**INFLATION ADJUSTMENTS**

All tariff rates, deposits, fees, rentals and charges shall be automatically adjusted each year (beginning in 1999), effective each December 1, to reflect inflation increases which have occurred since the previous rate adjustment as measured by the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) for Seattle-Tacoma Bremerton (or successor index or reasonable substitute if no successor index is readily identifiable). Inflation adjustments shall be calculated as the average annual percentage change in the index for all reporting periods during the previous 12-month period ending in October. All inflation adjustments shall be rounded to the nearest 25 cents for ease of administration. The Executive Director may waive implementation of all or a portion of the automatic annual inflationary increase in any year for a specific tariff or tariff item, if such increase would result in market imbalance, or would be technologically infeasible or otherwise detrimental to Port interests.

**NOTE:** Some items are described in prices that are small such that rounding up to the nearest 25 cents is either not possible or feasible on a CPI-W adjustment. Since the intent was to make it easier for the Port administratively to take increases by rounding up, the Port may, at its option, take the actual CPI-W increase on specific items, no matter how small the actual increase is.

**SCHEDULE OF LANDING FEES – SIGNATORY AIRCRAFT**

This tariff applies to airlines that have a Signatory Lease and Operating Agreement with the Port of Seattle (“Signatory Airlines”). Ground Transportation rates are calculated each year by dividing budgeted operating and capital costs associated with each operator type by the forecasted trips for that operator type. GT operators on annual permits have their calculated per trip fees converted to annual permit prices.

The Ground Transportation industry is undergoing significant changes. As a result of the volatility in the industry, costs associated to each GT operator category and the volume of trips by operator category may change significantly year-over-year.

The cost recovery methodology relies on estimates which are based on the best available data when the tariff rates are developed. Due to the volatility in the industry, actual results may vary from the estimates used when the tariff rates were developed.

The Port may revise the GT tariff rates during the year, if projected levels of GT activity are expected to vary significantly (higher or lower) from actual results. The Port will provide at least thirty (30) days advance written notice of any adjustments to be made mid-year to the GT tariff rates.

In those tenant areas where the applicable lease agreement does not allocate responsibility for pest control to the tenant, there is no separate charge for pest management services. |  | <b>Per Square Foot<br/>Per Year</b> |

The charge will be calculated by multiplying the appropriate rate (“wet area” vs. “dry area”) by the square footage as set forth in the lease agreement. Where the square footage of a leased space (unit) is not clearly defined or unavailable, the area will be determined by the most recent CAD drawings of a given unit. **“Dry area” concessions** are those that do not prepare food and/or beverage products for sale or service to the public. **“Wet area” concessions** are those tenants involved in food and/or beverage preparation, service, or sale to the public.

**SCHEDULE OF SECURITY VIOLATION FINES (CONTINUED)**

**B. APPEAL PROCESS**

An appeal process is available to those who receive Violation Notices. This process allows the individual an opportunity to reveal any extenuating circumstances which may influence the assessment of penalties associated with the violation. Individuals cited by the Port for violations of the Rules and Regulations, the ASP, or Title 49, Code of Federal Regulations (CFR), Part 1500 will be granted fourteen (14) calendar days from the dated violation notice within which to file an appeal in writing before penalties are assessed. The Airport Security Appeals Board (consisting of agencies representing security) is the reviewing body for all such appeals. If no appeal is received, final penalties will be assessed based upon the offense cited.
