealth of Virginia or the District of Columbia or any political subdivision thereof. The Airports Authority has no taxing power.
3. Interest on the Series 2018A Bonds is excluded from gross income for federal income tax purposes under Section 103 of the Internal Revenue Code of 1986, as amended (the “Code”), except interest on any Series 2018A Bond for any period during which it is held by a “substantial user” or a “related person,” as those terms are used in Section 147(a) of the Code. Interest on the Series 2018A Bonds is an item of tax preference under Section 57 of the Code and therefore may be subject to the alternative minimum tax imposed under the Code on individuals and, for taxable years beginning before January 1, 2018, corporations. Interest on the Series 2018A Bonds is exempt from income taxation by the Commonwealth of Virginia and is exempt from all taxation by the District of Columbia, except estate, inheritance and gift taxes. We express no opinion as to any other tax consequences regarding the Series 2018A Bonds.

The opinions stated above are based on an analysis of existing laws, regulations, rulings and court decisions and cover certain matters not directly addressed by such authorities. In rendering all such opinions, we assume, without independent verification, and rely upon (i) the accuracy of the factual matters represented, warranted or certified in the proceedings and documents we have examined, (ii) the due and legal authorization, execution and delivery of those documents by, and the valid, binding and enforceable nature of those documents upon, any parties other than the Airports Authority and (iii) the due authorization, signing and delivery by, and the binding effect upon and enforceability against, the Trustee of the Indenture.

We express no opinion herein regarding the priority of the lien on the Net Revenues or other funds created by the Indenture.

In rendering those opinions with respect to treatment of the interest on the Series 2018A Bonds under the federal tax laws, we further assume and rely upon compliance with the covenants in the proceedings and documents we have examined, including those of the Airports Authority. Failure to comply with certain of those covenants subsequent to issuance of the Series 2018A Bonds may cause interest on the Series 2018A Bonds to be included in gross income for federal income tax purposes retroactively to their date of issuance.

The rights of the owners of the Series 2018A Bonds and the enforceability of the Series 2018A Bonds and the Indenture are subject to bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or transfer, and other laws relating to or affecting the rights

and remedies of creditors generally; to the application of equitable principles, whether considered in a proceeding at law or in equity; to the exercise of judicial discretion; and to limitations on legal remedies against public entities.

No opinions other than those expressly stated herein are implied or shall be inferred as a result of anything contained in or omitted from this letter. The opinions expressed in this letter are stated only as of the time of its delivery and we disclaim any obligation to revise or supplement this letter thereafter. Our engagement as bond counsel in connection with the original issuance and delivery of the Series 2018A Bonds is concluded upon delivery of this letter.

Respectfully submitted,

(THIS PAGE IS INTENTIONALLY LEFT BLANK)

APPENDIX F

FORM OF CONTINUING DISCLOSURE AGREEMENT, AS AMENDED

NOTICE OF AMENDMENT TO CONTINUING DISCLOSURE AGREEMENT

and

SECOND AMENDMENT TO CONTINUING DISCLOSURE AGREEMENT

Effective Date: December 1, 2010

This NOTICE OF SECOND AMENDMENT TO CONTINUING DISCLOSURE AGREEMENT is provided pursuant to Section 12 of the Continuing Disclosure Agreement dated as of June 1, 2002 executed and delivered by the Metropolitan Washington Airports Authority (the “Issuer”) and Digital Assurance Certification, L.L.C. (the “Disclosure Dissemination Agent”), as amended by the Amendment to Continuing Disclosure Agreement dated as of June 1, 2009 (the “Disclosure Agreement”). As provided in Section 12 of the Disclosure Agreement, the Disclosure Agreement will be amended as provided below as of December 1, 2010 unless you provide written objection to us within 20 days of the delivery of this notice.

SECOND AMENDMENT TO CONTINUING DISCLOSURE AGREEMENT

1. Section 2(e)(iv) of the Disclosure Agreement is deleted in its entirety and replaced with the following:

“upon receipt, promptly electronically file the text of the disclosure of the following events with the MSRB through its Electronic Municipal Market Access System and the State Depository (if any):

1. “Principal and interest payment delinquencies;”
2. “Non-Payment related defaults, if material;”
3. “Unscheduled draws on debt service reserves reflecting financial difficulties;”
4. “Unscheduled draws on credit enhancements reflecting financial difficulties;”
5. “Substitution of credit or liquidity providers, or their failure to perform;”

6. “Adverse tax opinions, IRS notices or events affecting the tax status of the security;”
7. “Modifications to rights of securities holders, if material;”
8. “Bond calls, if material;”
9. “Defeasances;”
10. “Release, substitution, or sale of property securing repayment of the securities, if material;”
11. “Rating changes;”
12. “Tender offers;”
13. “Bankruptcy, insolvency, receivership or similar event of the obligated person;”
14. “Merger, consolidation, or acquisition of the obligated person, if material;” and
15. “Appointment of a successor or additional trustee, or the change of name of a trustee, if material;”“

2. Section 4(a) of the Disclosure Agreement is deleted in its entirety and replaced with the following:

“(a) The occurrence of any of the following events with respect to the Bonds constitutes a Notice Event:

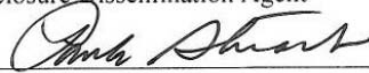

1. “Principal and interest payment delinquencies;”
2. “Non-Payment related defaults, if material;”
3. “Unscheduled draws on debt service reserves reflecting financial difficulties;”
4. “Unscheduled draws on credit enhancements reflecting financial difficulties;”
5. “Substitution of credit or liquidity providers, or their failure to perform;”
6. “Adverse tax opinions, IRS notices or events affecting the tax status of the security;”
7. “Modifications to rights of securities holders, if material;”
8. “Bond calls, if material;”

9. “Defeasances;”
10. “Release, substitution, or sale of property securing repayment of the securities, if material;”
11. “Rating changes;”
12. “Tender offers;”
13. “Bankruptcy, insolvency, receivership or similar event of the obligated person;”
14. “Merger, consolidation, or acquisition of the obligated person, if material;” and
15. “Appointment of a successor or additional trustee, or the change of name of a trustee, if material;”“

3. Section 4(c) of the Disclosure Agreement is deleted in its entirety and replaced with the following:

“(c) The Issuer shall instruct the Disclosure Dissemination Agent to report the occurrence of a Notice Event within ten (10) business days of the occurrence of such event. If the Disclosure Dissemination Agent has been instructed by the Issuer as prescribed in subsection (a) or (b)(ii) of this Section 4 to report the occurrence of a Notice Event, the Disclosure Dissemination Agent shall promptly file a notice of such occurrence with the State Depository (if any) and the MSRB.”

NOTICE OF AMENDMENT TO CONTINUING DISCLOSURE AGREEMENT

and

AMENDMENT TO CONTINUING DISCLOSURE AGREEMENT

DATED: June 1, 2009

This NOTICE OF AMENDMENT TO CONTINUING DISCLOSURE AGREEMENT is provided to you pursuant to Section 12 of the Continuing Disclosure Agreement (the “Disclosure Agreement”), dated as of June 1, 2002 executed and delivered by the Metropolitan Washington Airports Authority (the “Issuer”) and Digital Assurance Certification, L.L.C. (the “Disclosure Dissemination Agent”). As provided in Section 12 of the Disclosure Agreement, the Disclosure Agreement will be amended as provided below as of June 1, 2009 unless you provide written objection to us within 10 days of the dated date stated above.

AMENDMENT TO CONTINUING DISCLOSURE AGREEMENT

The Disclosure Agreement is amended as follows:

1. Amendments to Section 1. Definitions.

(a) The following definition shall be added:

“Effective Date” means July 1, 2009, or such later date as the Securities and Exchange Commission shall state as the effective date for the amendments to the Rule pursuant to Release No. 34-59062 (Dec. 5, 2008).

(b) The first two sentences of the term “National Repository” are amended to read:

“National Repository” means, prior to the Effective Date, any Nationally Recognized Municipal Securities Information Repository for purposes of the Rule, and thereafter the MSRB. Prior to the Effective Date, the list of National Repositories maintained by the United States Securities and Exchange Commission shall be conclusive for purposes of determining National Repositories.

2. Date Amendments to take Effect.

The amendments to the Disclosure Agreement provided in this notice shall take effect June 1, 2009.

The Disclosure Dissemination Agent has caused this Amendment to Continuing Disclosure Agreement to be executed, on the date first written above, by an officer duly authorized.

DIGITAL ASSURANCE CERTIFICATION, L.L.C., as Disclosure Dissemination Agent

By: 
Name: Paula Stuart
Title: Chief Executive Officer

This Continuing Disclosure Agreement (the “Disclosure Agreement”), dated as of June 1, 2002, is executed and delivered by Metropolitan Washington Airports Authority (the “Issuer”), and Digital Assurance Certification, L.L.C., as exclusive Disclosure Dissemination Agent (the “Disclosure Dissemination Agent” or “DAC”) for the benefit of the Holders and Underwriters (hereinafter defined) of the Bonds (hereinafter defined) and in order to provide certain continuing disclosure with respect to the Bonds in accordance with Rule 15c2-12 of the United States Securities and Exchange Commission under the Securities Exchange Act of 1934, as the same may be amended from time to time (the “Rule”).

SECTION 1. Definitions. Capitalized terms not otherwise defined in this Disclosure Agreement shall have the meaning assigned in the Rule or, to the extent not in conflict with the Rule, in the Official Statement (hereinafter defined). The capitalized terms shall have the following meanings:

“Annual Report” means an Annual Report of the Issuer, as described in and consistent with Section 3 of this Disclosure Agreement.

“Annual Filing Date” means the date, set in Sections 2(a) and 2(f), by which the Annual Report is to be filed with the Repositories.

“Annual Financial Information” means annual financial information as such term is used in paragraph (b)(5)(i) of the Rule and specified in Section 3(a) of this Disclosure Agreement.

“Audited Financial Statements” means the financial statements (if any) of the Issuer, for the prior fiscal year, certified by an independent auditor as prepared in accordance with generally accepted accounting principles or otherwise, as such term is used in paragraph (b)(5)(i) of the Rule and specified in Section 3(b) of this Disclosure Agreement.

“Bonds” means the bonds as listed on the attached Exhibit A, as supplemented from time to time by the Issuer.

“Certification” means a written certification of compliance signed by the Disclosure Representative stating that the Annual Report, Audited Financial Statements, Voluntary Report or Notice Event notice delivered to the Disclosure Dissemination Agent is the Annual Report, Audited Financial Statements, Voluntary Report or Notice Event notice required to be submitted to the Repositories under this Disclosure Agreement. A Certification shall accompany each such document submitted to the Disclosure Dissemination Agent by the Issuer and include the full name of the Bonds and the 9-digit CUSIP numbers for all Bonds to which the document applies.

“Disclosure Representative” means the Chief Financial Officer of the Issuer or his or her designee, or such other person as the Issuer shall designate in writing to the Disclosure Dissemination Agent from time to time as the person responsible for providing Information to the Disclosure Dissemination Agent.

“Disclosure Dissemination Agent” or “DAC” means Digital Assurance Certification, L.L.C, acting in its capacity as Disclosure Dissemination Agent hereunder, or any successor Disclosure Dissemination Agent designated in writing by the Issuer pursuant to Section 9 hereof.

“Holder” means any person (a) having the power, directly or indirectly, to vote or consent with respect to, or to dispose of ownership of, any Bonds (including persons holding Bonds through

nominees, depositories or other intermediaries) or (b) treated as the owner of any Bonds for federal income tax purposes.

“Information” means the Annual Financial Information, the Audited Financial Statements (if any), the Notice Event notices, and the Voluntary Reports.

“Issue” means the Bonds offered in the corresponding Official Statement listed in Exhibit A.

“Notice Event” means an event listed in Sections 4(a) of this Disclosure Agreement.

“MSRB” means the Municipal Securities Rulemaking Board established pursuant to Section 15B(b)(1) of the Securities Exchange Act of 1934.

“National Repository” means any Nationally Recognized Municipal Securities Information Repository for purposes of the Rule. The list of National Repositories maintained by the United States Securities and Exchange Commission shall be conclusive for purposes of determining National Repositories. Currently, the following are National Repositories:

1. DPC Data Inc.
One Executive Drive
Fort Lee, New Jersey 07024
(201) 346-0701 (phone)
(201) 947-0107 (fax)
Email: nrmsir@dpcdata.com
2. Interactive Data
Attn: Repository
100 Williams Street
New York, New York 10038
(212) 771-6999 (phone)
(212) 771-7390 (fax for secondary market information)
(212) 771-7391 (fax for primary market information)
Email: NRMSIR@FTID.com
3. Bloomberg Municipal Repositories
P.O. Box 840
Princeton, New Jersey 08542-0840

(212) 438-3975 (fax)
Email: nrmsir_repository@sandp.com

“Obligated Person” has the meaning provided in the Rule, including the Issuer and each person identified as such for an Issue in Exhibit A or in any Annual Report. The term shall include, unless otherwise provided by the Rule, each airline or other entity using the airport facilities of the Issuer under a lease or use agreement extending for more than one year from the date in question and including bond debt service as part of the calculation of rates and charges, under which lease or use agreement such airline or other entity has paid amounts equal to at least 20% of the Revenues (as defined in the Master Trust Indenture pursuant to which the Bonds are issued) of the Issuer for each of the two prior fiscal years of the Issuer.

“Official Statement” means that Official Statement prepared by the Issuer in connection with each respective issue of Bonds, as listed on Exhibit A.

“Repository” means the MSRB, each National Repository and the State Depository (if any).

“State Depository” means any public or private depository or entity designated by the Commonwealth of Virginia, as a state information depository (if any) for the purpose of the Rule. The list of state information depositories maintained by the United States Securities and Exchange Commission shall be conclusive as to the existence of a State Depository.

“Underwriters” means the underwriters of any Issue, as listed in Exhibit A.

“Voluntary Report” means the information provided to the Disclosure Dissemination Agent by the Issuer pursuant to Section 7.

SECTION 2. Provision of Annual Reports.

(a) The 150th day after the end of each fiscal year of the Issuer, commencing with the fiscal year ending December 31, 2002 and each anniversary thereof is the Annual Filing Date. The Issuer shall provide, annually, an electronic copy of the Annual Report and Certification to the Disclosure Dissemination Agent not later than one (1) business day prior to the Annual Filing Date. Promptly upon receipt of an electronic copy of the Annual Report and the Certification, the Disclosure Dissemination Agent shall provide an Annual Report to each National Repository and the State Depository (if any). The Annual Report may be submitted as a single document or as separate documents comprising a package, and may cross-reference other information as provided in Section 3 of this Disclosure Agreement.

(b) If on the fifteenth (15th) day prior to the Annual Filing Date, the Disclosure Dissemination Agent has not received a copy of an Annual Report and Certification, the Disclosure Dissemination Agent shall contact the Disclosure Representative by telephone and in writing (which shall be by facsimile and e-mail) to remind the Issuer of its undertaking to provide the Annual Report pursuant to Section 2(a). Upon such reminder, the Disclosure Representative shall either (i) provide the Disclosure Dissemination Agent with an electronic copy of the Annual Report and the Certification no later than one (1) business day prior to the Annual Filing Date, or (ii) instruct the Disclosure Dissemination Agent in writing that the Issuer will not be able to file the Annual Report within the time required under this Disclosure Agreement, state the date by which the Annual Report for such year will be provided and instruct the Disclosure Dissemination Agent that a Notice Event as described in Section 4(a)(12) has occurred and to immediately send a notice to the MSRB and the State Depository (if any) in substantially the form attached as Exhibit B.

(c) If the Disclosure Dissemination Agent has not received an Annual Report and Certification by 12:00 noon on the first business day following the Annual Filing Date for the Annual Report, a Notice Event described in Section 4(a)(12) shall have occurred and the Issuer irrevocably directs the Disclosure Dissemination Agent to immediately send a notice to the MSRB and the State Depository (if any) in substantially the form attached as Exhibit B.

(d) If Audited Financial Statements of the Issuer are prepared but not available prior to the Annual Filing Date, the Issuer shall, when the Audited Financial Statements are available, provide in a timely manner an electronic copy to the Disclosure Dissemination Agent, accompanied by a Certificate for filing with each National Repository and the State Depository (if any).

(e) The Disclosure Dissemination Agent shall:

- (i) determine the name and address of each Repository each year prior to the Annual Filing Date;
- (ii) upon receipt, promptly file each Annual Report received under Section 2(a) with each National Repository, and the State Depository, (if any);
- (iii) upon receipt, promptly file each Audited Financial Statement received under Section 2(d) with each National Repository, and the State Depository (if any);
- (iv) upon receipt, promptly file the text of each disclosure to be made with the MSRB and the State Depository (if any) together with a completed copy of the MSRB Material Event Notice Cover Sheet in the form attached as Exhibit C, describing the event by checking the box indicated below when filing pursuant to the Section of this Disclosure Agreement indicated below:
 1. “Principal and interest payment delinquencies,” pursuant to Sections 4(c) and 4(a)(1);
 2. “Non-Payment related defaults,” pursuant to Sections 4(c) and 4(a)(2);
 3. “Unscheduled draws on debt service reserves reflecting financial difficulties,” pursuant to Sections 4(c) and 4(a)(3);
 4. “Unscheduled draws on credit enhancements reflecting financial difficulties,” pursuant to Sections 4(c) and 4(a)(4);
 5. “Substitution of credit or liquidity providers, or their failure to perform,” pursuant to Sections 4(c) and 4(a)(5);
 6. “Adverse tax opinions or events affecting the tax-exempt status of the security,” pursuant to Sections 4(c) and 4(a)(6);
 7. “Modifications to rights of securities holders,” pursuant to Sections 4(c) and 4(a)(7);
 8. “Bond calls,” pursuant to Sections 4(c) and 4(a)(8);
 9. “Defeasances,” pursuant to Sections 4(c) and 4(a)(9);
 10. “Release, substitution, or sale of property securing repayment of the securities,” pursuant to Sections 4(c) and 4(a)(10);

11. "Ratings changes," pursuant to Sections 4(c) and 4(a)(11);
12. "Failure to provide annual financial information as required," pursuant to Section 2(b)(ii) or Section 2(c), together with a completed copy of Exhibit B to this Disclosure Agreement; and
13. "Other material event notice (specify)," pursuant to Section 7 of this Disclosure Agreement, together with the summary description provided by the Disclosure Representative.

(v) provide the Issuer evidence of the filings of each of the above when made, which shall be by means of the DAC system, for so long as DAC is the Disclosure Dissemination Agent under this Disclosure Agreement.

(f) The Issuer may adjust the Annual Filing Date upon change of its fiscal year by providing written notice of such change and the new Annual Filing Date to the Disclosure Dissemination Agent, and the Repositories, provided that the period between the existing Annual Filing Date and new Annual Filing Date shall not exceed one year.

SECTION 3. Content of Annual Reports.

(a) Each Annual Report shall contain Annual Financial Information with respect to the Issuer, including information of the types provided in the Official Statement under the headings for each Issue described in Exhibit A.

(b) Audited Financial Statements prepared in accordance with generally accepted accounting principles will be included in each Annual Report or otherwise provided pursuant to Section 2(d).

Any or all of the items listed above may be included by specific reference from other documents, including official statements of debt issues with respect to which the Issuer is an Obligated Person, which have been previously filed with each of the National Repositories or the Securities and Exchange Commission. If the document incorporated by reference is a final official statement, it must be available from the MSRB. The Issuer will clearly identify each such document so incorporated by reference.

SECTION 4. Reporting of Notice Events.

(a) The occurrence of any of the following events, if material, with respect to the Bonds constitutes a Notice Event:

1. Principal and interest payment delinquencies;
2. Non-payment related defaults;
3. Unscheduled draws on debt service reserves reflecting financial difficulties;
4. Unscheduled draws on credit enhancements relating to the Bonds reflecting financial difficulties;

5. Substitution of credit or liquidity providers, or their failure to perform;
6. Adverse tax opinions or events affecting the tax-exempt status of the Bonds;
7. Modifications to rights of Bondholders;
8. Bond calls;
9. Defeasances;
10. Release, substitution, or sale of property securing repayment of the Bonds;
and
11. Rating changes on the Bonds.

(a) The Issuer shall promptly notify the Disclosure Dissemination Agent in writing upon the occurrence of a Notice Event. Such notice shall instruct the Disclosure Dissemination Agent to report the occurrence pursuant to subsection (c). Such notice shall be accompanied with the text of the disclosure that the Issuer desires to make, the written authorization of the Issuer for the Disclosure Dissemination Agent to disseminate such information, and the date the Issuer desires for the Disclosure Dissemination Agent to disseminate the information. No such notice shall be deemed an official notice unless given or authorized by the Disclosure Representative; and no such notice of Notice Events described in (a)(8) above need be given any earlier than notice, if any, of the underlying event is given to the Holders of Bonds under the Master Indenture.

(b) The Disclosure Dissemination Agent is under no obligation to notify the Issuer or the Disclosure Representative of an event that may constitute a Notice Event. In the event the Disclosure Dissemination Agent so notifies the Disclosure Representative, the Disclosure Representative will within five business days of receipt of such notice, instruct the Disclosure Dissemination Agent that (i) a Notice Event has not occurred and no filing is to be made or (ii) a Notice Event has occurred and the Disclosure Dissemination Agent is to report the occurrence pursuant to subsection (c), together with the text of the disclosure that the Issuer desires to make, the written authorization of the Issuer for the Disclosure Dissemination Agent to disseminate such information, and the date the Issuer desires for the Disclosure Dissemination Agent to disseminate the information.

(c) If the Disclosure Dissemination Agent has been instructed by the Issuer as prescribed in subsection (a) or (b)(ii) of this Section 4 to report the occurrence of a Notice Event, the Disclosure Dissemination Agent shall promptly file a notice of such occurrence with the State Depository (if any) and the MSRB.

SECTION 5. CUSIP Numbers. Whenever providing information to the Disclosure Dissemination Agent, including but not limited to Annual Reports, documents incorporated by reference to the Annual Reports, Audited Financial Statements, notices of Notice Events, and Voluntary Reports filed pursuant to Section 7(a), the Issuer shall indicate the full name of the Bonds and the 9-digit CUSIP numbers for the Bonds as to which the provided information relates.

SECTION 6. Additional Disclosure Obligations. The failure by the Disclosure Dissemination Agent to advise the Issuer that state and federal laws, including securities laws and disclosure obligations thereunder, may apply to the Issuer shall not constitute a breach by the Disclosure Agent of any of its duties and responsibilities under this Disclosure Agreement. The

Issuer acknowledges and understands that the duties of the Disclosure Dissemination Agent relate exclusively to execution of the mechanical tasks of disseminating information as described in this Disclosure Agreement.

SECTION 7. Voluntary Reports.

(a) The Issuer may instruct the Disclosure Dissemination Agent to file information with the Repositories, from time to time pursuant to a Certification of the Disclosure Representative accompanying such information (a “Voluntary Report”).

(b) Nothing in this Disclosure Agreement shall be deemed to prevent the Issuer from disseminating any other information through the Disclosure Dissemination Agent using the means of dissemination set forth in this Disclosure Agreement or including any other information in any Annual Report, Annual Financial Statement, Voluntary Report or Notice Event notice, in addition to that required by this Disclosure Agreement. If the Issuer chooses to include any information in any Annual Report, Annual Financial Statement, Voluntary Report or Notice Event notice in addition to that which is specifically required by this Disclosure Agreement, the Issuer shall have no obligation under this Disclosure Agreement to update such information or include it in any future Annual Report, Annual Financial Statement, Voluntary Report or Notice Event notice.

SECTION 8. Termination of Reporting Obligation. The obligations of the Issuer and the Disclosure Dissemination Agent under this Disclosure Agreement shall terminate with respect to an issue of Bonds upon the legal defeasance, prior redemption or payment in full of all of the Bonds of such issue, when the Issuer is no longer an obligated person with respect to the Bonds, or upon delivery by the Disclosure Representative to the Disclosure Dissemination Agent of an opinion of nationally recognized bond counsel to the effect that continuing disclosure is no longer required.

SECTION 9. Disclosure Dissemination Agent. The Issuer has appointed Digital Assurance Certification, L.L.C. as exclusive Disclosure Dissemination Agent under this Disclosure Agreement. The Issuer may, upon thirty days written notice to the Disclosure Dissemination Agent and the Trustee, replace or appoint a successor Disclosure Dissemination Agent. Upon termination of DAC’s services as Disclosure Dissemination Agent, whether by notice of the Issuer or DAC, the Issuer agrees to appoint a successor Disclosure Dissemination Agent or, alternately, agrees to assume all responsibilities for compliance with disclosure requirements pursuant to the Rule performed by the Disclosure Dissemination Agent under this Disclosure Agreement for the benefit of the Holders and Underwriters of the Bonds. Notwithstanding any replacement or appointment of a successor, the Issuer shall remain liable until payment in full for any and all sums owed and payable to the Disclosure Dissemination Agent. The Disclosure Dissemination Agent may resign at any time by providing thirty days’ prior written notice to the Issuer.

SECTION 10. Remedies in Event of Default. If the Issuer fails to comply with any provision of this Disclosure Agreement, any Holder or Underwriter may take action in the Circuit Court of Arlington, Virginia to seek specific performance by court order to compel the Issuer to comply with its obligations under this Disclosure Agreement; provided that any Holder or Underwriter seeking to require compliance with this Disclosure Agreement shall first provide to the Disclosure Representative at least 30 days’ prior written notice of the Issuer’s failure, giving reasonable details of such failure, following which notice the Issuer shall have 30 days to comply. Any failure by a party to perform in accordance with this Disclosure Agreement shall not constitute a

default with respect to any Bonds or under any other document relating to any Bonds, and all rights and remedies shall be limited to those expressly stated herein.

SECTION 11. Duties, Immunities and Liabilities of Disclosure Dissemination Agent.

(a) The Disclosure Dissemination Agent shall have only such duties as are specifically set forth in this Disclosure Agreement. The Disclosure Dissemination Agent's obligation to deliver the information at the times and with the contents described herein shall be limited to the extent the Issuer has provided such information to the Disclosure Dissemination Agent as required by this Disclosure Agreement. The Disclosure Dissemination Agent shall have no duty with respect to the content of any disclosures or notice made pursuant to the terms hereof. The Disclosure Dissemination Agent shall have no duty or obligation to review or verify any Information or any other information, disclosures or notices provided to it by the Issuer and shall not be deemed to be acting in any fiduciary capacity for the Issuer, the Holders of the Bonds or any other party. The Disclosure Dissemination Agent shall have only such duties as are specifically set forth in this Disclosure Agreement. The Disclosure Dissemination Agent shall have no responsibility for the Issuer's failure to report to the Disclosure Dissemination Agent a Notice Event or a duty to determine the materiality thereof. The Disclosure Dissemination Agent shall have no duty to determine, or liability for failing to determine, whether the Issuer has complied with this Disclosure Agreement. The Disclosure Dissemination Agent may conclusively rely upon certifications of the Issuer at all times.

THE ISSUER AGREES TO INDEMNIFY AND SAVE THE DISCLOSURE DISSEMINATION AGENT AND ITS RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES AND AGENTS, HARMLESS AGAINST ANY LOSS, EXPENSE AND LIABILITIES WHICH THEY MAY INCUR ARISING OUT OF OR IN THE EXERCISE OR PERFORMANCE OF THEIR POWERS AND DUTIES HEREUNDER, INCLUDING (IF THE ISSUER IS FIRST GIVEN THE REASONABLE OPPORTUNITY TO DEFEND THE DISCLOSURE DISSEMINATION AGENT AGAINST THE SAME USING COUNSEL REASONABLY ACCEPTABLE TO DAC,) THE COSTS AND EXPENSES (INCLUDING ATTORNEYS FEES) OF DEFENDING AGAINST ANY CLAIM OF LIABILITY, BUT EXCLUDING LIABILITIES DUE TO THE DISCLOSURE DISSEMINATION AGENT'S GROSS NEGLIGENCE OR WILLFUL MISCONDUCT OR ITS FAILURE TO COMPLY WITH THE TERMS OF THIS DISCLOSURE AGREEMENT OR THE TERMS OF ITS ENGAGEMENT LETTER WITH THE ISSUER, DATED AS OF JUNE 1, 2002, AS THE SAME MAY BE AMENDED OR SUPPLEMENTED FROM TIME TO TIME.

The obligations of the Issuer under this Section shall survive resignation or removal of the Disclosure Dissemination Agent and defeasance, redemption or payment of the Bonds.

(b) The Disclosure Dissemination Agent may, from time to time, consult with legal counsel (either in-house or external) of its own choosing in the event of any disagreement or controversy, or question or doubt as to the construction of any of the provisions hereof or its respective duties hereunder, and neither of them shall incur any liability and shall be fully protected in acting in good faith upon the advice of such legal counsel.

SECTION 12. Amendment; Waiver. Notwithstanding any other provision of this Disclosure Agreement, the Issuer and the Disclosure Dissemination Agent may amend this Disclosure Agreement and any provision of this Disclosure Agreement may be waived, if such amendment or waiver is supported by an opinion of counsel expert in federal securities laws acceptable to both the

Issuer and the Disclosure Dissemination Agent to the effect that such amendment or waiver does not materially impair the interests of Holders of the Bonds and would not, in and of itself, cause the undertakings herein to violate the Rule if such amendment or waiver had been effective on the date hereof but taking into account any subsequent change in or official interpretation of the Rule; provided neither the Issuer or the Disclosure Dissemination Agent shall be obligated to agree to any amendment modifying their respective duties or obligations without their consent thereto.

Notwithstanding the preceding paragraph, the Disclosure Dissemination Agent shall have the right to adopt amendments to this Disclosure Agreement necessary to comply with modifications to and interpretations of the provisions of the Rule as announced by the Securities and Exchange Commission from time to time by giving not less than 20 days written notice of the intent to do so together with a copy of the proposed amendment to the Issuer. No such amendment shall become effective if the Issuer shall, within 20 days following the giving of such notice, send a notice to the Disclosure Dissemination Agent in writing that it objects to such amendment.

SECTION 13. Beneficiaries. This Disclosure Agreement shall inure solely to the benefit of the Issuer, the Disclosure Dissemination Agent, the Underwriters, and the Holders from time to time of the Bonds, and shall create no rights in any other person or entity.

SECTION 14. Governing Law. This Disclosure Agreement shall be governed by the laws of the Commonwealth of Virginia (other than with respect to conflicts of laws).

SECTION 15. Counterparts. This Disclosure Agreement may be executed in several counterparts, each of which shall be an original and all of which shall constitute but one and the same instrument.

The Disclosure Dissemination Agent and the Issuer have caused this Continuing Disclosure Agreement to be executed, on the date first written above, by their respective officers duly authorized.
