(1) Except for Transportation Network Company (TNC) drivers, use of the NTTA TollTag system is required for all commercial ground transportation vehicles, unless another payment process is approved by the Board. Failure to utilize the system will result in a \$24 charge each time a vehicle exits the Public Parking Revenue Area. Except as specified below for Transportation Network Companies (TNCs), all access fees and any public parking rates are collected from the vehicles' NTTA account upon exiting the Public Parking Revenue Area.

(2) Except as specified below for TNC drivers, the access fees entitle all classes of commercial ground transportation vehicles to be within the Public Parking Revenue Area for two hours without accruing public parking rates. After two hours, all classes of commercial ground transportation vehicles will accrue public parking rates.

(3) Taxicabs must pay the access fee for each dispatched pick-up within the Public Parking Revenue Area and for each drop-off within the Public Parking Revenue Area.

(4) TNCs must pay \$3 for each digitally prearranged ride to, from, or within the Public Parking Revenue Area. Their portion of the access fees will be paid directly to the Airport on a monthly basis, as described in their permit. Because TNC drivers will not be identified within the system as TNC drivers, they shall accrue public parking rates immediately upon entering the Public Parking Revenue Area, regardless of whether their digital applications are active or otherwise capable of receiving a request for a digitally prearranged ride while they are within the Public Parking Revenue Area. The payment of public parking rates by a TNC driver during the first 30 minutes within the Public Parking Revenue Area will be deemed compensation to the Airport for the remaining portion of the access fee (\$2). Any additional revenue collected will be considered public parking revenue.

(5) TNCs who choose not to cooperate in implementing and continuously providing data for the real-time TNC vehicle tracking and reporting application shall pay the per-trip administrative service fee.

INTRODUCTION

A. GENERAL

This Schedule of Charges has been approved by the Dallas/Fort Worth International Airport Board (“DFW” or the “Board”) and is distributed to all tenants and users of the airport annually. The rates, fees, and charges specified herein are effective on October 1, 2020

Please direct any questions or comments concerning this schedule to the Assistant Vice-President of Financial Planning at 972-973-5445.

B. METHODS OF CALCULATION

The Airline Lease and Use Agreement imposes on each Signatory Airline, the obligation to pay rentals, fees, and charges for the use and occupancy of the airport. These payments, together with rentals, fees, and charges paid by other airport users, will produce total annual gross revenues sufficient to pay the operation and maintenance expenses of the airport, plus 1.25 times the payment of principal and interest on the joint revenue bonds, plus the payment of any other obligations required to be paid from the revenues of the airport. The Airline Lease and Use Agreement contains formulas for the calculation of many airport rates, fees, and charges. Copies of the Airline Lease and Use Agreement may be obtained from the Aviation Real Estate Department.

C. DEFINITIONS

Aircraft – shall mean and include fixed-wing, helicopter, and other rotary-wing airships.

Airline Lease and Use Agreement – shall mean that agreement between the DFW Airport Board (“Board”) and an airline in which the airline agrees to pay rentals, fees, and charges for its use of and operation (or right to operate) at the Dallas/Fort Worth International Airport (“Airport”), and the use and lease of the Terminal and facilities, and the services appertaining thereto, in an amount which, together with rentals, fees, and charges paid by other airlines and other entities using the Airport and Terminal facilities, will be sufficient to produce total gross revenues in each fiscal year as required to satisfy the Board’s obligations (“Agreement”).

Alarm System – shall mean a device or system that emits, transmits, or relays a signal intended to summon, or that would reasonably be expected to summon, police services of the Airport. An Alarm System does not include:

1. An alarm designed to alert only the inhabitants of a premise;
2. An alarm installed on a vehicle unless the vehicle is permanently located at a site; and
3. An automated access control system, which is not designed as an intruder alarm, but only designed to allow orderly access to designated areas.

Alarm Notification – shall mean a notification intended to summon the police, which is designed either to be initiated purposely by a person or by an alarm system that responds to a stimulus characteristic of unauthorized intrusion.

Alarm Site – shall mean a single premise or location served by an alarm system or systems that are under the control of one person or company.

Automated Access Control System – shall mean an automated system for access to Air Operations Areas (AOA), Security Identification Display Areas (SIDA), and Sterile Areas of the airport in compliance with 49 CFR 1500 et al, and other facilities and structures, which have been designated by the DFW Airport Board.

Equipment Staging Area – Any portion of the ramp used for the short-term staging of equipment and cargo. The Equipment Staging Area may be used up to four hours before and after aircraft arrival.

Ground Servicing Equipment (GSE) – Any equipment that is owned, leased, licensed to or operated by a ground handler. GSE includes vehicles used for loading and unloading aircraft, fueling, catering, cleaning, high lift vehicles, water trucks, dollies, tow bars, mobile stairs, tail lifts, tugs, ground power units, repair service vehicles and any other vehicle or rolling stock not specifically mentioned.

Ground Service Equipment (GSE) Storage Area – An area (not on the ramp) dedicated to the safe storage of all GSE when it is not in use.

Ground Transportation Information Board – shall mean those signage systems provided at each terminal within the baggage claim areas. The Ground Transportation Information Board provides passengers with information on ground transportation service providers; e.g., taxicabs, limousines, rental cars, shuttle service, and shared ride.

Interline Agreement – shall mean that agreement to provide baggage transfers between airlines and the transport of mail between the airlines and the U.S. Postal Service.

Maximum Approved Landed Weight – shall mean the Federal Aviation Administration certified approved landed weight of a specific aircraft.

Non-Scheduled Airline – shall mean a carrier not having a published arrival and departure schedule in the Official Airline Guide. A Non-Scheduled Airline may operate on an ad-hoc basis or have a program of operations for a particular travel season.

Non-Signatory Airline – shall mean a certificated air carrier which has not executed an agreement with the Board substantially similar to the Agreement.

Parking Control System – shall mean the automated control system supporting the parking operation.

Public Parking Revenue Area – Shall mean the north and south remote parking lots and all areas of the Airport that may be accessed through the parking plazas on International Parkway.

Public Parking Revenue Area Operator– shall mean any vehicle operator including the public operator of a military, church, school bus and/or other vehicle (except those specifically addressed and defined elsewhere) who enters and exits the Public Parking Revenue Area.

Ramp – Any area dedicated for parking of aircraft and the processing of cargo.

Scheduled Airline – shall mean a carrier having a published arrival and departure schedule in the Official Airline Guide.

Signatory Airline – shall mean a certificated air carrier that has entered into and executed an Agreement with the Board.

Unit Load Devices (ULD) – Any container used to hold freight. Empty ULD's must be securely stored at all times as they pose a risk of moving during high winds and storms. Empty ULD's should be stored on/in a racking system or secured to a dolly to avoid this risk. At no time are ULD's to be stored directly on the ground or pavement.

D. WAIVER OF CHARGES

The Chief Financial Officer of DFW Airport, or his/her designee, may waive or adjust an assessment, charge or fee where there is good cause to support such waiver or adjustment. It is the responsibility of the person, company, or organization requesting the waiver or adjustment, to document the request to the Chief Financial Officer or his/her designee. Until the waiver or adjustment is granted, the charge is due and payable under the rules set forth in this Schedule of Charges. Not all potential aircraft types and required services are listed above. It will be at the discretion of the Airport Board to adjust the Use Fee based on the size of aircraft, number of passengers, type and frequency of operations, and the terminal services needed of the operation in question.

D. TERMINAL GATE/HARDSTAND OPERATIONS

1. Aircraft arriving on a assigned gate is charged for a full turn.
2. Aircraft arriving on an assigned hardstand position is charged 50% of the gate turn fee.

3. TECH STOPS

Tech Stops will be charged 50% of the Charter per turn rate. A Tech Stop is defined as an aircraft arriving on a Common Use Gates for purposes of fueling in route during a weather or aircraft maintenance divert from a primary airport (“Tech Stop”). Tech Stop fee also applies to an operational aircraft (both live and ferry), utilizing a hardstand parking position.

A Tech Stop does not allow passenger on/off loading at a Terminal. If passengers enplane or deplane at a terminal, the airline will be subject to the Charter Common Use Gate charges.

4. COMMON USE GATE UTILIZATION

Passenger Airlines using a designated Common Use Gate shall be allotted a specified allotment of time based on the aircraft type. This time allotment is defined as the block of time when the aircraft chocks are positioned upon-arrival and until the start of the push back of an aircraft vacating the designated common gate location.

Maximum Aircraft Gate Turn Time

<u>Aircraft Type</u>	<u>Gate Turn Time</u>
RJ/Props	75 minutes
Single Aisle	90 minutes
Double Aisle	180 minutes
Double Aisle/Double Deck	240 minutes

Aircraft remaining in excess of allotted ground time on a Common Use Gate may be subject to Excess Gate Utilization Fees:

First thirty (30) minutes	\$150
Second thirty (30) minutes	\$150
Additional thirty (30) minute increments	\$300

Exceptions:

- i. If a flight exceeds its allotted gate time but does not impact another carrier, no excess utilization fee will be applied.
- ii. If a flight exceeds its allotted gate time and impacts another carrier, applicable excess utilization fee will be applied, unless Ramp Tower is advised in a timely manner and the arriving carrier can be accommodated on another gate, no excess utilization fee will be applied.
- iii. If the arriving flight is the same carrier occupying the gate, no excess utilization fee will be applied.

5. AIRCRAFT HARDSTAND PARKING FEES

Aircraft will be subject to the applicable rates listed below for parking passenger aircraft at DFW Common Use Gates or designated Hardstand position areas (including ramp F).

Aircraft that remain-over-night (RON) will be charged a hardstand parking fee applicable to the aircraft size, except Signatory Airlines leasing terminal preferential gate space and assigned the use of a Terminal Aircraft hardstand position by Ramp Operations may park an aircraft at the assigned Hardstand position for a period not exceed eight (8) hours.

Aircraft Hardstand Parking positions used by a Non-Signatory Airline or a Signatory Airline not lease terminal gates space and any unauthorized use of the Aircraft Hardstand Parking positions by an airline will be subject to Aircraft Parking fees as listed below.

<u>Aircraft Type</u>	<u>Parking Fee</u>
Single Aisle	\$125

Double Aisle over 300,000-750,000 MGLW	\$225
Double Aisle 750,000+ MGLW	\$500

Parking is on a space available basis and at the discretion of Ramp Tower, up to a maximum 12-hour blocked period and/or fraction thereof.

E. NON-PERMITTEE PAYMENT REQUIREMENT

Any airline (other than a Signatory/Permittee Airlines) operating a charter flight on a Common Use Gate is required to pay all operating fees five (5) business days in advance of its charter operation. If a request to operate a charter flight is received within five (5) business days of their charter operation, the airline is required to pay all operating fees within 24 hours of the request or prior to the charter flight's arrival (whichever occurs first). If payment is not received by the above deadline, the use of the gate is subject to cancellation.

Except as specified below for Transportation Network Companies (TNCs), all access fees and any public parking rates are collected from the vehicles' NTTA account upon exiting the Public Parking Revenue Area.

After two hours, all classes of commercial ground transportation vehicles will accrue public parking rates.

(3) Taxicabs must pay the access fee for each dispatched pick-up within the Public Parking Revenue Area and for each drop-off within the Public Parking Revenue Area.

(4) TNCs must pay \$3 for each digitally prearranged ride to, from, or within the Public Parking Revenue Area. Their portion of the access fees will be paid directly to the Airport on a monthly basis, as described in their permit. Because TNC drivers will not be identified within the system as TNC drivers, they shall accrue public parking rates immediately upon entering the Public Parking Revenue Area, regardless of whether their digital applications are active or otherwise capable of receiving a request for a digitally prearranged ride while they are within the Public Parking Revenue Area. The payment of public parking rates by a TNC driver during the first 30 minutes within the Public Parking Revenue Area will be deemed compensation to the Airport for the remaining portion of the access fee (\$2). Any additional revenue collected will be considered public parking revenue.

(5) TNCs who choose not to cooperate in implementing and continuously providing data for the real-time TNC vehicle tracking and reporting application shall pay the per-trip administrative service fee.

<u>Frequency</u>	<u>Fee</u>
1 to 3 occurrences	No Charge
4 to 5 occurrences	\$50 per response
6 to 7 occurrences	\$75 per response
8 or more	\$100 per response

The false alarm occurrence number is determined by the total number of false alarms during the preceding twelve (12) month period.

If a business has more than one address on the Airport, each address is considered separately for the purposes of calculating the false alarm occurrence number and no response status.

No Alarm Response Status

After the eighth (8th) false alarm, DPS will send notification by certified mail or officer delivery, informing the business DPS will no longer respond to the alarm beginning on the 15th calendar day after receipt of the notification.

Additional False Alarms After Reinstatement

If alarm response has been reinstated the business will be allowed three (3) false alarms during a 12-month period, beginning from the date of reinstatement. Each false alarm response will result in a fee of \$100. DPS will send notification per the no response procedures. The business will be placed on a no response status for twelve (12) months from the date of notification. The no response status may be lifted or modified only by the Chief of Police. After the twelfth (12th) month, the no alarm response status expires, or if the conditions to reinstate have been met, DPS will resume alarm response as if the business has zero alarms. The next false alarm will count as the first (1st) false alarm.

Energy Plaza provides heating and cooling service to Terminals A, B, C, & D; Terminal E Satellite, Verizon, DFW Business Center, Grand Hyatt and Hyatt Regency, FAA TRACON, AA Priority Parcel Facility, Skylink MSF, and DFW's ITS Data Center.

2. Sub-tenant pro-rated charges

The primary tenant of a terminal building may pro-rate heating and cooling charges to sub-tenants on a square foot basis. In some cases, the primary tenant may have an arrangement to bill sub-tenants on a pro-rated basis.

B. ELECTRICAL AND NATURAL GAS

Electrical service is provided by contract between the tenant and the certified Retail Electric Provider (REP) of their choosing or by the Airport Board. Natural gas service is provided by contract between the tenant and ATMOS Energy or by the Airport Board.

All tenants receiving electric and/or gas utilities service from the Airport Board to the respective leased areas shall be required to make a security deposit in advance equal to 1/5th of the tenant's estimated annual billings. In those instances, wherein a tenant is unable to provide history for establishing usage to determine the amount of the security deposit as stated, the Airport Board may establish the initial amount of the deposit based on the usage of a like tenant class.

In the event the tenant defaults in the payment of electric and/or gas utility services, the Airport Board may use, apply or retain the whole or any part of the security deposit to the extent required for payment of the delinquent amount. If the tenant terminates the landlord/tenant relationship and is current in its payments to the Airport Board, the security Deposit shall be returned to the tenant.

C. WATER

Treated (potable/drinkable) water, reclaimed water, and sewer charges are based on operating and maintenance costs, and current Airport Board overhead. Charges are assessed on the basis of consumption.

Water

Treated Water Charge	\$5.45	1,000 Gallons
Reclaimed Water Charge	\$4.45	1,000 Gallons
Sewer	\$4.25	1,000 Gallons

Construction projects on the airport, requiring the use of potable water, will be billed at the prevailing rates. Construction projects that will utilize potable water with a demand rate in excess of 500 gallons per minute, regardless of cumulative total consumption, shall be coordinated in advance of need with DFW Water Systems.

All new or enlarged, permanent water meter installations, served by DFW Airport's potable water distribution system, will be subject to an impact tapping/connection fee. The impact tapping/connection fee shall be based on the size of the water meter and shall be determined by using the current impact fee rates established by the City of Fort Worth's Water Department for new and enlarged services on DFW Airport's potable water system. The impact tapping/connection fee must be paid during the construction phase of the project. Contact the

DFW Utilities Manager at 972-973-3637 for information on the current Water System Impact Tapping/Connection fees.

A water use permit must be obtained by the prime contractor prior to usage. A damage deposit of \$3,000 for water taps or hydrant attachments must be submitted at the time of application. All billings for water usage will be the sole responsibility of the prime contractor.

The prime contractor shall ensure that no meter is installed or replaced without prior contact with DFW Water Systems to have the meter read and recorded. Failure to contact DFW Water Systems may result in either the forfeiture of the \$3,000 damage deposit or a billing based upon calculated usage.

In the event of meter failure, consumption will be estimated based on usage under similar conditions during a period preceding and/or subsequent thereto, or corresponding periods in previous years.

 - The current landing rate as may be amended from time to time, multiplied by:
 - The number of flights scheduled to be conducted in three (3) months.
